Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

Summary for Pond 3P: Detention Basin (SMA #1)

Inflow Area = 4.400 ac, 61.36% Impervious, Inflow Depth = 4.22" for 25-Year event
Inflow = 34.94 cfs @ 12.07 hrs, Volume= 1.548 af
Outflow = 0.64 cfs @ 14.10 hrs, Volume= 1.276 af, Atten= 98%, Lag= 121.4 min
Primary = 0.64 cfs @ 14.10 hrs, Volume= 1.276 af
Secondary = 0.00 cfs @ 0.00 hrs, Volume= 0.000 af

Routing by Stor-Ind method, Time Span= 0.00-60.00 hrs, dt= 0.01 hrs
Peak Elev= 575.83' @ 14.10 hrs Surf.Area= 65,573 sf Storage= 51,963 cf

Plug-Flow detention time= 951.6 min calculated for 1.276 af (82% of inflow)
Center-of-Mass det. time= 890.6 min (1,667.8 - 777.2)

Volume	Invert	Avail.Storage	Storage Description
#1	575.00'	118,224 cf	**Custom Stage Data (Prismatic)** Listed below (Recalc)

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

Summary for Pond 3P: Detention Basin (SMA #1)

Inflow Area = 4.400 ac, 61.36% Impervious, Inflow Depth = 5.27" for 50-Year event
Inflow = 42.93 cfs @ 12.07 hrs, Volume= 1.933 af
Outflow = 1.97 cfs @ 12.73 hrs, Volume= 1.635 af, Atten= 95%, Lag= 39.8 min
Primary = 0.72 cfs @ 12.73 hrs, Volume= 1.504 af
Secondary = 1.25 cfs @ 12.73 hrs, Volume= 0.131 af

Routing by Stor-Ind method, Time Span= 0.00-60.00 hrs, dt= 0.01 hrs
Peak Elev= 576.00' @ 12.73 hrs Surf.Area= 66,838 sf Storage= 62,935 cf

Plug-Flow detention time= 900.4 min calculated for 1.635 af (85% of inflow)
Center-of-Mass det. time= 844.0 min (1,616.3 - 772.2)

Volume	Invert	Avail.Storage	Storage Description
#1	575.00'	118,224 cf	**Custom Stage Data (Prismatic)** Listed below (Recalc)

Summary for Pond 9P: Bioretention Area 3

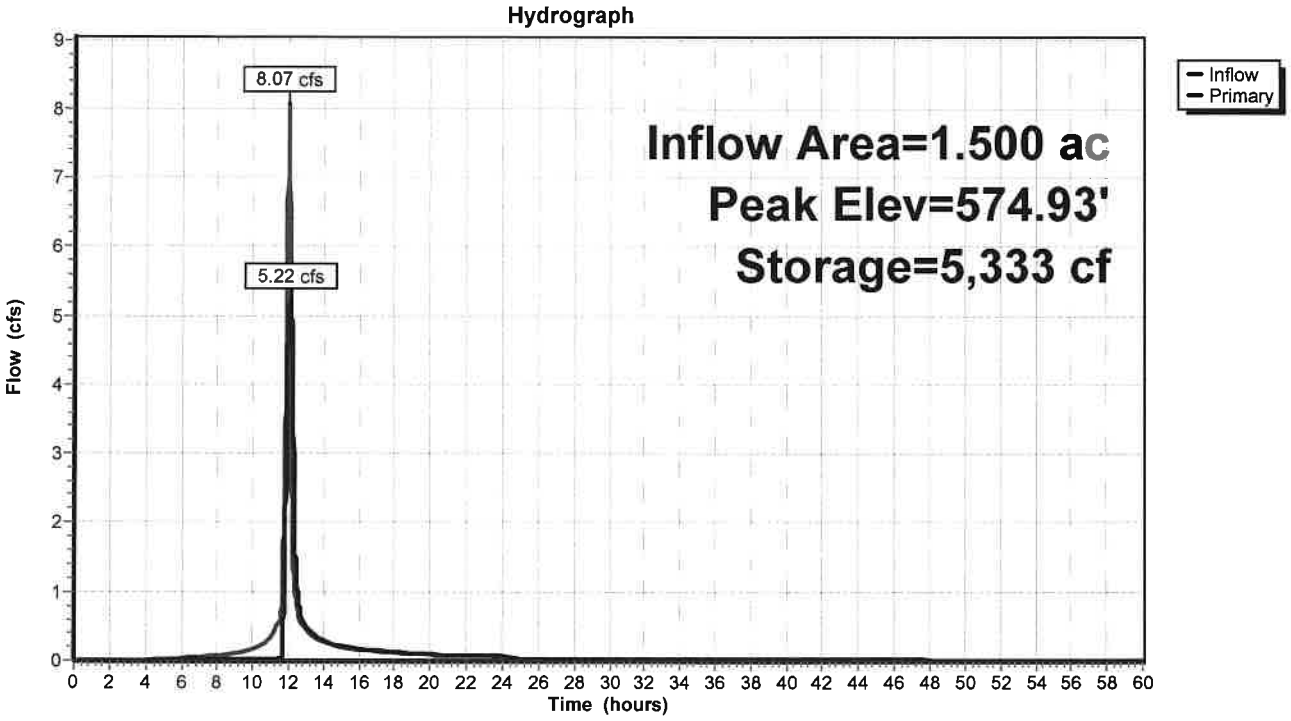
Inflow Area = 1.500 ac, 66.67% Impervious, Inflow Depth = 3.62" for 50-Year event
Inflow = 8.07 cfs @ 12.00 hrs, Volume= 0.453 af
Outflow = 5.22 cfs @ 12.09 hrs, Volume= 0.453 af, Atten= 35%, Lag= 5.1 min
Primary = 5.22 cfs @ 12.09 hrs, Volume= 0.453 af

Routing by Stor-Ind method, Time Span= 0.00-60.00 hrs, dt= 0.01 hrs
Peak Elev= 574.93' @ 12.09 hrs Surf.Area= 6,611 sf Storage= 5,333 cf

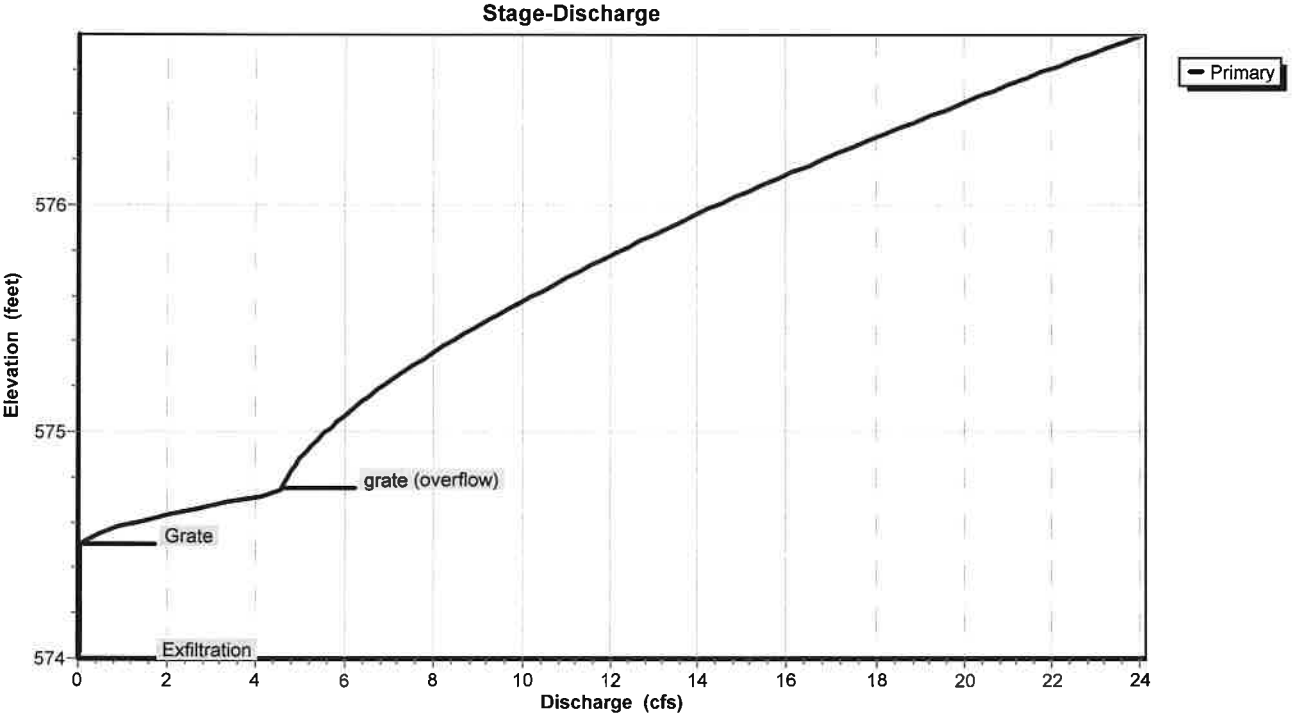
Plug-Flow detention time= 214.9 min calculated for 0.453 af (100% of inflow)
Center-of-Mass det. time= 215.2 min (1,000.7 - 785.5)

Volume	Invert	Avail.Storage	Storage Description
#1	574.00'	9,318 cf	**Custom Stage Data (Prismatic)** Listed below (Recalc)



Elevation (feet)	Surf.Area (sq-ft)	Inc.Store (cubic-feet)	Cum.Store (cubic-feet)
574.00	4,851	0	0
575.00	6,743	5,797	5,797
575.50	7,342	3,521	9,318

Device	Routing	Invert	Outlet Devices
#1	Primary	571.41'	**12.0" Round 8" pipe** L= 132.0' CPP, square edge headwall, Ke= 0.500 Inlet / Outlet Invert= 571.41' / 570.75' S= 0.0050 '/' Cc= 0.900 n= 0.013 Corrugated PE, smooth interior, Flow Area= 0.79 sf
#2	Device 1	574.50'	**8.0" Horiz. Grate X 6.00** C= 0.600 Limited to weir flow at low heads
#3	Device 1	574.00'	**0.250 in/hr Exfiltration over Surface area** Conductivity to Groundwater Elevation = 560.00'
#4	Primary	574.75'	**24.0" W x 24.0" H Vert. grate (overflow)** C= 0.600



Primary OutFlow Max=5.22 cfs @ 12.09 hrs HW=574.93' (Free Discharge)
- **1=8" pipe** (Barrel Controls 4.73 cfs @ 6.02 fps)
  - **2=Grate** (Passes < 6.61 cfs potential flow)
  - **3=Exfiltration** (Passes < 0.04 cfs potential flow)
- **4=grate (overflow)** (Orifice Controls 0.49 cfs @ 1.36 fps)

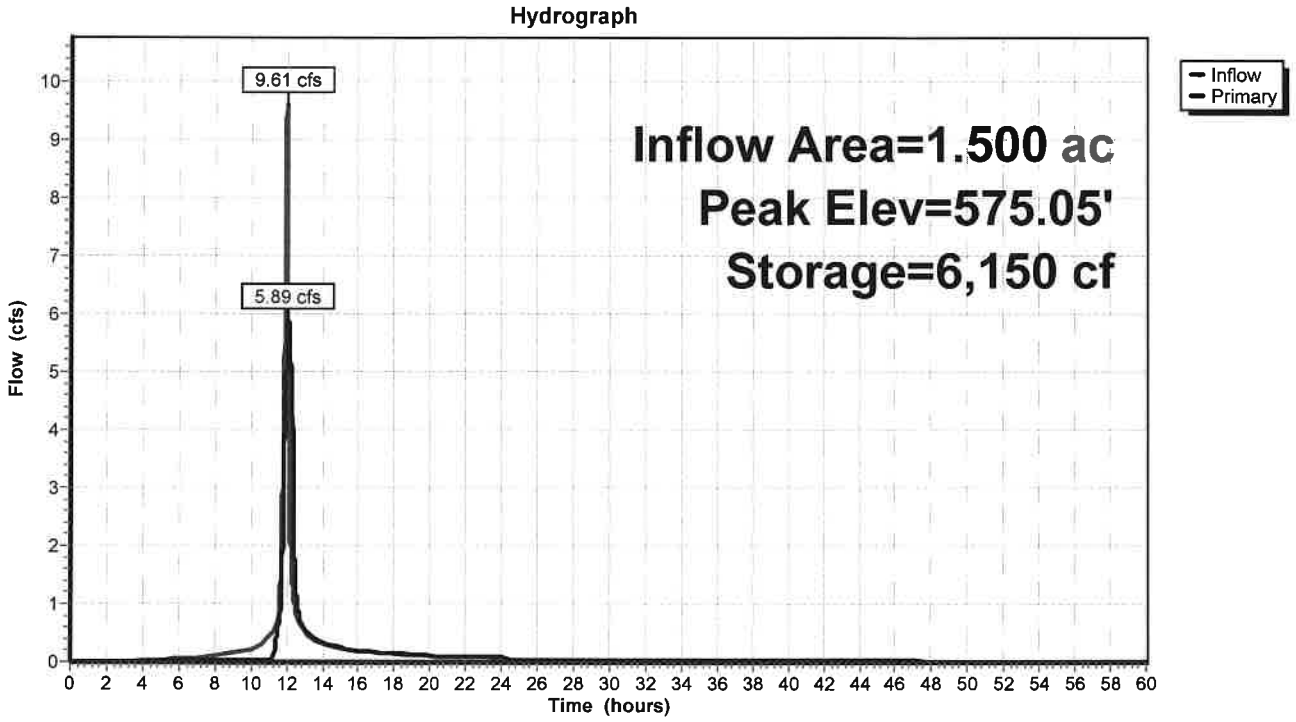
Summary for Pond 9P: Bioretention Area 3

Inflow Area = 1.500 ac, 66.67% Impervious, Inflow Depth = 4.36" for 100-Year event
Inflow = 9.61 cfs @ 12.00 hrs, Volume= 0.545 af
Outflow = 5.89 cfs @ 12.09 hrs, Volume= 0.545 af, Atten= 39%, Lag= 5.5 min
Primary = 5.89 cfs @ 12.09 hrs, Volume= 0.545 af

Routing by Stor-Ind method, Time Span= 0.00-60.00 hrs, dt= 0.01 hrs
Peak Elev= 575.05' @ 12.09 hrs Surf.Area= 6,805 sf Storage= 6,150 cf

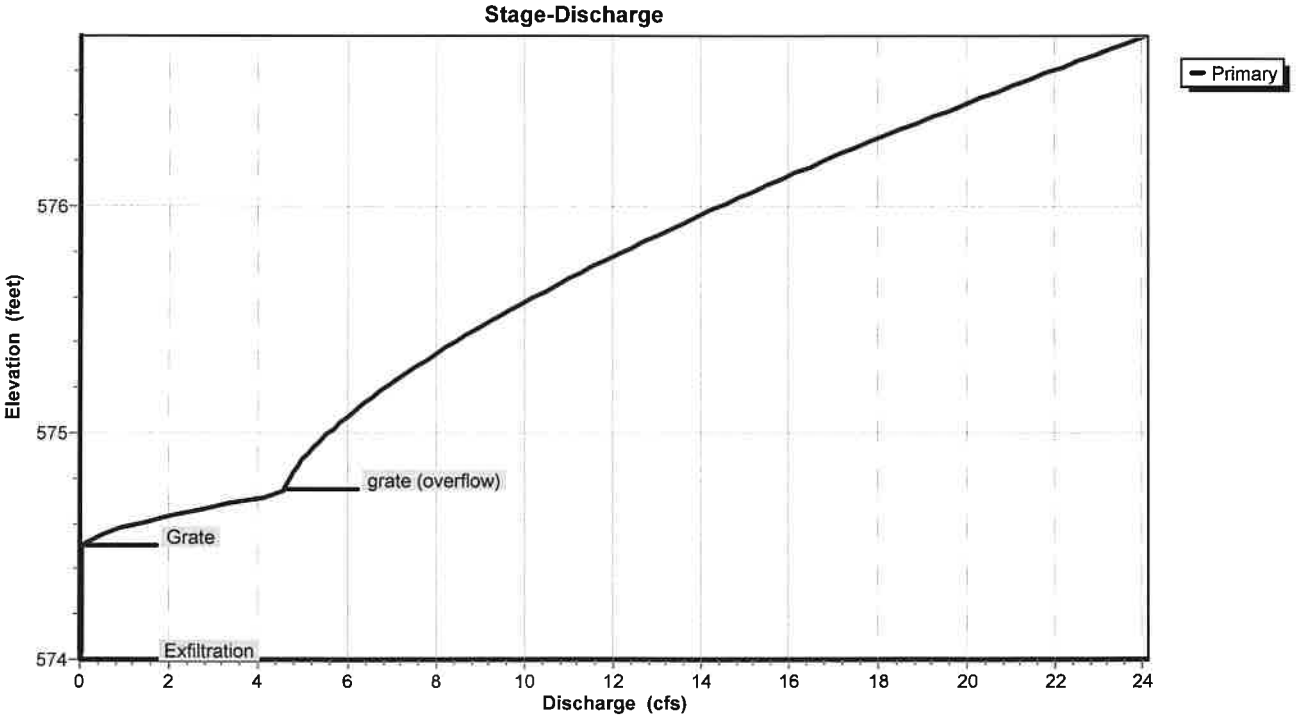
Plug-Flow detention time= 184.7 min calculated for 0.545 af (100% of inflow)
Center-of-Mass det. time= 185.0 min (965.5 - 780.5)

Volume	Invert	Avail.Storage	Storage Description
#1	574.00'	9,318 cf	**Custom Stage Data (Prismatic)** Listed below (Recalc)



Elevation (feet)	Surf.Area (sq-ft)	Inc.Store (cubic-feet)	Cum.Store (cubic-feet)
574.00	4,851	0	0
575.00	6,743	5,797	5,797
575.50	7,342	3,521	9,318

Device	Routing	Invert	Outlet Devices
#1	Primary	571.41'	**12.0" Round 8" pipe** L= 132.0' CPP, square edge headwall, Ke= 0.500 Inlet / Outlet Invert= 571.41' / 570.75' S= 0.0050 '/' Cc= 0.900 n= 0.013 Corrugated PE, smooth interior, Flow Area= 0.79 sf
#2	Device 1	574.50'	**8.0" Horiz. Grate X 6.00** C= 0.600 Limited to weir flow at low heads
#3	Device 1	574.00'	**0.250 in/hr Exfiltration over Surface area** Conductivity to Groundwater Elevation = 560.00'
#4	Primary	574.75'	**24.0" W x 24.0" H Vert. grate (overflow)** C= 0.600



Primary OutFlow Max=5.88 cfs @ 12.09 hrs HW=575.05' (Free Discharge)
- **1=8" pipe** (Barrel Controls 4.82 cfs @ 6.14 fps)
  - **2=Grate** (Passes < 7.49 cfs potential flow)
  - **3=Exfiltration** (Passes < 0.04 cfs potential flow)
- **4=grate (overflow)** (Orifice Controls 1.06 cfs @ 1.76 fps)

Green Infrastructure & Water Quality Calculations

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

Version 1.7
Last Updated: 2/22/21

Total Water Quality Volume Calculation
WQv(acre-feet) = [(P)(Rv)(A)] /12

Is this project subject to Chapter 10 of the NYS Design Manual (i.e. WQv is equal to post-development 1 year runoff volume)?.....	

Design Point:	1	
P=	1.00	*inch*

Breakdown of Subcatchments

Catchment Number	Total Area *(Acres)*	Impervious Area *(Acres)*	Percent Impervious *%*	Rv	WQv *(ft^3)*	Description
1	6.10	3.30	54%	0.54	11,888	
2	1.00	0.00	0%	0.05	182	
3	4.40	2.70	61%	0.60	9,620	
4	1.70	1.00	59%	0.58	3,576	
5	1.50	1.00	67%	0.65	3,539	
6

Design Elements

Is Contiguous Area ≥ 10,000 ft2?	*Yes*
Will limits of disturbance be clearly shown on all construction drawings and marked in field/project development site with structural barriers?	*Yes*
Is the Conservation area located in an acceptable conservation easement instrument that ensures perpetual protection of proposed area?	*Yes*
Does the easement specify how the natural area vegetation will be managed and boundaries will be marked?	*Yes*
Does the conservation area receive runoff from other contributing areas?	*No*
Does Conservation Area drain to a Design Point?	*No*
Is Sheet Flow to Riparian Buffer or another area based practice already being Used for this area?	*No*

Are All Criteria in Section 5.3.1 Met?	*Yes*

Appendix O

NYSDEC Stormwater Management Inspection Lists

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

Bioretetion Areas (F-5)

Description: Shallow stormwater basin or landscaped area which utilizes engineered soils and vegetation to capture and treat runoff. The practice is often located in parking lot islands, and can also be used to treat residential areas.

KEY CONSIDERATIONS

CONVEYANCE

- Provide overflow for the 10-year storm to the conveyance system.
- Conveyance to the system is typically overland flow delivered to the surface of the system, typically through curb cuts or over a concrete lip.

PRETREATMENT

- Pretreatment consists of a grass channel or grass filter strip, a gravel diaphragm, and a mulch layer, sized based on the methodologies described in Section 6.4.2.

TREATMENT

- Treatment area should have a four foot deep planting soil bed, a surface mulch layer, and a 6" ponding layer.
- Size the treatment area using equations provided in Chapter 6.

LANDSCAPING

- Detailed landscaping plan required.

MAINTENANCE

- Inspect and repair/replace treatment area components
- Stone drop (at least 6") provided at the inlet
- Remulch annually

STORMWATER MANAGEMENT SUITABILITY

- [X] Water Quality
- [ ] Channel Protection
- [ ] Overbank Flood Protection
- [ ] Extreme Flood Protection

Accepts Hotspot Runoff: *Yes*
(requires impermeable liner)

IMPLEMENTATION CONSIDERATIONS

- [M] Capital Cost
- [M] Maintenance Burden

Residential
Subdivision Use: *Yes*

High Density/Ultra-Urban: *Yes*

Drainage Area: *5 acres max.*

Soils: *Planting soils must meet specified criteria; No restrictions on surrounding soils*

Other Considerations:

- *Use of native plants is recommended*

Location:
Site Status:

Date:

Time:

Inspector:

CONSTRUCTION SEQUENCE	SATISFACTORY/ UNSATISFACTORY	COMMENTS
1. Pre-Construction		
Pre-construction meeting		
Runoff diverted		
Facility area cleared		
If designed as exfilter, soil testing for permeability		
Facility location staked out		
2. Excavation		
Size and location		
Lateral slopes completely level		
If designed as exfilter, ensure that excavation does not compact susoils.		
Longitudinal slopes within design range		

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

CONSTRUCTION SEQUENCE	SATISFACTORY / UNSATISFACTORY	COMMENTS
3. Structural Components		
Stone diaphragm installed correctly		
Outlets installed correctly		
Underdrain		
Pretreatment devices installed		
Soil bed composition and texture		
4. Vegetation		
Complies with planting specs		
Topsoil adequate in composition and placement		
Adequate erosion control measures in place		
5. Final Inspection		
Dimensions		
Proper stone diaphragm		
Proper outlet		
Soil/ filter bed permeability testing		
Effective stand of vegetation and stabilization		
Construction generated sediments removed		
Contributing watershed stabilized before flow is diverted to the practice

Bioretention Operation, Maintenance and Management Inspection Checklist

Project:
Location:
Site Status:

Date:

Time:

Inspector:

MAINTENANCE ITEM	SATISFACTORY / UNSATISFACTORY	COMMENTS
1. Debris Cleanout (Monthly)		
Bioretention and contributing areas clean of debris		
No dumping of yard wastes into practice		
Litter (branches, etc.) have been removed		
2. Vegetation (Monthly)		
Plant height not less than design water depth		
Fertilized per specifications		
Plant composition according to approved plans		
No placement of inappropriate plants		
Grass height not greater than 6 inches		
No evidence of erosion		
3. Check Dams/Energy Dissipaters/Sumps (Annual, After Major Storms)		
No evidence of sediment buildup		

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

MAINTENANCE ITEM	SATISFACTORY / UNSATISFACTORY	COMMENTS
Sumps should not be more than 50% full of sediment		
No evidence of erosion at downstream toe of drop structure		
4. Dewatering (Monthly)		
Dewaters between storms		
No evidence of standing water		
5. Sediment Deposition (Annual)		
Swale clean of sediments		
Sediments should not be > 20% of swale design depth		
6. Outlet/Overflow Spillway (Annual, After Major Storms)		
Good condition, no need for repair		
No evidence of erosion		
No evidence of any blockages

RE: Sawyer's Landing Development, Town of Amherst, NY
Updated Traffic Signal Warrant Analysis

Dear Mr. Severyn:

This letter documents the results of the updated traffic signal warrant analysis at the intersection of Dodge Rd & North Forest Rd in the Town of Amherst, NY. The traffic signal warrant analysis has been updated to include a review of crash data and application of Warrant 7 Crash Experience.

Hourly traffic count data was collected on each approach of the Dodge Rd/North Forest Rd intersection on Thursday March 3, 2022. All traffic count data and signal warrant analysis calculations are attached.

A traffic signal warrant analysis was completed at the Dodge Rd/North Forest Rd intersection under both existing and full build conditions. The need for a traffic signal is determined by comprehensive investigation of existing and projected traffic conditions and physical characteristics at the location. The Standard Specifications Update for the adoption of the National MUTCD (FHWA) and the New York State Supplement were reviewed to investigate the need for a traffic control signal at this location under full build conditions. There are nine (9) warrants as follows:

Warrant 1	Eight-Hour vehicular volume
Warrant 2	Four-Hour vehicular volume
Warrant 3	Peak Hour
Warrant 4	Pedestrian Volume
Warrant 5	School Crossing
Warrant 6	Coordinated Signal System
Warrant 7	Crash Experience
Warrant 8	Roadway Network
Warrant 9	Intersection Near a Grade Crossing

Detailed signal warrant calculations are attached. Prior to applying warrants, the MUTCD suggests consideration of the effects of right-turn volumes on the minor street approach, and a reduction taken in the number of right turning vehicles, where appropriate. A certain number of right-turn vehicles will execute a right-turn on the red indication without actuating a traffic signal (if one were in place). For purposes of this analysis, no reduction was taken for right turn on red movements resulting in a conservative evaluation of the signal warrants. The posted speed limit on Dodge Rd

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

at the proposed intersection is 40 MPH, therefore, 70 percent thresholds in Table 4C-1, Figure 4C-2 and Figure 4C-4 are used as a basis for analysis.

Warrant 1 is subdivided into Condition A and Condition B. The Minimum Vehicular Volume, Condition A, is intended for application at locations where a large volume of intersecting traffic is the principal reason to consider installing a traffic control signal. The Interruption of Continuous Traffic, Condition B, is intended for application at locations where Condition A is not satisfied and where the traffic volume on a major street is so heavy that traffic on a minor intersecting street suffers excessive delay or conflict in entering or crossing the major street. These conditions are satisfied when, for each of any eight hours of an average day, anticipated volumes on the artery and side road exceed the minimum values presented in Tables 4C-1 in the MUTCD. **Condition A is not met under either existing or full build conditions. Condition B is not met under either existing or full build conditions.**

Warrant 2, the Four-Hour Vehicular Volume signal warrant conditions, are intended to be applied where the volume of intersecting traffic is the principal reason to consider installing a traffic control signal. This warrant stipulates that for any four hours of a day, minimum threshold volumes are met on the artery and side road. **This warrant is not met under either existing or full build conditions.**

Warrant 3 is intended for application where minor street traffic suffers undue delay in entering or crossing the major street for one hour of the day. It stipulates that the warrant shall be applied in unusual cases (high-occupancy vehicle facilities – i.e., shopping centers) where a large number of vehicles discharge over a short period of time. Based on the development, this warrant may be applicable. **This warrant is not applicable at this location.**

Warrant 4 is met when pedestrians experience excessive delay in crossing the major street (Dodge Rd) because the traffic volumes are so heavy. The intersection currently has low pedestrian activity. **This warrant is not met.**

Warrant 5 is met when a sufficient number of gaps in traffic do not exist for certain size and frequency of school children to cross the major roadway. **This warrant is not applicable at this location and is not met.**

Warrant 6 is met when a traffic signal is needed to maintain progressive movement and vehicle platooning in a coordinated signal system. **Based on the current signal system along Dodge Rd, this warrant is not met.**

Warrant 7 is intended for application where the severity and frequency of crashes are the principal reasons to consider installing a traffic control signal. The purpose of analyzing crash data is to identify inherent safety issues by studying and quantifying historical crashes at the study intersections and identifying potential crash patterns and clusters.

A crash cluster is defined as an abnormal occurrence of similar crash types occurring at approximately the same location or involving the same geometric features. The severity of the crashes should also be considered. A history of crashes is an indication that further analysis is required to determine the cause(s) of the crash(es) and to identify what actions, if any, could be taken to mitigate the crashes.

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

A crash investigation within the study area was conducted to assess the safety history from January 1, 2017 through December 31, 2019. The data was provided by the New York State Department of Motor Vehicles (NYSDMV) through a Freedom of Information (FOIL) request.

Reportable (non-injury, injury, and fatal injury) type crashes are defined as damage to one person's property in the amount of $1,001 or more. The Non-Reportable type crashes result in property damage of $1,000 or less. Crash rates were computed for the study intersections and compared with New York State Department of Transportation average crash rates for similar intersections, as summarized in the following table. Intersection rates are listed as accidents (crashes) per million entering vehicle (Acc/MEV). Pertinent crash data is provided in the Appendices.

TABLE I: EXISTING CRASH INVESTIGATION

INTERSECTION	TOTAL NO. OF CRASHES	ACTUAL CRASH RATE	STATEWIDE AVERAGE CRASH RATE
Dodge Rd/N Forest Rd	5	0.46	0.18

As shown in Table I, the study intersection has a crash rate that is approximately 2.56 times higher than the statewide average crash rate for similar intersections. Of the five crashes, there were two fixed object crashes, one left turn crash, one rear end, and one right turn crash. No discernible crash patterns were identified related to geometric conditions and no apparent safety deficiencies exist.

The need for a traffic control signal shall be considered if *all* of the following criteria are met:

a. Adequate trial of alternatives with satisfactory observance and enforcement has failed to reduce crash frequency. **Condition A is not satisfied.**

b. Five (5) or more reported crashes, of types susceptible to correction by a traffic signal, to have occurred within a 12-month period, each crash involving a personal injury or property damage. Five (5) crashes were documented in the crash analysis over a 36-month period. **Condition B is not satisfied.**

Given that both Conditions A and B are not satisfied, this warrant is not satisfied.

Warrant 8 is met when a traffic signal might encourage concentration and organization of traffic flow on a roadway network. **This warrant primarily focuses on two major intersecting roadways, which is not the case at the study intersection therefore, this warrant is not met.**

Warrant 9 is applicable when an intersection is located near an at-grade rail crossing. **This warrant is not applicable at this location.**

Attachment: SP-2021-05_application_092222 (23057 : Sp-2021-05)

TABLE II: TRAFFIC SIGNAL WARRANT SUMMARY

WARRANT	SATISFACTION OF WARRANTS AT DODGE RD/NORTH FOREST RD EXISTING CONDITIONS	SATISFACTION OF WARRANTS AT DODGE RD/NORTH FOREST RD FULL BUILD CONDITIONS
1A – Eight-Hour Condition A	NOT SATISFIED	NOT SATISFIED
1B – Eight-Hour Condition B	NOT SATISFIED	NOT SATISFIED
2 – Four-Hour	NOT SATISFIED	NOT SATISFIED
3 – Peak-Hour	N/A	N/A
4 – Pedestrian Volume	N/A	N/A
5 – School Crossing	N/A	N/A
6 – Coordinated Signal System	N/A	N/A
7 – Crash Experience	NOT SATISFIED	NOT SATISFIED
8 – Roadway Network	N/A	N/A
9 – Intersection Near a Grade Crossing	N/A	N/A

Table II summarizes each warrant under existing and full build conditions and the result of the investigation. The results of the Traffic Signal Warrant Analysis indicate that none of the traffic volume related warrants are met at this location under either existing or full build conditions.

If you have any questions or are in need of additional information, please do not hesitate to contact our office.

Very truly yours,
SRF Associates

SITE PLAN

SCALE: 1"=50'

RESTORATION NOTES

1. THE ADJACENT AREAS DISTURBED OR DAMAGED DURING CONSTRUCTION MUST BE RESTORED IN KIND TO THE SATISFACTION OF THE OWNER.
2. WHEN RESTORING LAWN AREAS ADJACENT TO NEW CONSTRUCTION, ON-SITE MATERIAL MAY BE USED TO BACKFILL THE AREA WITHIN SIX INCHES OF THE FINISHED SURFACE. ON-SITE MATERIAL SHALL BE THOROUGHLY COMPACTED AND FREE OF GRASS CLUMPS, TREE ROOTS PIECES OF ASPHALT AND OTHER EXTRANEOUS MATERIALS, AND STONES LARGER THAN 1 INCH IN SIZE.
3. ALL DISTURBED UNSURFACED AREAS SHALL RECEIVE FOUR INCHES OF TOPSOIL, SEED AND MULCH AND SHALL BE WATERED UNTIL A HEALTHY STAND OF GRASS IS OBTAINED.
4. WHEN ADJACENT ASPHALT, CONCRETE OR PAVING STONE AREAS ARE DISTURBED AS PART OF THE CONSTRUCTION, THE CONTRACTOR SHALL BE REQUIRED TO REPLACE THE DAMAGED OR EXCAVATED AREA. THE PERIMETER OF THE DISTURBED AREA SHALL BE SAW CUT FULL DEPTH, SO THAT ALL LINES ARE STRAIGHT AND TRUE. PAVING STONES SHALL BE REPLACED IN WHOLE UNITS ONLY, AND ALL REPLACEMENT PAVING STONES ARE TO MATCH THE EXISTING ONES IN SIZE, SHAPE AND COLOR. ASPHALT SHALL BE COMPACTED TO A SMOOTH FINISH AND SHALL BE FLUSH WITH THE EXISTING ADJACENT AREA THAT IS TO REMAIN.

EROSION CONTROL PLAN

THE FOLLOWING EROSION CONTROL PROCEDURE SHALL BE ADHERED TO BY THE CONTRACTOR:

1. INSTALL TEMPORARY SILT FENCE BARRIERS AS DIRECTED BY THE OWNER AND AS SHOWN ON THE EROSION CONTROL PLAN TO PREVENT SEDIMENT MIGRATION. ALL SILT FENCE BARRIERS SHALL BE INSTALLED IN ACCORDANCE WITH THE DETAILS SHOWN ON THE PLANS.
2. ALL SILT FENCE BARRIERS SHALL BE REPLACED WHEREVER THEY BECOME CLOGGED OR INOPERABLE.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTENANCE AND REMOVAL OF TEMPORARY SEDIMENTATION CONTROLS.
4. THE CONTRACTOR MUST CONTROL DUST DURING CONSTRUCTION. DURING EARTHWORK OPERATIONS, WATER-SPREADING EQUIPMENT SHALL BE PROVIDED BY THE CONTRACTOR, AND WATER SPREAD AS NECESSARY AND AS DIRECTED BY THE OWNER IN ORDER TO CONTROL DUST.
5. DIRT OR DEBRIS LEFT ON LOCAL PUBLIC ROADS AS A RESULT OF THIS CONSTRUCTION PROJECT SHALL BE REMOVED AND ROAD SURFACES CLEANED BY THE CONTRACTOR ON A DAILY BASIS.
6. ALL DISTURBED AREAS (EXCEPT STABILIZED STONE AREAS) SHALL BE SEEDED IMMEDIATELY AFTER FINE GRADING TAKES PLACE AND AS SOON AS PHYSICALLY POSSIBLE.
7. THE CONTRACTOR IS RESPONSIBLE FOR THE MAINTENANCE OF DOWNSTREAM STORM SEWERS, DITCHES, AND CULVERTS. SILT BUILDUP FOUND TO BE A RESULT OF THIS SITE CONSTRUCTION WORK SHALL BE REMOVED FROM DOWNSTREAM CULVERTS BY THE CONTRACTOR AT NO ADDITIONAL EXPENSE TO THE OWNER OR THE TOWN.
8. ALL SOIL EROSION AND SEDIMENT CONTROL DEVICES AND MATERIALS SHALL BE MAINTAINED UNTIL THE NEW SLOPES ARE STABILIZED WITH SEEDING AND/OR SLOPE PROTECTION, AS DIRECTED BY THE ENGINEER.
9. THE CONTRACTOR SHALL FOLLOW THE REGULATIONS SET FORTH IN THE NYSDEC SPDES GENERAL PERMIT FOR STORM WATER DISCHARGES FROM CONSTRUCTION ACTIVITIES.
10. ALL LOCAL ORDINANCES REGARDING THE SALE OF TOPSOIL MUST BE FOLLOWED. TOPSOIL MAY NOT BE REMOVED WITHOUT A PERMIT.

INSPECTION AND MAINTENANCE PROCEDURES

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ASSIGNING AN INDIVIDUAL TO BE RESPONSIBLE FOR THE INSPECTION AND MAINTENANCE OF TEMPORARY EROSION AND SEDIMENTATION CONTROL MEASURES. THE WORK MAY INCLUDE, BUT NOT LIMITED TO THE FOLLOWING:
   - 1.1. ALL EROSION CONTROL MEASURES SHALL BE INSPECTED AT LEAST ONCE EVERY SEVEN CALENDAR DAYS.
   - 1.2. ALL EROSION CONTROL MEASURES SHALL BE MAINTAINED IN GOOD WORKING ORDER. AS DEEMED NECESSARY BY THE TOWN AND ENGINEER, REPAIRS SHALL BE COMPLETED WITHIN 24 HOURS OF BEING REPORTED.
   - 1.3. CHECK AND REPAIR SILT FENCING AND EROSION CONTROL DEVICES, AS NECESSARY.
   - 1.4. TEMPORARY AND PERMANENT SEEDING AND PLANTING WILL BE INSPECTED FOR BARE SPOTS, WASHOUTS, AND HEALTHY GROWTH AND REPAIRED AS NECESSARY.
   - 1.5. NEIGHBORING ROADWAYS WILL BE MONITORED TO ENSURE THAT ANY TRACKED MUD, DIRT, OR ROCK IS SWEPT AS NECESSARY.

NOTES:

1. THE CONTRACTOR SHALL TAKE PRECAUTIONS TO PROTECT THOSE ITEMS TO REMAIN, SUCH AS TREES, PROPERTY CORNER PINS, UTILITY POLES, VALVES, HYDRANTS, CURBS, MANHOLES, AND CATCH BASINS.
2. TEMPORARY SILT FENCE AND EROSION CONTROL DEVICES TO BE INSTALLED AS DIRECTED BY THE OWNERS FIELD REPRESENTATIVE. MAINTAIN UNTIL VEGETATION IS ESTABLISHED AND PAVEMENT IS INSTALLED.
3. THE CONTRACTOR SHALL INSTALL STABILIZED CONSTRUCTION ENTRANCES WHERE ACCESSING THE SITE FROM PAVED ROADWAYS.
4. THE CONTRACTOR SHALL INSTALL TEMPORARY TRAFFIC CONTROL DEVICES IN ACCORDANCE WITH NEW YORK STATE M.U.T.C.D. STANDARDS PRIOR TO STARTING WORK.

STABILIZATION PRACTICES FOR THIS SITE INCLUDE:

A. LAND CLEARING ACTIVITIES SHALL BE DONE ONLY IN AREAS WHERE EARTHWORK WILL BE PERFORMED AND SHALL PROGRESS AS EARTHWORK IS NEEDED.
B. USE OF STABILIZATION METHOD FOR ALL SLOPES HAVING A SLOPE GREATER THAN 1V:3H.
C. PERMANENT SEEDING AND PLANTING OF ALL UNPAVED AREAS USING THE HYDROMULCHING GRASS SEEDING TECHNIQUE.
D. MULCHING EXPOSED AREAS.
E. VEGETATION PRESERVATION IN UNDISTURBED AREAS.
F. FREQUENT WATERING TO MINIMIZE WIND EROSION DURING CONSTRUCTION.
   - A. FOR SITES WHERE 5 ACRES OR MORE ARE DISTURBED AT ANY ONE TIME: IN AREAS WHERE SOIL DISTURBANCE ACTIVITY HAS BEEN TEMPORARILY OR PERMANENTLY CEASED, TEMPORARY AND/OR PERMANENT SOIL STABILIZATION MEASURES SHALL BE INSTALLED AND/OR IMPLEMENTED WITHIN SEVEN (7) DAYS FROM THE DATE THE SOIL DISTURBANCE ACTIVITY CEASED. THE SOIL STABILIZATION MEASURES SELECTED SHALL BE IN CONFORMANCE WITH THE MOST CURRENT VERSION OF THE NEW YORK STANDARDS AND SPECIFICATIONS FOR EROSION AND SEDIMENT CONTROL.
   - B. THE OWNER OR OPERATOR SHALL PREPARE A PHASING PLAN THAT DEFINES MAXIMUM DISTURBED AREA PER PHASE AND SHOWS REQUIRED CUTS AND FILLS.
   - C. THE OWNER OR OPERATOR SHALL INSTALL ANY ADDITIONAL MEASURES NEEDED TO PROTECT WATER QUALITY.

112.2 STRUCTURAL PRACTICES

STRUCTURAL PRACTICES FOR THIS SITE INCLUDE:

A. INLET PROTECTION USING A METHOD DETAILED IN THE CONSTRUCTION DOCUMENTS.
B. PERIMETER PROTECTION USING TEMPORARY SILT FENCE/SILT SOCK OR SILT SOCK.
C. OUTLET PROTECTION USING RIP-RAP STONE AND END SECTIONS.
D. STABILIZED CONSTRUCTION ENTRANCE.
E. TEMPORARY STONE WASH OFF AREAS.
F. STORM SEWER, CURB/GUTTER.

SEDIMENT TRAPS AND BASINS.

112.3 SEQUENCE OF MAJOR ACTIVITIES

THE CONTRACTOR WILL BE RESPONSIBLE FOR IMPLEMENTING THE FOLLOWING EROSION CONTROL AND STORM WATER MANAGEMENT CONTROL MEASURES. THE CONTRACTOR MAY DESIGNATE THESE TASKS TO CERTAIN SUBCONTRACTORS AS HE SEES FIT, BUT THE ULTIMATE RESPONSIBILITY FOR IMPLEMENTING THESE CONTROLS AND ENSURING THEIR PROPER FUNCTIONING REMAINS WITH THE CONTRACTOR. THE ORDER OF ACTIVITIES WILL BE AS FOLLOWS:

A. CONSTRUCT TEMPORARY CONSTRUCTION EXIT AT LOCATION SHOWN ON THE DEMOLITION & EROSION CONTROL PLAN SHEET.
B. INSTALL PERIMETER SILT FENCE/SILT SOCKS/SILT SOCK IN THE LOCATIONS SHOWN ON THE DEMOLITION & EROSION CONTROL PLAN SHEET.
C. CLEAR & GRUB SITE.
D. INSTALLATION OF DETENTION BASINS TO ACT AS SEDIMENT BASINS (DO NOT INSTALL BIORETENTION SOIL OR UNDERDRAINS UNTIL STABILIZED)
E. COMMENCE SITE GRADING.
F. DISTURBED AREAS OF THE SITE WHERE CONSTRUCTION ACTIVITY HAS CEASED FOR MORE THAN 14 DAYS SHALL BE TEMPORARILY SEEDED AND WATERED.
G. FINALIZE PAVEMENT SUBGRADE PREPARATION.
H. CONSTRUCT ALL CURB, DRAINAGE INLETS, STORM SEWER PIPES AND STORM SEWER MANHOLES, AS SHOWN ON THE PLANS. INSTALL TEMPORARY INLET PROTECTION AT THE LOCATIONS OF ALL INLETS.
I. REMOVE INLET PROTECTION AROUND INLETS AND MANHOLES NO MORE THAN 48 HOURS PRIOR TO PLACING STABILIZED BASE COURSE.
J. INSTALL BASE MATERIAL AS REQUIRED FOR PAVEMENT.
K. CARRY OUT FINAL GRADING AND SEEDING AND PLANTING.
L. CLEAN STORM SYSTEM FOLLOWING CONSTRUCTION, CLEAN DETENTION BASINS OF ANY SILT AND RETURN TO DESIGN GRADES.
M. REMOVE SILT FENCING/SILT SOCK ONLY AFTER ALL PAVING IS COMPLETE AND EXPOSED SURFACES ARE STABILIZED.

NOTE: SEDIMENT CONTROL STORAGE DURING CONSTRUCTION (TRAPS & BASINS) DURING CONSTRUCTION SHALL BE 134 CY PER ACRE OF DISTURBANCE PER NYSDEC REQUIREMENTS.

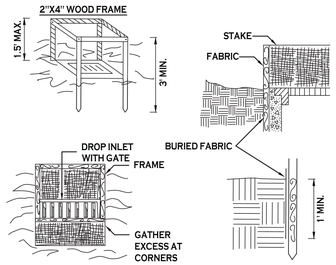
If altered such R.A., P.E. or L.L.S. shall affix his or her seal, signature, the date, the notation "altered by" and a specific description of the alteration.

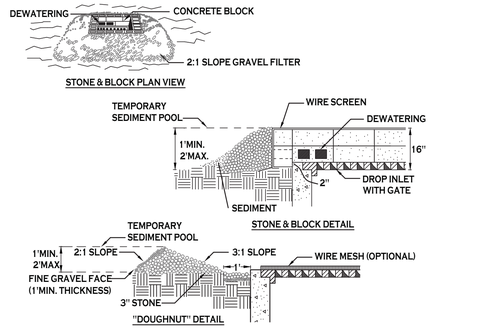


CONSTRUCTION SPECIFICATIONS

1. CLEAR THE AREA OF ALL DEBRIS THAT WILL HINDER EXCAVATION.
2. GRADE APPROACH TO THE INLET UNIFORMLY AROUND THE BASIN.
3. WEEP HOLES SHALL BE PROTECTED BY GRAVEL.
4. UPON STABILIZATION OF CONTRIBUTING DRAINAGE AREA, SEAL WEEP HOLES, FILL BASIN WITH STABLE SOIL TO FINAL GRADE, COMPACT IT PROPERLY AND STABILIZE WITH PERMANENT SEEDING.

   MAXIMUM DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 1
NOT TO SCALE

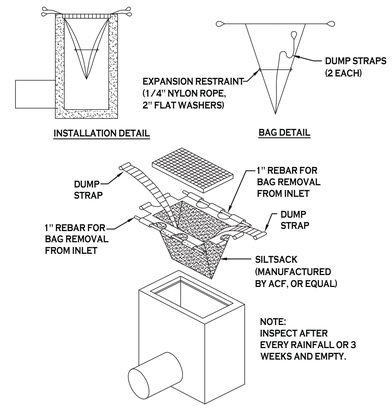


CONSTRUCTION SPECIFICATIONS

1. FILTER FABRIC SHALL HAVE AN EOS OF 40-85. BURLAP MAY BE USED FOR SHORT TERM APPLICATIONS.
2. CUT FABRIC FROM A CONTINUOUS ROLL TO ELIMINATE JOINTS. IF JOINTS ARE NEEDED THEY WILL BE OVERLAPPED TO THE NEXT STAKE.
3. STAKE MATERIALS WILL BE STANDARD 2" x 4" WOOD OR EQUIVALENT. METAL WITH A MINIMUM LENGTH OF 3 FEET.
4. SPACE STAKES EVENLY AROUND INLET 3 FEET APART AND DRIVE A MINIMUM 18 INCHES DEEP. SPANS GREATER THAN 3 FEET MAY BE BRIDGED WITH THE USE OF WIRE MESH BEHIND THE FILTER FABRIC FOR SUPPORT.
5. FABRIC SHALL BE EMBEDDED 1 FOOT MINIMUM BELOW GROUND AND BACKFILLED. IT SHALL BE SECURELY FASTENED TO THE STAKES AND FRAME.
6. A 2" x 4" WOOD FRAME SHALL BE COMPLETED AROUND THE CREST OF THE FABRIC FOR OVER FLOW STABILITY.

   MAXIMUN DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 2
NOT TO SCALE



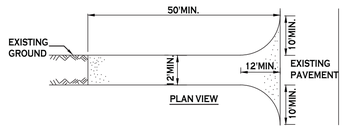
CONSTRUCTION SPECIFICATIONS

1. LAY ONE BLOCK ON EACH SIDE OF THE STRUCTURE ON ITS SIDE FOR DEWATERING. FOUNDATION SHALL BE 2 INCHES MINIMUM BELOW REST OF INLET AND BLOCKS SHALL BE PLACED AGAINST INLET FOR SUPPORT.
2. HARDWARE CLOTH OR 1/2" WIRE MESH SHALL BE PLACED OVER BLOCK OPENINGS TO SUPPORT STONE.
3. USE CLEAN STONE OR GRAVEL 1/2-3/4 INCH IN DIAMETER PLACED 2 INCHES BELOW TOP OF THE BLOCK ON A 2:1 SLOPE OR FLATTER.
4. FOR STONE STRUCTURES ONLY, A 1 FOOT THICK LAYER OF THE FILTER STONE WILL BE PLACED AGAINST THE 3 INCH STONE AS SHOWN ON THE DRAWINGS.

   MAXIMUM DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 3
NOT TO SCALE

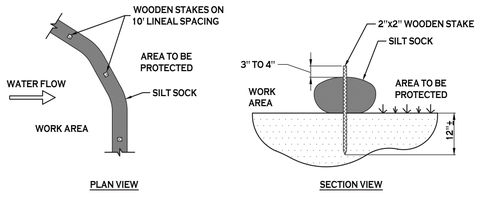
NOTE: INSTALL ONE OF THE INLET PROTECTION OPTIONS SHOWN PRIOR TO CONSTRUCTION



SILT SACK DETAIL
NOT TO SCALE

CONSTRUCTION SPECIFICATIONS

1. WOVEN FENCE TO BE FASTENED SECURELY TO FENCE POSTS WITH WIRE TIES OR STAPLES. POSTS SHALL BE STEEL EITHER "T" OR "U" TYPE OR HARDWOOD.
2. WHEN TWO SECTIONS OF FILTER CLOTH ADJOIN EACH OTHER THEY SHALL BE OVER-LAPPED BY SIX INCHES AND FOLDED. FILTER CLOTH SHALL BE EITHER FILTER X, MIRAFI 100X, STABILINKA T140N, OR APPROVED EQUIVALENT.
3. MAINTENANCE SHALL BE PERFORMED AS NEEDED AND MATERIAL REMOVED WHEN "BULGES" DEVELOP IN THE SILT FENCE.

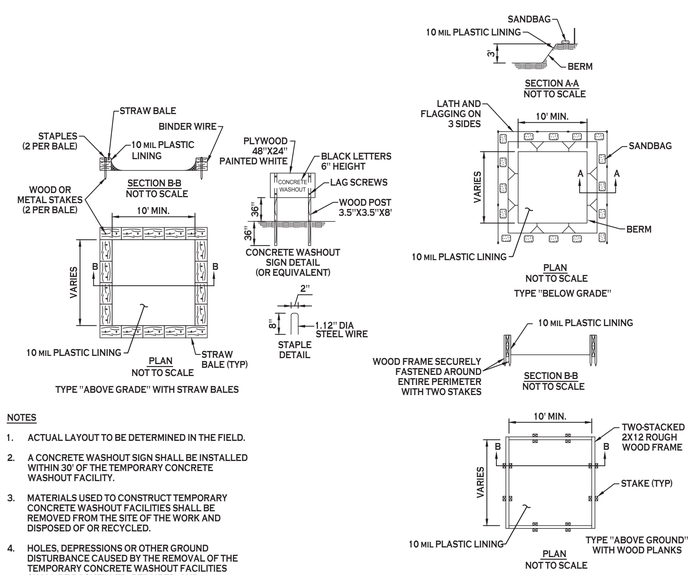


SILT FENCE DETAIL
NOT TO SCALE

CONSTRUCTION SPECIFICATIONS

1. STONE SIZE - USE 2" STONE, OR RECLAIMED OR RECYCLED CONCRETE EQUIVALENT.
2. LENGTH - NOT LESS THAN 50 FEET (EXCEPT ON A SINGLE RESIDENCE LOT WHERE A 30 FOOT MINIMUM LENGTH WOULD APPLY).
3. THICKNESS - NOT LESS THAN SIX (6) INCHES.
4. WIDTH - TWELVE (12) FOOT MINIMUM, BUT NOT LESS THAN THE FULL WIDTH AT POINTS WHERE INGRESS OR EGRESS OCCURS. TWENTY-FOUR (24) FOOT IF SINGLE ENTRANCE TO SITE.
5. FILTER CLOTH - WILL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING OF STONE.
6. SURFACE WATER - ALL SURFACE WATER FLOWING OR DIVERTED TOWARD CONSTRUCTION ENTRANCES SHALL BE PIPED ACROSS THE ENTRANCE. IF PIPING IS IMPRACTICAL, A MOUNTABLE BERM WITH 5:1 SLOPES WILL BE PERMITTED.
7. MAINTENANCE - THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY, ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACTED ONTO PUBLIC RIGHTS-OF-WAY MUST BE REMOVED IMMEDIATELY.
8. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON A AREA STABILIZED WITH STONE AND WHICH DRAINS INTO AN APPROVED SEDIMENT TRAPPING DEVICE.
9. PERIODIC INSPECTION AND NEEDED MAINTENANCE SHALL BE PROVIDED AFTER EACH RAIN.

STABILIZED CONSTRUCTION ENTRANCE DETAIL
NOT TO SCALE



NOTES:

CONTRACTOR SHALL INSPECT AND MAINTAIN SILT SOCK AS NEEDED DURING THE DURATION OF CONSTRUCTION PROJECT.

CONTRACTOR SHALL REMOVE SEDIMENT COLLECTED AT THE BASE OF THE SILT SOCK WHEN IT HAS REACHED ½ OF THE EXPOSED HEIGHT OF THE SILT SOCK. ALTERNATIVELY, RATHER THAN CREATE A SOIL DISTURBING ACTIVITY, THE ENGINEER MAY CALL FOR ADDITIONAL SILT SOCK TO BE ADDED AT AREAS OF HIGH SEDIMENTATION, PLACED IMMEDIATELY ON TOP OF THE EXISTING SEDIMENT LADEN SILT SOCK.

SILT SOCK DETAIL
NOT TO SCALE

NOTES

1. ACTUAL LAYOUT TO BE DETERMINED IN THE FIELD.
2. A CONCRETE WASHOUT SIGN SHALL BE INSTALLED WITHIN 30' OF THE TEMPORARY CONCRETE WASHOUT FACILITY.
3. MATERIALS USED TO CONSTRUCT TEMPORARY CONCRETE WASHOUT FACILITIES SHALL BE REMOVED FROM THE SITE OF THE WORK AND DISPOSED OF OR RECYCLED.
4. HOLES, DEPRESSIONS OR OTHER GROUND DISTURBANCE CAUSED BY THE REMOVAL OF THE TEMPORARY CONCRETE WASHOUT FACILITIES SHALL BE BACKFILLED, REPAIRED, AND STABILIZED TO PREVENT EROSION.

CONCRETE WASHOUT DETAIL
NOT TO SCALE

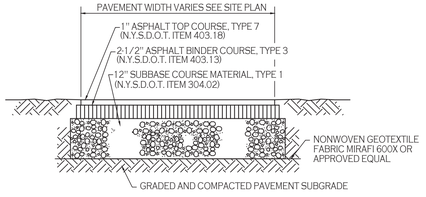
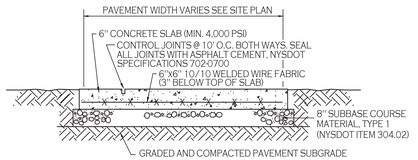
ABUTTING SIDEWALK

ABUTTING LANDSCAPE/GRASS



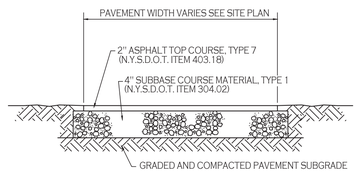
NOTES:
1. CONTROL JOINTS TO BE 2" DEEP AT 15'-0" O.C. - SEE SPECIFICATIONS FOR FURTHER JOINT REQUIREMENTS NYSDOT 702-0700.
2. WHERE THE CURB DROPS IS FLUSH WITH ASPHALT) THE DEPTH OF CURB BELOW GRADE SHALL BE INCREASED TO 1'-6" AND OTHER DIMENSIONS ADJUSTED ACCORDINGLY.

TYPE "A" CONCRETE CURB - 1



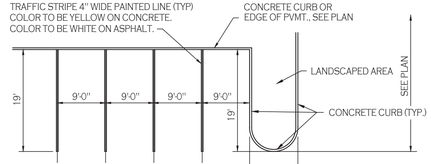
NOTE: CONSTRUCTION METHODS FOR ASPHALT PAVEMENT SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 401-3, WITH SUBBASE CONSTRUCTION METHODS CONFORMING TO NYSDOT STANDARD SPECIFICATION 304-3.

STANDARD DUTY ASPHALT SECTION - 4A



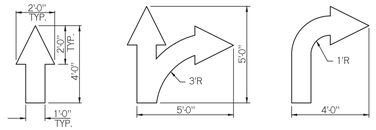
NOTE: CONSTRUCTION METHODS FOR ASPHALT PAVEMENT SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 401-3, WITH SUBBASE CONSTRUCTION METHODS CONFORMING TO NYSDOT STANDARD SPECIFICATION 304-3.

HEAVY DUTY ASPHALT SECTION - 4B

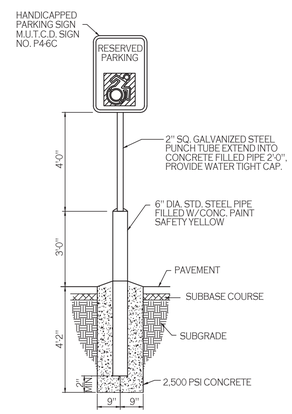


NOTE: CONCRETE PAVEMENT MATERIAL SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 501 AND CONSTRUCTION METHODS SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 502-3.

EXTERIOR CONCRETE SLAB-ON-GRADE SECTION - 4C

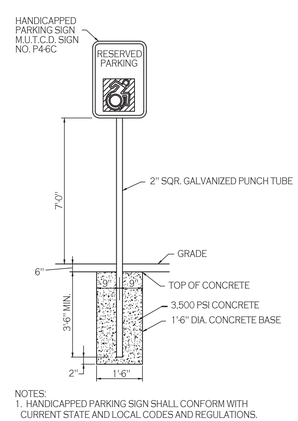


NOTE: CONSTRUCTION METHODS FOR ASPHALT PAVEMENT SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 401-3, WITH SUBBASE CONSTRUCTION METHODS CONFORMING TO NYSDOT STANDARD SPECIFICATION 304-3.



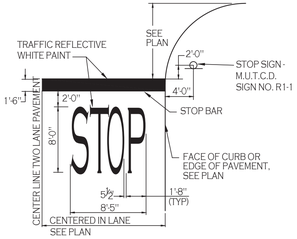
ASPHALT TRAIL SECTION - 4D

90° PARKING STALL LAYOUT - 2

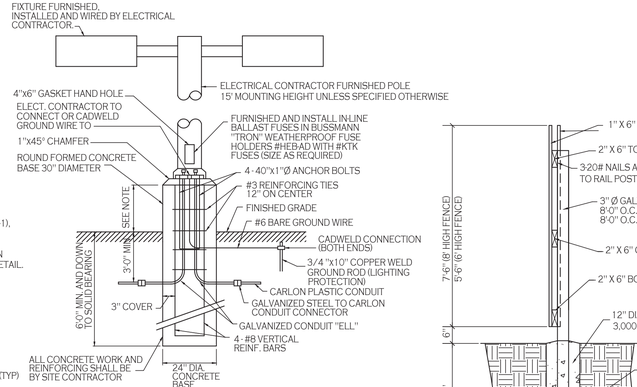


PAINTED TRAFFIC ARROWS - 3

HANDICAPPED PARKING SIGN - 6



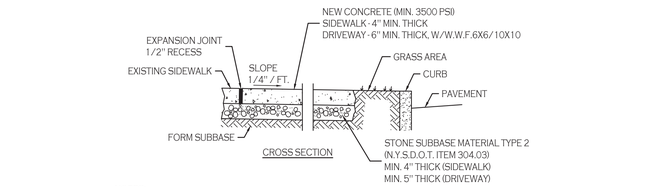
INSTALLED IN PAVEMENT



NOTES:
1. HANDICAPPED PARKING SIGN SHALL CONFORM WITH CURRENT STATE AND LOCAL CODES AND REGULATIONS.

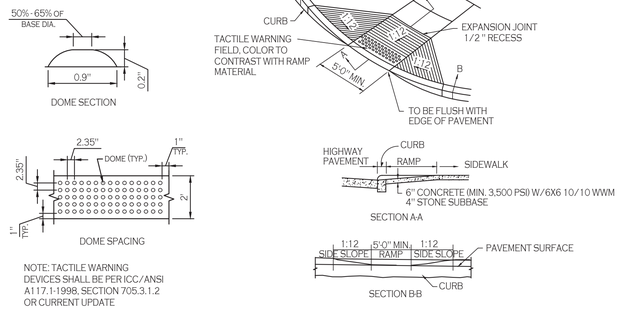
HANDICAP PARKING SIGNS - 6

INSTALLED IN GRASS/LANDSCAPED AREA



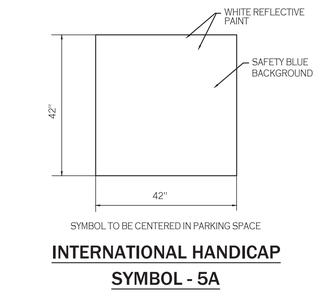
STOP BAR DETAIL - 7

NOTES:
1. FOR LOCATIONS OF FOUNDATIONS SEE SITE PLAN
2. FOR LIGHT FIXTURE ORDERING INFORMATION SEE SITE LIGHTING PLAN
3. LIGHT POLE BASE EXPOSURE ABOVE GRADE SHALL BE:
   IN CURBED ISLANDS: 6" ABOVE TOP OF CURB ELEVATION
   IN PAVEMENT: 3' ABOVE GRADE
   IN NONCURBED GRASS AREAS: 6" ABOVE GRADE



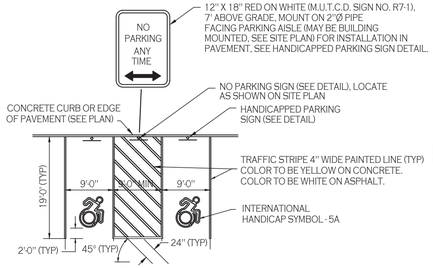
LIGHT POLE FOUNDATION - 8

USE FOR 15' MOUNTING HEIGHT L.E.D. FIXTURES



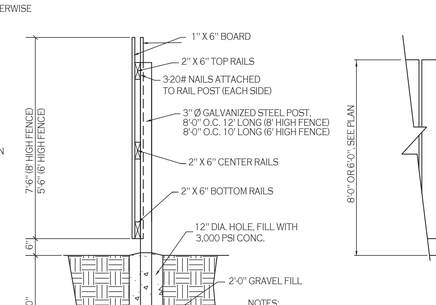
NOTES:
1. CONTROL JOINTS TO BE AT 5'-0" O.C., BOTH WAYS WHERE APPLICABLE. SEE SPECIFICATIONS FOR FURTHER JOINT REQUIREMENTS NYSDOT 702-0700.
2. CONCRETE SIDEWALK AND DRIVEWAY MATERIAL SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 501 AND CONSTRUCTION METHODS SHALL CONFORM TO NYSDOT STANDARD SPECIFICATION 608-3.
3. SUBBASE GRADE SHALL FOLLOW THE PROPOSED GRADE OF THE SIDEWALK AND SLOPE AWAY FROM BUILDING WHERE APPLICABLE, PROVIDE CONTINUOUS STONE PATH TO CURB UNDERDRAIN WHERE PROVIDED.
4. FULL DEPTH EXPANSION JOINTS SHALL BE INSTALLED EVERY 20' O.C., BOTHWAYS WHERE APPLICABLE. SEE SPECIFICATIONS FOR FURTHER JOINT REQUIREMENTS NYSDOT 702-0700.
5. SEE CURB DETAIL FOR DOWLING REQUIREMENTS WHERE ABUTTING CURB.
6. INSTALL 6" LONG #3 DOWELS @ 12" O.C. WHERE SIDEWALK ABUTS A BUILDING WALL AT AN ENTRANCE, THICKEN SIDEWALK TO 6" AT BUILDING WALL AND INSTALL DOWEL CENTERED IN THE 6" DEPTH. DOWELS AND THICKENING OF SIDEWALK SHALL EXTEND 18" EITHER SIDE OF ENTRANCE.
7. INSTALL 1/2" PREMOLDED EXPANSION JOINT WITH BACKER ROD & SEALANT WHERE SIDEWALK ABUTS BUILDING OR OTHER STRUCTURE.

CONCRETE SIDEWALK - 9

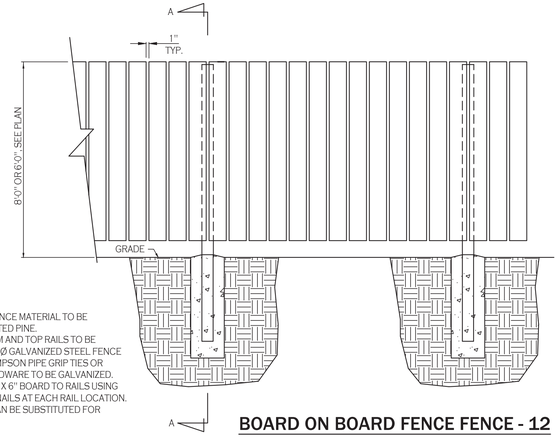


NOTE: TACTILE WARNING DEVICES SHALL BE PER ICC/ANSI A117.1-1998, SECTION 705.3.1.2 OR CURRENT UPDATE

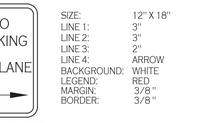
SIDEWALK CURB RAMP - 10



SYMBOL TO BE CENTERED IN PARKING SPACE



INTERNATIONAL HANDICAP SYMBOL - 5A



HANDICAPPED PAVEMENT MARKINGS & SIGNAGE - 5

NOTES:
1. ALL WOODEN FENCE MATERIAL TO BE PRESSURE TREATED PINE.
2. CENTER, BOTTOM AND TOP RAILS TO BE FASTENED TO 3" Ø GALVANIZED STEEL FENCE POSTS USING SIMPSON PIPE GRIP TIES OR EQUAL. ALL HARDWARE TO BE GALVANIZED.
3. ATTACH EACH 1" X 6" BOARD TO RAILS USING (3) GALVANIZED NAILS AT EACH RAIL LOCATION.
4. WOOD POSTS CAN BE SUBSTITUTED FOR STEEL.

BOARD ON BOARD FENCE FENCE - 12

SIZE:	12" X 18"
LINE 1:	3"
LINE 2:	3"
LINE 3:	2"
LINE 4:	ARROW
BACKGROUND:	WHITE
LEGEND:	RED
MARGIN:	3/8 "
BORDER:	3/8 "

INSTALLATION

1) SIGNS SHALL BE LOCATED ON THE RIGHT SIDE OF THE ROADWAY FACING APPROACHING TRAFFIC.
2) SIGNS SHALL BE INSTALLED APPROXIMATELY TWO FEET OFF OF PAVEMENT EDGE OR FACE OF CURB.
3) THE HEIGHT OF THE SIGN SHALL BE A MINIMUM OF SEVEN (7) FEET, MEASURED FROM THE BOTTOM OF THE SIGN TO THE GROUND.
4) ALL SIGNS SHALL BE INSTALLED FACING TRAFFIC AT AN ANGLE OF BETWEEN 30 AND 45 DEGREES WITH A LINE PARALLEL TO THE FLOW OF TRAFFIC. THE SIGN LEGENDS SHALL INCLUDE SINGLE-HEADED ARROWS POINTING IN THE DIRECTION OF THE REGULATION IF THE SIGNS ARE AT THE END OF THE ZONE, OR DOUBLE-HEADED ARROWS POINTING IN BOTH DIRECTIONS IF THE SIGNS ARE AT INTERMEDIATE POINTS WITHIN A ZONE.
5) BUILDING MOUNT WHERE REQUIRED @ 50' O.C..

FIRE LANE SIGN - 14

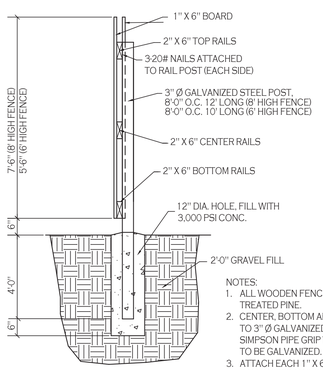
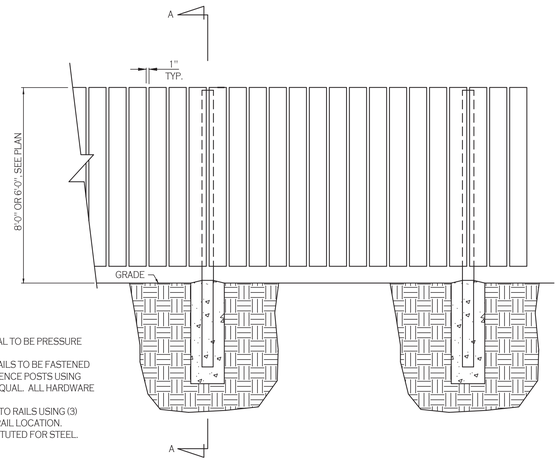
DUMPSTER ENCLOSURE - 11

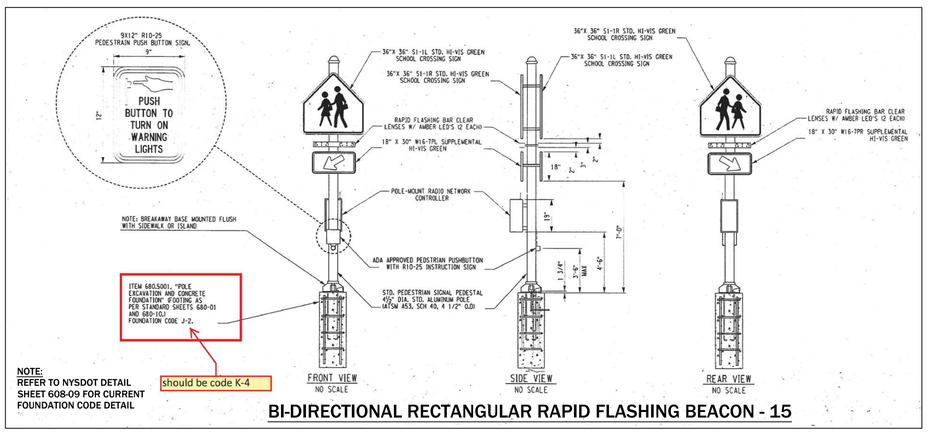


CHAIN LINK FENCE GATE NOTES:

1. GATE POST FOOTINGS TO BE MIN. 36" DEEP x (4x) POST DIAMETER, EXTEND POST TO WITHIN 6" OF BOTTOM.
2. GATE FRAMES TO BE 2" SQ. GALVANIZED STEEL, WEIGHING 2.60 LB./FT IN ACCORDANCE WITH ASTM F 900.
3. CHAIN LINK FENCE FABRIC SHALL BE 2" MESH, 9 GAUGE, ZINC COATED STEEL CORE WIRE. INSTALL MESH WITH HOOK BOLTS AND TENSION BARS ON ALL 4 SIDES, ATTACH AT 15" MAX.
4. DOUBLE GATE LATCH TO BE FORKED TYPE CAPABLE OF RETAINING GATE IN CLOSED POSITION AND HAVE PROVISION FOR PAD LOCK. LATCH SHALL BE OPERABLE FROM EITHER SIDE OF GATE.
5. ALL HARDWARE TO BE HOT DIPPED GALVANIZED STEEL TO SUIT GATE SIZE.

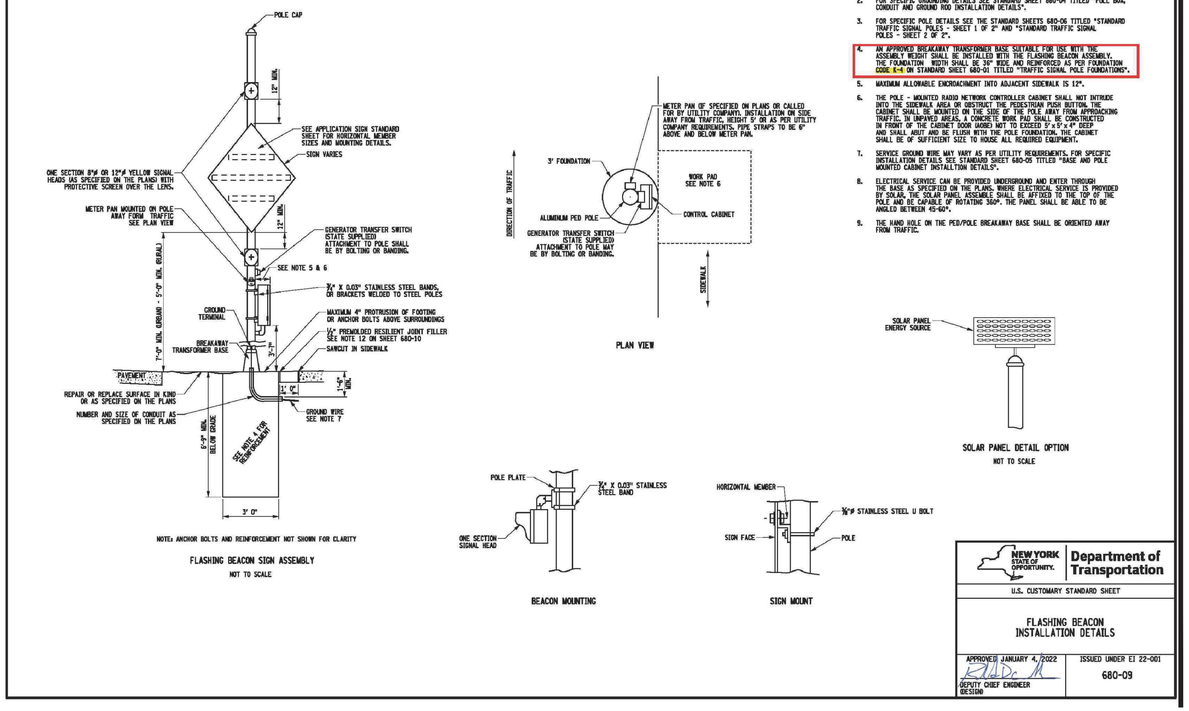


AEGIS PLUS PANEL GENESIS 3 RAIL 4"GAP 4'HIGH, 6'WIDE PANELS BY AMERISTAR OR APPROVED EQUAL. MATERIAL TO BE GALVANIZED STEEL W/A 2-COAT POWDER COAT SYSTEM, BLACK IN COLOR.



4' HIGH BLACK ALUMINUM FENCE - 13

NOTES:
1. ALL WOODEN FENCE MATERIAL TO BE PRESSURE TREATED PINE.
2. CENTER, BOTTOM AND TOP RAILS TO BE FASTENED TO 3" Ø GALVANIZED STEEL FENCE POSTS USING SIMPSON PIPE GRIP TIES OR EQUAL. ALL HARDWARE TO BE GALVANIZED.
3. ATTACH EACH 1" X 6" BOARD TO RAILS USING (3) GALVANIZED NAILS AT EACH RAIL LOCATION.
4. WOOD POSTS CAN BE SUBSTITUTED FOR STEEL.



BOARD ON BOARD FENCE FENCE - FOR DUMPSTER ENCLOSURE

NOTE:
REFER TO NYSDOT DETAIL SHEET 608-09 FOR CURRENT FOUNDATION CODE DETAIL

BI-DIRECTIONAL RECTANGULAR RAPID FLASHING BEACON - 15

NOTES:

1. FOR SPECIFIC FOOTING DETAILS SEE STANDARD SHEET 680-01TITLED "TRAFFIC SIGNAL POLE FOUNDATIONS".
2. FOR SPECIFIC GROUNDING DETAILS SEE STANDARD SHEET 680-04 TITLED "PULL BOX, CONDUIT AND GROUND ROD INSTALLATION DETAILS".
3. FOR SPECIFIC POLE DETAILS SEE THE STANDARD SHEETS 680-06 TITLED "STANDARD TRAFFIC SIGNAL POLES - SHEET 1 OF 2" AND "STANDARD TRAFFIC SIGNAL POLES - SHEET 2 OF 2".
4. AN APPROVED BREAKAWAY TRANSFORMER BASE SUITABLE FOR USE WITH THE ASSEMBLY WEIGHT SHALL BE INSTALLED WITH THE FLASHING BEACON ASSEMBLY. THE FOUNDATION WIDTH SHALL BE 36" WIDE AND REINFORCED AS PER FOUNDATION CODE K-4 ON STANDARD SHEET 680-01 TITLED "TRAFFIC SIGNAL POLE FOUNDATIONS".
5. MAXIMUM ALLOWABLE ENCROACHMENT INTO ADJACENT SIDEWALK IS 12".
6. THE POLE - MOUNTED RADIO NETWORK CONTROLLER CABINET SHALL NOT INTRUDE INTO THE SIDEWALK AREA OR OBSTRUCT THE PEDESTRIAN PUSH BUTTON. THE CABINET SHALL BE MOUNTED ON THE SIDE OF THE POLE AWAY FROM APPROACHING TRAFFIC. IN IMPAVED AREAS, A CONCRETE WORK PAD SHALL BE CONSTRUCTED IN FRONT OF THE CABINET DOOR WHERE NOT TO EXCEED 5' x 5' x 4" DEEP AND SHALL ADJUT AND BE FLUSH WITH THE POLE FOUNDATION. THE CABINET SHALL BE OF SUFFICIENT SIZE TO HOUSE ALL REQUIRED EQUIPMENT.
7. SERVICE GROUND WIRE MAY VARY AS PER UTILITY REQUIREMENTS. FOR SPECIFIC INSTALLATION DETAILS SEE STANDARD SHEET 680-05 TITLED "BASE AND POLE MOUNTED CABINET INSTALLTION DETAILS".
8. ELECTRICAL SERVICE CAN BE PROVIDED UNDERGROUND AND ENTER THROUGH THE BASE AS SPECIFIED ON THE PLANS. WHERE ELECTRICAL SERVICE IS PROVIDED BY SOLAR, THE SOLAR PANEL ASSEMBLY SHALL BE AFFIXED TO THE TOP OF THE POLE AND BE CAPABLE OF ROTATING 360°. THE PANEL SHALL BE ABLE TO BE ANGLED BETWEEN 45-60°.
9. THE HAND HOLE ON THE PED/POLE BREAKAWAY BASE SHALL BE ORIENTED AWAY FROM TRAFFIC.

BIORETENTION AREA #1

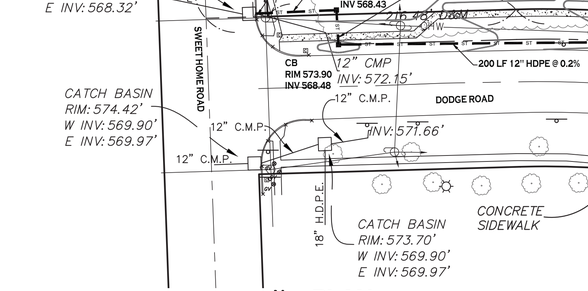
BIORETENTION AREA #2

NOTE: AS DEPICTED, YARD DRAIN RIM ELEVATIONS ARE TO BE SET 6" ABOVE PROPOSED GRADE IN BIORETENTION AREAS.

BIORETENTION AREA #3

NOTES:
1. FILTER FABRIC TO BE NON-WOVEN CLASS 'C', MIRAFI 180-N OR APPROVED EQUIVALENT
2. MULCH TO BE SHREDDED HARDWOOD, AGED 12 MONTHS MIN.
3. DRAINAGE GRAVEL TO MEET AASHTO M-43. NO.67, SIZE 0.25" TO 0.75"
4. CONTRACTOR TO PROVIDE PLANTING SOIL SUBMITTAL SPECIFICATION FOR REVIEW AND APPROVAL PRIOR TO CONSTRUCTION.

NOTE: PLANTING SOIL SHALL BE LOAM/SAND MIX CONTAINING A MINIMUM OF 35 TO 60% SAND BY VOLUME AND LESS THAN 25% CLAY. SOIL SHOULD FALL WITHIN USCS TYPES SM OR ML WITH PERMEABILITY OF AT LEAST 0.5 FEET PER DAY. SOIL SHOULD BE FREE FROM STONES, STUMPS, ROOTS OR OTHER WOODY MATERIAL OVER 1" IN DIAMETER. PLACEMENT OF THE PLANTING SOIL SHOULD BE IN LIFTS OF 12" TO 18", LOOSELY COMPACTED.



CHARACTERISTICS SHALL BE:
PH RANGE: 5.2 - 7.00
ORGANIC MATTER: 1.5 - 4.0%
MAGNESIUM: 35 LBS PER ACRE MIN.
PHOSPHORUS: 75 LBS PER ACRE MIN.
POTASSIUM: 85 LBS PER ACRE MIN.
SOLUBLE SALTS: 500 PPM
CLAY: 10 TO 25%
SILT: 30 TO 55%
SAND: 35 TO 60%

BIO-RETENTION AREA SEEDING SPEC (NORTHEAST WETLAND GRASS SEED MIX):

SEED MIXTURE	VARIETY	PERCENT BY NO. OF SEEDS
CREEPING BENTGRASS	AGROSTIS STOLONIFERA	63.0
ROUGH BLUEGRASS	POA TRIVIALIS	17.0

If altered such R.A., P.E. or L.L.S. shall affix his or her seal, signature, the date, the notation "altered by" and a specific description of the alteration.

NOTES:

A. PIPE INSTALLATION SHALL BE IN ACCORDANCE WITH MANUFACTURERS RECOMMENDATIONS.

B. TRENCHING OPERATIONS SHALL INCLUDE ALL NECESSARY DEWATERING.

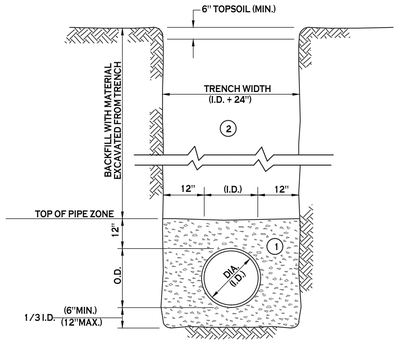
C. TRENCH DETAILS ARE ONLY SHOWN FOR PURPOSES OF MATERIAL PLACEMENT AND MAXIMUM PAY LIMITS.

D. AN OSHA APPROVED MOVABLE PROTECTIVE TRENCH SHIELD SHALL BE USED IN ALL UNSHEETED TRENCH AREAS.

MATERIALS

PIPE BEDDING MATERIAL (NYSDOT 1985 EDITION)

(1) NO. 1 CRUSHED STONE WITH A GRADATION CONFORMING WITH NYSDOT SECTION 703-02. THE MATERIAL SHALL BE WELL GRADED WITH NO PARTICLES LARGER THAN ONE INCH AND HAVING A MAXIMUM GRADATION MEETING THE LIMITS DESCRIBED IN THE SPECIFICATIONS. THE BEDDING SHALL BE COMPACTED IN 6" LIFTS WITH EQUIPMENT ACCEPTABLE TO THE PIPE MANUFACTURER.



NO SLAG SHALL BE ALLOWED FOR MATERIAL (1)

(2) TYPE 2 CRUSHED STONE WITH A GRADATION CONFORMING WITH NYSDOT SECTION 304-2.02 TYPE 2. THE MATERIAL SHALL BE WELL GRADED WITH NO PARTICLES LARGER THAN TWO INCHES AND HAVING A MAXIMUM GRADATION MEETING THE LIMITS DESCRIBED IN THE SPECIFICATIONS. THE BEDDING SHALL BE COMPACTED IN 6" LIFTS WITH EQUIPMENT ACCEPTABLE TO THE PIPE MANUFACTURER.

NO SLAG SHALL BE ALLOWED FOR MATERIAL (2)

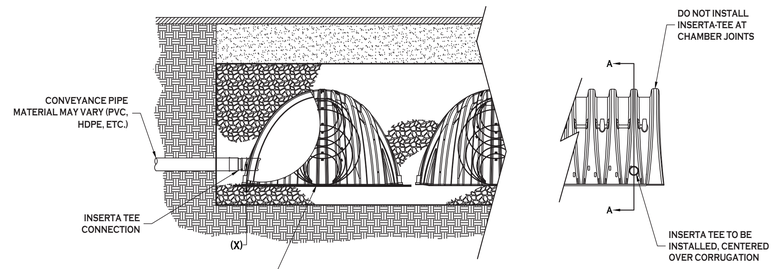
STORMTECH SC-740 CHAMBER SYSTEM
PLAN VIEW DETAIL
NOT TO SCALE

*SEE STORMTECH'S DESIGN MANUAL



ACCEPTABLE FILL MATERIALS: STORMTECH SC-740 CHAMBER SYSTEMS

	MATERIAL LOCATION	DESCRIPTION	AASHTO MATERIAL CLASSIFICATIONS	COMPACTION/DENSITY REQUIREMENT
D	FINAL FILL: FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER	ANY SOIL/ROCK MATERIALS, NATIVE SOILS, OR PER ENGINEER'S PLANS. CHECK PLANS FOR PAVEMENT SUBGRADE REQUIREMENTS.	N/A	PREPARE PER SITE DESIGN ENGINEER'S PLANS. PAVED INSTALLATIONS MAY HAVE STRINGENT MATERIAL AND PREPARATION REQUIREMENTS.
C	INITIAL FILL: FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 18" (450 MM) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LATER.	GRANULAR WELL-GRADED SOIL/AGGREGATE MIXTURES, <35% FINES OR PROCESSED AGGREGATE. MOST PAVEMENT SUBBASE MATERIALS CAN BE USED IN LIEU OF THIS LAYER.	AASHTO M145[1] A-1, A-2-4, A-3 OR AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57, 6, 67, 68, 7, 78, 8, 89, 9, 10	BEGIN COMPACTIONS AFTER 12" (300 MM) OF MATERIAL OVER THE CHAMBERS IS REACHED. COMPACT ADDITIONAL LAYERS IN 6" (150 MM) MAX LIFTS TO A MIN. 95% PROCTOR DENSITY FOR WELL GRADED MATERIAL AND 95% RELATIVE DENSITY FOR PROCESSED AGGREGATE MATERIALS. ROLLER GROSS VEHICLE WEIGHT NOT TO EXCEED 12,000 LBS (53 kN). DYNAMIC FORCE NOT TO EXCEED 20,000 LBS (89 kN).
B	EMBEDMENT STONE: FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.	CLEAN, CRUSHED, ANGULAR STONE	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	NO COMPACTION REQUIRED.
A	FOUNDATION STONE: FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.	CLEAN, CRUSHED, ANGULAR STONE	AASHTO M43[1] 3, 357, 4, 467, 5, 56, 57	PLATE COMPACT OR ROLL TO ACHIEVE A FLAT SURFACE. [2,3]

PLEASE NOTE:
1. THE LISTED AASHTO DESIGNATIONS ARE FOR GRADATIONS ONLY. THE STONE MUST ALSO BE CLEAN, CRUSHED, ANGULAR. FOR EXAMPLE, A SPECIFICATION FOR #4 STONE WOULD STATE: "CLEAN, CRUSHED, ANGULAR NO. 4 (AASHTO M43) STONE".
2. STORMTECH COMPACTION REQUIREMENTS ARE MET FOR 'A' LOCATION MATERIALS WHEN PLACED AND COMPACTED IN 6" (150 MM) (MAX) LIFTS USING TWO FULL COVERAGES WITH A VIBRATORY COMPACTOR.
3. WHERE INFILTRATION SURFACES MAY BE COMPROMISED BY COMPACTION, FOR STANDARD DESIGN LOAD CONDITIONS, A FLAT SURFACE MAY BE ACHIEVED BY RAKING OR DRAGGING WITHOUT COMPACTION EQUIPMENT. FOR SPECIAL LOAD DESIGNS, CONTACT STORMTECH FOR COMPACTION REQUIREMENTS.

NOTES:
1. SC-740 CHAMBERS SHALL CONFORM TO THE REQUIREMENTS OF ASTM F2418 "STANDARD SPECIFICATION FOR POLYPROPYLENE (PP) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS", OR ASTM F2922 "STANDARD SPECIFICATION FOR POLYETHYLENE (PE) CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
2. SC-740 CHAMBERS SHALL BE DESIGNED IN ACCORDANCE WITH ASTM F2787 "STANDARD PRACTICE FOR STRUCTURAL DESIGN OF THERMOPLASTIC CORRUGATED WALL STORMWATER COLLECTION CHAMBERS".
3. "ACCEPTABLE FILL MATERIALS" TABLE ABOVE PROVIDES MATERIAL LOCATIONS, DESCRIPTIONS, GRADATIONS, AND COMPACTION REQUIREMENTS FOR FOUNDATION, EMBEDMENT, AND FILL MATERIALS.
4. THE SITE DESIGN ENGINEER IS RESPONSIBLE FOR ASSESSING THE BEARING RESISTANCE (ALLOWABLE BEARING CAPACITY) OF THE SUBGRADE SOILS AND THE DEPTH OF FOUNDATION STONE WITH CONSIDERATION FOR THE RANGE OF EXPECTED SOIL MOISTURE CONDITIONS.
5. PERIMETER STONE MUST BE EXTENDED HORIZONTALLY TO THE EXCAVATION WALL FOR BOTH VERTICAL AND SLOPED EXCAVATION WALLS.
6. ONCE LAYER 'C' IS PLACED, ANY SOIL/MATERIAL CAN BE PLACED IN LAYER 'D' UP TO THE FINISHED GRADE. MOST PAVEMENT SUBBASE SOILS CAN BE USED TO REPLACE THE MATERIAL REQUIREMENTS OF LAYER 'C' OR 'D' AT THE SITE DESIGN ENGINEER'S DISCRETION.

INSPECTION AND MAINTENANCE
STEP 1) INSPECT ISOLATOR ROW FOR SEDIMENT
A. INSPECTION PORTS (IF PRESENT)
A.1. REMOVE/OPEN LID ON NYLOPLAST INLINE DRAIN
A.2. REMOVE AND CLEAN FLEXSTORM FILTER IF INSTALLED
A.3. USING A FLASHLIGHT AND STADIA ROD, MEASURE DEPTH OF SEDIMENT AND RECORD ON MAINTENANCE LOG
A.4. LOWER A CAMERA INTO ISOLATOR ROW FOR VISUAL INSPECTION OF SEDIMENT LEVELS (OPTIONAL)
A.5. IF SEDIMENT IS AT, OR ABOVE, 3" (80 MM) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.
B. ALL ISOLATOR ROWS
B.1. REMOVE COVER FROM STRUCTURE AT UPSTREAM END OF ISOLATOR ROW
B.2. USING A FLASHLIGHT, INSPECT DOWN THE ISOLATOR ROW THROUGH OUTLET PIPE
i) MIRRORS ON POLES OR CAMERAS MAY BE USED TO AVOID A CONFINED SPACE ENTRY
ii) FOLLOW OSHA REGULATIONS FOR CONFINED SPACE ENTRY IF ENTERING MANHOLE
B.3. IF SEDIMENT IS AT, OR ABOVE, 3" (80 MM) PROCEED TO STEP 2. IF NOT, PROCEED TO STEP 3.

STEP 2) CLEAN OUT ISOLATOR ROW USING THE JETVAC PROCESS
A. A FIXED CULVERT CLEANING NOZZLE WITH REAR FACING SPREAD OF 45" (1.1 M) OR MORE IS PREFERRED
B. APPLY MULTIPLE PASSES OF JETVAC UNTIL BACKFLUSH WATER IS CLEAN
C. VACUUM STRUCTURE SUMP AS REQUIRED

STEP 3) REPLACE ALL COVERS, GRATES, FILTERS, AND LIDS; RECORD OBSERVATIONS AND ACTIONS.

STEP 4) INSPECT AND CLEAN BASINS AND MANHOLES UPSTREAM OF THE STORMTECH SYSTEM.

NOTES:
1. INSPECT EVERY 6 MONTHS DURING THE FIRST YEAR OF OPERATION. ADJUST THE INSPECTION INTERVAL BASED ON PREVIOUS OBSERVATIONS OF SEDIMENT ACCUMULATION AND HIGH WATER ELEVATIONS.
2. CONDUCT JETTING AND VACTORING ANNUALLY OR WHEN INSPECTION SHOWS THAT MAINTENANCE IS NECESSARY.

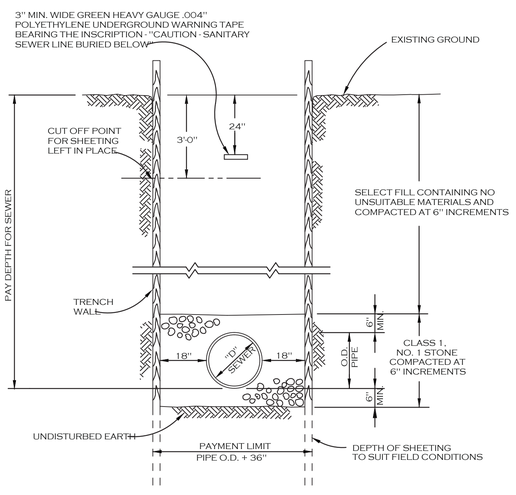
TYPICAL TRENCH DETAIL – TOWN ROAD CROSSING FOR MAIN SEWERS & HOUSE AND BUILDING CONNECTIONS

NOTE:
WHERE THE CONTRACTOR EXCAVATES BEYOND THE PAY LIMITS SHOWN; SELECT FILL AND PAVEMENT, SIDEWALK & DRIVEWAY REPLACEMENT OUTSIDE THE PAY LIMITS SHALL BE FURNISHED AND PLACED AT THE CONTRACTOR'S EXPENSE. (TYP.)



NOTE:
IF CONCRETE ENCASEMENT IS REQUIRED, IT SHALL BE INSTALLED IN PLACE OF (AND TO THE DIMENSIONS OF) THE PIPE BEDDING AND COVER TO 12" MIN. ABOVE AND BELOW THE PIPE (SEE WATER CROSSING DETAIL ON THIS SHEET)

If altered such R.A., P.E. or L.L.S. shall affix his or her seal, signature, the date, the notation "altered by" and a specific description of the alteration.

© Carmina Wood Morris DPC

GENERAL NOTES:

01. THE CONTRACTOR SHALL COMPLY WITH THE TOWN OF AMHERST STANDARD DRAWINGS AND SPECIFICATIONS.

02. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE PROJECT ENGINEER AND THE TOWN OF AMHERST ENG. DEPT. OF ANY HAZARDOUS SUBSTANCE ENCOUNTERED DURING THE CONSTRUCTION OF THE WORK. HE SHALL AT HIS EXPENSE, CONFORM TO ALL LAWS, RULES, REGULATIONS AND DIRECTIONS AS PROMULGATED BY THE UNITED STATES DEPARTMENT OF LABOR, OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, THE NEW YORK STATE DEPARTMENT OF HEALTH AND ANY SUCH LOCAL RULES, ORDINANCES AND LAWS WHEN ENCOUNTERING OR WORKING WITH ANY SUCH HAZARDOUS SUBSTANCE.

03. THE CONTRACTOR SHALL COMPLY IN ALL RESPECTS TO THE INDUSTRIAL CODE PART (RULE NO.) 53 RELATING TO CONSTRUCTION, EXCAVATION AND DEMOLITION OPERATIONS AT OR NEAR UNDERGROUND FACILITIES, AS ISSUED BY THE STATE OF NEW YORK DEPARTMENT OF LABOR, BOARD OF STANDARD AND APPEALS.

04. SINCE THE ERIE COUNTY WATER AUTHORITY OPERATES AND MAINTAINS THE EXISTING WATER LINES, THEY ARE TO BE NOTIFIED AT LEAST 48 HOURS IN ADVANCE OF THE START OF CONSTRUCTION. ALL EXISTING VALVES ARE TO BE OPERATED BY THE ERIE COUNTY WATER AUTHORITY PERSONNEL.

05. THE CONTRACTOR SHALL EXPOSE EXISTING UTILITIES AHEAD OF THE PIPE LAYING OPERATION, SO THAT, IF MINOR ADJUSTMENTS MUST BE MADE IN ELEVATION AND/OR ALIGNMENT DUE TO INTERFERENCE FROM THESE UTILITIES, SAID CHANGES CAN BE MADE IN ADVANCE OF THE WORK.

06. WHERE SUCH FACILITIES ARE UNDER THE SUPERVISION OF A PROFESSIONAL ENGINEER, HE SHALL CERTIFY TO THE ENGINEERING DEPARTMENT OF THE TOWN OF AMHERST THAT SAID FACILITIES AS CONSTRUCTED WERE SUPERVISED BY HIMSELF (HERSELF) AND THAT THE WORKS HAVE BEEN FULLY COMPLETED IN ACCORDANCE WITH THE APPROVED ENGINEERING REPORTS, PLANS, SPECIFICATIONS, CONTRACT DOCUMENTS AND ANY AND ALL ADDENDA TO SAME.

07. THE CONSTRUCTION OF THE FACILITIES SHALL BE UNDER THE SUPERVISION OF A PERSON OR FIRM QUALIFIED TO PRACTICE PROFESSIONAL ENGINEERING IN NEW YORK STATE UNDER THE EDUCATION LAW OF THE STATE, WHENEVER ENGINEERING SERVICES ARE REQUIRED BY SUCH LAW FOR SUCH PURPOSES.

08. A WRITTEN CERTIFICATE OF CONSTRUCTION COMPLIANCE, INCLUDING THE RESULTS OF HYDROSTATIC LEAKAGE TESTS, MADE BY THE PROFESSIONAL ENGINEER SUPERVISING THE CONSTRUCTION, SHALL BE SUBMITTED TO THE ERIE COUNTY DEPART. OF ENVIRONMENT PLANNING AND NEW YORK DEPARTMENT OF ENVIRONMENTAL CONSERVATION WITHIN THIRTY (30) DAYS AFTER CONSTRUCTION COMPLETION.

09. UNSUITABLE MATERIALS SUCH AS FROZEN ORGANIC AND/OR VEGETABLE MATERIAL, DEBRIS, TREES, LUMBER, LARGE STONES OR CLODS (6.0" OR LARGER), MUCK, PEAT, ORGANIC SILT WILL NOT BE ACCEPTABLE FILL AND CERTAIN MAN-MADE DEPOSITS OF INDUSTRIAL WASTE, SLUDGE OR LANDFILL MAY ALSO BE DETERMINED AS UNSUITABLE HAZARDOUS MATERIAL.

10. THE COMPACTION OF ALL MATERIALS WILL OCCUR AT 6" INCREMENTS.

11. VERIFICATION OF ALL EXISTING EASEMENTS IS THE RESPONSIBILITY OF THE DESIGN ENGINEER AND THEY MUST BE SHOWN ALONG WITH ALL PROPOSED EASEMENTS ON PLAN DRAWINGS.

12. SHOULD A FLUID CONDITION BE ENCOUNTERED AT THE TRENCH BOTTOM, THE CONTRACTOR IS TO INSTALL ADDITIONAL STONE CRADLE AS ORDERED BY THE ENGINEER.

13. ALL PIPE CROSSING UNDER PAVED AREAS ARE TO BE BACKFILLED TO SUBGRADE WITH COMPACTED SELECT MATERIAL TO FIVE (5) FEET OUTSIDE THE PAVEMENT EDGES.

14. THE CONTRACTOR SHALL RETAIN THE SERVICES OF A QUALIFIED TREE EXPERT TO REMOVE, WHERE NECESSARY, BRANCHES WHICH INTERFERE WITH THE CONSTRUCTION OPERATION, OR REPAIR TREES HAVING SUFFERED DAMAGE BY CONSTRUCTION ACTIVITIES. THE COST INVOLVED IN THE ABOVE IS TO BE INCLUDED IN THE VARIOUS ITEMS OF THE CONTRACT.

15. SEWERS SHALL BE LAID AT LEAST TEN (10) FEET HORIZONTALLY FROM ANY EXISTING OR PROPOSED WATERMAIN. THE DISTANCE SHALL BE MEASURED EDGE TO EDGE. IN CASES WHERE IT IS NOT PRACTICAL TO MAINTAIN A TEN FOOT SEPARATION, THE APPROPRIATE REVIEWING AGENCY MAY ALLOW DEVIATION ON A CASE-BY-CASE BASIS, IF SUPPORTED BY DATA FROM THE DESIGN ENGINEER. SUCH DEVIATION MAY ALLOW INSTALLATION OF THE SEWER CLOSER TO A WATERMAIN, PROVIDED THAT THE WATERMAIN IS IN A SEPARATE TRENCH OR ON AN UNDISTURBED EARTH SHELF LOCATED ON ONE SIDE OF THE SEWER AND AT AN ELEVATION SO THE BOTTOM OF THE WATERMAIN IS AT LEAST 18" (46CM) ABOVE THE TOP OF THE SEWER.

16. SEWERS CROSSING WATERMAINS SHALL BE LAID TO PROVIDE MINIMUM VERTICAL DISTANCE OF 18" (46CM) BETWEEN THE OUTSIDE OF A WATERMAIN AND THE OUTSIDE OF THE SEWER. THIS SHALL BE THE CASE WHERE THE WATERMAIN IS EITHER ABOVE OR BELOW THE SEWER. THE CROSSING SHALL BE ARRANGED SO THAT THE SEWER JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE WATERMAIN JOINTS. WHERE A WATERMAIN CROSSES UNDER A SEWER, ADEQUATE STRUCTURAL SUPPORT SHALL BE PROVIDED FOR THE SEWER, TO PREVENT DAMAGE TO THE WATERMAIN.

17. WHEN IT IS IMPOSSIBLE TO OBTAIN PROPER HORIZONTAL AND VERTICAL SEPARATION AS STIPULATED ABOVE, THE SEWER SHALL BE DESIGNED AND CONSTRUCTED EQUAL TO WATER PIPE AND SHALL BE PRESSURE TESTED AS TO ASSURE WATERTIGHTNESS PRIOR TO BACKFILLING.

18. THE PIPE SHALL BE P.V.C. SEWER PIPE CONFORMING TO THE LATEST REVISIONS OF ASTM DESIGNATION D-3034, SDR-35, INSTALLED IN ACCORDANCE WITH ASTM.

19. THE MANHOLE COVERS ARE TO BEAR THE INSCRIPTION "AMHERST SANITARY".

SANITARY SEWER TESTING METHODS

GENERAL NOTES

(A) LEAKAGE TESTS

01. THE TEST PERIOD WHEREIN THE MEASUREMENTS ARE TAKEN SHALL NOT BE LESS THAN 24 HOURS, REGARDLESS OF THE TEST METHOD USED.

02. THE TOTAL LEAKAGE OF ANY SECTION TESTED BY ANY TEST METHOD SHALL NOT EXCEED THE RATE OF 200 GALLONS PER MILE OF PIPE PER 24 HOURS PER INCH OF NOMINAL PIPE DIAMETER.

03. MANHOLES SHALL BE CONSIDERED AS SECTIONS OF 48" DIAMETER PIPE AND THE EQUIVALENT LEAKAGE ALLOWANCE SHALL BE COMPUTED PER NOTE 02 USING THE SUBMERGED HEIGHT OF MANHOLE AS THE LENGTH.

04. WHEN MANHOLES ARE TESTED SEPARATELY, ALL PIPE OPENINGS SHALL BE PLUGGED AND THE TEST PROCEDURES AND CRITERIA SHALL BE APPLIED IN THE SAME MANNER AS FOR TESTS INVOLVING ONLY THE PIPE OR A COMBINATION OF PIPE AND MANHOLES.

(B) INFILTRATION TEST CRITERIA FOR USE

01. THIS TEST METHOD MAY ONLY BE USED WHEN GROUND WATER LEVELS ARE AT LEAST TWO (2) FEET ABOVE THE TOP OF THE PIPE FOR THE ENTIRE LENGTH OF THE SECTION TO BE TESTED DURING THE ENTIRE PERIOD OF THE TESTS.

02. GROUND WATER LEVELS MAY BE MEASURED IN AN OPEN TRENCH OR IN STANDPIPES PREVIOUSLY PLACED IN BACKFILLED TRENCHES DURING BACKFILLING.

03. THE NUMBER OF STANDPIPES REQUIRED AND LOCATION OF THE SAME ARE TO BE AS ORDERED BY THE ENGINEER. STANDPIPES MAY BE OF ANY PIPE MATERIAL BUT MUST BE OF SUCH DIAMETER (2-1/2" MINIMUM) AS TO PERMIT THE INSERTION OF A RULE OR LEVEL ROD. CRUSHED STONE SHALL BE PLACED AROUND THE LOWER OPEN ENDS OF THE STANDPIPES.

04. STANDPIPES ARE TO BE REMOVED AT THE SATISFACTORY COMPLETION OF THE TESTS.

05. IF IN LIEU OF STANDPIPES, THE TRENCH IS TO BE LEFT OPEN FOR GROUND WATER OBSERVATION, THE LENGTH OF UNBACKFILLED TRENCH AT ANY ONE TIME MAY HAVE TO BE LIMITED FOR REASONS OF SAFETY.

(C) EXFILTRATION TEST CRITERIA FOR USE

01. THIS TEST CONSISTS OF FILLING THE PIPE WITH WATER TO PROVIDE A HEAD OF AT LEAST TWO (2) FEET ABOVE THE TOP OF THE PIPE OR ABOVE GROUND WATER WHICHEVER IS HIGHER AT THE HIGHEST POINT OF THE PIPE LINE UNDER TEST, AND THEN MEASURING THE LOSS OF WATER TO MAINTAIN THE ORIGINAL LEVEL.

02. IN THIS TEST THE PIPE LINE MUST BE FILLED WITH WATER AND ALLOWED TO REMAIN SO FILLED FOR AT LEAST 24 HOURS PRIOR TO TAKING MEASUREMENTS.

03. REGARDING GROUND WATER MEASUREMENTS: SEE NOTES 02 THROUGH 05 ABOVE.

04. REGARDING THE TEST STANDPIPE: THERE MUST BE SOME POSITIVE METHOD OF RELEASING ENTRAPPED AIR IN THE SEWER PRIOR TO TAKING MEASUREMENTS.

(D) DEFLECTION TEST FOR PVC SEWER PIPE

01. DEFLECTION TESTS SHALL BE PERFORMED ON ALL FLEXIBLE GRAVITY SEWER PIPE. TESTS SHALL BE CONDUCTED AFTER THE FINAL BACKFILL HAS BEEN IN PLACE FOR AT LEAST 30 DAYS.

02. NO PIPE SHALL EXCEED DEFLECTION OF 5%. DEFLECTION GAGE MAY BE BORROWED FROM THE TOWN ENGINEER FOR 8" AND 10" PIPE. THE DEFLECTION TEST MUST BE EXECUTED AFTER 30 DAYS OF PLACEMENT OF FINAL BACKFILL. THE TEST WILL ALSO BE DONE WITHOUT MECHANICAL PULLING DEVICES.

MANHOLE PLACEMENT AND MAINTENANCE DURING CONSTRUCTION AND DEVELOPMENT

CONTRACTOR AND/OR DEVELOPERS SHALL CONSTRUCT ALL MANHOLE STRUCTURES IN ACCORDANCE WITH THE TOWN OF AMHERST STANDARD SPECIFICATIONS OR THE SPECIFICATIONS OF THE DESIGN ENGINEER WHEN REQUIRED BY THE TOWN.

ALL MANHOLES ARE TO BE DESIGNED AND FURNISHED WITH RIM ELEVATIONS AT FINAL FINISHED GRADES. THE CONTRACTOR, DEVELOPER, OR HOME BUILDER SHALL BE RESPONSIBLE FOR ALL CORRECTIONS, ADJUSTMENTS, AND MODIFICATIONS NEEDED FOR RAISING, LOWERING, OR REPLACING ANY AND ALL MANHOLES AS PROPOSED FOR THE FACILITY.

ALL AS-BUILT STATIONING, LINE AND GRADE IMPROVEMENTS, INVERT AND RIM ELEVATIONS, "Y" LOCATIONS, INSPECTION REPORTS, ROADWAY OR STREET NAMES, RIGHT-OF-WAY WIDTHS, AND EASEMENT LINES SHALL BE FURNISHED TO THE TOWN ON A SET OF MYLAR DRAWINGS PRIOR TO TAP-IN APPROVAL, PIP ACCEPTANCE, AND/OR RELEASE OF FINAL PAYMENT.

ALL MANHOLE STRUCTURES SHALL BE MADE ACCESSIBLE TO THE TOWN OF AMHERST TELEVISION/MAINTENANCE CREWS. THE CONTRACTOR AND/OR DEVELOPER SHALL PROVIDE A DRY, WELL COMPACTED, STABLE SURFACE FREE FROM SHOW AND OBSTRUCTIONS FOR SAFE AND OPEN ACCESS WITH TOWN VEHICLES. SHOULD THE CONTRACTOR AND/OR DEVELOPER WISH TV INSPECTIONS DURING WET WEATHER/WET SOFT SOIL CONDITIONS, HE SHALL PROVIDE ALL NECESSARY GRANULAR BACKFILL, DISTRIBUTED AND COMPACTED TO SUPPLY ACCESS TO EACH MANHOLE. THE CONTRACTOR AND/OR DEVELOPER SHALL BEAR ALL COSTS OF TOWING, DOWN TIME, CREW TIME, AND DAMAGE ALONG WITH RESTORATION, SHOULD SUCH ACCESSWAYS FAIL.

3. POLYETHYLENE WRAP IS TO BE EXTENDED A MINIMUM OF 12" PAST THE FITTING ON EACH LEG AND SECURED TO THE PVC PIPE WITH AT LEAST TWO CIRCUMFERENTIAL WRAPS OF POLYETHYLENE TAPE.

I:\PUBLIC\ENGINEERING\CURRENT ECWA DETAILS\SD39_POLYWRAPPING_FITTINGS

ERIE COUNTY WATER AUTHORITY BUFFALO, NEW YORK	STANDARD DETAIL POLYWRAPPING DUCTILE IRON FITTINGS ON PVC PIPE	DWG. NO. SD39	
		DATE 3/18	REVISED

STEP 1.
CUT A SECTION OF POLYETHYLENE TUBE APPROXIMATELY 2 FEET LONGER THAN THE PIPE SECTION. REMOVE ALL LUMPS OF CLAY, MUD, CINDERS, OR OTHER MATERIALS THAT MIGHT HAVE ACCUMULATED ON THE PIPE SURFACE DURING STORAGE. SLIP THE POLYETHYLENE TUBE ACCORDION-FASHION ON THE END OF THE PIPE. PULL BACK THE OVERHANGING END OF THE TUBE UNTIL IT CLEARS THE PIPE END.

STEP 2.
DIG A SHALLOW BELL HOLE IN THE TRENCH BOTTOM AT THE JOINT LOCATION TO FACILITATE INSTALLATION OF THE POLYETHYLENE TUBE. LOWER THE PIPE INTO THE TRENCH AND MAKE UP THE PIPE JOINT WITH THE PROCEDURE SECTION OF PIPE.

STEP 3.
MOVE THE CABLE TO THE BELL END OF THE PIPE AND LIFT THE PIPE SLIGHTLY TO PROVIDE ENOUGH CLEARANCE TO EASILY SLIDE THE TUBE. SPREAD THE TUBE OVER THE ENTIRE BARREL OF THE PIPE. NOTE: MAKE SURE THAT NO DIRT OR OTHER BEDDING MATERIAL BECOMES TRAPPED BETWEEN THE WRAP AND THE PIPE.

STEP 4.
MAKE THE OVERLAP OF POLYETHYLENE TUBE BY PULLING BACK THE BUNCHED POLYETHYLENE FROM THE PRECEDING LENGTH OF PIPE AND SECURING IT IN PLACE. NOTE: THE POLYETHYLENE MAY BE SECURED IN PLACE BY USING TAPE OR PLASTIC TIE STRAPS.

STEP 5.
OVERLAP THE SECURED TUBE END WITH THE END OF THE NEW PIPE SECTION, FOR A MINIMUM OF 12 INCHES. SECURE THE NEW TUBE END IN PLACE. PIPE JOINT SHOULD HAVE TWO LAYERS OF POLYWRAP, EACH SECURED IN PLACE.

STEP 6.
TAKE UP THE SLACK IN THE TUBE ALONG THE BARREL OF THE PIPE TO MAKE A SNUG, BUT NOT TIGHT, FIT. FOLD EXCESS POLYETHYLENE BACK OVER THE TOP OF THE PIPE.

STEP 7.
SECURE THE FOLD AT SEVERAL LOCATIONS ALONG THE PIPE BARREL (APPROXIMATELY EVERY 3 FEET, MAXIMUM OF 5 FEET).

STEP 8.
REPAIR ALL THE SMALL RIPS, TEARS, OR OTHER TUBE DAMAGE WITH ADHESIVE TAPE. IF THE POLYETHYLENE IS BADLY DAMAGED, REPAIR THE DAMAGED AREA WITH A SHEET OF POLYETHYLENE AND SEAL THE EDGES OF THE REPAIR WITH ADHESIVE TAPE.

STEP 9.
CAREFULLY BACKFILL THE TRENCH ACCORDING TO THE PROCEDURES IN AWWA C600 STANDARD. TO PREVENT DAMAGE DURING BACKFILLING ALLOW ADEQUATE SLACK IN THE TUBE AT THE JOINT. BACKFILL SHOULD BE FREE OF CINDERS, ROCKS, BOULDERS, NAILS, STICKS, OR OTHER MATERIALS THAT MIGHT DAMAGE THE POLYETHYLENE. AVOID DAMAGING THE POLYETHYLENE WHEN USING TAMPING DEVICES.

NOTES:
1 – POLYETHYLENE WRAP (POLYWRAP) SHALL BE OF PROPER DIAMETER TO FIT OVER BELLS AND EXTERNAL WEDGE-ACTION RETAINER GLANDS.
2 – CAST AND DUCTILE IRON FITTINGS (BENDS, TEES, VALVES, ETC.) ARE TO BE WRAPPED IN POLYWRAP AND SECURED IN PLACE.
3 – DO NOT USE CHAINS, METAL WIRE, OR OTHER SUPPORTING SYSTEMS WHICH MAY DAMAGE THE POLYETHYLENE ENCASEMENT. REPLACE DAMAGED POLYWRAP ACCORDINGLY.

		DATE 6/00	REVISED 11/16

NOTES

1. All elevations refer to USGS NAVD83 datum.
2. The CONTRACTOR shall obtain necessary permits and furnish copies to the ENGINEER prior to commencing work.
3. The CONTRACTOR'S work area shall be confined to the limits of the right-of-ways and easements. The CONTRACTOR shall obtain any additional easements or work releases should the CONTRACTOR require additional area to accommodate his operations.
4. The CONTRACTOR shall provide maintenance and protection of traffic in accordance with the Erie County Highway Department standards and the NYSDOT Manual of Uniform Traffic Control Devices.
5. The locations and depths of existing underground utilities as shown on the plans and profiles are approximate. Other underground utilities not shown may be encountered. The CONTRACTOR shall perform test pits to verify the location and elevation of utilities at interconnections and crossings as shown, directed, or required. The CONTRACTOR shall excavate in advance of the pipe laying operation and expose all existing underground utilities to prevent damage during construction and to determine required changes in grade necessary to install the watermain to avoid conflicts.
6. The CONTRACTOR shall install those measures required to limit erosion of areas disturbed by the work. Clearing shall be performed on an as-needed basis, phased to reduce erosion and visual impact.
7. Blasting will not be permitted.
8. No more than one connection may be made to any existing watermain prior to testing, disinfection, and approval of the Waterline Installation Completed Works Approval Report(s) by the Erie County Water Authority and the Erie County Health Department.
9. The Erie County Water Authority shall only operate existing valves and fire hydrants, including newly installed valves and fire hydrants that have been placed into service. The CONTRACTOR is advised that watertight conditions may not exist when existing valves are closed.
10. The CONTRACTOR shall have all equipment, manpower, and materials required on site and ready for use prior to commencing any shut-down or removing any existing facilities from service. The CONTRACTOR shall notify all affected customers in writing of any shut-down at least 48 hours in advance. The CONTRACTOR shall notify the appropriate fire stations 48 hours in advance prior to taking any fire hydrants out of service. Any fire hydrants not in service shall be bagged in burlap or plastic. Any shut-down shall be limited to 4 consecutive hours. It may be necessary to schedule shut-downs at night, weekends, or other off hours so as to not affect schools, businesses or other customers, as determined by the ENGINEER. Shut-down requests shall be submitted to the Erie County Water Authority a minimum of 5 business days in advance of the requested shut-down date.

I:\PUBLIC\ENGINEERING\CURRENT ECWA DETAILS\SD29_GENERAL_NOTES

ERIE COUNTY WATER AUTHORITY BUFFALO, NEW YORK	STANDARD DETAIL GENERAL NOTES	DWG. NO. SD29	
		DATE 3/05	REVISED 7/17

11. All watermain piping shall be installed with a minimum of 5'-0" of cover.
12. All watermain piping shall be installed with a minimum of 1'-6" of vertical clearance and 10'-0" of horizontal clearance from sanitary and storm piping, measured from the outside of the pipes at the point of crossing.
13. If the material at the design grade is unsuitable as determined by the ENGINEER, the CONTRACTOR, when ordered in writing, shall excavate additional material to the depth necessary and shall backfill to the proposed grade with the select granular material.
14. The installation of 90 degree bends in the watermain is not allowed, unless approved by the Erie County Water Authority.
15. Thrust restraint for watermain piping through 12-inch diameter shall consist of thrust blocks and pipe joint restraint.
16. The CONTRACTOR shall notify the owner of any utility pole in advance of any excavation work that will take place within 5'-0" of the utility pole. The CONTRACTOR shall include the cost of temporary pole support in the appropriate bid item.Where utility poles are required to be supported during construction, the CONTRACTOR shall make all necessary arrangements with the utility company.
17. If materials are encountered during the construction that are suspected of being contaminated, the CONTRACTOR shall immediately notify the NYSDEC for direction regarding testing, separation, containment, and disposal procedures.
18. Existing fire hydrants removed during construction and not reinstalled as part of the work shall be scheduled and returned to the Erie County Water Authority Service Center, 3030 Union Road, Cheektowaga, New York 14227.
19. The CONTRACTOR shall cold patch all trench excavations in traveled areas including roads, driveways, sidewalks, and parking areas.
20. The CONTRACTOR shall not restrict access for school buses or any emergency vehicles.
21. The use of existing fire hydrants for any reason is prohibited without prior approval of the Erie County Water Authority. This includes newly installed fire hydrants that have been placed into service.
22. The CONTRACTOR shall submit procedures for testing and disinfection of the watermain to the ENGINEER for review prior to the start of testing.
23. The CONTRACTOR shall be present and assist in the Final Walk inspection. The CONTRACTOR shall provide sufficient personnel and equipment to demonstrate to the ENGINEER that all valves, fire hydrants, and curb stops operate as required.

TREE PLANTING DETAIL

PLANTING NOTES:

1. ALL INTERIOR LANDSCAPED AREAS SHALL HAVE A MINIMUM PLANTING SOIL DEPTH OF THREE (3) FEET AND BE FREE FROM ALL FORMS OF CONSTRUCTION DEBRIS AND FOREIGN MATERIAL.
2. ALL TREE PIT SAUCERS, SHRUB BEDS, ORNAMENTAL GRASS BEDS, AND PERENNIAL FLOWER BEDS SHALL RECEIVE "PREEN" HERBICIDE AND THREE (3) INCHES DEPTH OF DARK SHREDDED HARDWOOD BARK MULCH. LOCATIONS TO BE COORDINATED IN FIELD WITH OWNER REP.
3. ALL SEASONAL FLOWER BEDS SHALL BE A MINIMUM OF TWELVE (12) INCHES DEEP WITH A WELL-BLENDED MIXTURE OF 50% PEAT MOSS. SEASONAL FLOWER BEDS SHALL RECEIVE "PREEN" HERBICIDE. NO MULCH SHALL BE INSTALLED IN THE SEASONAL FLOWER BEDS. LOCATIONS TO BE COORDINATED IN FIELD WITH OWNER REP.
4. ALL DECIDUOUS AND EVERGREEN TREES SHALL BE STAKED WITH THREE (3) TREE STAKES AS PER TREE PLANTING DETAIL.

EcoForm

ECF-S small area light

Gardco EcoForm Gen-2 combines economy with performance in an LED area luminaire. Capable of delivering up to 26,400 lumens or more in a compact, low profile LED luminaire, EcoForm offers a new level of customer value. EcoForm features an innovative retrofit arm kit, simplifying site conversions to LED by eliminating the need to drill additional holes in most existing poles. Integral control systems available for further energy savings. Includes Service Tag, our innovative way to provide assistance throughout the life of the product.

1. BL=IMR3/7 equipped with out-boarded sensor housing when voltage is HVU (347-480V).
2. Mounts to a 4" round pole with adapter included for square poles.
3. Limited to a maximum of 45 degrees aiming above horizontal.
4. Not available with other dimming control options.
5. Not available with motion sensor.
6. Not available with photocontrol.
7. Available only in 120 or 277V.
8. Not available in 347 or 480V.
9. Must specify input voltage.
10. Dimming will not be connected to NEMA receptacle if ordering with other control options.
11. Not available in 480V.
12. Not available with DCC.
13. Not available with SF and WS. RPAs provided with black finish standard.
14. HS not available with Type 5 and SW optics.
15. Available only with SW, LLC, and BL control options.
16. Available only with SW and BL control options.

EcoForm Accessories (ordered separately, field installed)

Controls Accessories

Pole Mount Motion Sensor
- MS-A-120V 120V Input
- MS-A-277V 277V Input

Wireless system
Remote mount module
- LLCR3-(F) #3 lens

Central Remote Motion Response
(pack comes with 2 stainless male panel)
- MS2-A-F/HS
- MS2-A-F/VR-7

Shielding Accessories

Horse Side Shield
Standard optic orientations
- NBS-60-H[19] Internal House Side Shield for 60 LEDs (5 modules)
- NBS-96-H[19] Internal House Side Shield for 96 LEDs (6 modules)

Optic at 90 or 270 orientation
- NBS-60-V[19] Internal House Side Shield for 60 LEDs (5 modules)
- NBS-96-V[19] Internal House Side Shield for 96 LEDs (6 modules)

14. Not available with Type 5 or SW optics

Luminaire Accessories

- ECF-BD-G2 Bird deterrent
- ECF-RAM-G2-(F) Retrofit Arm mount kit
- ECF-SF-G2-(F) Slip Fitter Mount (fits to 2 3/8" O.D. tenon)
- ECF-WS-G2-(F) Wall mount with surface conductor entry permitted

EcoForm PTF2
(pole top fitter fits 2 3/8"-3½" OD x 4" depth tenon)
- PTF2-ECF-S/L-1-90-(F) 1 luminaire at 90°
- PTF2-ECF-S/L-2-90-(F) 2 luminaires at 90°

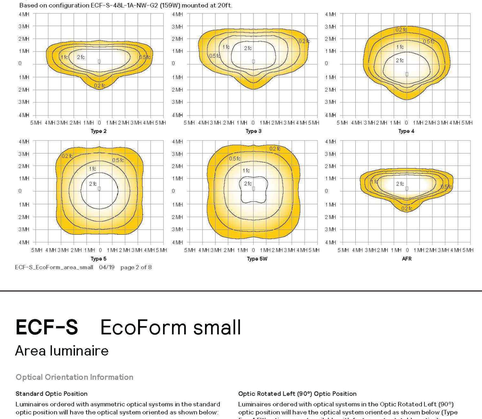
- PTF4-ECF-S/L-3-90-(F) 3 luminaires at 90°
- PTF4-ECF-S/L-4-90-(F) 4 luminaires at 90°
- PTF4-ECF-S/L-3-120-(F) 3 luminaires at 120°

(F) = Specify finish



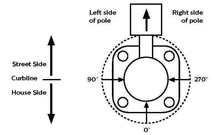
Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions. L_{70} is the predicted time when LED performance depreciates to 70% of initial luminous flux. Calculated per IESNA TM-21. Published L_{70} hours limited to 6 times test hours.

Ambient Temperature °C	Drive mA	Calculated L_{70} Hours	L_{70} per TM-21	Lumen Maintenance % at 60,000 hrs
25°C	up to 1200 mA	>300,000 hours	>60,000 hours	>80%

Optical distribution

Based on configuration ECF-S-48L-1A-NW-G2 (159W) mounted at 20ft.

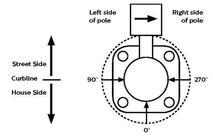


ECF-S EcoForm small

Area luminaire

Optical Orientation Information

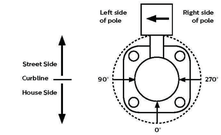
Standard Optic Position



Luminaires ordered with asymmetric optical systems in the standard optic position will have the optical system oriented as shown below:

Note: The hand hole will normally be located on the pole at the 0° point.

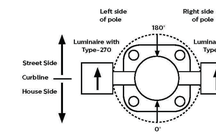
Optic Rotated Right (270°) Optic Position



Luminaires ordered with optical systems in the Optic Rotated Right (270°) optic position will have the optical system oriented as shown below (Type 5 and 5W optics are not available with factory set rotatable optics):

Note: The hand hole will normally be located on the pole at the 0° point.

Optic Rotated Left (90°) Optic Position

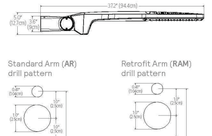


Luminaires ordered with optical systems in the Optic Rotated Left (90°) optic position will have the optical system oriented as shown below (Type 5 and 5W optics are not available with factory set rotatable optics):

Note: The hand hole will normally be located on the pole at the 0° point.

Twin Luminaire Assemblies with Type-90/Type-270 Rotated Optical Systems

Twin luminaire assemblies installed with rotated optical systems are an excellent way to direct light toward the interior of the site (Street Side) without additional equipment. It is important, however, that care be exercised to insure that luminaires are installed in the proper location.



Luminaires with Optic Rotated Right (270°) are installed on the LEFT Side of Pole

Luminaires with Optic Rotated Left (90°) are installed on the RIGHT Side of Pole

Note: The hand hole location will depend on the drilling configuration ordered for the pole.

Optic Rotated Right (270°) Optic Position

Luminaires ordered with optical systems in the Optic Rotated Right (270°) optic position will have the optical system oriented as shown below (Type 5 and 5W optics are not available with factory set rotatable optics):

Note: The hand hole will normally be located on the pole at the 0° point.

Area luminaire

Specifications

Housing

One-piece die-cast aluminum housing with integral arm and separate, self-retained hinged, one-piece die cast door frame. Luminaire housing rated to IP66, tested in accordance to Section 9 of IEC 60598-1.

Vibration resistance

Luminaire is tested and rated 3G over 100,000 cycles conforming to standards set forth by ANSI C136.31-2010. Testing includes vibration in three axes, all performed on the same luminaire.

Light engine

Light engine comprises of a module of 16-LED aluminum metal clad board fully sealed with optics offered in multiples of 2, 3, and 4 modules or 32, 48, and 64 LEDs. Module is RoHS compliant. Color temperatures: 3000K +/-125K, 4000K, 5000K +/- 200K. Minimum CRI of 70. LED light engine is rated IP66 in accordance to Section 9 of IEC 60598-1.

Energy saving benefits

System efficacy up to 133 lms/W with significant energy savings over Pulse Start Metal Halide luminaires. Optional control options provide added energy savings during unoccupied periods.

Optical systems

Type 2, 3, 4, 5, SW, and AFR distributions available. Internal Shield option mounts to LED optics and is available with Type 2, 3, 4, and AFR distributions. Types 2, 3, 4, and AFR when specified and used as rotated, are factory set only. Performance tested per LM-79 and TM-15 (IESNA) certifying its photometric performance. Luminaire designed with 0% uplight (0.0 per IESNA TM-15).

Mounting

Standard luminaire arm mounts to 4" O.D. round poles. Can also be used with 5" O.D. poles. Square pole adapter included with every luminaire. Round Pole Adapter (RPA) required for 3-3.9" poles. EcoForm features a retrofit arm kit. When specified with the retrofit arm (RAM) option, EcoForm seamlessly simplifies site conversions to LED by eliminating the need for additional pole drilling on most existing poles. RAM will be boxed separately. Also optional are slipfitter and wall mounting accessories.

Control options

0-10V dimming (DD): Access to 0-10V dimming leads supplied through back of luminaire (for secondary dimming controls by others). Cannot be used with other control options.

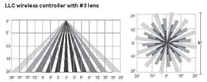
Dual Circuit Control (DCC): Luminaire equipped with the ability to have two separate circuits controlling drivers and light engines independently. Permits separate switching of separate modules controlled by use of two sets of leads, one for each circuit. Not recommended to be used with other control options, motion response, or photocells.

SiteWise (SW): SiteWise system includes a controller fully integrated in the luminaire that enables the luminaires to communicate with a dimming signal transmitter cabinet located on site using patented central dimming technology. A locally accessible mobile app allows users to access the system and set functionalities such as ON/OFF, dimming levels and scheduling. SiteWise is available with motion response options in order to bring the light back to 100% when motion is detected. Cannot be used with other control options or photocell options. Additional functionalities are available such as communication with indoor lighting and connection to BMS systems. Complete information on the control system can be found on the SiteWise website at philips.com/sitewise.

Automatic Profile Dimming (CS/CM/CE/DA): Standard dimming profile of 30% or 50% provide flexibility towards energy savings goals while optimizing light levels during specific dark hours. When used in combination with not programmed motion response it overrides the controller's schedule when motion is detected. After 5 minutes with no motion, it will return to the automatic dimming profile schedule. Automatic dimming profile scheduled with the following settings:

- **CS50/CS30:** Security for 7 hours night duration (Ex., 11 PM – 6 AM)
- **CM50/CM30:** Median for 8 hours night duration (Ex., 10 PM – 6 AM)
- **CE50/CE30:** Economy for 9 hours night duration (Ex., 9 PM – 6 AM)
- **DA50/DA30:** for all night (during all dark hours)

All above profiles are calculated from mid point of the night. Dimming is set. for 6 hours after the mid point and 1, 2, or 3 hours before depending of the duration of dimming. Cannot be used with other dimming control options.



Field Adjustable Wattage Selector (FAWS): Luminaire equipped with the ability to manually adjust the wattage in the field to reduce total luminaire lumen output and light levels. Comes pre-set to the highest position at the lumen output selected. Use chart below to estimate reduction in lumen output desired. Cannot be used with other control options or motion response.

FAWS Position	Percent of Typical Lumen Output
1	25%
2	50%
3	55%
4	65%
5	75%
6	80%
7	85%
8	90%
9	95%
10	100%

Note: Typical value accuracy +/- 5%

Wireless system (LLC): Optional wireless controller integral to luminaire ready to be connected to a Limelight system (sold by others). The system allows you to wirelessly manage the entire site, independent lighting groups- or individual luminaires while on-site or remotely. Based on a high-density mesh network with an easy to use web-based portal, you can conveniently access, monitor and manage your lighting network remotely. Wireless controls can be combined with site and area, pedestrian, and parking garage luminaires as well, for a completely connected outdoor solution. Equipped with motion response with #3 lens for 8-25' mounting heights. Also available with remote pod accessory where pod is mounted separate from luminaire to pole or wall.

LLC wireless controller with #3 lens

Motion response options

Bi-Level Infrared Motion Response (BL-IMR): Motion Response module is mounted integral to luminaire factory pre-programmed to 50% dimming when not ordered with other control options. BL-IMR1 is set/operates in the following fashion: The motion sensor is set to a constant 50%. When motion is detected by the PIR sensor, the luminaire returns to full power/light output. Dimming on low is factory set to 50% with 5 minutes default in "full power" prior to dimming back to low. When no motion is detected for 5 minutes, the motion response system reduces the wattage by 50%, to 50% of the normal constant wattage reducing the light level. Other dimming settings can be provided if different dimming levels are required. This can also be done with FSIR-100 Wireless Remote Programming Tool (contact Technical Support for details).

Infrared Motion Response with Other Controls: When used in combination with other controls (Automatic Dimming Profile and SiteWise), motion response device will simply override controller's schedule with the added benefits of a combined dimming profile and sensor detection. In this configuration, the motion response device cannot be re-programmed with FSIR-100 Wireless Remote Programming Tool. The profile can only be re-programmed via the controller.

ECF-S EcoForm small

Area luminaire

Specifications

Infrared Motion Response Lenses (IMR3/IMR7): Infrared Motion Response Integral module is available with two different sensor lens types to accommodate various mounting heights and occupancy detection ranges. Lens #3 (IMR3) is designed for mounting heights up to 20' with a 40' diameter coverage area. Lens #7 is designed for higher mounting heights up to 40' with larger coverage areas up to 100' diameter coverage area. See charts for approximate detection patterns:

IMR3 Luminaire or remote mount controller with #3 lens

IMR7 Luminaire or remote mount controller with #7 lens

Infrared Motion Response Outboard (IMRO): Infrared Motion Response Outboard can be used in combination with automatic profile dimming and stand alone motion response. The pole mounted motion sensor is a PIR (passive infrared) device that can be mounted to a pole. One motion sensor per pole is required. Sensor finish is white Wattstopper EW-200-120-W or the EW-200-277-W. Order MS-A-120 or MS-A-277 separately. IMRO sensors require single voltage 120V or 277V input. If motion is detected during the time that the luminaire is operating at profile dimming mode specified, the luminaire returns to 100% power and light output. The luminaire remains on high until no motion is detected for the duration period, after which the luminaire returns back to automatic profile dimming. Duration period is factory set at 15 minutes, and is field adjustable from 5 minutes up to 15 minutes. The area motion detector provides coverage equal to up to 6 times the sensor height above ground, 270° from the front-center of the sensor (see chart for approximate detection patterns).

Pole Details: IMRO requires that the pole include additional hand hole 15 feet above the pole base, normally oriented 180° to the standard hand hole. For Gardco poles, order the pole with the Motion Sensor Mounting (MSM) option which includes the hand hole and a special hand hole cover plate for the sensor with a 1/2" NPT receptacle centered on the hand hole cover plate into which the motion sensor mounts. Once the motion sensor is connected to the hand hole cover plate, then wiring connections are completed in the pole. The plate (complete with motion sensor attached and wired) is then mounted to the hand hole. If poles are supplied by others, the customer is responsible for providing suitable mounting accommodations for the motion sensor in the pole (see Gardco Poles specification sheets for more information).

Electrical

Twist-Lock Receptacle (TLRDS/TLRD7/TLRPC): Twist Lock Receptacle with 5 pins enabling dimming or with 7 pins with additional functionality (by others) can be used with a twistlock photoelectric cell or a shorting cap. Dimming Receptacle Type B (5-pin) and Type D (7-pin) in accordance to ANSI C136.41. Can be used with third-party control system. Receptacle located on top of luminaire housing. When specifying receptacle with twistlock photoelectric cell, voltage must be specified. When ordering Twist-lock receptacle (TLRDS or TLRD7), photocell or shorting cap is not included.

Driver: Driver efficiency (>90% standard). 120-480V available (restrictions apply). Open/short circuit protection. Optional 0-10V dimming to 10% power. RoHS compliant.

Button Photocontrol (PCB): Button style design for internal luminaires mounting applications. The photocontrol is constructed of a high impact UV stabilized polycarbonate housing. Rated voltage of 120V or 208-277V with a load rating of 1000 VA. The photocell will turn on with 1-4fc of ambient light.

Surge protection (SP1/SP2): Surge protection device tested in accordance with ANSI/IEEE C62.41 per ANSI/IEEE C62.41.2 Scenario I Category C1 High Exposure 10kV/10kA waveforms for Line-Ground, Line-Neutral and Neutral-Ground, and in accordance with DOE MSSLC Model Specification for LED Roadway Luminaires Appendix D Electrical Immunity High test level 10kV/10kA. 20kV / 10kA surge protection device that provides extra protection beyond the SP1 10kV/10kA level.

Listings

UL/cUL wet location listed to the UL 1598 standard, suitable for use in ambient temperatures from -40° to 40°C (-40° to 104°F). Most EcoForm configurations are qualified under Premium and Standard DesignLights Consortium® categories. Consult DLC Qualified Products list to confirm your specific luminaire selection is approved. CCTs 3000K and warmer are Dark Sky Approved.

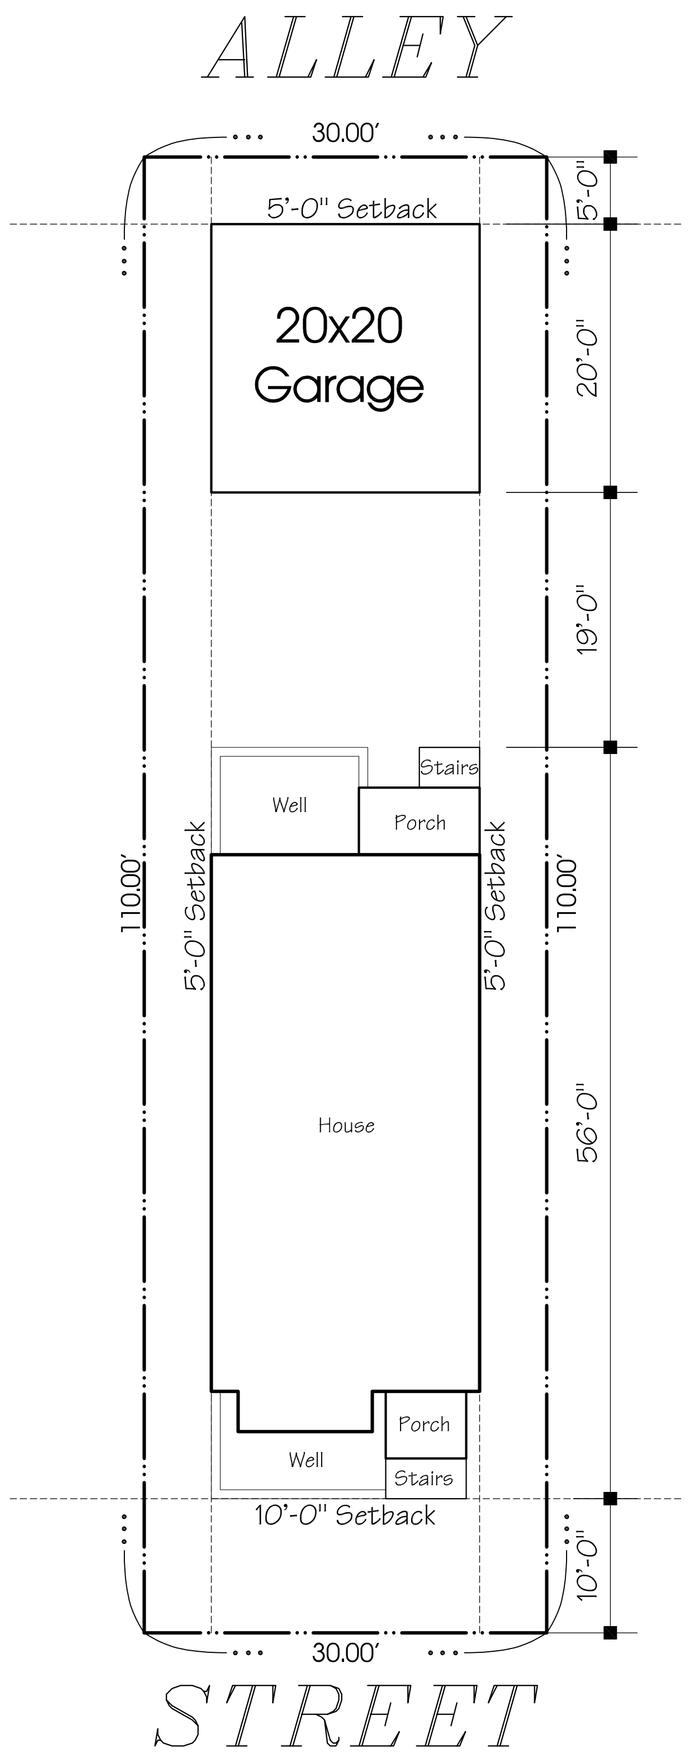
Finish

Each standard color luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powder coat finish. Standard colors include bronze (BZ), black (BK), white (WH), dark gray (DGY), and medium gray (MGY). Consult factory for specs on optional or custom colors.

Service Tag

Each individual luminaire is uniquely identifiable, thanks to the Service tag application. With a simple scan of a QR code, placed on the inside of the mast door, you gain instant access to the luminaire configuration, making installation and maintenance operations faster and easier, no matter what stage of the luminaire's lifetime. Just download the APP and register your product right away. For more details visit: signify.com

Warranty



EcoForm luminaires feature a 5-year limited warranty
See signify.com/warranties for complete details and exclusions.

DRAFT (9/22/2022)
TOWN OF AMHERST
PLANNING BOARD
SITE PLAN RESOLUTION
SP-2021-05

PETITIONER

Sawyer's Landing LLC
c/o Sean Hopkins, Esq.
5500 Main Street, Suite 343
Williamsville, NY 14221

PROPERTY LOCATION

1081 North French Road (portion) (NCD)

WHEREAS, the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on a Site Plan for a mixed-use development, and

WHEREAS, the Planning Board reviewed the plans and specifications for the proposed project, and

WHEREAS, the Site Plan was referred to the Town's various review agencies, and

WHEREAS, in accordance with Section 8-7-8 of the Zoning Ordinance, the Planning Board finds that:

A. The site plan includes usable space for active and passive recreation, including pedestrian connections.

B. The site plan includes open space lands for public ownership and use offered for dedication or other disposition to the Town or other public entity.

C. School sites and facilities are adequate to accommodate the proposed site plan.

D. The site plan does not include the extension of roadways to adjacent property.

WHEREAS, in accordance with Section 8-7-9 of the Zoning Ordinance, the Planning Board finds that:

A. The proposed site plan is consistent with the development plan if one is required.

B. The proposed site plan is consistent with the purpose and specific requirements of the Zoning Ordinance and generally consistent with the policies of the Comprehensive Plan.

C. Adequate services and utilities will be available prior to occupancy.

D. The site plan is consistent with all other applicable laws.

DRAFT (9/22/2022)
TOWN OF AMHERST
PLANNING BOARD
SITE PLAN RESOLUTION
SP-2021-05

PETITIONER	PROPERTY LOCATION
Sawyer's Landing LLC	1081 North French Road (portion) (NCD)

E. Pursuant to Local Law #3-82, as amended, the Planning Board has determined that the requirements of SEQR are complete and that the subject proposal is not expected to have a significant adverse effect on the environment. The previously undertaken SEQR process included a DEIS, FEIS and culminated in the Town Board's issuance of a SEQR Findings Statement on December 17, 2007. Lead Agency was re-established for review of the proposed amendment to the Findings Statement to allow the proposed mixed-use development, and the Findings Statement was revised on September 27, 2021.

F. Wetland permits were issued for this project by NYSDEC on December 17, 2019 and the US Army Corps of Engineers under Section 404 of the Clean Water Act on December 12, 2019. Both permits authorize work on the project until November 30, 2024.

NOW THEREFORE BE IT FURTHER RESOLVED that the Planning Board, in accordance with Section 8-7 of the Zoning Ordinance approves said Site Plan subject to the following conditions:

1. That the consideration of signs is specifically excluded from this approval as they will require a separate site plan review and approval by the Town.

2. That all dumpsters/trash containers and all mechanical equipment, utility structures, multiple meter boards, generators, and similar appurtenances, including those which are mounted on any part of a primary structure shall be appropriately screened with a fence, wall, and/or landscaping. Provide gate on dumpster enclosure that shall be closed whenever dumpster is not being serviced, enclosure shall be high enough to screen the dumpster(s) within.

3. That as-built record drawings, including location of utilities, be provided to the Engineering Department prior to issuance of a Certificate of Occupancy by the Building Department.

4. That the proposed 27 lots for 2 unit homes is excluded from this approval as it will require separate open development area and subdivision approvals.

5. That the petitioner obtain the required variances for remoteness of the secondary emergency access from the NYS Department of State prior to issuance of final approved site plan drawings by the Planning Department.

6. That the comments in the Amherst Fire Chief's Association Inc. communication dated June 8, 2022 be addressed to the satisfaction of the association.

7. That the requirements outlined in the Engineering Department letter dated June 1, 2022 are adhered to or are addressed to the satisfaction of that department.

8. That the requirements outlined in the Stormwater Management Officers letter dated June 27, 2022 are adhered to or are addressed to the satisfaction of that officer.

9. That an address plan for the development be submitted and approved as indicated Assessor's review dated March 10, 2021.

10. That the Zoning Enforcement Officers comments in the Planning Department letter dated September 14, 2022 be addressed to the satisfaction of that officer.

11. That the departmental comments in the Planning Department letter dated September 14, 2022 be addressed to the satisfaction of that department.

12. That the Town's Landscape Architects comments in the Planning Department letter dated September 14, 2022 be addressed to the satisfaction of the architect.

13. That the properties as required by the Findings Statement be deeded over to the Town of Amherst prior to issuance of final approved site plan drawings for the development.

14. That the petitioner and or his contractor obtain any required permits for work with the Dodge Road right-of-way from the Erie County Department of Public Works Division of Highways.

15. That the petitioner and or his contractor obtain any required permits for work with the Sweet Home Road right-of-way from the New York State Department of Transportation.

16. That the petitioner is required to obtain a Floodplain Development Permit from the Building Department.

The foregoing resolution was adopted by the Town of Amherst Planning Board, _____; moved by _____; seconded by _____; ayes _, noes _; absent - ____.

DOC ID: 26194

PLANNING BOARD ITEM (ID # 26194)

SEQR Hearing for a Proposed 8-Lot Subdivision, SUB-2022-01PP

Property located at 468 Harding Road
Harding Road LLC, Petitioner

Proposal to subdivide 1.44± acres into 8 lots in order to allow construction of eight single-family residences. Proposed lots are along existing public streets (Harding Road and McKinley Avenue) and includes the extensions of water and sanitary sewer service. Subdivision is comprised of 6 internal lots being a minimum of 50 feet in width by 132 feet in depth, and 2 corner lots being 78± feet in width and 132 feet in depth.

Jeffrey Palumbo, Esq., Block. Longo, LaMarca & Brzezinski, represented the petitioner, explained the proposal and was available to answer questions from the Board.

In response to the Board's questions, Mr. Palumbo stated the number of lots in the subdivison is required for the SEQR process.

Judson Paige, 375 Harding Road; Mark Bechtel, 442 Harding Road; Suzanne Paige, 375 Harding Road; Jennifer Colwell, 435 McKinley Avenue and Frank Cascino, 381 Harding Road spoke in opposition of the proposal.

No further comments were heard on this proposal. The hearing was closed.

Following discussion, Mr. Chmiel moved to approve the Negative Declaration. The motion was seconded by Mr. Giuliani and failed. Ayes 3, Noes 2 (Gill, Penberthy), Absent 2 (Kahn, Raffaele).

Ms. Penberthy moved to approve the Negative Declaration based on a 6 lot subdivison. The motion was seconded by Mr. Gill. The motion was withdrawn by Ms. Penberthy.

Ms. Penberthy moved to adjourn the proposal. The motion was seconded by Mr. Gill and carried. Ayes 5, Noes 0, Absent 2 (Kahn, Raffaele).

SUBDIVISION APPLICATION (con't) *Page 2*

To Be Completed By Applicant

Petitioner: Name: Harding Road LLC

Address: c/o Carmina Wood Design as agent/engineer - 487 Main Street St 500

Buffalo (city) New York (state) 14203 (zip code)

Phone: (716) 842.3165 ext 112 Fax:

E Mail: rherzellah@carminawooddesign.com

Representative (Architect, Engineer, Landscape Architect, Surveyor, or Attorney)**:**

Name: Rami Herzellah

Address: 487 Main Street, St 500

Buffalo (city) New York (state) 14203 (zip code)

Phone: 716-842.3165 ext 112 Fax:

E Mail: rherzellah@carminawooddesign.com

Subdivision Location & Address: 468 Harding Road, SBL 82.09-6-20

Town of Amherst, Erie County, New York

Zoning District(s): TR-3

Number of Proposed Sublots: 8

Proposed Subdivision Name: Harding Road Subdivision

Proposed Street Names:

McKinley Avenue (existing)	☒ Public	☐ Private
Harding Road (existing)	☒ Public	☐ Private
	☐ Public	☐ Private
	☐ Public	☐ Private

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

TOWN OF AMHERST
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM
-- ADDENDUM --

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   _____ Geotechnical report attached __X__ Not applicable

3. Is your property located: On Youngs Road between Dodge and Klein Roads? □ Yes ☒ No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? □ Yes ☒ No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? □ Yes ☒ No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:
   _____
   _____

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: □ Yes ☒ No

   Describe_____
   _____

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project 24
   Source: ITE TripGen 11th ed.

8. Will blasting occur during construction? □ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes □ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    3,520 average flow 15,288 peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources*, is your property 'blue-rated' for historic significance? □ Yes ☒ No

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Full Environmental Assessment Form
Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Harding Road Subdivision		
Project Location (describe, and attach a general location map): 468 Harding Road - Town of Amherst, NY 14221		
Brief Description of Proposed Action (include purpose or need): Site development project that includes the construction of a single-family subdivision on a 1.44 acre site located between Harding Road and McKinley Avenue in the Town of Amherst. Construction to also include a public sanitary sewer and water main extension.		
Name of Applicant/Sponsor: Harding Road LLC c/o Rami Herzellah - Carmina Wood Design	Telephone: 716.842.3165 x112 E-Mail: rherzellah@carminawooddesign.com	
Address: 487 Main Street, Suite 500		
City/PO: Buffalo	State: NY	Zip Code: 14203
Project Contact (if not same as sponsor; give name and title/role):	Telephone: E-Mail:	
Address:		
City/PO:	State:	Zip Code:
Property Owner (if not same as sponsor):	Telephone: E-Mail:	
Address:		
City/PO:	State:	Zip Code:

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board	
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Town Planning Board	
c. City, Town or Village Zoning Board of Appeals ☐Yes ☑No		
d. Other local agencies ☑Yes ☐No	Engineering Dept, Building Dept	7/12/22
e. County agencies ☑Yes ☐No	ECDOH	To be determined
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - DSCA	To be determined
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☐Yes ☑No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
TR-3

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☐ Yes ☑ No
If Yes,
i. What is the proposed new zoning for the site?

C.4. Existing community services.

a. In what school district is the project site located? Clarence Central School Distric

b. What police or other public protection forces serve the project site?
Town of Amherst Police

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department

d. What parks serve the project site?
Patriots and Heroes Park

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Residential subdivision

b. a. Total acreage of the site of the proposed action? 1.44 acres
b. Total acreage to be physically disturbed? 1.44 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 1.44 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☑ Yes ☐ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
Residential subdivision
ii. Is a cluster/conservation layout proposed? ☑ Yes ☐ No
iii. Number of lots proposed? 8
iv. Minimum and maximum proposed lot sizes? Minimum 6,649 sf Maximum 10,874 sf

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: 12 months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

f. Does the project include new residential uses? ☑ Yes ☐ No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				8
At completion of all phases				8

g. Does the proposed action include new non-residential construction (including expansions)? ☐ Yes ☑ No

If Yes,

i. Total number of structures _____

ii. Dimensions (in feet) of largest proposed structure: _____height; _____width; and _____ length

iii. Approximate extent of building space to be heated or cooled: _____ square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☐ Yes ☑ No

If Yes,

i. Purpose of the impoundment: _____

ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐ Other specify:

_____

iii. If other than water, identify the type of impounded/contained liquids and their source.

_____

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: _____ acres

v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

_____

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐ Yes ☑ No

If Yes:

i .What is the purpose of the excavation or dredging? _____

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards): _____
- Over what duration of time? _____

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

_____

_____

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No

If yes, describe. _____

_____

v. What is the total area to be dredged or excavated? _____acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan: _____

_____

_____

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description): _____

_____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☐No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 3,520 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☐Yes ☑No

iii. Will line extension within an existing district be necessary to supply the project? ☑Yes ☐No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
  294 LF of 8" water main extension from hydrant on Harding Rd to northeast corner of Lot #1.
- Source(s) of supply for the district: ECWA existing water main

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☑No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 3,520 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Facility
- Name of district: Town of Amherst Sewer District
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

- Do existing sewer lines serve the project site? ☐Yes ☑No
- Will a line extension within an existing district be necessary to serve the project? ☑Yes ☐No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: 361 LF of 8" sanitary sewer extension

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

_____

_____

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

_____

_____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☐Yes ☑No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

_____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

_____

_____

- If to surface waters, identify receiving water bodies or wetlands: _____

_____

_____

- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

_____

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

_____

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

_____

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☑No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

_____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

_____

_____

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend ☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

_____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

_____

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☐Yes ☑No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____

_____

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):

_____

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☐No

l. Hours of operation. Answer all items which apply.

i. During Construction:

- Monday - Friday: 7:00 am to 7:00 pm
- Saturday: 7:00 am to 7:00 pm
- Sunday: As needed
- Holidays: Not Applicable

ii. During Operations:

- Monday - Friday: 7:00 am to 7:00 pm
- Saturday: 7:00 am to 7:00 pm
- Sunday: As needed
- Holidays: Not Applicable

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

Construction activities in furtherance of the construction of the proposed commercial building project will result in temporary unavoidable adverse noise impacts during daytime hours. The project will not result in any long-term adverse noise impacts.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☐ Yes ☑ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☐ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☑ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☐ Yes ☑ No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☐ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☑ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☑ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☐ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☐ Other (specify): _____

ii. If mix of uses, generally describe:

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces			
• Forested			
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	1.44	1.44	0.00
• Agricultural (includes active orchards, field, greenhouse etc.)			
• Surface water features (lakes, ponds, streams, rivers, etc.)			
• Wetlands (freshwater or tidal)			
• Non-vegetated (bare rock, earth or fill)			
• Other Describe: _____			

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

c. Is the project site presently used by members of the community for public recreation? ☐ Yes ☑ No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☐ Yes ☑ No
If Yes,
i. Identify Facilities:

_____
_____

e. Does the project site contain an existing dam? ☐ Yes ☑ No
If Yes:
i. Dimensions of the dam and impoundment:

- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

_____
_____

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐ Yes ☑ No
If Yes:
i. Has the facility been formally closed? ☐ Yes ☐ No

- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

_____
_____

iii. Describe any development constraints due to the prior solid waste activities: _____

_____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐ Yes ☑ No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

_____
_____

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐ Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐ Yes ☐ No

☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

_____
_____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☑ Yes ☐ No
If yes, provide DEC ID number(s): 915043

iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):

_____
_____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☑ No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? 3 feet

b. Are there bedrock outcroppings on the project site? ☐ Yes ☑ No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____%

c. Predominant soil type(s) present on project site:

Claverack loamy fine sand	76 %
Wassaic solt loam	24 %
	%

d. What is the average depth to the water table on the project site? Average: 2 feet

e. Drainage status of project site soils:

☐	Well Drained:	% of site
☑	Moderately Well Drained:	100 % of site
☐	Poorly Drained	% of site

f. Approximate proportion of proposed action site with slopes:

☑	0-10%:	100 % of site
☐	10-15%:	% of site
☐	15% or greater:	% of site

g. Are there any unique geologic features on the project site? ☐ Yes ☑ No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐ Yes ☑ No

ii. Do any wetlands or other waterbodies adjoin the project site? ☐ Yes ☑ No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☐ Yes ☑ No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☑ No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐ Yes ☑ No

j. Is the project site in the 100-year Floodplain? ☐ Yes ☑ No

k. Is the project site in the 500-year Floodplain? ☐ Yes ☑ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐ Yes ☑ No
If Yes:

i. Name of aquifer: _____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

m. Identify the predominant wildlife species that occupy or use the project site: _____

_____ _____ _____

_____ _____ _____

n. Does the project site contain a designated significant natural community? ☐ Yes ☑ No

If Yes:

i. Describe the habitat/community (composition, function, and basis for designation): _____

ii. Source(s) of description or evaluation: _____

iii. Extent of community/habitat:

- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐ Yes ☑ No

If Yes:

i. Species and listing (endangered or threatened): _____

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐ Yes ☑ No

If Yes:

i. Species and listing: _____

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐ Yes ☑ No

If yes, give a brief description of how the proposed action may affect that use: _____

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐ Yes ☑ No

If Yes, provide county plus district name/number: _____

b. Are agricultural lands consisting of highly productive soils present? ☐ Yes ☑ No

i. If Yes: acreage(s) on project site? _____

ii. Source(s) of soil rating(s): _____

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐ Yes ☑ No

If Yes:

i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature

ii. Provide brief description of landmark, including values behind designation and approximate size/extent: _____

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐ Yes ☑ No

If Yes:

i. CEA name: _____

ii. Basis for designation: _____

iii. Designating agency and date: _____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☐ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☐ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☐ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

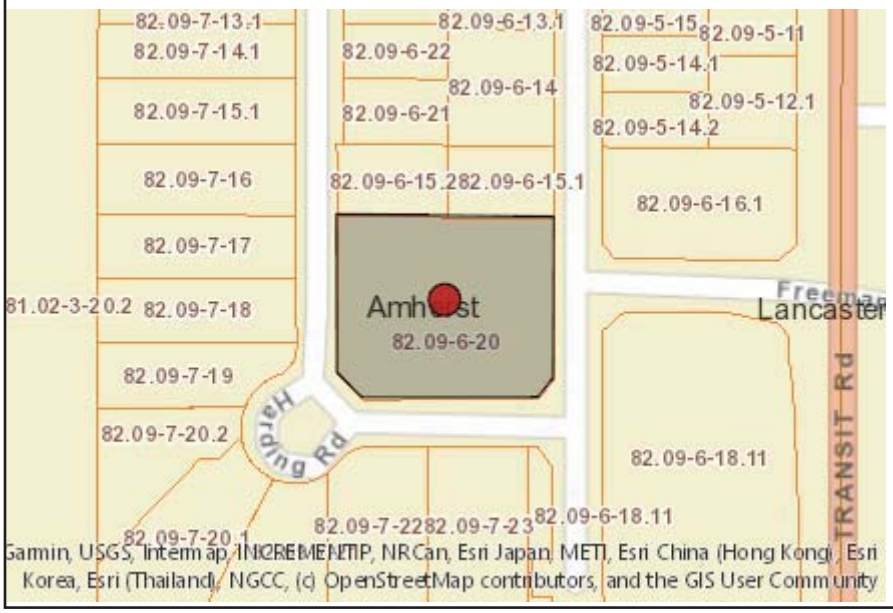
ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification



I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name Rami Herzellah Date 7/12/2022

I. Introduction

The Clean Water Act states that storm water discharges associated with construction activity from a point source, including through a separate municipal storm sewer system, is unlawful unless authorized by the National Pollutant Discharge Elimination System (NPDES) permit. In New York State, the New York State Department of Environmental Conservation (NYSDEC) administers the NPDES through the State Pollution Discharge Elimination System (SPDES) program. According to the SPDES General Permit, Appendix B, construction activity that involves soil disturbances for a single family residential subdivision, with 25% or less impervious cover at total site buildout and not located in one of the watersheds listed in Appendix C of the permit, and not directly discharging to impaired waters will only require the Erosion and Sediment Control portion of the Stormwater Pollution Prevention Plan (SWPPP).

This plan outlines the manner in which the owner/operator has selected, will install, implement and maintain control measures to minimize the discharge of pollutants to prevent a violation of the water quality standard. The requirements of the SWPPP are to be met at the commencement of construction activity until all areas of disturbance have achieved final stabilization. The SWPPP was developed based on the SPDES General Permit for Storm Water Discharges from Construction Activity Permit No. GP-0-20-001, dated January 29, 2020.

A copy of this plan will remain on site until final stabilization occurs and the site has been closed out with the filing of a Notice of Termination.

Any inspection and maintenance report forms generated for this project are to be maintained by the permittee for five years following the final stabilization of the site.

II. Notice of Intent Requirements

To obtain coverage under a general permit, a Notice of Intent (NOI) must be submitted by the owner at least five (5) business days prior to commencement of construction activities. Once completed, the NOI shall be submitted electronically through the New York State Department of Environmental Conservation website.

III. Site Description

Overall Site Description

This project is a development of a 1.44 acre site located in between Harding Road and McKinley Avenue near Stiles Court in the Town of Amherst for a single family subdivision. Construction will consist of a public sanitary sewer and water main extension. Eight (8) lots are proposed for this subdivision, of which all will be building lots. Currently the site is a vacant large open grass area. The proposed site development area to be disturbed for this project is 1.44 acres when construction is completed.

The owner/operator of the permit will be responsible for installing, implementing and maintaining all control measures in this SWPPP. They will be given a copy of the Basic Home-Owner's SWPPP found in the NYS Standards and Specifications for Erosion and Sediment Control, which this plan has been modeled after.

Refer to Appendix C for an aerial photo and proposed plans

Refer to Appendix F for plans with erosion and sediment control

Soil Description

The soils at this site were reviewed for their hydrologic soil group (HSG) through the USDA's NRCS Soil Survey. The soil survey is located in Appendix D.

Map Unit Symbol	Map Unit Name	Hydrologic Group	Acres in AOI	Percent of AOI
CrA	Claverack loamy fine	C/D	1.1	75.7%
WaB	Wassaic silt loam	C	0.3	24.3%

Wetlands and Floodplains

There are no federal wetlands on.

There are not any NYS Wetlands on site.

The site is not in a 100 year floodplain.

IV. Construction Activities

Below is a description of the intended sequence of major construction activities which involve soil disturbance:

1. Install temporary erosion and sediment controls.
2. Install Stabilized construction entrance.
3. Excavation and grading of house.
4. Construction of home, driveway, grading of the remaining site.
5. Replace topsoil where needed and seed all disturbed area.
6. After site stabilization remove temporary erosion and sediment controls.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Soil Restoration and Stabilization Plan

Upon completion of grading and soil disturbance work, soils that have become compacted due to construction actives should be de-compacted in order to restore the soils to their original condition. Aeration is the most common method to do this. The site will then have top-soil applied and will be seeded within fourteen days from the date that disturbance ceases in order to stabilize the site with ground cover. Seeding should take place in spring or fall during the growing season to ensure proper growth.

Pollution and Prevention Measures

All petroleum product spills, if such occurs, shall be cleaned up immediately, the source of the spill repaired and removed from site, and the contaminated material disposed of as required by applicable law. The Inspector shall be informed of the spill in a timely manner. If the spill does not meet the below criteria the Inspector shall contact the NYSDEC Spills Hotline at 1-800-475-7362:

1. The quantity is known to be less than 5 gallons; and
2. The spill is contained and under the control of the spiller; and
3. The spill has not and will not reach the State's water or any land; and
4. The spill is cleaned up within 2 hours of discovery.
5. A spill is considered to have not impacted land if it occurs on a paved surface.

V. Structural Practices

Silt Sock- Silt sock will be used in order to reduce runoff velocity and allow for sediment retention through a settling process. It will be located as shown on the plans in order to protect the neighboring properties and the ditch. The silt sock will be installed in accordance with the NYSDEC Construction Standards and the manufactures recommendations. Maintenance shall be performed as needed and material removed as required. Silt sock will remain in place until site stabilization has been achieved.

Refer to Appendix E for Erosion and Sediment Control details.

VI. Management Measures

Protecting adjacent properties- All sediment must be kept on-site and not allowed to be transported to adjacent properties. Whenever possible a vegetative buffer should be preserved around the site boundary. Structural practices will be utilized and if necessary others may be incorporated to keep sediment laden water from leaving the site.

Maintenance- Inspections are important for visually evaluating potential storm water runoff pollution sources. The Owner shall inspect the erosion and sediment control practices and pollution prevention measures daily to ensure that they are being maintained in effective operating conditions at all times. If deficiencies are identified, corrective actions should begin to take place within one business day and completed in a timely manner. The Village of East Aurora will complete two inspections annually to ensure that all temporary erosion and sediment controls are in place.

Refer to Appendix G for an example of an erosion and sediment control inspection checklist.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

VII. Other Requirements

All elements of the design are in conformance with the design criteria in the technical standard, New York State Standards and Specifications for Erosions and Sediment Control. Additional controls may be necessary to protect existing ditches and adjacent properties.

VIII. Notice of Termination Requirements

Prior to filing a Notice of Termination (NOT) the Owner shall have a qualified inspector perform a final site inspection. The qualified inspector shall certify that all disturbed areas have achieved final stabilization and all temporary, structural erosion and sediment control measures have been removed. Signature of the MS4 designated individual is also required on the NOT prior to filing.

When the project has been completed and the site stabilized, the Owner must submit a NOT. The form shall be submitted to the following address:

NYS DEC "Notice of Termination"
Bureau of Water Permits
625 Broadway
Albany, NY 12233-3505

PREFACE

Pursuant to Section 402 of the Clean Water Act ("CWA"), stormwater *discharges* from certain *construction activities* are unlawful unless they are authorized by a *National Pollutant Discharge Elimination System ("NPDES")* permit or by a state permit program. New York administers the approved State Pollutant Discharge Elimination System (SPDES) program with permits issued in accordance with the New York State Environmental Conservation Law (ECL) Article 17, Titles 7, 8 and Article 70.

An *owner or operator* of a *construction activity* that is eligible for coverage under this permit must obtain coverage prior to the *commencement of construction activity*. Activities that fit the definition of "*construction activity*", as defined under 40 CFR 122.26(b)(14)(x), (15)(i), and (15)(ii), constitute construction of a *point source* and therefore, pursuant to ECL section 17-0505 and 17-0701, the *owner or operator* must have coverage under a SPDES permit prior to *commencing construction activity*. The *owner or operator* cannot wait until there is an actual *discharge* from the *construction site* to obtain permit coverage.

***Note: The italicized words/phrases within this permit are defined in Appendix A.**

Part 1. PERMIT COVERAGE AND LIMITATIONS

A. Permit Application

This permit authorizes stormwater *discharges* to *surface waters of the State* from the following *construction activities* identified within 40 CFR Parts 122.26(b)(14)(x), 122.26(b)(15)(i) and 122.26(b)(15)(ii), provided all of the eligibility provisions of this permit are met:

1. *Construction activities* involving soil disturbances of one (1) or more acres; including disturbances of less than one acre that are part of a *larger common plan of development or sale* that will ultimately disturb one or more acres of land; excluding *routine maintenance activity* that is performed to maintain the original line and grade, hydraulic capacity or original purpose of a facility;

2. *Construction activities* involving soil disturbances of less than one (1) acre where the Department has determined that a *SPDES* permit is required for stormwater *discharges* based on the potential for contribution to a violation of a *water quality standard* or for significant contribution of *pollutants* to *surface waters of the State.*

3. *Construction activities* located in the watershed(s) identified in Appendix D that involve soil disturbances between five thousand (5,000) square feet and one (1) acre of land.

B. Effluent Limitations Applicable to Discharges from Construction Activities

*Discharge*s authorized by this permit must achieve, at a minimum, the effluent limitations in Part I.B.1. (a) – (f) of this permit. These limitations represent the degree of effluent reduction attainable by the application of best practicable technology currently available.

1. Erosion and Sediment Control Requirements - The *owner or operator* must select, design, install, implement and maintain control measures to *minimize* the *discharge* of *pollutants* and prevent a violation of the *water quality standards*. The selection, design, installation, implementation, and maintenance of these control measures must meet the non-numeric effluent limitations in Part I.B.1.(a) – (f) of this permit and be in accordance with the New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016, using sound engineering judgment. Where control measures are not designed in conformance with the design criteria included in the technical standard, the *owner or operator* must include in the *Stormwater Pollution Prevention Plan* ("SWPPP") the reason(s) for the

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

deviation or alternative design and provide information which demonstrates that the deviation or alternative design is *equivalent* to the technical standard.

a. **Erosion and Sediment Controls.** Design, install and maintain effective erosion and sediment controls to *minimize* the *discharge* of *pollutants* and prevent a violation of the *water quality standards*. At a minimum, such controls must be designed, installed and maintained to:

   (i) *Minimize* soil erosion through application of runoff control and soil stabilization control measure to *minimize pollutant discharge*s;

   (ii) Control stormwater *discharge*s, including both peak flowrates and total stormwater volume, to *minimize* channel and *streambank* erosion and scour in the immediate vicinity of the *discharge* points;

   (iii) *Minimize* the amount of soil exposed during *construction activity*;

   (iv) *Minimize* the disturbance of *steep slopes*;

   (v) *Minimize* sediment *discharge*s from the site;

   (vi) Provide and maintain *natural buffer*s around surface waters, direct stormwater to vegetated areas and maximize stormwater infiltration to reduce *pollutant discharge*s, unless *infeasible*;

   (vii) *Minimize* soil compaction. Minimizing soil compaction is not required where the intended function of a specific area of the site dictates that it be compacted;

   (viii) Unless *infeasible*, preserve a sufficient amount of topsoil to complete soil restoration and establish a uniform, dense vegetative cover; and

   (ix) *Minimize* dust. On areas of exposed soil, *minimize* dust through the appropriate application of water or other dust suppression techniques to control the generation of pollutants that could be discharged from the site.

b. **Soil Stabilization**. In areas where soil disturbance activity has temporarily or permanently ceased, the application of soil stabilization measures must be initiated by the end of the next business day and completed within fourteen (14) days from the date the current soil disturbance activity ceased. For construction sites that *directly discharge* to one of the 303(d) segments

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

listed in Appendix E or is located in one of the watersheds listed in Appendix C, the application of soil stabilization measures must be initiated by the end of the next business day and completed within seven (7) days from the date the current soil disturbance activity ceased. See Appendix A for definition of *Temporarily Ceased*.

c. **Dewatering**. *Discharge*s from *dewatering* activities, including *discharge*s from *dewatering* of trenches and excavations, must be managed by appropriate control measures.

d. **Pollution Prevention Measures**. Design, install, implement, and maintain effective pollution prevention measures to *minimize* the *discharge* of *pollutants* and prevent a violation of the *water quality standards*. At a minimum, such measures must be designed, installed, implemented and maintained to:

(i) *Minimize* the *discharge* of *pollutants* from equipment and vehicle washing, wheel wash water, and other wash waters. This applies to washing operations that use clean water only. Soaps, detergents and solvents cannot be used;

(ii) *Minimize* the exposure of building materials, building products, construction wastes, trash, landscape materials, fertilizers, pesticides, herbicides, detergents, sanitary waste, hazardous and toxic waste, and other materials present on the site to precipitation and to stormwater. Minimization of exposure is not required in cases where the exposure to precipitation and to stormwater will not result in a *discharge* of *pollutants*, or where exposure of a specific material or product poses little risk of stormwater contamination (such as final products and materials intended for outdoor use) ; and

(iii) Prevent the *discharge* of *pollutants* from spills and leaks and implement chemical spill and leak prevention and response procedures.

e. **Prohibited *Discharges*.** The following *discharge*s are prohibited:

(i) Wastewater from washout of concrete;

(ii) Wastewater from washout and cleanout of stucco, paint, form release oils, curing compounds and other construction materials;

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

(iii) Fuels, oils, or other *pollutants* used in vehicle and equipment operation and maintenance;

(iv) Soaps or solvents used in vehicle and equipment washing; and

(v) Toxic or hazardous substances from a spill or other release.

f. Surface Outlets. When discharging from basins and impoundments, the outlets shall be designed, constructed and maintained in such a manner that sediment does not leave the basin or impoundment and that erosion at or below the outlet does not occur.

C. Post-construction Stormwater Management Practice Requirements

1. The *owner or operator* of a *construction activity* that requires post-construction stormwater management practices pursuant to Part III.C. of this permit must select, design, install, and maintain the practices to meet the *performance criteria* in the New York State Stormwater Management Design Manual ("Design Manual"), dated January 2015, using sound engineering judgment. Where post-construction stormwater management practices ("SMPs") are not designed in conformance with the *performance criteria* in the Design Manual, the *owner or operator* must include in the SWPPP the reason(s) for the deviation or alternative design and provide information which demonstrates that the deviation or alternative design is *equivalent* to the technical standard.

2. The *owner or operator* of a *construction activity* that requires post-construction stormwater management practices pursuant to Part III.C. of this permit must design the practices to meet the applicable *sizing criteria* in Part I.C.2.a., b., c. or d. of this permit.

a. Sizing Criteria for New Development

(i) Runoff Reduction Volume ("RRv"): Reduce the total Water Quality Volume ("WQv") by application of RR techniques and standard SMPs with RRv capacity. The total WQv shall be calculated in accordance with the criteria in Section 4.2 of the Design Manual.

(ii) Minimum RRv and Treatment of Remaining Total WQv: Construction activities that cannot meet the criteria in Part I.C.2.a.(i) of this permit due to site limitations shall direct runoff from all newly constructed impervious areas to a RR technique or standard SMP with RRv capacity unless infeasible. The specific site limitations that prevent the reduction of 100% of the WQv shall be documented in the SWPPP.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

For each impervious area that is not directed to a RR technique or standard SMP with RRv capacity, the SWPPP must include documentation which demonstrates that all options were considered and for each option explains why it is considered infeasible.

In no case shall the runoff reduction achieved from the newly constructed impervious areas be less than the Minimum RRv as calculated using the criteria in Section 4.3 of the Design Manual. The remaining portion of the total WQv that cannot be reduced shall be treated by application of standard SMPs.

(iii) Channel Protection Volume ("Cpv"): Provide 24 hour extended detention of the post-developed 1-year, 24-hour storm event; remaining after runoff reduction. The Cpv requirement does not apply when:
(1) Reduction of the entire Cpv is achieved by application of runoff reduction techniques or infiltration systems, or
(2) The site discharges directly to tidal waters, or fifth order or larger streams.

(iv) *Overbank* Flood Control Criteria ("Qp"): Requires storage to attenuate the post-development 10-year, 24-hour peak discharge rate (Qp) to predevelopment rates. The Qp requirement does not apply when:
(1) the site discharges directly to tidal waters or fifth order or larger streams, or
(2) A downstream analysis reveals that *overbank* control is not required.

(v) Extreme Flood Control Criteria ("Qf"): Requires storage to attenuate the post-development 100-year, 24-hour peak discharge rate (Qf) to predevelopment rates. The Qf requirement does not apply when:
(1) the site discharges directly to tidal waters or fifth order or larger streams, or
(2) A downstream analysis reveals that *overbank* control is not required.

b. *Sizing Criteria* for *New Development* in Enhanced Phosphorus Removal Watershed

(i) Runoff Reduction Volume (RRv): Reduce the total Water Quality Volume (WQv) by application of RR techniques and standard SMPs with RRv capacity. The total WQv is the runoff volume from the 1-year, 24 hour design storm over the post-developed watershed and shall be

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

calculated in accordance with the criteria in Section 10.3 of the Design Manual.

(ii) Minimum RRv and Treatment of Remaining Total WQv: *Construction activities* that cannot meet the criteria in Part I.C.2.b.(i) of this permit due to *site limitations* shall direct runoff from all newly constructed *impervious areas* to a RR technique or standard SMP with RRv capacity unless *infeasible*. The specific *site limitations* that prevent the reduction of 100% of the WQv shall be documented in the SWPPP. For each *impervious area* that is not directed to a RR technique or standard SMP with RRv capacity, the SWPPP must include documentation which demonstrates that all options were considered and for each option explains why it is considered *infeasible.*

In no case shall the runoff reduction achieved from the newly constructed *impervious areas* be less than the Minimum RRv as calculated using the criteria in Section 10.3 of the Design Manual. The remaining portion of the total WQv that cannot be reduced shall be treated by application of standard SMPs.

(iii) Channel Protection Volume (Cpv): Provide 24 hour extended detention of the post-developed 1-year, 24-hour storm event; remaining after runoff reduction. The Cpv requirement does not apply when:
(1) Reduction of the entire Cpv is achieved by application of runoff reduction techniques or infiltration systems, or
(2) The site *discharge*s directly to tidal waters, or fifth order or larger streams.

(iv) *Overbank* Flood Control Criteria (Qp): Requires storage to attenuate the post-development 10-year, 24-hour peak *discharge* rate (Qp) to predevelopment rates. The Qp requirement does not apply when:
(1) the site *discharge*s directly to tidal waters or fifth order or larger streams, or
(2) A downstream analysis reveals that *overbank* control is not required.

(v) Extreme Flood Control Criteria (Qf): Requires storage to attenuate the post-development 100-year, 24-hour peak *discharge* rate (Qf) to predevelopment rates. The Qf requirement does not apply when:
(1) the site *discharge*s directly to tidal waters or fifth order or larger streams, or
(2) A downstream analysis reveals that *overbank* control is not required.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

c. Sizing Criteria for Redevelopment Activity

(i) Water Quality Volume (WQv): The WQv treatment objective for *redevelopment activity* shall be addressed by one of the following options. *Redevelopment activities* located in an Enhanced Phosphorus Removal Watershed (see Part III.B.3. and Appendix C of this permit) shall calculate the WQv in accordance with Section 10.3 of the Design Manual. All other *redevelopment activities* shall calculate the WQv in accordance with Section 4.2 of the Design Manual.

(1) Reduce the existing *impervious cover* by a minimum of 25% of the total disturbed, *impervious area*. The Soil Restoration criteria in Section 5.1.6 of the Design Manual must be applied to all newly created pervious areas, or

(2) Capture and treat a minimum of 25% of the WQv from the disturbed, *impervious area* by the application of standard SMPs; or reduce 25% of the WQv from the disturbed, *impervious area* by the application of RR techniques or standard SMPs with RRv capacity., or

(3) Capture and treat a minimum of 75% of the WQv from the disturbed, *impervious area* as well as any additional runoff from tributary areas by application of the alternative practices discussed in Sections 9.3 and 9.4 of the Design Manual., or

(4) Application of a combination of 1, 2 and 3 above that provide a weighted average of at least two of the above methods. Application of this method shall be in accordance with the criteria in Section 9.2.1(B) (IV) of the Design Manual.

If there is an existing post-construction stormwater management practice located on the site that captures and treats runoff from the *impervious area* that is being disturbed, the WQv treatment option selected must, at a minimum, provide treatment equal to the treatment that was being provided by the existing practice(s) if that treatment is greater than the treatment required by options 1 – 4 above.

(ii) Channel Protection Volume (Cpv): Not required if there are no changes to hydrology that increase the *discharge* rate from the project site.

(iii) *Overbank* Flood Control Criteria (Qp): Not required if there are no changes to hydrology that increase the *discharge* rate from the project site.

(iv) Extreme Flood Control Criteria (Qf): Not required if there are no changes to hydrology that increase the *discharge* rate from the project site

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

d. Sizing Criteria for Combination of Redevelopment Activity and New Development

Construction projects that include both New Development and Redevelopment Activity shall provide post-construction stormwater management controls that meet the sizing criteria calculated as an aggregate of the Sizing Criteria in Part I.C.2.a. or b. of this permit for the New Development portion of the project and Part I.C.2.c of this permit for Redevelopment Activity portion of the project.

D. Maintaining Water Quality

The Department expects that compliance with the conditions of this permit will control *discharge*s necessary to meet applicable *water quality standards*. It shall be a violation of the *ECL* for any discharge to either cause or contribute to a violation of *water quality standards* as contained in Parts 700 through 705 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York, such as:

1. There shall be no increase in turbidity that will cause a substantial visible contrast to natural conditions;

2. There shall be no increase in suspended, colloidal or settleable solids that will cause deposition or impair the waters for their best usages; and

3. There shall be no residue from oil and floating substances, nor visible oil film, nor globules of grease.

If there is evidence indicating that the stormwater *discharge*s authorized by this permit are causing, have the reasonable potential to cause, or are contributing to a violation of the *water quality standards*; the *owner or operator* must take appropriate corrective action in accordance with Part IV.C.5. of this general permit and document in accordance with Part IV.C.4. of this general permit. To address the *water quality standard* violation the *owner or operator* may need to provide additional information, include and implement appropriate controls in the SWPPP to correct the problem, or obtain an individual SPDES permit.

If there is evidence indicating that despite compliance with the terms and conditions of this general permit it is demonstrated that the stormwater *discharge*s authorized by this permit are causing or contributing to a violation of *water quality standards*, or if the Department determines that a modification of the permit is necessary to prevent a violation of *water quality standards*, the authorized *discharge*s will no longer be eligible for coverage under this permit. The Department may require the *owner or operator* to obtain an individual SPDES permit to continue discharging.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

E. Eligibility Under This General Permit

1. This permit may authorize all *discharges* of stormwater from *construction activity* to *surface waters of the State* and *groundwaters* except for ineligible *discharges* identified under subparagraph F. of this Part.

2. Except for non-stormwater *discharges* explicitly listed in the next paragraph, this permit only authorizes stormwater *discharge*s; including stormwater runoff, snowmelt runoff, and surface runoff and drainage, from *construction activities*.

3. Notwithstanding paragraphs E.1 and E.2 above, the following non-stormwater discharges are authorized by this permit: those listed in 6 NYCRR 750-1.2(a)(29)(vi), with the following exception: “Discharges from firefighting activities are authorized only when the firefighting activities are emergencies/unplanned”; waters to which other components have not been added that are used to control dust in accordance with the SWPPP; and uncontaminated *discharge*s from *construction site* de-watering operations. All non-stormwater discharges must be identified in the SWPPP. Under all circumstances, the *owner or operator* must still comply with *water quality standards* in Part I.D of this permit.

4. The *owner or operator* must maintain permit eligibility to *discharge* under this permit. Any *discharges* that are not compliant with the eligibility conditions of this permit are not authorized by the permit and the *owner or operator* must either apply for a separate permit to cover those ineligible *discharges* or take steps necessary to make the *discharge* eligible for coverage.

F. Activities Which Are Ineligible for Coverage Under This General Permit

All of the following are **not** authorized by this permit:

1. *Discharge*s after *construction activities* have been completed and the site has undergone *final stabilization*;

2. *Discharge*s that are mixed with sources of non-stormwater other than those expressly authorized under subsection E.3. of this Part and identified in the SWPPP required by this permit;

3. *Discharges* that are required to obtain an individual SPDES permit or another SPDES general permit pursuant to Part VII.K. of this permit;

4. *Construction activities* or *discharges* from *construction activities* that may adversely affect an *endangered or threatened species* unless the *owner or*

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

operator has obtained a permit issued pursuant to 6 NYCRR Part 182 for the project or the Department has issued a letter of non-jurisdiction for the project. All documentation necessary to demonstrate eligibility shall be maintained on site in accordance with Part II.D.2 of this permit;

5. *Discharges* which either cause or contribute to a violation of *water quality standards* adopted pursuant to the *ECL* and its accompanying regulations;

6. *Construction activities* for residential, commercial and institutional projects:

   a. Where the *discharge*s from the *construction activities* are tributary to waters of the state classified as AA or AA-s; and

   b. Which are undertaken on land with no existing *impervious cover*; and

   c. Which disturb one (1) or more acres of land designated on the current United States Department of Agriculture ("USDA") Soil Survey as Soil Slope Phase "D", (provided the map unit name is inclusive of slopes greater than 25%), or Soil Slope Phase "E" or "F" (regardless of the map unit name), or a combination of the three designations.

7. *Construction activities* for linear transportation projects and linear utility projects:

   a. Where the *discharge*s from the *construction activities* are tributary to waters of the state classified as AA or AA-s; and

   b. Which are undertaken on land with no existing *impervious cover*; and

   c. Which disturb two (2) or more acres of land designated on the current USDA Soil Survey as Soil Slope Phase "D" (provided the map unit name is inclusive of slopes greater than 25%), or Soil Slope Phase "E" or "F" (regardless of the map unit name), or a combination of the three designations.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

8. *Construction activities* that have the potential to affect an *historic property*, unless there is documentation that such impacts have been resolved. The following documentation necessary to demonstrate eligibility with this requirement shall be maintained on site in accordance with Part II.D.2 of this permit and made available to the Department in accordance with Part VII.F of this permit:

   a. Documentation that the *construction activity* is not within an archeologically sensitive area indicated on the sensitivity map, and that the *construction activity* is not located on or immediately adjacent to a property listed or determined to be eligible for listing on the National or State Registers of Historic Places, and that there is no new permanent building on the *construction site* within the following distances from a building, structure, or object that is more than 50 years old, or if there is such a new permanent building on the *construction site* within those parameters that NYS Office of Parks, Recreation and Historic Preservation (OPRHP), a Historic Preservation Commission of a Certified Local Government, or a qualified preservation professional has determined that the building, structure, or object more than 50 years old is not historically/archeologically significant.

      - 1-5 acres of disturbance - 20 feet
      - 5-20 acres of disturbance - 50 feet
      - 20+ acres of disturbance - 100 feet, or

   b. DEC consultation form sent to OPRHP, and copied to the NYS DEC Agency Historic Preservation Officer (APO), and
      (i) the State Environmental Quality Review (SEQR) Environmental Assessment Form (EAF) with a negative declaration or the Findings Statement, with documentation of OPRHP's agreement with the resolution; or
      (ii) documentation from OPRHP that the *construction activity* will result in No Impact; or
      (iii) documentation from OPRHP providing a determination of No Adverse Impact; or
      (iv) a Letter of Resolution signed by the owner/operator, OPRHP and the DEC APO which allows for this *construction activity* to be eligible for coverage under the general permit in terms of the State Historic Preservation Act (SHPA); or

   c. Documentation of satisfactory compliance with Section 106 of the National Historic Preservation Act for a coterminous project area:

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

(i) No Affect
(ii) No Adverse Affect
(iii) Executed Memorandum of Agreement, or

d. Documentation that:

(i) SHPA Section 14.09 has been completed by NYS DEC or another state agency.

9. *Discharge*s from *construction activities* that are subject to an existing SPDES individual or general permit where a SPDES permit for *construction activity* has been terminated or denied; or where the *owner or operator* has failed to renew an expired individual permit.

Part II. PERMIT COVERAGE

A. How to Obtain Coverage

1. An *owner or operator* of a *construction activity* that is not subject to the requirements of a regulated, traditional land use control MS4 must first prepare a SWPPP in accordance with all applicable requirements of this permit and then submit a completed Notice of Intent (NOI) to the Department to be authorized to discharge under this permit.

2. An *owner or operator* of a *construction activity* that is subject to the requirements of a *regulated, traditional land use control MS4* must first prepare a SWPPP in accordance with all applicable requirements of this permit and then have the SWPPP reviewed and accepted by the *regulated, traditional land use control MS4* prior to submitting the NOI to the Department. The *owner or operator* shall have the "MS4 SWPPP Acceptance" form signed in accordance with Part VII.H., and then submit that form along with a completed NOI to the Department.

3. The requirement for an *owner or operator* to have its SWPPP reviewed and accepted by the *regulated, traditional land use control MS4* prior to submitting the NOI to the Department does not apply to an *owner or operator* that is obtaining permit coverage in accordance with the requirements in Part II.F. (Change of *Owner or Operator*) or where the *owner or operator* of the *construction activity* is the *regulated, traditional land use control MS4* . This exemption does not apply to *construction activities* subject to the New York City Administrative Code.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

B. Notice of Intent (NOI) Submittal

1. Prior to December 21, 2020, an owner or operator shall use either the electronic (eNOI) or paper version of the NOI that the Department prepared. Both versions of the NOI are located on the Department's website (http://www.dec.ny.gov/). The paper version of the NOI shall be signed in accordance with Part VII.H. of this permit and submitted to the following address:

   NOTICE OF INTENT
   NYS DEC, Bureau of Water Permits
   625 Broadway, 4th Floor
   Albany, New York 12233-3505

2. Beginning December 21, 2020 and in accordance with EPA's 2015 NPDES Electronic Reporting Rule (40 CFR Part 127), the *owner or operator* must submit the NOI electronically using the *Department's* online NOI.

3. The *owner or operator* shall have the SWPPP preparer sign the "SWPPP Preparer Certification" statement on the NOI prior to submitting the form to the Department.

4. As of the date the NOI is submitted to the Department, the *owner or operator* shall make the NOI and SWPPP available for review and copying in accordance with the requirements in Part VII.F. of this permit.

C. Permit Authorization

1. An *owner or operator* shall not *commence construction activity* until their authorization to *discharge* under this permit goes into effect.

2. Authorization to *discharge* under this permit will be effective when the *owner or operator* has satisfied all of the following criteria:

   a. project review pursuant to the State Environmental Quality Review Act ("SEQRA") have been satisfied, when SEQRA is applicable. See the Department's website (http://www.dec.ny.gov/) for more information,

   b. where required, all necessary Department permits subject to the *Uniform Procedures Act ("UPA")* (see 6 NYCRR Part 621), or the equivalent from another New York State agency, have been obtained, unless otherwise notified by the Department pursuant to 6 NYCRR 621.3(a)(4). *Owners or operators* of *construction activities* that are required to obtain *UPA* permits

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

must submit a preliminary SWPPP to the appropriate DEC Permit Administrator at the Regional Office listed in Appendix F at the time all other necessary *UPA* permit applications are submitted. The preliminary SWPPP must include sufficient information to demonstrate that the *construction activity* qualifies for authorization under this permit,

c. the final SWPPP has been prepared, and

d. a complete NOI has been submitted to the Department in accordance with the requirements of this permit.

3. An *owner or operator* that has satisfied the requirements of Part II.C.2 above will be authorized to *discharge* stormwater from their *construction activity* in accordance with the following schedule:

   a. For *construction activities* that are not subject to the requirements of a *regulated, traditional land use control MS4*:

      (i) Five (5) business days from the date the Department receives a complete electronic version of the NOI (eNOI) for *construction activities* with a SWPPP that has been prepared in conformance with the design criteria in the technical standard referenced in Part III.B.1 and the *performance criteria* in the technical standard referenced in Parts III.B., 2 or 3, for *construction activities* that require post-construction stormwater management practices pursuant to Part III.C.; or

      (ii) Sixty (60) business days from the date the Department receives a complete NOI (electronic or paper version) for *construction activities* with a SWPPP that has not been prepared in conformance with the design criteria in technical standard referenced in Part III.B.1. or, for *construction activities* that require post-construction stormwater management practices pursuant to Part III.C., the *performance criteria* in the technical standard referenced in Parts III.B., 2 or 3, or;

      (iii) Ten (10) business days from the date the Department receives a complete paper version of the NOI for *construction activities* with a SWPPP that has been prepared in conformance with the design criteria in the technical standard referenced in Part III.B.1 and the *performance criteria* in the technical standard referenced in Parts III.B., 2 or 3, for *construction activities* that require post-construction stormwater management practices pursuant to Part III.C.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. For *construction activities* that are subject to the requirements of a *regulated, traditional land use control MS4*:

(i) Five (5) business days from the date the Department receives both a complete electronic version of the NOI (eNOI) and signed "*MS4* SWPPP Acceptance" form, or

(ii) Ten (10) business days from the date the Department receives both a complete paper version of the NOI and signed "MS4 SWPPP Acceptance" form.

4. Coverage under this permit authorizes stormwater *discharges* from only those areas of disturbance that are identified in the NOI. If an *owner or operator* wishes to have stormwater *discharges* from future or additional areas of disturbance authorized, they must submit a new NOI that addresses that phase of the development, unless otherwise notified by the Department. The *owner or operator* shall not *commence construction activity* on the future or additional areas until their authorization to *discharge* under this permit goes into effect in accordance with Part II.C. of this permit.

D. General Requirements For Owners or Operators With Permit Coverage

1. The *owner or operator* shall ensure that the provisions of the SWPPP are implemented from the *commencement of construction activity* until all areas of disturbance have achieved *final stabilization* and the Notice of Termination ("NOT") has been submitted to the Department in accordance with Part V. of this permit. This includes any changes made to the SWPPP pursuant to Part III.A.4. of this permit.

2. The *owner or operator* shall maintain a copy of the General Permit (GP-0-20-001), NOI, *NOI Acknowledgment Letter*, SWPPP, MS4 SWPPP Acceptance form, inspection reports, responsible contractor's or subcontractor's certification statement (see Part III.A.6.), and all documentation necessary to demonstrate eligibility with this permit at the *construction site* until all disturbed areas have achieved *final stabilization* and the NOT has been submitted to the Department. The documents must be maintained in a secure location, such as a job trailer, on-site construction office, or mailbox with lock. The secure location must be accessible during normal business hours to an individual performing a compliance inspection.

3. The *owner or operator* of a *construction activity* shall not disturb greater than five (5) acres of soil at any one time without prior written authorization from the Department or, in areas under the jurisdiction of a *regulated, traditional land*

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

use control MS4, the *regulated, traditional land use control MS4* (provided the *regulated, traditional land use control MS4* is not the *owner or operator* of the *construction activity*). At a minimum, the *owner or operator* must comply with the following requirements in order to be authorized to disturb greater than five (5) acres of soil at any one time:

a. The *owner or operator* shall have a *qualified inspector* conduct **at least** two (2) site inspections in accordance with Part IV.C. of this permit every seven (7) calendar days, for as long as greater than five (5) acres of soil remain disturbed. The two (2) inspections shall be separated by a minimum of two (2) full calendar days.

b. In areas where soil disturbance activity has temporarily or permanently ceased, the application of soil stabilization measures must be initiated by the end of the next business day and completed within seven (7) days from the date the current soil disturbance activity ceased. The soil stabilization measures selected shall be in conformance with the technical standard, New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016.

c. The *owner or operator* shall prepare a phasing plan that defines maximum disturbed area per phase and shows required cuts and fills.

d. The *owner or operator* shall install any additional site-specific practices needed to protect water quality.

e. The *owner or operator* shall include the requirements above in their SWPPP.

4. In accordance with statute, regulations, and the terms and conditions of this permit, the Department may suspend or revoke an *owner's or operator's* coverage under this permit at any time if the Department determines that the SWPPP does not meet the permit requirements or consistent with Part VII.K..

5. Upon a finding of significant non-compliance with the practices described in the SWPPP or violation of this permit, the Department may order an immediate stop to all activity at the site until the non-compliance is remedied. The stop work order shall be in writing, describe the non-compliance in detail, and be sent to the *owner or operator*.

6. For *construction activities* that are subject to the requirements of a *regulated, traditional land use control MS4*, the *owner or operator* shall notify the

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

regulated, traditional land use control MS4 in writing of any planned amendments or modifications to the post-construction stormwater management practice component of the SWPPP required by Part III.A. 4. and 5. of this permit. Unless otherwise notified by the *regulated, traditional land use control MS4*, the *owner or operator* shall have the SWPPP amendments or modifications reviewed and accepted by the *regulated, traditional land use control MS4* prior to commencing construction of the post-construction stormwater management practice.

E. Permit Coverage for Discharges Authorized Under GP-0-15-002

1. Upon renewal of SPDES General Permit for Stormwater Discharges from *Construction Activity* (Permit No. GP-0-15-002), an *owner or operator* of *a construction activity* with coverage under GP-0-15-002, as of the effective date of GP- 0-20-001, shall be authorized to *discharge* in accordance with GP- 0-20-001, unless otherwise notified by the Department.

   An *owner or operator* may continue to implement the technical/design components of the post-construction stormwater management controls provided that such design was done in conformance with the technical standards in place at the time of initial project authorization. However, they must comply with the other, non-design provisions of GP-0-20-001.

F. Change of Owner or Operator

1. When property ownership changes or when there is a change in operational control over the construction plans and specifications, the original *owner or operator* must notify the new *owner or operator*, in writing, of the requirement to obtain permit coverage by submitting a NOI with the Department. For *construction activities* subject to the requirements of a *regulated, traditional land use control MS4,* the original *owner or operator* must also notify the MS4, in writing, of the change in ownership at least 30 calendar days prior to the change in ownership.

2. Once the new *owner or operator* obtains permit coverage, the original *owner or operator* shall then submit a completed NOT with the name and permit identification number of the new *owner or operator* to the Department at the address in Part II.B.1. of this permit. If the original *owner or operator* maintains ownership of a portion of the *construction activity* and will disturb soil, they must maintain their coverage under the permit.

3. Permit coverage for the new *owner or operator* will be effective as of the date the Department receives a complete NOI, provided the original *owner or*

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

operator was not subject to a sixty (60) business day authorization period that has not expired as of the date the Department receives the NOI from the new *owner or operator*.

Part III. STORMWATER POLLUTION PREVENTION PLAN (SWPPP)

A. General SWPPP Requirements

1. A SWPPP shall be prepared and implemented by the *owner or operator* of each *construction activity* covered by this permit. The SWPPP must document the selection, design, installation, implementation and maintenance of the control measures and practices that will be used to meet the effluent limitations in Part I.B. of this permit and where applicable, the post-construction stormwater management practice requirements in Part I.C. of this permit. The SWPPP shall be prepared prior to the submittal of the NOI. The NOI shall be submitted to the Department prior to the *commencement of construction activity*. A copy of the completed, final NOI shall be included in the SWPPP.

2. The SWPPP shall describe the erosion and sediment control practices and where required, post-construction stormwater management practices that will be used and/or constructed to reduce the *pollutants* in stormwater *discharges* and to assure compliance with the terms and conditions of this permit. In addition, the SWPPP shall identify potential sources of pollution which may reasonably be expected to affect the quality of stormwater *discharges*.

3. All SWPPPs that require the post-construction stormwater management practice component shall be prepared by a *qualified professional* that is knowledgeable in the principles and practices of stormwater management and treatment.

4. The *owner or operator* must keep the SWPPP current so that it at all times accurately documents the erosion and sediment controls practices that are being used or will be used during construction, and all post-construction stormwater management practices that will be constructed on the site. At a minimum, the *owner or operator* shall amend the SWPPP, including construction drawings:

    a. whenever the current provisions prove to be ineffective in minimizing *pollutants* in stormwater *discharges* from the site;

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. whenever there is a change in design, construction, or operation at the *construction site* that has or could have an effect on the *discharge* of *pollutants*;

c. to address issues or deficiencies identified during an inspection by the *qualified inspector,* the Department or other regulatory authority; and

d. to document the final construction conditions.

5. The Department may notify the *owner or operator* at any time that the SWPPP does not meet one or more of the minimum requirements of this permit. The notification shall be in writing and identify the provisions of the SWPPP that require modification. Within fourteen (14) calendar days of such notification, or as otherwise indicated by the Department, the *owner or operator* shall make the required changes to the SWPPP and submit written notification to the Department that the changes have been made. If the *owner or operator* does not respond to the Department's comments in the specified time frame, the Department may suspend the *owner's or operator's* coverage under this permit or require the *owner or operator* to obtain coverage under an individual SPDES permit in accordance with Part II.D.4. of this permit.

6. Prior to the *commencement of construction activity*, the *owner or operator* must identify the contractor(s) and subcontractor(s) that will be responsible for installing, constructing, repairing, replacing, inspecting and maintaining the erosion and sediment control practices included in the SWPPP; and the contractor(s) and subcontractor(s) that will be responsible for constructing the post-construction stormwater management practices included in the SWPPP. The *owner or operator* shall have each of the contractors and subcontractors identify at least one person from their company that will be responsible for implementation of the SWPPP. This person shall be known as the *trained contractor.* The *owner or operator* shall ensure that at least one *trained contractor* is on site on a daily basis when soil disturbance activities are being performed.

   The *owner or operator* shall have each of the contractors and subcontractors identified above sign a copy of the following certification statement below before they commence any *construction activity*:

   "I hereby certify under penalty of law that I understand and agree to comply with the terms and conditions of the SWPPP and agree to implement any corrective actions identified by the *qualified inspector* during a site inspection. I also understand that the *owner or operator* must comply with

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

the terms and conditions of the most current version of the New York State Pollutant Discharge Elimination System ("SPDES") general permit for stormwater *discharge*s from *construction activities* and that it is unlawful for any person to cause or contribute to a violation of *water quality standards*. Furthermore, I am aware that there are significant penalties for submitting false information, that I do not believe to be true, including the possibility of fine and imprisonment for knowing violations"

In addition to providing the certification statement above, the certification page must also identify the specific elements of the SWPPP that each contractor and subcontractor will be responsible for and include the name and title of the person providing the signature; the name and title of the *trained contractor* responsible for SWPPP implementation; the name, address and telephone number of the contracting firm; the address (or other identifying description) of the site; and the date the certification statement is signed. The *owner or operator* shall attach the certification statement(s) to the copy of the SWPPP that is maintained at the *construction site*. If new or additional contractors are hired to implement measures identified in the SWPPP after construction has commenced, they must also sign the certification statement and provide the information listed above.

7. For projects where the Department requests a copy of the SWPPP or inspection reports, the *owner or operator* shall submit the documents in both electronic (PDF only) and paper format within five (5) business days, unless otherwise notified by the Department.

B. Required SWPPP Contents

1. Erosion and sediment control component - All SWPPPs prepared pursuant to this permit shall include erosion and sediment control practices designed in conformance with the technical standard, New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016. Where erosion and sediment control practices are not designed in conformance with the design criteria included in the technical standard, the *owner or operator* must demonstrate *equivalence* to the technical standard. At a minimum, the erosion and sediment control component of the SWPPP shall include the following:

    a. Background information about the scope of the project, including the location, type and size of project

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. A site map/construction drawing(s) for the project, including a general location map. At a minimum, the site map shall show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s); floodplain/floodway boundaries; wetlands and drainage patterns that could be affected by the *construction activity*; existing and final contours ; locations of different soil types with boundaries; material, waste, borrow or equipment storage areas located on adjacent properties; and location(s) of the stormwater *discharge*(s);

c. A description of the soil(s) present at the site, including an identification of the Hydrologic Soil Group (HSG);

d. A construction phasing plan and sequence of operations describing the intended order of *construction activities*, including clearing and grubbing, excavation and grading, utility and infrastructure installation and any other activity at the site that results in soil disturbance;

e. A description of the minimum erosion and sediment control practices to be installed or implemented for each *construction activity* that will result in soil disturbance. Include a schedule that identifies the timing of initial placement or implementation of each erosion and sediment control practice and the minimum time frames that each practice should remain in place or be implemented;

f. A temporary and permanent soil stabilization plan that meets the requirements of this general permit and the technical standard, New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016, for each stage of the project, including initial land clearing and grubbing to project completion and achievement of *final stabilization*;

g. A site map/construction drawing(s) showing the specific location(s), size(s), and length(s) of each erosion and sediment control practice;

h. The dimensions, material specifications, installation details, and operation and maintenance requirements for all erosion and sediment control practices. Include the location and sizing of any temporary sediment basins and structural practices that will be used to divert flows from exposed soils;

i. A maintenance inspection schedule for the contractor(s) identified in Part III.A.6. of this permit, to ensure continuous and effective operation of the erosion and sediment control practices. The maintenance inspection

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

schedule shall be in accordance with the requirements in the technical standard, New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016;

j. A description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a *pollutant* source in the stormwater *discharges*;

k. A description and location of any stormwater *discharges* associated with industrial activity other than construction at the site, including, but not limited to, stormwater *discharges* from asphalt plants and concrete plants located on the *construction site*; and

l. Identification of any elements of the design that are not in conformance with the design criteria in the technical standard, New York State Standards and Specifications for Erosion and Sediment Control, dated November 2016. Include the reason for the deviation or alternative design and provide information which demonstrates that the deviation or alternative design is *equivalent* to the technical standard.

2. Post-construction stormwater management practice component – The *owner or operator* of any construction project identified in Table 2 of Appendix B as needing post-construction stormwater management practices shall prepare a SWPPP that includes practices designed in conformance with the applicable *sizing criteria* in Part I.C.2.a., c. or d. of this permit and the *performance criteria* in the technical standard, New York State Stormwater Management Design Manual dated January 2015

   Where post-construction stormwater management practices are not designed in conformance with the *performance criteria* in the technical standard, the *owner or operator* must include in the SWPPP the reason(s) for the deviation or alternative design and provide information which demonstrates that the deviation or alternative design is *equivalent* to the technical standard.

   The post-construction stormwater management practice component of the SWPPP shall include the following:

   a. Identification of all post-construction stormwater management practices to be constructed as part of the project. Include the dimensions, material specifications and installation details for each post-construction stormwater management practice;

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. A site map/construction drawing(s) showing the specific location and size of each post-construction stormwater management practice;

c. A Stormwater Modeling and Analysis Report that includes:
   (i) Map(s) showing pre-development conditions, including watershed/subcatchments boundaries, flow paths/routing, and design points;

   (ii) Map(s) showing post-development conditions, including watershed/subcatchments boundaries, flow paths/routing, design points and post-construction stormwater management practices;

   (iii) Results of stormwater modeling (i.e. hydrology and hydraulic analysis) for the required storm events. Include supporting calculations (model runs), methodology, and a summary table that compares pre and post-development runoff rates and volumes for the different storm events;

   (iv) Summary table, with supporting calculations, which demonstrates that each post-construction stormwater management practice has been designed in conformance with the *sizing criteria* included in the Design Manual;

   (v) Identification of any *sizing criteria* that is not required based on the requirements included in Part I.C. of this permit; and

   (vi) Identification of any elements of the design that are not in conformance with the *performance criteria* in the Design Manual. Include the reason(s) for the deviation or alternative design and provide information which demonstrates that the deviation or alternative design is *equivalent* to the Design Manual;

d. Soil testing results and locations (test pits, borings);

e. Infiltration test results, when required; and

f. An operations and maintenance plan that includes inspection and maintenance schedules and actions to ensure continuous and effective operation of each post-construction stormwater management practice. The plan shall identify the entity that will be responsible for the long term operation and maintenance of each practice.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

3. Enhanced Phosphorus Removal Standards - All construction projects identified in Table 2 of Appendix B that are located in the watersheds identified in Appendix C shall prepare a SWPPP that includes post-construction stormwater management practices designed in conformance with the applicable *sizing criteria* in Part I.C.2. b., c. or d. of this permit and the *performance criteria,* Enhanced Phosphorus Removal Standards included in the Design Manual. At a minimum, the post-construction stormwater management practice component of the SWPPP shall include items 2.a - 2.f. above.

C. Required SWPPP Components by Project Type

Unless otherwise notified by the Department, *owners or operators* of *construction activities* identified in Table 1 of Appendix B are required to prepare a SWPPP that only includes erosion and sediment control practices designed in conformance with Part III.B.1 of this permit. *Owners or operators* of the *construction activities* identified in Table 2 of Appendix B shall prepare a SWPPP that also includes post-construction stormwater management practices designed in conformance with Part III.B.2 or 3 of this permit.

Part IV. INSPECTION AND MAINTENANCE REQUIREMENTS

A. General Construction Site Inspection and Maintenance Requirements

1. The *owner or operator* must ensure that all erosion and sediment control practices (including pollution prevention measures) and all post-construction stormwater management practices identified in the SWPPP are inspected and maintained in accordance with Part IV.B. and C. of this permit.

2. The terms of this permit shall not be construed to prohibit the State of New York from exercising any authority pursuant to the ECL, common law or federal law, or prohibit New York State from taking any measures, whether civil or criminal, to prevent violations of the laws of the State of New York or protect the public health and safety and/or the environment.

B. Contractor Maintenance Inspection Requirements

1. The *owner or operator* of each *construction activity* identified in Tables 1 and 2 of Appendix B shall have a *trained contractor* inspect the erosion and sediment control practices and pollution prevention measures being implemented within the active work area daily to ensure that they are being maintained in effective operating condition at all times. If deficiencies are identified, the contractor shall

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

begin implementing corrective actions within one business day and shall complete the corrective actions in a reasonable time frame.

2. For construction sites where soil disturbance activities have been temporarily suspended (e.g. winter shutdown) and *temporary stabilization* measures have been applied to all disturbed areas, the *trained contractor* can stop conducting the maintenance inspections. The *trained contractor* shall begin conducting the maintenance inspections in accordance with Part IV.B.1. of this permit as soon as soil disturbance activities resume.

3. For construction sites where soil disturbance activities have been shut down with partial project completion, the *trained contractor* can stop conducting the maintenance inspections if all areas disturbed as of the project shutdown date have achieved *final stabilization* and all post-construction stormwater management practices required for the completed portion of the project have been constructed in conformance with the SWPPP and are operational.

C. Qualified Inspector Inspection Requirements

The *owner or operator* shall have a *qualified inspector* conduct site inspections in conformance with the following requirements:

[Note: The *trained contractor* identified in Part III.A.6. and IV.B. of this permit **cannot** conduct the *qualified inspector* site inspections unless they meet the *qualified inspector* qualifications included in Appendix A. In order to perform these inspections, the *trained contractor* would have to be a:

- licensed Professional Engineer,
- Certified Professional in Erosion and Sediment Control (CPESC),
- New York State Erosion and Sediment Control Certificate Program holder
- Registered Landscape Architect, or
- someone working under the direct supervision of, and at the same company as, the licensed Professional Engineer or Registered Landscape Architect, provided they have received four (4) hours of Department endorsed training in proper erosion and sediment control principles from a Soil and Water Conservation District, or other Department endorsed entity].

1. A *qualified inspector* shall conduct site inspections for all *construction activities* identified in Tables 1 and 2 of Appendix B, with the exception of:

   a. the construction of a single family residential subdivision with 25% or less *impervious cover* at total site build-out that involves a soil disturbance of one (1) or more acres of land but less than five (5) acres and is not located

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

in one of the watersheds listed in Appendix C and not directly discharging to one of the 303(d) segments listed in Appendix E;

b. the construction of a single family home that involves a soil disturbance of one (1) or more acres of land but less than five (5) acres and is not located in one of the watersheds listed in Appendix C and not directly discharging to one of the 303(d) segments listed in Appendix E;

c. construction on agricultural property that involves a soil disturbance of one (1) or more acres of land but less than five (5) acres; and

d. *construction activities* located in the watersheds identified in Appendix D that involve soil disturbances between five thousand (5,000) square feet and one (1) acre of land.

2. Unless otherwise notified by the Department, the *qualified inspector* shall conduct site inspections in accordance with the following timetable:

a. For construction sites where soil disturbance activities are on-going, the *qualified inspector* shall conduct a site inspection at least once every seven (7) calendar days.

b. For construction sites where soil disturbance activities are on-going and the *owner or operator* has received authorization in accordance with Part II.D.3 to disturb greater than five (5) acres of soil at any one time, the *qualified inspector* shall conduct at least two (2) site inspections every seven (7) calendar days. The two (2) inspections shall be separated by a minimum of two (2) full calendar days.

c. For construction sites where soil disturbance activities have been temporarily suspended (e.g. winter shutdown) and *temporary stabilization* measures have been applied to all disturbed areas, the *qualified inspector* shall conduct a site inspection at least once every thirty (30) calendar days. The *owner or operator* shall notify the DOW Water (SPDES) Program contact at the Regional Office (see contact information in Appendix F) or, in areas under the jurisdiction of a *regulated, traditional land use control MS4,* the *regulated, traditional land use control MS4* (provided the *regulated, traditional land use control MS4* is not the *owner or operator* of the *construction activity*) in writing prior to reducing the frequency of inspections.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

d. For construction sites where soil disturbance activities have been shut down with partial project completion, the *qualified inspector* can stop conducting inspections if all areas disturbed as of the project shutdown date have achieved *final stabilization* and all post-construction stormwater management practices required for the completed portion of the project have been constructed in conformance with the SWPPP and are operational. The *owner or operator* shall notify the DOW Water (SPDES) Program contact at the Regional Office (see contact information in Appendix F) or, in areas under the jurisdiction of a *regulated, traditional land use control MS4,* the *regulated, traditional land use control MS4* (provided the *regulated, traditional land use control MS4* is not the *owner or operator* of the *construction activity*) in writing prior to the shutdown. If soil disturbance activities are not resumed within 2 years from the date of shutdown, the *owner or operator* shall have the *qualified inspector* perform a final inspection and certify that all disturbed areas have achieved *final stabilization,* and all temporary, structural erosion and sediment control measures have been removed*;* and that all post-construction stormwater management practices have been constructed in conformance with the SWPPP by signing the "*Final Stabilization*" and "Post-Construction Stormwater Management Practice" certification statements on the NOT. The *owner or operator* shall then submit the completed NOT form to the address in Part II.B.1 of this permit.

e. For construction sites that directly *discharge* to one of the 303(d) segments listed in Appendix E or is located in one of the watersheds listed in Appendix C, the *qualified inspector* shall conduct at least two (2) site inspections every seven (7) calendar days. The two (2) inspections shall be separated by a minimum of two (2) full calendar days.

3. At a minimum, the *qualified inspector* shall inspect all erosion and sediment control practices and pollution prevention measures to ensure integrity and effectiveness, all post-construction stormwater management practices under construction to ensure that they are constructed in conformance with the SWPPP, all areas of disturbance that have not achieved *final stabilization,* all points of *discharge* to natural surface waterbodies located within, or immediately adjacent to, the property boundaries of the *construction site*, and all points of *discharge* from the *construction site*.

4. The *qualified inspector* shall prepare an inspection report subsequent to each and every inspection. At a minimum, the inspection report shall include and/or address the following:

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

a. Date and time of inspection;

b. Name and title of person(s) performing inspection;

c. A description of the weather and soil conditions (e.g. dry, wet, saturated) at the time of the inspection;

d. A description of the condition of the runoff at all points of *discharge* from the *construction site*. This shall include identification of any *discharges* of sediment from the *construction site*. Include *discharges* from conveyance systems (i.e. pipes, culverts, ditches, etc.) and overland flow;

e. A description of the condition of all natural surface waterbodies located within, or immediately adjacent to, the property boundaries of the *construction site* which receive runoff from disturbed areas. This shall include identification of any *discharges* of sediment to the surface waterbody;

f. Identification of all erosion and sediment control practices and pollution prevention measures that need repair or maintenance;

g. Identification of all erosion and sediment control practices and pollution prevention measures that were not installed properly or are not functioning as designed and need to be reinstalled or replaced;

h. Description and sketch of areas with active soil disturbance activity, areas that have been disturbed but are inactive at the time of the inspection, and areas that have been stabilized (temporary and/or final) since the last inspection;

i. Current phase of construction of all post-construction stormwater management practices and identification of all construction that is not in conformance with the SWPPP and technical standards;

j. Corrective action(s) that must be taken to install, repair, replace or maintain erosion and sediment control practices and pollution prevention measures; and to correct deficiencies identified with the construction of the post-construction stormwater management practice(s);

k. Identification and status of all corrective actions that were required by previous inspection; and

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

l. Digital photographs, with date stamp, that clearly show the condition of all practices that have been identified as needing corrective actions. The *qualified inspector* shall attach paper color copies of the digital photographs to the inspection report being maintained onsite within seven (7) calendar days of the date of the inspection. The *qualified inspector* shall also take digital photographs, with date stamp, that clearly show the condition of the practice(s) after the corrective action has been completed. The *qualified inspector* shall attach paper color copies of the digital photographs to the inspection report that documents the completion of the corrective action work within seven (7) calendar days of that inspection.

5. Within one business day of the completion of an inspection, the *qualified inspector* shall notify the *owner or operator* and appropriate contractor or subcontractor identified in Part III.A.6. of this permit of any corrective actions that need to be taken. The contractor or subcontractor shall begin implementing the corrective actions within one business day of this notification and shall complete the corrective actions in a reasonable time frame.

6. All inspection reports shall be signed by the *qualified inspector.* Pursuant to Part II.D.2. of this permit, the inspection reports shall be maintained on site with the SWPPP.

Part V. TERMINATION OF PERMIT COVERAGE

A. Termination of Permit Coverage

1. An *owner or operator* that is eligible to terminate coverage under this permit must submit a completed NOT form to the address in Part II.B.1 of this permit. The NOT form shall be one which is associated with this permit, signed in accordance with Part VII.H of this permit.

2. An *owner or operator* may terminate coverage when one or more the following conditions have been met:

   a. Total project completion - All *construction activity* identified in the SWPPP has been completed; and all areas of disturbance have achieved *final stabilization*; and all temporary, structural erosion and sediment control measures have been removed; and all post-construction stormwater management practices have been constructed in conformance with the SWPPP and are operational;

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. Planned shutdown with partial project completion - All soil disturbance activities have ceased; and all areas disturbed as of the project shutdown date have achieved *final stabilization*; and all temporary, structural erosion and sediment control measures have been removed; and all post-construction stormwater management practices required for the completed portion of the project have been constructed in conformance with the SWPPP and are operational;

c. A new *owner or operator* has obtained coverage under this permit in accordance with Part II.F. of this permit.

d. The *owner or operator* obtains coverage under an alternative SPDES general permit or an individual SPDES permit.

3. For *construction activities* meeting subdivision 2a. or 2b. of this Part, the *owner or operator* shall have the *qualified inspector* perform a final site inspection prior to submitting the NOT. The *qualified inspector* shall, by signing the "*Final Stabilization*" and "Post-Construction Stormwater Management Practice certification statements on the NOT, certify that all the requirements in Part V.A.2.a. or b. of this permit have been achieved.

4. For *construction activities* that are subject to the requirements of a *regulated, traditional land use control MS4* and meet subdivision 2a. or 2b. of this Part, the *owner or operator* shall have the *regulated, traditional land use control MS4* sign the "MS4 Acceptance" statement on the NOT in accordance with the requirements in Part VII.H. of this permit. The *regulated, traditional land use control MS4* official, by signing this statement, has determined that it is acceptable for the *owner or operator* to submit the NOT in accordance with the requirements of this Part. The *regulated, traditional land use control MS4* can make this determination by performing a final site inspection themselves or by accepting the *qualified inspector*'s final site inspection certification(s) required in Part V.A.3. of this permit.

5. For *construction activities* that require post-construction stormwater management practices and meet subdivision 2a. of this Part, the *owner or operator* must, prior to submitting the NOT, ensure one of the following:

a. the post-construction stormwater management practice(s) and any right-of-way(s) needed to maintain such practice(s) have been deeded to the municipality in which the practice(s) is located,

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

b. an executed maintenance agreement is in place with the municipality that will maintain the post-construction stormwater management practice(s),

c. for post-construction stormwater management practices that are privately owned, the *owner or operator* has a mechanism in place that requires operation and maintenance of the practice(s) in accordance with the operation and maintenance plan, such as a deed covenant in the *owner or operator's* deed of record,

d. for post-construction stormwater management practices that are owned by a public or private institution (e.g. school, university, hospital), government agency or authority, or public utility; the *owner or operator* has policy and procedures in place that ensures operation and maintenance of the practices in accordance with the operation and maintenance plan.

Part VI. REPORTING AND RETENTION RECORDS

A. Record Retention

The *owner or operator* shall retain a copy of the NOI, NOI Acknowledgment Letter, SWPPP, MS4 SWPPP Acceptance form and any inspection reports that were prepared in conjunction with this permit for a period of at least five (5) years from the date that the Department receives a complete NOT submitted in accordance with Part V. of this general permit.

B. Addresses

With the exception of the NOI, NOT, and MS4 SWPPP Acceptance form (which must be submitted to the address referenced in Part II.B.1 of this permit), all written correspondence requested by the Department, including individual permit applications, shall be sent to the address of the appropriate DOW Water (SPDES) Program contact at the Regional Office listed in Appendix F.

Part VII. STANDARD PERMIT CONDITIONS

A. Duty to Comply

The *owner or operator* must comply with all conditions of this permit. All contractors and subcontractors associated with the project must comply with the terms of the SWPPP. Any non-compliance with this permit constitutes a violation of the Clean Water

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Act (CWA) and the ECL and is grounds for an enforcement action against the *owner or operator* and/or the contractor/subcontractor; permit revocation, suspension or modification; or denial of a permit renewal application. Upon a finding of significant non-compliance with this permit or the applicable SWPPP, the Department may order an immediate stop to all *construction activity* at the site until the non-compliance is remedied. The stop work order shall be in writing, shall describe the non-compliance in detail, and shall be sent to the *owner or operator*.

If any human remains or archaeological remains are encountered during excavation, the *owner or operator* must immediately cease, or cause to cease, all *construction activity* in the area of the remains and notify the appropriate Regional Water Engineer (RWE). *Construction activity* shall not resume until written permission to do so has been received from the RWE.

B. Continuation of the Expired General Permit

This permit expires five (5) years from the effective date. If a new general permit is not issued prior to the expiration of this general permit, an *owner or operator* with coverage under this permit may continue to operate and *discharge* in accordance with the terms and conditions of this general permit, if it is extended pursuant to the State Administrative Procedure Act and 6 NYCRR Part 621, until a new general permit is issued.

C. Enforcement

Failure of the *owner or operator,* its contractors, subcontractors, agents and/or assigns to strictly adhere to any of the permit requirements contained herein shall constitute a violation of this permit. There are substantial criminal, civil, and administrative penalties associated with violating the provisions of this permit. Fines of up to $37,500 per day for each violation and imprisonment for up to fifteen (15) years may be assessed depending upon the nature and degree of the offense.

D. Need to Halt or Reduce Activity Not a Defense

It shall not be a defense for an *owner or operator* in an enforcement action that it would have been necessary to halt or reduce the *construction activity* in order to maintain compliance with the conditions of this permit.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

E. Duty to Mitigate

The *owner or operator* and its contractors and subcontractors shall take all reasonable steps to *minimize* or prevent any *discharge* in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

F. Duty to Provide Information

The *owner or operator* shall furnish to the Department, within a reasonable specified time period of a written request, all documentation necessary to demonstrate eligibility and any information to determine compliance with this permit or to determine whether cause exists for modifying or revoking this permit, or suspending or denying coverage under this permit, in accordance with the terms and conditions of this permit. The NOI, SWPPP and inspection reports required by this permit are public documents that the *owner or operator* must make available for review and copying by any person within five (5) business days of the *owner or operator* receiving a written request by any such person to review these documents. Copying of documents will be done at the requester's expense.

G. Other Information

When the *owner or operator* becomes aware that they failed to submit any relevant facts, or submitted incorrect information in the NOI or in any of the documents required by this permit , or have made substantive revisions to the SWPPP (e.g. the scope of the project changes significantly, the type of post-construction stormwater management practice(s) changes, there is a reduction in the sizing of the post-construction stormwater management practice, or there is an increase in the disturbance area or *impervious area*), which were not reflected in the original NOI submitted to the Department, they shall promptly submit such facts or information to the Department using the contact information in Part II.A. of this permit. Failure of the *owner or operator* to correct or supplement any relevant facts within five (5) business days of becoming aware of the deficiency shall constitute a violation of this permit.

H. Signatory Requirements

1. All NOIs and NOTs shall be signed as follows:

    a. For a corporation these forms shall be signed by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means:

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

(i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or

(ii) the manager of one or more manufacturing, production or operating facilities, provided the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

b. For a partnership or sole proprietorship these forms shall be signed by a general partner or the proprietor, respectively; or

c. For a municipality, State, Federal, or other public agency these forms shall be signed by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes:

(i) the chief executive officer of the agency, or

(ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrators of EPA).

2. The SWPPP and other information requested by the Department shall be signed by a person described in Part VII.H.1. of this permit or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described in Part VII.H.1. of this permit;

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field,

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

superintendent, position of *equivalent* responsibility, or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may thus be either a named individual or any individual occupying a named position) and,

c. The written authorization shall include the name, title and signature of the authorized representative and be attached to the SWPPP.

3. All inspection reports shall be signed by the *qualified inspector* that performs the inspection.

4. The MS4 SWPPP Acceptance form shall be signed by the principal executive officer or ranking elected official from the *regulated, traditional land use control MS4,* or by a duly authorized representative of that person.

   It shall constitute a permit violation if an incorrect and/or improper signatory authorizes any required forms, SWPPP and/or inspection reports.

I. Property Rights

The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations. *Owners or operators* must obtain any applicable conveyances, easements, licenses and/or access to real property prior to *commencing construction activity*.

J. Severability

The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

K. Requirement to Obtain Coverage Under an Alternative Permit

1. The Department may require any owner or operator authorized by this permit to apply for and/or obtain either an individual SPDES permit or another SPDES general permit. When the Department requires any discharger authorized by a general permit to apply for an individual SPDES permit, it shall notify the discharger in writing that a permit application is required. This notice shall

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

include a brief statement of the reasons for this decision, an application form, a statement setting a time frame for the owner or operator to file the application for an individual SPDES permit, and a deadline, not sooner than 180 days from owner or operator receipt of the notification letter, whereby the authorization to discharge under this general permit shall be terminated. Applications must be submitted to the appropriate Permit Administrator at the Regional Office. The Department may grant additional time upon demonstration, to the satisfaction of the Department, that additional time to apply for an alternative authorization is necessary or where the Department has not provided a permit determination in accordance with Part 621 of this Title.

2. When an individual SPDES permit is issued to a discharger authorized to *discharge* under a general SPDES permit for the same *discharge*(s), the general permit authorization for outfalls authorized under the individual SPDES permit is automatically terminated on the effective date of the individual permit unless termination is earlier in accordance with 6 NYCRR Part 750.

L. Proper Operation and Maintenance

The *owner or operator* shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the *owner or operator* to achieve compliance with the conditions of this permit and with the requirements of the SWPPP.

M. Inspection and Entry

The *owner or operator* shall allow an authorized representative of the Department, EPA, applicable county health department, or, in the case of a *construction site* which *discharges* through an *MS4*, an authorized representative of the *MS4* receiving the discharge, upon the presentation of credentials and other documents as may be required by law, to:

1. Enter upon the owner’s or operator's premises where a regulated facility or activity is located or conducted or where records must be kept under the conditions of this permit;

2. Have access to and copy at reasonable times, any records that must be kept under the conditions of this permit; and

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

3. Inspect at reasonable times any facilities or equipment (including monitoring and control equipment), practices or operations regulated or required by this permit.

4. Sample or monitor at reasonable times, for purposes of assuring permit compliance or as otherwise authorized by the Act or ECL, any substances or parameters at any location.

N. Permit Actions

This permit may, at any time, be modified, suspended, revoked, or renewed by the Department in accordance with 6 NYCRR Part 621. The filing of a request by the *owner or operator* for a permit modification, revocation and reissuance, termination, a notification of planned changes or anticipated noncompliance does not limit, diminish and/or stay compliance with any terms of this permit.

O. Definitions

Definitions of key terms are included in Appendix A of this permit.

P. Re-Opener Clause

1. If there is evidence indicating potential or realized impacts on water quality due to any stormwater discharge associated with construction activity covered by this permit, the owner or operator of such discharge may be required to obtain an individual permit or alternative general permit in accordance with Part VII.K. of this permit or the permit may be modified to include different limitations and/or requirements.

2. Any Department initiated permit modification, suspension or revocation will be conducted in accordance with 6 NYCRR Part 621, 6 NYCRR 750-1.18, and 6 NYCRR 750-1.20.

Q. Penalties for Falsification of Forms and Reports

In accordance with 6NYCRR Part 750-2.4 and 750-2.5, any person who knowingly makes any false material statement, representation, or certification in any application, record, report or other document filed or required to be maintained under this permit, including reports of compliance or noncompliance shall, upon conviction, be punished in accordance with ECL §71-1933 and or Articles 175 and 210 of the New York State Penal Law.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

(Part VII.R)

R. Other Permits

Nothing in this permit relieves the *owner or operator* from a requirement to obtain any other permits required by law.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

APPENDIX A – Acronyms and Definitions

Acronyms

APO – Agency Preservation Officer
BMP – Best Management Practice
CPESC – Certified Professional in Erosion and Sediment Control
Cpv – Channel Protection Volume
CWA – Clean Water Act (or the Federal Water Pollution Control Act, 33 U.S.C. §1251 et seq)
DOW – Division of Water
EAF – Environmental Assessment Form
ECL - Environmental Conservation Law
EPA – U. S. Environmental Protection Agency
HSG – Hydrologic Soil Group
MS4 – Municipal Separate Storm Sewer System
NOI – Notice of Intent
NOT – Notice of Termination
NPDES – National Pollutant Discharge Elimination System
OPRHP – Office of Parks, Recreation and Historic Places
Qf – Extreme Flood
Qp – Overbank Flood
RRv – Runoff Reduction Volume
RWE – Regional Water Engineer
SEQR – State Environmental Quality Review
SEQRA - State Environmental Quality Review Act
SHPA – State Historic Preservation Act
SPDES – State Pollutant Discharge Elimination System
SWPPP – Stormwater Pollution Prevention Plan
TMDL – Total Maximum Daily Load
UPA – Uniform Procedures Act
USDA – United States Department of Agriculture
WQv – Water Quality Volume

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Definitions

All definitions in this section are solely for the purposes of this permit.

Agricultural Building – a structure designed and constructed to house farm implements, hay, grain, poultry, livestock or other horticultural products; excluding any structure designed, constructed or used, in whole or in part, for human habitation, as a place of employment where agricultural products are processed, treated or packaged, or as a place used by the public.

Agricultural Property –means the land for construction of a barn, *agricultural building*, silo, stockyard, pen or other structural practices identified in Table II in the "Agricultural Management Practices Catalog for Nonpoint Source Pollution in New York State" prepared by the Department in cooperation with agencies of New York Nonpoint Source Coordinating Committee (dated June 2007).

Alter Hydrology from Pre to Post-Development Conditions - means the post-development peak flow rate(s) has increased by more than 5% of the pre-developed condition for the design storm of interest (e.g. 10 yr and 100 yr).

Combined Sewer - means a sewer that is designed to collect and convey both "sewage" and "stormwater".

Commence (Commencement of) Construction Activities - means the initial disturbance of soils associated with clearing, grading or excavation activities; or other construction related activities that disturb or expose soils such as demolition, stockpiling of fill material, and the initial installation of erosion and sediment control practices required in the SWPPP. See definition for "*Construction Activity(ies)*" also.

Construction Activity(ies) - means any clearing, grading, excavation, filling, demolition or stockpiling activities that result in soil disturbance. Clearing activities can include, but are not limited to, logging equipment operation, the cutting and skidding of trees, stump removal and/or brush root removal. Construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of a facility.

Construction Site – means the land area where *construction activity(ies)* will occur. See definition for "*Commence (Commencement of) Construction Activities"* and "*Larger Common Plan of Development or Sale" also.*

Dewatering – means the act of draining rainwater and/or groundwater from building foundations, vaults or excavations/trenches.

Direct Discharge (to a specific surface waterbody) - means that runoff flows from a *construction site* by overland flow and the first point of discharge is the specific surface waterbody, or runoff flows from a *construction site* to a separate storm sewer system

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

and the first point of discharge from the separate storm sewer system is the specific surface waterbody.

Discharge(s) - means any addition of any pollutant to waters of the State through an outlet or *point source*.

Embankment –means an earthen or rock slope that supports a road/highway.

Endangered or Threatened Species – see 6 NYCRR Part 182 of the Department's rules and regulations for definition of terms and requirements.

Environmental Conservation Law (ECL) - means chapter 43-B of the Consolidated Laws of the State of New York, entitled the Environmental Conservation Law.

Equivalent (Equivalence) – means that the practice or measure meets all the performance, longevity, maintenance, and safety objectives of the technical standard and will provide an equal or greater degree of water quality protection.

Final Stabilization - means that all soil disturbance activities have ceased and a uniform, perennial vegetative cover with a density of eighty (80) percent over the entire pervious surface has been established; or other equivalent stabilization measures, such as permanent landscape mulches, rock rip-rap or washed/crushed stone have been applied on all disturbed areas that are not covered by permanent structures, concrete or pavement.

General SPDES permit - means a SPDES permit issued pursuant to 6 NYCRR Part 750-1.21 and Section 70-0117 of the ECL authorizing a category of discharges.

Groundwater(s) - means waters in the saturated zone. The saturated zone is a subsurface zone in which all the interstices are filled with water under pressure greater than that of the atmosphere. Although the zone may contain gas-filled interstices or interstices filled with fluids other than water, it is still considered saturated.

Historic Property – means any building, structure, site, object or district that is listed on the State or National Registers of Historic Places or is determined to be eligible for listing on the State or National Registers of Historic Places.

Impervious Area (Cover) - means all impermeable surfaces that cannot effectively infiltrate rainfall. This includes paved, concrete and gravel surfaces (i.e. parking lots, driveways, roads, runways and sidewalks); building rooftops and miscellaneous impermeable structures such as patios, pools, and sheds.

Infeasible – means not technologically possible, or not economically practicable and achievable in light of best industry practices.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Larger Common Plan of Development or Sale - means a contiguous area where multiple separate and distinct *construction activities* are occurring, or will occur, under one plan. The term “plan” in “larger common plan of development or sale” is broadly defined as any announcement or piece of documentation (including a sign, public notice or hearing, marketing plan, advertisement, drawing, permit application, State Environmental Quality Review Act (SEQRA) environmental assessment form or other documents, zoning request, computer design, etc.) or physical demarcation (including boundary signs, lot stakes, surveyor markings, etc.) indicating that *construction activities* may occur on a specific plot.

For discrete construction projects that are located within a larger common plan of development or sale that are at least 1/4 mile apart, each project can be treated as a separate plan of development or sale provided any interconnecting road, pipeline or utility project that is part of the same “common plan” is not concurrently being disturbed.

Minimize – means reduce and/or eliminate to the extent achievable using control measures (including best management practices) that are technologically available and economically practicable and achievable in light of best industry practices.

Municipal Separate Storm Sewer (MS4) - a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains):

(i) Owned or operated by a State, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, stormwater, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA that discharges to surface waters of the State*;*
(ii) Designed or used for collecting or conveying stormwater;
(iii) Which is not a *combined sewer*; and
(iv) Which is not part of a Publicly Owned Treatment Works (POTW) as defined at 40 CFR 122.2.

National Pollutant Discharge Elimination System (NPDES) - means the national system for the issuance of wastewater and stormwater permits under the Federal Water Pollution Control Act (Clean Water Act).

Natural Buffer –means an undisturbed area with natural cover running along a surface water (e.g. wetland, stream, river, lake, etc.).

New Development – means any land disturbance that does not meet the definition of Redevelopment Activity included in this appendix.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

New York State Erosion and Sediment Control Certificate Program – a certificate program that establishes and maintains a process to identify and recognize individuals who are capable of developing, designing, inspecting and maintaining erosion and sediment control plans on projects that disturb soils in New York State. The certificate program is administered by the New York State Conservation District Employees Association.

NOI Acknowledgment Letter - means the letter that the Department sends to an owner or operator to acknowledge the Department's receipt and acceptance of a complete Notice of Intent. This letter documents the owner's or operator's authorization to discharge in accordance with the general permit for stormwater discharges from *construction activity*.

Nonpoint Source - means any source of water pollution or pollutants which is not a discrete conveyance or *point source* permitted pursuant to Title 7 or 8 of Article 17 of the Environmental Conservation Law (see ECL Section 17-1403).

Overbank –means flow events that exceed the capacity of the stream channel and spill out into the adjacent floodplain.

Owner or Operator - means the person, persons or legal entity which owns or leases the property on which the *construction activity* is occurring; an entity that has operational control over the construction plans and specifications, including the ability to make modifications to the plans and specifications; and/or an entity that has day-to-day operational control of those activities at a project that are necessary to ensure compliance with the permit conditions.

Performance Criteria – means the design criteria listed under the "Required Elements" sections in Chapters 5, 6 and 10 of the technical standard, New York State Stormwater Management Design Manual, dated January 2015. It does not include the Sizing Criteria (i.e. WQv, RRv, Cpv, Qp and Qf) in Part I.C.2. of the permit.

Point Source - means any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft, or landfill leachate collection system from which *pollutants* are or may be discharged.

Pollutant - means dredged spoil, filter backwash, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand and industrial, municipal, agricultural waste and ballast discharged into water; which may cause or might reasonably be expected to cause pollution of the waters of the state in contravention of the standards or guidance values adopted as provided in 6 NYCRR Parts 700 et seq .

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Qualified Inspector - means a person that is knowledgeable in the principles and practices of erosion and sediment control, such as a licensed Professional Engineer, Certified Professional in Erosion and Sediment Control (CPESC), Registered Landscape Architect, New York State Erosion and Sediment Control Certificate Program holder or other Department endorsed individual(s).

It can also mean someone working under the direct supervision of, and at the same company as, the licensed Professional Engineer or Registered Landscape Architect, provided that person has training in the principles and practices of erosion and sediment control. Training in the principles and practices of erosion and sediment control means that the individual working under the direct supervision of the licensed Professional Engineer or Registered Landscape Architect has received four (4) hours of Department endorsed training in proper erosion and sediment control principles from a Soil and Water Conservation District, or other Department endorsed entity. After receiving the initial training, the individual working under the direct supervision of the licensed Professional Engineer or Registered Landscape Architect shall receive four (4) hours of training every three (3) years.

It can also mean a person that meets the *Qualified Professional* qualifications in addition to the *Qualified Inspector* qualifications.

Note: Inspections of any post-construction stormwater management practices that include structural components, such as a dam for an impoundment, shall be performed by a licensed Professional Engineer.

Qualified Professional - means a person that is knowledgeable in the principles and practices of stormwater management and treatment, such as a licensed Professional Engineer, Registered Landscape Architect or other Department endorsed individual(s). Individuals preparing SWPPPs that require the post-construction stormwater management practice component must have an understanding of the principles of hydrology, water quality management practice design, water quantity control design, and, in many cases, the principles of hydraulics. All components of the SWPPP that involve the practice of engineering, as defined by the NYS Education Law (see Article 145), shall be prepared by, or under the direct supervision of, a professional engineer licensed to practice in the State of New York.

Redevelopment Activity(ies) – means the disturbance and reconstruction of existing impervious area, including impervious areas that were removed from a project site within five (5) years of preliminary project plan submission to the local government (i.e. site plan, subdivision, etc.).

Regulated, Traditional Land Use Control MS4 - means a city, town or village with land use control authority that is authorized to discharge under New York State DEC's

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

SPDES General Permit For Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s) or the City of New York's Individual SPDES Permit for their Municipal Separate Storm Sewer Systems (NY-0287890).

Routine Maintenance Activity - means *construction activity* that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of a facility, including, but not limited to:

- Re-grading of gravel roads or parking lots,
- Cleaning and shaping of existing roadside ditches and culverts that maintains the approximate original line and grade, and hydraulic capacity of the ditch,
- Cleaning and shaping of existing roadside ditches that does not maintain the approximate original grade, hydraulic capacity and purpose of the ditch if the changes to the line and grade, hydraulic capacity or purpose of the ditch are installed to improve water quality and quantity controls (e.g. installing grass lined ditch),
- Placement of aggregate shoulder backing that stabilizes the transition between the road shoulder and the ditch or *embankment*,
- Full depth milling and filling of existing asphalt pavements, replacement of concrete pavement slabs, and similar work that does not expose soil or disturb the bottom six (6) inches of subbase material,
- Long-term use of equipment storage areas at or near highway maintenance facilities,
- Removal of sediment from the edge of the highway to restore a previously existing sheet-flow drainage connection from the highway surface to the highway ditch or *embankment*,
- Existing use of Canal Corp owned upland disposal sites for the canal, and
- Replacement of curbs, gutters, sidewalks and guide rail posts.

Site limitations – means site conditions that prevent the use of an infiltration technique and or infiltration of the total WQv. Typical site limitations include: seasonal high groundwater, shallow depth to bedrock, and soils with an infiltration rate less than 0.5 inches/hour. The existence of site limitations shall be confirmed and documented using actual field testing (i.e. test pits, soil borings, and infiltration test) or using information from the most current United States Department of Agriculture (USDA) Soil Survey for the County where the project is located.

Sizing Criteria – means the criteria included in Part I.C.2 of the permit that are used to size post-construction stormwater management control practices. The criteria include; Water Quality Volume (WQv), Runoff Reduction Volume (RRv), Channel Protection Volume (Cpv), *Overbank* Flood (Qp), and Extreme Flood (Qf).

State Pollutant Discharge Elimination System (SPDES) - means the system established pursuant to Article 17 of the ECL and 6 NYCRR Part 750 for issuance of permits authorizing discharges to the waters of the state.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Steep Slope – means land area designated on the current United States Department of Agriculture ("USDA") Soil Survey as Soil Slope Phase "D", (provided the map unit name is inclusive of slopes greater than 25%) , or Soil Slope Phase E or F, (regardless of the map unit name), or a combination of the three designations.

Streambank – as used in this permit, means the terrain alongside the bed of a creek or stream. The bank consists of the sides of the channel, between which the flow is confined.

Stormwater Pollution Prevention Plan (SWPPP) – means a project specific report, including construction drawings, that among other things: describes the construction activity(ies), identifies the potential sources of pollution at the *construction site*; describes and shows the stormwater controls that will be used to control the pollutants (i.e. erosion and sediment controls; for many projects, includes post-construction stormwater management controls); and identifies procedures the *owner or operator* will implement to comply with the terms and conditions of the permit. See Part III of the permit for a complete description of the information that must be included in the SWPPP.

Surface Waters of the State - shall be construed to include lakes, bays, sounds, ponds, impounding reservoirs, springs, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial seas of the state of New York and all other bodies of surface water, natural or artificial, inland or coastal, fresh or salt, public or private (except those private waters that do not combine or effect a junction with natural surface waters), which are wholly or partially within or bordering the state or within its jurisdiction. Waters of the state are further defined in 6 NYCRR Parts 800 to 941.

Temporarily Ceased – means that an existing disturbed area will not be disturbed again within 14 calendar days of the previous soil disturbance.

Temporary Stabilization - means that exposed soil has been covered with material(s) as set forth in the technical standard, New York Standards and Specifications for Erosion and Sediment Control, to prevent the exposed soil from eroding. The materials can include, but are not limited to, mulch, seed and mulch, and erosion control mats (e.g. jute twisted yarn, excelsior wood fiber mats).

Total Maximum Daily Loads (TMDLs) - A TMDL is the sum of the allowable loads of a single pollutant from all contributing point and *nonpoint source*s. It is a calculation of the maximum amount of a pollutant that a waterbody can receive on a daily basis and still meet *water quality standards*, and an allocation of that amount to the pollutant's sources. A TMDL stipulates wasteload allocations (WLAs) for *point source* discharges, load allocations (LAs) for *nonpoint source*s, and a margin of safety (MOS).

Trained Contractor - means an employee from the contracting (construction) company, identified in Part III.A.6., that has received four (4) hours of Department endorsed

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

training in proper erosion and sediment control principles from a Soil and Water Conservation District, or other Department endorsed entity. After receiving the initial training, the *trained contractor* shall receive four (4) hours of training every three (3) years.

It can also mean an employee from the contracting (construction) company, identified in Part III.A.6., that meets the *qualified inspector* qualifications (e.g. licensed Professional Engineer, Certified Professional in Erosion and Sediment Control (CPESC), Registered Landscape Architect, New York State Erosion and Sediment Control Certificate Program holder, or someone working under the direct supervision of, and at the same company as, the licensed Professional Engineer or Registered Landscape Architect, provided they have received four (4) hours of Department endorsed training in proper erosion and sediment control principles from a Soil and Water Conservation District, or other Department endorsed entity).

The *trained contractor* is responsible for the day to day implementation of the SWPPP.

Uniform Procedures Act (UPA) Permit - means a permit required under 6 NYCRR Part 621 of the Environmental Conservation Law (ECL), Article 70.

Water Quality Standard - means such measures of purity or quality for any waters in relation to their reasonable and necessary use as promulgated in 6 NYCRR Part 700 et seq.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

APPENDIX B – Required SWPPP Components by Project Type

Table 1
Construction Activities that Require the Preparation of a SWPPP That Only Includes Erosion and Sediment Controls

The following construction activities that involve soil disturbances of one (1) or more acres of land, but less than five (5) acres:

- Single family home not located in one of the watersheds listed in Appendix C or not *directly discharging* to one of the 303(d) segments listed in Appendix E
- Single family residential subdivisions with 25% or less impervious cover at total site build-out and not located in one of the watersheds listed in Appendix C and not directly discharging to one of the 303(d) segments listed in Appendix E
- Construction of a barn or other *agricultural building*, silo, stock yard or pen.

The following construction activities that involve soil disturbances between five thousand (5000) square feet and one (1) acre of land:

All construction activities located in the watersheds identified in Appendix D that involve soil disturbances between five thousand (5,000) square feet and one (1) acre of land.

The following construction activities that involve soil disturbances of one (1) or more acres of land:

- Installation of underground, linear utilities; such as gas lines, fiber-optic cable, cable TV, electric, telephone, sewer mains, and water mains
- Environmental enhancement projects, such as wetland mitigation projects, stormwater retrofits and stream restoration projects
- Pond construction
- Linear bike paths running through areas with vegetative cover, including bike paths surfaced with an impervious cover
- Cross-country ski trails and walking/hiking trails
- Sidewalk, bike path or walking path projects, surfaced with an impervious cover, that are not part of residential, commercial or institutional development;
- Sidewalk, bike path or walking path projects, surfaced with an impervious cover, that include incidental shoulder or curb work along an existing highway to support construction of the sidewalk, bike path or walking path.
- Slope stabilization projects
- Slope flattening that changes the grade of the site, but does not significantly change the runoff characteristics

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Table 1 (Continued) Construction Activities that Require the Preparation of a SWPPP That Only Includes Erosion and Sediment Controls

The following construction activities that involve soil disturbances of one (1) or more acres of land:

- Spoil areas that will be covered with vegetation
- Vegetated open space projects (i.e. recreational parks, lawns, meadows, fields, downhill ski trails) excluding projects that *alter hydrology from pre to post development* conditions,
- Athletic fields (natural grass) that do not include the construction or reconstruction of *impervious area* and do not *alter hydrology from pre to post development* conditions
- Demolition project where vegetation will be established, and no redevelopment is planned
- Overhead electric transmission line project that does not include the construction of permanent access roads or parking areas surfaced with *impervious cover*
- Structural practices as identified in Table II in the "Agricultural Management Practices Catalog for Nonpoint Source Pollution in New York State", excluding projects that involve soil disturbances of greater than five acres and construction activities that include the construction or reconstruction of impervious area
- Temporary access roads, median crossovers, detour roads, lanes, or other temporary impervious areas that will be restored to pre-construction conditions once the construction activity is complete

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Table 2
CONSTRUCTION ACTIVITIES THAT REQUIRE THE PREPARATION OF A SWPPP THAT INCLUDES POST-CONSTRUCTION STORMWATER MANAGEMENT PRACTICES

The following construction activities that involve soil disturbances of one (1) or more acres of land:

- Single family home located in one of the watersheds listed in Appendix C or *directly discharging* to one of the 303(d) segments listed in Appendix E
- Single family home that disturbs five (5) or more acres of land
- Single family residential subdivisions located in one of the watersheds listed in Appendix C or *directly discharging* to one of the 303(d) segments listed in Appendix E
- Single family residential subdivisions that involve soil disturbances of between one (1) and five (5) acres of land with greater than 25% impervious cover at total site build-out
- Single family residential subdivisions that involve soil disturbances of five (5) or more acres of land, and single family residential subdivisions that involve soil disturbances of less than five (5) acres that are part of a larger common plan of development or sale that will ultimately disturb five or more acres of land
- Multi-family residential developments; includes duplexes, townhomes, condominiums, senior housing complexes, apartment complexes, and mobile home parks
- Airports
- Amusement parks
- Breweries, cideries, and wineries, including establishments constructed on agricultural land
- Campgrounds
- Cemeteries that include the construction or reconstruction of impervious area (>5% of disturbed area) or *alter the hydrology from pre to post development* conditions
- Commercial developments
- Churches and other places of worship
- Construction of a barn or other *agricultural building* (e.g. silo) and structural practices as identified in Table II in the "Agricultural Management Practices Catalog for Nonpoint Source Pollution in New York State" that include the construction or reconstruction of *impervious area*, excluding projects that involve soil disturbances of less than five acres.
- Golf courses
- Institutional development; includes hospitals, prisons, schools and colleges
- Industrial facilities; includes industrial parks
- Landfills
- Municipal facilities; includes highway garages, transfer stations, office buildings, POTW's, water treatment plants, and water storage tanks
- Office complexes
- Playgrounds that include the construction or reconstruction of impervious area
- Sports complexes
- Racetracks; includes racetracks with earthen (dirt) surface
- Road construction or reconstruction, including roads constructed as part of the construction activities listed in Table 1

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

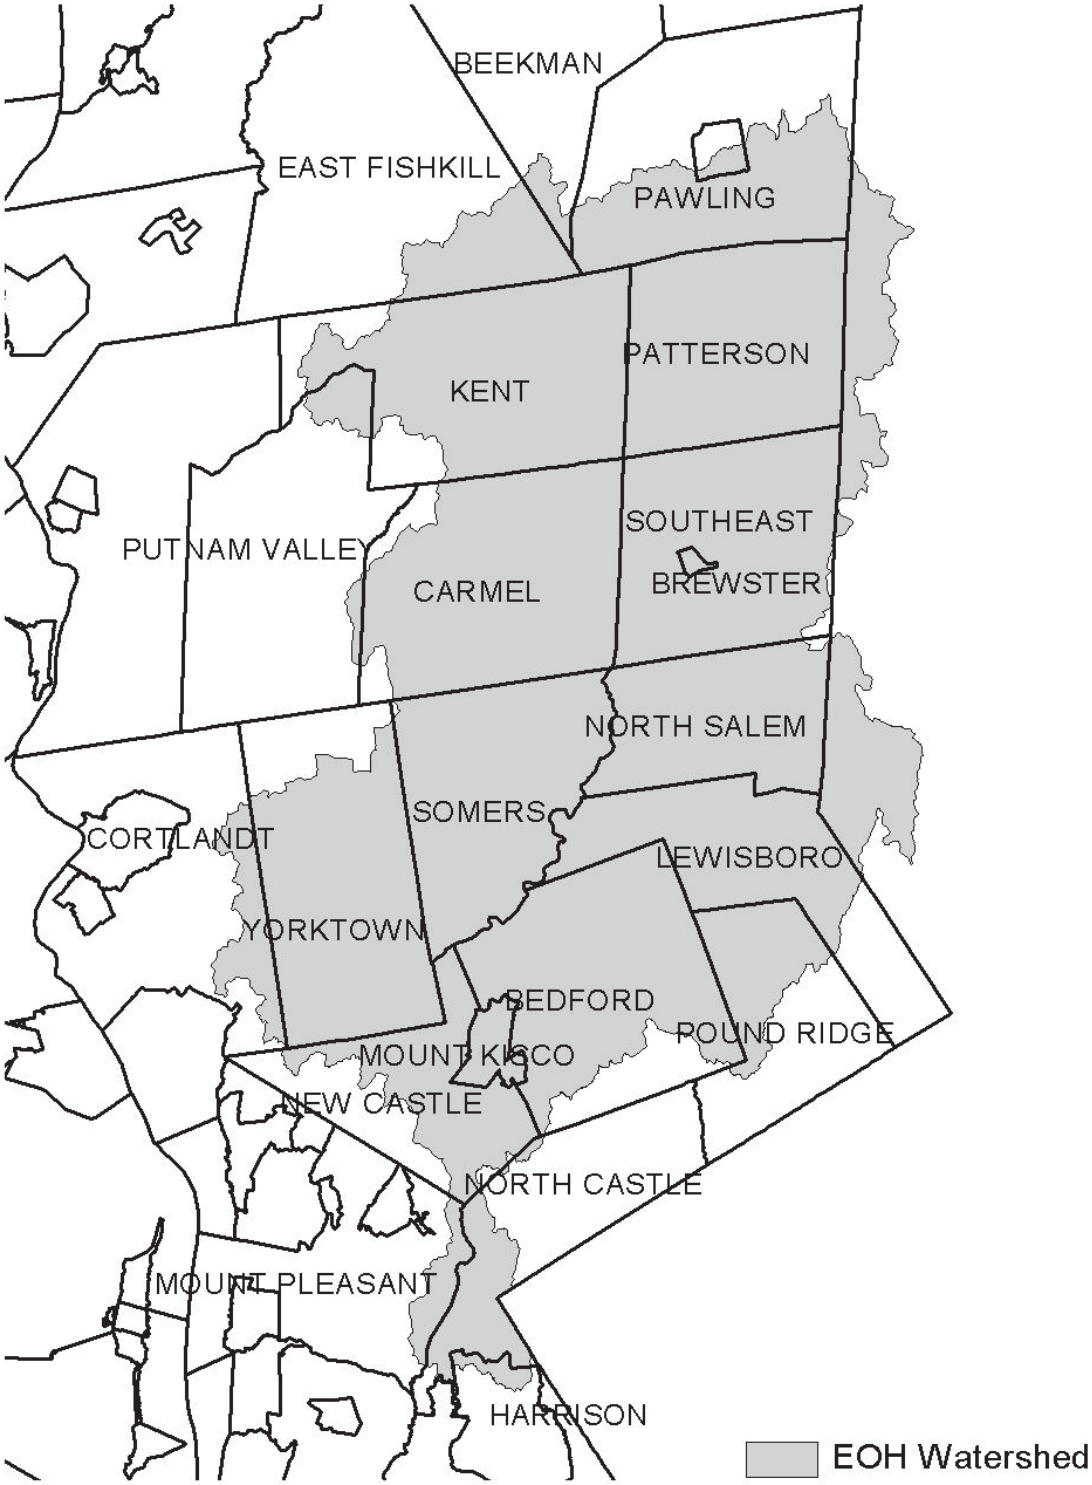
Table 2 (Continued)

CONSTRUCTION ACTIVITIES THAT REQUIRE THE PREPARATION OF A SWPPP THAT INCLUDES POST-CONSTRUCTION STORMWATER MANAGEMENT PRACTICES

The following construction activities that involve soil disturbances of one (1) or more acres of land:

- Parking lot construction or reconstruction, including parking lots constructed as part of the construction activities listed in Table 1
- Athletic fields (natural grass) that include the construction or reconstruction of impervious area (>5% of disturbed area) or *alter the hydrology from pre to post development* conditions
- Athletic fields with artificial turf
- Permanent access roads, parking areas, substations, compressor stations and well drilling pads, surfaced with *impervious cover,* and constructed as part of an over-head electric transmission line project, wind-power project, cell tower project, oil or gas well drilling project, sewer or water main project or other linear utility project
- Sidewalk, bike path or walking path projects, surfaced with an impervious cover, that are part of a residential, commercial or institutional development
- Sidewalk, bike path or walking path projects, surfaced with an impervious cover, that are part of a highway construction or reconstruction project
- All other construction activities that include the construction or reconstruction of *impervious area* or *alter the hydrology from pre to post development* conditions, and are not listed in Table 1

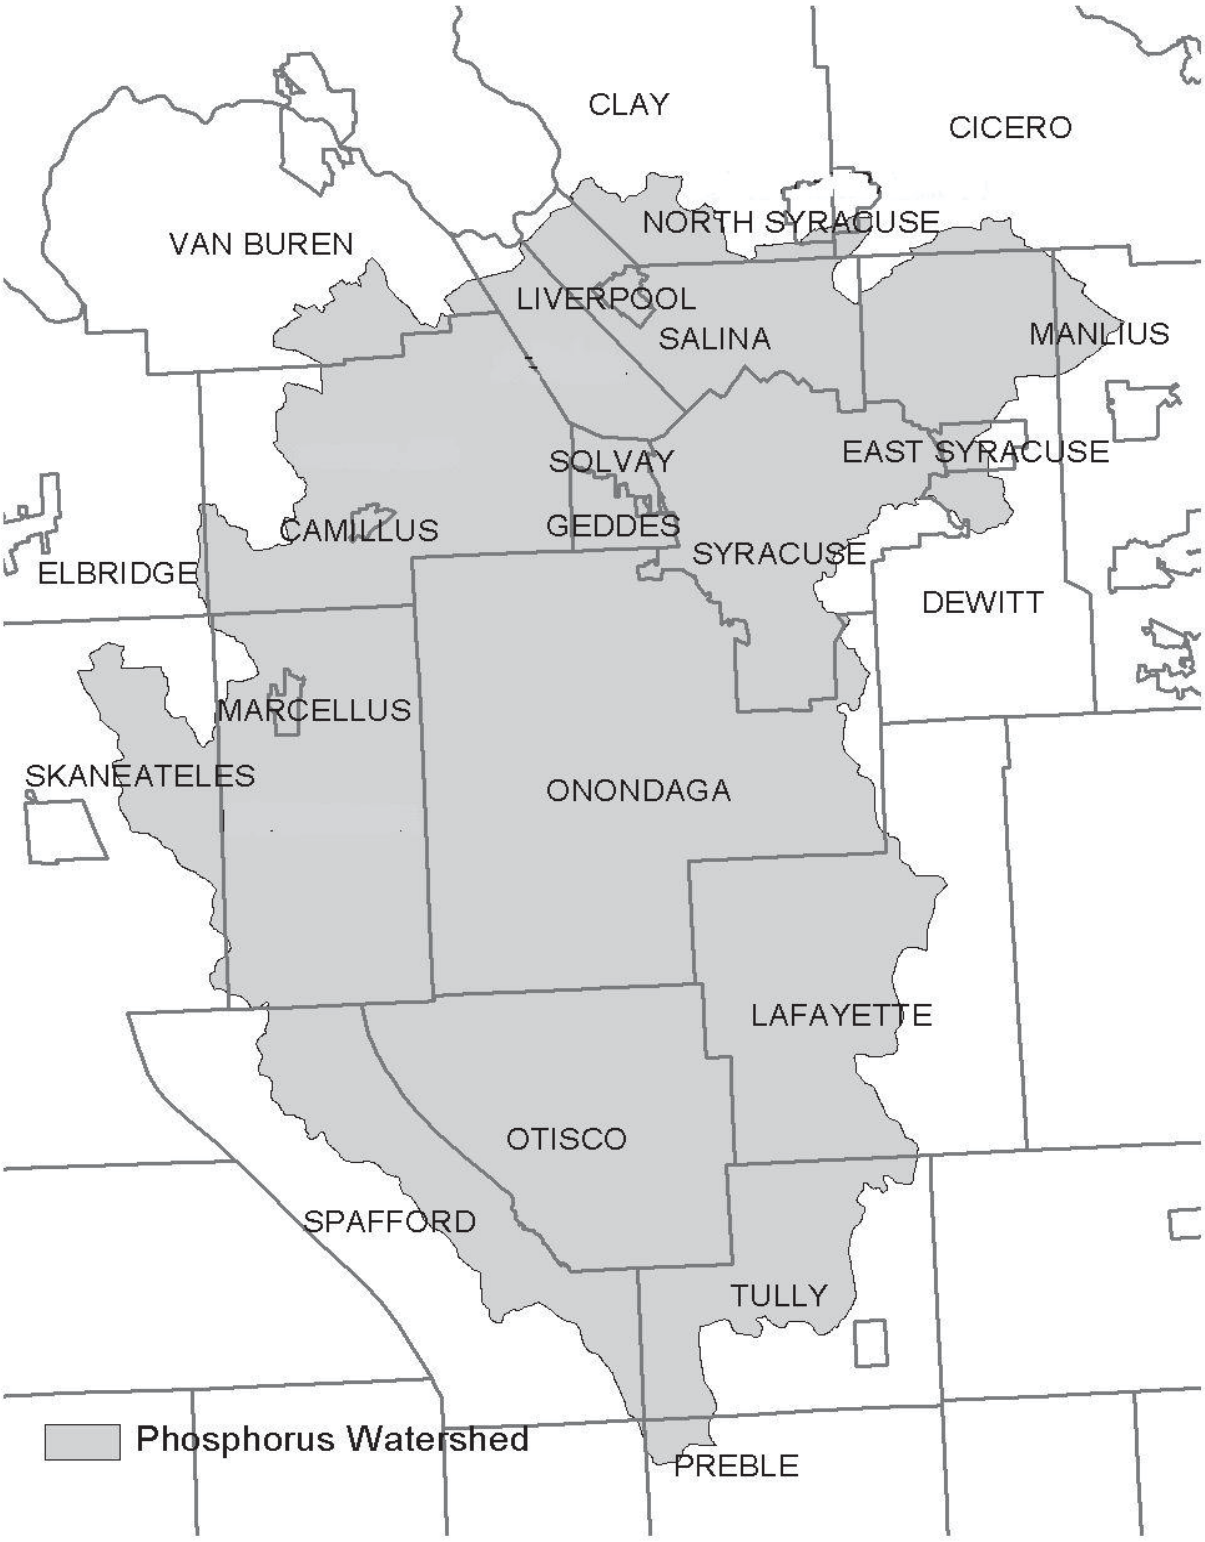
Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)



APPENDIX C – Watersheds Requiring Enhanced Phosphorus Removal

Watersheds where *owners or operators* of construction activities identified in Table 2 of Appendix B must prepare a SWPPP that includes post-construction stormwater management practices designed in conformance with the Enhanced Phosphorus Removal Standards included in the technical standard, New York State Stormwater Management Design Manual ("Design Manual").

- Entire New York City Watershed located east of the Hudson River - Figure 1
- Onondaga Lake Watershed - Figure 2
- Greenwood Lake Watershed -Figure 3
- Oscawana Lake Watershed – Figure 4
- Kinderhook Lake Watershed – Figure 5



Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

APPENDIX D – Watersheds with Lower Disturbance Threshold

Watersheds where *owners or operators* of construction activities that involve soil disturbances between five thousand (5000) square feet and one (1) acre of land must obtain coverage under this permit.

Entire New York City Watershed that is located east of the Hudson River - See Figure 1 in Appendix C

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

APPENDIX E – 303(d) Segments Impaired by Construction Related Pollutant(s)

List of 303(d) segments impaired by pollutants related to *construction activity* (e.g. silt, sediment or nutrients). The list was developed using "The Final New York State 2016 Section 303(d) List of Impaired Waters Requiring a TMDL/Other Strategy" dated November 2016. *Owners or operators* of single family home and single family residential subdivisions with 25% or less total impervious cover at total site build-out that involve soil disturbances of one or more acres of land, but less than 5 acres, and *directly discharge* to one of the listed segments below shall prepare a SWPPP that includes post-construction stormwater management practices designed in conformance with the New York State Stormwater Management Design Manual ("Design Manual"), dated January 2015.

COUNTY	WATERBODY	POLLUTANT
Albany	Ann Lee (Shakers) Pond, Stump Pond	Nutrients
Albany	Basic Creek Reservoir	Nutrients
Allegany	Amity Lake, Saunders Pond	Nutrients
Bronx	Long Island Sound, Bronx	Nutrients

NOTICE OF INTENT

New York State Department of Environmental Conservation
Division of Water
625 Broadway, 4th Floor
Albany, New York 12233-3505

NYR _____ (for DEC use only)

Stormwater Discharges Associated with Construction Activity Under State Pollutant Discharge Elimination System (SPDES) General Permit # GP-0-20-001

All sections must be completed unless otherwise noted. Failure to complete all items may result in this form being returned to you, thereby delaying your coverage under this General Permit. Applicants must read and understand the conditions of the permit and prepare a Stormwater Pollution Prevention Plan prior to submitting this NOI. Applicants are responsible for identifying and obtaining other DEC permits that may be required.

Tax Map Numbers

1. Provide the Geographic Coordinates for the project site. To do this, go to the NYSDEC Stormwater Interactive Map on the DEC website at:

https://gisservices.dec.ny.gov/gis/stormwater/

Zoom into your Project Location such that you can accurately click on the centroid of your site. Once you have located the centroid of your project site, go to the bottom right hand corner of the map for the X, Y coordinates. Enter the coordinates into the boxes below. For problems with the interactive map use the help function.

X Coordinates (Easting)

-7 8699

Ex. -73.749

Y Coordinates (Northing)

42952

Ex. 42.652

2. What is the nature of this construction project?

● **New Construction**

○ **Redevelopment with increase in impervious area**

○ **Redevelopment with no increase in impervious area**

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

3. Select the predominant land use for both pre and post development conditions.
SELECT ONLY ONE CHOICE FOR EACH

Pre-Development Existing Land Use

- ○ FOREST
- ○ PASTURE/OPEN LAND
- ○ CULTIVATED LAND
- ○ SINGLE FAMILY HOME
- ○ SINGLE FAMILY SUBDIVISION
- ○ TOWN HOME RESIDENTIAL
- ○ MULTIFAMILY RESIDENTIAL
- ○ INSTITUTIONAL/SCHOOL
- ○ INDUSTRIAL
- ○ COMMERCIAL
- ○ ROAD/HIGHWAY
- ○ RECREATIONAL/SPORTS FIELD
- ○ BIKE PATH/TRAIL
- ○ LINEAR UTILITY
- ○ PARKING LOT
- ● OTHER

vacant land

Post-Development Future Land Use

- ○ SINGLE FAMILY HOME
- ● SINGLE FAMILY SUBDIVISION — Number of Lots: 8
- ○ TOWN HOME RESIDENTIAL
- ○ MULTIFAMILY RESIDENTIAL
- ○ INSTITUTIONAL/SCHOOL
- ○ INDUSTRIAL
- ○ COMMERCIAL
- ○ MUNICIPAL
- ○ ROAD/HIGHWAY
- ○ RECREATIONAL/SPORTS FIELD
- ○ BIKE PATH/TRAIL
- ○ LINEAR UTILITY (water, sewer, gas, etc.)
- ○ PARKING LOT
- ○ CLEARING/GRADING ONLY
- ○ DEMOLITION, NO REDEVELOPMENT
- ○ WELL DRILLING ACTIVITY *(Oil, Gas, etc.)
- ○ OTHER

***Note**: for gas well drilling, non-high volume hydraulic fractured wells only

4. In accordance with the larger common plan of development or sale, enter the total project site area; the total area to be disturbed; existing impervious area to be disturbed (for redevelopment activities); and the future impervious area constructed within the disturbed area. (Round to the nearest tenth of an acre.)

Total Site Area	Total Area To Be Disturbed	Existing Impervious Area To Be Disturbed	Future Impervious Area Within Disturbed Area
1.4	1.4	0.0	0.0

5. Do you plan to disturb more than 5 acres of soil at any one time? ○ **Yes** ● **No**

6. Indicate the percentage of each Hydrologic Soil Group(HSG) at the site.

A	B	C	D
%	%	100 %	%

7. Is this a phased project? ○ **Yes** ● **No**

8. Enter the planned start and end dates of the disturbance activities.

Start Date 9/1/2022 - **End Date** 9/1/2023

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

9. Identify the nearest surface waterbody(ies) to which construction site runoff will discharge.

Name: Ellicott Creek

9a. Type of waterbody identified in Question 9?

- ○ Wetland / State Jurisdiction On Site (Answer 9b)
- ○ Wetland / State Jurisdiction Off Site
- ○ Wetland / Federal Jurisdiction On Site (Answer 9b)
- ○ Wetland / Federal Jurisdiction Off Site
- ○ Stream / Creek On Site
- ● Stream / Creek Off Site
- ○ River On Site
- ○ River Off Site
- ○ Lake On Site
- ○ Lake Off Site
- ○ Other Type On Site
- ○ Other Type Off Site

9b. How was the wetland identified?

- ○ Regulatory Map
- ○ Delineated by Consultant
- ○ Delineated by Army Corps of Engineers
- ○ Other (identify)

10. Has the surface waterbody(ies) in question 9 been identified as a 303(d) segment in Appendix E of GP-0-20-001? ● **Yes** ○ **No**

11. Is this project located in one of the Watersheds identified in Appendix C of GP-0-20-001? ○ **Yes** ● **No**

12. Is the project located in one of the watershed areas associated with AA and AA-S classified waters? ○ **Yes** ● **No**
If no, skip question 13.

13. Does this construction activity disturb land with no existing impervious cover and where the Soil Slope Phase is identified as an E or F on the USDA Soil Survey? ○ **Yes** ● **No**
If Yes, what is the acreage to be disturbed?

14. Will the project disturb soils within a State regulated wetland or the protected 100 foot adjacent area? ○ **Yes** ● **No**

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

15. Does the site runoff enter a separate storm sewer system (including roadside drains, swales, ditches, culverts, etc)? ◉ Yes ○ No ○ Unknown

16. What is the name of the municipality/entity that owns the separate storm sewer system?

Town of Amherst

17. Does any runoff from the site enter a sewer classified as a Combined Sewer? ○ Yes ◉ No ○ Unknown

18. Will future use of this site be an agricultural property as defined by the NYS Agriculture and Markets Law? ○ Yes ◉ No

19. Is this property owned by a state authority, state agency, federal government or local government? ○ Yes ◉ No

20. Is this a remediation project being done under a Department approved work plan? (i.e. CERCLA, RCRA, Voluntary Cleanup Agreement, etc.) ○ Yes ◉ No

21. Has the required Erosion and Sediment Control component of the SWPPP been developed in conformance with the current NYS Standards and Specifications for Erosion and Sediment Control (aka Blue Book)? ◉ Yes ○ No

22. Does this construction activity require the development of a SWPPP that includes the post-construction stormwater management practice component (i.e. Runoff Reduction, Water Quality and Quantity Control practices/techniques)? ○ Yes ◉ No
If No, skip questions 23 and 27-39.

23. Has the post-construction stormwater management practice component of the SWPPP been developed in conformance with the current NYS Stormwater Management Design Manual? ○ Yes ○ No

SWPPP Preparer Certification

I hereby certify that the Stormwater Pollution Prevention Plan (SWPPP) for this project has been prepared in accordance with the terms and conditions of the GP-0-20-001. Furthermore, I understand that certifying false, incorrect or inaccurate information is a violation of this permit and the laws of the State of New York and could subject me to criminal, civil and/or administrative proceedings.

25. Has a construction sequence schedule for the planned management practices been prepared? ● Yes ○ No

26. Select **all** of the erosion and sediment control practices that will be employed on the project site:

Temporary Structural

- ○ Check Dams
- ○ Construction Road Stabilization
- ● Dust Control
- ○ Earth Dike
- ○ Level Spreader
- ○ Perimeter Dike/Swale
- ○ Pipe Slope Drain
- ○ Portable Sediment Tank
- ○ Rock Dam
- ○ Sediment Basin
- ○ Sediment Traps
- ● Silt Fence
- ● Stabilized Construction Entrance
- ○ Storm Drain Inlet Protection
- ○ Straw/Hay Bale Dike
- ○ Temporary Access Waterway Crossing
- ○ Temporary Stormdrain Diversion
- ○ Temporary Swale
- ○ Turbidity Curtain
- ○ Water bars

Biotechnical

- ○ Brush Matting
- ○ Wattling

Vegetative Measures

- ○ Brush Matting
- ○ Dune Stabilization
- ○ Grassed Waterway
- ○ Mulching
- ● Protecting Vegetation
- ○ Recreation Area Improvement
- ● Seeding
- ● Sodding
- ○ Straw/Hay Bale Dike
- ○ Streambank Protection
- ○ Temporary Swale
- ○ Topsoiling
- ○ Vegetating Waterways

Permanent Structural

- ○ Debris Basin
- ○ Diversion
- ○ Grade Stabilization Structure
- ○ Land Grading
- ○ Lined Waterway (Rock)
- ○ Paved Channel (Concrete)
- ○ Paved Flume
- ○ Retaining Wall
- ○ Riprap Slope Protection
- ○ Rock Outlet Protection
- ○ Streambank Protection

Post-construction Stormwater Management Practice (SMP) Requirements

Important: Completion of Questions 27-39 is not required if response to Question 22 is No.

27. Identify all site planning practices that were used to prepare the final site plan/layout for the project.

- ○ **Preservation of Undisturbed Areas**
- ○ **Preservation of Buffers**
- ○ **Reduction of Clearing and Grading**
- ○ **Locating Development in Less Sensitive Areas**
- ○ **Roadway Reduction**
- ○ **Sidewalk Reduction**
- ○ **Driveway Reduction**
- ○ **Cul-de-sac Reduction**
- ○ **Building Footprint Reduction**
- ○ **Parking Reduction**

27a. Indicate which of the following soil restoration criteria was used to address the requirements in Section 5.1.6("Soil Restoration") of the Design Manual (2010 version).

- ○ All disturbed areas will be restored in accordance with the Soil Restoration requirements in Table 5.3 of the Design Manual (see page 5-22).
- ○ Compacted areas were considered as impervious cover when calculating the **WQv Required**, and the compacted areas were assigned a post-construction Hydrologic Soil Group (HSG) designation that is one level less permeable than existing conditions for the hydrology analysis.

28. Provide the total Water Quality Volume (WQv) required for this project (based on final site plan/layout).

Total WQv Required

			.				**acre-feet**

29. Identify the RR techniques (Area Reduction), RR techniques(Volume Reduction) and Standard SMPs with RRv Capacity in Table 1 (See Page 9) that were used to reduce the Total WQv Required(#28).

Also, provide in Table 1 the total impervious area that contributes runoff to each technique/practice selected. For the Area Reduction Techniques, provide the total contributing area (includes pervious area) and, if applicable, the total impervious area that contributes runoff to the technique/practice.

Note: Redevelopment projects shall use Tables 1 and 2 to identify the SMPs used to treat and/or reduce the WQv required. If runoff reduction techniques will not be used to reduce the required WQv, skip to question 33a after identifying the SMPs.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

7738089822

Table 1 - Runoff Reduction (RR) Techniques and Standard Stormwater Management Practices (SMPs)

	Total Contributing Area (acres)		Total Contributing Impervious Area(acres)
RR Techniques (Area Reduction)			
○ Conservation of Natural Areas (RR-1)	.	and/or	.
○ Sheetflow to Riparian Buffers/Filters Strips (RR-2)	.	and/or	.
○ Tree Planting/Tree Pit (RR-3)	.	and/or	.
○ Disconnection of Rooftop Runoff (RR-4)	.	and/or	.
RR Techniques (Volume Reduction)			
○ Vegetated Swale (RR-5)			.
○ Rain Garden (RR-6)			.
○ Stormwater Planter (RR-7)			.
○ Rain Barrel/Cistern (RR-8)			.
○ Porous Pavement (RR-9)			.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Table 2 - Alternative SMPs (DO NOT INCLUDE PRACTICES BEING USED FOR PRETREATMENT ONLY)

Alternative SMP	Total Contributing Impervious Area(acres)
○ Hydrodynamic	___.___
○ Wet Vault	___.___
○ Media Filter	___.___
○ Other _____	___.___

Provide the name and manufacturer of the Alternative SMPs (i.e. proprietary practice(s)) being used for WQv treatment.

Name _____

Manufacturer _____

Note: Redevelopment projects which do not use RR techniques, shall use questions 28, 29, 33 and 33a to provide SMPs used, total WQv required and total WQv provided for the project.

30. Indicate the Total RRv provided by the RR techniques (Area/Volume Reduction) and Standard SMPs with RRv capacity identified in question 29.

Total RRv provided

___.___ **acre-feet**

31. Is the Total RRv provided (#30) greater than or equal to the total WQv required (#28).

○ **Yes** ○ **No**

If Yes, go to question 36.
If No, go to question 32.

32. Provide the Minimum RRv required based on HSG.
[Minimum RRv Required = (P)(0.95)(Ai)/12, Ai=(S)(Aic)]

Minimum RRv Required

___.___ **acre-feet**

32a. Is the Total RRv provided (#30) greater than or equal to the Minimum RRv Required (#32)?

○ **Yes** ○ **No**

If Yes, go to question 33.
Note: Use the space provided in question #39 to summarize the specific site limitations and justification for not reducing 100% of WQv required (#28). A detailed evaluation of the specific site limitations and justification for not reducing 100% of the WQv required (#28) must also be included in the SWPPP.
If No, sizing criteria has not been met, so NOI can not be processed. SWPPP preparer must modify design to meet sizing criteria.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

33. Identify the Standard SMPs in Table 1 and, if applicable, the Alternative SMPs in Table 2 that were used to treat the remaining total WQv(=Total WQv Required in 28 - Total RRv Provided in 30).

Also, provide in Table 1 and 2 the total impervious area that contributes runoff to each practice selected.

Note: Use Tables 1 and 2 to identify the SMPs used on Redevelopment projects.

33a. Indicate the Total WQv provided (i.e. WQv treated) by the SMPs identified in question #33 and Standard SMPs with RRv Capacity identified in question 29.

WQv Provided

[ ][ ][ ].[ ][ ][ ] **acre-feet**

Note: For the standard SMPs with RRv capacity, the WQv provided by each practice = the WQv calculated using the contributing drainage area to the practice - RRv provided by the practice. (See Table 3.5 in Design Manual)

34. Provide the sum of the Total RRv provided (#30) and the WQv provided (#33a). [ ][ ][ ].[ ][ ][ ]

35. Is the sum of the RRv provided (#30) and the WQv provided (#33a) greater than or equal to the total WQv required (#28)? ○ **Yes** ○ **No**

If Yes, go to question 36.
If No, sizing criteria has not been met, so NOI can not be processed. SWPPP preparer must modify design to meet sizing criteria.

36. Provide the total Channel Protection Storage Volume (CPv) required and provided or select waiver (36a), if applicable.

CPv Required

[ ][ ][ ].[ ][ ][ ] **acre-feet**

CPv Provided

[ ][ ][ ].[ ][ ][ ] **acre-feet**

36a. The need to provide channel protection has been waived because:

○ Site discharges directly to tidal waters or a fifth order or larger stream.

○ Reduction of the total CPv is achieved on site through runoff reduction techniques or infiltration systems.

37. Provide the Overbank Flood (Qp) and Extreme Flood (Qf) control criteria or select waiver (37a), if applicable.

Total Overbank Flood Control Criteria (Qp)

Pre-Development

[ ][ ][ ].[ ][ ][ ] **CFS**

Post-development

[ ][ ][ ].[ ][ ][ ] **CFS**

Total Extreme Flood Control Criteria (Qf)

Pre-Development

[ ][ ][ ].[ ][ ][ ] **CFS**

Post-development

[ ][ ][ ].[ ][ ][ ] **CFS**

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

37a. The need to meet the Qp and Qf criteria has been waived because:

- ○ Site discharges directly to tidal waters or a fifth order or larger stream.
- ○ Downstream analysis reveals that the Qp and Qf controls are not required

38. Has a long term Operation and Maintenance Plan for the post-construction stormwater management practice(s) been developed? ○ **Yes** ○ **No**

If Yes, Identify the entity responsible for the long term Operation and Maintenance

39. Use this space to summarize the specific site limitations and justification for not reducing 100% of WQv required(#28). (See question 32a) This space can also be used for other pertinent project information.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

40. Identify other DEC permits, existing and new, that are required for this project/facility.

- ○ Air Pollution Control
- ○ Coastal Erosion
- ○ Hazardous Waste
- ○ Long Island Wells
- ○ Mined Land Reclamation
- ○ Solid Waste
- ○ Navigable Waters Protection / Article 15
- ○ Water Quality Certificate
- ○ Dam Safety

Owner/Operator Certification

I have read or been advised of the permit conditions and believe that I understand them. I also understand that, under the terms of the permit, there may be reporting requirements. I hereby certify that this document and the corresponding documents were prepared under my direction or supervision. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I further understand that coverage under the general permit will be identified in the acknowledgment that I will receive as a result of submitting this NOI and can be as long as sixty (60) business days as provided for in the general permit. I also understand that, by submitting this NOI, I am acknowledging that the SWPPP has been developed and will be implemented as the first element of construction, and agreeing to comply with all the terms and conditions of the general permit for which this NOI is being submitted.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Erie County, New York
Survey Area Data: Version 21, Aug 29, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jul 4, 2020—Jul 10, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Description

Hydrologic soil groups are based on estimates of runoff potential. Soils are assigned to one of four groups according to the rate of water infiltration when the soils are not protected by vegetation, are thoroughly wet, and receive precipitation from long-duration storms.

The soils in the United States are assigned to four groups (A, B, C, and D) and three dual classes (A/D, B/D, and C/D). The groups are defined as follows:

Group A. Soils having a high infiltration rate (low runoff potential) when thoroughly wet. These consist mainly of deep, well drained to excessively drained sands or gravelly sands. These soils have a high rate of water transmission.

Group B. Soils having a moderate infiltration rate when thoroughly wet. These consist chiefly of moderately deep or deep, moderately well drained or well drained soils that have moderately fine texture to moderately coarse texture. These soils have a moderate rate of water transmission.

Group C. Soils having a slow infiltration rate when thoroughly wet. These consist chiefly of soils having a layer that impedes the downward movement of water or soils of moderately fine texture or fine texture. These soils have a slow rate of water transmission.

Group D. Soils having a very slow infiltration rate (high runoff potential) when thoroughly wet. These consist chiefly of clays that have a high shrink-swell potential, soils that have a high water table, soils that have a claypan or clay layer at or near the surface, and soils that are shallow over nearly impervious material. These soils have a very slow rate of water transmission.

If a soil is assigned to a dual hydrologic group (A/D, B/D, or C/D), the first letter is for drained areas and the second is for undrained areas. Only the soils that in their natural condition are in group D are assigned to dual classes.

CONSTRUCTION SPECIFICATIONS

1. STONE SIZE - USE 2" STONE, OR RECLAIMED OR RECYCLED CONCRETE EQUIVALENT.

2. LENGTH - NOT LESS THAN 50 FEET (EXCEPT ON A SINGLE RESIDENCE LOT WHERE A 30 FOOT MINIMUM LENGTH WOULD APPLY).

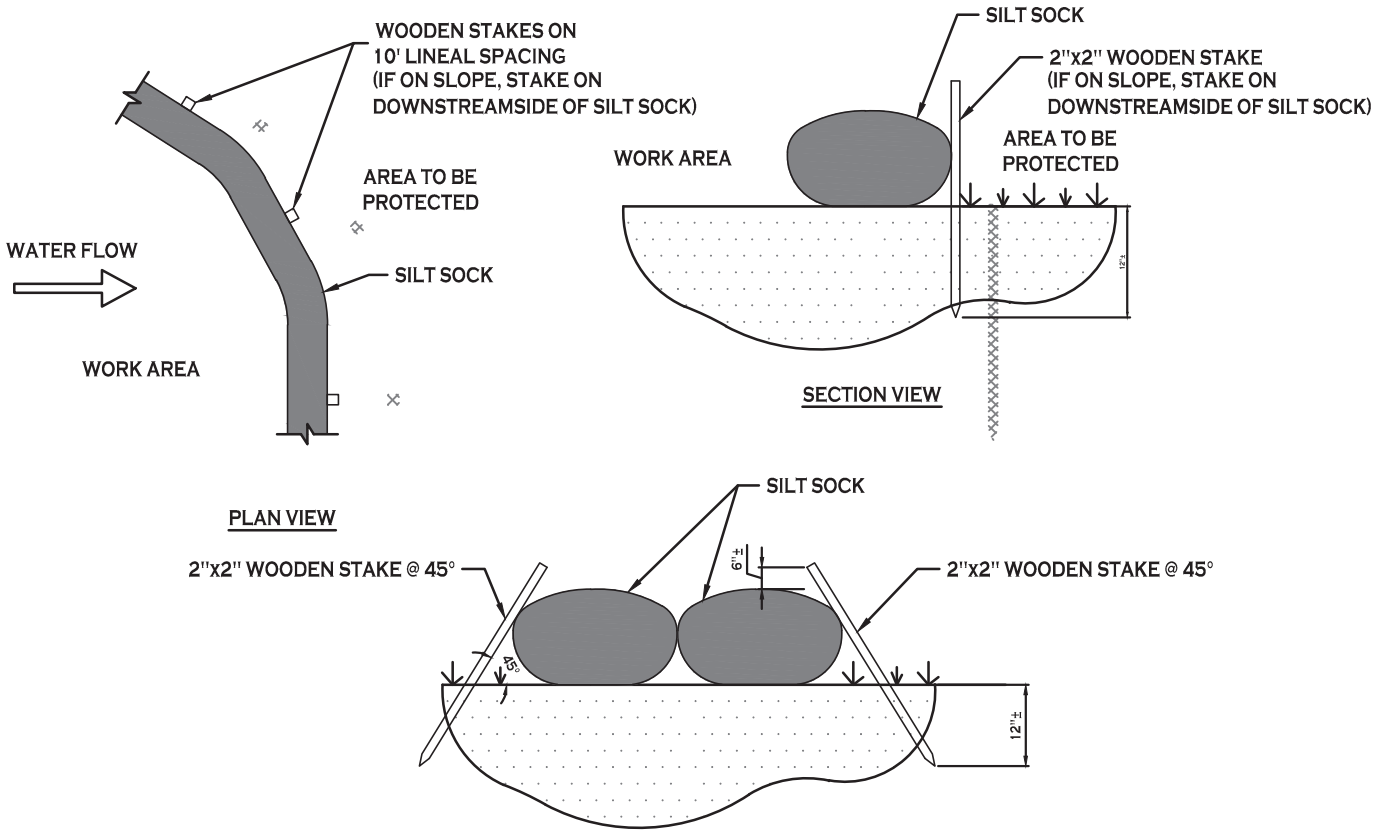
3. THICKNESS - NOT LESS THAN SIX (6) INCHES.

4. WIDTH - TWELVE (12) FOOT MINIMUM, BUT NOT LESS THAN THE FULL WIDTH AT POINTS WHERE INGRESS OR EGRESS OCCURS. TWENTY-FOUR (24) FOOT IF SINGLE ENTRANCE TO SITE.

5. FILTER CLOTH - WILL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING OF STONE.

6. SURFACE WATER - ALL SURFACE WATER FLOWING OR DIVERTED TOWARD CONSTRUCTION ENTRANCES SHALL BE PIPED ACROSS THE ENTRANCE. IF PIPING IS IMPRACTICAL, A MOUNTABLE BERM WITH 5:1 SLOPES WILL BE PERMITTED.

7. MAINTENANCE - THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY, ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACTED ONTO PUBLIC RIGHTS-OF-WAY MUST BE REMOVED IMMEDIATELY.



8. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON A AREA STABILIZED WITH STONE AND WHICH DRAINS INTO AN APPROVED SEDIMENT TRAPPING DEVICE.

9. PERIODIC INSPECTION AND NEEDED MAINTENANCE SHALL BE PROVIDED AFTER EACH RAIN.

STABILIZED CONSTRUCTION ENTRANCE DETAIL

NOT TO SCALE

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

NOTES:

CONTRACTOR SHALL INSPECT AND MAINTAIN SILT SOCK AS NEEDED DURING THE DURATION OF CONSTRUCTION PROJECT.

CONTRACTOR SHALL REMOVE SEDIMENT COLLECTED AT THE BASE OF THE SILT SOCK WHEN IT HAS REACHED $\frac{1}{2}$ OF THE EXPOSED HEIGHT OF THE SILT SOCK. ALTERNATIVELY, RATHER THAN CREATE A SOIL DISTURBING ACTIVITY, THE ENGINEER MAY CALL FOR ADDITIONAL SILT SOCK TO BE ADDED AT AREAS OF HIGH SEDIMENTATION, PLACED IMMEDIATELY ON TOP OF THE EXISTING SEDIMENT LADEN SILT SOCK.

SILT SOCK SHALL BE OVERLAPPED 12" AT JOINTS AND STAKED ON EACH SIDE OF THE SOCK AT A 45° ANGLE

SILT SOCK DETAIL

NOTICE OF TERMINATION for Storm Water Discharges Authorized under the SPDES General Permit for Construction Activity

Please indicate your permit identification number: NYR ___ ___ ___ ___ ___ ___

I. Owner or Operator Information

1. Owner/Operator Name:

2. Street Address:

3. City/State/Zip:

4. Contact Person: | 4a.Telephone:

4b. Contact Person E-Mail:

II. Project Site Information

5. Project/Site Name:

6. Street Address:

7. City/Zip:

8. County:

III. Reason for Termination

9a. □ All disturbed areas have achieved final stabilization in accordance with the general permit and SWPPP. ***Date final stabilization completed** (month/year): _____

9b. □ Permit coverage has been transferred to new owner/operator. Indicate new owner/operator's permit identification number: NYR ___ ___ ___ ___ ___ ___
(Note: Permit coverage can not be terminated by owner identified in I.1. above until new owner/operator obtains coverage under the general permit)

9c. □ Other (Explain on Page 2)

IV. Final Site Information:

10a. Did this construction activity require the development of a SWPPP that includes post-construction stormwater management practices? □ yes □ no (If no, go to question 10f.)

10b. Have all post-construction stormwater management practices included in the final SWPPP been constructed? □ yes □ no (If no, explain on Page 2)

10c. Identify the entity responsible for long-term operation and maintenance of practice(s)?

_____

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

NOTICE OF TERMINATION for Storm Water Discharges Authorized under the SPDES General Permit for Construction Activity - continued

10d. Has the entity responsible for long-term operation and maintenance been given a copy of the operation and maintenance plan required by the general permit? □ yes □ no

10e. Indicate the method used to ensure long-term operation and maintenance of the post-construction stormwater management practice(s):

□ Post-construction stormwater management practice(s) and any right-of-way(s) needed to maintain practice(s) have been deeded to the municipality.

□ Executed maintenance agreement is in place with the municipality that will maintain the post-construction stormwater management practice(s).

□ For post-construction stormwater management practices that are privately owned, a mechanism is in place that requires operation and maintenance of the practice(s) in accordance with the operation and maintenance plan, such as a deed covenant in the owner or operator's deed of record.

□ For post-construction stormwater management practices that are owned by a public or private institution (e.g. school, university or hospital), government agency or authority, or public utility; policy and procedures are in place that ensures operation and maintenance of the practice(s) in accordance with the operation and maintenance plan.

10f. Provide the total area of impervious surface (i.e. roof, pavement, concrete, gravel, etc.) constructed within the disturbance area? _____ (acres)

11. Is this project subject to the requirements of a regulated, traditional land use control MS4? □ yes □ no

(If Yes, complete section VI - "MS4 Acceptance" statement

V. Additional Information/Explanation:

(Use this section to answer questions 9c. and 10b., if applicable)

VI. MS4 Acceptance - MS4 Official (principal executive officer or ranking elected official) or Duly Authorized Representative (Note: Not required when 9b. is checked -transfer of coverage)

I have determined that it is acceptable for the owner or operator of the construction project identified in question 5 to submit the Notice of Termination at this time.

STORM WATER POLLUTION PREVENTION PLAN
CONTRACTOR'S CERTIFICATION STATEMENT

Harding Road Subdivision – Harding Road & McKinley Avenue

CONTRACTOR'S CERTIFICATION:

"I certify under penalty of law that I understand and agree to comply with the terms and conditions of the SWPPP for the construction site identified in such SWPPP as a condition of authorization to discharge storm water. I also understand that the operator must comply with the terms and conditions of the New York State Pollutant Discharge Elimination System (SPDES) general permit for storm water discharges from construction activities and that it is unlawful for any person to cause or contribute to a violation of water quality standards."

Note: The contractor shall have at least one NYSDEC trained individual onsite at all times when earthwork and other SWPPP associated work is being performed from each contractor(s) and subcontractor(s). Each contractor(s) and subcontractor(s) shall provide copies of these individuals' certifications to the Town of Amherst.

I have read or been advised of the permit conditions and believe that I understand them. I also understand that, under the terms of the permit, there may be reporting requirements. I hereby certify that this document and the corresponding documents were prepared under my direction or supervision. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I further understand that coverage under the general permit will be identified in the acknowledgment that I will receive as a result of submitting this NOI and can be as long as sixty (60) business days as provided for in the general permit. I also understand that, by submitting this NOI, I am acknowledging that the SWPPP has been developed and will be implemented as the first element of construction, and agreeing to comply with all the terms and conditions of the general permit for which this NOI is being submitted.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Section 1 - Location & Description

This project is a development of a 1.44 acre site located in between Harding Road and McKinley Avenue near Stiles Court in the Town of Amherst for a single family subdivision. Construction will consist of a public sanitary sewer and water main extension. Eight (8) lots are proposed for this subdivision, of which all will be building lots. Currently the site is a vacant large open grass area. The proposed site development area to be disturbed for this project is 1.44 acres when construction is completed.

Section 2 - Water Service

An existing 8" public PVC water main is located along the south side of Harding Road/Stiles Court that will be the source of water for this project. Approximately 294 LF of new 8" AWWA C-900 PVC water main will be installed across Harding Road/Stiles Court and then along McKinley Avenue. The proposed watermain will connect to both the existing 8" watermain along the south side of Harding Road/Stiles Court, as well as the existing 8" watermain on the west side of McKinley Avenue.

Pipe material for the new main and all fittings will be in accordance with Erie County Water Authority (ECWA) standards. Per hydrant flow test provided by ECWA, the existing static pressure in the 6" PVC water main on Bellingham Drive was approximately 46 psi and the residual pressure was 42 psi. The proposed main will be installed and tested in accordance with ECWA Standard Specifications. Inspection and certification of the installation and testing of the water samples will be done by the ECWA. There are no conflicts with existing utilities in the area, the land is currently vacant. The proposed water main will maintain physical separation from other utilities as specified per Ten States Standards.

Domestic Summary:

Peak Operating Demand:	24 gpm
Water Main:	6" PVC on Bellingham Drive
Static Pressure:	46 psi (per ECWA)

See attached water demand calculations in Appendix A for additional information.

Section 3 - Sanitary Sewer Service

Proposed is 361 lf of 8" SDR-35 PVC public sanitary that will connect to an existing manhole on Harding Road. The proposed sewer extension will run north through a sanitary sewer easement to the Town of Amherst. Each proposed building lot will wye connect to the proposed 8" sanitary sewer via a 4" SDR-35 PVC sanitary lateral at 1.0% minimum slope.

Design Parameters

4-bedroom house: 440 gal/day/house x 8 houses = 3,520 gpd

3,520 gpd * 4.34 = 15,288 gpd *use peaking factor of 4.34

The hydraulic loading rate is per "Design Standards for Intermediate Sized Wastewater Treatment Systems" 2014, NYSDEC.

Downstream sewer capacity analysis is included within the Appendix of this report.

Section 4 - Storm Sewer Service

The project area slopes towards the road and stormwater flows off site. The proposed lots will keep the same general drainage paths following construction of the homes. Swales will be installed to direct the water to the proper locations as required.

The disturbance will be greather than 1 acre but less than 5 acres and therefore the project falls under Appendix B of the NYSDEC SPDES Permit for Stormwater Discharges from Construction Activities Permit no. GP-0-20-001. Appendix B requires only an Erosion and Sediment Control plan for this project. In addition, a full SWPPP is not required, an abbreviated SWPPP has been prepared for the project, refer to that document for further detail.

Project No.: 22.010 Date: 7/7/2022
Project Name: Harding Road Subdivision
Project Address: 468 Harding Road Amherst, NY
Subject: Sanitary Sewage Calculations
Sheet: 1 of 1

Sanitary Sewage Demand Calculations:

Fair Woods Estates

440 gal/d/unit x 8 unit = 3,520 gpd *use 440 gallons per day per 4-bedroom house

Total Site Sanitary Demand: = 3,520 gpd Average

* The hydraulic loading rate is per "Design Standards for Intermediate Sized Wastewater Treatment Systems" 2014, NYSDEC.

Find Peak Sanitary Demand:

Peaking Factor based on Population:

Total demand: 3,520 gpd / 100 gpcd = 35 per capita

Population (P) = 35 people

Peaking Factor : $(18 + \sqrt{P}) / (4 + \sqrt{P})$ where P is in thousands

Peaking Factor = 4.34

Peak Sanitary Demand = 3,520 x 4.34 = 15,288 gpd
= 0.015 MGD
= 0.024 cfs

Required Infiltration and Inflow Mitigation:

Peak Sanitary Flow = 15,288 gpd = 10.62 gpm

4:1 offset flow per NYSDEC requirements = 10.62 x 4 = 42.47 gpm req'd

Mitigation Credit = $250 / gpm

Mitigation Agreement Amount = $10,616.69

Project No.: 22.010 Date: 2/3/2022
Project Name: Harding Road Subdivision
Project Address: Harding Rd & McKinley Ave Amherst, NY
Subject: Domestic Water Demand Calculations
Sheet: 1 of 1

Domestic Water Demand Calculations:

Harding Road Subdivision

Q = 3,300 gpd * use 100% of Total Sanitary Average Daily Demand

Q = 2.29 gpm * assume 24 hour day

Harding Road Subdivision

Q_{peak} = 10 Units @ 3 gpm = 30 gpm Peak Demand
* use 3 gpm per unit (per ECDOH peak flow)

Headlosses:

Q_{peak} = 30 gpm
Pipe = 8 inch C-900 PVC C = 140
Length = 535 LF (approx. distance from HYD L08-B17 to L08-B09)

$$H_L = \frac{10.44\ L\ Q^{1.85}}{C^{1.85}\ D^{4.866}} = \frac{10.44(1450)(57)^{1.85}}{(140)^{1.85}\ (8)^{4.866}} = 0.01 \text{ ft} = 0.01 \text{ psi}$$

Δ elev = 2 ft = 0.87 psi *approximate 2.0' elev. increase from HYD L08-B17 to L08-B09
Total Losses = 0.9 psi
Static Pressure = 46 psi *per ECWA
Residual Pressure in main near HYD L08-B09 = 46 - 0.9 = 45.1 psi

July 2022

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Project Description

This project is a development of a 1.4 acre +/- site located between Harding Road and McKinley Avenue in the Town of Amherst. The property will be subdivided to accommodate for 10 single family home lots to be built at a later date. Currently the site exists as an undeveloped, open grass area.

370 lf of 8" SDR-35 PVC public sewer main extension is proposed for this development. The sewer will run along the rear center of the lots through a 10' wide easement to the Town of Amherst, and then cross Harding Road to connect to an existing sanitary manhole on the south side of Harding Road. The existing 8" PVC sewer on Harding Road flows north.

Node 1 – 389 Harding Road (8"):

Existing Peak Flow measured (wet weather event)	= 0.050 cfs (0.032 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 0.074 cfs
Existing Peak Flow measured (wet weather event)	= 0.333 cfs (0.215 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 0.357 cfs

Theoretical capacity of existing 8" PVC pipe @ 0.25% = 0.872 cfs

Conclusion: The proposed peak flow is less than the capacity of the 8" PVC pipe, therefore there is sufficient capacity. At no time during the monitoring did the flow depth exceed the pipe diameter at Node 1 of the downstream monitoring points during the rain events monitored.

Node 2 – Youngs Road (18"):

Existing Peak Flow measured (wet weather event)	= 5.534 cfs (3.577 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 5.558 cfs

Theoretical capacity of existing 18" PVC pipe @ 0.17% = 6.251 cfs

Conclusion: The proposed peak flow is less than the capacity of the 18" PVC pipe, therefore there is sufficient capacity. At no time during the monitoring did the flow depth exceed the pipe diameter at Node 1 of the downstream monitoring points during the rain events monitored.

Node 3 – Peanut Line (66"):

Existing Peak Flow	= 56.474 cfs (36.50 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 56.498 cfs

Theoretical capacity of existing 66" pipe = 88.811 cfs (57.40 mgd)

Conclusion: The proposed peak flow is less than the capacity of the 66" pipe, therefore there is sufficient capacity.

Subject: Sanitary Sewage Calculations
Sheet: 1 of 1

Sanitary Sewage Demand Calculations:

Fair Woods Estates

440 gal/d/unit x 8 unit = 3,520 gpd *use 440 gallons per day per 4-bedroom house

Total Site Sanitary Demand: = 3,520 gpd Average

* The hydraulic loading rate is per "Design Standards for Intermediate Sized Wastewater Treatment Systems" 2014, NYSDEC.

Find Peak Sanitary Demand:

Peaking Factor based on Population:

Total demand: 3,520 gpd / 100 gpcd = 35 per capita

Population (P) = 35 people

Peaking Factor : $(18 + \sqrt{P}) / (4 + \sqrt{P})$ where P is in thousands

Peaking Factor = 4.34

Peak Sanitary Demand = 3,520 x 4.34 = 15,288 gpd
= 0.015 MGD
= 0.024 cfs

Required Infiltration and Inflow Mitigation:

Peak Sanitary Flow = 15,288 gpd = 10.62 gpm

4:1 offset flow per NYSDEC requirements = 10.62 x 4 = 42.47 gpm req'd

Mitigation Credit = $250 / gpm

Mitigation Agreement Amount = $10,616.69

SANITARY SEWER FLOW CAPACITY STUDY – Summary Review

Prepared For: 468 Harding Capacity Analysis

R. Christopher Wood, PE
487 Main Street, Suite 500
Buffalo, New York 14203

Project Name: 468 Harding Capacity Analysis

Flow Monitoring Period: February 14, 2022 to March 15, 2022

Rain Events (> 0.5-inches) Monitored: February 17 (1.28”), and February 22 (0.77”)

Number of Monitoring Nodes: Two (2) downstream manholes

Node Locations and Descriptions:

- Node 1 118 Garfield St (8")
- Node 2 Youngs Rd 18in (18")

Summary Conclusion:

Based on the data presented in this report, specifically the flow depth measurements recorded (see graphs below)

- At no time did the flow depth exceed pipe diameter at any of the downstream monitoring points during the wet weather events monitored.
- At no time during the monitoring period did the flow at any point slow or stall which would have caused a backup or flooding at the manhole.

Tel: 716-462-0382
Fax: 716-687-1418

Depth of Flow Capacity Summary:

Depth of flow capacity is based on diameter of pipe. See graphs below.

- At no time during the monitoring period did depth of flow exceed pipe diameter at Node 1.

468 Harding Road Geotechnical Report & Soil Borings

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

RAY M. TEETER, P.E.
CONSULTING GEOTECHNICAL ENGINEER

October 17, 2005

Bill Arlow
Grabber & Sons
3242 Harlem Road
Cheektowaga, New York 14225

Subject: Proposed Single-Family Residential Structure
Lot 3, Bore Hole 1-05
468 Harding Road
Town of Amherst, Erie County, New York
Earth Dimensions Project Number 17I05
RMT-11369

Mr. Arlow:

This letter presents geotechnical engineering recommendations and comments regarding the project identified above. All information regarding the site and proposed construction was provided to me by others.

SUBSURFACE EXPLORATION AND CONDITIONS

One subsurface exploration, identified as Bore Hole 1-05, was performed by Earth Dimensions, Inc. on October 6, 2005. The log of that boring will be sent to you directly by Earth Dimensions, Inc.

Rock was encountered less than 3 feet below the ground surface.

It should be noted that short-term observations may not be representative of actual groundwater levels (particularly in fine-grained, low-permeability soils), and that groundwater levels will vary with factors including location, time, precipitation, season, and site activities.

DESIGN AND CONSTRUCTION

General

The site is generally suitable for conventional design and construction. As noted above, however, rock was encountered less than 3 feet below the ground surface.

P.O. BOX 316
CANANDAIGUA, NY 14424

PHONE 585-393-4762
FAX 585-393-4984

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

All design and construction should satisfy the requirements of all applicable codes. The Town of Amherst has specific requirements, including those for reinforcing bars in footings and walls.

The contractor should comply with all applicable requirements, including OSHA; excavate, dewater, backfill, and grade as necessary; protect existing structures and utilities; provide temporary support as necessary; and provide qualified personnel to perform and supervise the work.

Seismic Considerations

With regard to the Building Code of New York State, a Site Class of "B" should be applied to this project. This corresponds to a "Rock" profile.

Spread Footing Foundations

The columns and walls of the proposed structure can be supported by conventional shallow spread footing foundations. All of the following requirements should be satisfied:

- No loose, soft, wet, frozen, organic, unnatural, or otherwise unsuitable material should be left in place below a footing.
- Footings should bear on rock.
- Footings should be designed for a bearing pressure not exceeding 10,000 pounds per square foot, or a footing width of at least 12 inches, whichever results in the wider footing.
- Footings should be seated at least 42 inches below the lowest adjacent surface exposed to freezing temperatures.
- Foundation walls should consist of reinforced concrete.

Floor Slabs

Conventional slab-on-grade floor construction is feasible. No loose, soft, wet, frozen, organic, or otherwise unsuitable materials should be left in place below a floor slab.

Drained, unsaturated conditions should be maintained within the granular material below floor slabs. A vapor barrier could be provided if desired.

Basement Walls

Basement walls should be designed in accordance with applicable code requirements, in consideration of the materials that will be used for backfill. As noted above, the walls should consist of reinforced concrete. The Town of Amherst has specific requirements, including those for reinforcing bars in walls. Drained, unsaturated conditions should be maintained within the backfill.

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

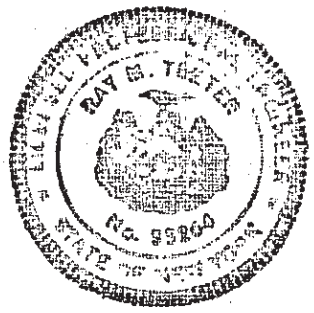
Additional Comments on Subsurface Drainage and Waterproofing

In preceding sections of this letter, recommendations were provided regarding the maintenance of drained, unsaturated conditions beneath floor slabs and within the backfill along basement walls. If these drained, unsaturated conditions are maintained, a waterproofing membrane will not be necessary.

Site Grading

The final grading should be such that surface waters are conducted away from structures and paved areas.

CLOSING COMMENTS AND RECOMMENDATIONS



Professional services were performed in accordance with generally accepted geotechnical engineering practices, exclusively for the subject project. No other warranty, expressed or implied, is made.

Conditions between, beyond, and below explorations are likely to vary. It should also be noted that subsurface conditions are often described on the basis of visual examinations of recovered samples, and that these visual descriptions may not always agree well with descriptions made on the basis of laboratory tests. If subsurface conditions are subsequently revealed that appear to be significantly different or less favorable than those described, I should be given the opportunity to revise the statements in this letter.

It has been a pleasure assisting you. If you have questions or comments regarding this letter, please contact me.

Yours truly,

RAY M. TEETER, P.E.

Cheektowaga, New York 14225

Subject: Proposed Four-Lot Subdivision
468 Harding Road
Town of Amherst, Erie County, New York
Earth Dimensions Project Number 17I05
RMT-11369

Mr. Arlow:

This letter presents preliminary geotechnical engineering comments regarding the project identified above. All information regarding the site and proposed construction was provided to me by others.

This letter addresses the general geotechnical feasibility of the four-lot project. A separate letter (also dated October 17, 2005) provides comments and recommendations specifically for Lot 3.

SUBSURFACE EXPLORATION AND CONDITIONS

One subsurface exploration, identified as Bore Hole 1-05, was performed by Earth Dimensions, Inc. on October 6, 2005. The log of that boring will be sent to you directly by Earth Dimensions, Inc.

Rock was encountered less than 3 feet below the ground surface.

It should be noted that short-term observations may not be representative of actual groundwater levels (particularly in fine-grained, low-permeability soils), and that groundwater levels will vary with factors including location, time, precipitation, season, and site activities.

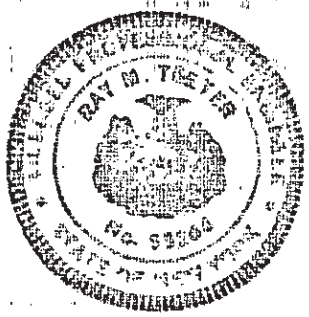
CANANDAIGUA, NY 14424

PHONE 585-393-4762
FAX 585-393-4984

GEOTECHNICAL FEASIBILITY

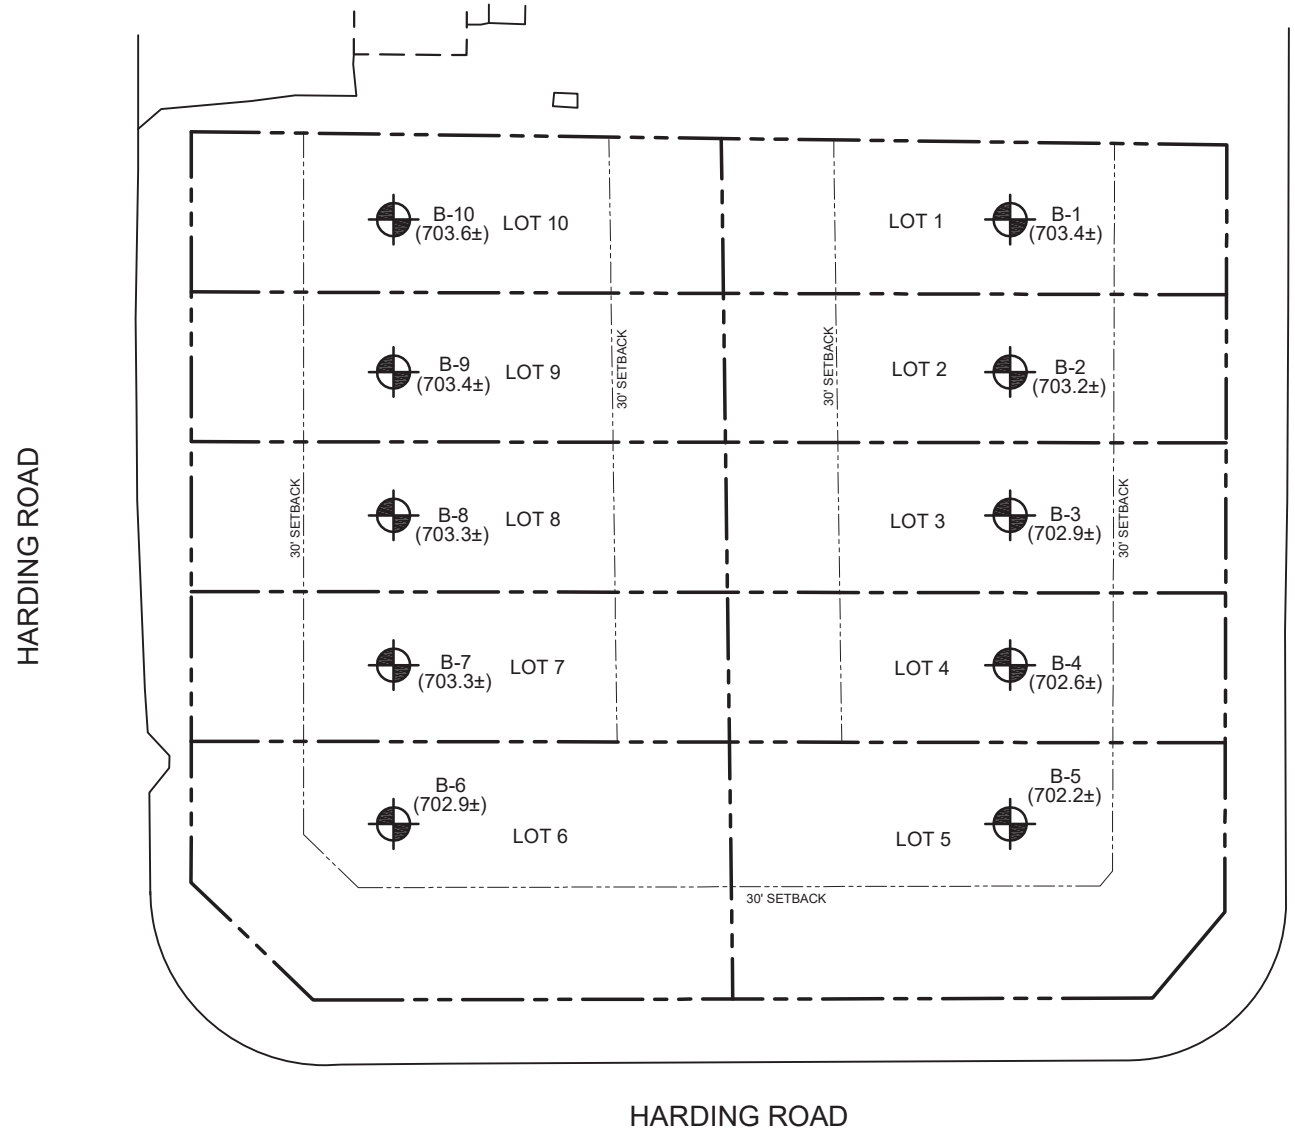
Based on the information available, it is my opinion that the four-lot subdivision is geotechnically feasible.

The Town of Amherst will require individual test borings for each structure proposed. It appears likely, however, that the recommendations will be similar to those made for Lot 3.



* * *

Professional services were performed in accordance with generally accepted geotechnical engineering practices, exclusively for the subject project. No other warranty, expressed or implied, is made.



It has been a pleasure assisting you. If you have questions or comments regarding this letter, please contact me.

Yours truly,

RAY M. TEETER, P.E.

PROJECT:

EXAMPLE

DRILLER:
SAMPLING METHODS:
DATE STARTED:
DATE COMPLETED:

TYPE OF DRILL RIG:
SIZE AND TYPE OF BIT:
SURFACE ELEVATION (ft.):
GROUNDWATER DEPTH (ft.):
(measured at completion unless indicated below)

Elevation/ Depth (feet)	Soil Symbols Sampler Symbols Field Test Data	Sample No. : Range	N-Value	% REC (RQD)	Soil and Rock Description / Remarks
100 — 0	1 1 1 2 / 6 8 11 14	S-1 : 0.0'- 2.0'	2	50	Dk. brown, soft, CLAY, some Silt, little f. Sand, tr. Gravel, tr. Roots, tr. Organic matter, mod. plastic, wet (CL)
		S-2 : 2.0'- 4.0'	19	50	Brown, m. dense f. SAND, some Silt, tr. Gravel, tr. Clay, tr. Roots, non-plastic, moist (SM)

Elevation/Depth: The depth column provides the vertical scale of the boring log in feet below ground surface.

Sample No. : Range: Disturbed samples are identified with “S” preceding the sample number. Undisturbed (Shelby-tube) samples are identified with “U” preceding the sample number. Rock core samples identified with “C” preceding the core run. The range of elevation/depth where the sample was taken is identified in one-tenth foot increments.

N-value: The Standard Penetration Test N-value, as specified by ASTM D1586, is defined as the number of blows required by a 140-pound hammer falling 30 inches, each blow, to drive a 2-in outside diameter split-spoon sampler 12 inches.

% REC (RQD): “Percent Recovery” is the length of samples recovered divided by the total length sampled. The result is numerically expressed as a percent. The Rock Quality Designation (RQD) is the total length of places >4 inches divided by the total length of core run.

Soil and Rock Description / Remarks: This column denotes the exact depth of recovery and general documentation of drilling efforts. Description and classification are based on visual inspection of samples and boring operations. The stratum lines shown on the boring logs are based upon interpretation and may not represent precise subsurface conditions. Water-level readings have been made in the drill holes at time under conditions stated on the boring logs. Fluctuations in the water level may occur due to other factors than those present the time measurement was taken. See attached sheet.

Soil and Rock Description / Remarks: Terminology Used for Soil Description

Density Description of Granular Soil

Number of Blows per ft., N	*Relative Density*
0 - 4	Very Loose
4 - 10	Loose
10 - 30	Medium
30 - 50	Dense
Over 50	Very Dense

Abbreviations Used in Soil Sample Classification

f - fine	v - very
m - medium	gr - gray
c - coarse	bn - brown
f/m - fine to medium	yel - yellow
f/c - fine to coarse	sl - slight
tr - trace	dk - dark

Consistency Description of Cohesive Soil

Number of Blows per ft., N	*Consistency*
Below 2	Very Soft
2 - 4	Soft
4 - 8	Medium
8 - 15	Stiff
15 - 30	Very Stiff
Over 30	Hard

Bedding

Parting	Less than 0.02 ft.
Band	0.02 - 0.2 ft.
Thin bed	0.2 - 0.5 ft.
Medium bed	0.5 - 1.0 ft.
Thick bed	1.0 - 2.0 ft.
Massive	Over 2.0 ft.

Grain Size

	Passing / Retained on
Boulder	LARGE / 12-in sieve
Cobble	12-in / 3-in sieve
Gravel	3-in sieve / No. 4 sieve
	No. 4 sieve / No. 10 sieve
Sand	No. 10 sieve / No. 40 sieve
	No. 40 sieve / No. 200 sieve
Silt	No. 200 sieve / 0.005 mm sieve
Clay	Smaller than 0.005 mm

Hardness

Very Soft or Plastic	Can be indented with thumb
Soft	Can be scratched with fingernail
Moderately Hard	Can be scratched with knife
Hard	Difficulty to scratch with knife
Very hard	Cannot be scratched with knife

Percentage Terminology Used in Soil Classification

Trace	0 - 10 %	Some	20 - 35 %
Little	10 - 20 %	And	35 - 50 %

Moisture

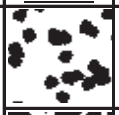
Dry	Absence of moisture, dusty, dry to the touch.
Moisture	Small quantity of moisture. Soil usually above groundwater level.
Wet	Moisture noticeable to the touch. Soil may be below groundwater level.
Saturated	Visible free water, usually soil is below groundwater level.

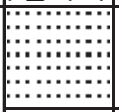
Plasticity

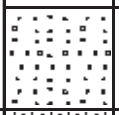
Non-plastic	An 1/8-in thread cannot be rolled at any water content.
Slight plasticity	Thread can be barley rolled.
Moderate plasticity	Thread is easy to roll and little time is required to reach the plastic limit (PL).
Plasticity	Considerable time is required to reach PL. Thread can be re-rolled several times after reaching the PL.

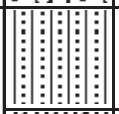
Crystallinity or Texture

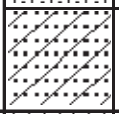
Dense	Crystals are to small they cannot be distinguished with the naked eye.
Very Fine Crystalline	Crystals barely discernable with the naked eye.
Crystalline	Crystals are medium size, up to 1/8-in diameter.
Very Coarsely Crystalline	Crystals larger than 1/8-in diameter.

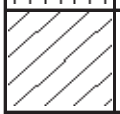


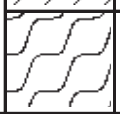


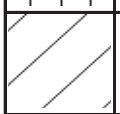


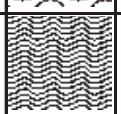


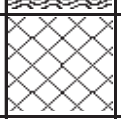












Voids

Porous	Smaller than pinhead. Their presence is indicated by the degree of absorbency.
Pitted	Pinhead size to 1/4 in. If thin walls separate the individuals pits, the core may be described as honeycomb.
Vug	1/4 inch to the diameter of the core. The upper limit will vary with core size.
Cavity	Larger than the diameter of the core.

Soil Classification Chart: Unified Soil Classification System (USCS)

Major Divisions			Pattern	USCS ID	Typical Descriptions
Coarse-Grained Soils: More than 50% of material larger than No. 200 sieve	**Gravels**: More than 50% of coarse fraction larger than No. 4 sieve	Clean Gravels (little or no fines)		GW	Well-graded gravels, gravel-sand mixtures, little or no fines
				GP	Poorly-graded gravels, gravel-sand mixtures, little or no fines
		Gravels with appreciable amounts of fines		GM	Silty gravels, gravel-sand-silt mixtures
				GC	Clayey gravels, gravel-sand-silt mixtures
	Sands: Less than 50% of coarse fraction larger than No. 4 sieve	Clean sands (little or no fines)		SW	Well-graded sands, gravelly sands, little or no fines
				SP	Poorly-graded sands, gravelly sands, little or no fines
		Sand with appreciable amount of fines		SM	Silty sands, silt-sand mixtures
				SC	Clayey sands, sand-clay mixtures
Fine-Grained Soils: Less than 50% of material larger than No. 200 sieve	**Silts and Clays, Low plasticity**: Liquid Limit < 50%			ML	Inorganic silts and very fine sands, rock flour, silty or clayey fine sands or clayey silts with slight plasticity
				CL	Inorganic clays of low to medium plasticity, gravely clays, sandy clays, silty clays, lean clays
				OL	Organic silts and organic silty clays of low plasticity
	Silts and Clays, High plasticity: Liquid Limit > 50%			MH	Inorganic silts, micaceous or diatomaceous fine sand or silty soils
				CH	Inorganic clays of high plasticity, fat clays
				OH	Organic clays of medium to high plasticity, organic silts
Highly Organic Soils				Pt	Peat, humus, swamp soils with organic contents
Miscellaneous Fill				FILL	Miscellaneous fill may belong in any division but is identified as FILL

July 2022

Attachment: SUB-2022-01PP_application_092222 (26194 : Sub-2022-01PP)

Project Description

This project is a development of a 1.4 acre +/- site located between Harding Road and McKinley Avenue in the Town of Amherst. The property will be subdivided to accommodate for 10 single family home lots to be built at a later date. Currently the site exists as an undeveloped, open grass area.

370 lf of 8" SDR-35 PVC public sewer main extension is proposed for this development. The sewer will run along the rear center of the lots through a 10' wide easement to the Town of Amherst, and then cross Harding Road to connect to an existing sanitary manhole on the south side of Harding Road. The existing 8" PVC sewer on Harding Road flows north.

Node 1 – 389 Harding Road (8"):

Existing Peak Flow measured (wet weather event)	= 0.050 cfs (0.032 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 0.074 cfs
Existing Peak Flow measured (wet weather event)	= 0.333 cfs (0.215 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 0.357 cfs

Theoretical capacity of existing 8" PVC pipe @ 0.25% = 0.872 cfs

Conclusion: The proposed peak flow is less than the capacity of the 8" PVC pipe, therefore there is sufficient capacity. At no time during the monitoring did the flow depth exceed the pipe diameter at Node 1 of the downstream monitoring points during the rain events monitored.

Node 2 – Youngs Road (18"):

Existing Peak Flow measured (wet weather event)	= 5.534 cfs (3.577 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 5.558 cfs

Theoretical capacity of existing 18" PVC pipe @ 0.17% = 6.251 cfs

Conclusion: The proposed peak flow is less than the capacity of the 18" PVC pipe, therefore there is sufficient capacity. At no time during the monitoring did the flow depth exceed the pipe diameter at Node 1 of the downstream monitoring points during the rain events monitored.

Node 3 – Peanut Line (66"):

Existing Peak Flow	= 56.474 cfs (36.50 mgd)*
Proposed Harding Rd Subdivision Peak Flow	= 0.024 cfs**
Proposed Total Peak Flow	= 56.498 cfs

Theoretical capacity of existing 66" pipe = 88.811 cfs (57.40 mgd)

Conclusion: The proposed peak flow is less than the capacity of the 66" pipe, therefore there is sufficient capacity.

Foot Notes:

Pipe slopes, sizes and materials provided by Town of Amherst

CARMINA WOOD DESIGN
487 MAIN STREET, SUITE 500
BUFFALO, NEW YORK, 14203
(716) 842-3165
FAX (716) 842-0263

Project No.: 22.010 Date: 7/7/2022
Project Name: Harding Road Subdivision
Project Address: 468 Harding Road Amherst, NY
Subject: Sanitary Sewage Calculations
Sheet: 1 of 1

Sanitary Sewage Demand Calculations:

Fair Woods Estates

440 gal/d/unit x 8 unit = 3,520 gpd *use 440 gallons per day per 4-bedroom house

Total Site Sanitary Demand: = 3,520 gpd Average

* The hydraulic loading rate is per "Design Standards for Intermediate Sized Wastewater Treatment Systems" 2014, NYSDEC.

Find Peak Sanitary Demand:

Peaking Factor based on Population:

Total demand: 3,520 gpd / 100 gpcd = 35 per capita

Population (P) = 35 people

Peaking Factor : $(18 + \sqrt{P}) / (4 + \sqrt{P})$ where P is in thousands

Peaking Factor = 4.34

Peak Sanitary Demand = 3,520 x 4.34 = 15,288 gpd
= 0.015 MGD
= 0.024 cfs

Required Infiltration and Inflow Mitigation:

Peak Sanitary Flow = 15,288 gpd = 10.62 gpm

4:1 offset flow per NYSDEC requirements = 10.62 x 4 = 42.47 gpm req'd

Mitigation Credit = $250 / gpm

Mitigation Agreement Amount = $10,616.69

SANITARY SEWER FLOW CAPACITY STUDY – Summary Review

Prepared For: 468 Harding Capacity Analysis

R. Christopher Wood, PE
487 Main Street, Suite 500
Buffalo, New York 14203

Project Name: 468 Harding Capacity Analysis

Flow Monitoring Period: February 14, 2022 to March 15, 2022

Rain Events (> 0.5-inches) Monitored: February 17 (1.28”), and February 22 (0.77”)

Number of Monitoring Nodes: Two (2) downstream manholes

Node Locations and Descriptions:

- Node 1 118 Garfield St (8")
- Node 2 Youngs Rd 18in (18")

Summary Conclusion:

Based on the data presented in this report, specifically the flow depth measurements recorded (see graphs below)

- At no time did the flow depth exceed pipe diameter at any of the downstream monitoring points during the wet weather events monitored.
- At no time during the monitoring period did the flow at any point slow or stall which would have caused a backup or flooding at the manhole.

Depth of Flow Capacity Summary:

Depth of flow capacity is based on diameter of pipe. See graphs below.

- At no time during the monitoring period did depth of flow exceed pipe diameter at Node 1.

Downstream Sewer Capacity Analysis

- The Application for Approval (Form BSP-5) must be signed by an authorized Amherst Town Official.
- Please include correspondence from Amherst (T) regarding their acceptance of the peak and average design flows from the project, a description of the sewer route, and the Town's requirements for I/I Mitigation/Offset-Work necessary for the new project to tie-in.
- Documentation that all SEQRA requirements have been satisfied must be included in the submittal.
- The Erie County Health Department may have additional comments on this project.

NEW YORK STATE OF OPPORTUNITY. | Parks, Recreation, and Historic Preservation

KATHY HOCHUL
Governor

ERIK KULLESEID
Commissioner

August 23, 2022

Rami Herzellah
Carmina Wood Design
487 Main Street
Suite 500
Buffalo, NY 14203

Re: DEC
Harding Road Subdivision
468 Harding Rd, Buffalo, NY 14221
22PR05540

Dear Rami Herzellah:

Thank you for requesting the comments of the Office of Parks, Recreation and Historic Preservation (OPRHP). We have reviewed the project in accordance with the New York State Historic Preservation Act of 1980 (Section 14.09 of the New York Parks, Recreation and Historic Preservation Law). These comments are those of the OPRHP and relate only to Historic/Cultural resources. They do not include potential environmental impacts to New York State Parkland that may be involved in or near your project. Such impacts must be considered as part of the environmental review of the project pursuant to the State Environmental Quality Review Act (New York Environmental Conservation Law Article 8) and its implementing regulations (6 NYCRR Part 617).

Based upon this review, it is the opinion of OPRHP that no properties, including archaeological and/or historic resources, listed in or eligible for the New York State and National Registers of Historic Places will be impacted by this project.

If further correspondence is required regarding this project, please be sure to refer to the OPRHP Project Review (PR) number noted above.

Sincerely,

R. Daniel Mackay

Deputy Commissioner for Historic Preservation
Division for Historic Preservation

Demolition & Erosion Control Plan

SCALE: 1"=20'

EROSION CONTROL NOTES

THE FOLLOWING EROSION CONTROL PROCEDURES SHALL BE ADHERED TO BY THE CONTRACTOR:

1. INSTALL TEMPORARY SILT SOCK BARRIERS AS DIRECTED BY THE OWNER AND AT ALL EXISTING STORMWATER CATCH BASINS WITHIN THE WORK AREA TO PREVENT SEDIMENT MIGRATION. ALL SILT SOCK BARRIERS SHALL BE INSTALLED IN ACCORDANCE WITH THE DETAILS SHOWN ON THE PLANS.
2. TOPSOIL SHALL BE STRIPPED AND STOCKPILED ON SITE FOR RE-USE AS DIRECTED BY THE OWNER. ALL LOCAL ORDINANCES REGARDING THE SALE OF TOPSOIL MUST BE FOLLOWED. TOPSOIL MAY NOT BE REMOVED WITHOUT A PERMIT.
3. ALL SILT SOCK BARRIERS SHALL BE REPLACED WHEREVER THEY BECOME CLOGGED OR INOPERABLE.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTENANCE AND REMOVAL OF TEMPORARY SEDIMENTATION CONTROLS.
5. THE CONTRACTOR MUST CONTROL DUST DURING CONSTRUCTION. DURING EARTHWORK OPERATIONS, WATER-SPREADING EQUIPMENT SHALL BE PROVIDED BY THE CONTRACTOR, AND SPREAD WATER AS NECESSARY AND AS DIRECTED BY THE OWNER IN ORDER TO CONTROL DUST.
6. DIRT OR DEBRIS LEFT ON LOCAL PUBLIC ROADS AS A RESULT OF THIS CONSTRUCTION PROJECT SHALL BE REMOVED AND ROAD SURFACES CLEANED BY THE CONTRACTOR ON A DAILY BASIS.
7. ALL DISTURBED AREAS (EXCEPT AREAS TO BE PAVED OR BUILT UPON) SHALL BE TOPSOILED TO A MINIMUM 4" DEPTH AND SEEDED IMMEDIATELY AFTER FINE GRADING TAKES PLACE AND AS SOON AS PHYSICALLY POSSIBLE.
8. THE CONTRACTOR IS RESPONSIBLE FOR THE MAINTENANCE OF DOWNSTREAM STORM SEWERS, DITCHES, AND CULVERTS. SILT BUILDUP FOUND TO BE A RESULT OF THIS SITE CONSTRUCTION WORK SHALL BE REMOVED FROM DOWNSTREAM CULVERTS BY THE CONTRACTOR AT NO ADDITIONAL EXPENSE TO THE OWNER OR THE TOWN/CITY.
9. ALL SOIL EROSION AND SEDIMENT CONTROL DEVICES AND MATERIALS SHALL BE IN PLACE PRIOR TO BEGINNING EARTHWORK OPERATIONS AND SHALL BE MAINTAINED UNTIL THE NEW SLOPES ARE STABILIZED WITH SEEDING AND/OR SLOPE PROTECTION, AS DIRECTED BY THE ENGINEER.
10. INSTALL TEMPORARY SILT SOCK AROUND THE BASE OF STOCKPILES.

DEMOLITION NOTES:

1. CONTRACTOR SHALL TAKE PRECAUTIONS TO PROTECT THOSE ITEMS TO REMAIN, SUCH AS TREES, PROPERTY CORNER PINS, UTILITY POLES, VALVES, HYDRANTS, CURBS, MANHOLES AND CATCH BASINS.
2. TEMPORARY SILT SOCK AND STRAW BALES TO BE INSTALLED AS DIRECTED BY THE OWNERS FIELD REPRESENTATIVE. MAINTAIN UNTIL VEGETATION IS ESTABLISHED AND PAVEMENT IS INSTALLED.
3. CONTRACTOR SHALL INSTALL STABILIZED CONSTRUCTION ENTRANCES WHERE ACCESSING THE SITE FROM PAVED ROADWAYS. STORM DRAINAGE INLETS THAT INTERFERE WITH CONSTRUCTION ENTRANCE TO BE PROTECTED WITH SILT SACK AND OTHER PROPER TEMPORARY INLET PROTECTION MEASURES.
4. CONTRACTOR SHALL INSTALL TEMPORARY TRAFFIC CONTROL DEVICES IN ACCORDANCE WITH NYS M.U.T.C.D. STANDARDS PRIOR TO STARTING WORK.
5. COVERED DUMPSTERS SHALL BE PROVIDED ONSITE AS REQUIRED FOR CONSTRUCTION WASTE.
6. CONTRACTOR TO PROTECT ALL TREES/BRUSH NOT DISTURBED BY CONSTRUCTION ACTIVITY.

CONSTRUCTION SEQUENCE OF MAJOR ACTIVITIES:

1. CONSTRUCT TEMPORARY CONSTRUCTION EXIT, INSTALL PERIMETER SILT SOCK AND DRAINAGE INLET PROTECTION.
2. CLEAR AND GRUB SITE.
3. COMMENCE SITE GRADING.
4. INSTALL PROPOSED UTILITIES.
5. PREPARE PAVEMENT SUBGRADE.
6. INSTALL PAVEMENT.
7. CARRY OUT FINAL GRADING.
8. REMOVE SILT FENCE/SILT SOCK AND CONSTRUCTION ENTRANCES.
9. CLEAN SITE.

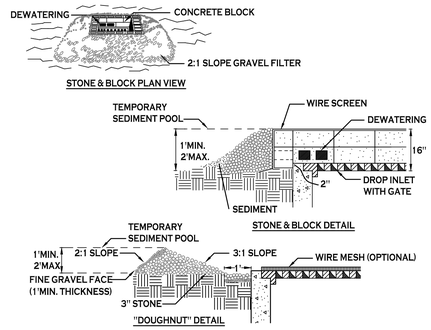
CONSTRUCTION SPECIFICATIONS

1. CLEAR THE AREA OF ALL DEBRIS THAT WILL HINDER EXCAVATION.
2. GRADE APPROACH TO THE INLET UNIFORMLY AROUND THE BASIN.
3. WEEP HOLES SHALL BE PROTECTED BY GRAVEL.
4. UPON STABILIZATION OF CONTRIBUTING DRAINAGE AREA, SEAL WEEP HOLES, FILL BASIN WITH STABLE SOIL TO FINAL GRADE, COMPACT IT PROPERLY AND STABILIZE WITH PERMANENT SEEDING.

MAXIMUM DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 1

NOT TO SCALE



CONSTRUCTION SPECIFICATIONS

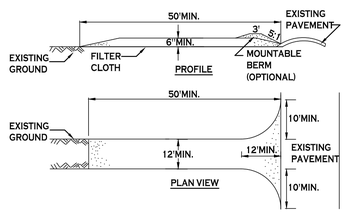
1. FILTER FABRIC SHALL HAVE AN EOS OF 40-85. BURLAP MAY BE USED FOR SHORT TERM APPLICATIONS.
2. CUT FABRIC FROM A CONTINUOUS ROLL TO ELIMINATE JOINTS. IF JOINTS ARE NEEDED THEY WILL BE OVERLAPPED TO THE NEXT STAKE.
3. STAKE MATERIALS WILL BE STANDARD 2" x 4" WOOD OR EQUIVALENT. METAL WITH A MINIMUM LENGTH OF 3 FEET.
4. SPACE STAKES EVENLY AROUND INLET 3 FEET APART AND DRIVE A MINIMUM 18 INCHES DEEP. SPANS GREATER THAN 3 FEET MAY BE BRIDGED WITH THE USE OF WIRE MESH BEHIND THE FILTER FABRIC FOR SUPPORT.
5. FABRIC SHALL BE EMBEDDED 1 FOOT MINIMUM BELOW GROUND AND BACKFILLED. IT SHALL BE SECURELY FASTENED TO THE STAKES AND FRAME.
6. A 2" x 4" WOOD FRAME SHALL BE COMPLETED AROUND THE CREST OF THE FABRIC FOR OVER FLOW STABILITY.

MAXIMUN DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 2

NOT TO SCALE

CONSTRUCTION SPECIFICATIONS



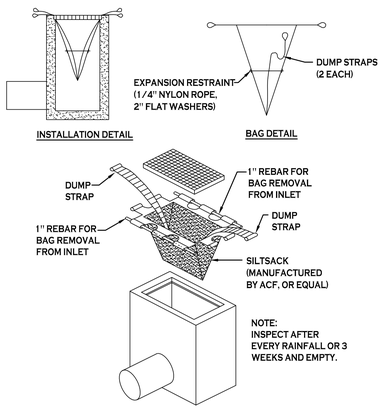
1. LAY ONE BLOCK ON EACH SIDE OF THE STRUCTURE ON ITS SIDE FOR DEWATERING. FOUNDATION SHALL BE 2 INCHES MINIMUM BELOW REST OF INLET AND BLOCKS SHALL BE PLACED AGAINST INLET FOR SUPPORT.
2. HARDWARE CLOTH OR 1/2" WIRE MESH SHALL BE PLACED OVER BLOCK OPENINGS TO SUPPORT STONE.
3. USE CLEAN STONE OR GRAVEL 1/2-3/4 INCH IN DIAMETER PLACED 2 INCHES BELOW TOP OF THE BLOCK ON A 2:1 SLOPE OR FLATTER.
4. FOR STONE STRUCTURES ONLY, A 1 FOOT THICK LAYER OF THE FILTER STONE WILL BE PLACED AGAINST THE 3 INCH STONE AS SHOWN ON THE DRAWINGS.

MAXIMUM DRAINAGE AREA 1 ACRE

INLET PROTECTION DETAIL 3

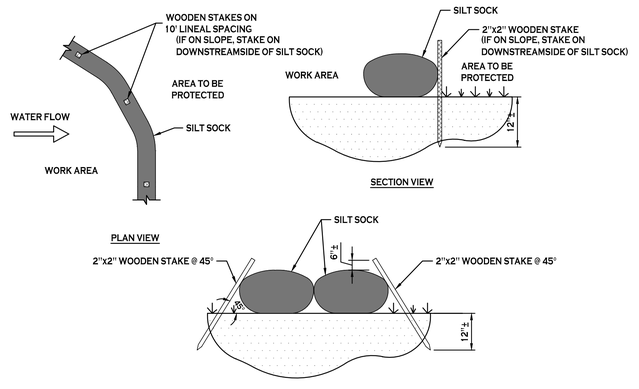
NOT TO SCALE

NOTE: INSTALL ONE OF THE INLET PROTECTION OPTIONS SHOWN PRIOR TO CONSTRUCTION



CONSTRUCTION SPECIFICATIONS

1. STONE SIZE - USE 2" STONE, OR RECLAIMED OR RECYCLED CONCRETE EQUIVALENT.
2. LENGTH - NOT LESS THAN 50 FEET (EXCEPT ON A SINGLE RESIDENCE LOT WHERE A 30 FOOT MINIMUM LENGTH WOULD APPLY).
3. THICKNESS - NOT LESS THAN SIX (6) INCHES.
4. WIDTH - TWELVE (12) FOOT MINIMUM, BUT NOT LESS THAN THE FULL WIDTH AT POINTS WHERE INGRESS OR EGRESS OCCURS. TWENTY-FOUR (24) FOOT IF SINGLE ENTRANCE TO SITE.
5. FILTER CLOTH - WILL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING OF STONE.
6. SURFACE WATER - ALL SURFACE WATER FLOWING OR DIVERTED TOWARD CONSTRUCTION ENTRANCES SHALL BE PIPED ACROSS THE ENTRANCE. IF PIPING IS IMPRACTICAL, A MOUNTABLE BERM WITH 5:1 SLOPES WILL BE PERMITTED.
7. MAINTENANCE - THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACTED ONTO PUBLIC RIGHTS-OF-WAY MUST BE REMOVED IMMEDIATELY.
8. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON A AREA STABILIZED WITH STONE AND WHICH DRAINS INTO AN APPROVED SEDIMENT TRAPPING DEVICE.
9. PERIODIC INSPECTION AND NEEDED MAINTENANCE SHALL BE PROVIDED AFTER EACH RAIN.



STABILIZED CONSTRUCTION ENTRANCE DETAIL

NOT TO SCALE

SILT SACK DETAIL

NOT TO SCALE

NOTES:

CONTRACTOR SHALL INSPECT AND MAINTAIN SILT SOCK AS NEEDED DURING THE DURATION OF CONSTRUCTION PROJECT.

CONTRACTOR SHALL REMOVE SEDIMENT COLLECTED AT THE BASE OF THE SILT SOCK WHEN IT HAS REACHED ½ OF THE EXPOSED HEIGHT OF THE SILT SOCK. ALTERNATIVELY, RATHER THAN CREATE A SOIL DISTURBING ACTIVITY, THE ENGINEER MAY CALL FOR ADDITIONAL SILT SOCK TO BE ADDED AT AREAS OF HIGH SEDIMENTATION, PLACED IMMEDIATELY ON TOP OF THE EXISTING SEDIMENT LADEN SILT SOCK.

SILT SOCK SHALL BE OVERLAPPED 12" AT JOINTS AND STAKED ON EACH SIDE OF THE SOCK AT A 45° ANGLE

NOTES:

1. INSTALL SELECT FILL UNDER PAVEMENT FOR WATER AND SEWER MAINS
2. SAWCUT EXISTING ROADS PRIOR TO INSTALLATION OF UTILITIES

UTILITY NOTES

1. CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE TOWN OF AMHERST SPECIFICATIONS WHERE APPLICABLE AND/OR SUBJECT TO THE LATEST REVISIONS BY THE TOWN ENGINEER.
2. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATIONS AND/OR ELEVATIONS OF EXISTING UTILITIES AS SHOWN ON THESE PLANS ARE BASED ON RECORDS OF THE VARIOUS UTILITY COMPANIES, AND WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THE INFORMATION IS NOT TO BE RELIED ON AS BEING EXACT OR COMPLETE. THE CONTRACTOR MUST CALL THE APPROPRIATE UTILITY COMPANY AT LEAST 48 HOURS BEFORE ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION OF UTILITIES. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO RELOCATE ALL EXISTING UTILITIES WHICH CONFLICT WITH THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS.
3. ALL FILL WITHIN THE R.O.W. & UTILITY AREAS IS TO BE COMPACTED TO 95% MOD-PROCTOR, BENCHED IN 6" LIFTS, & TO BE COMPLETED PRIOR TO UTILITY & ROADWAY CONSTRUCTION AND MUST BE APPROVED BY THE SUPERVISING PROJECT ENGINEER.
4. THE PROFESSIONAL ENGINEER SUPERVISING CONSTRUCTION OF WATERLINE SHALL PROVIDE A WRITTEN CERTIFICATION OF CONSTRUCTION COMPLIANCE, INCLUDING THE RESULTS OF THE HYDROSTATIC PRESSURE & LEAKAGE TESTS, CHLORINE TEST, ETC. TO THE TOWN OF AMHERST AND TO THE ERIE COUNTY WATER AUTHORITY (ECWA) WITHIN THIRTY (30) DAYS AFTER CONSTRUCTION COMPLETION.
5. ALL WATERLINE SERVICE CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE TOWN OF AMHERST AND THE ECWA REQUIREMENTS.
6. FOR CONNECTIONS TO EXISTING MANHOLES, CORE DRILL EXISTING MANHOLE AND CONNECT NEW SERVICE TO EXISTING MANHOLE WITH ELASTOMERIC BOOT, MODIFY EXISTING CONCRETE FLOW BENCHING FOR NEW SEWER.
7. THE PROFESSIONAL ENGINEER SUPERVISING CONSTRUCTION OF SANITARY LINES SHALL PROVIDE A WRITTEN CERTIFICATION OF CONSTRUCTION COMPLIANCE, INCLUDING THE RESULTS OF HYDROSTATIC LEAKAGE TEST, LAMP TEST, DEFLECTION TEST, AIR TEST, ETC. TO THE TOWN OF AMHERST WITHIN THIRTY (30) DAYS AFTER CONSTRUCTION COMPLETION.
8. THE TOWN OF AMHERST, WHO OPERATES AND MAINTAINS THE EXISTING LINES, SHALL BE NOTIFIED 24-HOURS IN ADVANCE OF THE START OF CONSTRUCTION.
9. P.V.C. (POLYVINYL CHLORIDE) SANITARY SEWER SHALL CONFORM TO A.S.T.M. SDR-35 SPECIFICATIONS OR APPROVED EQUAL.
10. ALL WATERLINE CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE TOWN OF AMHERST AND ERIE COUNTY WATER AUTHORITY REQUIREMENTS.
11. P.V.C. (POLYVINYL CHLORIDE) WATERLINE PIPE SHALL CONFORM TO A.W.W.A. C-900 SPECIFICATIONS OR APPROVED EQUAL.
12. THE MAXIMUM DEGREE OF DEFLECTION AT WATERLINE JOINTS IS ONE HALF (1/2) OF THE PIPE MANUFACTURERS RECOMMENDED DEGREE OF DEFLECTION, WHICH SHALL MEET & SATISFY THE ECWA STANDARDS. ANY DEVIATION FROM THIS STANDARD PROCEDURE WILL REQUIRE THE INSTALLATION OF BENDS W/ RESTRAINED JOINTS.
13. FIELD CONDITIONS MAY REQUIRE MINOR ALIGNMENT & BEND LOCATION ADJUSTMENTS WHICH WILL BE PERMITTED AS LONG AS ALL MINIMUM OFFSETS FROM OTHER UTILITIES & MAXIMUM ALLOWABLE JOINT DEFLECTIONS ARE MAINTAINED.
14. CONTRACTOR SHALL FOLLOW AWWA C605 (FOR PVC) AND C600 (FOR DIP) FOR PRESSURE AND LEAKAGE TESTING; AND AWWA C651 EXCEPT THE TABLE METHOD WHEN DISINFECTING AND FLUSHING THE WATERLINE
15. NO AIR RELEASE VALVES ARE REQUIRED FOR THE PROPOSED WATER MAIN.
16. ALL WATERLINE CROSSINGS WITH SANITARY AND STORM SEWERS TO HAVE MIN. 1-1/2' MIN. OF SEPARATION. INSTALL BENDS, BLOCKING, & PIPE RESTRAINTS AS REQUIRED.
17. SANITARY SEWER SERVICE CONNECTION SHALL BE IN APPROXIMATELY THE 10 O'CLOCK / 2 O'CLOCK POSITION. CONTRACTOR SHALL MAKE SLIGHT ADJUSTMENTS AS NECESSARY TO AVOID CONFLICTS WITH OTHER UTILITIES WHILE MAINTAINING BOTH A MINIMUM OF 2% SLOPE & MINIMUM OF 4-FEET OF COVER, 1% SLOPE IS ALLOWED UNDER PRE-APPROVED CIRCUMSTANCES.
18. ALL UTILITY LOCATIONS SHOWN ARE APPROXIMATE. CONTRACTOR SHALL VERIFY ALL LOCATIONS BEFORE BEGINNING WORK AS REQUIRED BY APPLICABLE LAWS AND REGULATIONS.
19. THE TOWN OF AMHERST SHALL BE NOTIFIED 24 HOURS IN ADVANCE TO PERFORM TAP ON SANITARY SEWER MAINLINE FOR THE PROPOSED SANITARY LATERAL ONCE THE FLOOR PLACEMENT AND ROOF INSTALLATION ARE COMPLETED.

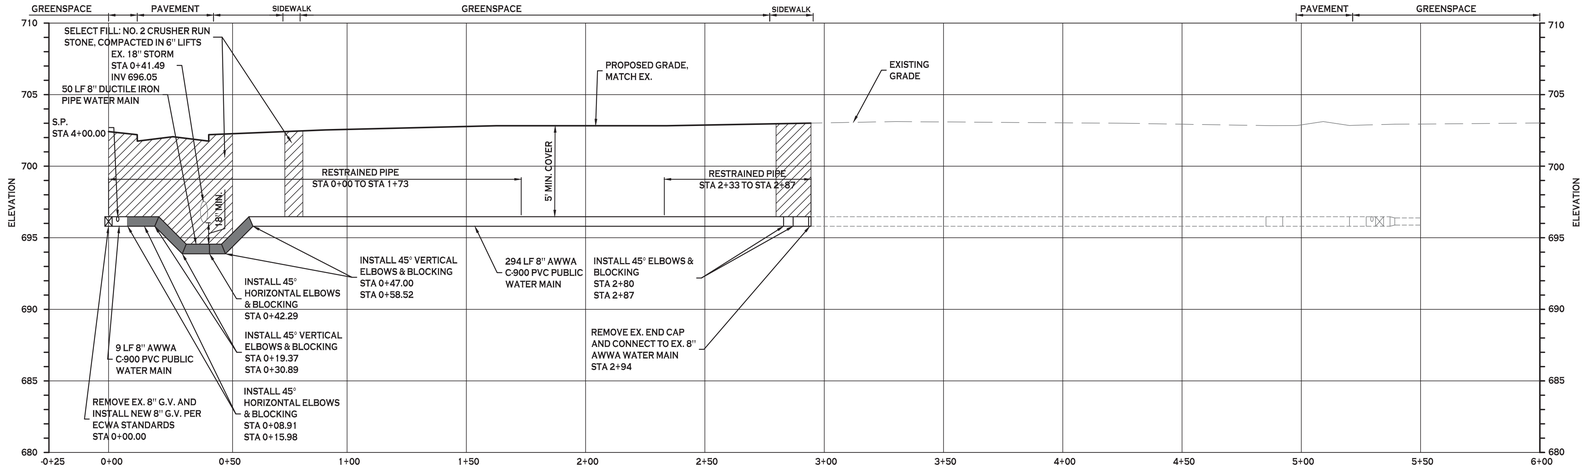
WARNING it is a violation of article 145 section 7209 of the New York State Education Law for any person, unless acting under the direction of a licensed professional engineer or licensed architect, to alter this drawing. If altered such R.A., P.E. or L.S. shall affix his or her seal, signature, the date,the notation "Altered by" and a specific description of the alteration.

NOTES

1. All elevations refer to USGS NAVD88 datum.
2. The CONTRACTOR shall obtain necessary permits and furnish copies to the ENGINEER prior to commencing work.
3. The CONTRACTOR work area shall be confined to the limits of the right-of-ways and easements. The CONTRACTOR shall obtain any additional easements or work releases should the CONTRACTOR require additional area to accommodate his operations.
4. The CONTRACTOR shall provide maintenance and protection of traffic in accordance with the Erie County Highway Department standards and the NYSDOT Manual of Uniform Traffic Control Devices.
5. The locations and depths of existing underground utilities as shown on the plans and profiles are approximate. Other underground utilities not shown may be encountered. The CONTRACTOR shall perform test pits to verify the location and elevation of utilities at interconnections and crossings as shown, directed or required. The CONTRACTOR shall excavate in advance of the pipe laying operation and expose all existing underground utilities to prevent damage during construction and to determine required changes in grade necessary to install watermain to avoid conflicts.
6. The CONTRACTOR shall install those measures required to limit erosion of areas disturbed by the work. Clearing shall be performed on an as needed basis, phased to reduce erosion and visual impact.
7. Blasting will not be permitted.
8. No more than one connection may be made to any existing watermain prior to testing, disinfection, and approval of the Waterline Installation Completed Works Approval Report(s) by the Erie County Water Authority and the Erie County Health Department.
9. The Erie County Water Authority only shall operate existing valves and fire hydrants, including newly installed valves and fire hydrants that have been placed into service. The CONTRACTOR is advised that watertight conditions may not exist when existing valves are closed.
10. The CONTRACTOR shall have all equipment, manpower, and materials required on site and ready for use prior to commencing any shut-down or removing any existing facilities from service. The CONTRACTOR shall notify all affected customers of any shut-down at least 48 hours in advance. The CONTRACTOR shall notify the appropriate fire stations 48 hours in advance prior to taking any fire hydrants out of service. Any fire hydrants not in service shall be bagged in burlap or plastic. Any shut-down shall be limited to 4 consecutive hours. It may be necessary to schedule shut-downs at night, weekends, or other off hours so as to not affect schools, businesses or other customers, as determined by the ENGINEER. Shut-down requests shall be submitted to the Erie County Water Authority a minimum of 5 business days in advance of the requested shut-down date.



I:\PUBLIC\ENGINEERING\CURRENT ECWA DETAILS\SD29_GENERAL_NOTES

ERIE COUNTY WATER AUTHORITY BUFFALO, NEW YORK	STANDARD DETAIL GENERAL NOTES	SD29
		DATE 3/05
		REVISED 11/21

11. All watermain piping shall be installed with a minimum of 5'-0" of cover.
12. All watermain piping shall be installed with a minimum of 1'-6" of vertical clearance and 10'-0" of horizontal clearance from sanitary and storm piping, measured from the outside of the pipes at the point of crossing.
13. If the material at the design grade is unsuitable as determined by the ENGINEER, the CONTRACTOR, when ordered in writing, shall excavate additional material to the depth necessary and shall backfill to the proposed grade with the select granular material.
14. The installation of the 90 degree bends in the watermain is not allowed, unless approved by the Erie County Water Authority.
15. Thrust restraint for watermain piping through 12-inch diameter shall consist of thrust blocks and pipe joint restraint.
16. The CONTRACTOR shall notify the owner of any utility pole in advance of any excavation work that will take place within 5'-0" of the utility pole. The CONTRACTOR shall include the cost of temporary pole support in the appropriate bid item.Where utility poles are required to be supported during construction, the CONTRACTOR shall make all necessary arrangements with the utility company.
17. If materials are encountered during the construction that are suspected of being contaminated, the CONTRACTOR shall immediately notify the NYSDEC for direction regarding testing, separation, containment and disposal procedures.
18. Existing fire hydrants removed during construction and not reinstalled as part of the work shall be returned to the Erie County Water Authority Service Center, 3030 Union Road, Cheektowaga.
19. The CONTRACTOR shall place temporary pavement (consisting of hot mix asphalt or cold patch) in all trench excavations in traveled areas including roads, driveways, sidewalks, and parking areas.
20. The CONTRACTOR shall not restrict school bus access.
21. The use of existing fire hydrants for any reason is prohibited without prior approval of the Erie County Water Authority. This includes newly installed fire hydrants that have been placed into service.
22. The CONTRACTOR shall submit procedures for testing and disinfection of the watermain to the ENGINEER for approval.
23. The CONTRACTOR shall be present and assist in the Final Walk inspection. The CONTRACTOR shall provide sufficient personnel and equipment to demonstrate to the ENGINEER that all valves, fire hydrants and curb stops operate as required.

SANITARY SEWER TESTING METHOD NOTES

(A) LEAKAGE TESTS

01. THE TEST PERIOD WHEREIN THE MEASUREMENTS ARE TAKEN SHALL NOT BE LESS THAN 24 HOURS, REGARDLESS OF THE TEST METHOD USED.

02. THE TOTAL LEAKAGE OF ANY SECTION TESTED BY ANY TEST METHOD SHALL NOT EXCEED THE RATE OF 200 GALLONS PER MILE OF PIPE PER 24 HOURS PER INCH OF NOMINAL PIPE DIAMETER.

03. MANHOLES SHALL BE CONSIDERED AS SECTIONS OF 48" DIAMETER PIPE AND THE EQUIVALENT LEAKAGE ALLOWANCE SHALL BE COMPUTED PER NOTE 02 USING THE SUBMERGED HEIGHT OF MANHOLE AS THE LENGTH.

04. WHEN MANHOLES ARE TESTED SEPARATELY, ALL PIPE OPENINGS SHALL BE PLUGGED AND THE TEST PROCEDURES AND CRITERIA SHALL BE APPLIED IN THE SAME MANNER AS FOR TESTS INVOLVING ONLY THE PIPE OR A COMBINATION OF PIPE AND MANHOLES.

(B) INFILTRATION TEST CRITERIA FOR USE

01. THIS TEST METHOD MAY ONLY BE USED WHEN GROUND WATER LEVELS ARE AT LEAST TWO (2) FEET ABOVE THE TOP OF THE PIPE FOR THE ENTIRE LENGTH OF THE SECTION TO BE TESTED DURING THE ENTIRE PERIOD OF THE TESTS.

02. GROUND WATER LEVELS MAY BE MEASURED IN AN OPEN TRENCH OR IN STANDPIPES PREVIOUSLY PLACED IN BACKFILLED TRENCHES DURING BACKFILLING.

03. THE NUMBER OF STANDPIPES REQUIRED AND LOCATION OF THE SAME ARE TO BE AS ORDERED BY THE ENGINEER. STANDPIPES MAY BE OF ANY PIPE MATERIAL BUT MUST BE OF SUCH DIAMETER (2–1/2" MINIMUM) AS TO PERMIT THE INSERTION OF A RULE OR LEVEL ROD. CRUSHED STONE SHALL BE PLACED AROUND THE LOWER OPEN ENDS OF THE STANDPIPES.

04. STANDPIPES ARE TO BE REMOVED AT THE SATISFACTORY COMPLETION OF THE TESTS.

05. IF IN LIEU OF STANDPIPES, THE TRENCH IS TO BE LEFT OPEN FOR GROUND WATER OBSERVATION, THE LENGTH OF UNBACKFILLED TRENCH AT ANY ONE TIME MAY HAVE TO BE LIMITED FOR REASONS OF SAFETY.

(C) EXFILTRATION TEST CRITERIA FOR USE

01. THIS TEST CONSISTS OF FILLING THE PIPE WITH WATER TO PROVIDE A HEAD OF AT LEAST TWO (2) FEET ABOVE THE TOP OF THE PIPE OR ABOVE GROUND WATER WHICHEVER IS HIGHER AT THE HIGHEST POINT OF THE PIPE LINE UNDER TEST, AND THEN MEASURING THE LOSS OF WATER TO MAINTAIN THE ORIGINAL LEVEL.

02. IN THIS TEST THE PIPE LINE MUST BE FILLED WITH WATER AND ALLOWED TO REMAIN SO FILLED FOR AT LEAST 24 HOURS PRIOR TO TAKING MEASUREMENTS.

03. REGARDING GROUND WATER MEASUREMENTS: SEE NOTES 02 THROUGH 05 ABOVE.

04. REGARDING THE TEST STANDPIPE: THERE MUST BE SOME POSITIVE METHOD OF RELEASING ENTRAPPED AIR IN THE SEWER PRIOR TO TAKING MEASUREMENTS.

(D) DEFLECTION TEST FOR PVC SEWER PIPE

01. DEFLECTION TESTS SHALL BE PERFORMED ON ALL FLEXIBLE GRAVITY SEWER PIPE. TESTS SHALL BE CONDUCTED AFTER THE FINAL BACKFILL HAS BEEN IN PLACE FOR AT LEAST 30 DAYS.

02. NO PIPE SHALL EXCEED DEFLECTION OF 5%. DEFLECTION GAGE MAY BE BORROWED FROM THE TOWN ENGINEER FOR 8" AND 10" PIPE. THE DEFLECTION TEST MUST BE EXECUTED AFTER 30 DAYS OF PLACEMENT OF FINAL BACKFILL. THE TEST WILL ALSO BE DONE WITHOUT MECHANICAL PULLING DEVICES.

MANHOLE PLACEMENT AND MAINTENANCE
DURING CONSTRUCTION AND DEVELOPMENT

CONTRACTOR AND/OR DEVELOPERS SHALL CONSTRUCT ALL MANHOLE STRUCTURES IN ACCORDANCE WITH THE TOWN OF AMHERST STANDARD SPECIFICATIONS OR THE SPECIFICATIONS OF THE DESIGN ENGINEER WHEN REQUIRED BY THE TOWN.

ALL MANHOLES ARE TO BE DESIGNED AND FURNISHED WITH RIM ELEVATIONS AT FINAL FINISHED GRADES. THE CONTRACTOR, DEVELOPER, OR HOME BUILDER SHALL BE RESPONSIBLE FOR ALL CORRECTIONS, ADJUSTMENTS, AND MODIFICATIONS NEEDED FOR RAISING, LOWERING, OR REPLACING ANY AND ALL MANHOLES AS PROPOSED FOR THE FACILITY.

ALL AS–BUILT STATIONING, LINE AND GRADE IMPROVEMENTS, INVERT AND RIM ELEVATIONS, "Y" LOCATIONS, INSPECTION REPORTS, ROADWAY OR STREET NAMES, RIGHT–OF–WAY WIDTHS, AND EASEMENT LINES SHALL BE FURNISHED TO THE TOWN ON A SET OF MYLAR DRAWINGS PRIOR TO TAP–IN APPROVAL, PIP ACCEPTANCE, AND/OR RELEASE OF FINAL PAYMENT.

ALL MANHOLE STRUCTURES SHALL BE MADE ACCESSIBLE TO THE TOWN OF AMHERST TELEVISION/MAINTENANCE CREWS. THE CONTRACTOR AND/OR DEVELOPER SHALL PROVIDE A DRY, WELL COMPACTED, STABLE SURFACE FREE FROM SHOW AND OBSTRUCTIONS FOR SAFE AND OPEN ACCESS WITH TOWN VEHICLES. SHOULD THE CONTRACTOR AND/OR DEVELOPER WISH TV INSPECTIONS DURING WET WEATHER/WET SOFT SOIL CONDITIONS, HE SHALL PROVIDE ALL NECESSARY GRANULAR BACKFILL, DISTRIBUTED AND COMPACTED TO SUPPLY ACCESS TO EACH MANHOLE. THE CONTRACTOR AND/OR DEVELOPER SHALL BEAR ALL COSTS OF TOWING, DOWN TIME, CREW TIME, AND DAMAGE ALONG WITH RESTORATION, SHOULD SUCH ACCESSWAYS FAIL.

SANITARY SEWER NOTES:

01. THE CONTRACTOR SHALL COMPLY WITH THE TOWN OF AMHERST STANDARD DRAWINGS AND SPECIFICATIONS.

02. THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE PROJECT ENGINEER AND THE TOWN OF AMHERST ENG. DEPT. OF ANY HAZARDOUS SUBSTANCE ENCOUNTERED DURING THE CONSTRUCTION OF THE WORK. HE SHALL AT HIS EXPENSE, CONFORM TO ALL LAWS, RULES, REGULATIONS AND DIRECTIONS AS PROMULGATED BY THE UNITED STATES DEPARTMENT OF LABOR, OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, THE NEW YORK STATE DEPARTMENT OF HEALTH AND ANY SUCH LOCAL RULES, ORDINANCES AND LAWS WHEN ENCOUNTERING OR WORKING WITH ANY SUCH HAZARDOUS SUBSTANCE.

03. THE CONTRACTOR SHALL COMPLY IN ALL RESPECTS TO THE INDUSTRIAL CODE PART (RULE NO.) 53 RELATING TO CONSTRUCTION, EXCAVATION AND DEMOLITION OPERATIONS AT OR NEAR UNDERGROUND FACILITIES, AS ISSUED BY THE STATE OF NEW YORK DEPARTMENT OF LABOR, BOARD OF STANDARD AND APPEALS.

04. SINCE THE ERIE COUNTY WATER AUTHORITY OPERATES AND MAINTAINS THE EXISTING WATER LINES, THEY ARE TO BE NOTIFIED AT LEAST 48 HOURS IN ADVANCE OF THE START OF CONSTRUCTION. ALL EXISTING VALVES ARE TO BE OPERATED BY THE ERIE COUNTY WATER AUTHORITY PERSONNEL.

05. THE CONTRACTOR SHALL EXPOSE EXISTING UTILITIES AHEAD OF THE PIPE LAYING OPERATION, SO THAT, IF MINOR ADJUSTMENTS MUST BE MADE IN ELEVATION AND/OR ALIGNMENT DUE TO INTERFERENCE FROM THESE UTILITIES, SAID CHANGES CAN BE MADE IN ADVANCE OF THE WORK.

06. WHERE SUCH FACILITIES ARE UNDER THE SUPERVISION OF A PROFESSIONAL ENGINEER, HE SHALL CERTIFY TO THE ENGINEERING DEPARTMENT OF THE TOWN OF AMHERST THAT SAID FACILITIES AS CONSTRUCTED WERE SUPERVISED BY HIMSELF (HERSELF) AND THAT THE WORKS HAVE BEEN FULLY COMPLETED IN ACCORDANCE WITH THE APPROVED ENGINEERING REPORTS, PLANS, SPECIFICATIONS, CONTRACT DOCUMENTS AND ANY AND ALL ADDENDA TO SAME.

07. THE CONSTRUCTION OF THE FACILITIES SHALL BE UNDER THE SUPERVISION OF A PERSON OR FIRM QUALIFIED TO PRACTICE PROFESSIONAL ENGINEERING IN NEW YORK STATE UNDER THE EDUCATION LAW OF THE STATE, WHENEVER ENGINEERING SERVICES ARE REQUIRED BY SUCH LAW FOR SUCH PURPOSES.

08. A WRITTEN CERTIFICATE OF CONSTRUCTION COMPLIANCE, INCLUDING THE RESULTS OF HYDROSTATIC LEAKAGE TESTS, MADE BY THE PROFESSIONAL ENGINEER SUPERVISING THE CONSTRUCTION, SHALL BE SUBMITTED TO THE ERIE COUNTY DEPART. OF ENVIRONMENT PLANNING AND NEW YORK DEPARTMENT OF ENVIRONMENTAL CONSERVATION WITHIN THIRTY (30) DAYS AFTER CONSTRUCTION COMPLETION.

09. UNSUITABLE MATERIALS SUCH AS FROZEN ORGANIC AND/OR VEGETABLE MATERIAL, DEBRIS, TREES, LUMBER, LARGE STONES OR CLODS (6.0" OR LARGER), MUCK, PEAT, ORGANIC SILT WILL NOT BE ACCEPTABLE FILL AND CERTAIN MAN–MADE DEPOSITS OF INDUSTRIAL WASTE, SLUDGE OR LANDFILL MAY ALSO BE DETERMINED AS UNSUITABLE HAZARDOUS MATERIAL.

10. THE COMPACTION OF ALL MATERIALS WILL OCCUR AT 6" INCREMENTS.

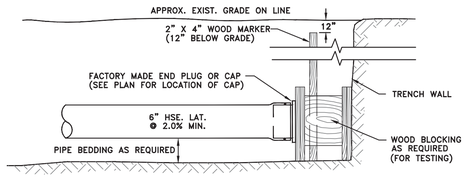
11. VERIFICATION OF ALL EXISTING EASEMENTS IS THE RESPONSIBILITY OF THE DESIGN ENGINEER AND THEY MUST BE SHOWN ALONG WITH ALL PROPOSED EASEMENTS ON PLAN DRAWINGS.

12. SHOULD A FLUID CONDITION BE ENCOUNTERED AT THE TRENCH BOTTOM, THE CONTRACTOR IS TO INSTALL ADDITIONAL STONE CRADLE AS ORDERED BY THE ENGINEER.

13. ALL PIPE CROSSING UNDER PAVED AREAS ARE TO BE BACKFILLED TO SUBGRADE WITH COMPACTED SELECT MATERIAL TO FIVE (5) FEET OUTSIDE THE PAVEMENT EDGES.

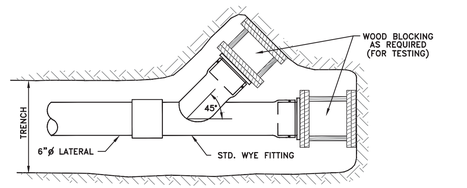
14. THE CONTRACTOR SHALL RETAIN THE SERVICES OF A QUALIFIED TREE EXPERT TO REMOVE, WHERE NECESSARY, BRANCHES WHICH INTERFERE WITH THE CONSTRUCTION OPERATION, OR REPAIR TREES HAVING SUFFERED DAMAGE BY CONSTRUCTION ACTIVITIES. THE COST INVOLVED IN THE ABOVE IS TO BE INCLUDED IN THE VARIOUS ITEMS OF THE CONTRACT.

15. SEWERS SHALL BE LAID AT LEAST TEN (10) FEET HORIZONTALLY FROM ANY EXISTING OR PROPOSED WATERMAIN. THE DISTANCE SHALL BE MEASURED EDGE TO EDGE. IN CASES WHERE IT IS NOT PRACTICAL TO MAINTAIN A TEN FOOT SEPARATION, THE APPROPRIATE REVIEWING AGENCY MAY ALLOW DEVIATION ON A CASE–BY–CASE BASIS, IF SUPPORTED BY DATA FROM THE DESIGN ENGINEER. SUCH DEVIATION MAY ALLOW INSTALLATION OF THE SEWER CLOSER TO A WATERMAIN, PROVIDED THAT THE WATERMAIN IS IN A SEPARATE TRENCH OR ON AN UNDISTURBED EARTH SHELF LOCATED ON ONE SIDE OF THE SEWER AND AT AN ELEVATION SO THE BOTTOM OF THE WATERMAIN IS AT LEAST 18" (46CM) ABOVE THE TOP OF THE SEWER.



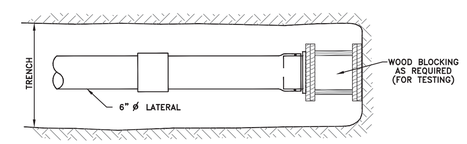
16. SEWERS CROSSING WATERMAINS SHALL BE LAID TO PROVIDE MINIMUM VERTICAL DISTANCE OF 18" (46CM) BETWEEN THE OUTSIDE OF A WATERMAIN AND THE OUTSIDE OF THE SEWER. THIS SHALL BE THE CASE WHERE THE WATERMAIN IS EITHER ABOVE OR BELOW THE SEWER. THE CROSSING SHALL BE ARRANGED SO THAT THE SEWER JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE WATERMAIN JOINTS. WHERE A WATERMAIN CROSSES UNDER A SEWER, ADEQUATE STRUCTURAL SUPPORT SHALL BE PROVIDED FOR THE SEWER, TO PREVENT DAMAGE TO THE WATERMAIN.

17. WHEN IT IS IMPOSSIBLE TO OBTAIN PROPER HORIZONTAL AND VERTICAL SEPARATION AS STIPULATED ABOVE, THE SEWER SHALL BE DESIGNED AND CONSTRUCTED EQUAL TO WATER PIPE AND SHALL BE PRESSURE TESTED AS TO ASSURE WATERTIGHTNESS PRIOR TO BACKFILLING.



18. THE PIPE SHALL BE P.V.C. SEWER PIPE CONFORMING TO THE LATEST REVISIONS OF ASTM DESIGNATION D–3034, SDR–35, INSTALLED IN ACCORDANCE WITH ASTM.

19. THE MANHOLE COVERS ARE TO BEAR THE INSCRIPTION "AMHERST SANITARY".



CAP & BLOCKING METHODS FOR AIR TESTING
(JANUARY 2012)

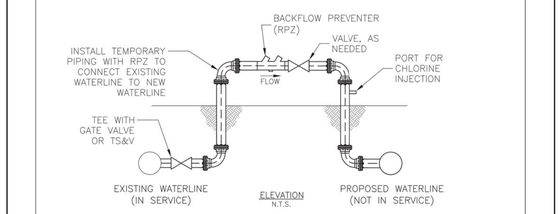
RISER DETAIL – SDR35
(MAIN LINE LATERAL CONNECTION)
(JANUARY 2012)

NOTES:
A. THE BID PRICE FOR WYE BRANCHES SHALL INCLUDE THE COST OF THE CAP, 45° BENDS, STONE BEDDING AS REQUIRED BY SPEC'S AND ANY NECESSARY PIPE NEEDED TO SEAL THE CONNECTION.
B. TRENCH DETAILS ARE ONLY SHOWN FOR PURPOSES OF MATERIAL PLACEMENT AND PAY LIMITS.
C. AN OSHA APPROVED MOVABLE PROTECTIVE TRENCH SHIELD SHALL BE USED IN ALL UNSHEETED TRENCH AREAS.
D. IF C900 PRESSURE PIPE IS USED A FERNCO COUPLING SHALL BE USED FOR THE TRANSITION BACK TO SDR 35 PIPE.



MATERIALS
PIPE BEDDING MATERIAL (NYSDOT LATEST EDITION)
(1) NO. 1 CRUSHED STONE WITH A GRADATION CONFORMING WITH NYSDOT SECTION 703–02. THE CRUSHED STONE SHALL BE WELL GRADED WITH NO PARTICLES LARGER THAN ONE INCH AND HAVING A MAXIMUM GRADATION MEETING THE LIMITS DESCRIBED IN THE SPECIFICATIONS. THE BEDDING SHALL BE COMPACTED IN 6" LIFTS WITH EQUIPMENT ACCEPTABLE TO THE PIPE MANUFACTURER. NO SLAG WILL BE ALLOWED.

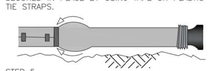
I:\PUBLIC\ENGINEERING\2005_DETAILS\SD31_PRESS_TEST_SCHED

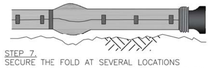
ERIE COUNTY WATER AUTHORITY BUFFALO, NEW YORK	PRESSURE TESTING SCHEDULE	DWG. NO. SD31	
		DATE 10/05	REVISED

STEP 1.
CUT A SECTION OF POLYETHYLENE TUBE APPROXIMATELY 2 FEET LONGER THAN THE PIPE SECTION. REMOVE ALL LUMPS OF CLAY, MUD, CINDERS, OR OTHER MATERIALS THAT MIGHT HAVE ACCUMULATED ON THE PIPE SURFACE DURING STORAGE. SLIP THE POLYETHYLENE TUBE ACCORDION-FASHION ON THE END OF THE PIPE. PULL BACK THE OVERHANGING END OF THE TUBE UNTIL IT CLEARS THE PIPE END.

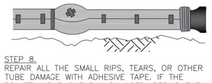


STEP 2.
DIG A SHALLOW BELL HOLE IN THE TRENCH BOTTOM AT THE JOINT LOCATION TO FACILITATE INSTALLATION OF THE POLYETHYLENE TUBE. LOWER THE PIPE INTO THE TRENCH AND MAKE UP THE PIPE JOINT WITH THE PROCEEDING SECTION OF PIPE.

STEP 3.
MOVE THE CABLE TO THE BELL END OF THE PIPE AND LIFT THE PIPE SLIGHTLY TO PROVIDE ENOUGH CLEARANCE TO EASILY SLIDE THE TUBE. SPREAD THE TUBE OVER THE ENTIRE BARREL OF THE PIPE. NOTE: MAKE SURE THAT NO DIRT OR OTHER BEDDING MATERIAL BECOMES TRAPPED BETWEEN THE WRAP AND THE PIPE.



STEP 4.
MAKE THE OVERLAP OF POLYETHYLENE TUBE BY PULLING BACK THE BUNCHED POLYETHYLENE FROM THE PRECEDING LENGTH OF PIPE AND SECURING IT IN PLACE. NOTE: THE POLYETHYLENE MAY BE SECURED IN PLACE BY USING TAPE OR PLASTIC TIE STRAPS.

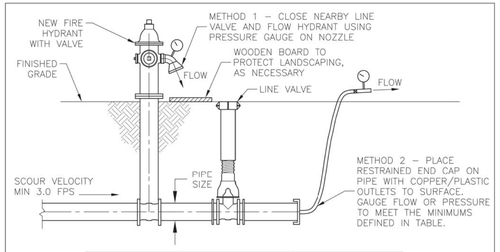


STEP 5.
OVERLAP THE SECURED TUBE END WITH THE END OF THE NEW PIPE SECTION, FOR A MINIMUM OF 12 INCHES. SECURE THE NEW TUBE END IN PLACE. PIPE JOINT SHOULD HAVE TWO LAYERS OF POLYWRAP, EACH SECURED IN PLACE.

STEP 6.
TAKE UP THE SLACK IN THE TUBE ALONG THE BARREL OF THE PIPE TO MAKE A SNUG, BUT NOT TIGHT, FIT. FOLD EXCESS POLYETHYLENE BACK OVER THE TOP OF THE PIPE.

STEP 7.
SECURE THE FOLD AT SEVERAL LOCATIONS ALONG THE PIPE BARREL (APPROXIMATELY EVERY 3 FEET, MAXIMUM OF 5 FEET).

STEP 8.
REPAIR ALL THE SMALL RIPS, TEARS, OR OTHER TUBE DAMAGE WITH ADHESIVE TAPE. IF THE POLYETHYLENE IS BADLY DAMAGED, REPAIR THE DAMAGED AREA WITH A SHEET OF POLYETHYLENE AND SEAL THE EDGES OF THE REPAIR WITH ADHESIVE TAPE.



STEP 9.
CAREFULLY BACKFILL THE TRENCH ACCORDING TO THE PROCEDURES IN AWWA C600 STANDARD. TO PREVENT DAMAGE DURING BACKFILLING ALLOW ADEQUATE SLACK IN THE TUBE AT THE JOINT. BACKFILL SHOULD BE FREE OF CINDERS, ROCKS, BOULDERS, NAILS, STICKS, OR OTHER MATERIALS THAT MIGHT DAMAGE THE POLYETHYLENE. AVOID DAMAGING THE POLYETHYLENE WHEN USING TAMPING DEVICES.

NOTES:
1 - POLYETHYLENE WRAP (POLYWRAP) SHALL BE OF PROPER DIAMETER TO FIT OVER BELLS AND EXTERNAL WEDGE-ACTION RETAINER GLANDS.
2 - CAST AND DUCTILE IRON FITTINGS (BENDS, TEES, VALVES, ETC.) ARE TO BE WRAPPED IN POLYWRAP AND SECURED IN PLACE.
3 - DO NOT USE CHAINS, METAL WIRE, OR OTHER SUPPORTING SYSTEMS WHICH MAY DAMAGE THE POLYETHYLENE ENCASEMENT. REPLACE DAMAGED POLYWRAP ACCORDINGLY.

SEQR
Negative Declaration

NOTICE OF DETERMINATION OF NON-SIGNIFICANCE

Lead Agency: Town of Amherst Planning Board

Project: SUB-2022-01PP

Address: 5583 Main Street
Williamsville, NY 14221
(716) 631-7051

Date:

This notice is issued pursuant to Chapter 104 of the Town Code and Part 617, as amended, of the implementing regulations pertaining to Article 8 (State Environmental Quality Review) of the Environmental Conservation Law.

The Lead Agency has determined that the proposed action described below will not have a significant adverse effect on the environment.

Title of Action: Preliminary Plat Review

SEQR Status: Unlisted Action

Description of Action: Subdivision of 1.44± acres into 8 lots in order to allow construction of eight single-family residences. Proposed lots are along existing public streets (Harding Road and McKinley Avenue). Subdivision is comprised of 6 internal lots being a minimum of 50 feet in width by 132 feet in depth, and 2 corner lots being 78± feet in width and 132 feet in depth. Work will include the site improvements not specifically stated above, including, stormwater, water and sewer utilities, grading, lighting and sidewalks.

Location: 468 Harding Road, Amherst, Erie County

Petitioner: Harding Road, LLC

Attachment: SUB-2022-01PP_draft_neg dec_092222 (26194 : Sub-2022-01PP)

Reasons Supporting This Determination

Based on information submitted by the applicant including a Full Environmental Assessment Form (EAF) - Part I, (as amended) and a complete subdivision application, a preliminary staff analysis was undertaken. Compared to the criteria listed in Section 617.7, all indications are that this action will not have a significant impact on the environment, as follows:

1. The project is not expected to cause a substantial adverse change in existing air quality, ground or surface water quality or quantity, or noise levels; a substantial increase in solid waste production; or a substantial increase in the potential for erosion, flooding, leaching or drainage problems. The creation of eight single family lots is not anticipated to significantly increase potential noise impacts, as noise impact is dependent on occupant behavior and not on the number of homes. The net increase of eight single family dwellings will not significantly increase the potential impact from solid waste production town-wide where there are an estimated 50,842 households. The Engineering Department on July 19, 2022 reviewed the Grading, Drainage and Utility Plans, Engineer's Report and Erosion Control Plan submitted on August 22, 2022, and Geotechnical Report prepared by Ray M. Teeter, PE. The Stormwater Pollution Prevention Plan (SWPPP) submitted on July 13, 2022 was also reviewed. Based on its review of these documents, the Department has determined that the project has or will have met all applicable requirements. Due to the depth of bedrock, should blasting be necessary for the installation of building foundations the requirements of §78 of Town Code shall be adhered to.

2. The project will not result in the removal or destruction of large quantities of vegetation or fauna; or in significant adverse impacts to fish or wildlife species, habitats or other natural resources. This determination is based on review of the NYSDEC Environmental Resource Mapper, which shows the site does not contain any significant natural communities, or habitat for rare, threatened or endangered plants or animal species. This determination is also based on the lack of significant existing natural vegetation. Currently, the predominant vegetative cover on the site is landscaped lawn, with approximately 12 trees. The Planning Department reviewed a Preliminary Plat Plan submitted on August 22, 2022 and determined that it meets or exceeds Zoning Ordinance requirements for greenspace. The Preliminary Plat Plan has or will have met all Zoning Ordinance and Town requirements for lot coverage on a single family lot.

3. The project is not expected to create a material conflict with the Town Comprehensive Plan. The resulting infill development will be consistent in use and character with the surrounding single family residential neighborhood. The Building Department has reviewed the application documents, along with the Geotechnical Report submitted on July 13, 2022 and determined in their review of July 18, 2022 that the subject project has or will have met all Zoning Ordinance regulations.

4. The project is within an area identified by the State as having potential archaeological or historical significance. In 2005, a Stage 1 A/B/ Cultural Resource Investigation was conducted by Robert Dean, Heritage Preservation & Interpretation Inc. for subject property.

Attachment: SUB-2022-01PP_draft_neg dec_092222 (26194 : Sub-2022-01PP)

The report summary concludes that "*There were no cultural resources identified as a result of this investigation*.". The NYS Office of Parks, Recreation and Historic Preservation has reviewed the project and, as stated in their letter dated August 23, 2022 that: "*...no properties, including archaeological and/or historic resources, listed or eligible for the New York State and National Registers of Historic Places will be impacted by this project*".

5. The project will not impair the character or quality of important aesthetic resources or of existing community or neighborhood character because the proposed detached single family residences are consistent with the current TR-3 zoning, and because the infill development is limited to single family detached dwellings, consistent with the existing surrounding single family land use to the north, west and south. Therefore, the project is consistent with surrounding land use.

6. The proposed development includes eight single family dwellings, which will increase energy use over the current vacant condition. However, new home construction is required to meet the NYS Energy Code for new construction and therefore, is not anticipated to cause a significant adverse impact related to the quantity or type of energy.

7. The project will not create any hazard to human health. A search of NYSDEC data bases (Spill Incidents Database, Remedial Site Database, Bulk Storage Database) did not result in evidence of any known contamination concerns, and therefore, the proposed subdivision will not create any hazard to human health. The Fire Chief's Association on March 31, 2022, reviewed the project and has no objection to the approval of the subdivision, as all requirements of this agency have or will have been met.

8. The project will result in a change in use from its current vacant state. However, the preliminary plat will not cause a substantial change in the use, or intensity of use to agricultural, open space or recreational resources, or in its capacity to support those uses, as the current land use is not agricultural, or publically-owned open space, or publically-owned recreation resources. Based on inter-departmental reviews, the existing water, sewer, storm water and street infrastructure have sufficient capacity to serve the creation of eight single family residential lots, which will be consistent with the scale of surrounding land uses.

9. The function of the proposed eight-lot subdivision will not significantly increase the number of people using the site over the level of use over that anticipated in the Bicentennial Comprehensive Plan.

10. Review by the Town Traffic/Safety Board dated September 13, 2022, and NYSDOT dated April 29, 2022 indicates that significant negative traffic impacts are not expected to result from the proposed project.

11. A coordinated review of the project has been undertaken by Town Departments including, in addition to those mentioned above, Highway on August 10, 2022, Assessor on July 19, 2022, Plumbing Division on September 1, 2022, and Right-of-Way Agent on September 2, 2022. These reviews did not identify any potential significant adverse environmental issues and indicated that the proposal will not have a significant damaging impact on the environment.

Attachment: SUB-2022-01PP_draft_neg dec_092222 (26194 : Sub-2022-01PP)

12. Issues not specifically mentioned above and/or those not specifically reviewed were not raised by Town departments, outside agencies or the public and are not determined to cause significant negative environmental impacts.

DOC ID: 25580

ADOPTED

PLANNING BOARD ITEM (ID # 25580)

Request to Rezone 7.43± Acres from RD to CTR-8, Z-2022-02

Property located at 1400-1404 & 1408-1416 Sweet Home Road
North Forest Development LLC, Petitioner

June 16, 2022
No comments were heard on this proposal. Mr. Giuliani moved to adjourn the proposal. The motion was seconded by Mr. Chmiel and carried. Ayes 7, Noes 0.

May 19, 2022
No comments were heard on this proposal. Mr. Chmiel moved to adjourn the proposal. The motion was seconded by Ms. Penberthy and carried. Ayes 6, Noes 0, Absent 1 (Giuliani).

September 22, 2022
The purpose of this request is to allow for subsequent development of a mixed-use project consisting of 500± residential units and 10,000± square feet of commercial/retail space.

Sean Hopkins, Esq., Hopkins Sorgi & McCarthy PLLC, represented the petitioner, explained the proposal and was available to answer questions from the Board. Roy Jordan was also present.

In response to the Board's questions, Mr. Hopkins stated this development could be a mix of market rate apartments and student housing but will most likely be student housing.

No further comments were heard on this proposal. The hearing was closed.

Following discussion, Mr. Giuliani moved to approve the request based on the resolution. The motion was seconded by Mr. Chmiel and carried. Ayes 5, Noes 0, Absent 2 (Kahn, Raffaele).

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

7. **Petitioner's interest in property** [Note: Authorization Letter of the Property Owner attached as Exhibit "1" of this Rezoning Application.]

_____Option to purchase

_____Owner

__X____Other (explain) The Project Site and Petitioner are related entities.

8. **The following are all others having an interest in this application and join herein with the petitioner named above:** (describe extent of interest; attach sheets as needed)

Not Applicable.

9. **Attach Survey and Legal description of land to be rezoned. The Survey must be prepared by a New York State Licensed Land Surveyor.** Legal description of property to be rezoned from RD to CTR-5 and CTR-8 is attached as Exhibit " and a reduced size copy of the Survey of the Project Site is attached as Exhibit "4". Full size copy the Survey is also attached.

10. **Said property has the following deed restrictions or Covenants:** (attach copy) Not Applicable.

Liber _____ Page _____

11. **Information on proposed project:**

A. Description of the character of the proposed development:

See Exhibit 5.

B. Rationale for rezoning request:

1. Why was this site chosen?

See Exhibit 5.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

2. Why cannot land be used with the existing zoning?

See Exhibit 5.

3. How will this rezoning impact surrounding properties?

See Exhibit 5.

4. How will this rezoning impact the school system?

See Exhibit 5.

12. Quantitative Data:

A. Total # of dwelling units: 500 units

B. Distribution of dwelling units by type: All dwelling units are apartments for lease

C. Gross Residential Density per acre: 67.29 units per acre.

D. Total amount of Open Space: 0

E. Proposed Non-Residential Floor Area: 20,000 sq. ft. first floor commercial space.

[Note: A reduced size copy of the Concept Site Plan [Drawing C-100] for the proposed mixed-use redevelopment project as prepared by Carmina Wood Morris is provided at Exhibit "7" and a full size copy is also attached.]

13. Development Schedule:

Start: To be Determined

Finish: To be Determined

Stages (# of): 1

14. If any portion of the proposed development is planned to be sold or leased, please describe:

The commercial space and residential units will be leased.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

15. Open Space ownership and maintenance provisions (if applicable):

Greenspace and landscaping will be privately owned and maintained.

16. Basis for Findings (Sec. 8-3-5 of the Town Zoning Code) (Attach sheets and supplemental materials as necessary.)

A. The proposed zoning and development plan must be generally consistent with the policies of the Comprehensive Plan and the Town Zoning Ordinance.

1. State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps, and/or figures in the plan that support the proposed zoning at this location (The Comprehensive Plan document is available at the Planning Department, Town Clerk's Office, Amherst libraries, or at www.amherst.ny.us). Add sheets as needed.

See Exhibit 6.

2. Pursuant to NYS Town Law Section 272a(11), "all Town land use regulations must be in accordance with a comprehensive plan adopted pursuant to this Section." The Town Board adopted the Comprehensive Plan pursuant to NYS Town Law 272 on January 2, 2007. If the rezoning is approved, the Town Board may require the Plan to be amended, as applicable.

Cite all text, map, and / or figures that must be amended to support the proposed zoning at this location (attach pages as necessary) and provide detailed suggested amendments.

See Exhibit 6.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

3. State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

See Exhibit 6.

B. Adequate Services and Utilities are available or are proposed to be made available with the construction of the development:

1. Sanitary Sewer
   Yes.
2. Storm Sewer/Drainage
   Yes.
3. Water
   Yes.
4. Other Yes.

C. Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

See Exhibit 6.

D. Suitability of the subject property for uses permitted by the current versus the proposed district:

See Exhibit 6.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

E. Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

See Exhibit 6.

17. The petitioner encloses herewith the sum of $2,765.00 to pay the fee, and consents to the placement of a sign(s) at the described location identifying this request for a period of time to be determined by the Town Clerk.

18. The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

[Note: Authorization Letter of Property Owner signed attached as Exhibit "1".]

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.

5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Mixed-Use Redevelopment Project		
Project Location (describe, and attach a general location map): 1400-1404 and 1408-1416 Sweet Home Road - Town of Amherst - Erie County [SBL No. 54.12-1-42 and 54.12-1-43.1]		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed mixed-use redevelopment project consisting of an 8-story mixed-use building with 20,000 sq. ft. of 1st floor commercial space, 300 apartments and 120 parking spaces in basement], two 5-story building [60 parking spaces on 1st floor per building and upper story apartments] (total of 500 apartments with total of 566 parking spaces - 316 surface spaces) and related site improvements. The action includes an amendment of the zoning classification of 1400-1404 and 1408-1416 Sweet Home Road (collectively the "Project Site") from RD to CTR-5 and CTR-8. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the proposed mixed-use and multifamily buildings and all related site improvements including parking spaces, access onto Rensch Road, access aisles, landscaping, lighting, underground storm water management improvements, water and sanitary sewer lines as well as utility connections. The Project Site consists of an existing office park to be replaced by the proposed mixed-use project. Given that the proposed project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it involves more than 250 attached residential units.

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board - Rezoning	March 21, 2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Planning Board - Site Plan Approval	To be Determined ("TBD")
c. City, Town or Village Zoning Board of Appeals ☑Yes ☐No	Zoning Board of Appeals - Possible Area Variances	TBD
d. Other local agencies ☑Yes ☐No	Building Dept. - Demolition & Building Permits; Highway Department - Curb Cut Permits	TBD
e. County agencies ☑Yes ☐No	ECWA - Water	TBD
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - SPDES and DSCA	TBD
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☑Yes ☐No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
Research Development District ("RD")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? CTR-8 for 1400-1404 Sweet Home Rd. and CTR-5 for 1408-1416 Sweet Home Rd.

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department for the fire district in which the Project Site is located

d. What parks serve the project site?
There are various parks that will be accessible to the future tenants of the mixed-use redevelopment project

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Mixed-use project consisting of approximately 20,000 sq. of 1st floor commercial space and apartments for lease [3 proposed building consistent with the Concept Site Plan [Drawing C-100].

b. a. Total acreage of the site of the proposed action? 7.43 acres
b. Total acreage to be physically disturbed? 7.43 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 7.43 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

f. Does the project include new residential uses? ☑ Yes ☐ No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				500
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑ Yes ☐ No

If Yes,

i. Total number of structures 1 Mixed-Use Building

ii. Dimensions (in feet) of largest proposed structure: 105' height; 275' width; and 400' length

iii. Approximate extent of building space to be heated or cooled: 20,000 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☑ Yes ☐ No

If Yes,

i. Purpose of the impoundment: Undeground stormwater detention.

ii. If a water impoundment, the principal source of the water: ☑ Ground water ☐ Surface water streams ☐ Other specify:

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: N/A acres

v. Dimensions of the proposed dam or impounding structure: N/A height; N/A length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):
N/A

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐ Yes ☑ No

If Yes:

i .What is the purpose of the excavation or dredging?

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No

If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☐No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 110,000 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☑No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 110,000 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

- Do existing sewer lines serve the project site? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

_____

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: Traffic Impact Study prepared by SRF Associates submittted with Rezoning Application and Supporting Documentation] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend
☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____
To be determined for 1st floor commercial space and dependent on needs of commercial tenants.

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☐No

l. Hours of operation. Answer all items which apply.

i. During Construction:
- Monday - Friday: 7:00 AM to 7:00 PM
- Saturday: 7:00 AM to 5:00 PM
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:
- Monday - Friday: To be Determined [Commercial]
- Saturday: TBD
- Sunday: TBD
- Holidays: TBD

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed mixed-use redevelopment project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

There will be outdoor lighting per the lighting standards contained in the Town of Amherst Zoning Code.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☑ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☐ Yes ☑ No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☐ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☐ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☑ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): UB North Campus and Center for Inquiry

ii. If mix of uses, generally describe:

There are a wide assortment of land uses on properties zoned GB, MFR-5, etc. in the vicinity of the Project Site.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	6.5	6.74	.2
• Forested	0	0	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	0	0	0
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	1.2	1	(.2)

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

c. Is the project site presently used by members of the community for public recreation? ☐ Yes ☑ No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☑ Yes ☐ No
If Yes,
i. Identify Facilities:
University of Buffalo North Campus and People Inc. Group Home

e. Does the project site contain an existing dam? ☐ Yes ☑ No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐ Yes ☑ No
If Yes:
i. Has the facility been formally closed? ☐ Yes ☐ No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐ Yes ☑ No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐ Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐ Yes ☐ No
☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☐ Yes ☑ No
If yes, provide DEC ID number(s): _____
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☑ No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >1 feet

b. Are there bedrock outcroppings on the project site? ☐ Yes ☑ No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____ %

c. Predominant soil type(s) present on project site: Churchville Silt Loam 100 %

d. What is the average depth to the water table on the project site? Average: >3 feet

e. Drainage status of project site soils:
☐ Well Drained: _____ % of site
☐ Moderately Well Drained: _____ % of site
☑ Poorly Drained 100 % of site

f. Approximate proportion of proposed action site with slopes:
☑ 0-10%: 100 % of site
☐ 10-15%: _____ % of site
☐ 15% or greater: _____ % of site

g. Are there any unique geologic features on the project site? ☐ Yes ☑ No
If Yes, describe: _____

h. Surface water features.
i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐ Yes ☑ No
ii. Do any wetlands or other waterbodies adjoin the project site? ☑ Yes ☐ No
If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.
iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑ Yes ☐ No
iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☑ No
If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐ Yes ☑ No

j. Is the project site in the 100-year Floodplain? ☐ Yes ☑ No

k. Is the project site in the 500-year Floodplain? ☐ Yes ☑ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐ Yes ☑ No
If Yes:
i. Name of aquifer: _____

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

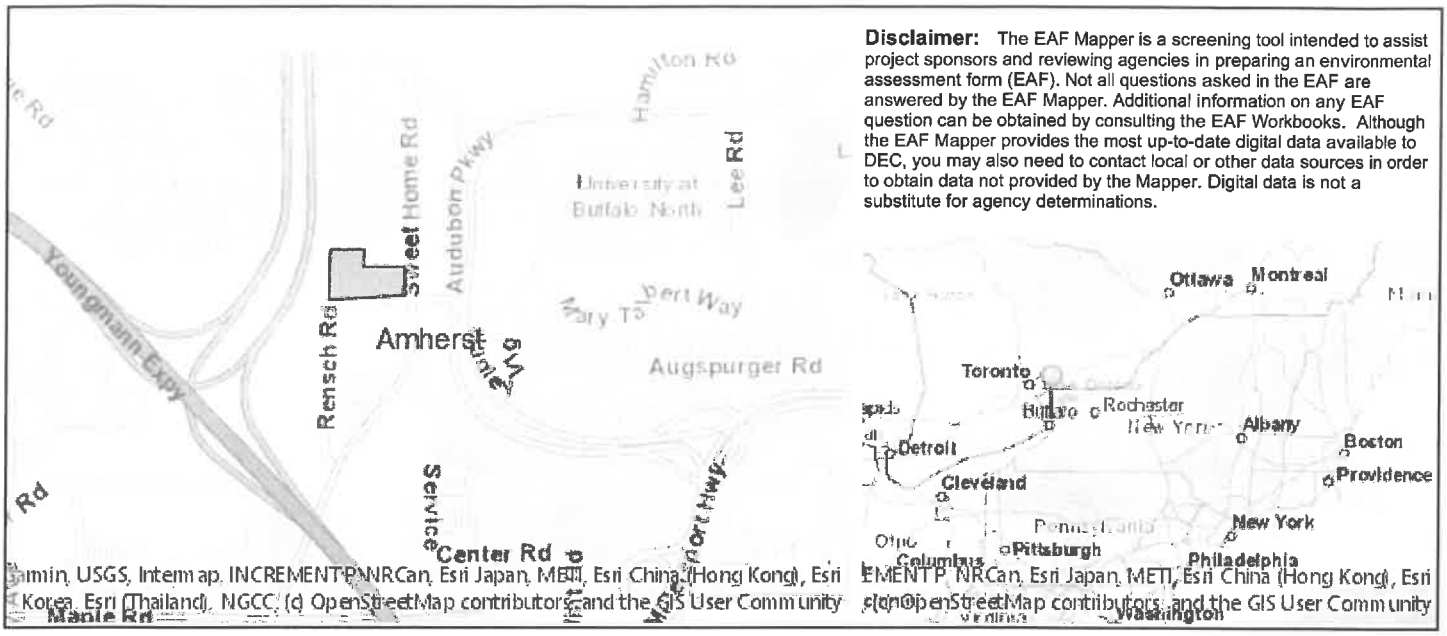
If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name North Forest Development LLC Date March 21, 2022

Signature _____ Title Project Counsel



Sean Hopkins, Esq.

EAF Mapper Summary Report

Sunday, March 13, 2022 1:43 AM

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	No
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	Yes
E.2.h.iii [Surface Water Features]	Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No
E.2.o. [Endangered or Threatened Species]	No

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

E.2.p. [Rare Plants or Animals]	No
E.3.a. [Agricultural District]	No
E.3.c. [National Natural Landmark]	No
E.3.d [Critical Environmental Area]	No
E.3.e. [National or State Register of Historic Places or State Eligible Sites]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.3.f. [Archeological Sites]	Yes
E.3.i. [Designated River Corridor]	No

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Rezoning of 1400-14034 and 1408-1416 Sweet Home Road from from RD to CTR-5 and CTR-8

TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Churchville Silt Loam	Severe	Severe	Severe	Severe	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   _x_ Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report prepared by Glynn Geotechnical Engineering dated February 11, 2004 have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? ☐ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? ☐ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? ☐ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: ☐ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project 269
   Source: Traffic Impact Study prepared by SRF Associates dated March 21, 2022.

8. Will blasting occur during construction? ☐ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes ☐ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    110,000 gpd average flow 440,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? ☐ Yes ☒ No

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Exhibit 3 – Legal Description of Property to be Rezoned from RD to CTR-5 and CTR-8

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

EXHIBIT 3 OF REZONING APPLICATION

LEGAL DESCRIPTION OF PROPERTY TO BE REZONED FROM RESEARCH DEVELOPMENT DISTRICT ("RD") TO CTR CENTER EIGHT ("CTR-8") AND CTR CENTER FIVE ("CTR-5")

1400-1404 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot No. 79, 174.00 feet south of the northeast corner of said Lot No. 79, said point also being the southeast corner of Liber 2713 of Deeds at page 120, said east line also being the center line of Sweet Home Road (width varies, originally 66 feet wide); thence westerly along a line parallel to the north line of said Lot No. 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75 the point or place of beginning; thence southerly along the west line of said Parcel No. 75 and bearing of S 00° 00' 20" W, 297.93 feet to a point; thence southwesterly along the west line of said parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.5 feet wide); thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the west line of deed recorded in the Erie County Clerk's Office on March 3, 2017 in Liber 11310 of Deeds at page 1116; thence northerly along a line parallel to the east line of said Lot No. 79 and bearing N 00° 00' 20" E, 330.11 feet to a point; thence easterly along a line parallel to the north line of said Lot No. 79 and bearing N 89° 38' 35" E, 426.50 feet more or less to the point or place of beginning and containing 3.175 Acres, more or less.

Excepting therefrom, that portion of premises acquired by the People of the State of New York by Notice of Appropriation dated May 20, 2005, recorded September 26, 2005 in Liber 11101 of Deeds, page 8475.

1408, 1412 and 1416 SWEET HOME ROAD [RD TO CTR-5]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot 79, 174.00 feet south of the northeast corner of said Lot 79, said point also being the southeast corner of Liber 2713 of deeds at page 120, said east line also being the centerline of Sweet Home Road (width varies, originally 66 feet wide); Thence westerly along a line parallel to the north line of said Lot 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75; Thence southerly along the west line of said Parcel No. 75 and bearing S 00° 00' 20" W, 297.93 feet to a point; Thence southwesterly along the west line of said Parcel No. 75 and bearing S 47° 59' 05" W, 33.65

Exhibit 5 – Responses to Questions 11A & 11B of the Rezoning Application

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

EXHIBIT 5

RESPONSES TO QUESTION 11 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-5 AND CTR-8

Question 11(A): **Description of the character of the proposed development:**

Response to Question 11(A): The proposed mixed-use project will be upscale in character and will feature an eight-story mixed use building along the Sweet Home Road frontage of the Project Site and two five-story buildings on the remainder of the Project Site. The existing office buildings located on the Project Site would be demolished in connection with the mixed-use redevelopment project. The proposed mixed-use redevelopment project requires the zoning classification of the Project Site to be amended from Research Development District ("RD") to CTR-8 Center 8 District ("CTR-8") and CTR-5 Center 5 District ("CTR-5").

The conceptual layout of the proposed mixed-use project is depicted on the full size Concept Site Plan [Drawing C-100] prepared by Carmina Wood Morris P.C. attached to this Rezoning Application. A reduced size copy of the Concept Site Plan is also provided at **Exhibit "7"**. It is important to mention that the layout of the proposed project as depicted on the Concept Site Plan provided is not meant to represent the final layout of the proposed mixed-use redevelopment project since modifications may be necessary based on the project review process and the preparation of fully engineered plans.

The proposed mixed-use redevelopment project will be consistent with the character of nearby parcels that have been rezoned by the Town during the past decade including the nearby student housing communities and mixed-use projects on properties on the west side of Sweet Home Road consisting of commercial space, apartments and hotels. Landscaping will be provided pursuant to a Landscaping Plan to be prepared by a licensed landscape architect during the site

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

plan review stage of the project and the landscaping will feature numerous trees, bushes and shrubs.

Question 11(B)(1): Rationale for rezoning request: 1. What was this site chosen?

Response to Question 11(B)(1): The Project Site is an appropriate location for the proposed project given the character and scale of nearby land uses and the close proximity to the University of Buffalo North Campus. A primary reason the Project Site was selected for the proposed mixed-use project is that it is designated as "Suburban Corridor" per Figure 6-A of the Comprehensive Plan.

Question 11(B)(2): Why cannot land be used with the existing zoning?

Response to Question 11(B)(2): The Project Site is currently zoned Research and Development ("RD") and can continue to be utilized as an office park. The Applicant is requesting that the Project Site be rezoned to CTR-8 and CTR-5 to accommodate the proposed mixed-use project. Nearly all of the nearby parcels on both sides of Sweet Home Road and Rensch Road in close proximity to the Project Site were rezoned to RD by the Town of Amherst in 1976, at the time the Town adopted a new zoning code.

The planning objective at that time was to provide RD zoned land that would accommodate uses that would benefit from close proximity to the UB North Campus. The development of the Project Site and parcels in the surrounding vicinity for research and development purposes did not occur and as a result the zoning classification of most of the properties in the vicinity have been amended in the past approximately fifteen years to accommodate existing land uses such as a hotel being constructed on GB zoned property at 1265 Sweet Home Road, the mixed-use projects on Rensch Road and the Villas on Rensch student housing community, located on approximately

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

twenty acres of property that was rezoned from RD to Multi Family Residential District Six ("MFR-6") by the Town Board in August of 2007.

The redevelopment of the Project Site for the higher intensity uses expressly permitted by the existing RD zoning classification would not be compatible with the existing character of the neighborhood. The existing RD zoning classification expressly allows large buildings to accommodate uses that involve high intensity commercial and industrial operations and that often involve 24/7 business hours as well high volume use of large tractor trailers. The expressly permitted uses of property zoned Research and Development ("RD") is set forth in Section 4-9-2A of the Zoning Code and includes intensive commercial facilities for the compounding, manufacturing and assembly of products such as automotive accessories, clothing and textiles, electronic equipment and appliances, furniture, medical and scientific equipment and supplies, pharmaceutical products as well as experimental research and testing facilities, warehouses and storage facilities and wholesale distribution facilities. A copy of Section 4-9 of the Zoning Code has been attached as **Exhibit "8"** of this Rezoning Application.

Question 11(B)(3): How will this rezoning impact surrounding properties?

Response to Question 11(B)(3): The proposed rezoning of the Project Site from Research and Development ("RD") to CTR-8 and CTR-5 will not result in any significant adverse impacts on surrounding properties. The proposed mixed-use project will be much more compatible with the existing land uses in the vicinity of the Project Site than the higher intensity uses expressly permitted by the existing long-standing RD zoning classification.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Question 11(B)(4): How will this rezoning impact the school system?

Response to Question 11(B)(4): The proposed mixed use project will have a positive impact on the Sweet Home Central School District since the property taxes that will be generated on an annual basis will be significantly higher than the current property taxes. The proposed project will not result in any significant increased demand for educational services since the residential units are not likely to attract a substantial number of families with school age children.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Exhibit 6 – Responses to Questions 16A, 16B, 16D & 16E of the Rezoning Application

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

EXHIBIT 6

RESPONSES TO QUESTION 16 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-5 AND CTR-8

Question 16(A)(1): **State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps and/or figures in the plan that support the proposed zoning at this location.**

Response to Question 16(A)(1): The request to amend the zoning classification of 1400-1404 Sweet Home Road RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 (collectively the "***Project Site***") to accommodate the proposed mixed-use redevelopment project is consistent with the adopted Bicentennial Comprehensive Plan. The Town of Amherst adopted the Bicentennial Comprehensive Plan in January of 2007 after completing a lengthy planning process that included numerous public meetings and public hearings involving the Comprehensive Plan Advisory Committee, the Planning Board and the Town Board.[1] In December of 2020, the Town Board most recently adopted amendments to the Bicentennial Comprehensive Plan. The Comprehensive Plan is intended to guide future growth and redevelopment in the Town.

Figure 6 of the Bicentennial Comprehensive Plan is the Conceptual Land Use Plan and it depicts the Project Site as being as being appropriate for "Commercial/Mixed Use" uses. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "9"**. The Conceptual Land Use Plan is intended to communicate the overall direction and concept of future development in the Town

[1] A copy of the resolution adopted by the Town Board on January 2, 2007 for the purpose of adopting the Bicentennial Comprehensive Plan pursuant to Town Law Section 272-a is included at the beginning of the Comprehensive Plan. This resolution recites the lengthy planning history that incorporated numerous opportunities for public input as well as a coordinated environmental review pursuant to SEQRA that involved the preparation a Generic EIS and the issuance of a Findings Statement.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

of Amherst. Figure 6-A of the adopted Bicentennial Comprehensive Plan is the titled Commercial and Mixed-Use Designations and it depicts the Project Site as being designated as "Suburban Center". The Project Site is located within the University Place geographic location per Figure 6-A of the Comprehensive Plan. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "10"**.

Question 16(A)(2): **Cite all text, map, and/or figures that must be amended to support the proposed zoning at this location and provide detailed suggested amendments.**

Response to Question 16(A)(2): The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 to accommodate the proposed mixed-use redevelopment project does not require an amendment to the Bicentennial Comprehensive Plan.

Question 16(A)(3): **State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:**

Response to Question 16(A)(3): Section 1-2-1 of the Zoning Code is titled "Purpose" and it states as follows:

> *"The purpose of this Zoning Ordinance and the intent of the legislative authority in its adoption is to promote the environment of the town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, building coverage and location of structures; by regulating and limiting population density; and for the aforesaid purposes, to divide the land within the limits of the town into districts of such number and dimensions generally consistent with the policies of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Ordinance."*

The proposed rezoning of the Project Site RD to CTR-8 and CTR-5 to accommodate the proposed mixed-use redevelopment project is consistent with the "Purpose" of the Zoning Code.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Section 1-2-2 of the Zoning Code sets forth the objectives of the Zoning Code. This section of the Zoning Code lists thirteen objectives that are discussed below as follows:

A. To protect the character and values of residential, institutional and public uses, business, commercial and manufacturing uses and to insure their orderly and beneficial development;

Response: The proposed rezoning of the Project Site from RD to CT5-5 and CTR-8 to accommodate the mixed-use redevelopment project will be consistent with the objective of protecting the character and value of existing land uses. The proposed rezoning will allow the Project Site to be utilized as a mixed-use project, which represents orderly and beneficial development.

B. To provide adequate open spaces for light, air and outdoor uses to include public, common and private open space areas;

Response: The proposed rezoning of the Project Site and the proposed mixed-use project will not be inconsistent with this objective.

C. To prevent overcrowding of land;

Response: The proposed mixed-use project will not result in the overcrowding of land. The project is consistent with the type of development designated as appropriate for the Project Site per Figure 6 and Figure 6-A of the adopted Comprehensive Plan.

D. To prevent excessive concentration of population and to prevent spare and uncoordinated development;

Response: The proposed rezoning of the Project Site will not result in excessive concentration of population and the mixed-use redevelopment project represents an example of coordinated development. The mixed-use redevelopment project will require Site Plan Approval from the Planning Board.

E. To regulate and control the location and spacing of buildings on the lot and in relation to the surrounding property generally consistent with the policies of the Comprehensive Plan.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Response: The responses to the Questions in this **Exhibit "6"** of the Rezoning Application set forth the reasons the proposed rezoning is consistent with the policies of the Comprehensive Plan.

F. To protect persons and property from damage and injury due to fire or flood;

Response: The Site Plan Application review process will trigger the need for an Engineer's Report and SWPPP prepared by a licensed engineer to be prepared for review and approval by the Town's Engineering Department. The mixed-use redevelopment project to be located on the existing office park property will not increase the likelihood of damage and injury due to fire and flood. The proposed mixed-use redevelopment project will be constructed per the stringent requirements of the NYS Building Code including the fire safety standards contained therein.

G. To preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective. There are not significant natural features located on the previously developed Project Site.

H. To assure that structure and land use arrangements are aesthetically harmonious with nearby areas and structures.

Response: The development of the Project Site in a manner consistent with the attached Concept Site Plan [Drawing C-100] will be aesthetically harmonious with nearby areas and structures. Conceptual color building renderings prepared by Brian Slevar, R.A. of Carmina Wood Morris DPC are attached as **Exhibit "11"**.

I. To regulate the location of buildings and intensity of uses in relation to streets according to plans so as to cause the least interference with and be damaged least by traffic movements and hence result in lessened street congestion and improved public safety.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Response: The proposed mixed-use project will have two (2) driveway connections onto Rensch Road as depicted on the Concept Site Plan [Drawing C-100].

J. To establish zoning patterns that insure economical extensions for sewers, water supply waste disposal and other public utilities, as well as development of recreation, schools and other public facilities;

Response: The Project Site has access to sanitary sewer and water lines as well as necessary public utilities to service the proposed mixed-use redevelopment project.

K. To guide the future development of the town so as to being the gradual conformity of land, structures and uses generally consistent with the policies of the Comprehensive Plan.

Response: The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 is consistent with this objective since the infill mixed-use redevelopment project is consistent with the policies contained in the Comprehensive Plan.

L. To accomplish the specific intents and goals set forth in the introduction to the respective sections.

Response: The proposed rezoning of the Project Site will be consistent with this objective.

M. To protect the community from visual pollution resulting from the unregulated use of signs and other advertising devices.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective.

Question 16(C): Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

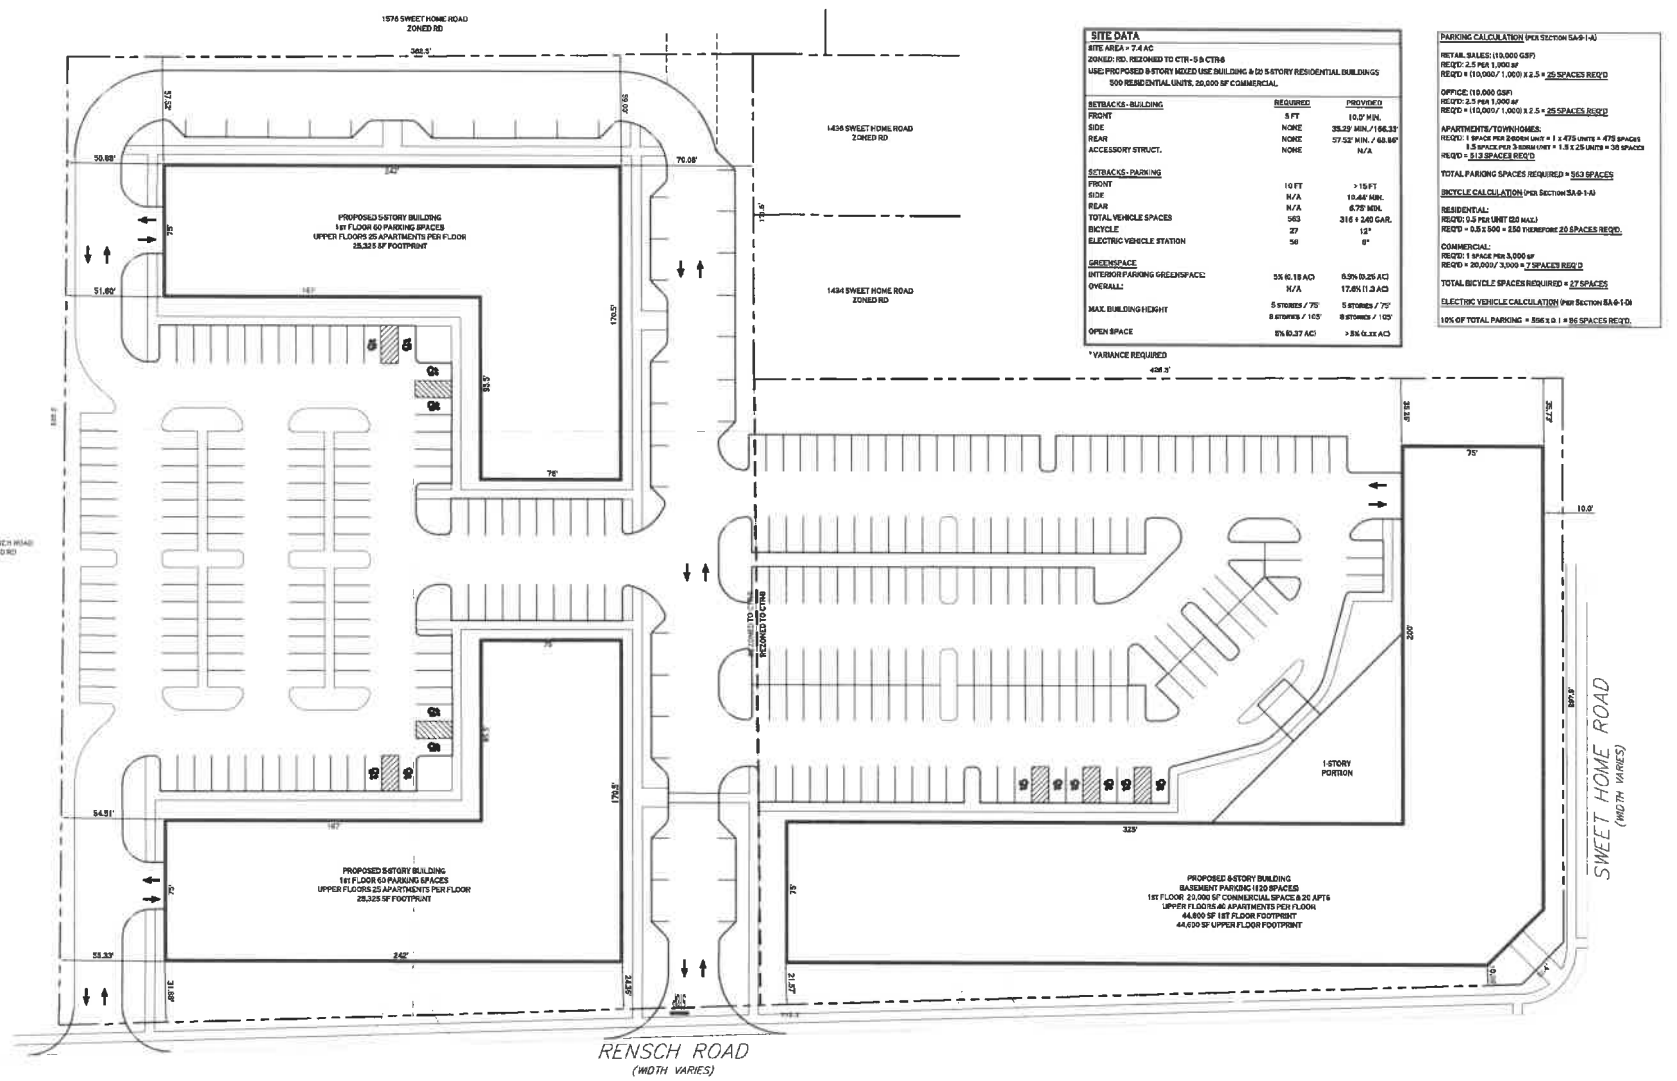
Response to Question 16(C): The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 is compatible with the present zoning and conforming uses of nearby properties and the character of the neighborhood. The Project Site is currently zoned RD which would allow the Project Site

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

to be redeveloped for intensive uses permitted per Section 4-9 of the Zoning Code. A copy of Section 4-9 of the Zoning Code is provided at **Exhibit "8"**.

Question 16(D): **Suitability of the subject property for uses permitted by the current versus the proposed district:**

Response to Question 16(D): The Project Site is much more suitable for uses permitted by the proposed CTR-5 and CTR-8 zoning classifications than the existing RD zoning classification.



Question 16(E): **Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:**

Response to Question 16(D): The proposed change in the zoning classification of the Project Site from RD to CTR-5 and CTR-8 to accommodate the proposed mixed-use redevelopment project will have positive impacts on the balance of uses in the Town by providing 1st floor commercial space and apartments for lease at an infill location in a portion of the Town in close proximity to the UB North Campus that has been designated as appropriate for mixed-use infill redevelopment as depicted on the Concept Site Plan [Drawing C-100].

Re: Application to Amend the Zoning Classification of 1400-1404 Sweet Home Road from RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 & Supporting Documentation – Town of Amherst
Applicant/Project Sponsor: North Forest Development LLC c/o Roy Jordan
File No. 10208.1

Dear Scott:

This letter and the enclosed documentation is being submitted on behalf of North Forest Development LLC ("Project Sponsor") in connection with its request to amend the zoning classifications of 1400-1404 Sweet Home Road from RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 to accommodate a mixed-use redevelopment project (collectively the "Project Site"). Enclosed please find the following:

1. Original and thirteen (13) copies of the Rezoning Application and supporting documentation consisting of Exhibits "1" to "11". The Exhibits to the Rezoning Application consist of the following:

   - **Exhibit 1:** Authorization Letter signed by Roy Jordan dated March 15, 2022;
   - **Exhibit 2:** Part 1 of the Full Environmental Assessment Form prepared pursuant to the State Environmental Quality Review Act ("SEQRA");
   - **Exhibit 3**: Legal description of property to be rezoned from RD to CTR-5 and CTR-8;
   - **Exhibit 4:** Reduced size copy of the Survey of Project Site [Note: Full size copy of the Survey is also attached];
   - **Exhibit 5:** Responses to Questions 11A & 11B of the Rezoning Application;
   - **Exhibit 6:** Responses to Questions 16A, 16B, 16D & 16E of the Rezoning Application;
   - **Exhibit 7:** Reduced size copy of the Concept Site Plan [Drawing C-100] as prepared by Carmina Wood Morris DPC [Note: Full size copy of the Concept Plan is also attached];
   - **Exhibit 8:** Copy of Section 4-9 of the Zoning Code [titled "Research and Development District (RD)"];

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

- **Exhibit 9:** Color copy of Figure 6 of the Bicentennial Comprehensive Plan;
- **Exhibit 10:** Color copy of Figure 6-A of the Bicentennial Comprehensive Plan; and
- **Exhibit 11:** Color Conceptual Building Renderings as prepared by Brian Slevar, AIA of Carmina Wood Morris DPC;

2. Three (3) copies of the Geotechnical Engineering Report prepared by Glynn Geotechnical Engineering;

3. Four (4) copies of the Traffic Impact Study prepared by SRF Associates;

4. One (1) copy of the Draft Local Law

I have also enclosed a check for the filing fee. The Project Sponsor is requesting that the Planning Board hold a public hearing regarding the requested rezoning of the Project Site from RD to CTR-5 and CTR-8 during its meeting to be on **Thursday, May 19th at 6:30 p.m.**

It would be appreciated if the Planning Department would provide a copy the enclosed Application and supporting documentation for the proposed mixed-use redevelopment project to the Erie County Division of Environment and Planning ("ECDEP") for the purpose of complying with the referral requirement pursuant to NYS General Municipal Law §239-m since Sweet Home Road is a NYS Highway.

The proposed mixed-use redevelopment project is a Type I action pursuant to SEQRA since it consists of more than 250 residential units and as such it requires the Town to conduct a coordinated environmental review.

Please provide a copy of the lead agency solicitation notice to be issued pursuant to SEQRA along with copies of all correspondence, departmental reviews, etc. received by the Planning Department to my office as well as the following individuals involved in the proposed mixed-use redevelopment project:

1. Roy Jordan

I. INTRODUCTION

This report provides subsurface investigation data and foundation recommendations for the proposed building at 4180/4200 Rensch Road in the Town of Amherst, New York. Specifically, Glynn Geotechnical Engineering (GGE) has provided the following scope of services:

1. Observed the excavation of three test pits by North Forest Development.
2. Performed cone penetrometer testing at the proposed foundation subgrade to estimate an allowable bearing capacity.
3. Retrieved and classified soil samples in accordance with the Unified Soils Classification System (USCS) and prepared subsurface logs.
4. Provided laboratory testing on select samples to establish specific engineering properties and verify classifications.
5. Prepared a geotechnical report based on our findings.

This geotechnical study has been performed in accordance with a written January 13, 2004 GGE proposal and subsequent January 20, 2004 acceptance by North Forest Development. GGE was provided with a site plan from North Forest Development to aid in our efforts.

Project efforts by GGE included test pits, penetrometer testing, laboratory testing, USCS classification, site class definition and the preparation of this report. The scope of this report specifically excludes any review of former site use, in particular, environmental or pollution related concerns.

II. PROJECT BACKGROUND

The project site is located on Rensch Road in the Town of Amherst, New York, specifically at addresses 4180 and 4200. The site is relatively flat and currently occupied by two houses on the southern portion of the property and dense forest on the northern portion of the property. The existing houses will be demolished prior to construction of the proposed development. As seen on the Floodplain and Wetland Location Plan located in Appendix E, the site is not located within a floodplain or within a state wetland.

The development is to consist of three office buildings with associated parking areas. To accommodate for the low site elevation and to provide the necessary grades for sanitary and storm sewers, North Forest Development plans to raise the existing site elevation by 2 to 3 feet.

III. SITE GEOLOGY

The underlying geological conditions at the site are the result of the last glacial advance of the Pleistocene Epoch, known as the Wisconsinan Glacial Stage. As the glaciers transgressed across the Western New York terrain, they carved and crushed the underlying existing soil and rock to form glacial till.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Civil • Structural • Geotechnical • Materials Testing • Consulting

The surficial geology of the Rensch Road site is characterized by a thin stratum of clayey lake sediment overlying glacial till and shallow bedrock. The bedrock consists of shale, dolostone and gypsum of the Late Silurian Salina Group.

The Erie County Soil Survey identifies the site soils as belonging to the Churchville silt loam (CoA). This soil is deep and somewhat poorly drained, consisting of a thin mantle of clayey lake sediment underlain by glacial till. The soil is characterized by a slow permeability and a perched seasonal water table in the upper subsoil from December through May, which may lead to ponding in some areas. A Soil Survey Plan has been included in Appendix D for reference.

IV. FIELD INVESTIGATION AND SUBSURFACE CONDITIONS

Site investigation efforts consisted of three test pits performed by North Forest Development on January 27, 2004 and observed by GGE. One test pit was performed at each building location to provide the subsurface information necessary for the construction of all three buildings as well as satisfy the Town of Amherst preliminary geotechnical requirements of one soil boring per every 3.5 acres of site. A Site Plan indicating test pit locations can be found in Appendix C. GGE is confidant the extent of the investigation was sufficient to accurately characterize the subsurface conditions and provide the information necessary to prepare this report.

The subsurface soils were classified by GGE and assigned Unified Soil Classification System (USCS) classifications in accordance with ASTM D 2488 "Description and Identification of Soils (Visual – Manual Procedure)".

Subsurface conditions are generally characterized as follows:

0.0' – 1.0'	Dark brown topsoil.
1.0' – 3.0'	Moist, brown and tan, slightly mottled, stiff, silt (ML).
3.0' – 6.0'	Moist, light tan and gray, slightly mottled, stiff, sandy, silty clay with gravel (CL-ML) and bedrock fragments.
	Shale bedrock was encountered at a depth of 6.0 feet in all test pits with the exception of TP-2, where gypsum was encountered.

Clay fill was encountered in test pit TP-1. The original topsoil layer existed at a depth of 1.0 to 2.0 feet below the existing ground elevation. The removal of this material is imperative below any structural areas, including foundations, slabs on grade and parking facilities.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Free groundwater was not encountered upon completion of the test pit excavations. The groundwater table is believed to be below the elevation of the bedrock. However, the slow permeability of the fine-grained soils will likely produce a perched water table at or near the ground surface during and after storm events and throughout winter and spring months. See section I.10 of this report.

Specific subsurface conditions can be found in Appendix A, Soil Investigation Logs. Laboratory testing data for select samples can be found in Appendix F.

V. GEOTECHNICAL EVALUATION AND FOUNDATION RECOMMENDATIONS

A. Bearing Capacity and Foundation Recommendations

The site subsurface conditions will permit the construction of a shallow foundation system consisting of conventional strip and spread footings. Due to the importation of fill to raise the site elevation, the footings will bear at an elevation of approximately 1.0 foot below existing grade on the compact silt directly beneath the surficial topsoil. All surficial topsoil must be removed from beneath structurally loaded areas. Based on a settlement criterion of 1.0 inch, the allowable bearing capacity for this material has been estimated by GGE to be 4000 psf. The bearing capacity was tested in the field using an ELE cone penetrometer.

The contractor must remove all buried topsoil located in the vicinity of TP-1 prior to constructing foundations.

B. Pavement and Slabs on Grade

GGE recommends that all slabs be designed using a recognized standard procedure. The text "Designing Floor Slabs on Grade" by Ringo and Anderson (ASBM 0-924659-34-3) identifies several methods of floor slab design. Slabs on grade and pavement will be constructed on imported fill due to the proposed elevation of the site finished grades.

Design and construction of floor slabs should be based on the following minimum recommendations:

1. Remove all topsoil and organic subsoil including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade and replace yielding or "boiling" soils. Do not place any fill over saturated ground.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

3. Compact imported fill soil to 95% of the modified proctor maximum density (ASTM D-1557), at a moisture content within 2% of optimum.
4. Place one 6" lift of select structural fill (NYSDOT Item 304.2.02, Type 4). Compact all fill as specified in item 3 above.
5. Install structural concrete floor slab. Provide sufficient joints and flexibility at perimeter walls.

Design and construction of pavement should proceed in accordance with generally accepted criteria as follows:

1. Remove all topsoil, organic subsoil and debris including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade to reveal soft and yielding soil. Use a fully loaded 10-wheel dump truck weighing at least 30 tons or a smooth drum roller having an effective force of at least 600 pounds per linear inch of roller width. Any area exhibiting deflections in excess of 0.5 inches or rutting should be classified as unsuitable. These areas should be reworked and compacted to produce an acceptable response or over excavated and replaced with suitable fill. The depth of the undercut and type of soil fill will depend on the soil material encountered, weather conditions and the bearing conditions at the base of the undercut. The site geotechnical engineer must consider each factor if the above conditions are encountered.
3. Install ditches, lateral drains, weeps and storm drainage piping. Backfill over the pipe bedding stone with native soils.
4. Place common fill as necessary to achieve design subgrade. Common fill can be any soil or processed material except Silt soil – USCS designation ML. The top 12 inches must be structural fill. Compact all fill to a minimum 95% of the maximum modified proctor density (ASTM D-1557-78), within a moisture range of 2% $\pm$ of the optimum moisture content. The top surface of the subgrade must be "sealed" with a smooth drum roller and pitched to drain such that the embankment soils cannot become saturated.
5. Once the subgrade has been established, the surface should be covered by a suitable geotextile selected for drainage and reinforcement properties. The geotextile shall have minimum (MARV) strength properties meeting the requirements of an AASHTO M 288-96 Class 2 geotextile. The material shall also have a minimum permittivity of 0.05 sec^{-1} and an AOS of less than 0.6 mm. Installation shall conform to the manufacturers recommendation for overlap.
6. Construct flexible pavement system as follows: (or equivalent structural system)

   a) Minimum 12 inch thick layer of 2" crushed stone meeting requirements of NYSDOT item 304-2.02, type 4 and the well graded qualifications of ASTM D-2487. Compact

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

with a minimum of 5 passes of a smooth drum vibratory roller having an effective load of 600 pounds per linear inch. The finished surface should be uniform and dense. Avoid handling procedures that cause segregation.

b) Minimum 3 inch asphalt concrete binder, NYSDOT item 403.13, type 3.

c) Minimum 1-1/2 inch asphalt concrete top, NYSDOT item 403.18 or 403.19.

In the event the binder layer is used as a working surface for access to buildings under construction the surface must be power washed, not just swept, and a tack coat should be applied prior to installation of the top course. In addition, any yielding area of pavement binder should be removed and replaced prior to application of the top course.

All site contractors should be notified that roadways and parking areas will not support repeated travel by construction loads. Pavement and subgrade failure can be anticipated in areas that receive a high volume of heavy construction traffic. To preclude the overstressing of the pavement system it is recommended that haul roads be located in non-critical areas. As an option, the base course of stone can be overbuilt to a total thickness of twenty (20) inches to serve as a haul route. The additional thickness of stone and all areas of soil material that has contaminated the stone base should be removed prior to paving. Failure to remove fine grained soils from the stone base may cause pavement distress in the form of heaving resulting from freeze thaw effects.

Note that post construction heaving and cracking of pavement is often the result of poor compaction around catch basins and behind curbs. Loose material around these areas allows surface water to migrate beneath the pavement, providing increased potential for heaving due to ice build up during winter months and deterioration of the parking base during warmer months. The contractor should make sure to properly compact these areas. Also, weep holes should be installed into the bottom of catch basins to permit the drainage of any water that does manage to migrate beneath the pavement.

C. Excavation and Backfill

Excavation will basically consist of the removal of topsoil in most locations and the removal of buried topsoil in the vicinity of TP-1. The buried topsoil is typically covered by approximately 1.0 foot of soft clay. Excavation efforts are anticipated to be easy.

If deeper excavations are to be performed, the contractor should be sure to comply with OSHA standards. The soil encountered at this site should be classified by an OSHA competent person in accordance with 29 CFR, Part 1926, OSHA Subpart P, "Excavations and Trenches" prior to and during excavation.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Civil • Structural • Geotechnical • Materials Testing • Consulting

From the testing and investigation program, GGE estimates the site soils can be classified as Type B under the OSHA classification guidelines. This classification may change depending on other site criteria and moisture conditions at the time of construction. An OSHA competent person should judge the potential need for excavation bracing and excavation geometry in the field.

Native soils may be used for general fill against the foundation walls once the concrete has properly cured. All fill soil should be placed in lifts and compacted, with care taken not to damage the foundation walls. The fill at grade elevation should be sloped to drain away from the foundation walls to eliminate the potential for standing water to accumulate along the foundation. Note that drying of the native soils may be required to achieve optimum compaction.

C. Mitigation of Expansive Soils

Subsurface soils at this site are predominantly silt (ML) and silty clay with gravel (CL-ML). Some clay soils undergo volumetric change (shrinkage and swelling) with changes in moisture and degree of saturation, particularly soils classified as fat clay (CH). Fat clay is classified as a soil with a liquid limit of 50 or greater. The liquid limit is the water content, in percent, of a soil that defines the boundary between the plastic and viscous fluid states. The subsurface soils encountered at this site do exhibit characteristics of soils with a high shrink/swell potential.

D. Mitigation of the effects of Liquefaction

Liquefaction is the process where saturated cohesionless (granular) soils, specifically, fine sands and silts, transform from a solid into a liquid as a result of an increase in the pore water pressure caused by repeated disturbance such as experienced during seismic events. Liquefaction results in an immediate loss of shear strength, and thus, bearing capacity, causing total and differential settling due to a quick consolidation of the soils.

The soils located at the footing subgrade and below at this site are silts and silty clays and do not pose a concern for liquefaction. Soils with a silt and clay content in excess of 35% typically do not have the potential to liquefy. As seen in Appendix F, the subgrade material falls outside of the specification window for liquefaction potential as identified on the grain size analysis.

E. Expected Total and Differential Settlement.

Load induced total settlement for foundations bearing on undisturbed native soil is estimated to be primarily long-term (primary consolidation) settlement. The total settlement is estimated to be less than 1.0 inch for shallow foundations constructed in accordance with GGE's recommendations.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Subsurface soils across the site are very consistent and exist in layers of uniform depths. The potential for differential settlement due to varying soil conditions over the building footprint is minimal under uniform bearing pressures.

F. Varying Soil Strength

Upon excavation of the footings, if soil types or moisture contents are found to be different than those encountered during the test pit excavation and represented within this report, the bearing capacity of the variable soil will need to be reevaluated by a qualified Geotechnical Engineer. Likewise, the footing design will then require adjustment to accommodate the bearing pressure on soils of varying bearing capacities.

G. Site Class Definition

In accordance with Section 1615 (Earthquake Loads – Site Ground Motion) of the NYS Building Code, the site is classified as Site Class C. The site classification is based upon subsurface conditions in the upper 100 feet, which consist of 6 feet of dense soil overlying 94 feet of rock.

The maximum considered earthquake ground motion for this site is interpolated as .320g for short period spectral response acceleration and .064g for a one second spectral response acceleration in accordance with New York State Code figures 1615(1) and 1615(2). Based on Site Class C, the maximum considered earthquake spectral response acceleration for this site is calculated as .380g for short period spectral response acceleration (S_{MS}) and .108g for a one second spectral response acceleration (S_{M1}) in accordance with New York State Code section 1615.1.2.

The design spectral response accelerations, based on the maximum considered earthquake spectral response accelerations, are .253g for short period design spectral response acceleration (S_{DS}) and .072g for one second design spectral response acceleration (S_{D1}). In accordance with tables 1616.3(1) and 1616.3(2), the site is classified as Seismic Design Category B.

H. General Recommendations

The following comments are relative to all foundation work unless specifically noted otherwise:

1. No fill material or concrete should be placed in water, over saturated subgrade or over frozen subgrade.
2. Upon completion of excavation for footings, bearing grades should be compacted to densify soil loosened by the backhoe bucket. Proper construction practice will assure the development of the anticipated bearing strength and reduce settlement potential.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

3. Excavations must not unnecessarily extend below the design subgrade elevation.
4. If additional undercut is necessary, the excavation bottom should be graded to a uniform elevation. Undercut "pockets" should be avoided.
5. Backfill all foundations prior to applying loads.
6. Extreme care must be exercised and conformance to OSHA standards is mandatory during excavation and trench work.
7. All topsoil and organic soils should be removed from any load bearing areas, including buried topsoil from previous fill efforts.
8. The use of a "mud" mat should be considered to protect bearing grades during any extended period or when construction proceeds during inclement weather.
9. Foundation bearing grades should not be allowed to freeze either prior to or after placement of concrete. Insulating blankets should be used to cover bearing grades plus 1 foot perimeter outside forms or completed footings until backfill is placed.
10. The site contractor should maintain proper grades for runoff control and seal roll all exposed areas. All excavations should be sloped to drain with sumps to permit dewatering during construction. The fine grained foundation subgrade will lose considerable strength if exposed to standing water for long periods of time. Any saturated subgrade should be dried and recompacted or removed to an acceptable bearing level prior to placement of subsequent layers of fill or concrete.

VI. SUMMARY

The site subsurface conditions are well suited for the proposed development and will provide a suitable subgrade for the proposed construction pending strict conformance with the recommendations provided within this report. The recommendations and engineering evaluations provided in this report are based on the encountered subsurface conditions at 4180/4200 Rensch Rd and pertinent data supplied by North Forest Development. Alteration of the plans, including relocation of the house or any abnormal foundation loading may serve to invalidate this report. Do not utilize this evaluation for any other type of structure. Please contact our office if major project changes are made or if encountered soils vary from conditions noted in this report.

Respectfully submitted,

G. Edward Lover

EXECUTIVE SUMMARY

OVERVIEW

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

The proposed mixed-use project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed project and new uses. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units to be marketed as student housing (1,025 bedrooms)

Access to the proposed mixed- project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed Concept Site Plan as prepared by Carmina Wood Morris.

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and reviewed the projected trip generation estimates. The difference between the full development trip generation estimates in the study

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the New York State Department of Transportation.

CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.

7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

I. INTRODUCTION

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

II. LOCATION

The proposed project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed mixed-use project. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The project site location and study area are illustrated in **Figure 1** (all figures are included at the end of this report).

III. EXISTING HIGHWAY SYSTEM

A. Vehicular Network Description

The following information outlined in **Table I** provides a description of the existing roadway network within the project study area. **Figure 2** illustrates the lane geometry at each of the study intersections and the Annual Average Daily Traffic (AADT) volumes on the study roadways. The AADTs reflect the most recently collected data obtained from the New York State Department of Transportation (NYSDOT). Where data is not available or up to date, Average Daily Traffic (ADT) volumes are based upon an extrapolation of turning movement counts performed by SRF Associates.

Functional classification of highways within the study area is determined by the NYSDOT and the Federal Highway Administration (FHWA). Definitions of the functional classifications shown in **Table I** are provided after the table.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

TABLE I: EXISTING HIGHWAY SYSTEM

ROADWAY	CLASS[1]	AGENCY[2]	SPEED LIMIT[3]	TRAVEL LANES[4]	TRAVEL PATTERN/ DIRECTION	EST. AADT & SOURCE[5]
Sweet Home Road (952T)	16	NYSDOT	45	4	Two-way/ North-South	17,040 NYSDOT (2018)
Maple Road (W) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	24,564 NYSDOT (2019)
Maple Road (E) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	23,377 NYSDOT (2018)
Rensch Road	19	Town	30	2	Two-way/ East-West	2,950 SRF (2022)

Notes:
1. State Functional Classification of Roadway.
2. Jurisdictional Agency of Roadway.
3. Posted or Statewide Limit in Miles per Hour (mph).
4. Number of travel lanes. Excludes turning/auxiliary lanes developed at intersections.
5. Estimated AADT in Vehicles per Day (vpd). AADT Source (Year).

Urban Principal Arterial – Other (Class 14)

An urban principal arterial serves major activity centers, can interconnect and augment higher level arterials, serve trips of moderate length, and serve demand for intra-area travel between the central business district and outlying residential areas. Unlike access-controlled arterials, abutting land uses can be served directly.

Urban Minor Arterial (Class 16)

An urban minor arterial provide service for trips of moderate length, serve geographic areas that are smaller than higher arterial roadways, and offer connectivity to higher arterial systems. These roadways distribute traffic to smaller geographic areas, provide more land access without disrupting neighborhood access, and provide urban connections for rural collectors.

Urban Local (Class 19)

Locally classified roads account for the largest percentage of all roadway mileage and includes all facilities not in one of the higher systems. Local roadways do not typically serve as bus routes, are often designed to discourage through traffic, and have the lowest degree of mobility.

B. Multi-Modal Network Description

This evaluation reviewed the study area's pedestrian, bicycle, and transit network via field and aerial reconnaissance. A description of the multi-modal infrastructure is described hereafter.

Pedestrian & Bicycle Facilities

Sidewalks are located within the study area. The signalized intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road feature pedestrian countdown signals and crosswalk striping.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Dedicated bicycle lanes are in place along Sweet Home Road. Where there are no dedicated facility, cyclists are permitted to share the road with motorists.

Transit Facilities

The Niagara Frontier Transportation Authority (NFTA) provides regional bus and metro rail service. The nearest bus stops are at the intersections of Sweet Home Road/Rensch Road and is serviced via Route 35 (Sheridan).

IV. EXISTING TRAFFIC CONDITIONS

A. Peak Intervals for Analysis

Given the functional characteristics of the study corridors, adjacent land uses, and the proposed land uses for the project site (residential and commercial), the peak hours selected for analysis are the weekday commuter AM and PM peak periods. The combination of site traffic and adjacent through traffic produces the greatest demand during these time periods.

B. Existing Traffic Volume Data

Turning movement traffic counts were collected by SRF at the study intersections described in Section II on Thursday, March 3, 2022. Traffic counts were conducted from 7:00-9:00 AM and 4:00-6:00 PM. All traffic counts were conducted while local schools and the University at Buffalo were in session. The traffic volumes were reviewed to confirm the accuracy and relative balance of the collective traffic counts. For the purposes of this analysis, the data are utilized with the actual peak hours at each individual intersection. Using the actual peaks at each intersection provides a worst-case scenario when adding project related traffic. The unadjusted weekday AM and PM peak hour volumes are reflected in **Figure 3A**.

It is noted, however, that traffic volumes may be impacted by the COVID-19 pandemic. The NYSDOT released a study in February 2021 that described the effect the COVID-19 pandemic had on traffic in New York State in 2020. The NYSDOT study illustrated the percent difference 2020 weekday ADTs to average weekday ADTs prior to 2020. Additionally, traffic volumes were compared to traffic data obtained in 2018 traffic data at the intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road before the COVID-19 pandemic by SRF Associates.

The historic counts in the study area were used to adjust the collected data to reflect 2022 representative traffic conditions by increasing the collected traffic volumes for specific movements, such as traffic entering and exiting the University at Buffalo. This is consistent with NYSDOT and ITE methodology for adjustments related to collected traffic volumes affected by the COVID-19 pandemic. The adjustments are reflected in the Appendices.

Figure 3B illustrates the representative 2022 weekday AM and PM peak hour base volumes used for analysis purposes in this study.

C. Field Observations

The study intersections were observed during both peak intervals to assess current traffic operations. Signal timing and phasing information was obtained by the NYSDOT to determine peak hour phasing plans and phase durations during each interval. This information was used to support and/or calibrate capacity analysis models described in detail later in this report.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

D. Existing Crash Investigation

The purpose of this crash analysis is to identify inherent safety issues by studying and quantifying historical crashes at the study intersections and identifying potential crash patterns and clusters.

A crash cluster is defined as an abnormal occurrence of similar crash types occurring at approximately the same location or involving the same geometric features. The severity of the crashes should also be considered. A history of crashes is an indication that further analysis is required to determine the cause(s) of the crash(es) and to identify what actions, if any, could be taken to mitigate the crashes.

A crash investigation within the study area was conducted to assess the safety history from January 1, 2017, through December 31, 2019. The data was provided by the New York State Department of Motor Vehicles through a Freedom of Information (FOIL) request. Given that the COVID-19 pandemic influenced daily travel in 2020 and 2021, any reported crashes were dismissed from the study.

Reportable (non-injury, injury, and fatal injury) type crashes are defined as damage to one person's property in the amount of $1,001 or more. The Non-Reportable type crashes result in property damage of $1,000 or less. Crash rates were computed for the study intersection and compared with NYSDOT average crash rates for similar intersections, as summarized in **Table II**. Intersection rates are listed as crashes per million entering vehicle (CR/MEV). Pertinent crash data is provided in the Appendices.

TABLE II: EXISTING CRASH RATES

INTERSECTION	TOTAL CRASHES	NUMBER OF ENTERING VEHICLES	ACTUAL CRASH RATE	STATEWIDE AVERAGE CRASH RATE
Sweet Home Road/Rensch Road	32	28,589	1.02	0.26
Sweet Home Road/The Station	1	22,705	0.04	0.07
Sweet Home Road/Maple Road	64	38,863	1.50	0.26

Notable crash clusters are approaches with three or greater identifiable consistent crash types.

Sweet Home Road/Rensch Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 3.9 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (17), fixed object (4), left turn (4), overtaking (2), right turn (2), right angle (1), sideswipe (1), bicycle (1). The bicycle crash resulted in an injury as the cyclist was crossing the road with traffic.

The following patterns were reported:

- Rear end
  - Northbound (nine crashes)
  - Southbound (seven crashes)
- Left turn
  - Eastbound (three crashes)

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

- Fixed object
    - Northbound (three crashes)

The reported rear end crashes (53%) are characteristic of moderate to heavily trafficked signalized intersections. The causes of the rear end crashes were generally due to driver error, unsafe speeds, or following too closely. There are no correctable deficiencies at the intersection that could be improved to significantly improve safety.

Sweet Home Road/The Station

As shown in **Table II**, the study intersection has a crash rate that is lower than the statewide average crash rate for similar intersections. No discernible crash patterns exist; thus, no geometric improvements are recommended.

Sweet Home Road/Maple Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 5.7 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (24), left turn (15), right angle (10), overtaking (7), right turn (3), head on (2), fixed object (2), pedestrian (1). The pedestrian crash resulted in an injury as the pedestrian was crossing the road with traffic.

The following patterns were reported:

- Rear end
    - Northbound (three rashes)
    - Southbound (nine crashes)
    - Eastbound (four crashes)
    - Westbound (eight crashes)
- Left turn
    - Northbound (six crashes)
    - Southbound (seven crashes)
- Right angle
    - Northbound (four crashes)
    - Eastbound (three crashes)
- Overtaking
    - Westbound (four crashes)

The intersection is large consisting of numerous lanes in each direction and is frequently traveled during the peak hours. Rear end (37%) and left turn (23%) crashes are the most prominent. Most of the left turn crashes occurred due to drivers failing to yield the right of way due to the permissive movement during the thru movement on green. These drivers are likely to turn with smaller than desirable gaps in traffic and potentially creating an unsafe condition.

To correct this condition, protected left turn phases would reduce these crashes; however, this would also reduce the overall capacity of the intersection. One such improvement may be to upgrade the signals to change the green signal to flashing yellow arrow for permissive left turns. No geometric improvements are recommended.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

V. FUTURE AREA DEVELOPMENT AND LOCAL GROWTH

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and review the projected trip generation estimates. The difference between the full development trip generation estimates in the study and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the NYSDOT. All ambient growth calculations are included in the Appendices. The background traffic volumes are depicted in **Figure 4**.

VI. PROPOSED DEVELOPMENT

A. Project Description

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units marketed as student housing (1,025 bedrooms)

Access to the proposed project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed site plan as prepared by Carmina Wood Morris.

B. Site Generated Traffic

The volume of traffic generated by a site is dependent on the intended land use and size of the development. Trip generation is an estimate of the number of trips generated by a specific building or land use. These trips represent the volume of traffic entering and exiting the development. Trip Generation Manual (11th Edition) published by the Institute of Transportation Engineers (ITE) is used as a reference for this information. The trip rate for the peak hour of the generator may or may not coincide in time or volume with the trip rate for the peak hour of adjacent street traffic. Volumes generated during the peak hour of the adjacent street traffic and proposed land use, in this case, the weekday commuter AM and PM peaks, represent a more critical volume when analyzing the capacity of the system; those intervals will provide the basis of this analysis.

The proposed mixed-use project consists of three different land uses (residential, office, and retail) and is considered mixed-use (multi-use). According to the Institute of Transportation Engineers Trip Generation Handbook, (3rd Edition), "…a multi-use development is typically a single real-estate project that consists of two or more ITE land use classifications between

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

which trips can be made without using the off-site road system. Because of the nature of these land uses, the trip-making characteristics are interrelated, and some trips are made among the on-site uses. This capture of trips internal to the site has the net effect of reducing vehicle trip generation between the overall development site and the external street system (compared to the total number of trips generated by comparable, standalone sites)." "In some multi-use developments, these internal trips can be made by walking or by vehicles entirely on internal pathways or internal roadways without using streets external to the site."

The Handbook indicates internal capture rates for trips within a multi-use development to vary between residential, office, retail, restaurant, hotel, entertainment and recreational uses during the AM and PM peak hours. Given the proposed land use components and interconnection between these components, multi-use total volume trips will likely occur.

Methodology contained in National Cooperative Highway Research Program (NCHRP) Report 684: Enhancing Internal Trip Capture Estimation for Mixed-Use Development was consulted to perform the mixed-use adjustment. The interactive spreadsheet considers baseline mode shares and vehicle occupancy factors for the proposed land uses, as described in the Handbook, as well as average land use interchange distances (feet walking distance) to determine the internal capture percentage. This completed spreadsheet model is included in the Appendices. The NCHRP 684 model reported an internal baseline capture percentage of 5% during the AM peak hour and 10% during the PM peak hour.

These multi-use trip projection adjustments were applied to the respective site generated trips and subtracted from the traffic entering and exiting the site during the peak periods.

Table III shows the total site generated trips, internal trips, and resulting primary trips that are added to the existing highway system for full development of the project. All trip generation information has been included in the Appendices.

TABLE III: SITE GENERATED TRIPS

DESCRIPTION	ITE LUC	SIZE	AM PEAK HOUR		PM PEAK HOUR	
			ENTER	EXIT	ENTER	EXIT
Residential	225	1,025 bedrooms	39	64	110	111
Office	710	±10,000 SF	13	2	2	12
Retail	822	±10,000 SF	14	10	33	33
Total Site Generated Trips			**66**	**76**	**145**	**156**
Internal Trips			*-4*	*-4*	*-16*	*-16*
Total Primary Trips			**62**	**72**	**129**	**140**

Note:
1. ITE LUC = ITE Land Use Code

Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

C. *Site Traffic Distribution*

The cumulative effect of site-generated traffic on the transportation network is dependent on the origins and destinations of that traffic and the location of the access drives serving the site. The proposed arrival/departure distribution of traffic generated by the proposed project is considered a function of several parameters, including:

- Proximity and access to the University at Buffalo
- Employment centers using Census Data
- Population centers using Census Data
- Commercial centers
- Proposed access locations
- Existing traffic patterns
- Existing traffic conditions and controls

Figure 6A shows the anticipated trip distribution pattern percentages for the traffic from the residential program and **Figure 6B** shows the anticipated trip distribution pattern percentages for the traffic from the commercial program. **Figure 7** illustrates the peak hour project site-generated traffic based on those percentages.

VII. FULL DEVELOPMENT VOLUMES

Proposed design hour traffic volumes are developed for the AM and PM peak hours by combining the background traffic conditions (**Figure 4**) and the new site generated traffic volumes (**Figure 7**) to yield the traffic volumes under full development conditions. The resulting design hour volumes for the proposed project are illustrated in **Figure 8** under full build-out conditions.

As stated, the existing site is currently occupied by office space. These tenants will be relocated upon full build-out of the proposed project. Traffic adjustments related to this condition is shown in the Appendices.

VIII. CAPACITY ANALYSIS

A. *Description of Capacity Analysis*

Capacity analysis is a technique used for determining a measure of effectiveness for a section of roadway and/or intersection based on the number of vehicles during a specific time period. The measure of effectiveness used for the capacity analysis is referred to as a Level of Service (LOS). Levels of Service are calculated to provide an indication of the amount of delay that a motorist experiences while traveling along a roadway or through an intersection. Since the most amount of delay to motorists usually occurs at intersections, capacity analysis focuses on intersections, as opposed to highway segments.

Six Levels of Service are defined for analysis purposes. They are assigned letter designations, from "A" to "F", with LOS "A" representing the conditions with little to no delay, and LOS "F" conditions with very long delays. Suggested ranges of service capacity and an explanation of Levels of Service are included in the Appendices. LOS “C” or better is generally desirable, but LOS “D” for signalized locations and LOS “E” for unsignalized are generally acceptable during peak periods so long as the volume to capacity ratio (v/c) is below 1.0.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

The standard procedure for capacity analysis of signalized and unsignalized intersections is outlined in the Highway Capacity Manual (HCM 2016) published by the Transportation Research Board. Traffic analysis software, Synchro 11, which is based on procedures and methodologies contained in the HCM, was used to analyze operating conditions at the study area intersections. The procedure yields a Level of Service based on the HCM 2016 as an indicator of how well intersections operate. This study used HCM 2000 methodology for determining operations at the unsignalized intersections in accordance with local NYSDOT Region 5 guidelines.

Given that the intersection of Sweet Home Road/Maple Road exceeds capacity (v/c ratio greater than 1.0) during the PM peak hour, traffic simulation modeling was also used using an extension of the Synchro software called SimTraffic. During simulation modeling, vehicles are individually tracked, and statistics are recorded on a second-by-second basis to determine the delays each vehicle experiences. Since SimTraffic simulation modeling is microscopic and stochastic, meaning car movement parameters vary randomly within a set distribution based on an initial seed number, the same traffic volume may result in slightly different results depending on the random seed used. Therefore, simulation results are reported based on an average value of multiple simulation runs to reduce the variability in results.

Synchro and SimTraffic results are contained in the Appendices.

B. Capacity Analysis Results

Existing and background operating conditions during the peak study periods are evaluated to determine a basis for comparison with the projected future conditions. The future traffic conditions generated by the proposed project were analyzed to assess the operation of the study area intersections. Capacity results for existing, background and full development conditions are listed in **Table IV**. The discussion following the table summarizes capacity conditions.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Volume-to-Capacity (v/c) Ratio	**0.68**		**1.13**		**0.72**		**1.18**		**0.71**		**1.22**	

Notes:

1. A (0.0) = Level of Service (Delay in seconds per vehicle)
2. EB = Eastbound, WB = Westbound, NB = Northbound, SB = Southbound
3. (S) = Signalized; (U) = Unsignalized
4. N/A = Approach does not exist and/or was not analyzed during this condition
5. Green shaded cells indicate low delays, yellow shaded cells indicate moderate delays, red shaded cells indicate long delays.
6. The v/c ratio, also referred to as degree of saturation, represents the sufficiency of an intersection to accommodate the vehicular demand. A v/c ratio less than 0.85 generally indicates that adequate capacity is available and vehicles are not expected to experience significant queues and delays. A v/c ratio between 0.85 and 0.95 generally indicates an intersection is nearing capacity. Intersections with a v/c ratio of 1.0 or greater generally indicate conditions at or above capacity.
7. Due to v/c being greater than 1.0 at Sweet Home Road/Maple Road during the PM peak hour, the condition was analyzed using SimTraffic Simulations.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

1. Rensch Road/Proposed Westerly Driveway

All movements are projected to operate at LOS "A" under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

2. Rensch Road/Office Lots/Villas on Rensch (W)

All movements operate at LOS "B" or better under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

3. Rensch Road/Proposed Easterly Driveway

All movements are projected to operate at LOS "B" or better under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

4. Rensch Road/Office Lots/Villas on Rensch (E)

All movements operate at LOS "A" under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

5. Sweet Home Road/Rensch Road

All movements generally operate at LOS "E" or better under existing, projected background, and future build conditions during both peak hours studied. Signal timing improvements are recommended under background conditions during the AM peak hour to maintain optimization. This consists of reducing the northbound left green time to 20 seconds (from 25 seconds) and increasing the southbound left green time to 28 seconds (from 25 seconds).

Upon full build conditions, the southbound left movement during the AM peak hour is projected to change from LOS "D" to "E"; a borderline condition, as the threshold is at 55.0 seconds of delay per vehicle. During the PM peak hour, the eastbound thru/right movement changes from LOS "D" to "E"; a borderline condition.

The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

6. Sweet Home Road/The Station

All movements operate at LOS "D" or better under existing, projected background, and future build conditions during both peak hours studied. Between background and full build conditions, the westbound left movement changes from LOS "C" to "D" during the PM peak hour; a borderline condition as the threshold occurs at 25.0 seconds of delay per vehicle. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

7. Sweet Home Road/Maple Road

All movements generally operate at LOS "D" or better under existing, projected background, and future build conditions during the AM peak hour. However, operational deficiencies exist during the PM peak hour under all conditions based upon traffic simulations. The overall intersection operates with a v/c ratio greater than 1.0 with an overall LOS of "D".

The eastbound left movement and existing traffic volumes are accommodated by a single lane. An additional left turn would be more appropriate based on the general rule of thumb of

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

providing an additional left turn lane when peak hour left turn traffic volumes exceed 300 vehicles. Additionally, the southbound right turn movement is accommodated by a single lane. Additional lanes to accommodate these turning movements would improve overall capacity. However, the construction of these improvements would require significant widening, relocation of utilities, and widening past the intersection.

The proposed project will contribute approximately 1.7% of total intersection traffic during the AM peak hour and 2.3% of total intersection traffic during the PM peak hour.

When considering the projected traffic increases resulting from the proposed project, no project related capacity improvements are recommended.

IX. ALTERNATIVE PARKING PLAN

A. Town Parking Requirements

A Parking Demand Assessment was prepared consisting of an Alternate Parking Study per Section 7-1-7-A of the Zoning Code. When evaluating the parking supply needs for the proposed mixed-use project, our firm projected the parking demand considering shared parking (mixed-use) principles using nationally accepted methodology developed by the Urban Land Institute (ULI), ITE, International Council of Shopping Centers (ICSC), and National Parking Association (NPA). and a comparison to Town requirements, as set forth within Section 5A-9-1-A of the Town of Amherst's Updated Zoning Code Adopted on September 3, 2019 for Mixed-Use Districts.

Section 5A-9-1-A of the Zoning Code sets forth the off-street parking requirements for different categories of land uses. **Table V** depicts the required parking spaces for the project site.

TABLE V: TOWN CODE PARKING REQUIREMENTS

UNIT/USE TYPE	REQUIRED PARKING RATIO	SIZE	TOTAL REQUIRED PARKING SPACES
Two-bedroom unit	1.0 space per dwelling unit	475 units	475
Three or more bedroom unit	1.5 spaces per dwelling unit	25 units	38
Retail Sales	2.5 spaces per 1,000 SF	10,000 SF	25
Office	2.5 spaces per 1,000 SF	10,000 SF	25
Total Required Parking Spaces			**563**

Strict application of the unshared off-street parking standards in the Zoning Code results in a parking requirement of 563 spaces. The number of parking spaces to be provided is 316 surface spaces and 240 structured spaces for a total of 556 spaces. Thus, there is a deficit of seven parking spaces per strict application of Section 5A-9-1-A of the Zoning Code.

B. Shared Parking Demand

Shared parking studies are conducted to establish the total number of spaces necessary by mixed-use developments to effectively serve expected parking demands. The shared parking concept builds upon the premise that land uses in a mixed-use development often do not share the same peak demand period, so spaces can be shared between the different land uses

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

during different peak periods. Each land use typically has a peak demand period where it would occupy the maximum number of spaces that the use requires and an off-peak period where a lesser percentage of the maximum spaces would be occupied; be it by time of day, day of week, or even month of the year. This allows for the project to provide fewer spaces than would be required if the land uses on a project site were to be treated separately with individual parking demands. The concept of shared parking is well recognized within the real estate and regulatory community and is proven to work.

To estimate the number of parking spaces required for the proposed mixed-use project, this assessment used the ULI methodology for shared parking. This methodology is utilized by transportation engineers and planners when evaluating the parking demand for a mixed-use project. The ULI Shared Parking 3rd Edition includes state-of-the-art practice methodologies for determining parking demand in these types of projects.

Accompanying the publication is an interactive Shared Parking Calculation Model (Model) that is used to estimate the shared parking demand. The Model requires a user to input the number of units associated with each proposed land use. Within the Model, 32 land uses are identified – some of which are subdivided into more refined categories – with 44 different recommended base parking ratios based on suburban locations with little or no transit. Data contained within the Model is from a combination of ULI surveys and the ITE Parking Generation Manual. Outputs consist of a summary table describing the base parking demand and shared parking reduction; a monthly demand comparison; weekday and weekend demand by month; and weekday and weekend demand by hour.

The peak hour demand, respective of weekday, weekend, and seasonal demands, is projected to occur at 7:00 PM on a December weekend. The projected peak hour demand for the mixed-use project (i.e., the busiest hour of the busiest weekday or weekend of the year) is ±566 spaces. Parking demand accumulations for the peak weekday and weekend are presented in **Table VI**.

TABLE VI: SHARED PARKING DEMAND PROJECTIONS

LAND USE	SIZE	WEEKDAY		WEEKEND	
		UNADJUSTED DEMAND	**SHARED DEMAND**	UNADJUSTED DEMAND	**SHARED DEMAND**
Residential	500 units	519	**519**	544	**544**
Retail	±10,000 SF	36	**29**	40	**23**
Office	±10,000 SF	38	**4**	5	**0**
Total Parking Spaces		593	**552**	589	**566**
Shared Parking Reduction		**7%**		**4%**	

Notes:
1. Weekday shared demand occurs in December at 7:00 PM
2. Weekend shared demand occurs in December at 7:00 PM

When considering the site's 556 total parking spaces, the projected peak shared demand is deficient by 10 spaces.

It is noted that the proposed residential use is marketed as student housing. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

highly likely to own fewer vehicles per than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus.

Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

X. CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

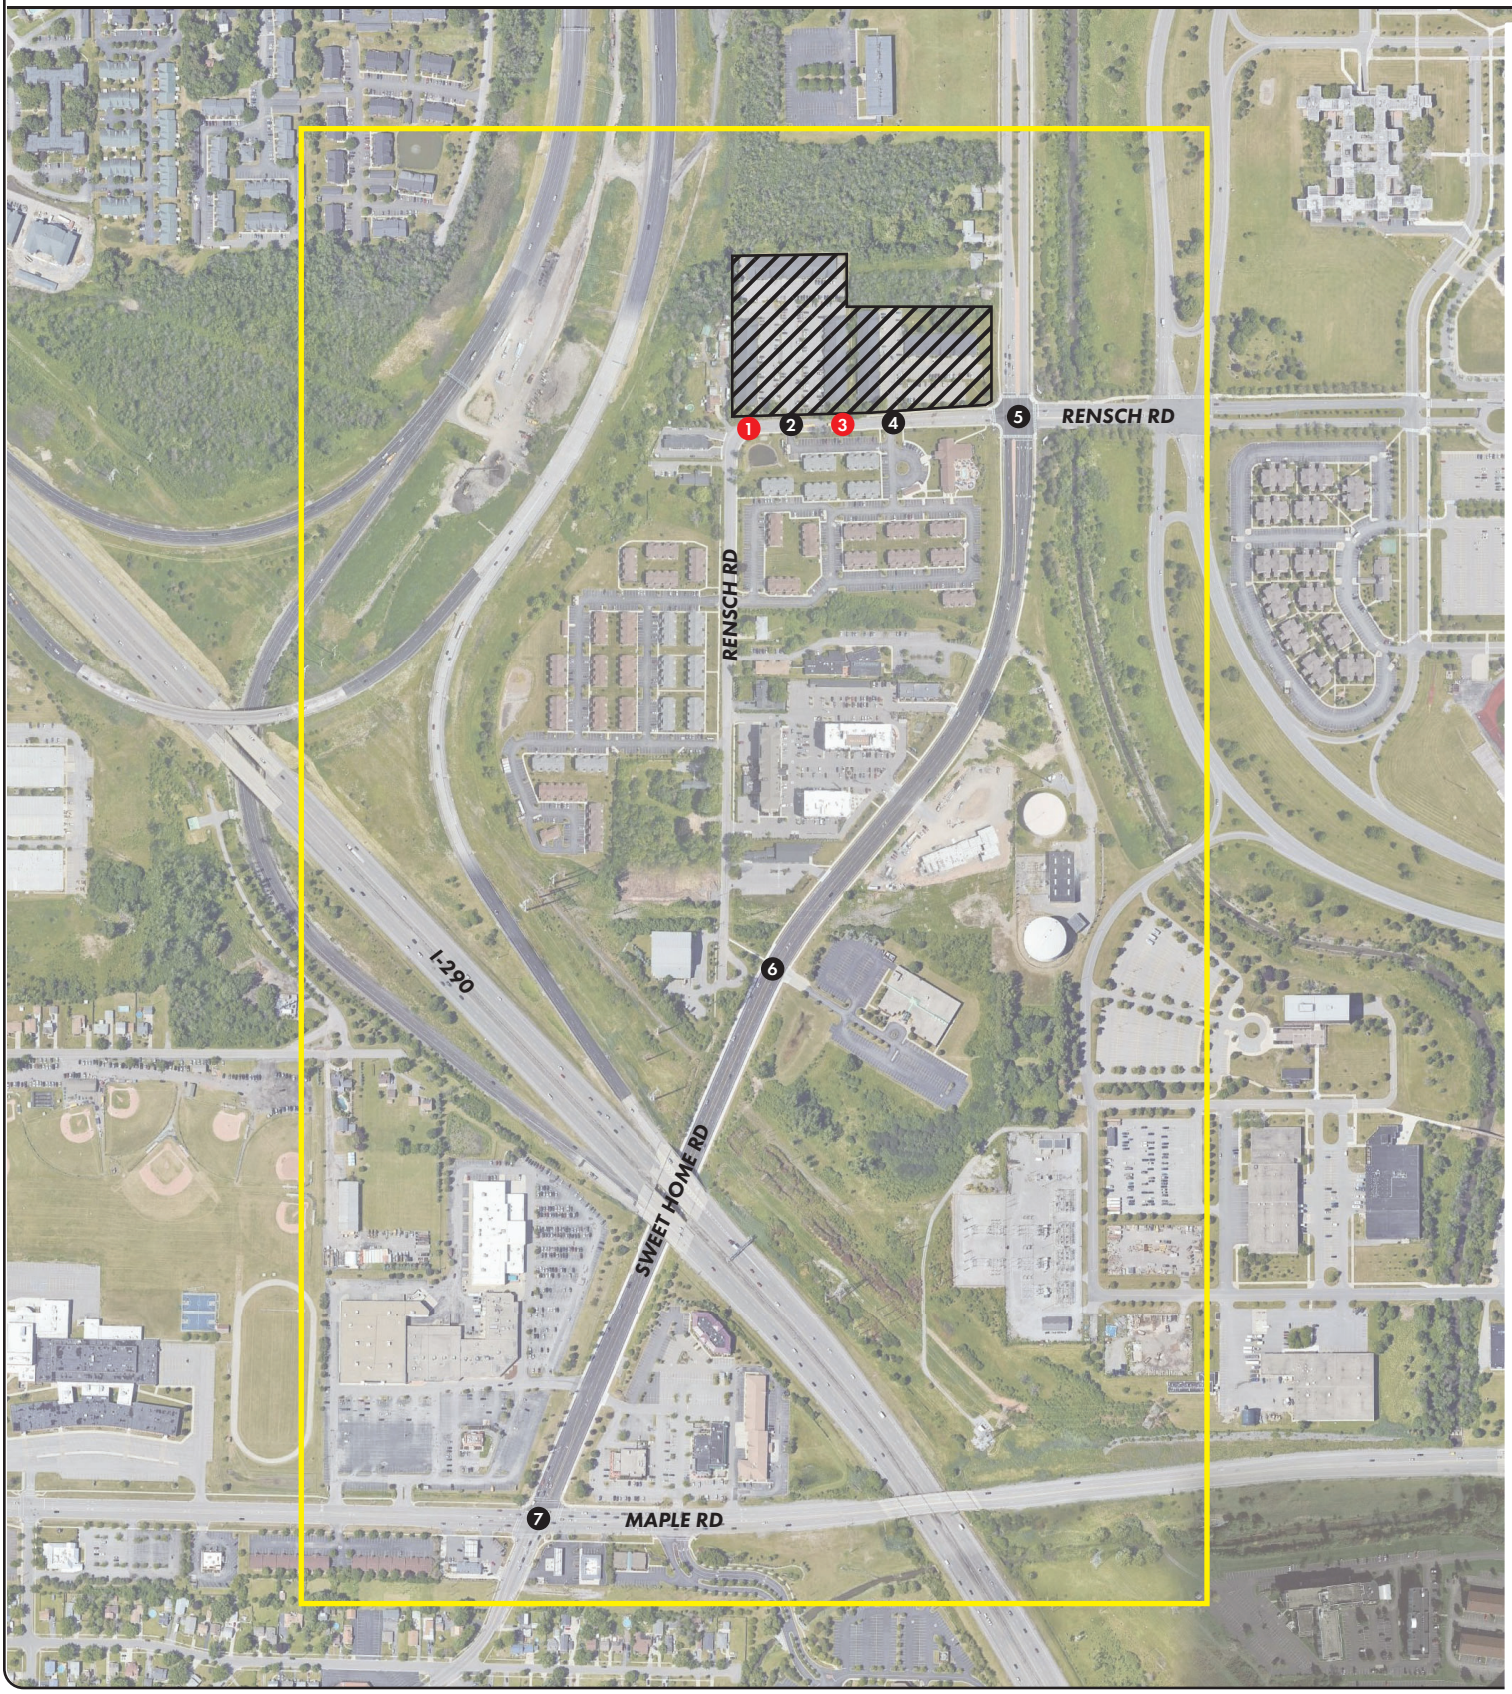
6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.



7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

NCHRP 8-51 Internal Trip Capture Estimation Tool			
Project Name:	Mixed-Use Development	**Organization:**	SRF Associates, D.P.C.
Project Location:	1400-1416 Sweet Home Road, Amherst, NY	**Performed By:**	David Kruse, AICP, PTP
Scenario Description:		**Date:**	March 16, 2022
Analysis Year:		**Checked By:**	
Analysis Period:	**PM Street Peak Hour**	**Date:**	

Table 1-P: Base Vehicle-Trip Generation Estimates (Single-Use Site Estimate)

Land Use	Development Data (*For Information Only*)			Estimated Vehicle-Trips		
	ITE LUCs[1]	Quantity	Units	Total	Entering	Exiting
Office	710	10,000	SF	14	2	12
Retail	822	10,000	SF	66	33	33
Restaurant				0		
Cinema/Entertainment				0		
Residential	225	1,025	bedrooms	221	110	111
Hotel				0		
All Other Land Uses[2]				0		
Total				301	145	156

Table 2-P: Mode Split and Vehicle Occupancy Estimates

Land Use	Entering Trips			Exiting Trips		
	Veh. Occ.	% Transit	% Non-Motorized	Veh. Occ.	% Transit	% Non-Motorized
Office	1.11	0%	0%	1.07	0%	0%
Retail	1.21	0%	0%	1.18	0%	0%
Restaurant	1.41	0%	1%	1.39	0%	2%
Cinema/Entertainment						
Residential	1.15	0%	3%	1.21	0%	4%
Hotel						
All Other Land Uses[2]						

Table 3-P: Average Land Use Interchange Distances (Feet Walking Distance)

Origin (From)	Destination (To)					
	Office	Retail	Restaurant	Cinema/Entertainment	Residential	Hotel
Office		300	300		500	
Retail					500	
Restaurant					500	
Cinema/Entertainment						
Residential		500	500			
Hotel						

Table 4-P: Internal Person-Trip Origin-Destination Matrix*

Origin (From)	Destination (To)

§ 5A-9 GENERAL DEVELOPMENT STANDARD

5A-9-1. Parking, Loading and Stacking

All parking, loading and stacking must meet the requirements of 7-1, except as required below.

A. Minimum Parking in Mixed Use Districts

(1) Off-Street Vehicle Parking

Off-street parking facilities must be provided in quantities not less than set forth in the following schedule.

SCHEDULE OF PARKING REQUIREMENTS

RESIDENTIAL USES	
Single-family detached	1.0 space per dwelling unit
Attached dwelling	1.0 space per dwelling unit
Multi-family dwelling, upper-story dwelling, assisted group living, senior citizen housing	.75 space per efficiency unit 1.0 space per one or two-bedroom unit 1.5 space per three or more bedroom unit
PUBLIC AND CIVIC USES	
Ambulance service	2.5 spaces per 1,000 SF
Business college, commercial school	3.5 spaces per 1,000 SF
College, university	3.5 spaces per 1,000 SF
Day care	3.5 spaces per 1,000 SF
Place of worship	3.5 spaces per 1,000 SF
Public utility service structure or facility	2.5 spaces per 1,000 SF
School, elementary/secondary (private)	3.5 spaces per 1,000 SF
Telecommunication facility, minor utility	1 space per facility
COMMERCIAL USES	
Animal grooming, cat boarding facility, animal hospital or veterinarian	2 spaces per 1,000 SF
Lodging	.75 spaces per room
Medical	3.5 spaces per 1,000 SF
Office	2.5 spaces per 1,000 SF
Personal service	2.5 spaces per 1,000 SF
Recreation, indoor	2.5 spaces per 1,000 SF
Restaurant	4.0 spaces per 1,000 SF
Retail sales and service	2.5 spaces per 1,000 SF

Level of Service: Criteria and Definitions

Attachment: Z-2022-02_application_051922 (25580 : Z-2022-02)

Level of Service Criteria

Highway Capacity Manual 2016

SIGNALIZED INTERSECTIONS

Level of Service is a qualitative measure describing operational conditions within a traffic stream, based on service measures such as speed and travel time, freedom to maneuver, traffic interruptions, comfort, and convenience. Level of Service for signalized intersections is defined in terms of delay specifically, average total delay per vehicle for a 15-minute analysis period. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 20
C	20 – 35
D	35 – 55
E	55 – 80
F	>80

UNSIGNALIZED INTERSECTIONS

Level of Service for unsignalized intersections is also defined in terms of delay. However, the delay criteria are different from a signalized intersection. The primary reason for this is driver expectation that a signalized intersection is designed to carry higher volumes than an unsignalized intersection. The total delay threshold for any given Level of Service is less for an unsignalized intersection than for a signalized intersection. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 15
C	15 – 25
D	25 – 35
E	35 - 50
F	>50

Area Type:	Other		
Cycle Length: 115			
Actuated Cycle Length: 107.7			
Natural Cycle: 125			
Control Type: Actuated-Uncoordinated			
Maximum v/c Ratio: 1.18			
Intersection Signal Delay: 46.4		Intersection LOS: D	
Intersection Capacity Utilization 90.3%		ICU Level of Service E	

Analysis Period (min) 15
~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

Area Type: Other
Cycle Length: 115
Actuated Cycle Length: 96.1
Natural Cycle: 115
Control Type: Actuated-Uncoordinated
Maximum v/c Ratio: 0.71
Intersection Signal Delay: 27.9 Intersection LOS: C
Intersection Capacity Utilization 74.2% ICU Level of Service D

Analysis Period (min) 15
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 7: Sweet Home Road & Maple Road

Packet Pg. 4185

* VARIANCE REQUIRED

PARKING CALCULATION (PER SECTION 5A-9-1-A)

RETAIL SALES: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000 / 1,000) x 2.5 = 25 SPACES REQ'D

OFFICE: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000 / 1,000) x 2.5 = 25 SPACES REQ'D

APARTMENTS/TOWNHOMES:
REQ'D: 1 SPACE PER 2-BDRM UNIT = 1 X 475 UNITS = 475 SPACES
1.5 SPACE PER 3-BDRM UNIT = 1.5 X 25 UNITS = 38 SPACES
REQ'D = 513 SPACES REQ'D

TOTAL PARKING SPACES REQUIRED = 563 SPACES

BICYCLE CALCULATION (PER SECTION 5A-9-1-A)

RESIDENTIAL:
REQ'D: 0.5 PER UNIT (20 MAX.)
REQ'D = 0.5 X 500 = 250 THEREFORE 20 SPACES REQ'D.

COMMERCIAL:
REQ'D: 1 SPACE PER 3,000 SF
REQ'D = 20,000 / 3,000 = 7 SPACES REQ'D

TOTAL BICYCLE SPACES REQUIRED = 27 SPACES

ELECTRIC VEHICLE CALCULATION (PER SECTION 5A-9-1-D)

10% OF TOTAL PARKING = 556 x 0.1 = 56 SPACES REQ'D.

TOWN OF AMHERST
PLANNING BOARD
ZONING RESOLUTION
Z-2022-02

PETITIONER

North Forest Development LLC
c/o Sean Hopkins
5500 Main Street, Suite 343
Williamsville, NY 14221

PROPERTY LOCATION

1400-1404 & 1408-1416 Sweet Home Rd.

WHEREAS the Town of Amherst Planning Board on Thursday, , 2022 held a public hearing on the proposed rezoning of land from _____to_____, and

WHEREAS the Planning Board has reviewed plans and other materials regarding the rezoning proposal, and

WHEREAS the materials and plans have been referred to the Town's various review agencies, and

WHEREAS in accordance with Section 8-3-5 of the Zoning Ordinance the Planning Board finds that:

A. The proposed zoning and development plan **is** generally consistent with the policies of the Comprehensive Plan and the Zoning Ordinance.

The proposal **is** consistent with the Conceptual Land Use Plan which shows _____ use in this area of the Town.

The proposal **is** consistent with Section 3.3.4, "Community Facilities" *(state reason)* _____.

B. There **are / are not** adequate services and utilities available or proposed to be made available in the construction of the development.

C. The proposal **is / is not** compatible with the present zoning and conforming uses of nearby property and with the character of the neighborhood.

D. The subject property **is / is not** suitable for uses permitted by the current versus the proposed district.

E. The proposed change **does / does not** tend to improve the balance of uses, or **meets / does not meet** a specific demand in the Town.

F. **PICK ONE:**

DRAFT (5/19/22)
TOWN OF AMHERST
PLANNING BOARD
ZONING RESOLUTION
Z-2022-02

PETITIONER	PROPERTY LOCATION
North Forest Development LLC	1400-1404 & 1408-1416 Sweet Home Rd.

a. Under Section 404 of the Clean Water Act, the US Army Corps of Engineers has determined that it has no jurisdiction.

b. Review by the US Army Corps of Engineers under Section 404 of the Clean Water Act may be waived because the parcel is developed.

c. Review by the US Army Corps of Engineers under Section 404 of the Clean Water Act may be waived since hydric/potentially hydric soils have not been identified on the parcel.

d. Review by the US Army Corps of Engineers under Section 404 of the Clean Water Act is required since hydric/potentially hydric soils have been identified on the parcel.

WHEREAS pursuant to Local Law #3-82, as amended, the Planning Board recommends that the Town Board determine that the requirements of SEQR are complete and that the subject proposal is not expected to have a significant adverse effect on the environment.

NOW THEREFORE BE IT RESOLVED that the Planning Board recommends to the Town Board in accordance with Section 8-3-4 of the Zoning Ordinance, that the rezoning request be **approved/denied** subject to the following conditions:

1.

The foregoing resolution was adopted by the Town of Amherst Planning Board, _____; moved by - _____; seconded by - _____; ayes _, noes _; absent - ____.

SUBJECT: REQUEST TO REZONE 7.43± ACRES OF LAND FROM **RD** TO **CTR-8** & **RD** TO **CTR-5**, **Z-2022-02**; PROPERTY LOCATED AT **1400-1404 & 1408-1416 SWEET HOME ROAD**.

Dear Sir/Madam:

At its meeting of May 19, 2022 the Planning Board considered your request to rezone the subject property from **RD** to **CTR-8 & CTR-5** and voted to adjourn the request.

This request will be placed on the Planning Board agenda for the June 16, 2022 meeting.

Should you have any questions regarding the Planning Board's decision, please do not hesitate to call us.

Very truly yours,

D. Ulatowski

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

7. **Petitioner's interest in property** [Note: Authorization Letter of the Property Owner attached as Exhibit "1" of this Rezoning Application.]

_____Option to purchase

_____Owner

__X____Other (explain) The Project Site and Petitioner are related entities.

8. **The following are all others having an interest in this application and join herein with the petitioner named above:** (describe extent of interest; attach sheets as needed)

Not Applicable.

9. **Attach Survey and Legal description of land to be rezoned. The Survey must be prepared by a New York State Licensed Land Surveyor.** Legal description of property to be rezoned from RD to CTR-5 and CTR-8 is attached as Exhibit " and a reduced size copy of the Survey of the Project Site is attached as Exhibit "4". Full size copy the Survey is also attached.

10. **Said property has the following deed restrictions or Covenants:** (attach copy) Not Applicable.

Liber _____ Page _____

11. **Information on proposed project:**

A. Description of the character of the proposed development:

See Exhibit 5.

B. Rationale for rezoning request:

1. Why was this site chosen?

See Exhibit 5.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

2. Why cannot land be used with the existing zoning?

See Exhibit 5.

3. How will this rezoning impact surrounding properties?

See Exhibit 5.

4. How will this rezoning impact the school system?

See Exhibit 5.

12. Quantitative Data:

A. Total # of dwelling units: 500 units

B. Distribution of dwelling units by type: All dwelling units are apartments for lease

C. Gross Residential Density per acre: 67.29 units per acre.

D. Total amount of Open Space: 0

E. Proposed Non-Residential Floor Area: 20,000 sq. ft. first floor commercial space.

[Note: A reduced size copy of the Concept Site Plan [Drawing C-100] for the proposed mixed-use redevelopment project as prepared by Carmina Wood Morris is provided at Exhibit "7" and a full size copy is also attached.]

13. Development Schedule:

Start: To be Determined

Finish: To be Determined

Stages (# of): 1

14. If any portion of the proposed development is planned to be sold or leased, please describe:

The commercial space and residential units will be leased.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

15. Open Space ownership and maintenance provisions (if applicable):

Greenspace and landscaping will be privately owned and maintained.

16. Basis for Findings (Sec. 8-3-5 of the Town Zoning Code) (Attach sheets and supplemental materials as necessary.)

A. The proposed zoning and development plan must be generally consistent with the policies of the Comprehensive Plan and the Town Zoning Ordinance.

1. State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps, and/or figures in the plan that support the proposed zoning at this location (The Comprehensive Plan document is available at the Planning Department, Town Clerk's Office, Amherst libraries, or at www.amherst.ny.us). Add sheets as needed.

See Exhibit 6.

2. Pursuant to NYS Town Law Section 272a(11), "all Town land use regulations must be in accordance with a comprehensive plan adopted pursuant to this Section." The Town Board adopted the Comprehensive Plan pursuant to NYS Town Law 272 on January 2, 2007. If the rezoning is approved, the Town Board may require the Plan to be amended, as applicable.

Cite all text, map, and / or figures that must be amended to support the proposed zoning at this location (attach pages as necessary) and provide detailed suggested amendments.

See Exhibit 6.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

3. State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

See Exhibit 6.

B. Adequate Services and Utilities are available or are proposed to be made available with the construction of the development:

1. Sanitary Sewer
   Yes.
2. Storm Sewer/Drainage
   Yes.
3. Water
   Yes.
4. Other Yes.

C. Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

See Exhibit 6.

D. Suitability of the subject property for uses permitted by the current versus the proposed district:

See Exhibit 6.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

E. Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

See Exhibit 6.

17. The petitioner encloses herewith the sum of $2,765.00 to pay the fee, and consents to the placement of a sign(s) at the described location identifying this request for a period of time to be determined by the Town Clerk.

18. The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

[Note: Authorization Letter of Property Owner signed attached as Exhibit "1".]

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.

5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Mixed-Use Redevelopment Project		
Project Location (describe, and attach a general location map): 1400-1404 and 1408-1416 Sweet Home Road - Town of Amherst - Erie County [SBL No. 54.12-1-42 and 54.12-1-43.1]		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed mixed-use redevelopment project consisting of an 8-story mixed-use building with 20,000 sq. ft. of 1st floor commercial space, 300 apartments and 120 parking spaces in basement], two 5-story building [60 parking spaces on 1st floor per building and upper story apartments] (total of 500 apartments with total of 566 parking spaces - 316 surface spaces) and related site improvements. The action includes an amendment of the zoning classification of 1400-1404 and 1408-1416 Sweet Home Road (collectively the "Project Site") from RD to CTR-5 and CTR-8. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the proposed mixed-use and multifamily buildings and all related site improvements including parking spaces, access onto Rensch Road, access aisles, landscaping, lighting, underground storm water management improvements, water and sanitary sewer lines as well as utility connections. The Project Site consists of an existing office park to be replaced by the proposed mixed-use project. Given that the proposed project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it involves more than 250 attached residential units.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board - Rezoning	March 21, 2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Planning Board - Site Plan Approval	To be Determined ("TBD")
c. City, Town or Village Zoning Board of Appeals ☑Yes ☐No	Zoning Board of Appeals - Possible Area Variances	TBD
d. Other local agencies ☑Yes ☐No	Building Dept. - Demolition & Building Permits; Highway Department - Curb Cut Permits	TBD
e. County agencies ☑Yes ☐No	ECWA - Water	TBD
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - SPDES and DSCA	TBD
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☑Yes ☐No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
Research Development District ("RD")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? CTR-8 for 1400-1404 Sweet Home Rd. and CTR-5 for 1408-1416 Sweet Home Rd.

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department for the fire district in which the Project Site is located

d. What parks serve the project site?
There are various parks that will be accessible to the future tenants of the mixed-use redevelopment project

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Mixed-use project consisting of approximately 20,000 sq. of 1st floor commercial space and apartments for lease [3 proposed building consistent with the Concept Site Plan [Drawing C-100].

b. a. Total acreage of the site of the proposed action? 7.43 acres
b. Total acreage to be physically disturbed? 7.43 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 7.43 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

f. Does the project include new residential uses? ☑ Yes ☐ No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				500
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑ Yes ☐ No

If Yes,

i. Total number of structures 1 Mixed-Use Building

ii. Dimensions (in feet) of largest proposed structure: 105' height; 275' width; and 400' length

iii. Approximate extent of building space to be heated or cooled: 20,000 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☑ Yes ☐ No

If Yes,

i. Purpose of the impoundment: Undeground stormwater detention.

ii. If a water impoundment, the principal source of the water: ☑ Ground water ☐ Surface water streams ☐ Other specify:

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: N/A acres

v. Dimensions of the proposed dam or impounding structure: N/A height; N/A length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):
N/A

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐ Yes ☑ No

If Yes:

i .What is the purpose of the excavation or dredging?

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No

If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☐No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 110,000 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☑No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 110,000 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

- Do existing sewer lines serve the project site? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

_____

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

_____

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

_____

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

_____

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

_____

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: Traffic Impact Study prepared by SRF Associates submittted with Rezoning Application and Supporting Documentation] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend
☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____
To be determined for 1st floor commercial space and dependent on needs of commercial tenants.

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☐No

l. Hours of operation. Answer all items which apply.

i. During Construction:
- Monday - Friday: 7:00 AM to 7:00 PM
- Saturday: 7:00 AM to 5:00 PM
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:
- Monday - Friday: To be Determined [Commercial]
- Saturday: TBD
- Sunday: TBD
- Holidays: TBD

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed mixed-use redevelopment project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

There will be outdoor lighting per the lighting standards contained in the Town of Amherst Zoning Code.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☑ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☐ Yes ☑ No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☐ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☐ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☑ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): UB North Campus and Center for Inquiry

ii. If mix of uses, generally describe:

There are a wide assortment of land uses on properties zoned GB, MFR-5, etc. in the vicinity of the Project Site.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	6.5	6.74	.2
• Forested	0	0	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	0	0	0
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	1.2	1	(.2)

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

c. Is the project site presently used by members of the community for public recreation? ☐ Yes ☑ No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☑ Yes ☐ No
If Yes,
i. Identify Facilities:
University of Buffalo North Campus and People Inc. Group Home

e. Does the project site contain an existing dam? ☐ Yes ☑ No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐ Yes ☑ No
If Yes:
i. Has the facility been formally closed? ☐ Yes ☐ No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐ Yes ☑ No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐ Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐ Yes ☐ No
☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☐ Yes ☑ No
If yes, provide DEC ID number(s): _____
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☑ No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >1 feet

b. Are there bedrock outcroppings on the project site? ☐ Yes ☑ No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____ %

c. Predominant soil type(s) present on project site:

Churchville Silt Loam	100 %
	%
	%

d. What is the average depth to the water table on the project site? Average: >3 feet

e. Drainage status of project site soils:

☐ Well Drained:	% of site
☐ Moderately Well Drained:	% of site
☑ Poorly Drained	100 % of site

f. Approximate proportion of proposed action site with slopes:

☑ 0-10%:	100 % of site
☐ 10-15%:	% of site
☐ 15% or greater:	% of site

g. Are there any unique geologic features on the project site? ☐ Yes ☑ No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐ Yes ☑ No

ii. Do any wetlands or other waterbodies adjoin the project site? ☑ Yes ☐ No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑ Yes ☐ No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☑ No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐ Yes ☑ No

j. Is the project site in the 100-year Floodplain? ☐ Yes ☑ No

k. Is the project site in the 500-year Floodplain? ☐ Yes ☑ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐ Yes ☑ No
If Yes:

i. Name of aquifer: _____

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

EAF Mapper Summary Report

Sunday, March 13, 2022 1:43 AM

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	No
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	Yes
E.2.h.iii [Surface Water Features]	Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No
E.2.o. [Endangered or Threatened Species]	No

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

E.2.p. [Rare Plants or Animals]	No
E.3.a. [Agricultural District]	No
E.3.c. [National Natural Landmark]	No
E.3.d [Critical Environmental Area]	No
E.3.e. [National or State Register of Historic Places or State Eligible Sites]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.3.f. [Archeological Sites]	Yes
E.3.i. [Designated River Corridor]	No

Rezoning of 1400-14034 and 1408-1416 Sweet Home Road from from RD to CTR-5 and CTR-8

TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Churchville Silt Loam	Severe	Severe	Severe	Severe	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   x Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report prepared by Glynn Geotechnical Engineering dated February 11, 2004 have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? ☐ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? ☐ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? ☐ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: ☐ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project 269
   Source: Traffic Impact Study prepared by SRF Associates dated March 21, 2022.

8. Will blasting occur during construction? ☐ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes ☐ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    110,000 gpd average flow 440,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? ☐ Yes ☒ No

Exhibit 3 – Legal Description of Property to be Rezoned from RD to CTR-5 and CTR-8

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

EXHIBIT 3 OF REZONING APPLICATION

LEGAL DESCRIPTION OF PROPERTY TO BE REZONED FROM RESEARCH DEVELOPMENT DISTRICT ("RD") TO CTR CENTER EIGHT ("CTR-8") AND CTR CENTER FIVE ("CTR-5")

1400-1404 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot No. 79, 174.00 feet south of the northeast corner of said Lot No. 79, said point also being the southeast corner of Liber 2713 of Deeds at page 120, said east line also being the center line of Sweet Home Road (width varies, originally 66 feet wide); thence westerly along a line parallel to the north line of said Lot No. 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75 the point or place of beginning; thence southerly along the west line of said Parcel No. 75 and bearing of S 00° 00' 20" W, 297.93 feet to a point; thence southwesterly along the west line of said parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.5 feet wide); thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the west line of deed recorded in the Erie County Clerk's Office on March 3, 2017 in Liber 11310 of Deeds at page 1116; thence northerly along a line parallel to the east line of said Lot No. 79 and bearing N 00° 00' 20" E, 330.11 feet to a point; thence easterly along a line parallel to the north line of said Lot No. 79 and bearing N 89° 38' 35" E, 426.50 feet more or less to the point or place of beginning and containing 3.175 Acres, more or less.

Excepting therefrom, that portion of premises acquired by the People of the State of New York by Notice of Appropriation dated May 20, 2005, recorded September 26, 2005 in Liber 11101 of Deeds, page 8475.

1408, 1412 and 1416 SWEET HOME ROAD [RD TO CTR-5]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot 79, 174.00 feet south of the northeast corner of said Lot 79, said point also being the southeast corner of Liber 2713 of deeds at page 120, said east line also being the centerline of Sweet Home Road (width varies, originally 66 feet wide); Thence westerly along a line parallel to the north line of said Lot 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75; Thence southerly along the west line of said Parcel No. 75 and bearing S 00° 00' 20" W, 297.93 feet to a point; Thence southwesterly along the west line of said Parcel No. 75 and bearing S 47° 59' 05" W, 33.65

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

feet to a point in the north line of Rensch Road (49.50 feet wide); Thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the principal point of beginning; Thence continuing westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 370.64 feet to a point; Thence northerly along a line bearing N 00° 55' 05" E, 510.78 feet to a point in the north line of said Lot 79; Thence easterly along the north line of said Lot 79 and bearing N 89° 38' 35" E, 362.34 feet to a point; Thence southerly along a line parallel to the east line of said Lot 79 and bearing S 00° 00' 20" W, 501.61 feet to the point or place of beginning and containing 4.257 Acres, more or less.

Exhibit 5 – Responses to Questions 11A & 11B of the Rezoning Application

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

EXHIBIT 5

RESPONSES TO QUESTION 11 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-5 AND CTR-8

Question 11(A): **Description of the character of the proposed development:**

Response to Question 11(A): The proposed mixed-use project will be upscale in character and will feature an eight-story mixed use building along the Sweet Home Road frontage of the Project Site and two five-story buildings on the remainder of the Project Site. The existing office buildings located on the Project Site would be demolished in connection with the mixed-use redevelopment project. The proposed mixed-use redevelopment project requires the zoning classification of the Project Site to be amended from Research Development District ("RD") to CTR-8 Center 8 District ("CTR-8") and CTR-5 Center 5 District ("CTR-5").

The conceptual layout of the proposed mixed-use project is depicted on the full size Concept Site Plan [Drawing C-100] prepared by Carmina Wood Morris P.C. attached to this Rezoning Application. A reduced size copy of the Concept Site Plan is also provided at **Exhibit "7"**. It is important to mention that the layout of the proposed project as depicted on the Concept Site Plan provided is not meant to represent the final layout of the proposed mixed-use redevelopment project since modifications may be necessary based on the project review process and the preparation of fully engineered plans.

The proposed mixed-use redevelopment project will be consistent with the character of nearby parcels that have been rezoned by the Town during the past decade including the nearby student housing communities and mixed-use projects on properties on the west side of Sweet Home Road consisting of commercial space, apartments and hotels. Landscaping will be provided pursuant to a Landscaping Plan to be prepared by a licensed landscape architect during the site

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

plan review stage of the project and the landscaping will feature numerous trees, bushes and shrubs.

Question 11(B)(1): Rationale for rezoning request: 1. What was this site chosen?

Response to Question 11(B)(1): The Project Site is an appropriate location for the proposed project given the character and scale of nearby land uses and the close proximity to the University of Buffalo North Campus. A primary reason the Project Site was selected for the proposed mixed-use project is that it is designated as "Suburban Corridor" per Figure 6-A of the Comprehensive Plan.

Question 11(B)(2): Why cannot land be used with the existing zoning?

Response to Question 11(B)(2): The Project Site is currently zoned Research and Development ("RD") and can continue to be utilized as an office park. The Applicant is requesting that the Project Site be rezoned to CTR-8 and CTR-5 to accommodate the proposed mixed-use project. Nearly all of the nearby parcels on both sides of Sweet Home Road and Rensch Road in close proximity to the Project Site were rezoned to RD by the Town of Amherst in 1976, at the time the Town adopted a new zoning code.

The planning objective at that time was to provide RD zoned land that would accommodate uses that would benefit from close proximity to the UB North Campus. The development of the Project Site and parcels in the surrounding vicinity for research and development purposes did not occur and as a result the zoning classification of most of the properties in the vicinity have been amended in the past approximately fifteen years to accommodate existing land uses such as a hotel being constructed on GB zoned property at 1265 Sweet Home Road, the mixed-use projects on Rensch Road and the Villas on Rensch student housing community, located on approximately

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

twenty acres of property that was rezoned from RD to Multi Family Residential District Six ("MFR-6") by the Town Board in August of 2007.

The redevelopment of the Project Site for the higher intensity uses expressly permitted by the existing RD zoning classification would not be compatible with the existing character of the neighborhood. The existing RD zoning classification expressly allows large buildings to accommodate uses that involve high intensity commercial and industrial operations and that often involve 24/7 business hours as well high volume use of large tractor trailers. The expressly permitted uses of property zoned Research and Development ("RD") is set forth in Section 4-9-2A of the Zoning Code and includes intensive commercial facilities for the compounding, manufacturing and assembly of products such as automotive accessories, clothing and textiles, electronic equipment and appliances, furniture, medical and scientific equipment and supplies, pharmaceutical products as well as experimental research and testing facilities, warehouses and storage facilities and wholesale distribution facilities. A copy of Section 4-9 of the Zoning Code has been attached as **Exhibit "8"** of this Rezoning Application.

Question 11(B)(3): How will this rezoning impact surrounding properties?

Response to Question 11(B)(3): The proposed rezoning of the Project Site from Research and Development ("RD") to CTR-8 and CTR-5 will not result in any significant adverse impacts on surrounding properties. The proposed mixed-use project will be much more compatible with the existing land uses in the vicinity of the Project Site than the higher intensity uses expressly permitted by the existing long-standing RD zoning classification.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Question 11(B)(4): How will this rezoning impact the school system?

Response to Question 11(B)(4): The proposed mixed use project will have a positive impact on the Sweet Home Central School District since the property taxes that will be generated on an annual basis will be significantly higher than the current property taxes. The proposed project will not result in any significant increased demand for educational services since the residential units are not likely to attract a substantial number of families with school age children.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Exhibit 6 – Responses to Questions 16A, 16B, 16D & 16E of the Rezoning Application

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

EXHIBIT 6

RESPONSES TO QUESTION 16 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-5 AND CTR-8

Question 16(A)(1): **State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps and/or figures in the plan that support the proposed zoning at this location.**

Response to Question 16(A)(1): The request to amend the zoning classification of 1400-1404 Sweet Home Road RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 (collectively the "***Project Site***") to accommodate the proposed mixed-use redevelopment project is consistent with the adopted Bicentennial Comprehensive Plan. The Town of Amherst adopted the Bicentennial Comprehensive Plan in January of 2007 after completing a lengthy planning process that included numerous public meetings and public hearings involving the Comprehensive Plan Advisory Committee, the Planning Board and the Town Board.[1] In December of 2020, the Town Board most recently adopted amendments to the Bicentennial Comprehensive Plan. The Comprehensive Plan is intended to guide future growth and redevelopment in the Town.

Figure 6 of the Bicentennial Comprehensive Plan is the Conceptual Land Use Plan and it depicts the Project Site as being as being appropriate for "Commercial/Mixed Use" uses. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "9"**. The Conceptual Land Use Plan is intended to communicate the overall direction and concept of future development in the Town

[1] A copy of the resolution adopted by the Town Board on January 2, 2007 for the purpose of adopting the Bicentennial Comprehensive Plan pursuant to Town Law Section 272-a is included at the beginning of the Comprehensive Plan. This resolution recites the lengthy planning history that incorporated numerous opportunities for public input as well as a coordinated environmental review pursuant to SEQRA that involved the preparation a Generic EIS and the issuance of a Findings Statement.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

of Amherst. Figure 6-A of the adopted Bicentennial Comprehensive Plan is the titled Commercial and Mixed-Use Designations and it depicts the Project Site as being designated as "Suburban Center". The Project Site is located within the University Place geographic location per Figure 6-A of the Comprehensive Plan. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "10"**.

Question 16(A)(2): **Cite all text, map, and/or figures that must be amended to support the proposed zoning at this location and provide detailed suggested amendments.**

Response to Question 16(A)(2): The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 to accommodate the proposed mixed-use redevelopment project does not require an amendment to the Bicentennial Comprehensive Plan.

Question 16(A)(3): **State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:**

Response to Question 16(A)(3): Section 1-2-1 of the Zoning Code is titled "Purpose" and it states as follows:

> *"The purpose of this Zoning Ordinance and the intent of the legislative authority in its adoption is to promote the environment of the town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, building coverage and location of structures; by regulating and limiting population density; and for the aforesaid purposes, to divide the land within the limits of the town into districts of such number and dimensions generally consistent with the policies of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Ordinance."*

The proposed rezoning of the Project Site RD to CTR-8 and CTR-5 to accommodate the proposed mixed-use redevelopment project is consistent with the "Purpose" of the Zoning Code.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Section 1-2-2 of the Zoning Code sets forth the objectives of the Zoning Code. This section of the Zoning Code lists thirteen objectives that are discussed below as follows:

A. To protect the character and values of residential, institutional and public uses, business, commercial and manufacturing uses and to insure their orderly and beneficial development;

Response: The proposed rezoning of the Project Site from RD to CT5-5 and CTR-8 to accommodate the mixed-use redevelopment project will be consistent with the objective of protecting the character and value of existing land uses. The proposed rezoning will allow the Project Site to be utilized as a mixed-use project, which represents orderly and beneficial development.

B. To provide adequate open spaces for light, air and outdoor uses to include public, common and private open space areas;

Response: The proposed rezoning of the Project Site and the proposed mixed-use project will not be inconsistent with this objective.

C. To prevent overcrowding of land;

Response: The proposed mixed-use project will not result in the overcrowding of land. The project is consistent with the type of development designated as appropriate for the Project Site per Figure 6 and Figure 6-A of the adopted Comprehensive Plan.

D. To prevent excessive concentration of population and to prevent spare and uncoordinated development;

Response: The proposed rezoning of the Project Site will not result in excessive concentration of population and the mixed-use redevelopment project represents an example of coordinated development. The mixed-use redevelopment project will require Site Plan Approval from the Planning Board.

E. To regulate and control the location and spacing of buildings on the lot and in relation to the surrounding property generally consistent with the policies of the Comprehensive Plan.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Response: The responses to the Questions in this **Exhibit "6"** of the Rezoning Application set forth the reasons the proposed rezoning is consistent with the policies of the Comprehensive Plan.

F. To protect persons and property from damage and injury due to fire or flood;

Response: The Site Plan Application review process will trigger the need for an Engineer's Report and SWPPP prepared by a licensed engineer to be prepared for review and approval by the Town's Engineering Department. The mixed-use redevelopment project to be located on the existing office park property will not increase the likelihood of damage and injury due to fire and flood. The proposed mixed-use redevelopment project will be constructed per the stringent requirements of the NYS Building Code including the fire safety standards contained therein.

G. To preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective. There are not significant natural features located on the previously developed Project Site.

H. To assure that structure and land use arrangements are aesthetically harmonious with nearby areas and structures.

Response: The development of the Project Site in a manner consistent with the attached Concept Site Plan [Drawing C-100] will be aesthetically harmonious with nearby areas and structures. Conceptual color building renderings prepared by Brian Slevar, R.A. of Carmina Wood Morris DPC are attached as **Exhibit "11"**.

I. To regulate the location of buildings and intensity of uses in relation to streets according to plans so as to cause the least interference with and be damaged least by traffic movements and hence result in lessened street congestion and improved public safety.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Response: The proposed mixed-use project will have two (2) driveway connections onto Rensch Road as depicted on the Concept Site Plan [Drawing C-100].

J. To establish zoning patterns that insure economical extensions for sewers, water supply waste disposal and other public utilities, as well as development of recreation, schools and other public facilities;

Response: The Project Site has access to sanitary sewer and water lines as well as necessary public utilities to service the proposed mixed-use redevelopment project.

K. To guide the future development of the town so as to being the gradual conformity of land, structures and uses generally consistent with the policies of the Comprehensive Plan.

Response: The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 is consistent with this objective since the infill mixed-use redevelopment project is consistent with the policies contained in the Comprehensive Plan.

L. To accomplish the specific intents and goals set forth in the introduction to the respective sections.

Response: The proposed rezoning of the Project Site will be consistent with this objective.

M. To protect the community from visual pollution resulting from the unregulated use of signs and other advertising devices.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective.

Question 16(C): Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

Response to Question 16(C): The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 is compatible with the present zoning and conforming uses of nearby properties and the character of the neighborhood. The Project Site is currently zoned RD which would allow the Project Site

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

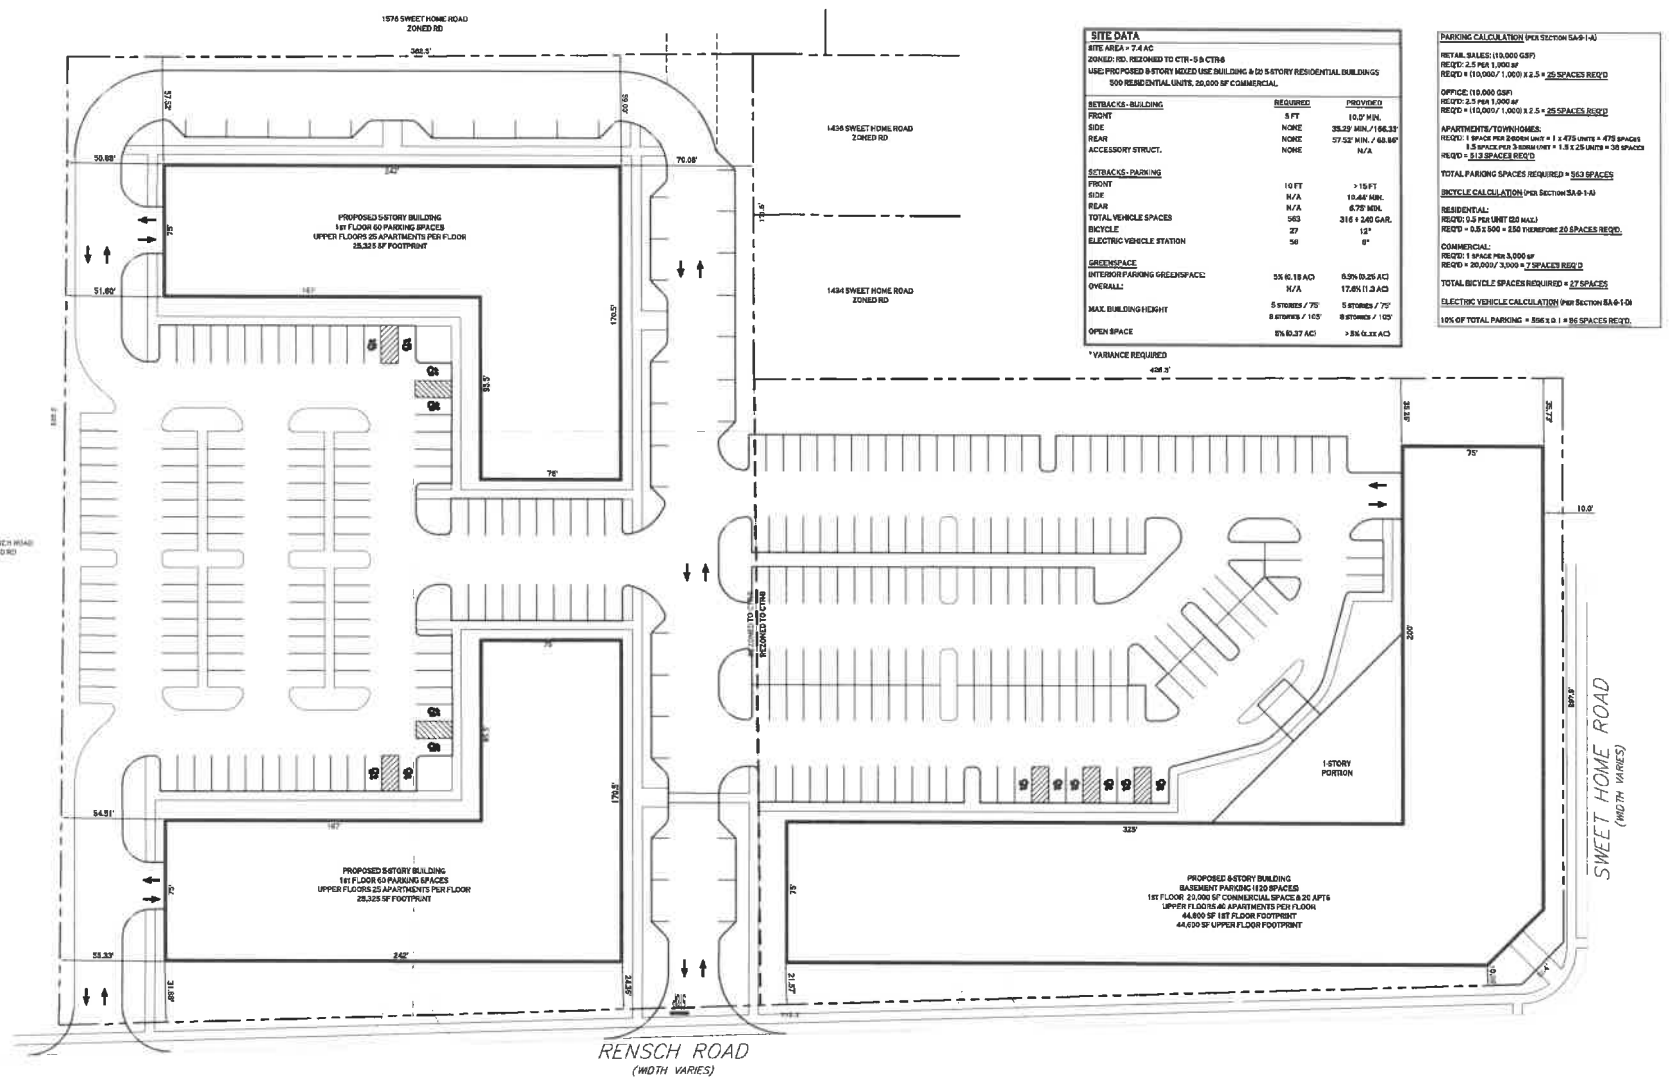
to be redeveloped for intensive uses permitted per Section 4-9 of the Zoning Code. A copy of Section 4-9 of the Zoning Code is provided at **Exhibit "8"**.

Question 16(D): **Suitability of the subject property for uses permitted by the current versus the proposed district:**

Response to Question 16(D): The Project Site is much more suitable for uses permitted by the proposed CTR-5 and CTR-8 zoning classifications than the existing RD zoning classification.



Question 16(E): **Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:**

Response to Question 16(D): The proposed change in the zoning classification of the Project Site from RD to CTR-5 and CTR-8 to accommodate the proposed mixed-use redevelopment project will have positive impacts on the balance of uses in the Town by providing 1st floor commercial space and apartments for lease at an infill location in a portion of the Town in close proximity to the UB North Campus that has been designated as appropriate for mixed-use infill redevelopment as depicted on the Concept Site Plan [Drawing C-100].

SITE PLAN
SCALE: 1"=30'

SITE DATA

SITE AREA = 7.4 AC
ZONED: RD, REZONED TO CTR-5 & CTR-6
USE: PROPOSED 6-STORY MIXED USE BUILDING & (2) 5-STORY RESIDENTIAL BUILDINGS
500 RESIDENTIAL UNITS, 20,000 SF COMMERCIAL

SETBACKS - BUILDING	REQUIRED	PROVIDED
FRONT	5 FT	10.5' MIN.
SIDE	NONE	35.29' MIN./166.33'
REAR	NONE	57.53' MIN. / 68.86'
ACCESSORY STRUCT.	NONE	N/A
SETBACKS - PARKING		
FRONT	10 FT	> 15 FT
SIDE	N/A	10.46' MIN.
REAR	N/A	6.75' MIN.
TOTAL VEHICLE SPACES	563	316 + 240 GAR.
BICYCLE	27	12*
ELECTRIC VEHICLE STATION	56	8*
GREENSPACE		
INTERIOR PARKING GREENSPACE:	5% (0.18 AC)	6.9% (0.25 AC)
OVERALL:	N/A	17.6% (1.3 AC)
MAX. BUILDING HEIGHT	5 STORIES / 75' 6 STORIES / 105'	5 STORIES / 75' 6 STORIES / 105'
OPEN SPACE	5% (0.37 AC)	> 5% (1.xx AC)

* VARIANCE REQUIRED

PARKING CALCULATION (PER SECTION 5A-9-1-A)

RETAIL SALES: (10,000 GSF)
REQ'D: 2.5 PER 1,000 sf
REQ'D = (10,000 / 1,000) X 2.5 = 25 SPACES REQ'D

OFFICE: (10,000 GSF)
REQ'D: 2.5 PER 1,000 sf
REQ'D = (10,000 / 1,000) X 2.5 = 25 SPACES REQ'D

APARTMENTS/TOWNHOMES:
REQ'D: 1 SPACE PER 2-BDRM UNIT = 1 x 475 UNITS = 475 SPACES
1.5 SPACE PER 3-BDRM UNIT = 1.5 x 25 UNITS = 38 SPACES
REQ'D = 513 SPACES REQ'D

TOTAL PARKING SPACES REQUIRED = 563 SPACES

BICYCLE CALCULATION (PER SECTION 5A-9-1-A)

RESIDENTIAL:
REQ'D: 0.5 PER UNIT (25 MAX.)
REQ'D = 0.5 x 500 = 250 THEREFORE 25 SPACES REQ'D.

COMMERCIAL:
REQ'D: 1 SPACE PER 3,000 sf
REQ'D = 20,000 / 3,000 = 7 SPACES REQ'D

TOTAL BICYCLE SPACES REQUIRED = 27 SPACES

ELECTRIC VEHICLE CALCULATION (PER SECTION 5A-9-1-D)

10% OF TOTAL PARKING = 556 x 0.1 = 56 SPACES REQ'D.

Re: Application to Amend the Zoning Classification of 1400-1404 Sweet Home Road from RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 & Supporting Documentation – Town of Amherst
Applicant/Project Sponsor: North Forest Development LLC c/o Roy Jordan
File No. 10208.1

Dear Scott:

This letter and the enclosed documentation is being submitted on behalf of North Forest Development LLC ("Project Sponsor") in connection with its request to amend the zoning classifications of 1400-1404 Sweet Home Road from RD to CTR-8 and 1408-1416 Sweet Home Road from RD to CTR-5 to accommodate a mixed-use redevelopment project (collectively the "Project Site"). Enclosed please find the following:

1. Original and thirteen (13) copies of the Rezoning Application and supporting documentation consisting of Exhibits "1" to "11". The Exhibits to the Rezoning Application consist of the following:

   - **Exhibit 1:** Authorization Letter signed by Roy Jordan dated March 15, 2022;
   - **Exhibit 2:** Part 1 of the Full Environmental Assessment Form prepared pursuant to the State Environmental Quality Review Act ("SEQRA");
   - **Exhibit 3**: Legal description of property to be rezoned from RD to CTR-5 and CTR-8;
   - **Exhibit 4:** Reduced size copy of the Survey of Project Site [Note: Full size copy of the Survey is also attached];
   - **Exhibit 5:** Responses to Questions 11A & 11B of the Rezoning Application;
   - **Exhibit 6:** Responses to Questions 16A, 16B, 16D & 16E of the Rezoning Application;
   - **Exhibit 7:** Reduced size copy of the Concept Site Plan [Drawing C-100] as prepared by Carmina Wood Morris DPC [Note: Full size copy of the Concept Plan is also attached];
   - **Exhibit 8:** Copy of Section 4-9 of the Zoning Code [titled "Research and Development District (RD)"];

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

- **Exhibit 9:** Color copy of Figure 6 of the Bicentennial Comprehensive Plan;
- **Exhibit 10:** Color copy of Figure 6-A of the Bicentennial Comprehensive Plan; and
- **Exhibit 11:** Color Conceptual Building Renderings as prepared by Brian Slevar, AIA of Carmina Wood Morris DPC;

2. Three (3) copies of the Geotechnical Engineering Report prepared by Glynn Geotechnical Engineering;

3. Four (4) copies of the Traffic Impact Study prepared by SRF Associates;

4. One (1) copy of the Draft Local Law

I have also enclosed a check for the filing fee. The Project Sponsor is requesting that the Planning Board hold a public hearing regarding the requested rezoning of the Project Site from RD to CTR-5 and CTR-8 during its meeting to be on **Thursday, May 19th at 6:30 p.m.**

It would be appreciated if the Planning Department would provide a copy the enclosed Application and supporting documentation for the proposed mixed-use redevelopment project to the Erie County Division of Environment and Planning ("ECDEP") for the purpose of complying with the referral requirement pursuant to NYS General Municipal Law §239-m since Sweet Home Road is a NYS Highway.

The proposed mixed-use redevelopment project is a Type I action pursuant to SEQRA since it consists of more than 250 residential units and as such it requires the Town to conduct a coordinated environmental review.

Please provide a copy of the lead agency solicitation notice to be issued pursuant to SEQRA along with copies of all correspondence, departmental reviews, etc. received by the Planning Department to my office as well as the following individuals involved in the proposed mixed-use redevelopment project:

1. Roy Jordan
   North Forest Development LLC
   2829 Wehrle Drive, Suite 1
   Williamsville, NY 14221

2. Christopher Wood, P.E.
   Carmina Wood Morris DPC
   487 Main Street, Suite 500
   Buffalo, NY 14203

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

3. Brian J. Slevar, AIA, NCARB
Carmina Wood Morris DPC
487 Main Street, Suite 500
Buffalo, NY 14203

If you have any questions regarding the enclosed Rezoning Application and supporting documentation or the proposed mixed-use redevelopment project, please feel free to contact me at 510-4338 or via e-mail at shopkins@hsmlegal.com.

Thank you for your anticipated cooperation.

Sincerely,

HOPKINS SORGI & MCCARTHY PLLC

Sean W. Hopkins, Esq.

I. INTRODUCTION

This report provides subsurface investigation data and foundation recommendations for the proposed building at 4180/4200 Rensch Road in the Town of Amherst, New York. Specifically, Glynn Geotechnical Engineering (GGE) has provided the following scope of services:

1. Observed the excavation of three test pits by North Forest Development.
2. Performed cone penetrometer testing at the proposed foundation subgrade to estimate an allowable bearing capacity.
3. Retrieved and classified soil samples in accordance with the Unified Soils Classification System (USCS) and prepared subsurface logs.
4. Provided laboratory testing on select samples to establish specific engineering properties and verify classifications.
5. Prepared a geotechnical report based on our findings.

This geotechnical study has been performed in accordance with a written January 13, 2004 GGE proposal and subsequent January 20, 2004 acceptance by North Forest Development. GGE was provided with a site plan from North Forest Development to aid in our efforts.

Project efforts by GGE included test pits, penetrometer testing, laboratory testing, USCS classification, site class definition and the preparation of this report. The scope of this report specifically excludes any review of former site use, in particular, environmental or pollution related concerns.

II. PROJECT BACKGROUND

The project site is located on Rensch Road in the Town of Amherst, New York, specifically at addresses 4180 and 4200. The site is relatively flat and currently occupied by two houses on the southern portion of the property and dense forest on the northern portion of the property. The existing houses will be demolished prior to construction of the proposed development. As seen on the Floodplain and Wetland Location Plan located in Appendix E, the site is not located within a floodplain or within a state wetland.

The development is to consist of three office buildings with associated parking areas. To accommodate for the low site elevation and to provide the necessary grades for sanitary and storm sewers, North Forest Development plans to raise the existing site elevation by 2 to 3 feet.

III. SITE GEOLOGY

The underlying geological conditions at the site are the result of the last glacial advance of the Pleistocene Epoch, known as the Wisconsinan Glacial Stage. As the glaciers transgressed across the Western New York terrain, they carved and crushed the underlying existing soil and rock to form glacial till.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Civil • Structural • Geotechnical • Materials Testing • Consulting

The surficial geology of the Rensch Road site is characterized by a thin stratum of clayey lake sediment overlying glacial till and shallow bedrock. The bedrock consists of shale, dolostone and gypsum of the Late Silurian Salina Group.

The Erie County Soil Survey identifies the site soils as belonging to the Churchville silt loam (CoA). This soil is deep and somewhat poorly drained, consisting of a thin mantle of clayey lake sediment underlain by glacial till. The soil is characterized by a slow permeability and a perched seasonal water table in the upper subsoil from December through May, which may lead to ponding in some areas. A Soil Survey Plan has been included in Appendix D for reference.

IV. FIELD INVESTIGATION AND SUBSURFACE CONDITIONS

Site investigation efforts consisted of three test pits performed by North Forest Development on January 27, 2004 and observed by GGE. One test pit was performed at each building location to provide the subsurface information necessary for the construction of all three buildings as well as satisfy the Town of Amherst preliminary geotechnical requirements of one soil boring per every 3.5 acres of site. A Site Plan indicating test pit locations can be found in Appendix C. GGE is confidant the extent of the investigation was sufficient to accurately characterize the subsurface conditions and provide the information necessary to prepare this report.

The subsurface soils were classified by GGE and assigned Unified Soil Classification System (USCS) classifications in accordance with ASTM D 2488 "Description and Identification of Soils (Visual – Manual Procedure)".

Subsurface conditions are generally characterized as follows:

0.0' – 1.0'	Dark brown topsoil.
1.0' – 3.0'	Moist, brown and tan, slightly mottled, stiff, silt (ML).
3.0' – 6.0'	Moist, light tan and gray, slightly mottled, stiff, sandy, silty clay with gravel (CL-ML) and bedrock fragments.
	Shale bedrock was encountered at a depth of 6.0 feet in all test pits with the exception of TP-2, where gypsum was encountered.

Clay fill was encountered in test pit TP-1. The original topsoil layer existed at a depth of 1.0 to 2.0 feet below the existing ground elevation. The removal of this material is imperative below any structural areas, including foundations, slabs on grade and parking facilities.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Free groundwater was not encountered upon completion of the test pit excavations. The groundwater table is believed to be below the elevation of the bedrock. However, the slow permeability of the fine-grained soils will likely produce a perched water table at or near the ground surface during and after storm events and throughout winter and spring months. See section I.10 of this report.

Specific subsurface conditions can be found in Appendix A, Soil Investigation Logs. Laboratory testing data for select samples can be found in Appendix F.

V. GEOTECHNICAL EVALUATION AND FOUNDATION RECOMMENDATIONS

A. Bearing Capacity and Foundation Recommendations

The site subsurface conditions will permit the construction of a shallow foundation system consisting of conventional strip and spread footings. Due to the importation of fill to raise the site elevation, the footings will bear at an elevation of approximately 1.0 foot below existing grade on the compact silt directly beneath the surficial topsoil. All surficial topsoil must be removed from beneath structurally loaded areas. Based on a settlement criterion of 1.0 inch, the allowable bearing capacity for this material has been estimated by GGE to be 4000 psf. The bearing capacity was tested in the field using an ELE cone penetrometer.

The contractor must remove all buried topsoil located in the vicinity of TP-1 prior to constructing foundations.

B. Pavement and Slabs on Grade

GGE recommends that all slabs be designed using a recognized standard procedure. The text "Designing Floor Slabs on Grade" by Ringo and Anderson (ASBM 0-924659-34-3) identifies several methods of floor slab design. Slabs on grade and pavement will be constructed on imported fill due to the proposed elevation of the site finished grades.

Design and construction of floor slabs should be based on the following minimum recommendations:

1. Remove all topsoil and organic subsoil including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade and replace yielding or "boiling" soils. Do not place any fill over saturated ground.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

3. Compact imported fill soil to 95% of the modified proctor maximum density (ASTM D-1557), at a moisture content within 2% of optimum.
4. Place one 6" lift of select structural fill (NYSDOT Item 304.2.02, Type 4). Compact all fill as specified in item 3 above.
5. Install structural concrete floor slab. Provide sufficient joints and flexibility at perimeter walls.

Design and construction of pavement should proceed in accordance with generally accepted criteria as follows:

1. Remove all topsoil, organic subsoil and debris including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade to reveal soft and yielding soil. Use a fully loaded 10-wheel dump truck weighing at least 30 tons or a smooth drum roller having an effective force of at least 600 pounds per linear inch of roller width. Any area exhibiting deflections in excess of 0.5 inches or rutting should be classified as unsuitable. These areas should be reworked and compacted to produce an acceptable response or over excavated and replaced with suitable fill. The depth of the undercut and type of soil fill will depend on the soil material encountered, weather conditions and the bearing conditions at the base of the undercut. The site geotechnical engineer must consider each factor if the above conditions are encountered.
3. Install ditches, lateral drains, weeps and storm drainage piping. Backfill over the pipe bedding stone with native soils.
4. Place common fill as necessary to achieve design subgrade. Common fill can be any soil or processed material except Silt soil – USCS designation ML. The top 12 inches must be structural fill. Compact all fill to a minimum 95% of the maximum modified proctor density (ASTM D-1557-78), within a moisture range of 2% $\pm$ of the optimum moisture content. The top surface of the subgrade must be "sealed" with a smooth drum roller and pitched to drain such that the embankment soils cannot become saturated.
5. Once the subgrade has been established, the surface should be covered by a suitable geotextile selected for drainage and reinforcement properties. The geotextile shall have minimum (MARV) strength properties meeting the requirements of an AASHTO M 288-96 Class 2 geotextile. The material shall also have a minimum permittivity of 0.05 sec^{-1} and an AOS of less than 0.6 mm. Installation shall conform to the manufacturers recommendation for overlap.
6. Construct flexible pavement system as follows: (or equivalent structural system)

   a) Minimum 12 inch thick layer of 2" crushed stone meeting requirements of NYSDOT item 304-2.02, type 4 and the well graded qualifications of ASTM D-2487. Compact

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

with a minimum of 5 passes of a smooth drum vibratory roller having an effective load of 600 pounds per linear inch. The finished surface should be uniform and dense. Avoid handling procedures that cause segregation.

b) Minimum 3 inch asphalt concrete binder, NYSDOT item 403.13, type 3.

c) Minimum 1-1/2 inch asphalt concrete top, NYSDOT item 403.18 or 403.19.

In the event the binder layer is used as a working surface for access to buildings under construction the surface must be power washed, not just swept, and a tack coat should be applied prior to installation of the top course. In addition, any yielding area of pavement binder should be removed and replaced prior to application of the top course.

All site contractors should be notified that roadways and parking areas will not support repeated travel by construction loads. Pavement and subgrade failure can be anticipated in areas that receive a high volume of heavy construction traffic. To preclude the overstressing of the pavement system it is recommended that haul roads be located in non-critical areas. As an option, the base course of stone can be overbuilt to a total thickness of twenty (20) inches to serve as a haul route. The additional thickness of stone and all areas of soil material that has contaminated the stone base should be removed prior to paving. Failure to remove fine grained soils from the stone base may cause pavement distress in the form of heaving resulting from freeze thaw effects.

Note that post construction heaving and cracking of pavement is often the result of poor compaction around catch basins and behind curbs. Loose material around these areas allows surface water to migrate beneath the pavement, providing increased potential for heaving due to ice build up during winter months and deterioration of the parking base during warmer months. The contractor should make sure to properly compact these areas. Also, weep holes should be installed into the bottom of catch basins to permit the drainage of any water that does manage to migrate beneath the pavement.

C. Excavation and Backfill

Excavation will basically consist of the removal of topsoil in most locations and the removal of buried topsoil in the vicinity of TP-1. The buried topsoil is typically covered by approximately 1.0 foot of soft clay. Excavation efforts are anticipated to be easy.

If deeper excavations are to be performed, the contractor should be sure to comply with OSHA standards. The soil encountered at this site should be classified by an OSHA competent person in accordance with 29 CFR, Part 1926, OSHA Subpart P, "Excavations and Trenches" prior to and during excavation.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Civil • Structural • Geotechnical • Materials Testing • Consulting

From the testing and investigation program, GGE estimates the site soils can be classified as Type B under the OSHA classification guidelines. This classification may change depending on other site criteria and moisture conditions at the time of construction. An OSHA competent person should judge the potential need for excavation bracing and excavation geometry in the field.

Native soils may be used for general fill against the foundation walls once the concrete has properly cured. All fill soil should be placed in lifts and compacted, with care taken not to damage the foundation walls. The fill at grade elevation should be sloped to drain away from the foundation walls to eliminate the potential for standing water to accumulate along the foundation. Note that drying of the native soils may be required to achieve optimum compaction.

C. Mitigation of Expansive Soils

Subsurface soils at this site are predominantly silt (ML) and silty clay with gravel (CL-ML). Some clay soils undergo volumetric change (shrinkage and swelling) with changes in moisture and degree of saturation, particularly soils classified as fat clay (CH). Fat clay is classified as a soil with a liquid limit of 50 or greater. The liquid limit is the water content, in percent, of a soil that defines the boundary between the plastic and viscous fluid states. The subsurface soils encountered at this site do exhibit characteristics of soils with a high shrink/swell potential.

D. Mitigation of the effects of Liquefaction

Liquefaction is the process where saturated cohesionless (granular) soils, specifically, fine sands and silts, transform from a solid into a liquid as a result of an increase in the pore water pressure caused by repeated disturbance such as experienced during seismic events. Liquefaction results in an immediate loss of shear strength, and thus, bearing capacity, causing total and differential settling due to a quick consolidation of the soils.

The soils located at the footing subgrade and below at this site are silts and silty clays and do not pose a concern for liquefaction. Soils with a silt and clay content in excess of 35% typically do not have the potential to liquefy. As seen in Appendix F, the subgrade material falls outside of the specification window for liquefaction potential as identified on the grain size analysis.

E. Expected Total and Differential Settlement.

Load induced total settlement for foundations bearing on undisturbed native soil is estimated to be primarily long-term (primary consolidation) settlement. The total settlement is estimated to be less than 1.0 inch for shallow foundations constructed in accordance with GGE's recommendations.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Subsurface soils across the site are very consistent and exist in layers of uniform depths. The potential for differential settlement due to varying soil conditions over the building footprint is minimal under uniform bearing pressures.

F. Varying Soil Strength

Upon excavation of the footings, if soil types or moisture contents are found to be different than those encountered during the test pit excavation and represented within this report, the bearing capacity of the variable soil will need to be reevaluated by a qualified Geotechnical Engineer. Likewise, the footing design will then require adjustment to accommodate the bearing pressure on soils of varying bearing capacities.

G. Site Class Definition

In accordance with Section 1615 (Earthquake Loads – Site Ground Motion) of the NYS Building Code, the site is classified as Site Class C. The site classification is based upon subsurface conditions in the upper 100 feet, which consist of 6 feet of dense soil overlying 94 feet of rock.

The maximum considered earthquake ground motion for this site is interpolated as .320g for short period spectral response acceleration and .064g for a one second spectral response acceleration in accordance with New York State Code figures 1615(1) and 1615(2). Based on Site Class C, the maximum considered earthquake spectral response acceleration for this site is calculated as .380g for short period spectral response acceleration (S_{MS}) and .108g for a one second spectral response acceleration (S_{M1}) in accordance with New York State Code section 1615.1.2.

The design spectral response accelerations, based on the maximum considered earthquake spectral response accelerations, are .253g for short period design spectral response acceleration (S_{DS}) and .072g for one second design spectral response acceleration (S_{D1}). In accordance with tables 1616.3(1) and 1616.3(2), the site is classified as Seismic Design Category B.

H. General Recommendations

The following comments are relative to all foundation work unless specifically noted otherwise:

1. No fill material or concrete should be placed in water, over saturated subgrade or over frozen subgrade.
2. Upon completion of excavation for footings, bearing grades should be compacted to densify soil loosened by the backhoe bucket. Proper construction practice will assure the development of the anticipated bearing strength and reduce settlement potential.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

3. Excavations must not unnecessarily extend below the design subgrade elevation.

4. If additional undercut is necessary, the excavation bottom should be graded to a uniform elevation. Undercut "pockets" should be avoided.

5. Backfill all foundations prior to applying loads.

6. Extreme care must be exercised and conformance to OSHA standards is mandatory during excavation and trench work.

7. All topsoil and organic soils should be removed from any load bearing areas, including buried topsoil from previous fill efforts.

8. The use of a "mud" mat should be considered to protect bearing grades during any extended period or when construction proceeds during inclement weather.

9. Foundation bearing grades should not be allowed to freeze either prior to or after placement of concrete. Insulating blankets should be used to cover bearing grades plus 1 foot perimeter outside forms or completed footings until backfill is placed.

10. The site contractor should maintain proper grades for runoff control and seal roll all exposed areas. All excavations should be sloped to drain with sumps to permit dewatering during construction. The fine grained foundation subgrade will lose considerable strength if exposed to standing water for long periods of time. Any saturated subgrade should be dried and recompacted or removed to an acceptable bearing level prior to placement of subsequent layers of fill or concrete.

VI. SUMMARY

The site subsurface conditions are well suited for the proposed development and will provide a suitable subgrade for the proposed construction pending strict conformance with the recommendations provided within this report. The recommendations and engineering evaluations provided in this report are based on the encountered subsurface conditions at 4180/4200 Rensch Rd and pertinent data supplied by North Forest Development. Alteration of the plans, including relocation of the house or any abnormal foundation loading may serve to invalidate this report. Do not utilize this evaluation for any other type of structure. Please contact our office if major project changes are made or if encountered soils vary from conditions noted in this report.

EXECUTIVE SUMMARY

OVERVIEW

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

The proposed mixed-use project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed project and new uses. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units to be marketed as student housing (1,025 bedrooms)

Access to the proposed mixed- project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed Concept Site Plan as prepared by Carmina Wood Morris.

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and reviewed the projected trip generation estimates. The difference between the full development trip generation estimates in the study

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the New York State Department of Transportation.

CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.

7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

I. INTRODUCTION

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

II. LOCATION

The proposed project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed mixed-use project. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The project site location and study area are illustrated in **Figure 1** (all figures are included at the end of this report).

III. EXISTING HIGHWAY SYSTEM

A. Vehicular Network Description

The following information outlined in **Table I** provides a description of the existing roadway network within the project study area. **Figure 2** illustrates the lane geometry at each of the study intersections and the Annual Average Daily Traffic (AADT) volumes on the study roadways. The AADTs reflect the most recently collected data obtained from the New York State Department of Transportation (NYSDOT). Where data is not available or up to date, Average Daily Traffic (ADT) volumes are based upon an extrapolation of turning movement counts performed by SRF Associates.

Functional classification of highways within the study area is determined by the NYSDOT and the Federal Highway Administration (FHWA). Definitions of the functional classifications shown in **Table I** are provided after the table.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

TABLE I: EXISTING HIGHWAY SYSTEM

ROADWAY	CLASS[1]	AGENCY[2]	SPEED LIMIT[3]	TRAVEL LANES[4]	TRAVEL PATTERN/ DIRECTION	EST. AADT & SOURCE[5]
Sweet Home Road (952T)	16	NYSDOT	45	4	Two-way/ North-South	17,040 NYSDOT (2018)
Maple Road (W) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	24,564 NYSDOT (2019)
Maple Road (E) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	23,377 NYSDOT (2018)
Rensch Road	19	Town	30	2	Two-way/ East-West	2,950 SRF (2022)

Notes:
1. State Functional Classification of Roadway.
2. Jurisdictional Agency of Roadway.
3. Posted or Statewide Limit in Miles per Hour (mph).
4. Number of travel lanes. Excludes turning/auxiliary lanes developed at intersections.
5. Estimated AADT in Vehicles per Day (vpd). AADT Source (Year).

Urban Principal Arterial – Other (Class 14)

An urban principal arterial serves major activity centers, can interconnect and augment higher level arterials, serve trips of moderate length, and serve demand for intra-area travel between the central business district and outlying residential areas. Unlike access-controlled arterials, abutting land uses can be served directly.

Urban Minor Arterial (Class 16)

An urban minor arterial provide service for trips of moderate length, serve geographic areas that are smaller than higher arterial roadways, and offer connectivity to higher arterial systems. These roadways distribute traffic to smaller geographic areas, provide more land access without disrupting neighborhood access, and provide urban connections for rural collectors.

Urban Local (Class 19)

Locally classified roads account for the largest percentage of all roadway mileage and includes all facilities not in one of the higher systems. Local roadways do not typically serve as bus routes, are often designed to discourage through traffic, and have the lowest degree of mobility.

B. Multi-Modal Network Description

This evaluation reviewed the study area's pedestrian, bicycle, and transit network via field and aerial reconnaissance. A description of the multi-modal infrastructure is described hereafter.

Pedestrian & Bicycle Facilities

Sidewalks are located within the study area. The signalized intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road feature pedestrian countdown signals and crosswalk striping.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

Dedicated bicycle lanes are in place along Sweet Home Road. Where there are no dedicated facility, cyclists are permitted to share the road with motorists.

Transit Facilities

The Niagara Frontier Transportation Authority (NFTA) provides regional bus and metro rail service. The nearest bus stops are at the intersections of Sweet Home Road/Rensch Road and is serviced via Route 35 (Sheridan).

IV. EXISTING TRAFFIC CONDITIONS

A. Peak Intervals for Analysis

Given the functional characteristics of the study corridors, adjacent land uses, and the proposed land uses for the project site (residential and commercial), the peak hours selected for analysis are the weekday commuter AM and PM peak periods. The combination of site traffic and adjacent through traffic produces the greatest demand during these time periods.

B. Existing Traffic Volume Data

Turning movement traffic counts were collected by SRF at the study intersections described in Section II on Thursday, March 3, 2022. Traffic counts were conducted from 7:00-9:00 AM and 4:00-6:00 PM. All traffic counts were conducted while local schools and the University at Buffalo were in session. The traffic volumes were reviewed to confirm the accuracy and relative balance of the collective traffic counts. For the purposes of this analysis, the data are utilized with the actual peak hours at each individual intersection. Using the actual peaks at each intersection provides a worst-case scenario when adding project related traffic. The unadjusted weekday AM and PM peak hour volumes are reflected in **Figure 3A**.

It is noted, however, that traffic volumes may be impacted by the COVID-19 pandemic. The NYSDOT released a study in February 2021 that described the effect the COVID-19 pandemic had on traffic in New York State in 2020. The NYSDOT study illustrated the percent difference 2020 weekday ADTs to average weekday ADTs prior to 2020. Additionally, traffic volumes were compared to traffic data obtained in 2018 traffic data at the intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road before the COVID-19 pandemic by SRF Associates.

The historic counts in the study area were used to adjust the collected data to reflect 2022 representative traffic conditions by increasing the collected traffic volumes for specific movements, such as traffic entering and exiting the University at Buffalo. This is consistent with NYSDOT and ITE methodology for adjustments related to collected traffic volumes affected by the COVID-19 pandemic. The adjustments are reflected in the Appendices.

Figure 3B illustrates the representative 2022 weekday AM and PM peak hour base volumes used for analysis purposes in this study.

C. Field Observations

The study intersections were observed during both peak intervals to assess current traffic operations. Signal timing and phasing information was obtained by the NYSDOT to determine peak hour phasing plans and phase durations during each interval. This information was used to support and/or calibrate capacity analysis models described in detail later in this report.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

D. Existing Crash Investigation

The purpose of this crash analysis is to identify inherent safety issues by studying and quantifying historical crashes at the study intersections and identifying potential crash patterns and clusters.

A crash cluster is defined as an abnormal occurrence of similar crash types occurring at approximately the same location or involving the same geometric features. The severity of the crashes should also be considered. A history of crashes is an indication that further analysis is required to determine the cause(s) of the crash(es) and to identify what actions, if any, could be taken to mitigate the crashes.

A crash investigation within the study area was conducted to assess the safety history from January 1, 2017, through December 31, 2019. The data was provided by the New York State Department of Motor Vehicles through a Freedom of Information (FOIL) request. Given that the COVID-19 pandemic influenced daily travel in 2020 and 2021, any reported crashes were dismissed from the study.

Reportable (non-injury, injury, and fatal injury) type crashes are defined as damage to one person's property in the amount of $1,001 or more. The Non-Reportable type crashes result in property damage of $1,000 or less. Crash rates were computed for the study intersection and compared with NYSDOT average crash rates for similar intersections, as summarized in **Table II**. Intersection rates are listed as crashes per million entering vehicle (CR/MEV). Pertinent crash data is provided in the Appendices.

TABLE II: EXISTING CRASH RATES

INTERSECTION	TOTAL CRASHES	NUMBER OF ENTERING VEHICLES	ACTUAL CRASH RATE	STATEWIDE AVERAGE CRASH RATE
Sweet Home Road/Rensch Road	32	28,589	1.02	0.26
Sweet Home Road/The Station	1	22,705	0.04	0.07
Sweet Home Road/Maple Road	64	38,863	1.50	0.26

Notable crash clusters are approaches with three or greater identifiable consistent crash types.

Sweet Home Road/Rensch Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 3.9 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (17), fixed object (4), left turn (4), overtaking (2), right turn (2), right angle (1), sideswipe (1), bicycle (1). The bicycle crash resulted in an injury as the cyclist was crossing the road with traffic.

The following patterns were reported:

- Rear end
  - Northbound (nine crashes)
  - Southbound (seven crashes)
- Left turn
  - Eastbound (three crashes)

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

- Fixed object
    - Northbound (three crashes)

The reported rear end crashes (53%) are characteristic of moderate to heavily trafficked signalized intersections. The causes of the rear end crashes were generally due to driver error, unsafe speeds, or following too closely. There are no correctable deficiencies at the intersection that could be improved to significantly improve safety.

Sweet Home Road/The Station

As shown in **Table II**, the study intersection has a crash rate that is lower than the statewide average crash rate for similar intersections. No discernible crash patterns exist; thus, no geometric improvements are recommended.

Sweet Home Road/Maple Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 5.7 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (24), left turn (15), right angle (10), overtaking (7), right turn (3), head on (2), fixed object (2), pedestrian (1). The pedestrian crash resulted in an injury as the pedestrian was crossing the road with traffic.

The following patterns were reported:

- Rear end
    - Northbound (three rashes)
    - Southbound (nine crashes)
    - Eastbound (four crashes)
    - Westbound (eight crashes)
- Left turn
    - Northbound (six crashes)
    - Southbound (seven crashes)
- Right angle
    - Northbound (four crashes)
    - Eastbound (three crashes)
- Overtaking
    - Westbound (four crashes)

The intersection is large consisting of numerous lanes in each direction and is frequently traveled during the peak hours. Rear end (37%) and left turn (23%) crashes are the most prominent. Most of the left turn crashes occurred due to drivers failing to yield the right of way due to the permissive movement during the thru movement on green. These drivers are likely to turn with smaller than desirable gaps in traffic and potentially creating an unsafe condition.

To correct this condition, protected left turn phases would reduce these crashes; however, this would also reduce the overall capacity of the intersection. One such improvement may be to upgrade the signals to change the green signal to flashing yellow arrow for permissive left turns. No geometric improvements are recommended.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

V. FUTURE AREA DEVELOPMENT AND LOCAL GROWTH

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and review the projected trip generation estimates. The difference between the full development trip generation estimates in the study and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the NYSDOT. All ambient growth calculations are included in the Appendices. The background traffic volumes are depicted in **Figure 4**.

VI. PROPOSED DEVELOPMENT

A. Project Description

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units marketed as student housing (1,025 bedrooms)

Access to the proposed project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed site plan as prepared by Carmina Wood Morris.

B. Site Generated Traffic

The volume of traffic generated by a site is dependent on the intended land use and size of the development. Trip generation is an estimate of the number of trips generated by a specific building or land use. These trips represent the volume of traffic entering and exiting the development. Trip Generation Manual (11th Edition) published by the Institute of Transportation Engineers (ITE) is used as a reference for this information. The trip rate for the peak hour of the generator may or may not coincide in time or volume with the trip rate for the peak hour of adjacent street traffic. Volumes generated during the peak hour of the adjacent street traffic and proposed land use, in this case, the weekday commuter AM and PM peaks, represent a more critical volume when analyzing the capacity of the system; those intervals will provide the basis of this analysis.

The proposed mixed-use project consists of three different land uses (residential, office, and retail) and is considered mixed-use (multi-use). According to the Institute of Transportation Engineers Trip Generation Handbook, (3rd Edition), "…a multi-use development is typically a single real-estate project that consists of two or more ITE land use classifications between

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

which trips can be made without using the off-site road system. Because of the nature of these land uses, the trip-making characteristics are interrelated, and some trips are made among the on-site uses. This capture of trips internal to the site has the net effect of reducing vehicle trip generation between the overall development site and the external street system (compared to the total number of trips generated by comparable, standalone sites)." "In some multi-use developments, these internal trips can be made by walking or by vehicles entirely on internal pathways or internal roadways without using streets external to the site."

The Handbook indicates internal capture rates for trips within a multi-use development to vary between residential, office, retail, restaurant, hotel, entertainment and recreational uses during the AM and PM peak hours. Given the proposed land use components and interconnection between these components, multi-use total volume trips will likely occur.

Methodology contained in National Cooperative Highway Research Program (NCHRP) Report 684: Enhancing Internal Trip Capture Estimation for Mixed-Use Development was consulted to perform the mixed-use adjustment. The interactive spreadsheet considers baseline mode shares and vehicle occupancy factors for the proposed land uses, as described in the Handbook, as well as average land use interchange distances (feet walking distance) to determine the internal capture percentage. This completed spreadsheet model is included in the Appendices. The NCHRP 684 model reported an internal baseline capture percentage of 5% during the AM peak hour and 10% during the PM peak hour.

These multi-use trip projection adjustments were applied to the respective site generated trips and subtracted from the traffic entering and exiting the site during the peak periods.

Table III shows the total site generated trips, internal trips, and resulting primary trips that are added to the existing highway system for full development of the project. All trip generation information has been included in the Appendices.

TABLE III: SITE GENERATED TRIPS

DESCRIPTION	ITE LUC	SIZE	AM PEAK HOUR		PM PEAK HOUR	
			ENTER	EXIT	ENTER	EXIT
Residential	225	1,025 bedrooms	39	64	110	111
Office	710	±10,000 SF	13	2	2	12
Retail	822	±10,000 SF	14	10	33	33
Total Site Generated Trips			**66**	**76**	**145**	**156**
Internal Trips			*-4*	*-4*	*-16*	*-16*
Total Primary Trips			**62**	**72**	**129**	**140**

Note:
1. ITE LUC = ITE Land Use Code

Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

C. *Site Traffic Distribution*

The cumulative effect of site-generated traffic on the transportation network is dependent on the origins and destinations of that traffic and the location of the access drives serving the site. The proposed arrival/departure distribution of traffic generated by the proposed project is considered a function of several parameters, including:

- Proximity and access to the University at Buffalo
- Employment centers using Census Data

Figure 6A shows the anticipated trip distribution pattern percentages for the traffic from the residential program and **Figure 6B** shows the anticipated trip distribution pattern percentages for the traffic from the commercial program. **Figure 7** illustrates the peak hour project site-generated traffic based on those percentages.

VII. FULL DEVELOPMENT VOLUMES

Proposed design hour traffic volumes are developed for the AM and PM peak hours by combining the background traffic conditions (**Figure 4**) and the new site generated traffic volumes (**Figure 7**) to yield the traffic volumes under full development conditions. The resulting design hour volumes for the proposed project are illustrated in **Figure 8** under full build-out conditions.

As stated, the existing site is currently occupied by office space. These tenants will be relocated upon full build-out of the proposed project. Traffic adjustments related to this condition is shown in the Appendices.

VIII. CAPACITY ANALYSIS

A. *Description of Capacity Analysis*

Capacity analysis is a technique used for determining a measure of effectiveness for a section of roadway and/or intersection based on the number of vehicles during a specific time period. The measure of effectiveness used for the capacity analysis is referred to as a Level of Service (LOS). Levels of Service are calculated to provide an indication of the amount of delay that a motorist experiences while traveling along a roadway or through an intersection. Since the most amount of delay to motorists usually occurs at intersections, capacity analysis focuses on intersections, as opposed to highway segments.

Six Levels of Service are defined for analysis purposes. They are assigned letter designations, from "A" to "F", with LOS "A" representing the conditions with little to no delay, and LOS "F" conditions with very long delays. Suggested ranges of service capacity and an explanation of Levels of Service are included in the Appendices. LOS “C” or better is generally desirable, but LOS “D” for signalized locations and LOS “E” for unsignalized are generally acceptable during peak periods so long as the volume to capacity ratio (v/c) is below 1.0.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

The standard procedure for capacity analysis of signalized and unsignalized intersections is outlined in the Highway Capacity Manual (HCM 2016) published by the Transportation Research Board. Traffic analysis software, Synchro 11, which is based on procedures and methodologies contained in the HCM, was used to analyze operating conditions at the study area intersections. The procedure yields a Level of Service based on the HCM 2016 as an indicator of how well intersections operate. This study used HCM 2000 methodology for determining operations at the unsignalized intersections in accordance with local NYSDOT Region 5 guidelines.

Given that the intersection of Sweet Home Road/Maple Road exceeds capacity (v/c ratio greater than 1.0) during the PM peak hour, traffic simulation modeling was also used using an extension of the Synchro software called SimTraffic. During simulation modeling, vehicles are individually tracked, and statistics are recorded on a second-by-second basis to determine the delays each vehicle experiences. Since SimTraffic simulation modeling is microscopic and stochastic, meaning car movement parameters vary randomly within a set distribution based on an initial seed number, the same traffic volume may result in slightly different results depending on the random seed used. Therefore, simulation results are reported based on an average value of multiple simulation runs to reduce the variability in results.

Synchro and SimTraffic results are contained in the Appendices.

B. Capacity Analysis Results

Existing and background operating conditions during the peak study periods are evaluated to determine a basis for comparison with the projected future conditions. The future traffic conditions generated by the proposed project were analyzed to assess the operation of the study area intersections. Capacity results for existing, background and full development conditions are listed in **Table IV**. The discussion following the table summarizes capacity conditions.

Volume-to-Capacity (v/c) Ratio	**0.68**		**1.13**		**0.72**		**1.18**		**0.71**		**1.22**	

Notes:

1. A (0.0) = Level of Service (Delay in seconds per vehicle)
2. EB = Eastbound, WB = Westbound, NB = Northbound, SB = Southbound
3. (S) = Signalized; (U) = Unsignalized
4. N/A = Approach does not exist and/or was not analyzed during this condition
5. Green shaded cells indicate low delays, yellow shaded cells indicate moderate delays, red shaded cells indicate long delays.
6. The v/c ratio, also referred to as degree of saturation, represents the sufficiency of an intersection to accommodate the vehicular demand. A v/c ratio less than 0.85 generally indicates that adequate capacity is available and vehicles are not expected to experience significant queues and delays. A v/c ratio between 0.85 and 0.95 generally indicates an intersection is nearing capacity. Intersections with a v/c ratio of 1.0 or greater generally indicate conditions at or above capacity.
7. Due to v/c being greater than 1.0 at Sweet Home Road/Maple Road during the PM peak hour, the condition was analyzed using SimTraffic Simulations.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

1. Rensch Road/Proposed Westerly Driveway

All movements are projected to operate at LOS "A" under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

2. Rensch Road/Office Lots/Villas on Rensch (W)

All movements operate at LOS "B" or better under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

3. Rensch Road/Proposed Easterly Driveway

All movements are projected to operate at LOS "B" or better under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

4. Rensch Road/Office Lots/Villas on Rensch (E)

All movements operate at LOS "A" under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

5. Sweet Home Road/Rensch Road

All movements generally operate at LOS "E" or better under existing, projected background, and future build conditions during both peak hours studied. Signal timing improvements are recommended under background conditions during the AM peak hour to maintain optimization. This consists of reducing the northbound left green time to 20 seconds (from 25 seconds) and increasing the southbound left green time to 28 seconds (from 25 seconds).

Upon full build conditions, the southbound left movement during the AM peak hour is projected to change from LOS "D" to "E"; a borderline condition, as the threshold is at 55.0 seconds of delay per vehicle. During the PM peak hour, the eastbound thru/right movement changes from LOS "D" to "E"; a borderline condition.

The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

6. Sweet Home Road/The Station

All movements operate at LOS "D" or better under existing, projected background, and future build conditions during both peak hours studied. Between background and full build conditions, the westbound left movement changes from LOS "C" to "D" during the PM peak hour; a borderline condition as the threshold occurs at 25.0 seconds of delay per vehicle. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

7. Sweet Home Road/Maple Road

All movements generally operate at LOS "D" or better under existing, projected background, and future build conditions during the AM peak hour. However, operational deficiencies exist during the PM peak hour under all conditions based upon traffic simulations. The overall intersection operates with a v/c ratio greater than 1.0 with an overall LOS of "D".

The eastbound left movement and existing traffic volumes are accommodated by a single lane. An additional left turn would be more appropriate based on the general rule of thumb of

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

providing an additional left turn lane when peak hour left turn traffic volumes exceed 300 vehicles. Additionally, the southbound right turn movement is accommodated by a single lane. Additional lanes to accommodate these turning movements would improve overall capacity. However, the construction of these improvements would require significant widening, relocation of utilities, and widening past the intersection.

The proposed project will contribute approximately 1.7% of total intersection traffic during the AM peak hour and 2.3% of total intersection traffic during the PM peak hour.

When considering the projected traffic increases resulting from the proposed project, no project related capacity improvements are recommended.

IX. ALTERNATIVE PARKING PLAN

A. Town Parking Requirements

A Parking Demand Assessment was prepared consisting of an Alternate Parking Study per Section 7-1-7-A of the Zoning Code. When evaluating the parking supply needs for the proposed mixed-use project, our firm projected the parking demand considering shared parking (mixed-use) principles using nationally accepted methodology developed by the Urban Land Institute (ULI), ITE, International Council of Shopping Centers (ICSC), and National Parking Association (NPA). and a comparison to Town requirements, as set forth within Section 5A-9-1-A of the Town of Amherst's Updated Zoning Code Adopted on September 3, 2019 for Mixed-Use Districts.

Section 5A-9-1-A of the Zoning Code sets forth the off-street parking requirements for different categories of land uses. **Table V** depicts the required parking spaces for the project site.

TABLE V: TOWN CODE PARKING REQUIREMENTS

UNIT/USE TYPE	REQUIRED PARKING RATIO	SIZE	TOTAL REQUIRED PARKING SPACES
Two-bedroom unit	1.0 space per dwelling unit	475 units	475
Three or more bedroom unit	1.5 spaces per dwelling unit	25 units	38
Retail Sales	2.5 spaces per 1,000 SF	10,000 SF	25
Office	2.5 spaces per 1,000 SF	10,000 SF	25
Total Required Parking Spaces			**563**

Strict application of the unshared off-street parking standards in the Zoning Code results in a parking requirement of 563 spaces. The number of parking spaces to be provided is 316 surface spaces and 240 structured spaces for a total of 556 spaces. Thus, there is a deficit of seven parking spaces per strict application of Section 5A-9-1-A of the Zoning Code.

B. Shared Parking Demand

Shared parking studies are conducted to establish the total number of spaces necessary by mixed-use developments to effectively serve expected parking demands. The shared parking concept builds upon the premise that land uses in a mixed-use development often do not share the same peak demand period, so spaces can be shared between the different land uses

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

during different peak periods. Each land use typically has a peak demand period where it would occupy the maximum number of spaces that the use requires and an off-peak period where a lesser percentage of the maximum spaces would be occupied; be it by time of day, day of week, or even month of the year. This allows for the project to provide fewer spaces than would be required if the land uses on a project site were to be treated separately with individual parking demands. The concept of shared parking is well recognized within the real estate and regulatory community and is proven to work.

To estimate the number of parking spaces required for the proposed mixed-use project, this assessment used the ULI methodology for shared parking. This methodology is utilized by transportation engineers and planners when evaluating the parking demand for a mixed-use project. The ULI Shared Parking 3rd Edition includes state-of-the-art practice methodologies for determining parking demand in these types of projects.

Accompanying the publication is an interactive Shared Parking Calculation Model (Model) that is used to estimate the shared parking demand. The Model requires a user to input the number of units associated with each proposed land use. Within the Model, 32 land uses are identified – some of which are subdivided into more refined categories – with 44 different recommended base parking ratios based on suburban locations with little or no transit. Data contained within the Model is from a combination of ULI surveys and the ITE Parking Generation Manual. Outputs consist of a summary table describing the base parking demand and shared parking reduction; a monthly demand comparison; weekday and weekend demand by month; and weekday and weekend demand by hour.

The peak hour demand, respective of weekday, weekend, and seasonal demands, is projected to occur at 7:00 PM on a December weekend. The projected peak hour demand for the mixed-use project (i.e., the busiest hour of the busiest weekday or weekend of the year) is ±566 spaces. Parking demand accumulations for the peak weekday and weekend are presented in **Table VI**.

TABLE VI: SHARED PARKING DEMAND PROJECTIONS

LAND USE	SIZE	WEEKDAY		WEEKEND	
		UNADJUSTED DEMAND	**SHARED DEMAND**	UNADJUSTED DEMAND	**SHARED DEMAND**
Residential	500 units	519	**519**	544	**544**
Retail	±10,000 SF	36	**29**	40	**23**
Office	±10,000 SF	38	**4**	5	**0**
Total Parking Spaces		593	**552**	589	**566**
Shared Parking Reduction		**7%**		**4%**	

Notes:
1. Weekday shared demand occurs in December at 7:00 PM
2. Weekend shared demand occurs in December at 7:00 PM

When considering the site's 556 total parking spaces, the projected peak shared demand is deficient by 10 spaces.

It is noted that the proposed residential use is marketed as student housing. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

highly likely to own fewer vehicles per than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus.

Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

X. CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_061622 (25580 : Z-2022-02)

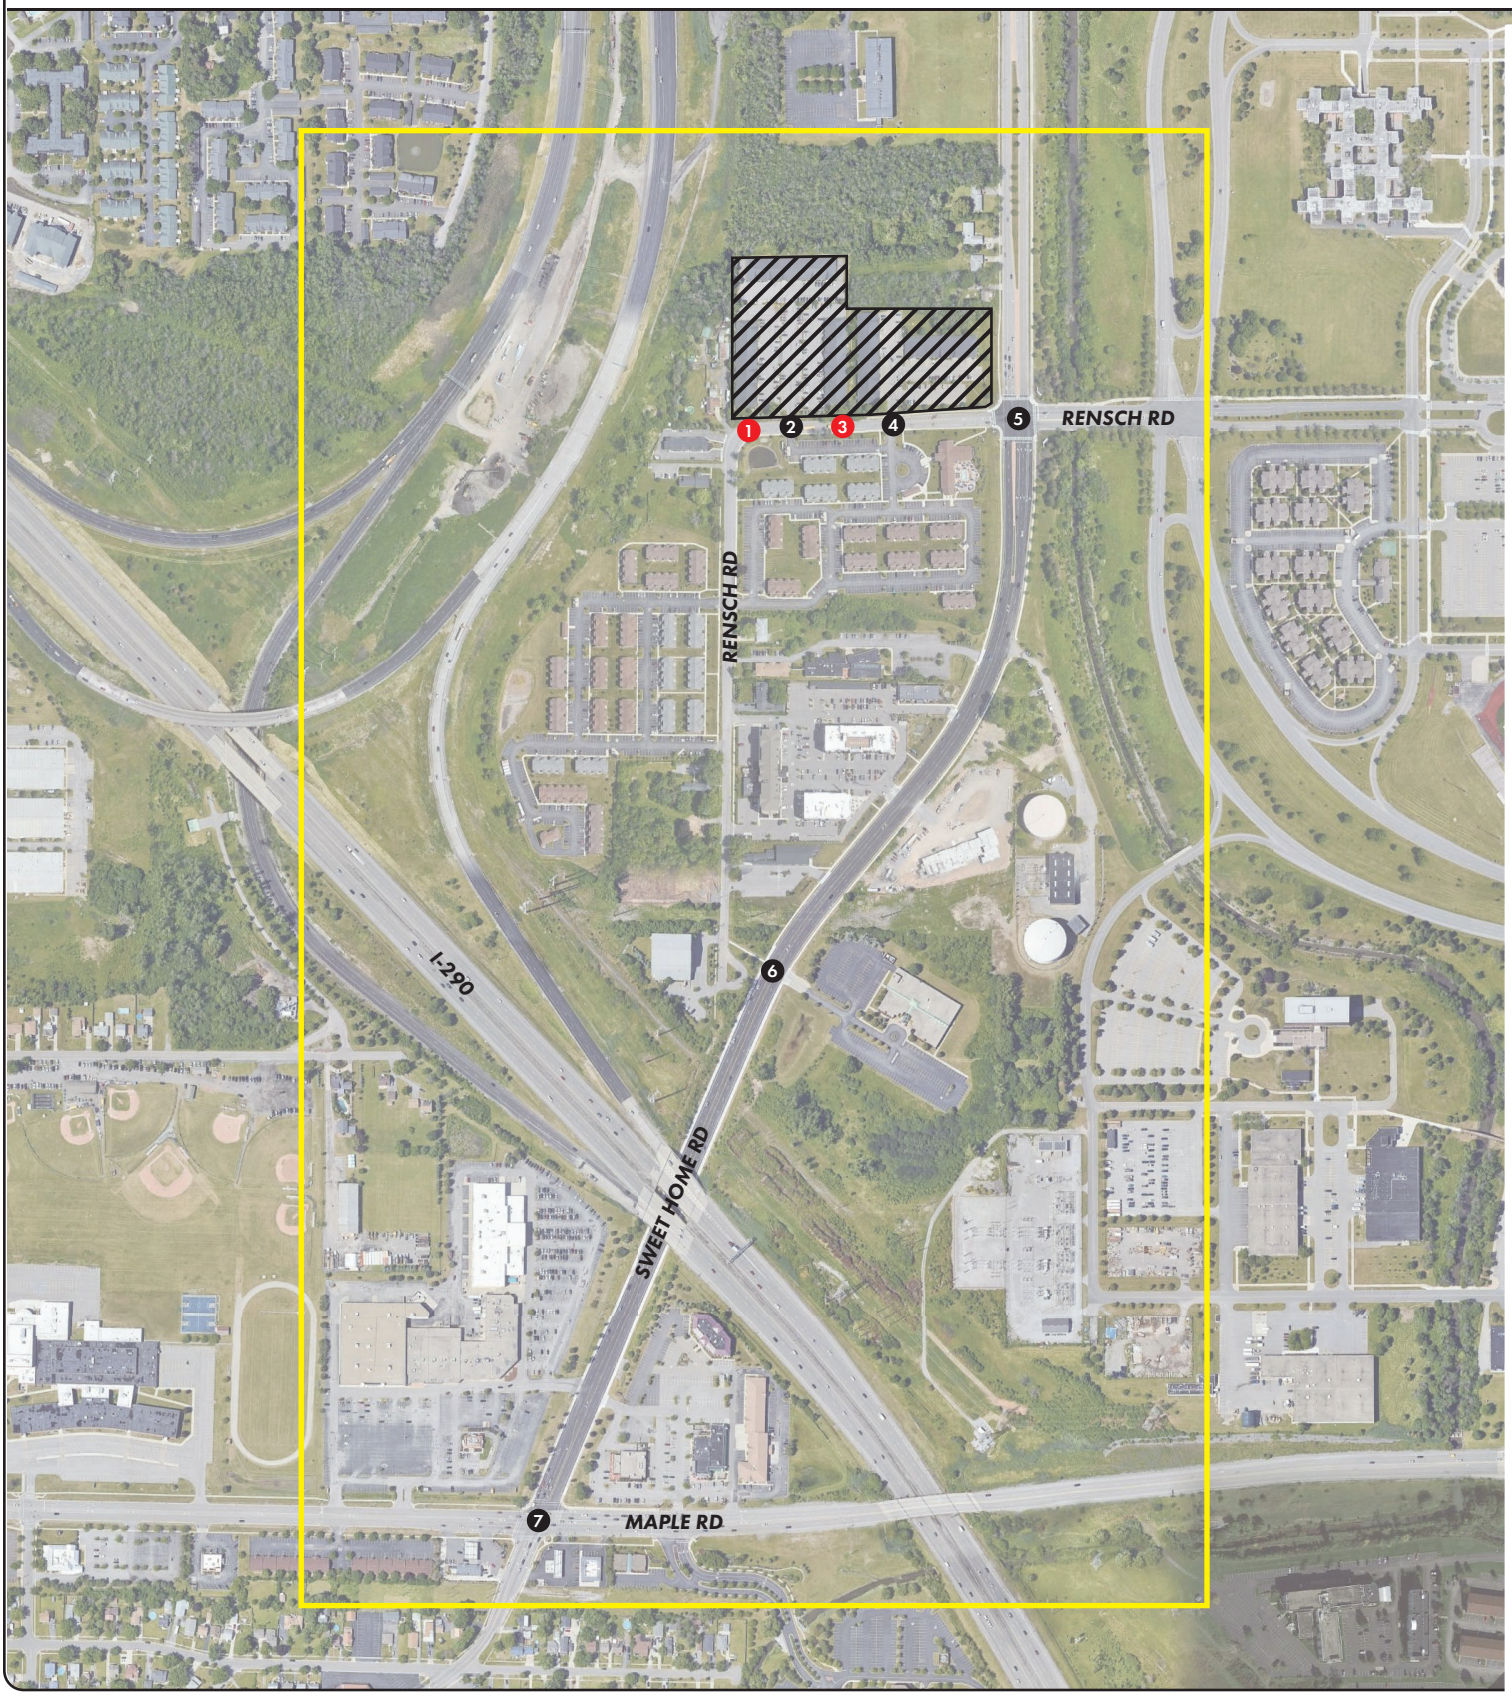
6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.



7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

§ 5A-9 GENERAL DEVELOPMENT STANDARD

5A-9-1. Parking, Loading and Stacking

All parking, loading and stacking must meet the requirements of 7-1, except as required below.

A. Minimum Parking in Mixed Use Districts

(1) Off-Street Vehicle Parking

Off-street parking facilities must be provided in quantities not less than set forth in the following schedule.

SCHEDULE OF PARKING REQUIREMENTS

RESIDENTIAL USES	
Single-family detached	1.0 space per dwelling unit
Attached dwelling	1.0 space per dwelling unit
Multi-family dwelling, upper-story dwelling, assisted group living, senior citizen housing	.75 space per efficiency unit 1.0 space per one or two-bedroom unit 1.5 space per three or more bedroom unit
PUBLIC AND CIVIC USES	
Ambulance service	2.5 spaces per 1,000 SF
Business college, commercial school	3.5 spaces per 1,000 SF
College, university	3.5 spaces per 1,000 SF
Day care	3.5 spaces per 1,000 SF
Place of worship	3.5 spaces per 1,000 SF
Public utility service structure or facility	2.5 spaces per 1,000 SF
School, elementary/secondary (private)	3.5 spaces per 1,000 SF
Telecommunication facility, minor utility	1 space per facility
COMMERCIAL USES	
Animal grooming, cat boarding facility, animal hospital or veterinarian	2 spaces per 1,000 SF
Lodging	.75 spaces per room
Medical	3.5 spaces per 1,000 SF
Office	2.5 spaces per 1,000 SF
Personal service	2.5 spaces per 1,000 SF
Recreation, indoor	2.5 spaces per 1,000 SF
Restaurant	4.0 spaces per 1,000 SF
Retail sales and service	2.5 spaces per 1,000 SF

Level of Service Criteria

Highway Capacity Manual 2016

SIGNALIZED INTERSECTIONS

Level of Service is a qualitative measure describing operational conditions within a traffic stream, based on service measures such as speed and travel time, freedom to maneuver, traffic interruptions, comfort, and convenience. Level of Service for signalized intersections is defined in terms of delay specifically, average total delay per vehicle for a 15-minute analysis period. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 20
C	20 – 35
D	35 – 55
E	55 – 80
F	>80

UNSIGNALIZED INTERSECTIONS

Level of Service for unsignalized intersections is also defined in terms of delay. However, the delay criteria are different from a signalized intersection. The primary reason for this is driver expectation that a signalized intersection is designed to carry higher volumes than an unsignalized intersection. The total delay threshold for any given Level of Service is less for an unsignalized intersection than for a signalized intersection. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 15
C	15 – 25
D	25 – 35
E	35 - 50
F	>50

N **SITE PLAN**

SCALE: 1"=30'

SITE DATA

SITE AREA = 7.4 AC
ZONED: RD, REZONED TO CTR - 5 & CTR-8
USE: PROPOSED 8-STORY MIXED USE BUILDING & (2) 5-STORY RESIDENTIAL BUILDINGS
500 RESIDENTIAL UNITS, 20,000 SF COMMERCIAL

SETBACKS - BUILDING	REQUIRED	PROVIDED
FRONT	5 FT	10.0' MIN.
SIDE	NONE	35.29' MIN. / 166.33'
REAR	NONE	57.52' MIN. / 68.86'
ACCESSORY STRUCT.	NONE	N/A
SETBACKS - PARKING		
FRONT	10 FT	> 15 FT
SIDE	N/A	10.44' MIN.
REAR	N/A	6.75' MIN.
TOTAL VEHICLE SPACES	563	316 + 240 GAR.
BICYCLE	27	12*
ELECTRIC VEHICLE STATION	56	8*
GREENSPACE		
INTERIOR PARKING GREENSPACE:	5% (0.18 AC)	6.9% (0.25 AC)
OVERALL:	N/A	17.6% (1.3 AC)
MAX. BUILDING HEIGHT	5 STORIES / 75' 8 STORIES / 105'	5 STORIES / 75' 8 STORIES / 105'
OPEN SPACE	5% (0.37 AC)	> 5% (x.xx AC)

* VARIANCE REQUIRED

PARKING CALCULATION (PER SECTION 5A-9-1-A)

RETAIL SALES: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000 / 1,000) x 2.5 = 25 SPACES REQ'D

OFFICE: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000 / 1,000) x 2.5 = 25 SPACES REQ'D

APARTMENTS/TOWNHOMES:
REQ'D: 1 SPACE PER 2-BDRM UNIT = 1 X 475 UNITS = 475 SPACES
1.5 SPACE PER 3-BDRM UNIT = 1.5 X 25 UNITS = 38 SPACES
REQ'D = 513 SPACES REQ'D

TOTAL PARKING SPACES REQUIRED = 563 SPACES

BICYCLE CALCULATION (PER SECTION 5A-9-1-A)

RESIDENTIAL:
REQ'D: 0.5 PER UNIT (20 MAX.)
REQ'D = 0.5 X 500 = 250 THEREFORE 20 SPACES REQ'D.

COMMERCIAL:
REQ'D: 1 SPACE PER 3,000 SF
REQ'D = 20,000 / 3,000 = 7 SPACES REQ'D

TOTAL BICYCLE SPACES REQUIRED = 27 SPACES

ELECTRIC VEHICLE CALCULATION (PER SECTION 5A-9-1-D)

10% OF TOTAL PARKING = 556 x 0.1 = 56 SPACES REQ'D.

SUBJECT: REQUEST TO REZONE 7.43± ACRES OF LAND FROM **RD** TO **CTR-8** & **RD** TO **CTR-5**, **Z-2022-02**; PROPERTY LOCATED AT **1400-1404 & 1408-1416 SWEET HOME ROAD**.

Dear Sir/Madam:

At its meeting of June 16, 2022 the Planning Board considered your request to rezone the subject property from **RD** to **CTR-8 & CTR-5** and voted to adjourn the request.

This request will be placed on the Planning Board agenda for the August 18, 2022 meeting.

Should you have any questions regarding the Planning Board's decision, please do not hesitate to call us.

Very truly yours,

for Daniel C. Howard, AICP
Planning Director

City State Zip Code

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

7. **Petitioner's interest in property** [Note: Authorization Letter of the Property Owner attached as Exhibit "1" of this Rezoning Application.]

_____Option to purchase

_____Owner

__X__Other (explain) The Project Site and Petitioner are related entities.

8. **The following are all others having an interest in this application and join herein with the petitioner named above:** (describe extent of interest; attach sheets as needed)

Not Applicable.

9. **Attach Survey and Legal description of land to be rezoned. The Survey must be prepared by a New York State Licensed Land Surveyor.** Legal description of property to be rezoned from RD to CTR-8 is attached as Exhibit "3" and a reduced size copy of the Survey of the Project Site is attached as Exhibit "4".

10. **Said property has the following deed restrictions or Covenants:** (attach copy) Not Applicable.

Liber _____ Page _____

11. **Information on proposed project:**

A. Description of the character of the proposed development:

See Exhibit 5.

B. Rationale for rezoning request:

1. Why was this site chosen?

See Exhibit 5.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

2. Why cannot land be used with the existing zoning?

See Exhibit 5.

3. How will this rezoning impact surrounding properties?

See Exhibit 5.

4. How will this rezoning impact the school system?

See Exhibit 5.

12. Quantitative Data:

A. Total # of dwelling units: 500 units

B. Distribution of dwelling units by type: All dwelling units are apartments for lease

C. Gross Residential Density per acre: 67.29 units per acre.

D. Total amount of Open Space: 0

E. Proposed Non-Residential Floor Area: 20,000 sq. ft. first floor commercial space.

[Note: A reduced size copy of the Concept Site Plan [Drawing C-100] for the proposed mixed-use redevelopment project as prepared by Carmina Wood Morris is provided at Exhibit "7" and a full size copy is also attached.]

13. Development Schedule:

Start: To be Determined

Finish: To be Determined

Stages (# of): 1

14. If any portion of the proposed development is planned to be sold or leased, please describe:

The commercial space and residential units will be leased.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

15. Open Space ownership and maintenance provisions (if applicable):

Greenspace and landscaping will be privately owned and maintained.

16. Basis for Findings (Sec. 8-3-5 of the Town Zoning Code) (Attach sheets and supplemental materials as necessary.)

A. The proposed zoning and development plan must be generally consistent with the policies of the Comprehensive Plan and the Town Zoning Ordinance.

1. State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps, and/or figures in the plan that support the proposed zoning at this location (The Comprehensive Plan document is available at the Planning Department, Town Clerk's Office, Amherst libraries, or at www.amherst.ny.us). Add sheets as needed.

See Exhibit 6.

2. Pursuant to NYS Town Law Section 272a(11), "all Town land use regulations must be in accordance with a comprehensive plan adopted pursuant to this Section." The Town Board adopted the Comprehensive Plan pursuant to NYS Town Law 272 on January 2, 2007. If the rezoning is approved, the Town Board may require the Plan to be amended, as applicable.

Cite all text, map, and / or figures that must be amended to support the proposed zoning at this location (attach pages as necessary) and provide detailed suggested amendments.

See Exhibit 6.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

3. State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

See Exhibit 6.

B. Adequate Services and Utilities are available or are proposed to be made available with the construction of the development:

1. Sanitary Sewer
   Yes.
2. Storm Sewer/Drainage
   Yes.
3. Water
   Yes.
4. Other Yes.

C. Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

See Exhibit 6.

D. Suitability of the subject property for uses permitted by the current versus the proposed district:

See Exhibit 6.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

E. Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

See Exhibit 6.

17. The petitioner encloses herewith the sum of $ N/A to pay the fee, and consents to the placement of a sign(s) at the described location identifying this request for a period of time to be determined by the Town Clerk.

18. The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

[Note: Authorization Letter of Property Owner signed attached as Exhibit "1".]

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.

5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Mixed-Use Redevelopment Project		
Project Location (describe, and attach a general location map): 1400-1404 and 1408-1416 Sweet Home Road - Town of Amherst - Erie County [SBL No. 54.12-1-42 and 54.12-1-43.1]		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed mixed-use redevelopment project consisting of an 7-story mixed-use building with 20,000 sq. ft. of 1st floor commercial space and two 7-story multifamily buildings (total of 500 apartments with total of 585 parking spaces) and related site improvements. The action includes an amendment of the zoning classification of 1400-1404 and 1408-1416 Sweet Home Road (collectively the "Project Site") from RD to CTR-8. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the proposed mixed-use and multifamily buildings and all related site improvements including parking spaces, 2 driveways onto Rensch Road, access aisles, landscaping, lighting, underground storm water management improvements, water and sanitary sewer lines as well as utility connections. The Project Site consists of an existing office park to be replaced by the proposed mixed-use project. Given that the proposed mixed-use project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it involves more than 250 attached residential units.

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board - Amended Rezoning Application	July 25, 2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Planning Board - Site Plan Approval	To be Determined ("TBD")
c. City, Town or Village Zoning Board of Appeals ☑Yes ☐No	Zoning Board of Appeals - Possible Area Variances	TBD
d. Other local agencies ☑Yes ☐No	Building Dept. - Demolition & Building Permits; Highway Department - Curb Cut Permits	TBD
e. County agencies ☑Yes ☐No	ECWA - Water	TBD
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - SPDES and DSCA	TBD
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☑Yes ☐No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
Research Development District ("RD")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? CTR-8

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department for the fire district in which the Project Site is located

d. What parks serve the project site?
There are various parks that will be accessible to the future tenants of the mixed-use redevelopment project

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Mixed-use project consisting of approximately 20,000 sq. of 1st floor commercial space and apartments for lease [3 proposed building consistent with the Concept Site Plan [Drawing C-100].

b. a. Total acreage of the site of the proposed action? 7.43 acres
b. Total acreage to be physically disturbed? 7.43 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 7.43 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

f. Does the project include new residential uses? ☑ Yes ☐ No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				500
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑ Yes ☐ No

If Yes,

i. Total number of structures 1 Mixed-Use Building

ii. Dimensions (in feet) of largest proposed structure: 105' height; 170' width; and 242' length

iii. Approximate extent of building space to be heated or cooled: 20,000 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☑ Yes ☐ No

If Yes,

i. Purpose of the impoundment: Undeground stormwater detention.

ii. If a water impoundment, the principal source of the water: ☑ Ground water ☐ Surface water streams ☐ Other specify:

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: N/A acres

v. Dimensions of the proposed dam or impounding structure: N/A height; N/A length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

N/A

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐ Yes ☑ No

If Yes:

i .What is the purpose of the excavation or dredging?

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No

If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☐No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 110,000 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☑No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 110,000 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

- Do existing sewer lines serve the project site? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)
_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: Traffic Impact Study prepared by SRF Associates previously submittted with Rezoning Application and Supporting Documentation] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend ☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____

To be determined for 1st floor commercial space and dependent on needs of commercial tenants.

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):

National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☐No

l. Hours of operation. Answer all items which apply.

i. During Construction:

- Monday - Friday: 7:00 AM to 7:00 PM
- Saturday: 7:00 AM to 5:00 PM
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:

- Monday - Friday: To be Determined [Commercial]
- Saturday: TBD
- Sunday: TBD
- Holidays: TBD

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed mixed-use redevelopment project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

There will be outdoor lighting per the lighting standards contained in the Town of Amherst Zoning Code.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☑ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☐ Yes ☑ No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☐ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☐ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☑ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): UB North Campus and Center for Inquiry

ii. If mix of uses, generally describe:

There are a wide assortment of land uses on properties zoned GB, MFR-5, etc. in the vicinity of the Project Site.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	6.5	6.74	.2
• Forested	0	0	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	0	0	0
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	1.2	1	(.2)

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

c. Is the project site presently used by members of the community for public recreation? ☐ Yes ☑ No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☑ Yes ☐ No
If Yes,
i. Identify Facilities:
University of Buffalo North Campus and People Inc. Group Home

e. Does the project site contain an existing dam? ☐ Yes ☑ No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐ Yes ☑ No
If Yes:
i. Has the facility been formally closed? ☐ Yes ☐ No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐ Yes ☑ No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐ Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐ Yes ☐ No
☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☐ Yes ☑ No
If yes, provide DEC ID number(s): _____
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☑ No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >1 feet

b. Are there bedrock outcroppings on the project site? ☐ Yes ☑ No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____ %

c. Predominant soil type(s) present on project site:

Churchville Silt Loam	100 %
	%
	%

d. What is the average depth to the water table on the project site? Average: >3 feet

e. Drainage status of project site soils:

☐ Well Drained:	% of site
☐ Moderately Well Drained:	% of site
☑ Poorly Drained	100 % of site

f. Approximate proportion of proposed action site with slopes:

☑ 0-10%:	100 % of site
☐ 10-15%:	% of site
☐ 15% or greater:	% of site

g. Are there any unique geologic features on the project site? ☐ Yes ☑ No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐ Yes ☑ No

ii. Do any wetlands or other waterbodies adjoin the project site? ☑ Yes ☐ No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑ Yes ☐ No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☑ No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐ Yes ☑ No

j. Is the project site in the 100-year Floodplain? ☐ Yes ☑ No

k. Is the project site in the 500-year Floodplain? ☐ Yes ☑ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐ Yes ☑ No
If Yes:

i. Name of aquifer: _____

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: acres
- Following completion of project as proposed: acres
- Gain or loss (indicate + or -): acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

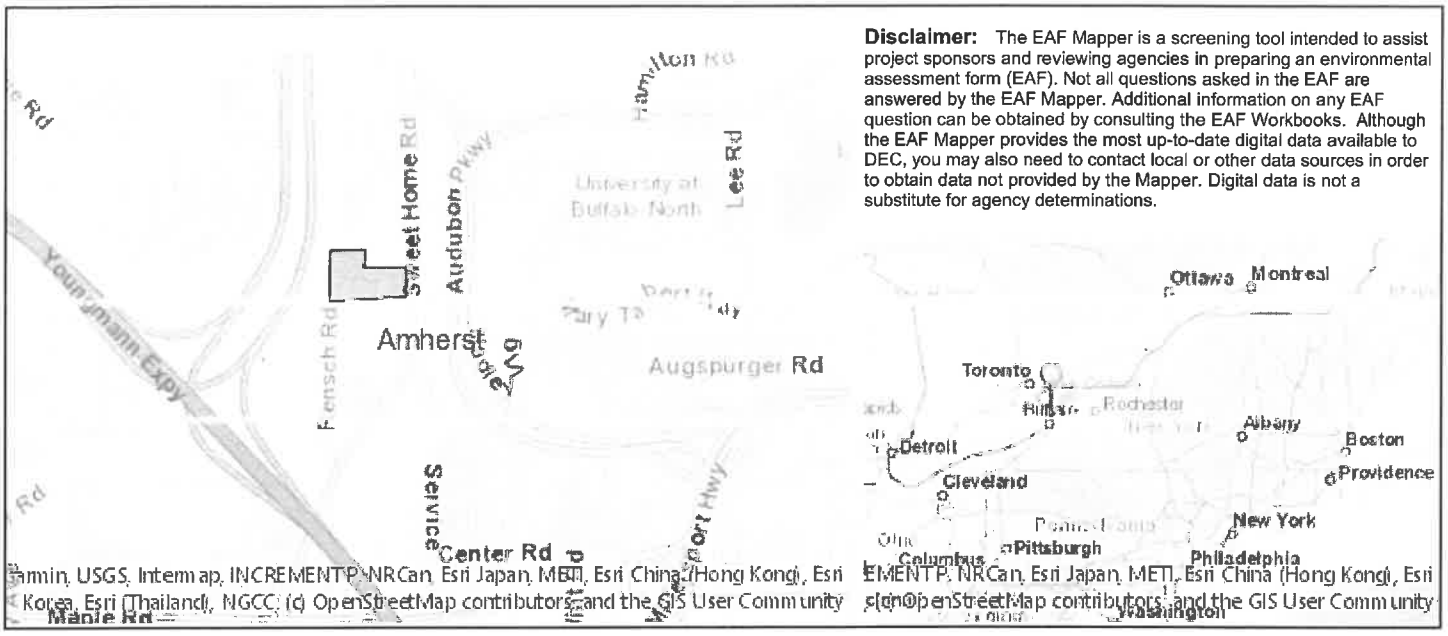
If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name North Forest Development LLC Date July 25, 2022

Signature _____ Title Project Counsel



Sean Hopkins, Esq.

EAF Mapper Summary Report

Sunday, March 13, 2022 1:43 AM

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	No
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	Yes
E.2.h.iii [Surface Water Features]	Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No
E.2.o. [Endangered or Threatened Species]	No

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

E.2.p. [Rare Plants or Animals]	No
E.3.a. [Agricultural District]	No
E.3.c. [National Natural Landmark]	No
E.3.d [Critical Environmental Area]	No
E.3.e. [National or State Register of Historic Places or State Eligible Sites]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.3.f. [Archeological Sites]	Yes
E.3.i. [Designated River Corridor]	No

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Rezoning of 1400-14034 and 1408-1416 Sweet Home Road from from RD to CTR-8

TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Churchville Silt Loam	Severe	Severe	Severe	Severe	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   __x__ Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report prepared by Glynn Geotechnical Engineering dated February 11, 2004 have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? □ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? □ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? □ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: □ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project 269
   Source: Traffic Impact Study prepared by SRF Associates dated March 21, 2022.

8. Will blasting occur during construction? □ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes □ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    110,000 gpd average flow 440,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? □ Yes ☒ No

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Exhibit 3 – Legal Description of Property to be Rezoned from RD to CTR-8

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

EXHIBIT 3 OF AMENDED REZONING APPLICATION

LEGAL DESCRIPTION OF PROPERTY TO BE REZONED FROM RESEARCH DEVELOPMENT DISTRICT ("RD") TO CTR CENTER EIGHT ("CTR-8")

1400-1404 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot No. 79, 174.00 feet south of the northeast corner of said Lot No. 79, said point also being the southeast corner of Liber 2713 of Deeds at page 120, said east line also being the center line of Sweet Home Road (width varies, originally 66 feet wide); thence westerly along a line parallel to the north line of said Lot No. 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75 the point or place of beginning; thence southerly along the west line of said Parcel No. 75 and bearing of S 00° 00' 20" W, 297.93 feet to a point; thence southwesterly along the west line of said parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.5 feet wide); thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the west line of deed recorded in the Erie County Clerk's Office on March 3, 2017 in Liber 11310 of Deeds at page 1116; thence northerly along a line parallel to the east line of said Lot No. 79 and bearing N 00° 00' 20" E, 330.11 feet to a point; thence easterly along a line parallel to the north line of said Lot No. 79 and bearing N 89° 38' 35" E, 426.50 feet more or less to the point or place of beginning and containing 3.175 Acres, more or less.

Excepting therefrom, that portion of premises acquired by the People of the State of New York by Notice of Appropriation dated May 20, 2005, recorded September 26, 2005 in Liber 11101 of Deeds, page 8475.

1408, 1412 and 1416 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot 79, 174.00 feet south of the northeast corner of said Lot 79, said point also being the southeast corner of Liber 2713 of deeds at page 120, said east line also being the centerline of Sweet Home Road (width varies, originally 66 feet wide); Thence westerly along a line parallel to the north line of said Lot 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75; Thence southerly along the west line of said Parcel No. 75 and bearing S 00° 00' 20" W, 297.93 feet to a point; Thence southwesterly along the west line of said Parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.50 feet wide); Thence westerly along the north

EXHIBIT 5 OF AMENDED REZONING APPLICATION

RESPONSES TO QUESTION 11 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-5 AND CTR-8

Question 11(A): **Description of the character of the proposed development:**

Response to Question 11(A): The proposed mixed-use project will be upscale in character and will feature an eight-story mixed use building along the Sweet Home Road frontage of the Project Site and two five-story buildings on the remainder of the Project Site. The existing office buildings located on the Project Site would be demolished in connection with the mixed-use redevelopment project. The proposed mixed-use redevelopment project requires the zoning classification of the Project Site to be amended from Research Development District ("RD") to CTR-8 Center 8 District ("CTR-8").

The conceptual layout of the proposed mixed-use project is depicted on the full size Concept Site Plan [Drawing C-100] prepared by Carmina Wood Morris P.C. attached to this Rezoning Application. A reduced size copy of the Concept Site Plan is also provided at **Exhibit "7"**. It is important to mention that the layout of the proposed project as depicted on the Concept Site Plan provided is not meant to represent the final layout of the proposed mixed-use redevelopment project since modifications may be necessary based on the project review process and the preparation of fully engineered plans.

The proposed mixed-use redevelopment project will be consistent with the character of nearby parcels that have been rezoned by the Town during the past decade including the nearby student housing communities and mixed-use projects on properties on the west side of Sweet Home Road consisting of commercial space, apartments and hotels. Landscaping will be provided pursuant to a Landscaping Plan to be prepared by a licensed landscape architect during the site

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

plan review stage of the project and the landscaping will feature numerous trees, bushes and shrubs.

Question 11(B)(1): Rationale for rezoning request: 1. What was this site chosen?

Response to Question 11(B)(1): The Project Site is an appropriate location for the proposed project given the character and scale of nearby land uses and the close proximity to the University of Buffalo North Campus. A primary reason the Project Site was selected for the proposed mixed-use project is that it is designated as "Suburban Corridor" per Figure 6-A of the Comprehensive Plan.

Question 11(B)(2): Why cannot land be used with the existing zoning?

Response to Question 11(B)(2): The Project Site is currently zoned Research and Development ("RD") and can continue to be utilized as an office park. The Applicant is requesting that the Project Site be rezoned to CTR-8 to accommodate the proposed mixed-use project. Nearly all of the nearby parcels on both sides of Sweet Home Road and Rensch Road in close proximity to the Project Site were rezoned to RD by the Town of Amherst in 1976, at the time the Town adopted a new zoning code.

The planning objective at that time was to provide RD zoned land that would accommodate uses that would benefit from close proximity to the UB North Campus. The development of the Project Site and parcels in the surrounding vicinity for research and development purposes did not occur and as a result the zoning classification of most of the properties in the vicinity have been amended in the past approximately fifteen years to accommodate existing land uses such as a hotel being constructed on GB zoned property at 1265 Sweet Home Road, the mixed-use projects on Rensch Road and the Villas on Rensch student housing community, located on approximately

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

twenty acres of property that was rezoned from RD to Multi Family Residential District Six ("MFR-6") by the Town Board in August of 2007.

The redevelopment of the Project Site for the higher intensity uses expressly permitted by the existing RD zoning classification would not be compatible with the existing character of the neighborhood. The existing RD zoning classification expressly allows large buildings to accommodate uses that involve high intensity commercial and industrial operations and that often involve 24/7 business hours as well high volume use of large tractor trailers. The expressly permitted uses of property zoned Research and Development ("RD") is set forth in Section 4-9-2A of the Zoning Code and includes intensive commercial facilities for the compounding, manufacturing and assembly of products such as automotive accessories, clothing and textiles, electronic equipment and appliances, furniture, medical and scientific equipment and supplies, pharmaceutical products as well as experimental research and testing facilities, warehouses and storage facilities and wholesale distribution facilities. A copy of Section 4-9 of the Zoning Code has been attached as **Exhibit "8"** of this Amended Rezoning Application.

Question 11(B)(3): How will this rezoning impact surrounding properties?

Response to Question 11(B)(3): The proposed rezoning of the Project Site from RD to CTR-8 will not result in any significant adverse impacts on surrounding properties. The proposed mixed-use project will be much more compatible with the existing land uses in the vicinity of the Project Site than the higher intensity uses expressly permitted by the existing long-standing RD zoning classification.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Question 11(B)(4): How will this rezoning impact the school system?

Response to Question 11(B)(4): The proposed mixed use project will have a positive impact on the Sweet Home Central School District since the property taxes that will be generated on an annual basis will be significantly higher than the current property taxes. The proposed project will not result in any significant increased demand for educational services since the proposed multifamily units are not likely to attract a substantial number of families with school age children.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Exhibit 6 – Responses to Questions 16A, 16B, 16D & 16E of the Rezoning Application

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

EXHIBIT 6 OF AMENDED REZONING APPLICATION

RESPONSES TO QUESTION 16 OF REZONING APPLICATION REZONING OF 1400-1404 AND 1408-1416 SWEET HOME ROAD FROM RD TO CTR-8

Question 16(A)(1): **State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps and/or figures in the plan that support the proposed zoning at this location.**

Response to Question 16(A)(1): The request to amend the zoning classification of 1400-1404 and 1408-1416 Sweet Home Road from RD to CTR-8 (collectively the "***Project Site***") to accommodate the proposed mixed-use redevelopment project is consistent with the adopted Bicentennial Comprehensive Plan. The Town of Amherst adopted the Bicentennial Comprehensive Plan in January of 2007 after completing a lengthy planning process that included numerous public meetings and public hearings involving the Comprehensive Plan Advisory Committee, the Planning Board and the Town Board.[1] In December of 2020, the Town Board most recently adopted amendments to the Bicentennial Comprehensive Plan. The Comprehensive Plan is intended to guide future growth and redevelopment in the Town.

Figure 6 of the Bicentennial Comprehensive Plan is the Conceptual Land Use Plan and it depicts the Project Site as being as being appropriate for "Commercial/Mixed Use" uses. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "9"**. The Conceptual Land Use Plan is intended to communicate the overall direction and concept of future development in the Town

[1] A copy of the resolution adopted by the Town Board on January 2, 2007 for the purpose of adopting the Bicentennial Comprehensive Plan pursuant to Town Law Section 272-a is included at the beginning of the Comprehensive Plan. This resolution recites the lengthy planning history that incorporated numerous opportunities for public input as well as a coordinated environmental review pursuant to SEQRA that involved the preparation a Generic EIS and the issuance of a Findings Statement.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

of Amherst. Figure 6-A of the adopted Bicentennial Comprehensive Plan is the titled Commercial and Mixed-Use Designations and it depicts the Project Site as being designated as "Suburban Center". The Project Site is located within the University Place geographic location per Figure 6-A of the Comprehensive Plan. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "10"**.

Question 16(A)(2): Cite all text, map, and/or figures that must be amended to support the proposed zoning at this location and provide detailed suggested amendments.

Response to Question 16(A)(2): The proposed rezoning of the Project Site from RD to CTR-8 to accommodate the proposed mixed-use redevelopment project does not require an amendment to the Bicentennial Comprehensive Plan.

Question 16(A)(3): State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

Response to Question 16(A)(3): Section 1-2-1 of the Zoning Code is titled "Purpose" and it states as follows:

> *"The purpose of this Zoning Ordinance and the intent of the legislative authority in its adoption is to promote the environment of the town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, building coverage and location of structures; by regulating and limiting population density; and for the aforesaid purposes, to divide the land within the limits of the town into districts of such number and dimensions generally consistent with the policies of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Ordinance."*

The proposed rezoning of the Project Site RD to CTR-8 to accommodate the proposed mixed-use redevelopment project is consistent with the "Purpose" of the Zoning Code. Section 1-

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

2-2 of the Zoning Code sets forth the objectives of the Zoning Code. This section of the Zoning Code lists thirteen objectives that are discussed below as follows:

A. To protect the character and values of residential, institutional and public uses, business, commercial and manufacturing uses and to insure their orderly and beneficial development;

Response: The proposed rezoning of the Project Site from RD to CTR-8 to accommodate the mixed-use redevelopment project will be consistent with the objective of protecting the character and value of existing land uses. The proposed rezoning will allow the Project Site to be utilized as a mixed-use project, which represents orderly and beneficial development.

B. To provide adequate open spaces for light, air and outdoor uses to include public, common and private open space areas;

Response: The proposed rezoning of the Project Site and the proposed mixed-use project will not be inconsistent with this objective.

C. To prevent overcrowding of land;

Response: The proposed mixed-use project will not result in the overcrowding of land. The project is consistent with the type of development designated as appropriate for the Project Site per Figure 6 and Figure 6-A of the adopted Comprehensive Plan.

D. To prevent excessive concentration of population and to prevent spare and uncoordinated development;

Response: The proposed rezoning of the Project Site will not result in excessive concentration of population and the mixed-use redevelopment project represents an example of coordinated development. The mixed-use redevelopment project will require Site Plan Approval from the Planning Board.

E. To regulate and control the location and spacing of buildings on the lot and in relation to the surrounding property generally consistent with the policies of the Comprehensive Plan.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Response: The responses to the Questions in this **Exhibit "6"** of the Amended Rezoning Application set forth the reasons the proposed rezoning is consistent with the policies of the Comprehensive Plan.

F. To protect persons and property from damage and injury due to fire or flood;

Response: The Site Plan Application review process will trigger the need for an Engineer's Report and SWPPP prepared by a licensed engineer to be prepared for review and approval by the Town's Engineering Department. The mixed-use redevelopment project to be located on the existing office park property will not increase the likelihood of damage and injury due to fire and flood. The proposed mixed-use redevelopment project will be constructed per the stringent requirements of the NYS Building Code including the fire safety standards contained therein.

G. To preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective. There are not significant natural features located on the previously developed Project Site.

H. To assure that structure and land use arrangements are aesthetically harmonious with nearby areas and structures.

Response: The development of the Project Site in a manner consistent with the attached Concept Site Plan [Drawing C-100] will be aesthetically harmonious with nearby areas and structures. Conceptual color building renderings prepared by Brian Slevar, R.A. of Carmina Wood Design are attached as **Exhibit "11"**. The color building renderings will be updated based on the modifications to the project layout depicted on the updated Concept Site Plan included with this Amended Rezoning Application.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

I. To regulate the location of buildings and intensity of uses in relation to streets according to plans so as to cause the least interference with and be damaged least by traffic movements and hence result in lessened street congestion and improved public safety.

Response: The proposed mixed-use project will have two (2) driveway connections onto Rensch Road as depicted on the Concept Site Plan [Drawing C-100].

J. To establish zoning patterns that insure economical extensions for sewers, water supply waste disposal and other public utilities, as well as development of recreation, schools and other public facilities;

Response: The Project Site has access to sanitary sewer and water lines as well as necessary public utilities to service the proposed mixed-use redevelopment project.

K. To guide the future development of the town so as to being the gradual conformity of land, structures and uses generally consistent with the policies of the Comprehensive Plan.

Response: The proposed rezoning of the Project Site from RD to CTR-5 and CTR-8 is consistent with this objective since the infill mixed-use redevelopment project is consistent with the policies contained in the Comprehensive Plan.

L. To accomplish the specific intents and goals set forth in the introduction to the respective sections.

Response: The proposed rezoning of the Project Site will be consistent with this objective.

M. To protect the community from visual pollution resulting from the unregulated use of signs and other advertising devices.

Response: The proposed rezoning and the proposed mixed-use redevelopment project will not be inconsistent with this objective.

Question 16(C): Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Response to Question 16(C): The proposed rezoning of the Project Site from RD to CTR-8 is compatible with the present zoning and conforming uses of nearby properties and the character of the neighborhood. The Project Site is currently zoned RD which would allow the Project Site to be redeveloped for intensive uses permitted per Section 4-9 of the Zoning Code. A copy of Section 4-9 of the Zoning Code is provided at **Exhibit "8"**.

Question 16(D): Suitability of the subject property for uses permitted by the current versus the proposed district:

Response to Question 16(D): The Project Site is much more suitable for uses permitted by the proposed CTR-5 and CTR-8 zoning classifications than the existing RD zoning classification.

Question 16(E): Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

Response to Question 16(D): The proposed change in the zoning classification of the Project Site from RD to CTR-8 to accommodate the proposed mixed-use redevelopment project will have positive impacts on the balance of uses in the Town by providing 1st floor commercial space and apartments for lease at an infill location in a portion of the Town in close proximity to the UB North Campus that has been designated as appropriate for mixed-use infill redevelopment as depicted on the Concept Site Plan [Drawing C-100].

§ 4-9. Research and Development District (RD)

4-9-1. **Purpose.** To provide areas within the Town for the location of research and development, related production activities, light manufacturing, offices, and related training schools on sufficient land to permit efficient development. Such districts shall be designed and located in such a way that they shall neither encroach upon surrounding uses nor shall surrounding uses interfere with the efficient development of these activities. The RD district is designed to encourage the development of a balanced employment mix within the Town and improve the Town's tax base while providing sufficient educational opportunities to contribute to the training of the workforce and thereby meet the employment needs of businesses locating in the Town.

4-9-2. **Principal and Special Uses.**

LOCAL LAW NO. _____-202_

TOWN OF AMHERST
COUNTY OF ERIE, STATE OF NEW YORK

A LOCAL LAW AMENDING CHAPTER 203 OF THE TOWN OF AMHERST CODE, KNOWN AS THE ZONING ORDINANCE TO REZONE 1400-1404 & 1408-1416 SWEET HOME ROAD FROM RD TO CTR-8 AND TO AMEND THE ZONING MAP ACCORDINGLY.

Be it enacted by the Town Board of the Town of Amherst as follows:

Section 1. Title.

This Local Law shall be referred to as, "A Local Law Amending Chapter 203 of Town of Amherst Code, Known As The Zoning Ordinance, to Rezone 1400-1404 & 1408-1416 Sweet Home Road from RD to CTR-8 and to Amend The Zoning Map Accordingly".

Section 2. Legislative Findings and Intent.

The Town Board of the Town of Amherst finds that an application to rezone 1400-1404 & 1408-1416 Sweet Home Road from RD to CTR-8 and to Amend the Zoning Map Accordingly has been filed and is in proper order. The Town Board further finds that the request including the rezoning is consistent with the Comprehensive Plan.

Section 3. Amherst Zoning Map.

The Town Board hereby amends its zoning map which is incorporated by reference in the Town zoning code by amending from 1400-1404 & 1408-1416 Sweet Home Road from RD to CTR-8, **subject to any conditions imposed by the authorizing resolution**; legally described as follows:

1400-1404 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot No. 79, 174.00 feet south of the northeast corner of said Lot No. 79, said point also being the southeast corner of Liber 2713 of Deeds at page 120, said east line also being the center line of Sweet Home Road (width varies, originally 66 feet wide); thence westerly along a line parallel to the north line of said Lot No. 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75 the point or place of beginning; thence southerly along the west line of said Parcel No. 75 and bearing of S 00° 00' 20" W, 297.93 feet to a point; thence southwesterly along the west line of said parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.5 feet wide); thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the west line of deed recorded in the Erie County Clerk's Office on March 3, 2017 in Liber 11310 of Deeds at page 1116; thence northerly along a line parallel to the east line of said Lot No. 79 and bearing N 00° 00' 20" E, 330.11 feet to a point; thence easterly along a line parallel to the north line of said Lot No. 79 and bearing N 89° 38' 35" E, 426.50 feet more or less to the point or place of beginning and containing 3.175 Acres, more or less.

Excepting therefrom, that portion of premises acquired by the People of the State of New York by Notice of Appropriation dated May 20, 2005, recorded September 26, 2005 in Liber 11101 of Deeds, page 8475.

1408-1416 SWEET HOME ROAD [RD TO CTR-8]:

All that certain Piece or Parcel of Land, situate, lying and being in the Town of Amherst, County of Erie and State of New York, being Part of Lot 79, Township 12, Range 7 of the Holland Land Company's Survey, and being more particularly bounded and described as follows:

Commencing at a point in the east line of said Lot 79, 174.00 feet south of the northeast corner of said Lot 79, said point also being the southeast corner of Liber 2713 of deeds at page 120, said east line also being the centerline of Sweet Home Road (width varies, originally 66 feet wide); Thence westerly along a line parallel to the north line of said Lot 79 and bearing S 89° 38' 35" W, 80.00 feet to a point in the west line of lands acquired by the New York State Department of Transportation for Sweet Home Road S.H. No. 9409, Map No. 72, Parcel No. 75; Thence southerly along the west line of said Parcel No. 75 and bearing S 00° 00' 20" W, 297.93 feet to a point; Thence southwesterly along the west line of said Parcel No. 75 and bearing S 47° 59' 05" W, 33.65 feet to a point in the north line of Rensch Road (49.50 feet wide); Thence westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 401.68 feet to the principal point of beginning; Thence continuing westerly along the north line of said Rensch Road and bearing S 88° 14' 38" W, 370.64 feet to a point; Thence northerly along a line bearing N 00° 55' 05" E, 510.78 feet to a point in the north line of said Lot 79; Thence easterly along the north line of said Lot 79 and bearing N 89° 38' 35" E, 362.34 feet to a point; Thence southerly along a line parallel to the east line of said Lot 79 and bearing S 00° 00' 20" W, 501.61 feet to the point or place of beginning and containing 4.257 Acres, more or less.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Section 4. Validity.

This Local Law is adopted under the authority granted to the Town Board of the Town of Amherst pursuant to §§10(1)(ii)(a)(12), 20 and 27 of the Municipal Home Rule Law and §265 of the Town Law of the State of New York.

The invalidity of any provision of this Local Law shall not affect the validity of any other provision of this Local Law that can be given effect without such invalid provision.

Section 5. Effective Date.

This Local Law shall take effect immediately when it is filed in the Office of the Secretary of State in accordance with Section 27 of the Municipal Home Rule Law and published pursuant to Sections 130 & 133 of the Town Law and Chapter 28 of the Code of the Town of Amherst.

I. INTRODUCTION

This report provides subsurface investigation data and foundation recommendations for the proposed building at 4180/4200 Rensch Road in the Town of Amherst, New York. Specifically, Glynn Geotechnical Engineering (GGE) has provided the following scope of services:

1. Observed the excavation of three test pits by North Forest Development.
2. Performed cone penetrometer testing at the proposed foundation subgrade to estimate an allowable bearing capacity.
3. Retrieved and classified soil samples in accordance with the Unified Soils Classification System (USCS) and prepared subsurface logs.
4. Provided laboratory testing on select samples to establish specific engineering properties and verify classifications.
5. Prepared a geotechnical report based on our findings.

This geotechnical study has been performed in accordance with a written January 13, 2004 GGE proposal and subsequent January 20, 2004 acceptance by North Forest Development. GGE was provided with a site plan from North Forest Development to aid in our efforts.

Project efforts by GGE included test pits, penetrometer testing, laboratory testing, USCS classification, site class definition and the preparation of this report. The scope of this report specifically excludes any review of former site use, in particular, environmental or pollution related concerns.

II. PROJECT BACKGROUND

The project site is located on Rensch Road in the Town of Amherst, New York, specifically at addresses 4180 and 4200. The site is relatively flat and currently occupied by two houses on the southern portion of the property and dense forest on the northern portion of the property. The existing houses will be demolished prior to construction of the proposed development. As seen on the Floodplain and Wetland Location Plan located in Appendix E, the site is not located within a floodplain or within a state wetland.

The development is to consist of three office buildings with associated parking areas. To accommodate for the low site elevation and to provide the necessary grades for sanitary and storm sewers, North Forest Development plans to raise the existing site elevation by 2 to 3 feet.

III. SITE GEOLOGY

The underlying geological conditions at the site are the result of the last glacial advance of the Pleistocene Epoch, known as the Wisconsinan Glacial Stage. As the glaciers transgressed across the Western New York terrain, they carved and crushed the underlying existing soil and rock to form glacial till.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

The surficial geology of the Rensch Road site is characterized by a thin stratum of clayey lake sediment overlying glacial till and shallow bedrock. The bedrock consists of shale, dolostone and gypsum of the Late Silurian Salina Group.

The Erie County Soil Survey identifies the site soils as belonging to the Churchville silt loam (CoA). This soil is deep and somewhat poorly drained, consisting of a thin mantle of clayey lake sediment underlain by glacial till. The soil is characterized by a slow permeability and a perched seasonal water table in the upper subsoil from December through May, which may lead to ponding in some areas. A Soil Survey Plan has been included in Appendix D for reference.

IV. FIELD INVESTIGATION AND SUBSURFACE CONDITIONS

Site investigation efforts consisted of three test pits performed by North Forest Development on January 27, 2004 and observed by GGE. One test pit was performed at each building location to provide the subsurface information necessary for the construction of all three buildings as well as satisfy the Town of Amherst preliminary geotechnical requirements of one soil boring per every 3.5 acres of site. A Site Plan indicating test pit locations can be found in Appendix C. GGE is confidant the extent of the investigation was sufficient to accurately characterize the subsurface conditions and provide the information necessary to prepare this report.

The subsurface soils were classified by GGE and assigned Unified Soil Classification System (USCS) classifications in accordance with ASTM D 2488 "Description and Identification of Soils (Visual – Manual Procedure)".

Subsurface conditions are generally characterized as follows:

0.0' – 1.0'	Dark brown topsoil.
1.0' – 3.0'	Moist, brown and tan, slightly mottled, stiff, silt (ML).
3.0' – 6.0'	Moist, light tan and gray, slightly mottled, stiff, sandy, silty clay with gravel (CL-ML) and bedrock fragments.
	Shale bedrock was encountered at a depth of 6.0 feet in all test pits with the exception of TP-2, where gypsum was encountered.

Clay fill was encountered in test pit TP-1. The original topsoil layer existed at a depth of 1.0 to 2.0 feet below the existing ground elevation. The removal of this material is imperative below any structural areas, including foundations, slabs on grade and parking facilities.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Free groundwater was not encountered upon completion of the test pit excavations. The groundwater table is believed to be below the elevation of the bedrock. However, the slow permeability of the fine-grained soils will likely produce a perched water table at or near the ground surface during and after storm events and throughout winter and spring months. See section I.10 of this report.

Specific subsurface conditions can be found in Appendix A, Soil Investigation Logs. Laboratory testing data for select samples can be found in Appendix F.

V. GEOTECHNICAL EVALUATION AND FOUNDATION RECOMMENDATIONS

A. Bearing Capacity and Foundation Recommendations

The site subsurface conditions will permit the construction of a shallow foundation system consisting of conventional strip and spread footings. Due to the importation of fill to raise the site elevation, the footings will bear at an elevation of approximately 1.0 foot below existing grade on the compact silt directly beneath the surficial topsoil. All surficial topsoil must be removed from beneath structurally loaded areas. Based on a settlement criterion of 1.0 inch, the allowable bearing capacity for this material has been estimated by GGE to be 4000 psf. The bearing capacity was tested in the field using an ELE cone penetrometer.

The contractor must remove all buried topsoil located in the vicinity of TP-1 prior to constructing foundations.

B. Pavement and Slabs on Grade

GGE recommends that all slabs be designed using a recognized standard procedure. The text "Designing Floor Slabs on Grade" by Ringo and Anderson (ASBM 0-924659-34-3) identifies several methods of floor slab design. Slabs on grade and pavement will be constructed on imported fill due to the proposed elevation of the site finished grades.

Design and construction of floor slabs should be based on the following minimum recommendations:

1. Remove all topsoil and organic subsoil including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade and replace yielding or "boiling" soils. Do not place any fill over saturated ground.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

3. Compact imported fill soil to 95% of the modified proctor maximum density (ASTM D-1557), at a moisture content within 2% of optimum.
4. Place one 6" lift of select structural fill (NYSDOT Item 304.2.02, Type 4). Compact all fill as specified in item 3 above.
5. Install structural concrete floor slab. Provide sufficient joints and flexibility at perimeter walls.

Design and construction of pavement should proceed in accordance with generally accepted criteria as follows:

1. Remove all topsoil, organic subsoil and debris including buried topsoil encountered in the vicinity of TP-1.
2. Proof roll subgrade to reveal soft and yielding soil. Use a fully loaded 10-wheel dump truck weighing at least 30 tons or a smooth drum roller having an effective force of at least 600 pounds per linear inch of roller width. Any area exhibiting deflections in excess of 0.5 inches or rutting should be classified as unsuitable. These areas should be reworked and compacted to produce an acceptable response or over excavated and replaced with suitable fill. The depth of the undercut and type of soil fill will depend on the soil material encountered, weather conditions and the bearing conditions at the base of the undercut. The site geotechnical engineer must consider each factor if the above conditions are encountered.
3. Install ditches, lateral drains, weeps and storm drainage piping. Backfill over the pipe bedding stone with native soils.
4. Place common fill as necessary to achieve design subgrade. Common fill can be any soil or processed material except Silt soil – USCS designation ML. The top 12 inches must be structural fill. Compact all fill to a minimum 95% of the maximum modified proctor density (ASTM D-1557-78), within a moisture range of 2% $\pm$ of the optimum moisture content. The top surface of the subgrade must be "sealed" with a smooth drum roller and pitched to drain such that the embankment soils cannot become saturated.
5. Once the subgrade has been established, the surface should be covered by a suitable geotextile selected for drainage and reinforcement properties. The geotextile shall have minimum (MARV) strength properties meeting the requirements of an AASHTO M 288-96 Class 2 geotextile. The material shall also have a minimum permittivity of 0.05 sec^{-1} and an AOS of less than 0.6 mm. Installation shall conform to the manufacturers recommendation for overlap.
6. Construct flexible pavement system as follows: (or equivalent structural system)

   a) Minimum 12 inch thick layer of 2" crushed stone meeting requirements of NYSDOT item 304-2.02, type 4 and the well graded qualifications of ASTM D-2487. Compact

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

with a minimum of 5 passes of a smooth drum vibratory roller having an effective load of 600 pounds per linear inch. The finished surface should be uniform and dense. Avoid handling procedures that cause segregation.

b) Minimum 3 inch asphalt concrete binder, NYSDOT item 403.13, type 3.

c) Minimum 1-1/2 inch asphalt concrete top, NYSDOT item 403.18 or 403.19.

In the event the binder layer is used as a working surface for access to buildings under construction the surface must be power washed, not just swept, and a tack coat should be applied prior to installation of the top course. In addition, any yielding area of pavement binder should be removed and replaced prior to application of the top course.

All site contractors should be notified that roadways and parking areas will not support repeated travel by construction loads. Pavement and subgrade failure can be anticipated in areas that receive a high volume of heavy construction traffic. To preclude the overstressing of the pavement system it is recommended that haul roads be located in non-critical areas. As an option, the base course of stone can be overbuilt to a total thickness of twenty (20) inches to serve as a haul route. The additional thickness of stone and all areas of soil material that has contaminated the stone base should be removed prior to paving. Failure to remove fine grained soils from the stone base may cause pavement distress in the form of heaving resulting from freeze thaw effects.

Note that post construction heaving and cracking of pavement is often the result of poor compaction around catch basins and behind curbs. Loose material around these areas allows surface water to migrate beneath the pavement, providing increased potential for heaving due to ice build up during winter months and deterioration of the parking base during warmer months. The contractor should make sure to properly compact these areas. Also, weep holes should be installed into the bottom of catch basins to permit the drainage of any water that does manage to migrate beneath the pavement.

C. Excavation and Backfill

Excavation will basically consist of the removal of topsoil in most locations and the removal of buried topsoil in the vicinity of TP-1. The buried topsoil is typically covered by approximately 1.0 foot of soft clay. Excavation efforts are anticipated to be easy.

If deeper excavations are to be performed, the contractor should be sure to comply with OSHA standards. The soil encountered at this site should be classified by an OSHA competent person in accordance with 29 CFR, Part 1926, OSHA Subpart P, "Excavations and Trenches" prior to and during excavation.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Civil • Structural • Geotechnical • Materials Testing • Consulting

From the testing and investigation program, GGE estimates the site soils can be classified as Type B under the OSHA classification guidelines. This classification may change depending on other site criteria and moisture conditions at the time of construction. An OSHA competent person should judge the potential need for excavation bracing and excavation geometry in the field.

Native soils may be used for general fill against the foundation walls once the concrete has properly cured. All fill soil should be placed in lifts and compacted, with care taken not to damage the foundation walls. The fill at grade elevation should be sloped to drain away from the foundation walls to eliminate the potential for standing water to accumulate along the foundation. Note that drying of the native soils may be required to achieve optimum compaction.

C. Mitigation of Expansive Soils

Subsurface soils at this site are predominantly silt (ML) and silty clay with gravel (CL-ML). Some clay soils undergo volumetric change (shrinkage and swelling) with changes in moisture and degree of saturation, particularly soils classified as fat clay (CH). Fat clay is classified as a soil with a liquid limit of 50 or greater. The liquid limit is the water content, in percent, of a soil that defines the boundary between the plastic and viscous fluid states. The subsurface soils encountered at this site do exhibit characteristics of soils with a high shrink/swell potential.

D. Mitigation of the effects of Liquefaction

Liquefaction is the process where saturated cohesionless (granular) soils, specifically, fine sands and silts, transform from a solid into a liquid as a result of an increase in the pore water pressure caused by repeated disturbance such as experienced during seismic events. Liquefaction results in an immediate loss of shear strength, and thus, bearing capacity, causing total and differential settling due to a quick consolidation of the soils.

The soils located at the footing subgrade and below at this site are silts and silty clays and do not pose a concern for liquefaction. Soils with a silt and clay content in excess of 35% typically do not have the potential to liquefy. As seen in Appendix F, the subgrade material falls outside of the specification window for liquefaction potential as identified on the grain size analysis.

E. Expected Total and Differential Settlement.

Load induced total settlement for foundations bearing on undisturbed native soil is estimated to be primarily long-term (primary consolidation) settlement. The total settlement is estimated to be less than 1.0 inch for shallow foundations constructed in accordance with GGE's recommendations.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Subsurface soils across the site are very consistent and exist in layers of uniform depths. The potential for differential settlement due to varying soil conditions over the building footprint is minimal under uniform bearing pressures.

F. Varying Soil Strength

Upon excavation of the footings, if soil types or moisture contents are found to be different than those encountered during the test pit excavation and represented within this report, the bearing capacity of the variable soil will need to be reevaluated by a qualified Geotechnical Engineer. Likewise, the footing design will then require adjustment to accommodate the bearing pressure on soils of varying bearing capacities.

G. Site Class Definition

In accordance with Section 1615 (Earthquake Loads – Site Ground Motion) of the NYS Building Code, the site is classified as Site Class C. The site classification is based upon subsurface conditions in the upper 100 feet, which consist of 6 feet of dense soil overlying 94 feet of rock.

The maximum considered earthquake ground motion for this site is interpolated as .320g for short period spectral response acceleration and .064g for a one second spectral response acceleration in accordance with New York State Code figures 1615(1) and 1615(2). Based on Site Class C, the maximum considered earthquake spectral response acceleration for this site is calculated as .380g for short period spectral response acceleration (S_{MS}) and .108g for a one second spectral response acceleration (S_{M1}) in accordance with New York State Code section 1615.1.2.

The design spectral response accelerations, based on the maximum considered earthquake spectral response accelerations, are .253g for short period design spectral response acceleration (S_{DS}) and .072g for one second design spectral response acceleration (S_{D1}). In accordance with tables 1616.3(1) and 1616.3(2), the site is classified as Seismic Design Category B.

H. General Recommendations

The following comments are relative to all foundation work unless specifically noted otherwise:

1. No fill material or concrete should be placed in water, over saturated subgrade or over frozen subgrade.
2. Upon completion of excavation for footings, bearing grades should be compacted to densify soil loosened by the backhoe bucket. Proper construction practice will assure the development of the anticipated bearing strength and reduce settlement potential.

Civil • Structural • Geotechnical • Materials Testing • Consulting

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

3. Excavations must not unnecessarily extend below the design subgrade elevation.

4. If additional undercut is necessary, the excavation bottom should be graded to a uniform elevation. Undercut "pockets" should be avoided.

5. Backfill all foundations prior to applying loads.

6. Extreme care must be exercised and conformance to OSHA standards is mandatory during excavation and trench work.

7. All topsoil and organic soils should be removed from any load bearing areas, including buried topsoil from previous fill efforts.

8. The use of a "mud" mat should be considered to protect bearing grades during any extended period or when construction proceeds during inclement weather.

9. Foundation bearing grades should not be allowed to freeze either prior to or after placement of concrete. Insulating blankets should be used to cover bearing grades plus 1 foot perimeter outside forms or completed footings until backfill is placed.

10. The site contractor should maintain proper grades for runoff control and seal roll all exposed areas. All excavations should be sloped to drain with sumps to permit dewatering during construction. The fine grained foundation subgrade will lose considerable strength if exposed to standing water for long periods of time. Any saturated subgrade should be dried and recompacted or removed to an acceptable bearing level prior to placement of subsequent layers of fill or concrete.

VI. SUMMARY

The site subsurface conditions are well suited for the proposed development and will provide a suitable subgrade for the proposed construction pending strict conformance with the recommendations provided within this report. The recommendations and engineering evaluations provided in this report are based on the encountered subsurface conditions at 4180/4200 Rensch Rd and pertinent data supplied by North Forest Development. Alteration of the plans, including relocation of the house or any abnormal foundation loading may serve to invalidate this report. Do not utilize this evaluation for any other type of structure. Please contact our office if major project changes are made or if encountered soils vary from conditions noted in this report.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Project Description

This project is a redevelopment of a 7.40 acre +/- site located on the northwest corner of Sweet Home Road and Rensch Road in the Town of Amherst. The property will be redeveloped to accommodate 25 3-bedroom and 475 2-bedroom apartment units, as well as 10,000 gsf of retail space and 10,000 gsf of office space.

The proposed sewer service for this development will connect to an existing 8" Town of Amherst sewer main that runs along the north side of Rensch Road.

Node 1 - 3975 Rensch (8")

Existing Peak Flow measured (wet weather event)	= 0.080 cfs (0.052 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 0.745 cfs
Existing Peak Flow measured (overall)	= 0.094 cfs (0.061 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 0.759 cfs

Theoretical capacity of existing 8" PVC pipe @ 0.73% = 1.490 cfs

Conclusion: The proposed peak flow is less than the capacity of the 8" PVC pipe, therefore there is sufficient capacity. At no time during the monitoring did the flow depth exceed the pipe diameter at Node 1 of the downstream monitoring points during the rain events monitored.

Node 2 - Sweet Home (8")

Existing Peak Flow measured (wet weather event)	= 0.212 cfs (0.137 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 0.877 cfs
Existing Peak Flow measured (overall)	= 0.215 cfs (0.139 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 0.880 cfs

Theoretical capacity of existing 8" PVC pipe @ 0.66% = 1.417 cfs

Conclusion: The proposed total peak flow is less than the capacity of the 8" pipe, therefore there is sufficient capacity. At no time during the monitoring period did flow depth exceed the pipe diameter at Node 2 of the downstream monitoring points during the rain events monitored.

Node 3 - 1991 Sweet Home (36"):

Existing Peak Flow measured (wet weather event)	= 12.539 cfs (8.104 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 13.204 cfs
Existing Peak Flow measured (overall)	= 13.466 cfs (8.703 mgd)*
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 14.131 cfs

Theoretical capacity of existing 36" RCP pipe @ 0.05% = 16.143 cfs

Conclusion: The proposed total peak flow is less than the capacity of the 36" pipe, but at one time during the monitoring period following the 0.80" rainfall event did the flow depth exceed the pipe diameter at Node 3. At no time during the monitoring period did the flow at any point slow or stall which would have caused a backup or flooding at the manhole. I/I mitigation shall be required for the contribution proposed for this project.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Node 4 - 66-Inch Peanut Line:

Existing Peak Flow	= 56.474 cfs (36.50 mgd)
Proposed Mixed Use Development Peak Flow	= 0.665 cfs**
Proposed Total Peak Flow	= 57.139 cfs

Capacity of existing 66" Peanut Line = 88.811 cfs (57.400 mgd)

Conclusion: The proposed total peak flow is less than the capacity of the 66" Town of Amherst Peanut Line, therefore there is sufficient capacity.

Project No.: 21.008 Date: 5/10/2022
Project Name: Proposed Mixed Use Development
Project Address: 1400 - 1416 Sweet Home Road Amherst, NY
Subject: Sanitary Sewer Demand Calcs
Sheet: 1 of 1

Sanitary Sewage Demand Calculations:

Proposed Apartments/Townhomes

220 gal/d/unit	x	475 units	=	104,500	gpd	*use 220 gallons per unit per day (2-bdrm)
330 gal/d/unit	x	25 units	=	8,250	gpd	*use 330 gallons per unit per day (3-bdrm)

Proposed Retail Sales

0.1 gal/d/sf	x	10,000 sf	=	1,000	gpd	*use 0.1 gallons per sf per day

Proposed Office Space

15 gal/d/emp	x	30 emp	=	450	gpd	*use 15 gallons per employee per day

Total Mixed Use Developemt Site Sanitary Demand: = 114,200 gpd

Find Peak Sanitary Demand:

Peaking Factor based on Population:
Total demand: 114,200 gpd / 100 gpcd = 1142 per capita

Population (P) = 1142 people

Peaking Factor : (18 +ÖP) / (4 + ÖP) where P is in thousands

Peaking Factor = 3.76

Peak Sanitary Demand = 114,200 x 3.76 = 429,630 gpd
= 0.430 MGD
= 0.665 cfs

Required Infiltration and Inflow Mitigation:

Peak Sanitary Flow = 429,630 gpd = 298.35 gpm

4:1 offset flow per NYSDEC requirements = 298.35 x 4 = 1,193.42 gpm req'd

Mitigation Credit = $250 / gpm

Mitigation Agreement Amount = $298,353.84

SANITARY SEWER FLOW CAPACITY STUDY – Summary Review

Prepared For: 1400-1416 Sweet Home Road Capacity Analysis

R. Christopher Wood, PE Partner
487 Main Street, Suite 500
Buffalo, New York 14203

Project Name: 1400-1416 Sweet Home Road Capacity Analysis

Flow Monitoring Period: March 29, 22 to April 26, 2022

Rain Events (> 0.5-inches) Monitored: April 25, (0.80")

Number of Monitoring Nodes: Three (3) downstream manholes

Node Locations and Descriptions:

- Node 1 3975 Rensch (8")
- Node 2 Sweet Home 8" (8")
- Node 3 1991 Sweet Home (36")

Summary Conclusion:

Based on the data presented in this report, specifically the flow depth measurements recorded (see graphs below)

- At no time the flow depth exceeds pipe diameter at Node 1, and Node 2 of the downstream monitoring points during the wet weather events monitored.
- One time the flow depth exceeds pipe diameter at Node 3 of the downstream monitoring points during the wet weather events monitored.

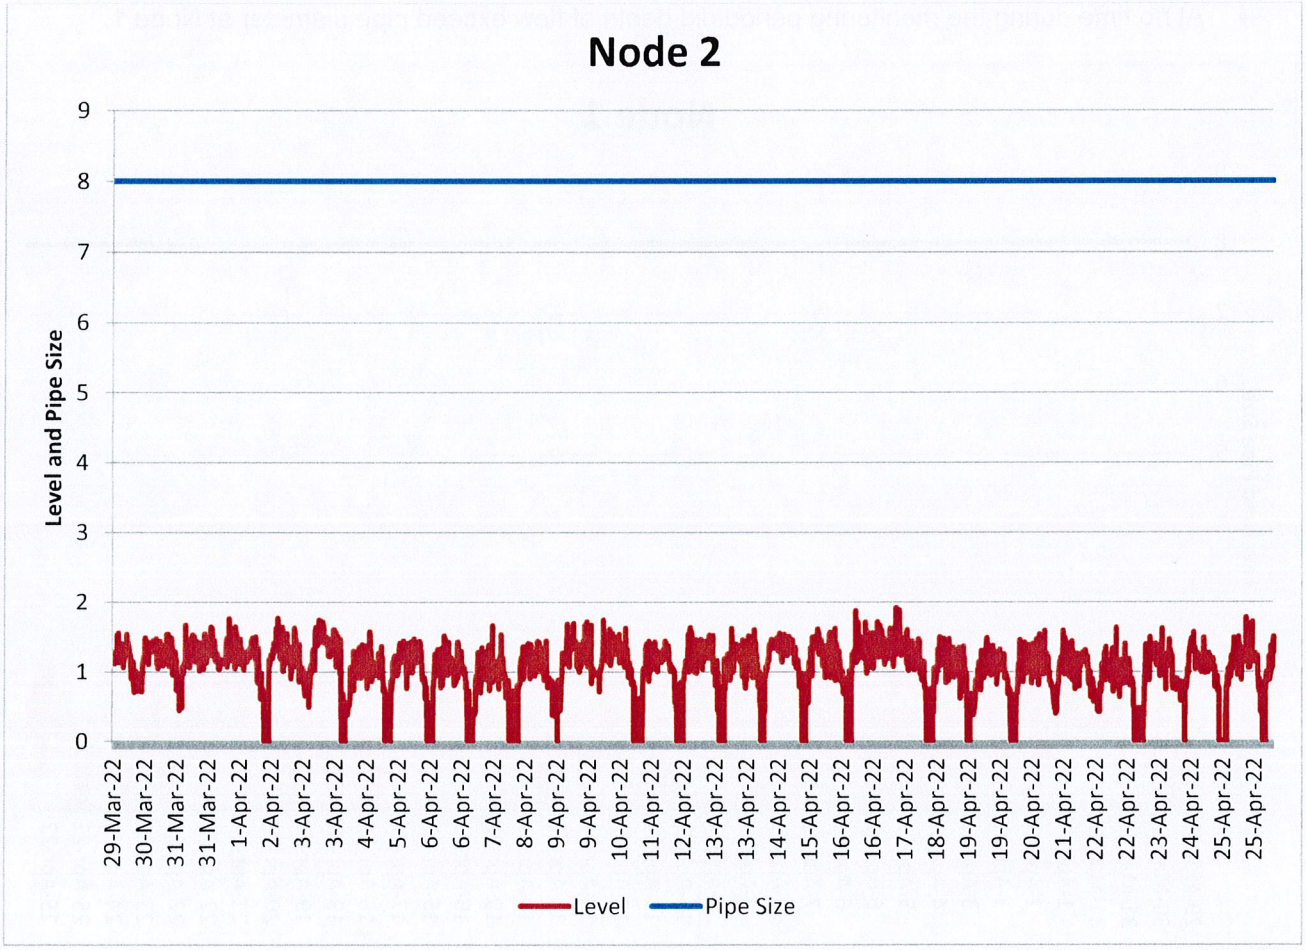
Tel: 716-462-0382
Fax: 716-687-1418

Depth of Flow Capacity Summary:

Depth of flow capacity is based on diameter of pipe. See graphs below.

- At no time during the monitoring period did depth of flow exceed pipe diameter at Node 1.



Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

NOTE: All applications must be accompanied by plans, specifications and completed Form BSP-65 (appropriate portions). The submission must conform to a previously approved engineering report describing the system in detail. The plans must be stamped with the designing engineer's seal and must be of sufficient clarity and eligibility to permit satisfactory microfilming. Only white prints will be accepted because of the difficulty of microfilming blue prints. There must be a blank area, at least 4" X 7", in the lower right corner of each sheet so that the approval stamp may be placed on the face of the plans.

Any deviation from the Department's standards for wastewater collection and treatment facilities must be explained in detail.

Approved plans are to be returned to: ■ Applicant ■ Engineer

If the application is signed by a person other than the applicant shown in Item 1, the application must be accompanied by a letter of authorization. Failure to comply with this provision may be grounds for the rejection of any submission.

I hereby affirm under penalty of perjury that information provided on this form is true to the best of my knowledge and belief. False statements made herein are punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

CARMINAWOOD
DESIGN

May 11, 2022

Mr. Jeffrey Burroughs, PE
Town Engineer
Town of Amherst Engineering Department
1100 North French Road
Williamsville, NY 14221

Re: 1400 - 1416 Sweet Home Road - Proposed Mixed Use Development
Compliance Letter - Inflow and Infiltration Reduction Program

Dear Mr. Burroughs:

This compliance letter is being submitted by North Forest Development, project sponsor for the proposed 475 2-bdrm and 25 3-unit apartments/townhouses, as well as 10,000 gsf retail and 10,000 gsf office space redevelopment at 1400 - 1416 Sweet Home Road.

The Project Sponsor agrees to comply with the Town of Amherst's I/I mitigation-offset requirements for the wastewater flow from the proposed development.

Wastewater flow from the proposed development was generated as follows:

114,200 gpd * 3.76 = 429,630 gpd / 1440 = 298.35 gpm * 4 = 1,193.42 gpm

Based on the Town's requirement of $250 /gpm x 1,193.42 gpm = $298,535.84, the Project Sponsor's financial contribution of the Town's "Trust in Agency" fund.

The Project Sponsor also agrees to make this contribution prior to acceptance of the PIP's.

Agreed and Accepted:

Roy Jordan Date: 5-11-2022

EXECUTIVE SUMMARY

OVERVIEW

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

The proposed mixed-use project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed project and new uses. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units to be marketed as student housing (1,025 bedrooms)

Access to the proposed mixed- project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed Concept Site Plan as prepared by Carmina Wood Morris.

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and reviewed the projected trip generation estimates. The difference between the full development trip generation estimates in the study

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the New York State Department of Transportation.

CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.

7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

I. INTRODUCTION

The purpose of this report is to evaluate the potential traffic impacts related to the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, NY. Within this report, the operating characteristics of the proposed access points and impacts to the adjacent roadway network are identified and mitigating measures (if needed) are provided to minimize operational concerns.

To define traffic impact, this analysis establishes existing baseline traffic conditions, projects background traffic flow including area growth, and determines the traffic operations that would result from the proposed project.

II. LOCATION

The proposed project will be at 1400-1416 Sweet Home Road in the Town of Amherst, Erie County, New York. Currently, there are office buildings occupying the site. These buildings will be replaced by the proposed mixed-use project. The project site is bounded by portions of undeveloped lands to the north; Sweet Home Road to the east; Rensch Road to the south; and I-990 to the west. Land uses in the vicinity of the proposed project include residential, education, office, and service.

To ensure a comprehensive analysis of potential traffic impacts, a geographically broad study area was determined consisting of the following intersections:

- Rensch Road/Villas on Rensch (W)/Office Lots (unsignalized)
- Rensch Road/Villas on Rensch (E)/Office Lots (unsignalized)
- Sweet Home Road/Rensch Road (signalized)
- Sweet Home Road/The Station (unsignalized)
- Sweet Home Road/Maple Road (signalized)

The project site location and study area are illustrated in **Figure 1** (all figures are included at the end of this report).

III. EXISTING HIGHWAY SYSTEM

A. Vehicular Network Description

The following information outlined in **Table I** provides a description of the existing roadway network within the project study area. **Figure 2** illustrates the lane geometry at each of the study intersections and the Annual Average Daily Traffic (AADT) volumes on the study roadways. The AADTs reflect the most recently collected data obtained from the New York State Department of Transportation (NYSDOT). Where data is not available or up to date, Average Daily Traffic (ADT) volumes are based upon an extrapolation of turning movement counts performed by SRF Associates.

Functional classification of highways within the study area is determined by the NYSDOT and the Federal Highway Administration (FHWA). Definitions of the functional classifications shown in **Table I** are provided after the table.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

TABLE I: EXISTING HIGHWAY SYSTEM

ROADWAY	CLASS[1]	AGENCY[2]	SPEED LIMIT[3]	TRAVEL LANES[4]	TRAVEL PATTERN/ DIRECTION	EST. AADT & SOURCE[5]
Sweet Home Road (952T)	16	NYSDOT	45	4	Two-way/ North-South	17,040 NYSDOT (2018)
Maple Road (W) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	24,564 NYSDOT (2019)
Maple Road (E) (CR-192)	14	ECDPW	45	4	Two-way/ East-West	23,377 NYSDOT (2018)
Rensch Road	19	Town	30	2	Two-way/ East-West	2,950 SRF (2022)

Notes:
1. State Functional Classification of Roadway.
2. Jurisdictional Agency of Roadway.
3. Posted or Statewide Limit in Miles per Hour (mph).
4. Number of travel lanes. Excludes turning/auxiliary lanes developed at intersections.
5. Estimated AADT in Vehicles per Day (vpd). AADT Source (Year).

Urban Principal Arterial – Other (Class 14)

An urban principal arterial serves major activity centers, can interconnect and augment higher level arterials, serve trips of moderate length, and serve demand for intra-area travel between the central business district and outlying residential areas. Unlike access-controlled arterials, abutting land uses can be served directly.

Urban Minor Arterial (Class 16)

An urban minor arterial provide service for trips of moderate length, serve geographic areas that are smaller than higher arterial roadways, and offer connectivity to higher arterial systems. These roadways distribute traffic to smaller geographic areas, provide more land access without disrupting neighborhood access, and provide urban connections for rural collectors.

Urban Local (Class 19)

Locally classified roads account for the largest percentage of all roadway mileage and includes all facilities not in one of the higher systems. Local roadways do not typically serve as bus routes, are often designed to discourage through traffic, and have the lowest degree of mobility.

B. Multi-Modal Network Description

This evaluation reviewed the study area's pedestrian, bicycle, and transit network via field and aerial reconnaissance. A description of the multi-modal infrastructure is described hereafter.

Pedestrian & Bicycle Facilities

Sidewalks are located within the study area. The signalized intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road feature pedestrian countdown signals and crosswalk striping.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Dedicated bicycle lanes are in place along Sweet Home Road. Where there are no dedicated facility, cyclists are permitted to share the road with motorists.

Transit Facilities

The Niagara Frontier Transportation Authority (NFTA) provides regional bus and metro rail service. The nearest bus stops are at the intersections of Sweet Home Road/Rensch Road and is serviced via Route 35 (Sheridan).

IV. EXISTING TRAFFIC CONDITIONS

A. Peak Intervals for Analysis

Given the functional characteristics of the study corridors, adjacent land uses, and the proposed land uses for the project site (residential and commercial), the peak hours selected for analysis are the weekday commuter AM and PM peak periods. The combination of site traffic and adjacent through traffic produces the greatest demand during these time periods.

B. Existing Traffic Volume Data

Turning movement traffic counts were collected by SRF at the study intersections described in Section II on Thursday, March 3, 2022. Traffic counts were conducted from 7:00-9:00 AM and 4:00-6:00 PM. All traffic counts were conducted while local schools and the University at Buffalo were in session. The traffic volumes were reviewed to confirm the accuracy and relative balance of the collective traffic counts. For the purposes of this analysis, the data are utilized with the actual peak hours at each individual intersection. Using the actual peaks at each intersection provides a worst-case scenario when adding project related traffic. The unadjusted weekday AM and PM peak hour volumes are reflected in **Figure 3A**.

It is noted, however, that traffic volumes may be impacted by the COVID-19 pandemic. The NYSDOT released a study in February 2021 that described the effect the COVID-19 pandemic had on traffic in New York State in 2020. The NYSDOT study illustrated the percent difference 2020 weekday ADTs to average weekday ADTs prior to 2020. Additionally, traffic volumes were compared to traffic data obtained in 2018 traffic data at the intersections of Sweet Home Road/Rensch Road and Sweet Home Road/Maple Road before the COVID-19 pandemic by SRF Associates.

The historic counts in the study area were used to adjust the collected data to reflect 2022 representative traffic conditions by increasing the collected traffic volumes for specific movements, such as traffic entering and exiting the University at Buffalo. This is consistent with NYSDOT and ITE methodology for adjustments related to collected traffic volumes affected by the COVID-19 pandemic. The adjustments are reflected in the Appendices.

Figure 3B illustrates the representative 2022 weekday AM and PM peak hour base volumes used for analysis purposes in this study.

C. Field Observations

The study intersections were observed during both peak intervals to assess current traffic operations. Signal timing and phasing information was obtained by the NYSDOT to determine peak hour phasing plans and phase durations during each interval. This information was used to support and/or calibrate capacity analysis models described in detail later in this report.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

D. Existing Crash Investigation

The purpose of this crash analysis is to identify inherent safety issues by studying and quantifying historical crashes at the study intersections and identifying potential crash patterns and clusters.

A crash cluster is defined as an abnormal occurrence of similar crash types occurring at approximately the same location or involving the same geometric features. The severity of the crashes should also be considered. A history of crashes is an indication that further analysis is required to determine the cause(s) of the crash(es) and to identify what actions, if any, could be taken to mitigate the crashes.

A crash investigation within the study area was conducted to assess the safety history from January 1, 2017, through December 31, 2019. The data was provided by the New York State Department of Motor Vehicles through a Freedom of Information (FOIL) request. Given that the COVID-19 pandemic influenced daily travel in 2020 and 2021, any reported crashes were dismissed from the study.

Reportable (non-injury, injury, and fatal injury) type crashes are defined as damage to one person's property in the amount of $1,001 or more. The Non-Reportable type crashes result in property damage of $1,000 or less. Crash rates were computed for the study intersection and compared with NYSDOT average crash rates for similar intersections, as summarized in **Table II**. Intersection rates are listed as crashes per million entering vehicle (CR/MEV). Pertinent crash data is provided in the Appendices.

TABLE II: EXISTING CRASH RATES

INTERSECTION	TOTAL CRASHES	NUMBER OF ENTERING VEHICLES	ACTUAL CRASH RATE	STATEWIDE AVERAGE CRASH RATE
Sweet Home Road/Rensch Road	32	28,589	1.02	0.26
Sweet Home Road/The Station	1	22,705	0.04	0.07
Sweet Home Road/Maple Road	64	38,863	1.50	0.26

Notable crash clusters are approaches with three or greater identifiable consistent crash types.

Sweet Home Road/Rensch Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 3.9 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (17), fixed object (4), left turn (4), overtaking (2), right turn (2), right angle (1), sideswipe (1), bicycle (1). The bicycle crash resulted in an injury as the cyclist was crossing the road with traffic.

The following patterns were reported:

- Rear end
  - Northbound (nine crashes)
  - Southbound (seven crashes)
- Left turn
  - Eastbound (three crashes)

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

- Fixed object
    - Northbound (three crashes)

The reported rear end crashes (53%) are characteristic of moderate to heavily trafficked signalized intersections. The causes of the rear end crashes were generally due to driver error, unsafe speeds, or following too closely. There are no correctable deficiencies at the intersection that could be improved to significantly improve safety.

Sweet Home Road/The Station

As shown in **Table II**, the study intersection has a crash rate that is lower than the statewide average crash rate for similar intersections. No discernible crash patterns exist; thus, no geometric improvements are recommended.

Sweet Home Road/Maple Road

As shown in **Table II**, the study intersection has a crash rate that is approximately 5.7 times higher than the statewide average crash rate for similar intersections. The following crashes occurred: rear end (24), left turn (15), right angle (10), overtaking (7), right turn (3), head on (2), fixed object (2), pedestrian (1). The pedestrian crash resulted in an injury as the pedestrian was crossing the road with traffic.

The following patterns were reported:

- Rear end
    - Northbound (three rashes)
    - Southbound (nine crashes)
    - Eastbound (four crashes)
    - Westbound (eight crashes)
- Left turn
    - Northbound (six crashes)
    - Southbound (seven crashes)
- Right angle
    - Northbound (four crashes)
    - Eastbound (three crashes)
- Overtaking
    - Westbound (four crashes)

The intersection is large consisting of numerous lanes in each direction and is frequently traveled during the peak hours. Rear end (37%) and left turn (23%) crashes are the most prominent. Most of the left turn crashes occurred due to drivers failing to yield the right of way due to the permissive movement during the thru movement on green. These drivers are likely to turn with smaller than desirable gaps in traffic and potentially creating an unsafe condition.

To correct this condition, protected left turn phases would reduce these crashes; however, this would also reduce the overall capacity of the intersection. One such improvement may be to upgrade the signals to change the green signal to flashing yellow arrow for permissive left turns. No geometric improvements are recommended.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

V. FUTURE AREA DEVELOPMENT AND LOCAL GROWTH

Construction of the proposed project is anticipated to reach full build-out within approximately five years depending on market conditions. Town of Amherst personnel were contacted to discuss any other specific projects that are currently approved or under construction that would generate additional traffic in the study area. Two projects were identified:

- 1265 Sweet Home Road
- Completion of The Station

The Station is currently partially occupied. SRF Associates reached out to the property management to determine actual occupancy but did not receive any information. SRF Associates produced the traffic study for this project and review the projected trip generation estimates. The difference between the full development trip generation estimates in the study and the actual trips entering and entering the site during the peak hours were added to the study area intersections.

To account for normal increases in background traffic growth, including any unforeseen developments in the project study area, aside from the two projects mentioned, a growth rate of 0.25% was applied to the existing traffic volumes in the study area based upon a review of historical traffic information obtained from the NYSDOT. All ambient growth calculations are included in the Appendices. The background traffic volumes are depicted in **Figure 4**.

VI. PROPOSED DEVELOPMENT

A. Project Description

The proposed project consists of constructing:

- ±10,000 square feet (SF) of office space
- ±10,000 SF of retail space
- 500 residential units marketed as student housing (1,025 bedrooms)

Access to the proposed project will be provided via two full access driveways along Rensch Road. **Figure 5** illustrates the proposed site plan as prepared by Carmina Wood Morris.

B. Site Generated Traffic

The volume of traffic generated by a site is dependent on the intended land use and size of the development. Trip generation is an estimate of the number of trips generated by a specific building or land use. These trips represent the volume of traffic entering and exiting the development. Trip Generation Manual (11th Edition) published by the Institute of Transportation Engineers (ITE) is used as a reference for this information. The trip rate for the peak hour of the generator may or may not coincide in time or volume with the trip rate for the peak hour of adjacent street traffic. Volumes generated during the peak hour of the adjacent street traffic and proposed land use, in this case, the weekday commuter AM and PM peaks, represent a more critical volume when analyzing the capacity of the system; those intervals will provide the basis of this analysis.

The proposed mixed-use project consists of three different land uses (residential, office, and retail) and is considered mixed-use (multi-use). According to the Institute of Transportation Engineers Trip Generation Handbook, (3rd Edition), "…a multi-use development is typically a single real-estate project that consists of two or more ITE land use classifications between

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

which trips can be made without using the off-site road system. Because of the nature of these land uses, the trip-making characteristics are interrelated, and some trips are made among the on-site uses. This capture of trips internal to the site has the net effect of reducing vehicle trip generation between the overall development site and the external street system (compared to the total number of trips generated by comparable, standalone sites)." "In some multi-use developments, these internal trips can be made by walking or by vehicles entirely on internal pathways or internal roadways without using streets external to the site."

The Handbook indicates internal capture rates for trips within a multi-use development to vary between residential, office, retail, restaurant, hotel, entertainment and recreational uses during the AM and PM peak hours. Given the proposed land use components and interconnection between these components, multi-use total volume trips will likely occur.

Methodology contained in National Cooperative Highway Research Program (NCHRP) Report 684: Enhancing Internal Trip Capture Estimation for Mixed-Use Development was consulted to perform the mixed-use adjustment. The interactive spreadsheet considers baseline mode shares and vehicle occupancy factors for the proposed land uses, as described in the Handbook, as well as average land use interchange distances (feet walking distance) to determine the internal capture percentage. This completed spreadsheet model is included in the Appendices. The NCHRP 684 model reported an internal baseline capture percentage of 5% during the AM peak hour and 10% during the PM peak hour.

These multi-use trip projection adjustments were applied to the respective site generated trips and subtracted from the traffic entering and exiting the site during the peak periods.

Table III shows the total site generated trips, internal trips, and resulting primary trips that are added to the existing highway system for full development of the project. All trip generation information has been included in the Appendices.

TABLE III: SITE GENERATED TRIPS

DESCRIPTION	ITE LUC	SIZE	AM PEAK HOUR		PM PEAK HOUR	
			ENTER	EXIT	ENTER	EXIT
Residential	225	1,025 bedrooms	39	64	110	111
Office	710	±10,000 SF	13	2	2	12
Retail	822	±10,000 SF	14	10	33	33
Total Site Generated Trips			**66**	**76**	**145**	**156**
Internal Trips			*-4*	*-4*	*-16*	*-16*
Total Primary Trips			**62**	**72**	**129**	**140**

Note:
1. ITE LUC = ITE Land Use Code

Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

C. *Site Traffic Distribution*

The cumulative effect of site-generated traffic on the transportation network is dependent on the origins and destinations of that traffic and the location of the access drives serving the site. The proposed arrival/departure distribution of traffic generated by the proposed project is considered a function of several parameters, including:

- Proximity and access to the University at Buffalo
- Employment centers using Census Data
- Population centers using Census Data
- Commercial centers
- Proposed access locations
- Existing traffic patterns
- Existing traffic conditions and controls

Figure 6A shows the anticipated trip distribution pattern percentages for the traffic from the residential program and **Figure 6B** shows the anticipated trip distribution pattern percentages for the traffic from the commercial program. **Figure 7** illustrates the peak hour project site-generated traffic based on those percentages.

VII. FULL DEVELOPMENT VOLUMES

Proposed design hour traffic volumes are developed for the AM and PM peak hours by combining the background traffic conditions (**Figure 4**) and the new site generated traffic volumes (**Figure 7**) to yield the traffic volumes under full development conditions. The resulting design hour volumes for the proposed project are illustrated in **Figure 8** under full build-out conditions.

As stated, the existing site is currently occupied by office space. These tenants will be relocated upon full build-out of the proposed project. Traffic adjustments related to this condition is shown in the Appendices.

VIII. CAPACITY ANALYSIS

A. *Description of Capacity Analysis*

Capacity analysis is a technique used for determining a measure of effectiveness for a section of roadway and/or intersection based on the number of vehicles during a specific time period. The measure of effectiveness used for the capacity analysis is referred to as a Level of Service (LOS). Levels of Service are calculated to provide an indication of the amount of delay that a motorist experiences while traveling along a roadway or through an intersection. Since the most amount of delay to motorists usually occurs at intersections, capacity analysis focuses on intersections, as opposed to highway segments.

Six Levels of Service are defined for analysis purposes. They are assigned letter designations, from "A" to "F", with LOS "A" representing the conditions with little to no delay, and LOS "F" conditions with very long delays. Suggested ranges of service capacity and an explanation of Levels of Service are included in the Appendices. LOS “C” or better is generally desirable, but LOS “D” for signalized locations and LOS “E” for unsignalized are generally acceptable during peak periods so long as the volume to capacity ratio (v/c) is below 1.0.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

The standard procedure for capacity analysis of signalized and unsignalized intersections is outlined in the Highway Capacity Manual (HCM 2016) published by the Transportation Research Board. Traffic analysis software, Synchro 11, which is based on procedures and methodologies contained in the HCM, was used to analyze operating conditions at the study area intersections. The procedure yields a Level of Service based on the HCM 2016 as an indicator of how well intersections operate. This study used HCM 2000 methodology for determining operations at the unsignalized intersections in accordance with local NYSDOT Region 5 guidelines.

Given that the intersection of Sweet Home Road/Maple Road exceeds capacity (v/c ratio greater than 1.0) during the PM peak hour, traffic simulation modeling was also used using an extension of the Synchro software called SimTraffic. During simulation modeling, vehicles are individually tracked, and statistics are recorded on a second-by-second basis to determine the delays each vehicle experiences. Since SimTraffic simulation modeling is microscopic and stochastic, meaning car movement parameters vary randomly within a set distribution based on an initial seed number, the same traffic volume may result in slightly different results depending on the random seed used. Therefore, simulation results are reported based on an average value of multiple simulation runs to reduce the variability in results.

Synchro and SimTraffic results are contained in the Appendices.

B. Capacity Analysis Results

Existing and background operating conditions during the peak study periods are evaluated to determine a basis for comparison with the projected future conditions. The future traffic conditions generated by the proposed project were analyzed to assess the operation of the study area intersections. Capacity results for existing, background and full development conditions are listed in **Table IV**. The discussion following the table summarizes capacity conditions.

Notes:

1. A (0.0) = Level of Service (Delay in seconds per vehicle)
2. EB = Eastbound, WB = Westbound, NB = Northbound, SB = Southbound
3. (S) = Signalized; (U) = Unsignalized
4. N/A = Approach does not exist and/or was not analyzed during this condition
5. Green shaded cells indicate low delays, yellow shaded cells indicate moderate delays, red shaded cells indicate long delays.
6. The v/c ratio, also referred to as degree of saturation, represents the sufficiency of an intersection to accommodate the vehicular demand. A v/c ratio less than 0.85 generally indicates that adequate capacity is available and vehicles are not expected to experience significant queues and delays. A v/c ratio between 0.85 and 0.95 generally indicates an intersection is nearing capacity. Intersections with a v/c ratio of 1.0 or greater generally indicate conditions at or above capacity.
7. Due to v/c being greater than 1.0 at Sweet Home Road/Maple Road during the PM peak hour, the condition was analyzed using SimTraffic Simulations.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

1. Rensch Road/Proposed Westerly Driveway

All movements are projected to operate at LOS "A" under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

2. Rensch Road/Office Lots/Villas on Rensch (W)

All movements operate at LOS "B" or better under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

3. Rensch Road/Proposed Easterly Driveway

All movements are projected to operate at LOS "B" or better under future build conditions during both peak hours studied. No capacity improvements are warranted nor recommended.

4. Rensch Road/Office Lots/Villas on Rensch (E)

All movements operate at LOS "A" under existing, projected background, and future build conditions during both peak hours studied. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

5. Sweet Home Road/Rensch Road

All movements generally operate at LOS "E" or better under existing, projected background, and future build conditions during both peak hours studied. Signal timing improvements are recommended under background conditions during the AM peak hour to maintain optimization. This consists of reducing the northbound left green time to 20 seconds (from 25 seconds) and increasing the southbound left green time to 28 seconds (from 25 seconds).

Upon full build conditions, the southbound left movement during the AM peak hour is projected to change from LOS "D" to "E"; a borderline condition, as the threshold is at 55.0 seconds of delay per vehicle. During the PM peak hour, the eastbound thru/right movement changes from LOS "D" to "E"; a borderline condition.

The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

6. Sweet Home Road/The Station

All movements operate at LOS "D" or better under existing, projected background, and future build conditions during both peak hours studied. Between background and full build conditions, the westbound left movement changes from LOS "C" to "D" during the PM peak hour; a borderline condition as the threshold occurs at 25.0 seconds of delay per vehicle. The intersection can accommodate the projected new traffic volumes resulting from the project; thus, no capacity improvements are warranted nor recommended.

7. Sweet Home Road/Maple Road

All movements generally operate at LOS "D" or better under existing, projected background, and future build conditions during the AM peak hour. However, operational deficiencies exist during the PM peak hour under all conditions based upon traffic simulations. The overall intersection operates with a v/c ratio greater than 1.0 with an overall LOS of "D".

The eastbound left movement and existing traffic volumes are accommodated by a single lane. An additional left turn would be more appropriate based on the general rule of thumb of

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

providing an additional left turn lane when peak hour left turn traffic volumes exceed 300 vehicles. Additionally, the southbound right turn movement is accommodated by a single lane. Additional lanes to accommodate these turning movements would improve overall capacity. However, the construction of these improvements would require significant widening, relocation of utilities, and widening past the intersection.

The proposed project will contribute approximately 1.7% of total intersection traffic during the AM peak hour and 2.3% of total intersection traffic during the PM peak hour.

When considering the projected traffic increases resulting from the proposed project, no project related capacity improvements are recommended.

IX. ALTERNATIVE PARKING PLAN

A. Town Parking Requirements

A Parking Demand Assessment was prepared consisting of an Alternate Parking Study per Section 7-1-7-A of the Zoning Code. When evaluating the parking supply needs for the proposed mixed-use project, our firm projected the parking demand considering shared parking (mixed-use) principles using nationally accepted methodology developed by the Urban Land Institute (ULI), ITE, International Council of Shopping Centers (ICSC), and National Parking Association (NPA). and a comparison to Town requirements, as set forth within Section 5A-9-1-A of the Town of Amherst's Updated Zoning Code Adopted on September 3, 2019 for Mixed-Use Districts.

Section 5A-9-1-A of the Zoning Code sets forth the off-street parking requirements for different categories of land uses. **Table V** depicts the required parking spaces for the project site.

TABLE V: TOWN CODE PARKING REQUIREMENTS

UNIT/USE TYPE	REQUIRED PARKING RATIO	SIZE	TOTAL REQUIRED PARKING SPACES
Two-bedroom unit	1.0 space per dwelling unit	475 units	475
Three or more bedroom unit	1.5 spaces per dwelling unit	25 units	38
Retail Sales	2.5 spaces per 1,000 SF	10,000 SF	25
Office	2.5 spaces per 1,000 SF	10,000 SF	25
Total Required Parking Spaces			**563**

Strict application of the unshared off-street parking standards in the Zoning Code results in a parking requirement of 563 spaces. The number of parking spaces to be provided is 316 surface spaces and 240 structured spaces for a total of 556 spaces. Thus, there is a deficit of seven parking spaces per strict application of Section 5A-9-1-A of the Zoning Code.

B. Shared Parking Demand

Shared parking studies are conducted to establish the total number of spaces necessary by mixed-use developments to effectively serve expected parking demands. The shared parking concept builds upon the premise that land uses in a mixed-use development often do not share the same peak demand period, so spaces can be shared between the different land uses

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

during different peak periods. Each land use typically has a peak demand period where it would occupy the maximum number of spaces that the use requires and an off-peak period where a lesser percentage of the maximum spaces would be occupied; be it by time of day, day of week, or even month of the year. This allows for the project to provide fewer spaces than would be required if the land uses on a project site were to be treated separately with individual parking demands. The concept of shared parking is well recognized within the real estate and regulatory community and is proven to work.

To estimate the number of parking spaces required for the proposed mixed-use project, this assessment used the ULI methodology for shared parking. This methodology is utilized by transportation engineers and planners when evaluating the parking demand for a mixed-use project. The ULI Shared Parking 3rd Edition includes state-of-the-art practice methodologies for determining parking demand in these types of projects.

Accompanying the publication is an interactive Shared Parking Calculation Model (Model) that is used to estimate the shared parking demand. The Model requires a user to input the number of units associated with each proposed land use. Within the Model, 32 land uses are identified – some of which are subdivided into more refined categories – with 44 different recommended base parking ratios based on suburban locations with little or no transit. Data contained within the Model is from a combination of ULI surveys and the ITE Parking Generation Manual. Outputs consist of a summary table describing the base parking demand and shared parking reduction; a monthly demand comparison; weekday and weekend demand by month; and weekday and weekend demand by hour.

The peak hour demand, respective of weekday, weekend, and seasonal demands, is projected to occur at 7:00 PM on a December weekend. The projected peak hour demand for the mixed-use project (i.e., the busiest hour of the busiest weekday or weekend of the year) is ±566 spaces. Parking demand accumulations for the peak weekday and weekend are presented in **Table VI**.

TABLE VI: SHARED PARKING DEMAND PROJECTIONS

LAND USE	SIZE	WEEKDAY		WEEKEND	
		UNADJUSTED DEMAND	**SHARED DEMAND**	UNADJUSTED DEMAND	**SHARED DEMAND**
Residential	500 units	519	**519**	544	**544**
Retail	±10,000 SF	36	**29**	40	**23**
Office	±10,000 SF	38	**4**	5	**0**
Total Parking Spaces		593	**552**	589	**566**
Shared Parking Reduction		**7%**		**4%**	

Notes:
1. Weekday shared demand occurs in December at 7:00 PM
2. Weekend shared demand occurs in December at 7:00 PM

When considering the site's 556 total parking spaces, the projected peak shared demand is deficient by 10 spaces.

It is noted that the proposed residential use is marketed as student housing. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

highly likely to own fewer vehicles per than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus.

Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

X. CONCLUSIONS & RECOMMENDATIONS

This Traffic Impact Study identified and evaluated the potential traffic impacts that can be expected from the proposed mixed-use development at 1400-1416 Sweet Home Road in the Town of Amherst, New York. The results of this study determined that the existing transportation network can adequately accommodate the projected traffic volumes and resulting minor impacts to study area intersections with the following mitigation in place. The following sets forth the conclusions and recommendations based upon the results of the analyses:

1. Using ITE Trip Generation Manual data, the proposed project is expected to generate approximately 66 entering/76 exiting vehicle trips during the AM peak hour and 145 entering/156 exiting vehicle trips during the PM peak hour.

2. However, not all driveway volumes are new, but instead a portion of the proposed volume is reduced considering internal capture adjustments. Thus, the proposed project is expected to generate approximately 62 entering/72 exiting vehicle trips during the AM peak hour and 129 entering/140 exiting vehicle trips during the PM peak hour.

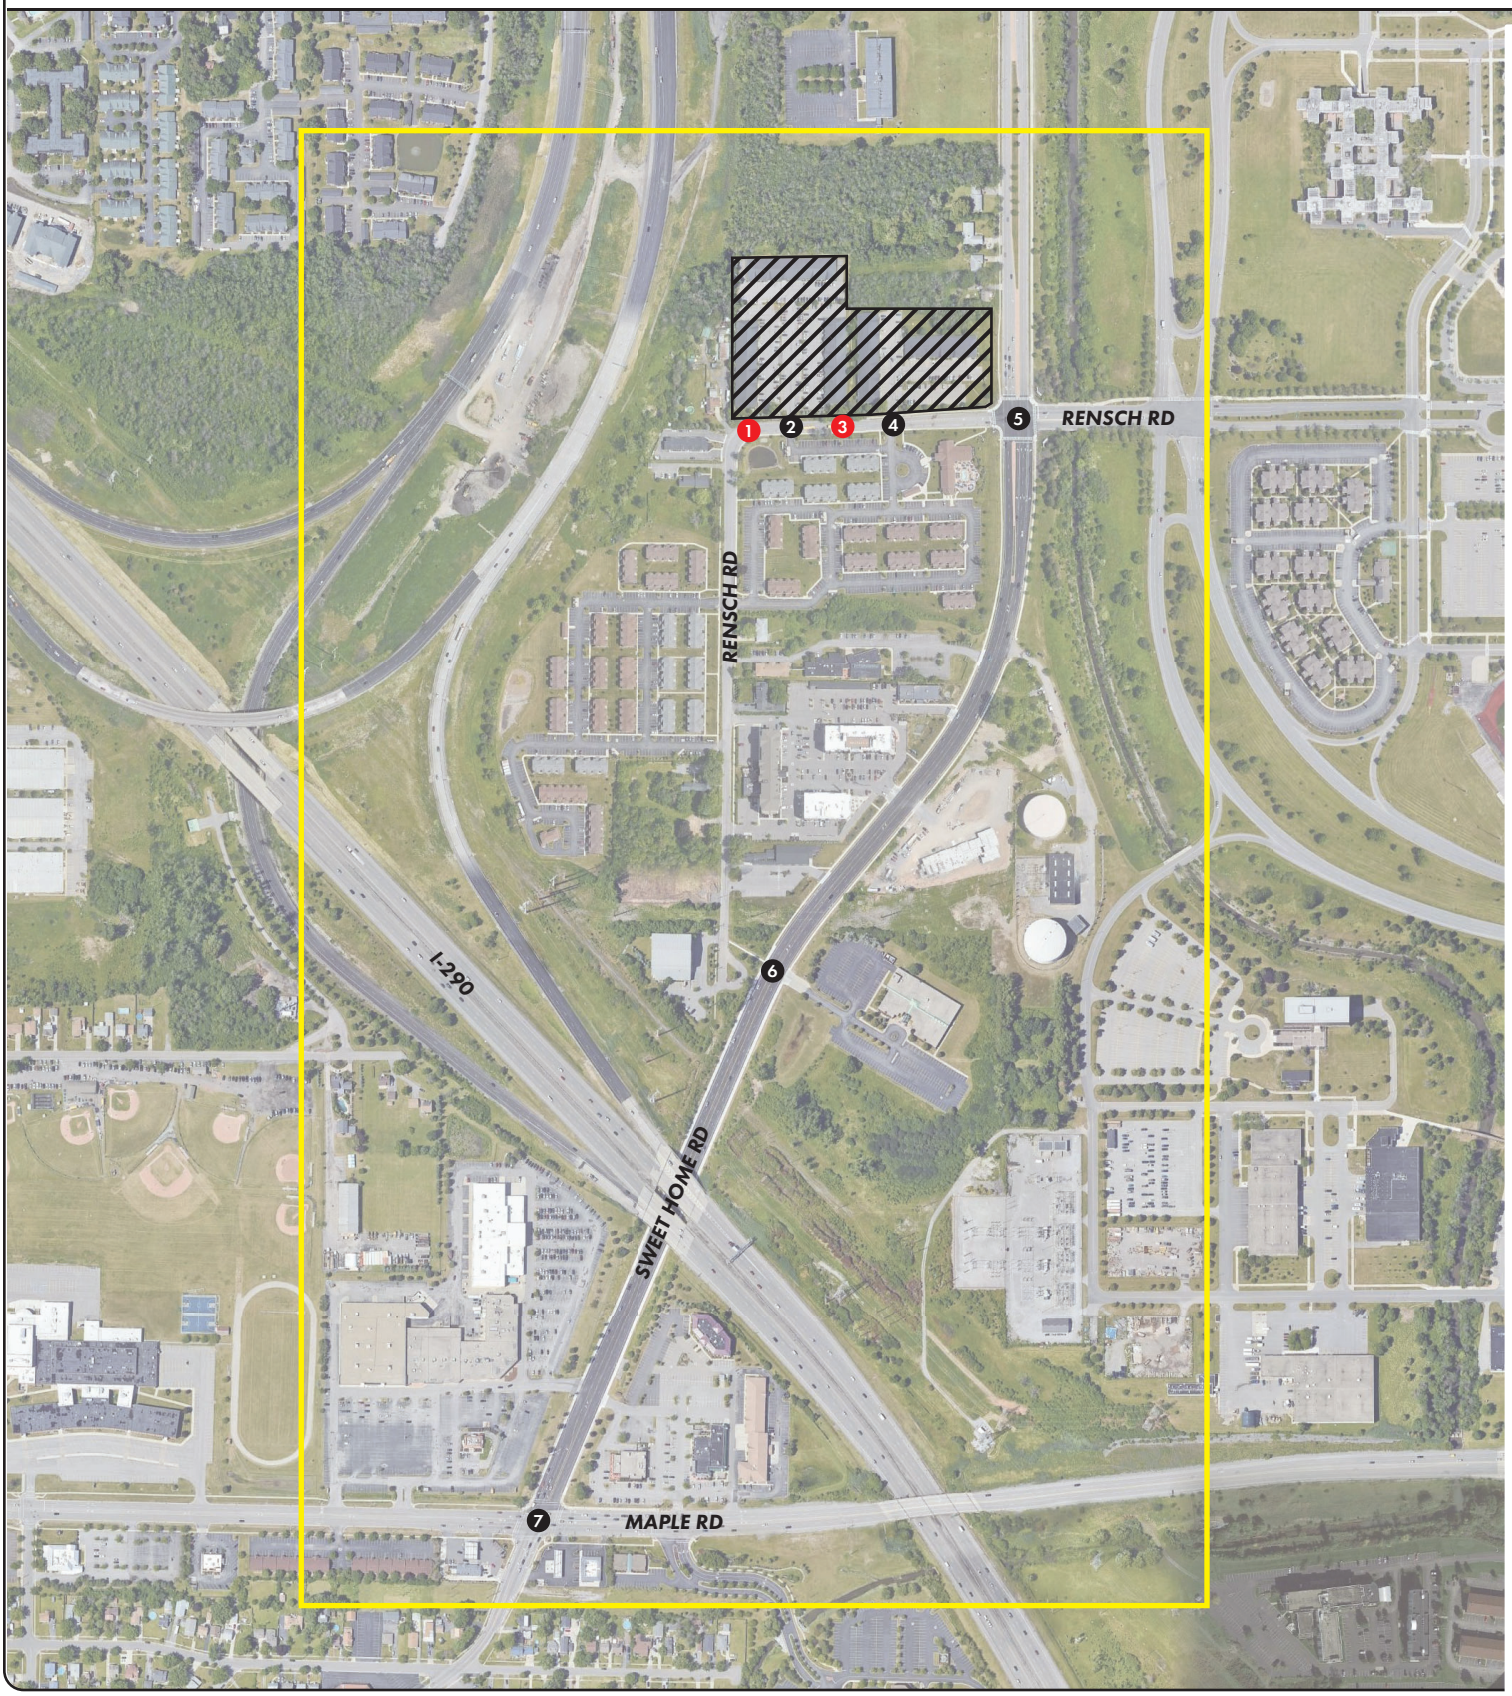
3. A crash analysis was conducted from 2017-2019 at the study intersections. Most of the crash types occurring at each study intersection were rear end events, a characteristic of signalized intersections along moderately to heavily trafficked arterials. However, an in-depth review of the crashes determined no deficiencies exist which can be corrected by geometric improvements. Consideration may be given to upgrading the signal at Sweet Home Road/Maple Road to change the green signals to flashing yellow arrows for permissive left turns to address the frequency of left turn crashes.

4. Minor signal timing adjustments are recommended at the intersection of Sweet Home Road/Rensch Road during the AM peak hour. These adjustments should be made under background conditions.

5. When considering Town of Amherst Zoning Code parking requirements and shared parking demands, the project site has a parking deficit of 10 or fewer spaces. It is noted that the proposed apartments are to be marketed as student housing given the proximity of the project site to the UB North Campus. When considering the requirements per Town Code and demands using the ULI Model, these sources assume that the residential demands are typical multifamily uses and not student uses. Students are highly likely to own fewer vehicles per unit than typical multifamily developments, especially given the proximity of the proposed project to the UB North Campus. Parking reduction strategies are being provided, such as bicycle parking spaces. Given these considerations, no significant adverse parking impacts are projected.

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

6. The projected traffic impacts resulting from full development of the proposed mixed-use project during both peak hours can be accommodated by the existing transportation network and study area intersections. No capacity improvements are required.



7. The proposed mixed-use project will not result in any potentially significant adverse traffic impacts to the study area intersections. This Traffic Impact Study provides the Town of Amherst and involved agencies with a detailed analysis for the purpose of evaluating the potential traffic impacts associated with the proposed project.

§ 5A-9 GENERAL DEVELOPMENT STANDARD

5A-9-1. Parking, Loading and Stacking

All parking, loading and stacking must meet the requirements of 7-1, except as required below.

A. Minimum Parking in Mixed Use Districts

(1) Off-Street Vehicle Parking

Off-street parking facilities must be provided in quantities not less than set forth in the following schedule.

SCHEDULE OF PARKING REQUIREMENTS

RESIDENTIAL USES	
Single-family detached	1.0 space per dwelling unit
Attached dwelling	1.0 space per dwelling unit
Multi-family dwelling, upper-story dwelling, assisted group living, senior citizen housing	.75 space per efficiency unit 1.0 space per one or two-bedroom unit 1.5 space per three or more bedroom unit
PUBLIC AND CIVIC USES	
Ambulance service	2.5 spaces per 1,000 SF
Business college, commercial school	3.5 spaces per 1,000 SF
College, university	3.5 spaces per 1,000 SF
Day care	3.5 spaces per 1,000 SF
Place of worship	3.5 spaces per 1,000 SF
Public utility service structure or facility	2.5 spaces per 1,000 SF
School, elementary/secondary (private)	3.5 spaces per 1,000 SF
Telecommunication facility, minor utility	1 space per facility
COMMERCIAL USES	
Animal grooming, cat boarding facility, animal hospital or veterinarian	2 spaces per 1,000 SF
Lodging	.75 spaces per room
Medical	3.5 spaces per 1,000 SF
Office	2.5 spaces per 1,000 SF
Personal service	2.5 spaces per 1,000 SF
Recreation, indoor	2.5 spaces per 1,000 SF
Restaurant	4.0 spaces per 1,000 SF
Retail sales and service	2.5 spaces per 1,000 SF

Level of Service: Criteria and Definitions

Attachment: Z-2022-02_application_092222 (25580 : Z-2022-02)

Level of Service Criteria

Highway Capacity Manual 2016

SIGNALIZED INTERSECTIONS

Level of Service is a qualitative measure describing operational conditions within a traffic stream, based on service measures such as speed and travel time, freedom to maneuver, traffic interruptions, comfort, and convenience. Level of Service for signalized intersections is defined in terms of delay specifically, average total delay per vehicle for a 15-minute analysis period. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 20
C	20 – 35
D	35 – 55
E	55 – 80
F	>80

UNSIGNALIZED INTERSECTIONS

Level of Service for unsignalized intersections is also defined in terms of delay. However, the delay criteria are different from a signalized intersection. The primary reason for this is driver expectation that a signalized intersection is designed to carry higher volumes than an unsignalized intersection. The total delay threshold for any given Level of Service is less for an unsignalized intersection than for a signalized intersection. The ranges are as follows:

Level of Service	Control Delay per vehicle (seconds)
A	< 10
B	10 – 15
C	15 – 25
D	25 – 35
E	35 - 50
F	>50

Intersection Summary			
Area Type:	Other		
Cycle Length: 115			
Actuated Cycle Length: 106.7			
Natural Cycle: 125			
Control Type: Actuated-Uncoordinated			
Maximum v/c Ratio: 1.13			
Intersection Signal Delay: 43.6		Intersection LOS: D	
Intersection Capacity Utilization 88.6%		ICU Level of Service E	

Analysis Period (min) 15
~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

N **SITE PLAN**

SCALE: 1"=40'

SITE DATA

SITE AREA = 7.4 AC
ZONED: RD, REZONED TO CTR-8
USE: PROPOSED (3) 7-STORY RESIDENTIAL BUILDINGS
500 RESIDENTIAL UNITS, 20,000 SF COMMERCIAL

SETBACKS - BUILDING	REQUIRED	PROVIDED
FRONT	5 FT	10.0' MIN.
SIDE	NONE	16.08' MIN.
REAR	NONE	57.52' MIN.
ACCESSORY STRUCT.	NONE	N/A
SETBACKS - PARKING		
FRONT	10 FT	> 15 FT
SIDE	N/A	3.65' MIN.
REAR	N/A	7.49' MIN.
TOTAL VEHICLE SPACES	565	319 + 240 GAR. *
BICYCLE	27	27
ELECTRIC VEHICLE STATION	50	8 *
GREENSPACE		
INTERIOR PARKING GREENSPACE:	5% (0.18 AC)	6.9% (0.25 AC)
OVERALL:	N/A	17.6% (1.3 AC)
MAX. BUILDING HEIGHT	8 STORIES / 105'	7 STORIES / 105'
OPEN SPACE	5% (0.37 AC)	> 5% (x.xx AC)

* VARIANCE REQUIRED

PARKING CALCULATION (PER SECTION 5A-9-1-A)

RETAIL SALES: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000/ 1,000) x 2.5 = 25 SPACES REQ'D

OFFICE: (10,000 GSF)
REQ'D: 2.5 PER 1,000 SF
REQ'D = (10,000/ 1,000) x 2.5 = 25 SPACES REQ'D

APARTMENTS/TOWNHOMES:
REQ'D: 1 SPACE PER 2-BDRM UNIT = 1 x 470 UNITS = 470 SPACES
1.5 SPACE PER 3-BDRM UNIT = 1.5 x 30 UNITS = 45 SPACES
REQ'D = 565 SPACES REQ'D

TOTAL PARKING SPACES REQUIRED = 585 SPACES

BICYCLE CALCULATION (PER SECTION 5A-9-1-A)

RESIDENTIAL:
REQ'D: 0.5 PER UNIT (20 MAX.)
REQ'D = 0.5 X 500 = 250 THEREFORE 20 SPACES REQ'D.

COMMERCIAL:
REQ'D: 1 SPACE PER 3,000 SF
REQ'D = 20,000/ 3,000 = 7 SPACES REQ'D

TOTAL BICYCLE SPACES REQUIRED = 27 SPACES

ELECTRIC VEHICLE CALCULATION (PER SECTION 5A-9-1-D)

10% OF TOTAL PARKING = 500 x 0.1 = 50 SPACES REQ'D.

DRAFT (9/22/22)
TOWN OF AMHERST
PLANNING BOARD
ZONING RESOLUTION
Z-2022-02

PETITIONER

North Forest Development LLC
c/o Sean Hopkins, Esq.
Hopkins Sorgi & McCarthy PLLC
5500 Main Street, Suite 343
Williamsville, NY 14221

PROPERTY LOCATION

1400-1404 & 1408-1416 Sweet Home Rd.

WHEREAS the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on the proposed rezoning of land from RD to CTR-8, and

WHEREAS the Planning Board has reviewed plans and other materials regarding the rezoning proposal, and

WHEREAS the materials and plans have been referred to the Town's various review agencies, and

WHEREAS in accordance with Section 8-3-5 of the Zoning Ordinance the Planning Board finds that:

A. The proposed zoning and development plan is generally consistent with the policies of the Comprehensive Plan and the Zoning Ordinance.

B. The proposal is consistent with the Conceptual Land Use Plan which shows Commercial-Mixed Use" in this area of the Town.

C. The proposal is consistent with Section 3.3.2 of the Plan, "Suburban Centers" as the subject proposal illustrates a mixed-use project located along a high-volume arterial away from residential uses on large parcels of land.

D. There are adequate services and utilities available or proposed to be made available in the construction of the development.

E. The proposal is compatible with the present zoning and conforming uses of nearby property and with the character of the neighborhood.

F. The subject property is suitable for uses permitted by the current versus the proposed district.

G. The proposed change does tend to improve the balance of uses, or meets a specific demand in the Town.

H. Review by the US Army Corps of Engineers under Section 404 of the Clean Water Act may be waived because the parcel is developed.

RECEIVED JUL 18 2022 TOWN OF AMHERST PLANNING DEPT.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

TO BE COMPLETED BY APPLICANT

1. **Petitioner:** Name: Sheridan Commons LLC

Address: c/o Sean Hopkins, Esq., Hopkins Sorgi & McCarthy PLLC
5500 Main Street, Suite 343
Williamsville, New York 14221
City State Zip Code

Phone: 510-4338 Fax:

E Mail shopkins@hsmlegal.com

2. **The undersigned hereby petitions the Honorable Town Board to rezone the following described property**
[Not Applicable - The Petitioner has filed a separate Application for the purpose of seeking to amend the zoning classification of a portion of 4110-4120 Sheridan Drive from GB to DC-5.]
From: District

To: District

3. **Street address of land to be rezoned:** (must be verified by Town Assessor's Office)
4110-4120 Sheridan Drive

SBL #: SBL No. 68.09-5-1.21

4. **Area of land to be rezoned** (in acres): Not Applicable

5. **Owner of Land:**
Name: Sheridan Commons LLC c/o Sean Hopkins, Esq.
Address: 5500 Main Street, Suite 343, Williamsville, NY 14221
Telephone: 716.510-4338

6. **Representative** (Architect, Engineer, Landscape Architect, Surveyor or Attorney):

Name: Sean W. Hopkins, Esq.
Address: 5500 Main Street, Suite 343
Williamsville, New York 14221
Tel: 716.510-4338 - E-mail: shopkins@hsmlegal.com
City State Zip Code

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

7. **Petitioner's interest in property** [Note: Authorization Letter of the Property Owner attached as Exhibit "1" of this Rezoning Application.]

_____ Option to purchase

__X__ Owner

_____ Other (explain)

8. **The following are all others having an interest in this application and join herein with the petitioner named above:** (describe extent of interest; attach sheets as needed)

Not Applicable.

9. **Attach Survey and Legal description of land to be rezoned. The Survey must be prepared by a New York State Licensed Land Surveyor.** Legal description of property to be rezoned from GB to DC-5 is attached as Exhibit "3" and a reduced size copy of the Survey of the Project Site is attached as Exhibit "4". Full size copy of the Survey is also attached.

10. **Said property has the following deed restrictions or Covenants:** (attach copy) - Copy of the Declaration of Restrictions recorded on September 18, 1997 is attached as Exhibit as Exhibit "7".

Liber 10921 Page 3979

[Note: A copy of correspondence issued by the Town Clerk's Office on July 10, 1997 regarding the decision of the Town Board to amend the zoning classification of 4100 Sheridan Drive [which includes the parcel at 4110-4120 Sheridan Drive from the Project Site from CS to GB subject to five conditions is attached as Exhibit "9".]

11. **Information on proposed project:**

A. Description of the character of the proposed development:

See Exhibit 5.

B. Rationale for rezoning request:

1. Why was this site chosen?

See Exhibit 5.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

2. Why cannot land be used with the existing zoning?

See Exhibit 5.

3. How will this rezoning impact surrounding properties?

See Exhibit 5.

4. How will this rezoning impact the school system?

See Exhibit 5.

12. Quantitative Data:

A. Total # of dwelling units: Not Applicable

B. Distribution of dwelling units by type: Not Applicable

C. Gross Residential Density per acre: Not Applicable

D. Total amount of Open Space: 2.09 Acres

E. Proposed Non-Residential Floor Area: 140,500 sq. ft.

[Note: A reduced size copy of the Concept Site Plan [Drawing C-100] for the proposed project prepared by Kideney Architects is provided at Exhibit "8" and a full size copy is also attached.]

13. Development Schedule:

Start: To be Determined

Finish: To be Determined

Stages (# of): 1

11" x 17" sized color Concept Elevation Plans prepared by Kideney Architects are provided at Exhibit "11". The maximum building height for the proposed four-story as measured from finished will be 65 ft.]

14. If any portion of the proposed development is planned to be sold or leased, please describe:

The office space will be leased to tenants.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

15. Open Space ownership and maintenance provisions (if applicable):

Greenspace and landscaping will be privately owned and maintained.

16. Basis for Findings (Sec. 8-3-5 of the Town Zoning Code) (Attach sheets and supplemental materials as necessary.)

A. <u>The proposed zoning and development plan must be generally consistent with the policies of the Comprehensive Plan and the Town Zoning Ordinance.</u>

1. State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps, and/or figures in the plan that support the proposed zoning at this location (The Comprehensive Plan document is available at the Planning Department, Town Clerk's Office, Amherst libraries, or at www.amherst.ny.us). Add sheets as needed.

See Exhibit 6. A color copy of Figure 6-A of the adopted Comprehensive Plan confirming the Project Site is designated as appropriate for Suburban Center development is provided at Exhibit "10".

2. Pursuant to NYS Town Law Section 272a(11), "all Town land use regulations must be in accordance with a comprehensive plan adopted pursuant to this Section." The Town Board adopted the Comprehensive Plan pursuant to NYS Town Law 272 on January 2, 2007. If the rezoning is approved, the Town Board may require the Plan to be amended, as applicable.

Cite all text, map, and / or figures that must be amended to support the proposed zoning at this location (attach pages as necessary) and provide detailed suggested amendments.

See Exhibit 6.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

3. State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

See Exhibit 6.

B. Adequate Services and Utilities are available or are proposed to be made available with the construction of the development:

1. Sanitary Sewer
   Yes.
2. Storm Sewer/Drainage
   Yes.
3. Water
   Yes.
4. Other Yes.

C. Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

See Exhibit 6.

D. Suitability of the subject property for uses permitted by the current versus the proposed district:

See Exhibit 6.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

E. Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

See Exhibit 6.

17. The petitioner encloses herewith the sum of $2,515.00 to pay the fee, and consents to the placement of a sign(s) at the described location identifying this request for a period of time to be determined by the Town Clerk.

18. The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

[Note: Authorization Letter of Property Owner signed attached as Exhibit "1".]

Counsel for Petitioner

Signature of Petitioner

Subscribed and sworn to before me this 18th day of July, 20 22

Notary Public, Erie County, New York

JOHN J. FLAHERTY
Notary Public, State of New Yo
Qualified in Erie County
My Commission Expires Feb. 28/20

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.

5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Medical Office Project		
Project Location (describe, and attach a general location map): 4110-4120 Sheridan Drive [SBL No. 68.09-1-5-1.21] - Town of Amherst - Erie County		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed office project consisting of a 4-story medical office building consisting of 140,500 sq. ft. and and related site improvements. The proposed action includes an amendment of the zoning classification of 6.27 acres of 4110-4120 Sheridan Drive ("Project Site") from GB to DC-5 and a request to remove a Declaration of Restrictions imposed in connection with a rezoning approved by the Town Board in 1996. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the medical office building and all related site improvements including parking spaces, access aisles, landscaping, lighting, water and sanitary sewer lines as well as utility connections. The heavily vegetated Permanent Open Space along the northern edge the Project Site will remain undisturbed [approximately 2.09] acres will not be disturbed and will remain zoned GB. Given that the proposed project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it includes a commercial building with a size of more than 100,000 sq. ft.		
Name of Applicant/Sponsor: Sheridan Commons LLC c/o Sean Hopkins, Esq.	Telephone: 716.510-4338 E-Mail: shopkins@hsmlegal.com	
Address: 5500 Main Street, Suite 343		
City/PO: Williamsville	State: NY	Zip Code: 14221
Project Contact (if not same as sponsor; give name and title/role):	Telephone: E-Mail:

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board - Rezoning and	July 18, 2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Planning Board - Site Plan Approval	To be Determined
c. City, Town or Village Zoning Board of Appeals ☐Yes ☑No		
d. Other local agencies ☑Yes ☐No	Building Dept - Building Permit; Eng. Dept. - Stormwater Per. & DSCA; AIDA - Potential PILOT	To be Determined
e. County agencies ☑Yes ☐No	ECWA - Water and RPZ	To be Determined
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - SPDES and DSCA	To be Determined
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☐Yes ☑No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
General Business District ("GB")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? Deep Corridor 5 ("DC-5")

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department

d. What parks serve the project site?
There are various Town parks located in relative close proximity to the Project Site.

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Office Space.

b. a. Total acreage of the site of the proposed action? 8.36 acres
b. Total acreage to be physically disturbed? 6.27 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 8.36 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

f. Does the project include new residential uses? ☐Yes ☑No
If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑Yes ☐No
If Yes,
i. Total number of structures 1
ii. Dimensions (in feet) of largest proposed structure: 65 ft. height; TBD width; and TBD length
iii. Approximate extent of building space to be heated or cooled: 140,500 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? [Existing stormwater facility location on the northwest portion of the Project Site will be utilized for stormwater management purposes.] ☐Yes ☑No
If Yes,
i. Purpose of the impoundment:
ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐Other specify:
iii. If other than water, identify the type of impounded/contained liquids and their source.
iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: _____ acres
v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length
vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐Yes ☑No
If Yes:
i .What is the purpose of the excavation or dredging?
ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?
- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐Yes ☐No
If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres
vi. What is the maximum area to be worked at any one time? _____ acres
vii. What would be the maximum depth of excavation or dredging? _____ feet
viii. Will the excavation require blasting? ☐Yes ☐No
ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐Yes ☑No
If Yes:
i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☑No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 14,500 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☐No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 14,500 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst Consolidated Sanitary Sewer District
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

- Do existing sewer lines serve the project? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: A Traffic Impact Study is being prepared by SRF Associates for the purpose of evaluating the potential traffic impacts for the proposed project.] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend
☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____
To be Determined

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☑No

l. Hours of operation. Answer all items which apply.

i. During Construction:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: To be Determined
- Holidays: To be Determined

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed medical office project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe:

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

On-site lighting will comply with the Town's stringent lighting standards and a Photometric Plan will be required in connection with the Site Plan Application review process for the development of the Project Site.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe:

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☑ Yes ☐ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities:

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☑ Yes ☐ No

If Yes:

i. Describe proposed treatment(s):

Use of pesticides may occur in connection with maintenance of greenspace and landscaping but will only be utilized if applied by licensed applicator.

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☑ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☑ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction:
- Operation:

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction:
- Operation:

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☑ Yes ☐ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: The future medical tenant(s) may generate hazardous medical waste that will be properly disposed of any required by the NYS Department of Health requirements.

ii. Generally describe processes or activities involving hazardous wastes or constituents: See above.

iii. Specify amount to be handled or generated TBD tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: Not applicable.

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☑ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): Motor Service and I-290

ii. If mix of uses, generally describe:

There are a wide assortment of land uses in the vicinity of Project with various zoning classifications.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	0	4.9	4.9
• Forested	2.09	2.09	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	6.27	0	(6.27)
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	0	1.37	1.37

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

c. Is the project site presently used by members of the community for public recreation? ☐Yes ☑No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☐Yes ☐No
If Yes,
i. Identify Facilities:

e. Does the project site contain an existing dam? ☐Yes ☑No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐Yes ☑No
If Yes:
i. Has the facility been formally closed? ☐Yes ☐ No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐Yes ☑No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐Yes ☐No
☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☑Yes ☐No
If yes, provide DEC ID number(s): C915291

iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):
The Project Sponsor is not aware of status of the above referenced site relative to the NYSDEC Environmental Site Remediation database.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

v. Is the project site subject to an institutional control limiting property uses? ☐Yes ☐No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐Yes ☐No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >5 ft. feet

b. Are there bedrock outcroppings on the project site? ☐Yes ☑No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____%

c. Predominant soil type(s) present on project site: _____ _____%
_____ _____%
_____ _____%

d. What is the average depth to the water table on the project site? Average: _____ feet

e. Drainage status of project site soils: ☐ Well Drained: _____% of site
☐ Moderately Well Drained: _____% of site
☐ Poorly Drained _____% of site

f. Approximate proportion of proposed action site with slopes: ☑ 0-10%: 100 % of site
☐ 10-15%: _____% of site
☐ 15% or greater: _____% of site

g. Are there any unique geologic features on the project site? ☐Yes ☑No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐Yes ☑No

ii. Do any wetlands or other waterbodies adjoin the project site? [There are no an wetlands subject to the jurisdiction of either the NYSDEC or USACE on the Project Site.] ☑Yes ☐No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑Yes ☐No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐Yes ☑No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐Yes ☑No

j. Is the project site in the 100-year Floodplain? ☐Yes ☑No

k. Is the project site in the 500-year Floodplain? ☐Yes ☑No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐Yes ☑No
If Yes:

i. Name of aquifer: _____

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: acres
- Following completion of project as proposed: acres
- Gain or loss (indicate + or -): acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☐ Yes ☑ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

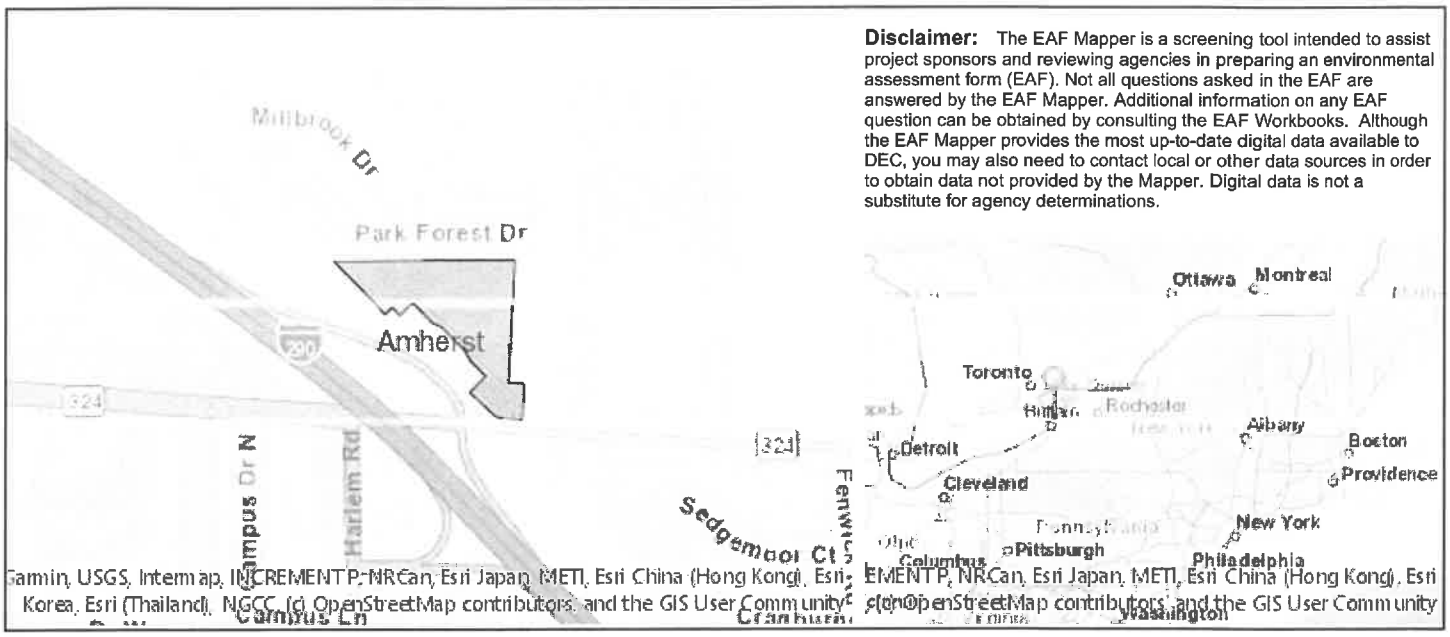
F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.



Applicant/Sponsor Name Sheridan Commons LLC Date July 18, 2022

Signature _____ Title Attorney for Project Sponsor

EAF Mapper Summary Report

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	Yes
E.1.h.iii [Within 2,000' of DEC Remediation Site - DEC ID]	C915291
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	Yes
E.2.h.iii [Surface Water Features]	Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No

Rezoning of 4110-4120 Sheridan Drive and
Removal of Declaration of Restrictions
TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Odessa Silt Loam	Severe	Severe	Severe	Severe	Moderate
Schoharie Silt Loam	Moderate	Moderate	Moderate	Moderate	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   _x_ Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? □ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? □ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? □ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: □ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project TBD
   Source: Traffic Impact Study being prepared by SRF Associates and will be submitted upon completion.

8. Will blasting occur during construction? □ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes □ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    14,500 average flow 58,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? □ Yes ☒ No

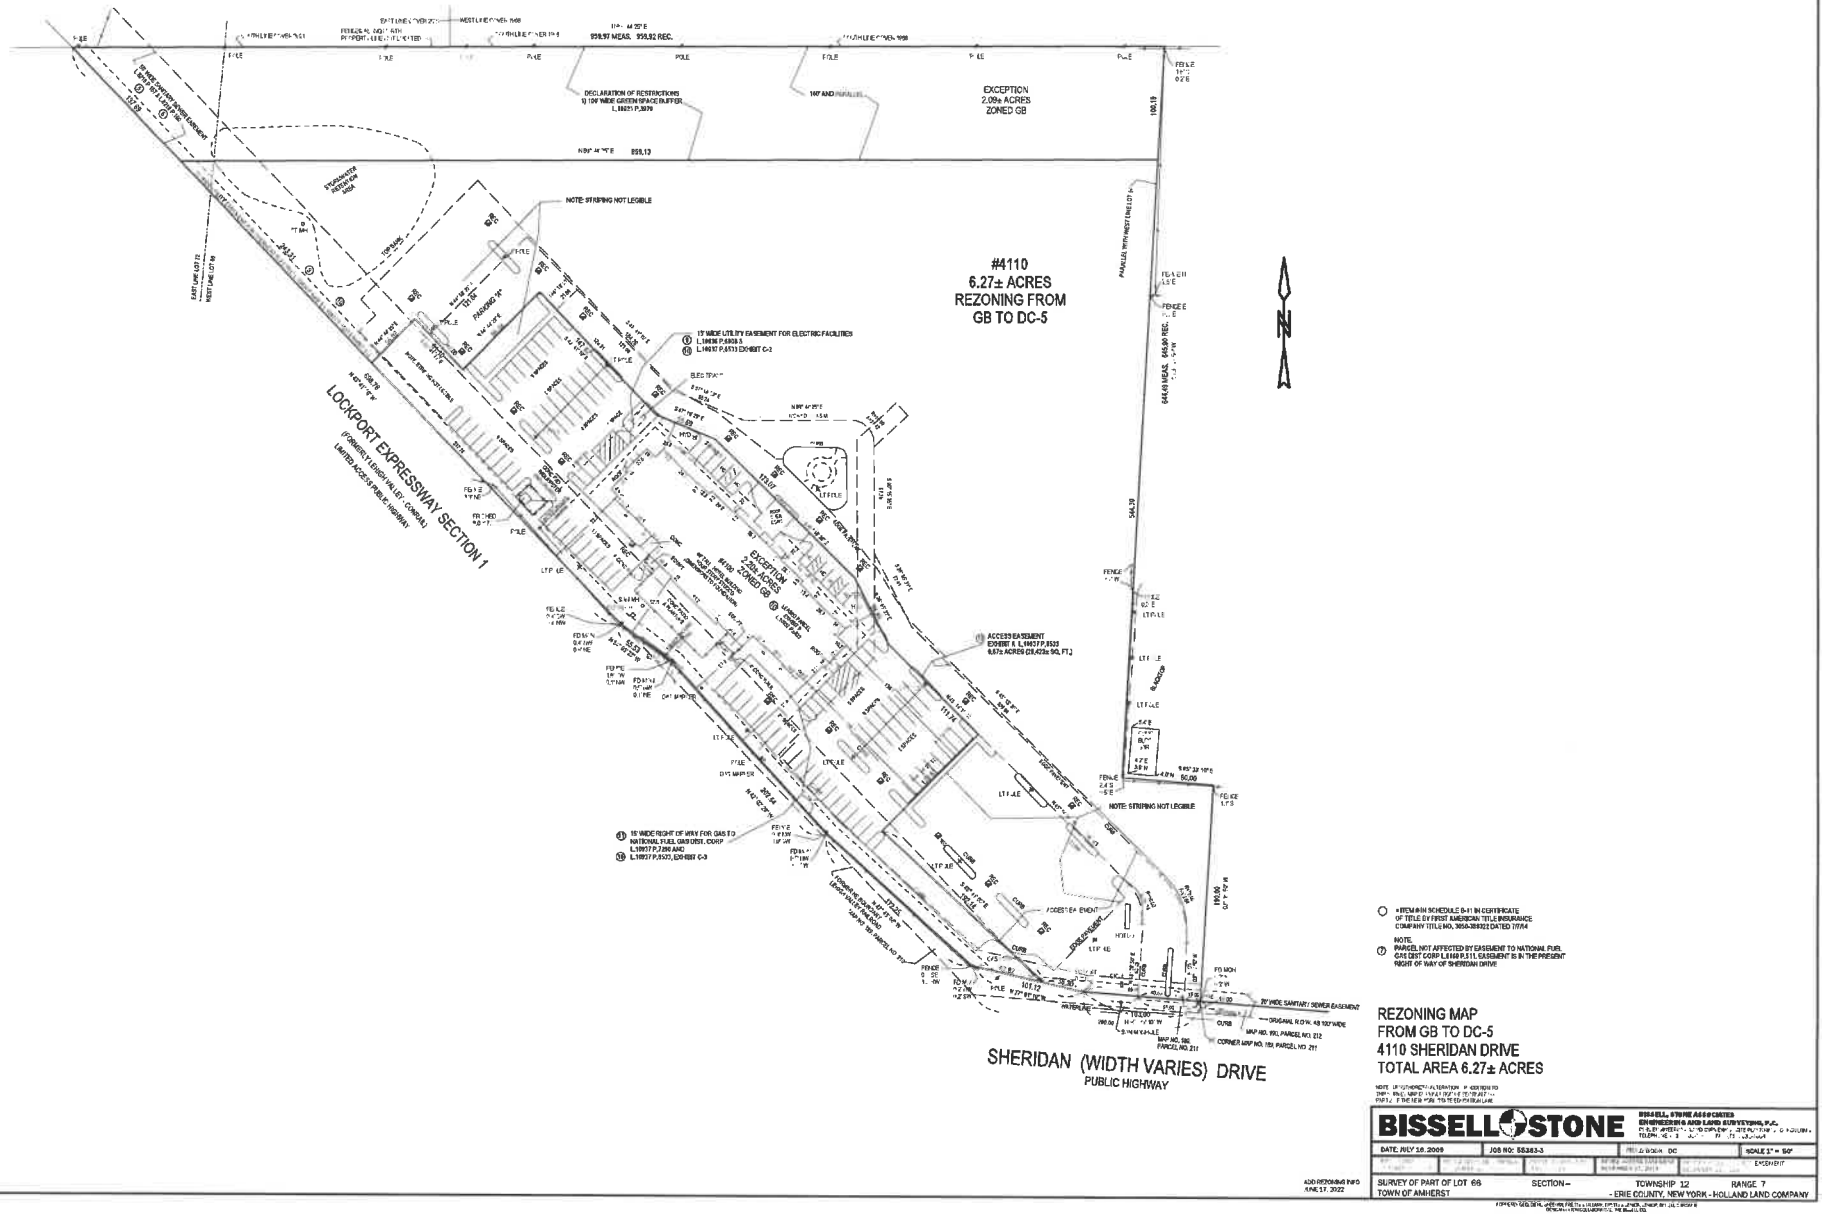
Exhibit 3 – Legal Description of Property to be Rezoned from GB to DC-5

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

EXHIBIT 3 OF REZONING APPLICATION

LEGAL DESCRIPTION OF PORTION OF 4110-4120 SHERIDAN DRIVE TO BE REZONED FROM GENERAL BUSINESS DISTRICT ("GB") TO DC DEEP CORRIDOR 5 DISTRICT ("DC-5")

PORTION OF 4110-4120 SHERIDAN DRIVE:



ALL THAT TRACT OR PARCEL OF LAND, SITUATE IN THE TOWN OF AMHERST, COUNTY OF ERIE AND STATE OF NEW YORK, BEING PART OF LOT NOS. 72 AND 66, TOWNSHIP 12, RANGE 7 OF THE HOLLAND LAND COMPANY'S SURVEY, MORE PARTICULARLY BOUNDED AND DESCRIBED AS FOLLOWS:

Commencing at a point which is the following courses and distances from the intersection of the northerly line of Sheridan Drive, as a 100 foot highway and the former northeast boundary of the Lehigh Valley Railroad right of way; (a) running thence easterly along the northerly line of Sheridan Drive as a 100 foot highway, a distance of 200 feet to a point; thence (b) north 03° 16' 50" east a distance of 10 feet to the beginning of the parcel herein described; thence north 85° 33' 10" west, and along the northerly boundary of said Sheridan Drive, a distance of 103.00 feet to a point; thence north 77° 01' 19" west, and along the northerly boundary of said Sheridan Drive, a distance of 38.30 feet to a point; thence north 46° 41' 05" west a distance of 192.14 feet to a point; thence north 44° 44' 25"" east a distance of 120.65 feet to a point; thence north 45° 14' 15" west a distance of 111.74 feet to a point; thence north 26° 55' 31"" west a distance of 65.86 feet to a point; thence north 45° 15' 35" west a distance of 173.07 feet to a point; thence north 67° 16' 29"" west a distance of 55.69 feet to a point; thence north 43° 41' 10" west a distance of 147.82 feet to a point; thence south 44° 44' 25"" west a distance of 96.04 feet to a point; thence north 43° 41' 10"" west a distance of 61.10 feet to a point; thence south 44° 44' 25"" west a distance of 54.02 feet to a point; thence north 43° 41' 10" west a distance of 243.31 feet to a point; thence north 89° 44' 25"" east a distance of 859.13 feet to a point; thence south 03° 16' 50" west a distance of 544.30 feet to a point; thence south 85° 33' 10" east a distance of 80.00 feet to a point; thence south 03° 16' 50" west a distance of 190.00 feet to the point and place of beginning and containing 6.27 acres, more or less.

EXHIBIT 5

RESPONSES TO QUESTION 11 OF REZONING APPLICATION

REZONING OF PORTION OF 4100 SHERIDAN DRIVE FROM GB TO DC-5

Question 11(A): Description of the character of the proposed development:

Response to Question 11(A): The proposed project will be upscale in character and will feature a four-story building on the property at 4100-4120 Sheridan Drive ("Project Site").[1] The Petitioner is seeking to amend the zoning classification of a portion of the Project Site from General Business District ("GB") to DC-5 Deep Corridor 5 District ("DC-5"). A survey depicting the portion of the Project Site to be rezoned from GB to DC-5 is attached to this Application and a reduced size copy of the survey is also provided at **Exhibit "4"**. It is important to mention that the vegetated 100 ft. of Permanent Open Space located on the northern portion of the Project Site zoned GB will remain undisturbed.

The conceptual layout of the proposed project is depicted on the full size Concept Site Plan [Drawing SP01] prepared by Kideney Architects attached to this Rezoning Application. A reduced size copy of the Concept Site Plan is also provided at **Exhibit "8"**. It is important to mention that the layout of the proposed project as depicted on the Concept Site Plan provided is not meant to represent the final layout of the proposed project since modifications may be necessary based on the project review process, potential future tenant(s) requirements, and the preparation of fully engineered plans for the project.

[1] Color Conceptual Elevation Plans [Drawing A201 and A202] as prepared by Kideney Architects are attached as **Exhibit "10"** of this Application.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

The proposed project will be consistent with the character of the existing hotel on the Project Site and surrounding land uses in the vicinity that include automotive dealerships directly to east of the Project Site and a used automotive dealership on the south side of Sheridan Drive in the vicinity of the Project Site. Landscaping will be provided pursuant to a Landscape Plan to be prepared by a licensed landscape architect during the Site Plan Application review stage of the project and the landscaping will feature numerous trees, bushes and shrubs.

Question 11(B)(1): Rationale for rezoning request: 1. What was this site chosen?

Response to Question 11(B)(1): The Project Site is an appropriate location for the proposed project given the character and scale of nearby land uses. It is also important to mention that the Project Site is designated as appropriate for "Suburban Center" development per Figure 6-A of the Comprehensive Plan. A color copy of Figure 6-A is attached as **Exhibit "9"**.

Question 11(B)(2): Why cannot land be used with the existing zoning?

Response to Question 11(B)(2): The Project Site could be developed pursuant to its existing long-standing GB zoning classification but a development based on the GB zoning standards would be inconsistent with the adopted Comprehensive Plan since Figure 6-A of the Comprehensive Plan designates the Project Site as appropriate for "Suburban Center" development.

Question 11(B)(3): How will this rezoning impact surrounding properties?

Response to Question 11(B)(3): The proposed rezoning of a portion of the Project Site from GB to DC-5 will not result in any significant adverse impacts on surrounding properties. As mentioned previously, the vegetated 100 ft. of Permanent Open Space located on the northern portion of the Project Site zoned GB will remain undisturbed. The proposed project will be more compatible

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

with the existing land uses in the vicinity of the Project Site than the higher intensity uses expressly permitted by the existing long-standing GB zoning classification.

Question 11(B)(4): How will this rezoning impact the school system?

Response to Question 11(B)(4): The proposed project will result in positive fiscal impacts for the Sweet Home Central School District since it will result in substantial annual school taxes revenues without any demand for educational services.

RESPONSES TO QUESTION 16 OF REZONING APPLICATION

REZONING OF PORTION OF 4100 SHERIDAN DRIVE FROM GB TO DC-5

Question 16(A)(1): **State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps and/or figures in the plan that support the proposed zoning at this location.**

Response to Question 16(A)(1): The request to amend the zoning classification of a portion of 4100-4120 Sheridan Drive (the "***Project Site***") to accommodate the proposed project is consistent with the adopted Bicentennial Comprehensive Plan. The Town of Amherst adopted the Bicentennial Comprehensive Plan in January of 2007 after completing a lengthy planning process that included numerous public meetings and public hearings involving the Comprehensive Plan Advisory Committee, the Planning Board and the Town Board.[1] In December of 2020, the Town Board most recently adopted amendments to the Bicentennial Comprehensive Plan. The Comprehensive Plan is intended to guide future growth and redevelopment in the Town.

Figure 6-A of the adopted Bicentennial Comprehensive Plan is the titled Commercial and Mixed-Use Designations and it depicts the Project Site as being designated as "Suburban Center". The Project Site is located within the University Place geographic location per Figure 6-A of the Comprehensive Plan. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "10"**.

[1] A copy of the resolution adopted by the Town Board on January 2, 2007 for the purpose of adopting the Bicentennial Comprehensive Plan pursuant to Town Law Section 272-a is included at the beginning of the Comprehensive Plan. This resolution recites the lengthy planning history that incorporated numerous opportunities for public input as well as a coordinated environmental review pursuant to SEQRA that involved the preparation a Generic EIS and the issuance of a Findings Statement.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Question 16(A)(2): Cite all text, map, and/or figures that must be amended to support the proposed zoning at this location and provide detailed suggested amendments.

Response to Question 16(A)(2): The proposed rezoning of a portion of the Project Site from GB to DC-5 to accommodate the proposed project does not require an amendment to the Bicentennial Comprehensive Plan.

Question 16(A)(3): State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

Response to Question 16(A)(3): Section 1-2-1 of the Zoning Code is titled "Purpose" and it states as follows:

> *"The purpose of this Zoning Ordinance and the intent of the legislative authority in its adoption is to promote the environment of the town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, building coverage and location of structures; by regulating and limiting population density; and for the aforesaid purposes, to divide the land within the limits of the town into districts of such number and dimensions generally consistent with the policies of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Ordinance."*

The proposed rezoning of a portion of the Project Site GB to DC-5 to accommodate the proposed project is consistent with the "Purpose" of the Zoning Code. Section 1-2-2 of the Zoning Code sets forth the objectives of the Zoning Code. This section of the Zoning Code lists thirteen objectives that are discussed below as follows:

A. To protect the character and values of residential, institutional and public uses, business, commercial and manufacturing uses and to insure their orderly and beneficial development;

Response: The proposed rezoning of a portion of the Project Site from GB to DC-5 to accommodate the proposed project will be consistent with the objective of

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

protecting the character and value of existing land uses. The proposed rezoning will allow the Project Site to be utilized as an upscale office building project, which represents orderly and beneficial development.

B. To provide adequate open spaces for light, air and outdoor uses to include public, common and private open space areas;

Response: The proposed rezoning of a portion of the Project Site from GB to DC-5 and the proposed project will not be inconsistent with this objective.

C. To prevent overcrowding of land;

Response: The proposed project will not result in the overcrowding of land. The project is consistent with the type of development designated as appropriate for the Project Site per Figure 6-A of the adopted Comprehensive Plan.

D. To prevent excessive concentration of population and to prevent spare and uncoordinated development;

Response: The proposed rezoning of a portion of the Project Site from GB to DC-5 will not result in excessive concentration of population and the proposed project represents an example of coordinated development. The project will require Site Plan Approval from the Planning Board.

E. To regulate and control the location and spacing of buildings on the lot and in relation to the surrounding property generally consistent with the policies of the Comprehensive Plan.

Response: The responses to the Questions in this **Exhibit "6"** of the Rezoning Application set forth the reasons the proposed rezoning is consistent with the policies of the Comprehensive Plan.

F. To protect persons and property from damage and injury due to fire or flood;

Response: The Site Plan Application review process will trigger the need for an Engineer's Report and SWPPP prepared by a licensed engineer to be prepared for review and approval by the Town's Engineering Department. The proposed project will not

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

increase the likelihood of damage and injury due to fire and flood. The proposed office building will be constructed per the stringent requirements of the NYS Building Code including the fire safety standards contained therein.

G. To preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only.

Response: The proposed rezoning of a portion of the Project Site from GB to DC-5 and the proposed project will not be inconsistent with this objective. There are not significant natural features located on the previously disturbed portion of the Project Site to be developed.

H. To assure that structure and land use arrangements are aesthetically harmonious with nearby areas and structures.

Response: The development of the Project Site in a manner generally consistent with the Concept Site Plan [Drawing SP01] prepared by Kideney Architects will be aesthetically harmonious with nearby areas and structures. Color Conceptual Elevation Plans depicting a proposed four-story office building as prepared by Kideney Architects are attached as **Exhibit "10"**.

I. To regulate the location of buildings and intensity of uses in relation to streets according to plans so as to cause the least interference with and be damaged least by traffic movements and hence result in lessened street congestion and improved public safety.

Response: The proposed project will utilize the existing driveway onto Sheridan Drive, which is the only available access to the roadway network in the vicinity of the Project Site.

J. To establish zoning patterns that insure economical extensions for sewers, water supply waste disposal and other public utilities, as well as development of recreation, schools and other public facilities;

Response: The Project Site has access to sanitary sewer and water lines as well as necessary public utilities to service the proposed project.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

K. To guide the future development of the town so as to being the gradual conformity of land, structures and uses generally consistent with the policies of the Comprehensive Plan.

Response: The proposed rezoning of a portion of the Project Site from GB to DC-5 is consistent with this objective since the proposed project is consistent with the policies contained in the Comprehensive Plan.

L. To accomplish the specific intents and goals set forth in the introduction to the respective sections.

Response: The proposed rezoning of a portion of the Project Site will be consistent with this objective.

M. To protect the community from visual pollution resulting from the unregulated use of signs and other advertising devices.

Response: The proposed rezoning and the proposed project will not be inconsistent with this objective.

Question 16(C): Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

Response to Question 16(C): The proposed rezoning of a portion of the Project Site from GB to DC-5 is compatible with the present zoning and conforming uses of nearby properties and the character of the neighborhood. The Project Site is currently zoned GB which would allow the Project Site to be developed for intensive uses including a wide assortment of commercial uses.

Question 16(D): Suitability of the subject property for uses permitted by the current versus the proposed district:

Response to Question 16(D): The Project Site is more suitable for uses permitted by the proposed DC-5 zoning classification than the existing GB zoning classification.

Question 16(E): Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Response to Question 16(D): The proposed change in the zoning classification of a portion of the Project Site from GB to DC-5 to accommodate the proposed project will have positive impacts on the balance of uses in the Town by providing a high quality office building designed for occupancy by medical users. It is important to mention that the Petitioner will be required to present the architectural plans for the proposed project to the Town's Design Advisory Board for its issuance of a recommendation to the Planning Board in connection with the future Site Plan Application review process.

DECLARATION OF RESTRICTIONS

WHEREAS, 4100 SHERIDAN DRIVE, L.L.C. is the sole owner of property referred to herein in Exhibit A, attached hereto and made a part hereof. Said parcel being situated in the Town of Amherst, County of Erie and State of New York, and being identified as 4100 SHERIDAN DRIVE, L.L.C., and

WHEREAS, 4100 SHERIDAN DRIVE, L.L.C. is the successor in interest to 428 CO., INC. and now holds legal title to the property described in Exhibit A, and

WHEREAS, the Town of Amherst approved the rezoning of said property and adopted a resolution approving said rezoning at their meeting on July 7, 1997 subject to the following restrictions:

1. Maintenance of a 100 foot wide green-space buffer along the entire northerly line of the property, including the retention of existing woods. The developer will provide additional fill-in trees or other suitable landscaping within the buffer area.

2. No building foundation will be constructed closer than 175 feet to the northerly property line, nor will any building foundation be constructed closer than 75 feet from the eastern property line.

3. Any office buildings to be constructed on this site will be to a maximum height of 48 feet, including the stair and utility towers.

4. Hotel construction will be located along the westerly property line and will set back a minimum of 330 feet from the said northerly property line.

5. The height of the hotel shall be restricted to a maximum overall height of 55 feet including the stair and utility towers.

The above restrictions shall be binding on 4100 SHERIDAN DRIVE, L.L.C., their successors and assigns and shall run with the land except that the above-described descriptions can be changed, modified or eliminated only by majority vote of the Town Board of Amherst, New York.

LOCAL LAW NO. _____-202_

TOWN OF AMHERST
COUNTY OF ERIE, STATE OF NEW YORK

A LOCAL LAW AMENDING CHAPTER 203 OF THE TOWN OF AMHERST CODE, KNOWN AS THE ZONING ORDINANCE TO REZONE A PORTION OF 4110-4120 SHERIDAN DRIVE FROM GB TO DC-5, TO REMOVE DECLARATION OF RESTRICTIONS IMPOSED IN CONNECTION WITH A REZONING DECISION AND TO AMEND THE ZONING MAP ACCORDINGLY.

Be it enacted by the Town Board of the Town of Amherst as follows:

Section 1. Title.

This Local Law shall be referred to as, "A Local Law Amending Chapter 203 of Town of Amherst Code, Known As The Zoning Ordinance, to Rezone a Portion of 4110-4120 Sheridan Drive from GB to DC-5, to Remove a Declaration of Restrictions Imposed in Connection with a Rezoning Decision and to Amend The Zoning Map Accordingly".

Section 2. Legislative Findings and Intent.

The Town Board of the Town of Amherst finds that an application to Rezone a Portion of 4110-4120 Sheridan Drive from GB to DC-5, to Remove a Declaration of Restrictions Imposed in Connection with a Rezoning Decision and to Amend The Zoning Map Accordingly has been filed and is in proper order. The Town Board further finds that the request including the rezoning is consistent with the Comprehensive Plan.

Section 3. Amherst Zoning Map.

The Town Board hereby amends its zoning map which is incorporated by reference in the Town zoning code by amending from GB to DC-5 the zoning classification of 4110-4120 Sheridan Drive from GB to DC-5, and removing a Declaration of Restrictions imposed in connection with a Rezoning Decision, **subject to any conditions imposed by the authorizing resolution**; legally described as follows:

PORTION OF 4110-4120 SHERIDAN DRIVE [GB TO DC-5]:

ALL THAT TRACT OR PARCEL OF LAND, SITUATE IN THE TOWN OF AMHERST, COUNTY OF ERIE AND STATE OF NEW YORK, BEING PART OF LOT NOS. 72 AND 66, TOWNSHIP 12, RANGE 7 OF THE HOLLAND LAND COMPANY'S SURVEY, MORE PARTICULARLY BOUNDED AND DESCRIBED AS FOLLOWS:

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Commencing at a point which is the following courses and distances from the intersection of the northerly line of Sheridan Drive, as a 100 foot highway and the former northeast boundary of the Lehigh Valley Railroad right of way; (a) running thence easterly along the northerly line of Sheridan Drive as a 100 foot highway, a distance of 200 feet to a point; thence (b) north 03° 16’ 50" east a distance of 10 feet to the beginning of the parcel herein described; thence north 85° 33’ 10" west, and along the northerly boundary of said Sheridan Drive, a distance of 103.00 feet to a point; thence north 77° 01’ 19" west, and along the northerly boundary of said Sheridan Drive, a distance of 38.30 feet to a point; thence north 46° 41’ 05" west a distance of 192.14 feet to a point; thence north 44° 44’ 25"” east a distance of 120.65 feet to a point; thence north 45° 14’ 15" west a distance of 111.74 feet to a point; thence north 26° 55’ 31"” west a distance of 65.86 feet to a point; thence north 45° 15’ 35" west a distance of 173.07 feet to a point; thence north 67° 16’ 29"” west a distance of 55.69 feet to a point; thence north 43° 41’ 10" west a distance of 147.82 feet to a point; thence south 44° 44’ 25"” west a distance of 96.04 feet to a point; thence north 43° 41’ 10"” west a distance of 61.10 feet to a point; thence south 44° 44’ 25"” west a distance of 54.02 feet to a point; thence north 43° 41’ 10" west a distance of 243.31 feet to a point; thence north 89° 44’ 25"” east a distance of 859.13 feet to a point; thence south 03° 16’ 50" west a distance of 544.30 feet to a point; thence south 85° 33’ 10" east a distance of 80.00 feet to a point; thence south 03° 16’ 50" west a distance of 190.00 feet to the point and place of beginning and containing 6.27 acres, more or less.

Section 4. Validity.

This Local Law is adopted under the authority granted to the Town Board of the Town of Amherst pursuant to §§10(1)(ii)(a)(12), 20 and 27 of the Municipal Home Rule Law and §265 of the Town Law of the State of New York.

The invalidity of any provision of this Local Law shall not affect the validity of any other provision of this Local Law that can be given effect without such invalid provision.

Section 5. Effective Date.

This Local Law shall take effect immediately when it is filed in the Office of the Secretary of State in accordance with Section 27 of the Municipal Home Rule Law and published pursuant to Sections 130 & 133 of the Town Law and Chapter 28 of the Code of the Town of Amherst.

Francina J. Spoth
Town Clerk
Town of Amherst
County of Erie, State of New York

Re: Geotechnical Engineering Report for
Proposed Medical Office Building
4100 Sheridan Drive
Amherst, New York

Dear Mr. Usewicz:

Empire Geo-Services, Inc. is pleased to submit two copies of the enclosed Geotechnical Engineering Report for the above referenced project. An electronic pdf file copy of the report has also been e-mailed to you for your use and distribution as appropriate.

Please contact the undersigned should you have any questions or wish to discuss this report. Thank you for considering Empire for this work and we look forward to working with you in the future.

Sincerely,

EMPIRE GEO-SERVICES, INC.

Thomas R. Seider, P.E.
Senior Geotechnical Engineer

1.00 INTRODUCTION

1.10 GENERAL

This report presents the results of a subsurface exploration and geotechnical engineering evaluation completed by Empire Geo-Services, Inc. (Empire) for the proposed Medical Office Building, planned at 4100 Sheridan Drive, in Amherst, New York. The approximate site location is shown on Figure 1.

BHNT Architects, P.C. (BHNT) retained Empire to complete the subsurface exploration program and provide geotechnical engineering recommendations for the proposed project. SJB Services, Inc. (SJB), Empire's affiliated drilling company, completed 13 test borings at the project site. On this basis, Empire prepared this report, which summarizes the subsurface conditions encountered by the test borings and presents geotechnical recommendations for design and construction of the foundations, slab-on-grade and pavement construction, and the associated site preparation work. This work was completed in general accordance with our June 7, 2011 proposal, as authorized on June 20, 2011.

1.20 SITE AND PROJECT DESCRIPTION

The project site is located at 4100 Sheridan Drive, northeast of the existing Courtyard Hotel. The project site consists of an open filed covered with tall grasses. The ground surface is relatively level with surface elevations at the test borings ranging from 597.5 feet to 599.0 feet, based on the benchmark datum described below.

Based on the information provided by BHNT, and Siracuse Engineers, P.C. (Structural Engineer for the project), the project will include the construction of a thee story, approximate 90,000 square feet, steel framed structure, with a slab-on-grade floor. No basement or pit structures are planned. The finished floor elevation has not been established but is expected to be near the existing site grades. New asphalt concrete pavement parking areas and driveways will be constructed within portions of the site not occupied by the building. Traffic is expected to consist mainly of automobiles with occasional delivery trucks. Figure 2 shows the major components of the planned site development and the approximate test boring locations.

2.00 SUBSURFACE EXPLORATION

The subsurface exploration program consisted of 13 test borings, designated as B-1 through B-13, completed by SJB between July 11th, and July 17th, 2011. The

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

exploration locations were selected by BHNT and Siracuse Engineers, P.C. (Siracuse), and staked in the field by SJB using tape measurements referenced to the existing hotel. The approximate test boring locations are shown on Figure 2. Optical survey techniques were utilized to determine the surface elevations at the test borings using the finished floor of the existing hotel, at the northeast entrance, as a benchmark. The approximate benchmark location is shown on Figure 2 and has a reported elevation of 599.5 feet.

The test borings were made with a Diedrich D-50, rubber track mounted drill rig, using hollow stem auger and split spoon sampling techniques. Split spoon samples and Standard Penetration Tests (SPTs) were taken continuously to a depth of 12 feet and in intervals of five feet or less for the remaining depth of the test borings. Split spoon samples and SPTs were completed in general accordance with *ASTM D1586 – "Standard Test Method for Penetration Test and Split-Barrel Sampling of Soils"*.

Test borings B-1, B-2, B-8, and B-13 were drilled and sampled through the overburden, until encountering auger refusal conditions at the top of apparent bedrock, at depths ranging from 42.5 feet to 45.8 feet. Test boring B-7 was completed to a depth of 35.8 feet where sample spoon refusal conditions where encountered and test boring B-12 was completed to a depth of 30.2 feet where auger refusal conditions were encountered. These shallower refusal conditions do not appear to represent the top of bedrock. The remaining test borings were completed to a depth of 30 feet.

Following auger refusal within test borings B-1, B-8, and B-13, the refusal material was cored 5 feet in general accordance with *ASTM D 2113 – "Standard Practice for Rock Core Drilling and Sampling of Rock for Site Investigation"* using a "NQ 2" size core barrel.

A Geologist prepared the test boring logs based on visual observations of the recovered soil samples and bedrock core, along with a review of the driller's field notes. The soil samples were described based on a visual/manual estimation of the grain size distribution, along with characteristics such as color, relative density, consistency, moisture, etc. The recovered rock core was also described, including characteristics such as color, rock type, hardness, weathering, bedding thickness, core recovery, and rock quality designation (RQD). The test boring logs are presented in Appendix A, along with general information and a key of terms and symbols used to prepare the logs.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

3.00 SUBSURFACE CONDITIONS

3.10 GENERAL

The general stratigraphy encountered at the test borings consisted of fill soils at the surface followed by an upper stratum of silty clay and clayey silt. Beneath the upper cohesive soils, the soils become granular, consisting of silty sands and sandy silts with varying amounts of gravel. Shale and Gypsum bedrock was encountered at a depth of about 43 to 46 feet. The soil stratigraphy encountered along with the groundwater conditions observed are described in more detail below, in order of increasing depth below the existing ground surface, and on the test boring logs presented in Appendix A.

3.20 FILL SOILS

Fill soils were encountered within each of the test borings and typically extended to a depth of about 2 to 4 feet, except at test boring B-12 where the fill extended to a depth of about 6 feet. The fill soils generally consisted of sandy silt and clayey silt, with lesser amounts of silty sand. Trace amounts of organics or wood were observed within 5 of the 13 test borings and a majority of the fill soils were described, at least partially, as having a black color.

Within test boring B-7 at a depth of 2 to 4 feet, a zone of organic clayey silt was encountered. Within test boring B-12 at a depth of 2 to 4 feet, the fill was noted to contain "and" organics. At the time of this report, these two soils samples were being tested for organic content in accordance with *ASTM D-2974 – "Moisture, Ash, and Organic Matter of Peat and Other Organic Soils"*. The laboratory test data will be forwarded when complete.

In addition to the organics, trace amounts of concrete fragments, asphalt fragments, or brick fragments were observed within most of the fill soils. The Standard Penetration Test (SPT) "N" values obtained within the fill soils ranged from 6 to 44, suggesting the fill was installed in an uncontrolled manner.

3.30 INDIGENOUS SOILS

The upper most indigenous soils encountered beneath the fill layer, consisted of cohesive silty clay and clayey silt soils. These upper soils are classified as a CL and ML group soil using the Unified Soil Classification System (USCS). The Standard Penetration Test "N" values obtained within this stratum ranged from 4 to 24, but typically exceeded 9 indicating the soils are generally have a "stiff" to "very stiff" consistency with some isolated softer zones.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Beneath a depth of about 20 to 25 feet, the soils become more granular and are identified as a: silty sand; silty sand and gravel; silty gravel and sand; or sandy silt. These soils are classified as a SM, SW-SM, GW-GM, and ML group soil using the USCS. The SPT "N" values obtained within these soils ranged from 12 to "refusal conditions" (i.e. more than 50 blows required to advance the sample spoon six inches or less), indicating the non-cohesive granular soils have a "firm" to "very compact" relative density.

3.40 REFUSAL CONDITIONS AND BEDROCK

Auger refusal conditions were encountered within test borings B-1, B-2, B-8, and B-13 at a depth ranging from 42.5 feet to 45.8 feet, suggesting the top of bedrock was encountered. Sample spoon refusal or auger refusal was also encountered within test borings B-7 and B-12, although at a shallower depth. These shallower depths to refusal appear to be the result of encountering a boulder or very compact soils.

After encountering auger refusal within test borings B-1, B-8, and B-13, five feet of bedrock coring was performed. The recovered rock core is described as soft to medium hard, sound, thinly bedded to bedded, gray Shale and white Gypsum bedrock. The core recoveries ranged from 50% to 82% and the rock quality designation (RQD) values ranged from 0% to 50% indicating a "very poor" to "poor" rock mass quality.

3.50 GROUNDWATER CONDITIONS

Water level measurements were made in most of the test borings at the completion of overburden drilling and soil sampling. In addition, test borings B-2, B-8, and B13 were completed during two days, allowing for the water level to stabilize within the augers overnight. These measurements are noted on the subsurface exploration logs in Appendix A.

Within test borings B-6, B-10, B-11, and B-12, no free standing water was encountered at the completion of overburden drilling. Within test borings B-3, B-4, B-5, B-7, and B-9, free standing water at the completion of overburden drilling was encountered at depths ranging from 16 feet to 27 feet. These variable depths to groundwater within the test borings suggest the groundwater did not have sufficient time to accumulate or stabilize in the test holes following the completion of drilling operations and the time of measurement.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

As noted, test borings B-2, B-8, and B13 were completed during a 2 day period. At test borings B-2 and B-8, the boring was initially advanced to a depth of 25 feet. The next morning, the water level was about 7.5 feet to 8.5 feet below the ground surface. Test boring B-13 was initially advanced to the top of bedrock. The next morning, the water level was about 23.5 feet below the ground surface. It is not clear why the water level at this location was deeper than that observed at test borings B-2 and B-8.

The upper stratum of cohesive silty clays and clayey silts are typically described as having a "moist" soil condition, suggesting the absence of a general groundwater condition. The deeper, more granular soils, are occasionally described as "moist to wet" or "wet", suggesting free standing zones of water. It is possible that the groundwater within the deeper granular soils is partially confined by the overlying cohesive soils. Accordingly, once the cohesive soils are penetrated, the water level then stabilizes into the upper cohesive soils, such as that observed at test borings B-2 and B-8. Installation of groundwater observation wells would be necessary to further evaluate the groundwater conditions at the site.

Although not observed during our investigation, it is possible that some localized zones of perched or trapped groundwater may be present at various times and locations. Perched groundwater conditions would be expected to be more prevalent within the more pervious fill soils, which overlie the less permeable silty clay soils. Perched groundwater conditions can be particularly more prevalent following heavy or extended periods of precipitation and during seasonally wet periods. It should be expected that both perched and general groundwater conditions will vary with location and with changes in soil conditions, precipitation, and seasonal conditions.

4.00 GEOTECHNICAL CONSIDERATIONS AND RECOMMENDATIONS

4.10 GENERAL

The following general considerations and recommendations are provided to assist with planning for the design and construction of the proposed building. More detailed recommendations are presented in subsequent sections of this report.

Based on our analysis of the conditions encountered in the test borings, it is Empire's opinion that spread foundations can be used to support the proposed building. From a geotechnical standpoint, development of the building with spread foundations will be primarily impacted by the variable amounts of fill soils at the project site, and the upper silty clay soils which will limit the allowable bearing capacity to 2,500 pounds per square foot.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Settlement beneath spread foundations and floor slabs constructed over the existing fill soils can be variable, potentially excessive, and is difficult to predict. Accordingly, to use spread foundations, it will be necessary to remove the existing fill soils and any unsuitable indigenous soils from beneath the foundations and install an engineered fill layer which replaces the fill and unsuitable soils, where necessary. This will require excavations up to 6 to 7 feet deep below existing site grades in some areas.

As an alternative to spread foundations, a deep foundation system consisting of driven piles end bearing on the shale and gypsum bedrock could be considered to support the proposed structure. It is possible that some cobbles, boulders, or very compact sand and gravel soils, encountered beneath a depth of about 25 feet, could pose some difficulties with driven pile installation. Therefore, these conditions should be anticipated by the Contractor and appropriate contingencies planned for.

With regard to the slab-on-grade floor, it is common practice to recommend that the existing fill be removed and replaced with a properly controlled and compacted Suitable Granular Fill material installed beneath the slab-on-grade areas. We understand, however, because up to 6 feet of fill was encountered, it may not be economically practical to remove the fill in its entirety for the floor construction. Therefore, the Owner could consider removing a portion of the existing fill and provide some additional Structural Fill/Subbase Stone beneath the slab-on-grade construction. There are some uncertainties with this approach, such as long-term differential settlement, which could occur with leaving potentially undetected unsuitable fill soils in-place. If the Owner is willing accept these risks, then we recommend the following be implemented as minimum requirements for constructing the slab-on-grade over the existing fill soils.

- Pending the results of the organic content testing, the organic clayey silt encountered within test boring B-7, at a depth of about 2 to 4 feet and the highly organic fill soils encountered within test boring B-12, at a depth of 2 to 4 feet should possibly be removed.
- After removal of the areas with a high percentage of organics, and removal of the surface materials (i.e. organics, grass, topsoil, etc.) the existing fill subgrades must be thoroughly compacted and properly proof rolled, evaluated, and prepared in accordance with our recommendations in Section 4.70.4.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

- The slab-on-grade floor system should be constructed over a minimum 10 inch thick layer of Subbase Stone, where the existing fill remains in-place and the floors are lightly loaded (i.e. office space). The Subbase Stone layer should be increased to a minimum of 18 inches where heavier loads are expected such as storage areas and mechanical rooms.
- Any deleterious materials, such as organics, soft soils, highly voided debris, etc., which are present within the fill soils at the bottom of the subgrade excavation, should be further undercut, removed, and replaced with additional Structural Fill material.
- Any wood or organics observed within the sidewall of the foundation excavations, beneath the proposed slab-on-grade floors, should be removed.
- A suitable stabilization/separation geotextile, such as Mirafi 500X, should be placed between the existing fill subgrade and the overlying Suitable Granular Fill or Subbase Stone layer for the slab-on-grade construction.

If the Owner is not willing to accept the risks with leaving the fill in-place in its current state beneath the slab-on-grade floor, then consideration will need to be given to completely removing the fill soils in the areas beneath the slab-on-grade floors, or using a structural floor slab.

Site filling and grading to establish the building pad and pavement subgrades should be performed in a controlled manner in order to help limit post construction settlement. The on-site soils excavated from other portions of the project site, could potentially be used for filling beneath the floor and beneath the pavement areas, provided they can be installed to the requirements outlined for Suitable Granular Fill, in Appendix B. However, the existing fill soils and the finer grained silty clay and clayey silt indigenous soils will be difficult to work with, especially during seasonally wet periods.

As mentioned above, the potential exists to encounter localized perched groundwater within the fill soils. Perched groundwater seepage generally should be able to be controlled with conventional sump and pump methods of dewatering.

4.20 SPREAD FOUNDATION DESIGN

Spread foundations should bear on suitable, relatively undisturbed, indigenous soil subgrades or on flowable fill placed over suitable indigenous soil subgrades. Suitable indigenous soil bearing grades should consist of the “stiff” silty clay soils, which are free of organics, soft, loose, wet or otherwise deleterious conditions that may be present at the proposed foundation locations and depths. The suitable

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

bearing grade depths/elevations that were present at the test boring locations are presented in the following table.

Recommended Suitable Bearing Grade Depth / Elevation for Spread Foundations or Engineered Fill		
Test Boring	Approximate Ground Surface Elevation (feet)	Suitable Bearing Grade Depth / Elevation (feet)
B-1	597.8	5.0 / 592.8
B-2	598.0	2.5 / 595.5
B-3	597.5	4.0 / 593.5
B-4	598.2	3.5 / 594.7
B-5	598.8	4.5 / 594.3
B-6	597.9	3.0 / 594.9
B-7	599.0	4.5 / 594.5
B-8	597.5	5.0 / 592.5
B-9	597.6	4.5 / 593.1
B-10	598.7	6.5 / 592.2
B-11	598.9	5.0 / 593.9
B-12	598.1	6.5 / 591.6
B-13	598.3	4.0 / 594.3

Spread foundations should bear at or below the suitable bearing grades noted above, or they may bear on flowable fill which is placed following excavation to or below these grades. Subsurface conditions away from the test boring locations could vary and require adjustments in the suitable subgrade elevation based on actual conditions encountered at the time of construction. Accordingly, close inspection of the foundation bearing grades by Empire is recommended at the time of construction.

Flowable backfill material, if used, should be a non-swelling type material and should have a minimum 28-day compressive strength (f'c) of 250 pounds per square inch (psi). The flowable backfill should extend at least 12 inches horizontally beyond the foundation limits on all sides where its thickness is less than 3 feet. The flowable backfill should extend at least 18 inches horizontally beyond the foundation limits on all sides where its thickness is more than 3 feet thick.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

It is recommended that continuous footings be at least 2.0 feet in width and column/individual footings should be at least 3.0 feet in width. Exterior foundations should be embedded a minimum of 4.0 feet below finished exterior grades for frost protection. Interior foundations should be embedded a minimum of 2.5 feet below finished interior floor grades to develop adequate bearing capacity. All foundations, however, must bear at or below the suitable bearing grades in accordance with the recommendations above.

Spread foundations constructed on suitable indigenous soil bearing grades or on flowable fill placed over the suitable bearing grades can be sized based on a maximum net allowable bearing pressure of 2,500 pounds per square foot (psf). It is estimated that spread foundations sized and properly constructed in accordance with these recommendations will undergo a total settlement of about 1 inch or less.

4.30 DRIVEN PILE FOUNDATION DESIGN

The Shale and Gypsum bedrock encountered about 43 to 46 feet below the existing ground surface should provide a suitable bearing stratum for supporting the building, using end bearing piles driven to absolute refusal. The piles should be equipped with a driving shoe to limit potential damage when driving into the top of bedrock. Due to the very compact zones of soil, an H-pile (minimum size HP 12x53) or open ended pipe pile with a minimum wall thickness or 0.375 inches is recommend.

A steel pile, driven to absolute refusal at the top of the Shale and Gypsum bedrock, may be designed for an allowable axial capacity equal to 30% of the pile yield strength times the cross sectional area of the pile. On this basis, an HP12 x 53 section (Grade 50 steel), with a cross sectional area of 15.5 in^2, would provide an allowable axial compressive capacity of about 116 tons per pile. Other H-pile sections or steel pipe piles could also be used to obtain a different allowable axial capacity, using the same criteria outlined above.

Steel H-piles or pipe piles driven to absolute refusal at the top of the Shale and Gypsum bedrock and in accordance with our recommendations should undergo insignificant total settlement. Driven piles should be spaced a minimum of 3 pile widths apart, or three feet, whichever is greater. At this spacing, no group reduction factor is considered necessary. All exterior grade beams should be embedded a minimum of 4 feet for frost protection.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

At least 3 to 4 random piles should be dynamically tested in accordance with *ASTM D 4945 – "Standard Test Method for High Strain Dynamic Testing of Piles"* to confirm that the pile capacity has been obtained with an adequate factor of safety (i.e. Factor of Safety of 2.0 or greater as required by the Building Code of New York State). The piles should be tested both during the initial installation and after a minimum 48 hour set up period to verify relaxation at the pile tip does not occur.

4.40 SLAB-ON-GRADE FLOOR DESIGN

As discussed in Section 4.10 above, where the floor is constructed as a slab-on-grade over the existing fill, it is recommended that a minimum of 10 inches of Subbase Stone be placed beneath the slab-on-grade construction for lightly loaded floors. The Subbase Stone layer should be increased to a minimum of 18 inches where heavier loads are expected.

Depending on the subgrade and the proposed floor loading conditions, the recommended minimum Subbase Stone (i.e. Structural Fill) thicknesses are summarized in the following table.

Recommended Subbase Stone Thickness Beneath Slab-on-Grade Floors

Subgrade Condition	Mechanical Rooms and Storage Areas	Lightly Loaded Office Space
Existing fill soil subgrades or areas with Suitable Granular Fill installed over the existing fill soils.	18-inches	10-inches
All existing fill soils removed. Subgrade consisting of 12 to 24 inches of Suitable Granular Fill.	12-inches	6-inches
All existing fill soils removed. Subgrade consisting of more than 24 inches of Suitable Granular Fill.	8-inches	4-inches

If the floors are structurally supported by the deep foundation system, it is recommended a minimum of 4-inches Subbase Stone material be placed beneath the structural slab to provide a suitable working surface to construct the slabs.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

A suitable stabilization/separation geotextile, such as Mirafi 500X, should be placed over the existing fill soil subgrades prior to placement of the Suitable Granular Fill to raise site grades. Where the fill soils are removed and replaced with Suitable Granular Fill, a suitable stabilization/separation geotextile should be placed beneath the Subbase Stone.

In all cases, the existing fill soil subgrades or subgrades after removal of the fill soils, should be thoroughly compacted and properly prepared and evaluated in accordance with our recommendations in Section 4.70.4 prior to placement of the geotextile, Suitable Granular Fill, or Subbase Stone material.

The slab-on-grade floor slabs can be designed using a modulus of subgrade reaction of 150 pounds per cubic inch at the top of the Structural Fill layer.

Where the finished floor grade will be established above the surrounding exterior grades, the use of a moisture barrier does not appear warranted, unless otherwise recommended by the finished flooring manufacturer. It is recommended that the slab-on-grade be constructed such that it floats on the subbase and subgrades and is not structurally connected to, or resting directly on, perimeter walls or column footings in order to limit differential settlement effects.

We note that the above subbase stone thicknesses, in some cases, are not designed for carrying construction vehicle loads. Therefore, it may be desirable for the Contractor to temporarily increase the Subbase Stone thickness within the building pad areas to provide a suitable working surface to stage the construction, carry construction vehicle loads and protect the underlying subgrades. This will be particularly important if construction proceeds during seasonally wet periods. The additional subbase stone material could then be removed in preparation for the actual floor construction and re-used as foundation backfill, pavement area subbase or as otherwise determined appropriate.

4.50 SEISMIC DESIGN CONSIDERATIONS

Based on the subsurface conditions encountered in the test borings, the upper 100 feet of the project site can be classified as Seismic Site Class “D” in accordance with Table 1613.5.2 of the Building Code of New York State (December 2010). Therefore, seismic design may be based on this seismic site classification.

The spectral response accelerations in the project area were obtained by Empire using the United States Geological Survey (USGS) web site application (https://geohazards.usgs.gov/secure/designmaps/us/). The accelerations are based on the 2009 NEHRP Recommended Seismic Provisions, which makes use of the

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

2008 USGS seismic hazard data. The acceleration values obtained from this application were then adjusted, as recommended by the USGS, to obtain the 2% probability in 50 years mapping accelerations, as presented in the NYS Building Code.

Using the site address, the calculated spectral response accelerations for Site Class "B" soils are 0.220g for the short period (0.2 second) response (S_S) and 0.051g for the one second response (S_1). For design purposes, these spectral response accelerations were then adjusted for the Seismic Site Class "D" soil profile determined for the project site.

Accordingly, the adjusted spectral response accelerations for Site Class "D" are as follows:

- Short Period Response (S_{MS}) - 0.352g
- 1 Second Period Response (S_{M1}) - 0.122g

The corresponding five percent damped design spectral response accelerations (S_{DS} and S_{D1}) are as follows:

- S_{DS} - 0.235g
- S_{D1} - 0.081g

4.60 PAVEMENT DESIGN

Pavement design recommendations are provided for a Light Duty Asphalt Concrete Pavement structure which will be used mainly for automobile parking areas. The recommended pavement section is based on the assumption that the subgrades will be prepared as discussed in Section 4.70.4 below.

Light Duty Asphalt Concrete Pavement

- 1.5 inches – Top Course
- 2.5 inches – Binder Course
- 12 to 18 inches – Subbase Course*
- Geotextile
- Prepared Subgrade

*It is recommended to increase the subbase course thickness to 18 inches in the entrance, and drive lanes, which will be subject to more frequent and heavier loads. The subbase can be reduced to 12 inches for the parking areas. It may also be necessary to increase the subbase thickness in some areas to improve subgrade conditions and to promote drainage to underdrains as discussed below.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Materials for the above pavement structure components should consist of the following:

A. Asphalt Concrete Top Course - NYSDOT Standard Specifications, Item No. 403.198902 - Hot Mix Asphalt, Type 7 Top Course.

B. Asphalt Concrete Binder Course - NYSDOT Standard Specifications, Item No. 403.138902 - Hot Mix Asphalt, Type 3 Binder Course.

C. Subbase Course – Should comply with NYSDOT Standard Specifications, Item No. 304.12 - Type 4 Subbase.

D. Geotextile - Woven polypropylene stabilization/separation geotextile (i.e., Mirafi 500X or approved suitable equivalent).

Proper grading and drainage of the subgrades is recommended to help limit potential frost action and improve pavement structure life and performance. Accumulation of water on pavement subgrades can be limited by grading the subgrade to a slope of at least 2 percent. Under-drains or adjacent drainage swales are recommended to drain the pavement subgrades and the subbase layer.

4.70 SITE PREPARATION AND CONSTRUCTION

4.70.1 Construction Dewatering

Construction dewatering will be required for surface water control and for excavations, which encounter perched groundwater conditions, particularly for the deeper excavations necessary to remove the fill soils. Surface water should be diverted away from and prevented from accumulating on exposed soil subgrades. The exposed soil subgrades will be susceptible to strength degradation in the presence of excess moisture. Surface water should be controlled with diversion berms, swales, and proper site grading.

Excavation dewatering should be implemented in conjunction with excavation work such that the work generally proceeds in the dry. Groundwater levels should be maintained below the proposed excavation bottom. It is anticipated that sump and pump methods of dewatering should generally be sufficient to control surface water and perched groundwater conditions, should they be encountered. The Contractor should consider excavating some test pits in advance of the construction to help determine the dewatering means and methods that will be required.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

4.70.2 Excavation for Spread Foundations, Grade Beams, and Pile Caps

Excavation for spread foundations, grade beams, and pile cap construction should be performed using a method which reduces disturbance to the subgrade soils, such as a backhoe equipped with a smooth blade bucket. Depending on the Owners selection of the foundation type as described above, the foundation elements should bear on suitable subgrade materials and any unsuitable soils encountered should be removed in their entirety. Any ridges or loose soil left by machine excavation should be manually trimmed and removed prior to constructing these structures. The proposed foundation bearing grades should be observed and evaluated by a representative of Empire, prior to placement of engineered fill and/or the foundation.

Subgrades for spread foundations, grade beam, and pile cap construction should be protected from precipitation and surface water. Water should not be allowed to accumulate on the soil subgrades and the subgrades should not be allowed to freeze, either prior to or after construction of foundations. If subgrades are not protected and degrade, they must be undercut/removed accordingly.

Where spread foundations are constructed directly on suitable subgrades, placement of a nominal 2 to 3-inch thick, lean concrete (f'c > 500 psi) "mud mat", following observation of the bearing grade, should be considered to protect the bearing grade where the foundation cannot be constructed on the same day the excavation is made, particularly during periods of wet or inclement weather.

Spread foundations, as well as grade beam and pile cap excavations should be backfilled as soon as possible and prior to construction of the superstructure. It is recommended that foundation excavations, within slab-on-grade and pavement areas be backfilled with a Structural Fill or Suitable Granular Fill, as recommended in Appendix B. Suitable on-site soils may be used for foundation backfill in exterior non-loaded landscape areas provided the on-site soil can be properly compacted as recommended in Appendix B.

4.70.3 Driven Pile Construction and Testing

The H-piles or pipe piles should be driven to absolute refusal, into the Shale and Gypsum bedrock, using a pile hammer having a suitable energy rating. The pile driving criteria should be confirmed by the contractor through the use of the wave equation, based on the actual pile, pile hammer and cushions that will be used, to determine the final driving criteria and that adequate stresses can be developed in the pile to confirm its capacity through dynamic testing and to determine that the pile will not be overstressed during driving. Pile stresses should not exceed 85% of

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

the pile yield stress. Plumbness of the piles should be maintained within 1% of the total length. Any misaligned or damage piles should be replaced.

Absolute refusal should be defined as when about 5 blows have been recorded for less than ¼ inch of pile penetration and the pile reaches the anticipated bedrock elevation. At least 3 to 4 random piles should be dynamically tested in accordance with *ASTM D 4945 – "Standard Test Method for High Strain Dynamic Testing of Piles"* to confirm the driving criteria and to evaluate that the pile capacity has been obtained with an adequate factor of safety (i.e. Factor of Safety of 2.0 or greater). The dynamic testing should also include piles which are suspect of not having been seated on bedrock. The piles should be tested both during the initial installation and after a minimum 48 hour set up period to verify relaxation at the pile tip does not occur.

A qualified individual should observe all pile driving and should prepare an individual pile driving report for each pile installed. The report should include, pile number and location, hammer and cushion types, pile size and material, installed length, blows per foot, unusual conditions encountered during driving, top of pile elevation following driving and notes on any necessary re-striking. Installed piles should be monitored for potential heaving during installation of adjacent piles. Any piles that heave should be re-driven and reseated as appropriate.

4.70.4 Subgrade Preparation for Slab-on-Grade and Pavement Construction

Existing vegetation, organic soils, and any other deleterious materials within the proposed pavement and slab-on-grade areas should be removed. Following stripping of the surface materials and any required excavation to the proposed subgrade, the exposed subgrades should thoroughly compacted and proof-rolled. The proof-rolling should be performed prior to any required fill placement, using a smooth drum roller weighing at least 7 tons. The roller should be operated in the static mode and complete at least two passes over the exposed subgrades.

The subgrade proof-rolling should be done under the guidance of, and observed by, a representative of Empire. Any areas which appear wet, loose, soft, unstable or otherwise unsuitable, should be undercut. Over excavation, which may be required as the result of the proof-rolling, should be performed based on evaluation of the conditions by Empire. Resulting over-excavations should be backfilled with a controlled Structural Fill as described in Appendix B.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

Suitable Granular Fill, as described in Appendix B, can be used as subgrade fill to raise the site grades, beneath the Subbase Stone course for the slab-on-grade and pavement construction. It is recommended that utility trenches located within the slab-on-grade and pavement areas be backfilled with controlled Structural Fill.

During construction the contractor should take precautions to limit construction traffic over the subgrades for the pavement construction. Any subgrades, which become damaged, rutted or unstable should be undercut and repaired as necessary prior to placement of the overlying fill courses.

5.00 CONCLUDING REMARKS

This report was prepared to assist in planning the design and construction of the proposed Medical Office Building, planned at 4100 Sheridan Drive, in Amherst, New York. The report has been prepared for the exclusive use of BHNT Architects, P.C., Siracuse Engineers, P.C., and other members of the design team, for specific application to this site and this project only.

The recommendations were prepared based on Empire Geo-Services, Inc.'s understanding of the proposed project, as described herein, and through the application of generally accepted soils and foundation engineering practices. No warranties, expressed or implied are made by the conclusions, opinions, recommendations or services provided.

Empire Geo-Services, Inc. should be informed of any changes to the planned construction so that it may be determined if any changes to the recommendations presented in this report are necessary. Empire Geo-Services, Inc. should also review final plans and specifications to verify that the recommendations were properly interpreted and implemented.

Important information regarding the use and interpretation of this report is presented in Appendix C.

Respectfully Submitted:

EMPIRE GEO-SERVICES, INC.

Thomas R. Seider, P.E.
Senior Geotechnical Engineer

TABLE I

- Split Spoon Sample
- Shelby Tube Sample
- Geoprobe Macro-Core
- Auger or Test Pit Sample
- Rock Core

TABLE II

Identification of soil type is made on basis of an estimate of particle sizes, and in the case of fine grained soils also on basis of plasticity.

Soil Type	Soil Particle Size	
Boulder	>12"	Coarse Grained (Granular)
Cobble	3" - 12"	
Gravel - Coarse	3" - 3/4"	
- Fine	3/4" - #4	
Sand - Coarse	#4 - #10	
- Medium	#10 - #40	
- Fine	#40 - #200	
Silt - Non Plastic (Granular)	<#200	Fine Grained
Clay - Plastic (Cohesive)		

TABLE III

The following terms are used in classifying soils consisting of mixtures of two or more soil types. The estimate is based on weight of total sample.

Term	Percent of Total Sample
"and"	35 - 50
"some"	20 - 35
"little"	10 - 20
"trace"	less than 10

(When sampling gravelly soils with a standard split spoon, the true percentage of gravel is often not recovered due to the relatively small sampler diameter.)

TABLE IV

The relative compactness or consistency is described in accordance with the following terms:

Granular Soils		Cohesive Soils	
Term	Blows per Foot, N	Term	Blows per Foot, N
Very Loose	0 - 4	Very Soft	0 - 2
Loose	4 - 10	Soft	2 - 4
Firm	10 - 30	Medium	4 - 8
Compact	30 - 50	Stiff	8 - 15
Very Compact	>50	Very Stiff	15 - 30
		Hard	>30

(Large particles in the soils will often significantly influence the blows per foot recorded during the penetration test)

TABLE V

Varved	Horizontal uniform layers or seams of soil(s).
Layer	Soil deposit more than 6" thick.
Seam	Soil deposit less than 6" thick.
Parting	Soil deposit less than 1/8" thick.
Laminated	Irregular, horizontal and angled seams and partings of soil(s).

TABLE VI

Rock Classification Term		Meaning
Hardness	- Soft	Scratched by fingernail
	- Medium Hard	Scratched easily by penknife
	- Hard	Scratched with difficulty by penknife
	- Very Hard	Cannot be scratched by penknife
Weathering	- Very Weathered	Judged from the relative amounts of disintegration, iron staining, core recovery, clay seams, etc.
	- Weathered	
	- Sound	

Rock Classification Term		Meaning	
Bedding	- Laminated	(<1")	Natural breaks in Rock Layers
	- Thin Bedded	(1" - 4")	
	- Bedded	(4" - 12")	
	- Thick Bedded	(12" - 36")	
	- Massive	(>36")	

(Fracturing refers to natural breaks in the rock oriented at some angle to the rock layers)

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

GENERAL INFORMATION & KEY TO SUBSURFACE LOGS

The Subsurface Logs attached to this report present the observations and mechanical data collected by the driller at the site, supplemented by classification of the material removed from the borings as determined through visual identification by technicians in the laboratory. It is cautioned that the materials removed from the borings represent only a fraction of the total volume of the deposits at the site and may not necessarily be representative of the subsurface conditions between adjacent borings or between the sampled intervals. The data presented on the Subsurface Logs together with the recovered samples provide a basis for evaluating the character of the subsurface conditions relative to the project. The evaluation must consider all the recorded details and their significance relative to each other. Often analyses of standard boring data indicate the need for additional testing or sampling procedures to more accurately evaluate the subsurface conditions. Any evaluation of the contents of this report and recovered samples must be performed by qualified professionals. The following information defines some of the procedures and terms used on the Subsurface Logs to describe the conditions encountered, consistent with the numbered identifiers shown on the Key opposite this page.

1. The figures in the Depth column define the scale of the Subsurface Log.

2. The Samples column shows, graphically, the depth range from which a sample was recovered. See Table I for descriptions of the symbols used to represent the various types of samples.

3. The Sample No. is used for identification on sample containers and/or Laboratory Test Reports.

4. Blows on Sampler - shows the results of the "Penetration Test", recording the number of blows required to drive a split spoon sampler into the soil. The number of blows required for each six inches is recorded. The first 6 inches of penetration is considered a seating drive. The number of blows required for the second and third 6 inches of penetration is termed the penetration resistance, N.

5. Blows on Casing - Shows the number of blows required to advance the casing a distance of 12 inches. The casing size, hammer weight, and length of drop are noted at the bottom of the Subsurface Log. If the casing is advanced by means other than driving, the method of advancement will be indicated in the Notes column or under the Method of Investigation at the bottom of the Subsurface Log. Alternatively, sample recovery may be shown in this column, or other data consistent with the column heading.

6. All recovered soil samples are reviewed in the laboratory by an engineering technician, geologist or geotechnical engineer, unless noted otherwise. Visual descriptions are made on the basis of a combination of the driller's field descriptions and noted observations together with the sample as received in the laboratory. The method of visual classification is based primarily on the Unified Soil Classification System (ASTM D 2487) with regard to the particle size and plasticity (See Table No. II), and the Unified Soil Classification System group symbols for the soil types are sometimes included with the soil classification. Additionally, the relative portion, by weight, of two or more soil types is described for granular soils in accordance with "Suggested Methods of Test for Identification of Soils" by D.M. Burmister, ASTM Special Technical Publication 479, June 1970. (See Table No. III). Description of the relative soil density or consistency is based upon the penetration records as defined in Table No. IV. The description of the soil moisture is based upon the relative wetness of the soil as recovered and is described as dry, moist, wet and saturated. Water introduced into the boring either naturally or during drilling may have affected the moisture condition of the recovered sample. Special terms are used as required to describe soil deposition in greater detail; several such terms are listed in Table V. When sampling gravelly soils with a standard two inch diameter split spoon, the true percentage of gravel is often not recovered due to the relatively small sampler diameter. The presence of boulders and large gravel is sometimes, but not necessarily, detected by an evaluation of the casing and sampler blows or through the "action" of the drill rig as reported by the driller.

7. Rock description is based on review of the recovered rock core and the driller's notes. Frequently used rock classification terms are included in Table VI.

8. The stratification lines represent the approximate boundary between soil types and the transition may be gradual. Solid stratification lines delineate apparent changes in soil type, based upon review of recovered soil samples and the driller's notes. Dashed lines convey a lesser degree of certainty with respect to either a change in soil type or where such change may occur.

9. Miscellaneous observations and procedures noted by the driller are shown in this column, including water level observations. It is important to realize the reliability of the water level observations depends upon the soil type (water does not readily stabilize in a hole through fine grained soils), and that any drill water used to advance the boring may have influenced the observations. The ground water level will fluctuate seasonally, typically. One or more perched or trapped water levels may exist in the ground seasonally. All the available readings should be evaluated. If definite conclusions cannot be made, it is often prudent to examine the conditions more thoroughly through test pit excavations or groundwater observation wells.

10. The length of core run is defined as the length of penetration of the core barrel. Core recovery is the length of core recovered divided by the core run. The RQD (Rock Quality Designation) is the total length of pieces of NX core exceeding 4 inches divided by the core run. The size core barrel used is also noted in the Method of Investigation at the bottom of the Subsurface Log.

APPENDIX B
FILL MATERIAL AND EARTHWORK RECOMMENDATIONS

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

APPENDIX B

FILL MATERIAL AND EARTHWORK RECOMMENDATIONS

I. Material Recommendations

A. Structural Fill

Structural Fill should consist of a crusher run stone, free of clay, organics and friable or deleterious particles. As a minimum, the crusher run stone should meet the requirements of New York State Department of Transportation, Standard Specifications, Item 304.12 – Type 2 Subbase, with the following gradation requirements.

Sieve Size Distribution	Percent Finer by Weight
2 inch	100
¼ inch	25-60
No. 40	5-40
No. 200	0-10

B. Subbase Stone

The subbase stone course placed as the aggregate course beneath the slab-on-grade construction should conform to the same material requirements as Structural Fill as stated above.

C. Suitable Granular Fill

Suitable soil material, well graded from coarse to fine, and classified as GW, GP, GM, SW, SP and SM soils using the Unified Soil Classification System (ASTM D-2487) and having no more than 85 percent by weight material passing the No. 4 sieve, no more than 20 percent by weight material passing the No. 200 sieve and which is generally free of particles greater than 6 inches, will be acceptable as Suitable Granular Fill. It should also be free of topsoil, asphalt, concrete rubble, wood, debris, clay and other deleterious materials. Suitable Granular Fill can be used as foundation backfill and as subgrade fill to raise site grades beneath slab-on-grade and pavement construction.

Material meeting the requirements of New York State Department of Transportation, Standard Specifications, Item 203.07 – Select Granular Fill or Item 203.20 Select Granular Subgrade is acceptable for use as Suitable Granular Fill.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

II. Placement and Compaction Requirements

All controlled fill placed beneath foundations, slab-on-grade construction, and beneath utilities should be compacted to a minimum of 95 percent of the maximum dry density as measured by the modified Proctor test (ASTM D1557). Fill placed in non-loaded grass areas can be compacted to a minimum of 90 percent of the maximum dry density (ASTM D1557).

Placement of fill should not exceed a maximum loose lift thickness of 6 to 9 inches with the exception of subbase courses beneath slab-on-grade and pavement construction, which can be placed in a single lift not exceeding 12 inches. The loose lift thickness should be reduced in conjunction with the compaction equipment used so that the required density is attained.

Fill should have a moisture content within two percent of the optimum moisture content prior to compaction. Subgrades should be properly drained and protected from moisture and frost. Placement of fill on frozen subgrades is not acceptable. It is recommended that all fill placement and compaction be monitored and tested by a representative of Empire Geo-Services, Inc.

III. Quality Assurance Testing

The following minimum laboratory and field quality assurance testing frequencies are recommended to confirm fill material quality and post placement and compaction conditions. These minimum frequencies are based on generally uniform material properties and placement conditions. Should material properties vary or conditions at the time of placement vary (i.e. moisture content, placement and compaction, procedures or equipment, etc.) Then additional testing is recommended. Additional testing, which may be necessary, should be determined by qualified geotechnical personnel, based on evaluation of the actual fill material and construction conditions.

A. Laboratory Testing of Material Properties

- Moisture content (ASTM D-2216) - 1 test per 4,000 cubic yards or no less than 2 tests per each material type.

- Grain Size Analysis (ASTM D-422) - 1 test per 4,000 cubic yards or no less than 2 tests per each material type.

- Liquid and Plastic Limits (ASTM D-4318) 1 test per 4,000 cubic yards or no less than 2 tests per each material type. Liquid and Plastic Limit testing is necessary only if appropriate, based on material composition (i.e. clayey or silty soils).

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

- Modified Proctor Moisture Density Relationship (ASTM D-1557) 1 test per 4,000 cubic yards or no less than 1 test per each material type. A maximum/minimum density relationship (ASTM D-4253 and ASTM D-4254) may be an appropriate substitute for ASTM D-1557 depending on material gradation.

B. Field In-Place Moisture/Density Testing (ASTM D-3017 and ASTM D-2922)

- Backfilling along trenches and foundation walls - 1 test per 50 lineal feet per lift.

- Backfilling Isolated Excavations (i.e. column foundations, manholes, etc.) 1 test per lift.

- Filling in open areas for slab-on-grade and pavement construction - 1 test per 2,500 square feet per lift.

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

APPENDIX C
GEOTECHNICAL REPORT LIMITATIONS

Attachment: Z-2022-07_application_092222 (26078 : Z-2022-07)

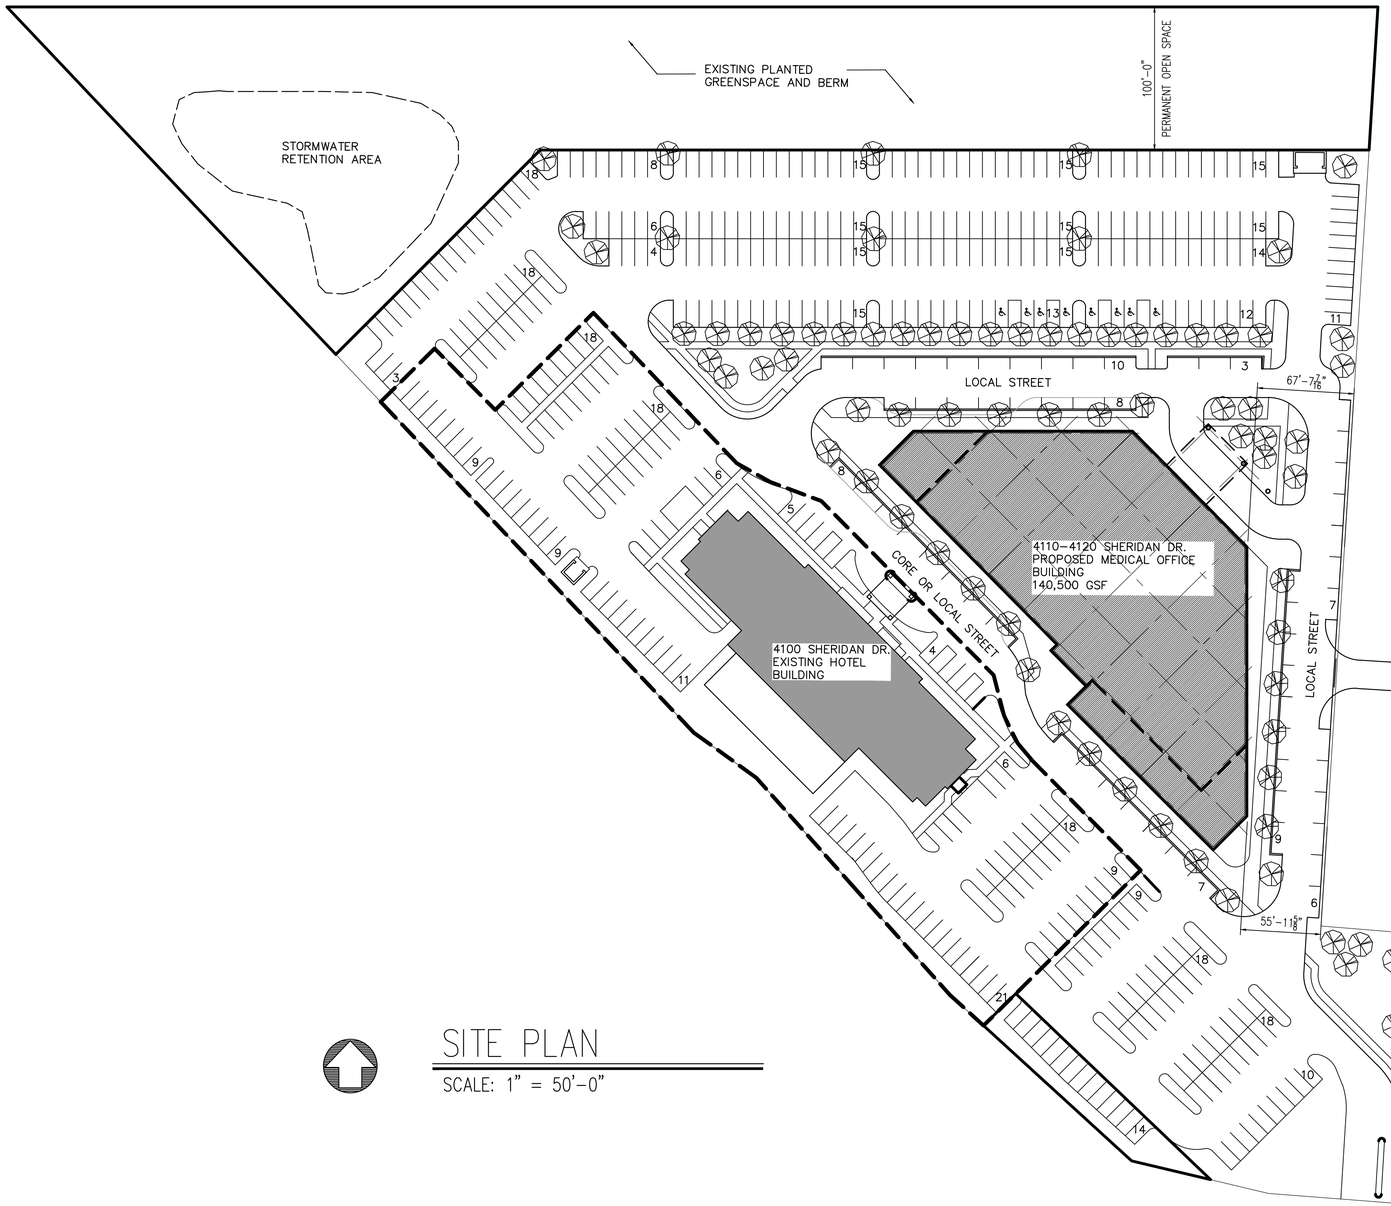
GEOTECHNICAL REPORT LIMITATIONS

Empire Geo-Services, Inc. (Empire) has endeavored to meet the generally accepted standard of care for the services completed, and in doing so is obliged to advise the geotechnical report user of our report limitations. Empire believes that providing information about the report preparation and limitations is essential to help the user reduce geotechnical-related delays, cost over-runs, and other problems that can develop during the design and construction process. Empire would be pleased to answer any questions regarding the following limitations and use of our report to assist the user in assessing risks and planning for site development and construction.

PROJECT SPECIFIC FACTORS: The conclusions and recommendations provided in our geotechnical report were prepared based on project specific factors described in the report, such as size, loading, and intended use of structures; general configuration of structures, roadways, and parking lots; existing and proposed site grading; and any other pertinent project information. Changes to the project details may alter the factors considered in development of the report conclusions and recommendations. *Accordingly, Empire cannot accept responsibility for problems which may develop if we are not consulted regarding any changes to the project specific factors that were assumed during the report preparation.*

SUBSURFACE CONDITIONS: The site exploration investigated subsurface conditions only at discrete test locations. Empire has used judgement to infer subsurface conditions between the discrete test locations, and on this basis the conclusions and recommendations in our geotechnical report were developed. It should be understood that the overall subsurface conditions inferred by Empire may vary from those revealed during construction, and these variations may impact on the assumptions made in developing the report conclusions and recommendations. *For this reason, Empire should be retained during construction to confirm that conditions are as expected, and to refine our conclusions and recommendations in the event that conditions are encountered that were not disclosed during the site exploration program.*

USE OF GEOTECHNICAL REPORT: Unless indicated otherwise, our geotechnical report has been prepared for the use of our client for specific application to the site and project conditions described in the report. *Without consulting with Empire, our geotechnical report should not be applied by any party to other sites or for any uses other than those originally intended.*



CHANGES IN SITE CONDITIONS: Surface and subsurface conditions are subject to change at a project site subsequent to preparation of the geotechnical report. Changes may include, but are not limited to, floods, earthquakes, groundwater fluctuations, and construction activities at the site and/or adjoining properties. *Empire should be informed of any such changes to determine if additional investigative and/or evaluation work is warranted.*

MISINTERPRETATION OF REPORT: The conclusions and recommendations contained in our geotechnical report are subject to misinterpretation. *To limit this possibility, Empire should review project plans and specifications relative to geotechnical issues to confirm that the recommendations contained in our report have been properly interpreted and applied.*

Subsurface exploration logs and other report data are also subject to misinterpretation by others if they are separated from the geotechnical report. This often occurs when copies of logs are given to contractors during the bid preparation process. *To minimize the potential for misinterpretation, the subsurface logs should not be separated from our geotechnical report and the use of excerpted or incomplete portions of the report should be avoided.*

OTHER LIMITATIONS: Geotechnical engineering is less exact than other design disciplines, as it is based partly on judgement and opinion. For this reason, our geotechnical report may include clauses that identify the limits of Empire's responsibility, or that may describe other limitations specific to a project. These clauses are intended to help all parties recognize their responsibilities and to assist them in assessing risks and decision making. Empire would be pleased to discuss these clauses and to answer any questions that may arise.

DRAFT (9/22/22)
TOWN OF AMHERST
PLANNING BOARD
ZONING RESOLUTION
Z-2022-07

PETITIONER

Sheridan Commons, LLC
c/o Sean Hopkins
Hopkins Sorgi & McCarthy PLLC
5500 Main Street, Suite 343
Williamsville, NY 14221

PROPERTY LOCATION

4110-4120 Sheridan Drive

WHEREAS the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on the proposed rezoning of land from General Business (GB) to Deep Corridor District 5, and

WHEREAS the Planning Board has reviewed plans and other materials regarding the rezoning proposal, and

WHEREAS the materials and plans have been referred to the Town's various review agencies, and

WHEREAS in accordance with Section 8-3-5 of the Zoning Ordinance the Planning Board finds that:

A. The proposed zoning and development plan **is** generally consistent with the policies of the Comprehensive Plan and the Zoning Ordinance.

B. The proposal is consistent with the Conceptual Land Use Plan which shows "Commercial/Mixed-Use" land use in this area of the Town.

C. The proposal **is** consistent with Section 3.3.2, "Commercial and Mixed Use" because the subject parcel is large, located directly adjacent to a major commercial corridor and is in close proximity to single family residential uses as is common amongst suburban corridors appropriate for mixed use development.

D. There are adequate services and utilities available or proposed to be made available in the construction of the development.

E. The proposal is compatible with the present zoning and conforming uses of nearby property and with the character of the neighborhood.

F. The subject property is suitable for uses permitted by the current versus the proposed district however, the Bicentennial Comprehensive Plan designates this subject area as appropriate for mixed use zoning districts.

Attachment: Z-2022-07_draft resolution_092222 (26078 : Z-2022-07)

DRAFT (9/22/22)
TOWN OF AMHERST
PLANNING BOARD
ZONING RESOLUTION
Z-2022-07

PETITIONER	PROPERTY LOCATION
Sheridan Commons, LLC	4110-4120 Sheridan Drive

G. The proposed change does tend to improve the balance of uses, or meet**s** a specific demand in the Town.

H. Review by the US Army Corps of Engineers under Section 404 of the Clean Water Act may be waived because the parcel is developed.

WHEREAS pursuant to Local Law #3-82, as amended, the Planning Board recommends that the Town Board determine that the requirements of SEQR are complete and that the subject proposal is not expected to have a significant adverse effect on the environment.

NOW THEREFORE BE IT RESOLVED that the Planning Board recommends to the Town Board in accordance with Section 8-3-4 of the Zoning Ordinance, that the rezoning request be approved subject to the following conditions:

1. Maintain 100 buffer on entire north property line including the retention pond and existing woods & provide supplemental landscaping.
2. No building foundations constructed closer than _____ feet to the north property line.
3. No building foundations constructed closer than _____ feet to the east property line.
4. Any buildings constructed on the site be limited to 65 feet in height.

The foregoing resolution was adopted by the Town of Amherst Planning Board, _____; moved by - _____; seconded by - _____; ayes _, noes _; absent - ____.

TO BE COMPLETED BY APPLICANT

1. **Petitioner:** Name: Sheridan Commons LLC

Address: c/o Sean Hopkins, Esq., Hopkins Sorgi & McCarthy PLLC
5500 Main Street, Suite 343
Williamsville, New York 14221
City State Zip Code

Phone: 510-4338 Fax:

E Mail shopkins@hsmlegal.com

2. **The undersigned hereby petitions the Honorable Town Board to rezone the following described property**

From: GB District

To: DC-5 District

3. **Street address of land to be rezoned:** (must be verified by Town Assessor's Office)

4110-4120 Sheridan Drive

SBL #: SBL No. 68.09-5-1.21

4. **Area of land to be rezoned** (in acres): 6.27 Acres

5. **Owner of Land:**

Name: Sheridan Commons LLC c/o Sean Hopkins, Esq.

Address: 5500 Main Street, Suite 343, Williamsville, NY 14221

Telephone: 716.510-4338

6. **Representative** (Architect, Engineer, Landscape Architect, Surveyor or Attorney):

Name: Sean W. Hopkins, Esq.

Address: 5500 Main Street, Suite 343
Williamsville, New York 14221
Tel: 716.510-4338 - E-mail: shopkins@hsmlegal.com
City State Zip Code

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

7. **Petitioner's interest in property** [Note: Authorization Letter of the Property Owner attached as Exhibit "1" of this Rezoning Application.]

_____ Option to purchase

__X__ Owner

_____ Other (explain)

8. **The following are all others having an interest in this application and join herein with the petitioner named above:** (describe extent of interest; attach sheets as needed)

Not Applicable.

9. **Attach Survey and Legal description of land to be rezoned. The Survey must be prepared by a New York State Licensed Land Surveyor.** Legal description of property to be rezoned from GB to DC-5 is attached as Exhibit "3" and a reduced size copy of the Survey of the Project Site is attached as Exhibit "4". Full size copy of the Survey is also attached.

10. **Said property has the following deed restrictions or Covenants:** (attach copy) - Copy of the Declaration of Restrictions recorded on September 18, 1997 is attached as Exhibit as Exhibit "7".

Liber 10921 Page 3979

[Note: The Applicant is seeking to remove the Declaration of Restrictions simultaneously with seeking to amend the zoning classification of the Project Site from GB to DC-5.]

11. **Information on proposed project:**

A. Description of the character of the proposed development:

See Exhibit 5.

B. Rationale for rezoning request:

1. Why was this site chosen?

See Exhibit 5.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

2. Why cannot land be used with the existing zoning?

See Exhibit 5.

3. How will this rezoning impact surrounding properties?

See Exhibit 5.

4. How will this rezoning impact the school system?

See Exhibit 5.

12. Quantitative Data:

A. Total # of dwelling units: Not Applicable

B. Distribution of dwelling units by type: Not Applicable

C. Gross Residential Density per acre: Not Applicable

D. Total amount of Open Space: 2.09 Acres

E. Proposed Non-Residential Floor Area: 140,500 sq. ft.

[Note: A reduced size copy of the Concept Site Plan [Drawing C-100] for the proposed project prepared by Kideney Architects is provided at Exhibit "8" and a full size copy is also attached.]

13. Development Schedule:

Start: To be Determined

Finish: To be Determined

Stages (# of): 1

14. If any portion of the proposed development is planned to be sold or leased, please describe:

The office space will be leased to tenants.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

15. Open Space ownership and maintenance provisions (if applicable):

Greenspace and landscaping will be privately owned and maintained.

16. Basis for Findings (Sec. 8-3-5 of the Town Zoning Code) (Attach sheets and supplemental materials as necessary.)

A. The proposed zoning and development plan must be generally consistent with the policies of the Comprehensive Plan and the Town Zoning Ordinance.

1. State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps, and/or figures in the plan that support the proposed zoning at this location (The Comprehensive Plan document is available at the Planning Department, Town Clerk's Office, Amherst libraries, or at www.amherst.ny.us). Add sheets as needed.

See Exhibit 6.

2. Pursuant to NYS Town Law Section 272a(11), "all Town land use regulations must be in accordance with a comprehensive plan adopted pursuant to this Section." The Town Board adopted the Comprehensive Plan pursuant to NYS Town Law 272 on January 2, 2007. If the rezoning is approved, the Town Board may require the Plan to be amended, as applicable.

Cite all text, map, and / or figures that must be amended to support the proposed zoning at this location (attach pages as necessary) and provide detailed suggested amendments.

See Exhibit 6.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

3. State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

See Exhibit 6.

B. Adequate Services and Utilities are available or are proposed to be made available with the construction of the development:

1. Sanitary Sewer
   Yes.
2. Storm Sewer/Drainage
   Yes.
3. Water
   Yes.
4. Other Yes.

C. Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

See Exhibit 6.

D. Suitability of the subject property for uses permitted by the current versus the proposed district:

See Exhibit 6.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

E. Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

See Exhibit 6.

17. The petitioner encloses herewith the sum of $ 1,215.00 to pay the fee, and consents to the placement of a sign(s) at the described location identifying this request for a period of time to be determined by the Town Clerk.

18. The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

[Note: Authorization Letter of Property Owner signed attached as Exhibit "1".]

My Commission Expires 01/14/20

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.

5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Medical Office Project		
Project Location (describe, and attach a general location map): 4110-4120 Sheridan Drive [SBL No. 68.09-1-5-1.21] - Town of Amherst - Erie County		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed office project consisting of a 4-story medical office building consisting of 140,500 sq. ft. and and related site improvements. The proposed action includes an amendment of the zoning classification of 6.27 acres of 4110-4120 Sheridan Drive ("Project Site") from GB to DC-5 and a request to remove a Declaration of Restrictions imposed in connection with a rezoning approved by the Town Board in 1996. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the medical office building and all related site improvements including parking spaces, access aisles, landscaping, lighting, water and sanitary sewer lines as well as utility connections. The heavily vegetated Permanent Open Space along the northern edge the Project Site will remain undisturbed [approximately 2.09] acres will not be disturbed and will remain zoned GB. Given that the proposed project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it includes a commercial building with a size of more than 100,000 sq. ft.		
Name of Applicant/Sponsor: Sheridan Commons LLC c/o Sean Hopkins, Esq.	Telephone: 716.510-4338 E-Mail: shopkins@hsmlegal.com	
Address: 5500 Main Street, Suite 343		
City/PO: Williamsville	State: NY	Zip Code: 14221

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town Board - Rezoning and	July 18, 2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Planning Board - Site Plan Approval	To be Determined
c. City, Town or Village Zoning Board of Appeals ☐Yes ☑No		
d. Other local agencies ☑Yes ☐No	Building Dept - Building Permit; Eng. Dept. - Stormwater Per. & DSCA; AIDA - Potential PILOT	To be Determined
e. County agencies ☑Yes ☐No	ECWA - Water and RPZ	To be Determined
f. Regional agencies ☐Yes ☑No		
g. State agencies ☑Yes ☐No	NYSDEC - SPDES and DSCA	To be Determined
h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.

i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☐Yes ☑No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):

NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
General Business District ("GB")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? Deep Corridor 5 ("DC-5")

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department

d. What parks serve the project site?
There are various Town parks located in relative close proximity to the Project Site.

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Office Space.

b. a. Total acreage of the site of the proposed action? 8.36 acres
b. Total acreage to be physically disturbed? 6.27 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 8.36 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____ year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

f. Does the project include new residential uses? ☐Yes ☑No
If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑Yes ☐No
If Yes,
i. Total number of structures 1
ii. Dimensions (in feet) of largest proposed structure: 65 ft. height; TBD width; and TBD length
iii. Approximate extent of building space to be heated or cooled: 140,500 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? [Existing stormwater facility location on the northwest portion of the Project Site will be utilized for stormwater management purposes.] ☐Yes ☑No
If Yes,
i. Purpose of the impoundment:
ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐Other specify:
iii. If other than water, identify the type of impounded/contained liquids and their source.
iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: _____ acres
v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length
vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐Yes ☑No
If Yes:
i .What is the purpose of the excavation or dredging?
ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?
- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐Yes ☐No
If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres
vi. What is the maximum area to be worked at any one time? _____ acres
vii. What would be the maximum depth of excavation or dredging? _____ feet
viii. Will the excavation require blasting? ☐Yes ☐No
ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐Yes ☑No
If Yes:
i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☑No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 14,500 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☐No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 14,500 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst Consolidated Sanitary Sewer District
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

- Do existing sewer lines serve the project site? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

_____

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: A Traffic Impact Study is being prepared by SRF Associates for the purpose of evaluating the potential traffic impacts for the proposed project.] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐Morning ☐Evening ☐Weekend ☐Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: To be Determined

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other): National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☑No

l. Hours of operation. Answer all items which apply.

i. During Construction:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: To be Determined
- Holidays: To be Determined

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed medical office project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

On-site lighting will comply with the Town's stringent lighting standards and a Photometric Plan will be required in connection with the Site Plan Application review process for the development of the Project Site.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☑ Yes ☐ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☑ Yes ☐ No

If Yes:

i. Describe proposed treatment(s):

Use of pesticides may occur in connection with maintenance of greenspace and landscaping but will only be utilized if applied by licensed applicator.

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☑ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☑ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☑ Yes ☐ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: The future medical tenant(s) may generate hazardous medical waste that will be properly disposed of any required by the NYS Department of Health requirements.

ii. Generally describe processes or activities involving hazardous wastes or constituents: See above.

iii. Specify amount to be handled or generated TBD tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: Not applicable.

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☑ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility: _____

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): Motor Service and I-290

ii. If mix of uses, generally describe:

There are a wide assortment of land uses in the vicinity of Project with various zoning classifications.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	0	4.9	4.9
• Forested	2.09	2.09	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	6.27	0	(6.27)
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	0	1.37	1.37

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

c. Is the project site presently used by members of the community for public recreation? ☐Yes ☑No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☐Yes ☐No
If Yes,
i. Identify Facilities:

e. Does the project site contain an existing dam? ☐Yes ☑No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐Yes ☑No
If Yes:
i. Has the facility been formally closed? ☐Yes ☐No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐Yes ☑No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐Yes ☑No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐Yes ☐No

☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☑Yes ☐No
If yes, provide DEC ID number(s): C915291

iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):
The Project Sponsor is not aware of status of the above referenced site relative to the NYSDEC Environmental Site Remediation database.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

v. Is the project site subject to an institutional control limiting property uses? ☐Yes ☐No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐Yes ☐No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >5 ft. feet

b. Are there bedrock outcroppings on the project site? ☐Yes ☑No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____%

c. Predominant soil type(s) present on project site: _____ _____%
_____ _____%
_____ _____%

d. What is the average depth to the water table on the project site? Average: _____ feet

e. Drainage status of project site soils: ☐ Well Drained: _____% of site
☐ Moderately Well Drained: _____% of site
☐ Poorly Drained _____% of site

f. Approximate proportion of proposed action site with slopes: ☑ 0-10%: 100 % of site
☐ 10-15%: _____% of site
☐ 15% or greater: _____% of site

g. Are there any unique geologic features on the project site? ☐Yes ☑No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐Yes ☑No

ii. Do any wetlands or other waterbodies adjoin the project site? [There are no an wetlands subject to the jurisdiction of either the NYSDEC or USACE on the Project Site.] ☑Yes ☐No
If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑Yes ☐No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐Yes ☑No
If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐Yes ☑No

j. Is the project site in the 100-year Floodplain? ☐Yes ☑No

k. Is the project site in the 500-year Floodplain? ☐Yes ☑No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐Yes ☑No
If Yes:

i. Name of aquifer: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☐ Yes ☑ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

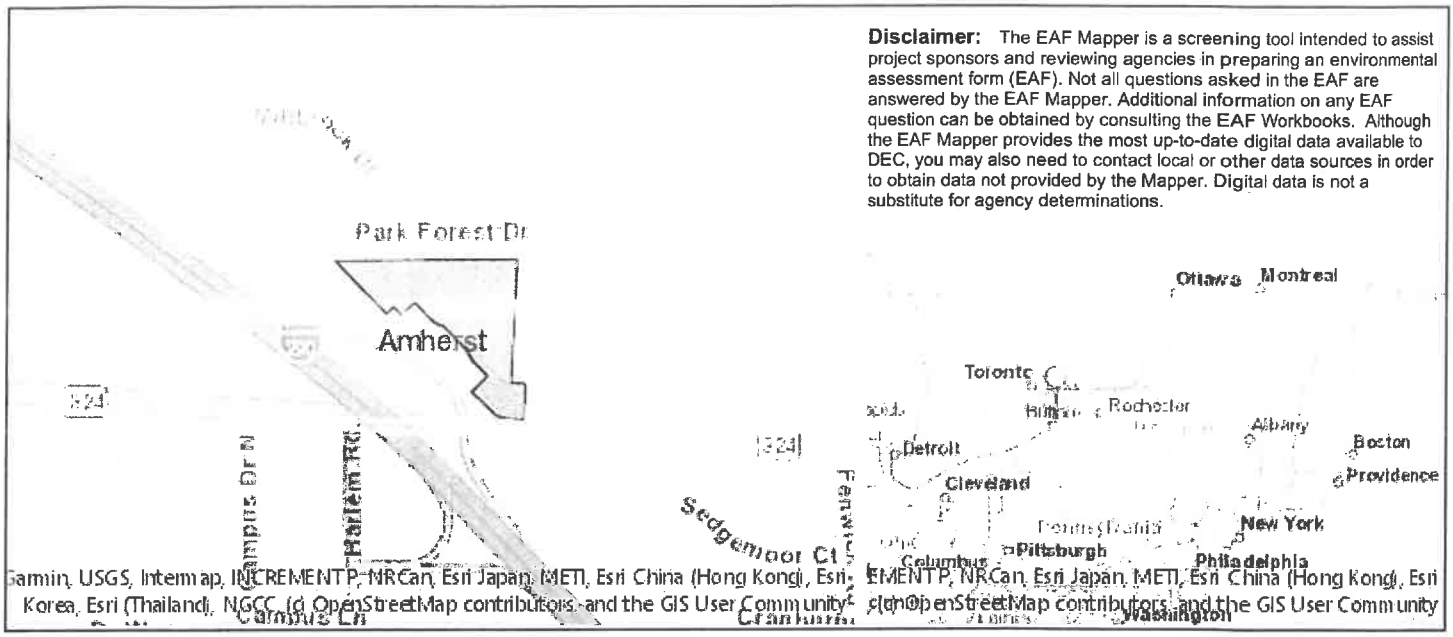
F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.



Applicant/Sponsor Name Sheridan Commons LLC Date July 18, 2022

Rezoning of 4110-4120 Sheridan Drive and
Removal of Declaration of Restrictions
TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Odessa Silt Loam	Severe	Severe	Severe	Severe	Moderate
Schoharie Silt Loam	Moderate	Moderate	Moderate	Moderate	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   x Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? □ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? □ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? □ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: □ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project TBD
   Source: Traffic Impact Study being prepared by SRF Associates and will be submitted upon completion.

8. Will blasting occur during construction? □ Yes ☒ No

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes □ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    14,500 average flow 58,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? □ Yes ☒ No

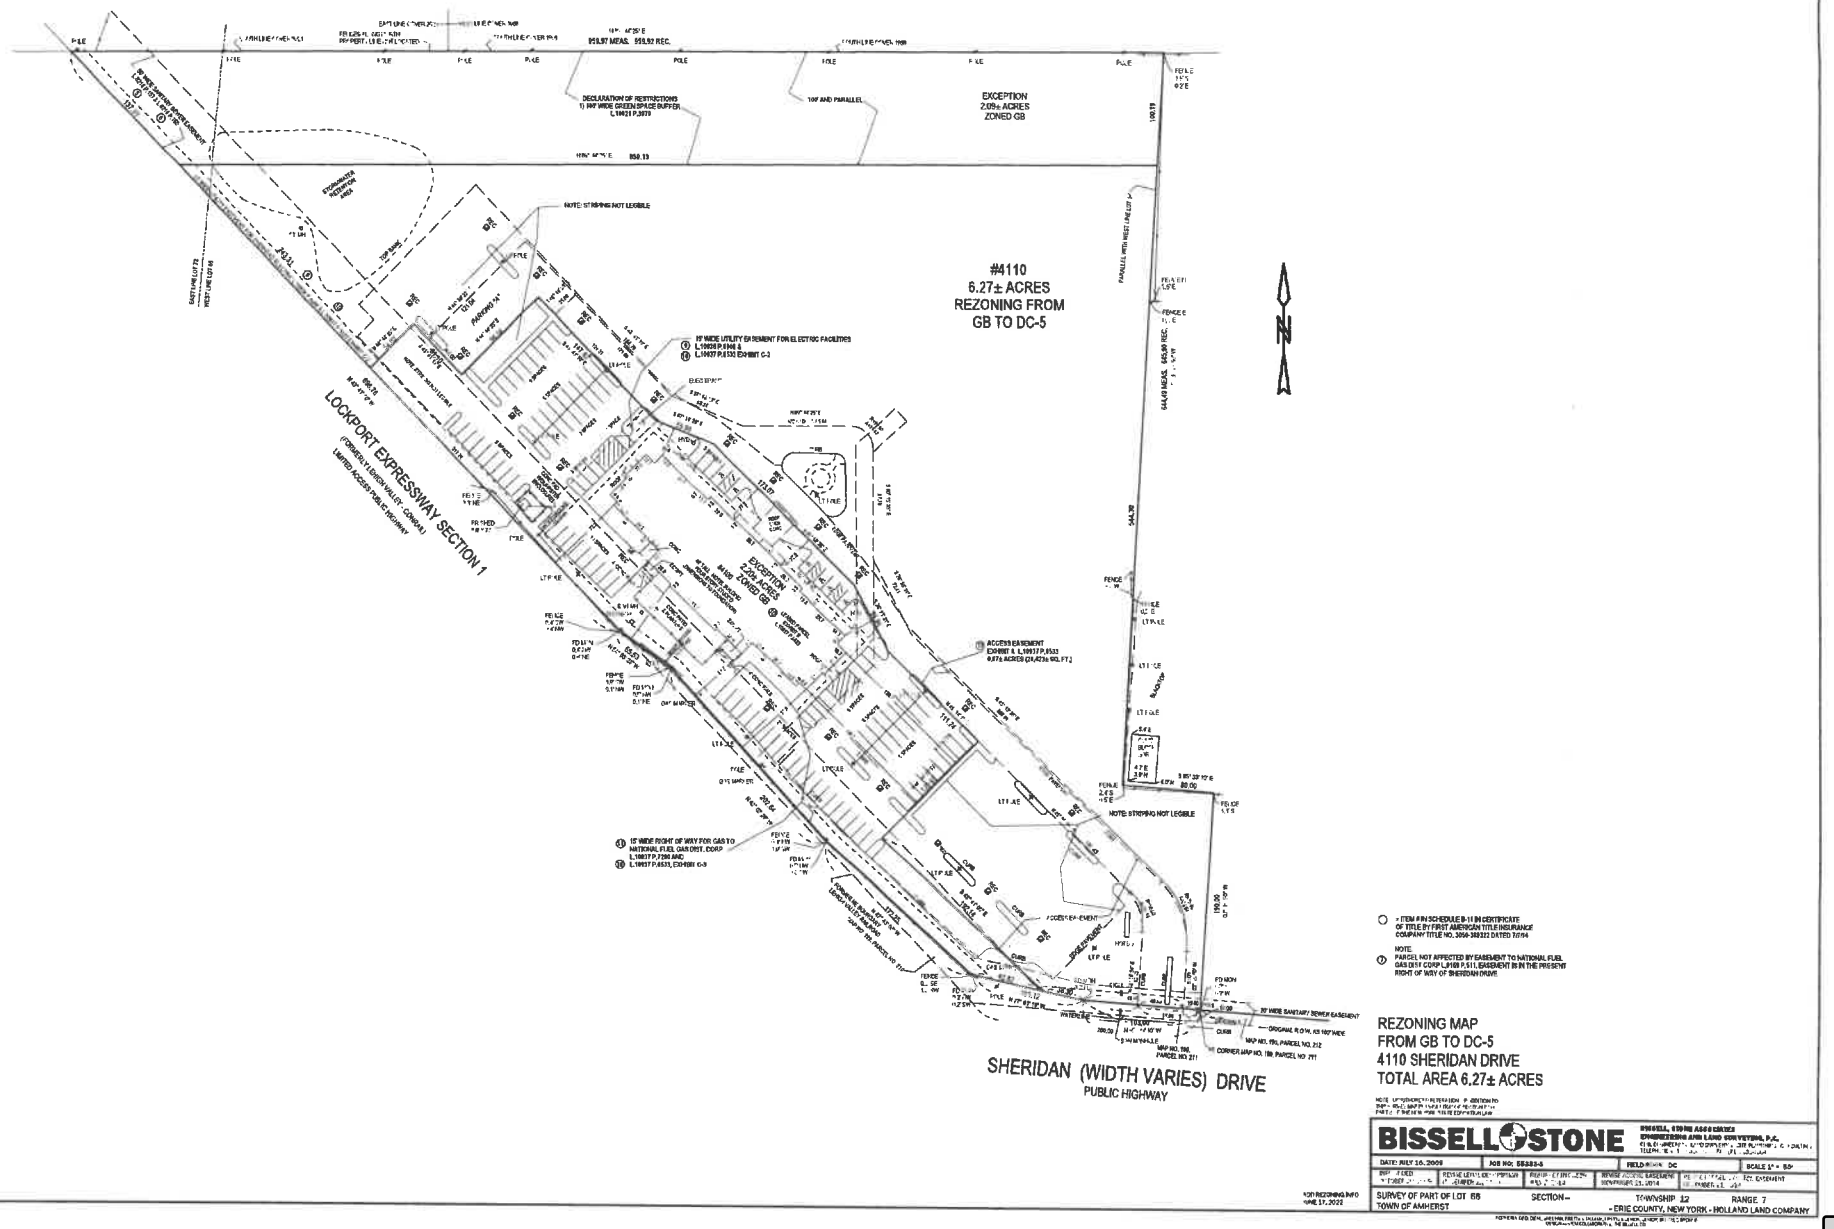
Exhibit 3 – Legal Description of Property to be Rezoned from GB to DC-5

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

EXHIBIT 3 OF APPLICATION TO REMOVE DECLARATION OF RESTRICTIONS IMPOSED IN CONNECTION WITH REZONING DECISION

LEGAL DESCRIPTION OF PORTION OF 4110-4120

PORTION OF 4110-4120 SHERIDAN DRIVE:



ALL THAT TRACT OR PARCEL OF LAND, SITUATE IN THE TOWN OF AMHERST, COUNTY OF ERIE AND STATE OF NEW YORK, BEING PART OF LOT NOS. 72 AND 66, TOWNSHIP 12, RANGE 7 OF THE HOLLAND LAND COMPANY'S SURVEY, MORE PARTICULARLY BOUNDED AND DESCRIBED AS FOLLOWS:

Commencing at a point which is the following courses and distances from the intersection of the northerly line of Sheridan Drive, as a 100 foot highway and the former northeast boundary of the Lehigh Valley Railroad right of way; (a) running thence easterly along the northerly line of Sheridan Drive as a 100 foot highway, a distance of 200 feet to a point; thence (b) north 03° 16' 50" east a distance of 10 feet to the beginning of the parcel herein described; thence north 85° 33' 10" west, and along the northerly boundary of said Sheridan Drive, a distance of 103.00 feet to a point; thence north 77° 01' 19" west, and along the northerly boundary of said Sheridan Drive, a distance of 38.30 feet to a point; thence north 46° 41' 05" west a distance of 192.14 feet to a point; thence north 44° 44' 25"" east a distance of 120.65 feet to a point; thence north 45° 14' 15" west a distance of 111.74 feet to a point; thence north 26° 55' 31"" west a distance of 65.86 feet to a point; thence north 45° 15' 35" west a distance of 173.07 feet to a point; thence north 67° 16' 29"" west a distance of 55.69 feet to a point; thence north 43° 41' 10" west a distance of 147.82 feet to a point; thence south 44° 44' 25"" west a distance of 96.04 feet to a point; thence north 43° 41' 10"" west a distance of 61.10 feet to a point; thence south 44° 44' 25"" west a distance of 54.02 feet to a point; thence north 43° 41' 10" west a distance of 243.31 feet to a point; thence north 89° 44' 25"" east a distance of 859.13 feet to a point; thence south 03° 16' 50" west a distance of 544.30 feet to a point; thence south 85° 33' 10" east a distance of 80.00 feet to a point; thence south 03° 16' 50" west a distance of 190.00 feet to the point and place of beginning and containing 6.27 acres, more or less.

EXHIBIT 5

RESPONSES TO QUESTION 11 OF APPLICATION TO REMOVE DECLARATION OF RESTRICTIONS IMPOSED IN CONNECTION WITH A REZONING DECISION

DEVELOPMENT OF 4100-4220 SHERIDAN DRIVE

Question 11(A): Description of the character of the proposed development:

Response to Question 11(A): The proposed project will be upscale in character and will feature a four-story building on the property at 4100-4120 Sheridan Drive ("Project Site"). The Petitioner is seeking to remove a Declaration of Restrictions imposed by the Town Board on July 7, 1997 in connection with a rezoning of the parcel that then consisted of 4100 Sheridan Drive, which includes the existing parcel at 4100-4120 Sheridan Drive from Commercial Services District ("CS") to General Business District ("GB"). A copy of correspondence issued by the Town Clerk's Office on July 10, 1997 setting forth the zoning conditions imposed by the Town Board on July 7, 1997 is attached as **Exhibit "9"** and a copy of the Declaration of Restrictions as recorded at the Erie County Clerk's Office in accordance with the rezoning decision of the Town Board on September 18, 1997 is attached as **Exhibit "7"**.

Condition No. 3 as imposed by the Town Board on July 7, 1997 stated as follows: "Any office buildings to be constructed on this site will be to a maximum height of 48 feet, including the stair and utility towers." The Petitioner is seeking to construct a four-story upscale office building on the Project Site with a height of up to 65 ft. Color Conceptual Elevation Plans [Drawing A201 and A202] as prepared by Kideney Architects are attached as **Exhibit "10"** of this Application.

The proposed project will be consistent with the character of the existing hotel on the Project Site and surrounding land uses in the vicinity that include automotive dealerships directly

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

to east of the Project Site and a used automotive dealership on the south side of Sheridan Drive in the vicinity of the Project Site. Landscaping will be provided pursuant to a Landscape Plan to be prepared by a licensed landscape architect during the Site Plan Application review stage of the project and the landscaping will feature numerous trees, bushes and shrubs.

Question 11(B)(1): Rationale for rezoning request: 1. What was this site chosen?

Response to Question 11(B)(1): The Project Site is an appropriate location for the proposed project given the character and scale of nearby land uses. It is also important to mention that the Project Site is designated as appropriate for "Suburban Center" development per Figure 6-A of the Comprehensive Plan. A color copy of Figure 6-A is attached as **Exhibit "9"**.

Question 11(B)(2): Why cannot land be used with the existing zoning?

Response to Question 11(B)(2): Not applicable. A response to Questions 11(B)(2) is included within Exhibit "5" of the Rezoning Application and supporting documentation simultaneously filed in connection with the proposed project.

Question 11(B)(3): How will this rezoning impact surrounding properties?

Response to Question 11(B)(3): The proposed project will not result in any significant adverse impacts on surrounding properties. As mentioned previously, the vegetated 100 ft. of Permanent Open Space located on the northern portion of the Project Site zoned GB will remain undisturbed.

Question 11(B)(4): How will this rezoning impact the school system?

Response to Question 11(B)(4): The proposed project will result in positive fiscal impacts for the Sweet Home Central School District since it will result in substantial annual school taxes revenues without any demand for educational services.

RESPONSES TO QUESTION 16 OF APPLICATION TO REMOVE DECLARATION OF RESTRICTIONS

4100-4120 SHERIDAN DRIVE FROM GB TO DC-5

Question 16(A)(1): **State in detail why the proposed zoning is consistent with the adopted Town of Amherst Bicentennial Comprehensive Plan. Cite specific sections, maps and/or figures in the plan that support the proposed zoning at this location.**

Response to Question 16(A)(1): The request to amend the remove the Declaration of Restrictions imposed by the Town Board on July 7, 1997 being requested to accommodate the proposed development of a portion of 4100-4120 Sheridan Drive (the "***Project Site***") is consistent with the adopted Bicentennial Comprehensive Plan. The Town of Amherst adopted the Bicentennial Comprehensive Plan in January of 2007 after completing a lengthy planning process that included numerous public meetings and public hearings involving the Comprehensive Plan Advisory Committee, the Planning Board and the Town Board.[1] In December of 2020, the Town Board most recently adopted amendments to the Bicentennial Comprehensive Plan. The Comprehensive Plan is intended to guide future growth and redevelopment in the Town.

Figure 6-A of the adopted Bicentennial Comprehensive Plan is the titled Commercial and Mixed-Use Designations and it depicts the Project Site as being designated as "Suburban Center".

[1] A copy of the resolution adopted by the Town Board on January 2, 2007 for the purpose of adopting the Bicentennial Comprehensive Plan pursuant to Town Law Section 272-a is included at the beginning of the Comprehensive Plan. This resolution recites the lengthy planning history that incorporated numerous opportunities for public input as well as a coordinated environmental review pursuant to SEQRA that involved the preparation a Generic EIS and the issuance of a Findings Statement.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

The Project Site is located within the University Place geographic location per Figure 6-A of the Comprehensive Plan. A copy of Figure 6 of the Comprehensive Plan is provided at **Exhibit "10"**.

Question 16(A)(2): Cite all text, map, and/or figures that must be amended to support the proposed zoning at this location and provide detailed suggested amendments.

Response to Question 16(A)(2): The proposed project does not require an amendment to the Bicentennial Comprehensive Plan.

Question 16(A)(3): State why the proposed zoning is consistent with intent and objectives (Sec. 1-2-2) of the Zoning Ordinance:

Response to Question 16(A)(3): Section 1-2-1 of the Zoning Code is titled "Purpose" and it states as follows:

> *"The purpose of this Zoning Ordinance and the intent of the legislative authority in its adoption is to promote the environment of the town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, building coverage and location of structures; by regulating and limiting population density; and for the aforesaid purposes, to divide the land within the limits of the town into districts of such number and dimensions generally consistent with the policies of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Ordinance."*

The proposed project is consistent with the "Purpose" of the Zoning Code. Section 1-2-2 of the Zoning Code sets forth the objectives of the Zoning Code. This section of the Zoning Code lists thirteen objectives that are discussed below as follows:

A. To protect the character and values of residential, institutional and public uses, business, commercial and manufacturing uses and to insure their orderly and beneficial development;

Response: The proposed project will be consistent with the objective of protecting the character and value of existing land uses. The requested removal of the Declaration

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

of Restrictions will allow the Project Site to be utilized as an upscale four-story office building project, which represents orderly and beneficial development.

B. To provide adequate open spaces for light, air and outdoor uses to include public, common and private open space areas;

Response: The proposed project will not be inconsistent with this objective.

C. To prevent overcrowding of land;

Response: The proposed project will not result in the overcrowding of land. The project is consistent with the type of development designated as appropriate for the Project Site per Figure 6-A of the adopted Comprehensive Plan.

D. To prevent excessive concentration of population and to prevent spare and uncoordinated development;

Response: The proposed project will not result in excessive concentration of population and represents an example of coordinated development. The project will require Site Plan Approval from the Planning Board.

E. To regulate and control the location and spacing of buildings on the lot and in relation to the surrounding property generally consistent with the policies of the Comprehensive Plan.

Response: The responses to the Questions in this **Exhibit "6"** of the Application set forth the reasons the proposed rezoning is consistent with the policies of the Comprehensive Plan.

F. To protect persons and property from damage and injury due to fire or flood;

Response: The Site Plan Application review process will trigger the need for an Engineer's Report and SWPPP prepared by a licensed engineer to be prepared for review and approval by the Town's Engineering Department. The proposed project will not increase the likelihood of damage and injury due to fire and flood. The proposed four-story office building will be constructed per the stringent requirements of the NYS Building Code including the fire safety standards contained therein.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

G. To preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only.

Response: The proposed project will not be inconsistent with this objective. There are not significant natural features located on the previously disturbed portion of the Project Site to be developed.

H. To assure that structure and land use arrangements are aesthetically harmonious with nearby areas and structures.

Response: The development of the Project Site in a manner generally consistent with the Concept Site Plan [Drawing SP01] prepared by Kideney Architects will be aesthetically harmonious with nearby areas and structures. Color Conceptual Elevation Plans depicting a proposed four-story office building as prepared by Kideney Architects are attached as **Exhibit "11"**.

I. To regulate the location of buildings and intensity of uses in relation to streets according to plans so as to cause the least interference with and be damaged least by traffic movements and hence result in lessened street congestion and improved public safety.

Response: The proposed project will utilize the existing driveway onto Sheridan Drive, which is the only available access to the roadway network in the vicinity of the Project Site.

J. To establish zoning patterns that insure economical extensions for sewers, water supply waste disposal and other public utilities, as well as development of recreation, schools and other public facilities;

Response: The Project Site has access to sanitary sewer and water lines as well as necessary public utilities to service the proposed project.

K. To guide the future development of the town so as to being the gradual conformity of land, structures and uses generally consistent with the policies of the Comprehensive Plan.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

Response: The proposed project is consistent with this objective since the development of the Project Site in manner generally consistent with the attached Concept Site Plan prepared by Kideney Architects is consistent the policies contained in the Comprehensive Plan.

L. To accomplish the specific intents and goals set forth in the introduction to the respective sections.

Response: The proposed project will be consistent with this objective.

M. To protect the community from visual pollution resulting from the unregulated use of signs and other advertising devices.

Response: The proposed project will not be inconsistent with this objective.

Question 16(C): Compatibility with the present zoning and conforming uses of nearby property and with the character of the neighborhood:

Response to Question 16(C): The proposed project will be compatible with the present zoning and conforming uses of nearby properties and the character of the neighborhood.

Question 16(D): Suitability of the subject property for uses permitted by the current versus the proposed district:

Response to Question 16(D): Not applicable.

Question 16(E): Whether the proposed change tends to improve the balance of uses, or meets a specific demand in the Town:

Response to Question 16(D): The proposed project will have positive impacts on the balance of uses in the Town by providing a high quality office building designed for occupancy by medical users. It is important to mention that the Petitioner will be required to present the architectural plans for the proposed project to the Town's Design Advisory Board for its issuance of a recommendation to the Planning Board in connection with the future Site Plan Application review process.

DECLARATION OF RESTRICTIONS

WHEREAS, 4100 SHERIDAN DRIVE, L.L.C. is the sole owner of property referred to herein in Exhibit A, attached hereto and made a part hereof. Said parcel being situated in the Town of Amherst, County of Erie and State of New York, and being identified as 4100 SHERIDAN DRIVE, L.L.C., and

WHEREAS, 4100 SHERIDAN DRIVE, L.L.C. is the successor in interest to 428 CO., INC. and now holds legal title to the property described in Exhibit A, and

WHEREAS, the Town of Amherst approved the rezoning of said property and adopted a resolution approving said rezoning at their meeting on July 7, 1997 subject to the following restrictions:

1. Maintenance of a 100 foot wide green-space buffer along the entire northerly line of the property, including the retention of existing woods. The developer will provide additional fill-in trees or other suitable landscaping within the buffer area.

2. No building foundation will be constructed closer than 175 feet to the northerly property line, nor will any building foundation be constructed closer than 75 feet from the eastern property line.

3. Any office buildings to be constructed on this site will be to a maximum height of 48 feet, including the stair and utility towers.

4. Hotel construction will be located along the westerly property line and will set back a minimum of 330 feet from the said northerly property line.

5. The height of the hotel shall be restricted to a maximum overall height of 55 feet including the stair and utility towers.

The above restrictions shall be binding on 4100 SHERIDAN DRIVE, L.L.C., their successors and assigns and shall run with the land except that the above-described descriptions can be changed, modified or eliminated only by majority vote of the Town Board of Amherst, New York.

Gentlemen:

The Amherst Town Board, at their meeting held July 7, 1997, approved your request to rezone property at 4100 Sheridan Drive from CS to GB. This approval was granted subject to the following conditions:

1. Maintenance of a 100 foot wide green-space buffer along the entire northerly line of the property, including the retention of existing woods. The developer will provide additional fill-in trees or other suitable landscaping within the buffer area.

2. No building foundation will be constructed closer than 175 feet to the northerly property line, nor will any building foundation be constructed closer than 75 feet from the eastern property line.

3. Any office buildings to be constructed on this site will be to a maximum height of 48 feet, including the stair and utility towers.

4. Hotel construction will be located along the westerly property line and will be set back a minimum of 330 feet from the said northerly property line.

5. The height of the hotel shall be restricted to a maximum overall height of 55 feet including the stair and utility towers.

Thank you for your continued interest in our community.

Comprehensive Plan

The Conceptual Land Use Plan is intended to communicate the overall direction and concept of future development. While it is not a zoning map and does not show the existing or proposed use of individual parcels, it is intended to show land use relationships, provide a generalized guide for future development, and establish a context for detailed area planning and design.

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project: Proposed Medical Office Project		
Project Location (describe, and attach a general location map): 4110-4120 Sheridan Drive [SBL No. 68.09-1-5-1.21] - Town of Amherst - Erie County		
Brief Description of Proposed Action (include purpose or need): The proposed project consists of a proposed office project consisting of a 4-story medical office building consisting of 140,500 sq. ft. and and related site improvements. The proposed action includes an amendment of the zoning classification of 6.27 acres of 4110-4120 Sheridan Drive ("Project Site") from GB to DC-5 and a request to remove a Declaration of Restrictions imposed in connection with a rezoning approved by the Town Board in 1996. The proposed action has been defined broadly to include all required discretionary approvals required from the municipal boards of the Town of Amherst and involved agencies as well as the construction of the medical office building and all related site improvements including parking spaces, access aisles, landscaping, lighting, water and sanitary sewer lines as well as utility connections. The heavily vegetated Permanent Open Space along the northern edge the Project Site will remain undisturbed [approximately 2.09] acres will not be disturbed and will remain zoned GB. Given that the proposed project ("action") will not result in any potentially significant adverse environmental impacts, the issuance of a negative declaration pursuant to SEQRA is appropriate. The action is a Type I action pursuant to SEQRA (6 NYCRR Part 617.4) since it includes a commercial building with a size of more than 100,000 sq. ft.

h. Federal agencies ☐Yes ☑No		

i. Coastal Resources.
i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☐Yes ☑No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):
NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
General Business District ("GB")

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? Deep Corridor 5 ("DC-5")

C.4. Existing community services.

a. In what school district is the project site located? Sweet Home Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Volunteer Fire Department

d. What parks serve the project site?
There are various Town parks located in relative close proximity to the Project Site.

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Office Space.

b. a. Total acreage of the site of the proposed action? 8.36 acres
b. Total acreage to be physically disturbed? 6.27 acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 8.36 acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☐ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☐ Yes ☑ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated _____
- Anticipated commencement date of phase 1 (including demolition) _____ month _____ year
- Anticipated completion date of final phase _____ month _____year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

f. Does the project include new residential uses? ☐Yes ☑No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☑Yes ☐No

If Yes,

i. Total number of structures 1

ii. Dimensions (in feet) of largest proposed structure: 65 ft. height; TBD width; and TBD length

iii. Approximate extent of building space to be heated or cooled: 140,500 square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? [Existing stormwater facility location on the northwest portion of the Project Site will be utilized for stormwater management purposes.] ☐Yes ☑No

If Yes,

i. Purpose of the impoundment:

ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐Other specify:

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: _____ acres

v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite) ☐Yes ☑No

If Yes:

i .What is the purpose of the excavation or dredging?

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards):
- Over what duration of time?

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐Yes ☐No

If yes, describe.

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐Yes ☐No

ix. Summarize site reclamation goals and plan:

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐Yes ☑No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☑No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 14,500 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: ECWA Consolidated Water District
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☑Yes ☐No

iii. Will line extension within an existing district be necessary to supply the project? ☐Yes ☑No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☐No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 14,500 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):
Sanitary wastewater.

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst Consolidated Sanitary Sewer District
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

- Do existing sewer lines serve the project site? ☑Yes ☐No
- Will a line extension within an existing district be necessary to serve the project? ☐Yes ☑No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: _____

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐Yes ☑No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑Yes ☐No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or _____ acres (impervious surface)

_____ Square feet or _____ acres (parcel size)

ii. Describe types of new point sources. _____

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

- If to surface waters, identify receiving water bodies or wetlands: _____
- Will stormwater runoff flow to adjacent properties? ☐Yes ☑No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐Yes ☑No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐Yes ☑No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐Yes ☑No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐Yes ☐No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? [Note: A Traffic Impact Study is being prepared by SRF Associates for the purpose of evaluating the potential traffic impacts for the proposed project.] ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐Weekend
☐ Randomly between hours of _____ to _____.

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing _____ Proposed _____ Net increase/decrease _____

iv. Does the proposed action include any shared use parking? ☐Yes ☐No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☐Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☐Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☐Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____
To be Determined

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
National Grid

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☑No

l. Hours of operation. Answer all items which apply.

i. During Construction:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: As Needed
- Holidays: Not Applicable

ii. During Operations:

- Monday - Friday: 7:00 a.m. to 7:00 p.m.
- Saturday: 7:00 a.m. to 5:00 p.m.
- Sunday: To be Determined
- Holidays: To be Determined

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

There will be temporary and unavoidable short-term noise impacts resulting from the use of construction equipment during the construction of the proposed medical office project.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe: _____

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

On-site lighting will comply with the Town's stringent lighting standards and a Photometric Plan will be required in connection with the Site Plan Application review process for the development of the Project Site.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe: _____

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☑ Yes ☐ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures: _____

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored _____

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities: _____

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☑ Yes ☐ No

If Yes:

i. Describe proposed treatment(s):

Use of pesticides may occur in connection with maintenance of greenspace and landscaping but will only be utilized if applied by licensed applicator.

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☑ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☐ Yes ☑ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: _____ tons per _____ (unit of time)
- Operation : _____ tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: _____
- Operation: _____

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: _____
- Operation: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☑ Yes ☐ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

The future medical tenant(s) may generate hazardous medical waste that will be properly disposed of any required by the NYS Department of Health requirements.

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

See above.

iii. Specify amount to be handled or generated TBD tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

Not applicable.

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☑ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): Motor Service and I-290

ii. If mix of uses, generally describe:

There are a wide assortment of land uses in the vicinity of Project with various zoning classifications.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	0	4.9	4.9
• Forested	2.09	2.09	0
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	6.27	0	(6.27)
• Agricultural (includes active orchards, field, greenhouse etc.)	0	0	0
• Surface water features (lakes, ponds, streams, rivers, etc.)	0	0	0
• Wetlands (freshwater or tidal)	0	0	0
• Non-vegetated (bare rock, earth or fill)	0	0	0
• Other Describe: Greenspace and Landscaping	0	1.37	1.37

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

c. Is the project site presently used by members of the community for public recreation? ☐Yes ☑No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☐Yes ☐No
If Yes,
i. Identify Facilities:

e. Does the project site contain an existing dam? ☐Yes ☑No
If Yes:
i. Dimensions of the dam and impoundment:
- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐Yes ☑No
If Yes:
i. Has the facility been formally closed? ☐Yes ☐ No
- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

iii. Describe any development constraints due to the prior solid waste activities: _____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐Yes ☑No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐Yes ☐No
☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☑Yes ☐No
If yes, provide DEC ID number(s): C915291

iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):
The Project Sponsor is not aware of status of the above referenced site relative to the NYSDEC Environmental Site Remediation database.

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

v. Is the project site subject to an institutional control limiting property uses? ☐Yes ☐No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐Yes ☐No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? >5 ft. feet

b. Are there bedrock outcroppings on the project site? ☐Yes ☑No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____%

c. Predominant soil type(s) present on project site: _____ _____%
_____ _____%
_____ _____%

d. What is the average depth to the water table on the project site? Average: _____ feet

e. Drainage status of project site soils: ☐ Well Drained: _____% of site
☐ Moderately Well Drained: _____% of site
☐ Poorly Drained _____% of site

f. Approximate proportion of proposed action site with slopes: ☑ 0-10%: 100 % of site
☐ 10-15%: _____% of site
☐ 15% or greater: _____% of site

g. Are there any unique geologic features on the project site? ☐Yes ☑No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐Yes ☑No

ii. Do any wetlands or other waterbodies adjoin the project site? [There are no an wetlands subject to the jurisdiction of either the NYSDEC or USACE on the Project Site.] ☑Yes ☐No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☑Yes ☐No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐Yes ☑No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐Yes ☑No

j. Is the project site in the 100-year Floodplain? ☐Yes ☑No

k. Is the project site in the 500-year Floodplain? ☐Yes ☑No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐Yes ☑No
If Yes:

i. Name of aquifer: _____

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

m. Identify the predominant wildlife species that occupy or use the project site:
Typical suburban species

n. Does the project site contain a designated significant natural community? ☐Yes ☑No
If Yes:
i. Describe the habitat/community (composition, function, and basis for designation):
ii. Source(s) of description or evaluation:
iii. Extent of community/habitat:
- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No
If Yes:
i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No
If Yes:
i. Species and listing:

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No
If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No
If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No
i. If Yes: acreage(s) on project site?
ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No
If Yes:
i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No
If Yes:
i. CEA name:
ii. Basis for designation:
iii. Designating agency and date:

Attachment: Z-1996-32A_application_092222 (26077 : Z-1996-32A)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☐ Yes ☑ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

EAF Mapper Summary Report

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	Yes
E.1.h.iii [Within 2,000' of DEC Remediation Site - DEC ID]	C915291
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	Yes
E.2.h.iii [Surface Water Features]	Yes - Digital mapping information on local and federal wetlands and waterbodies is known to be incomplete. Refer to EAF Workbook.
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No

Rezoning of 4110-4120 Sheridan Drive and
Removal of Declaration of Restrictions
TOWN OF AMHERST ATTACHMENT
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Odessa Silt Loam	Severe	Severe	Severe	Severe	Moderate
Schoharie Silt Loam	Moderate	Moderate	Moderate	Moderate	Moderate

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   _x_ Geotechnical report attached _____ Not applicable

   [Note: Three copies of the Geotechnical Report have been submitted to the Planning Department].

3. Is your property located: On Youngs Road between Dodge and Klein Roads? □ Yes x No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? □ Yes x No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? □ Yes x No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

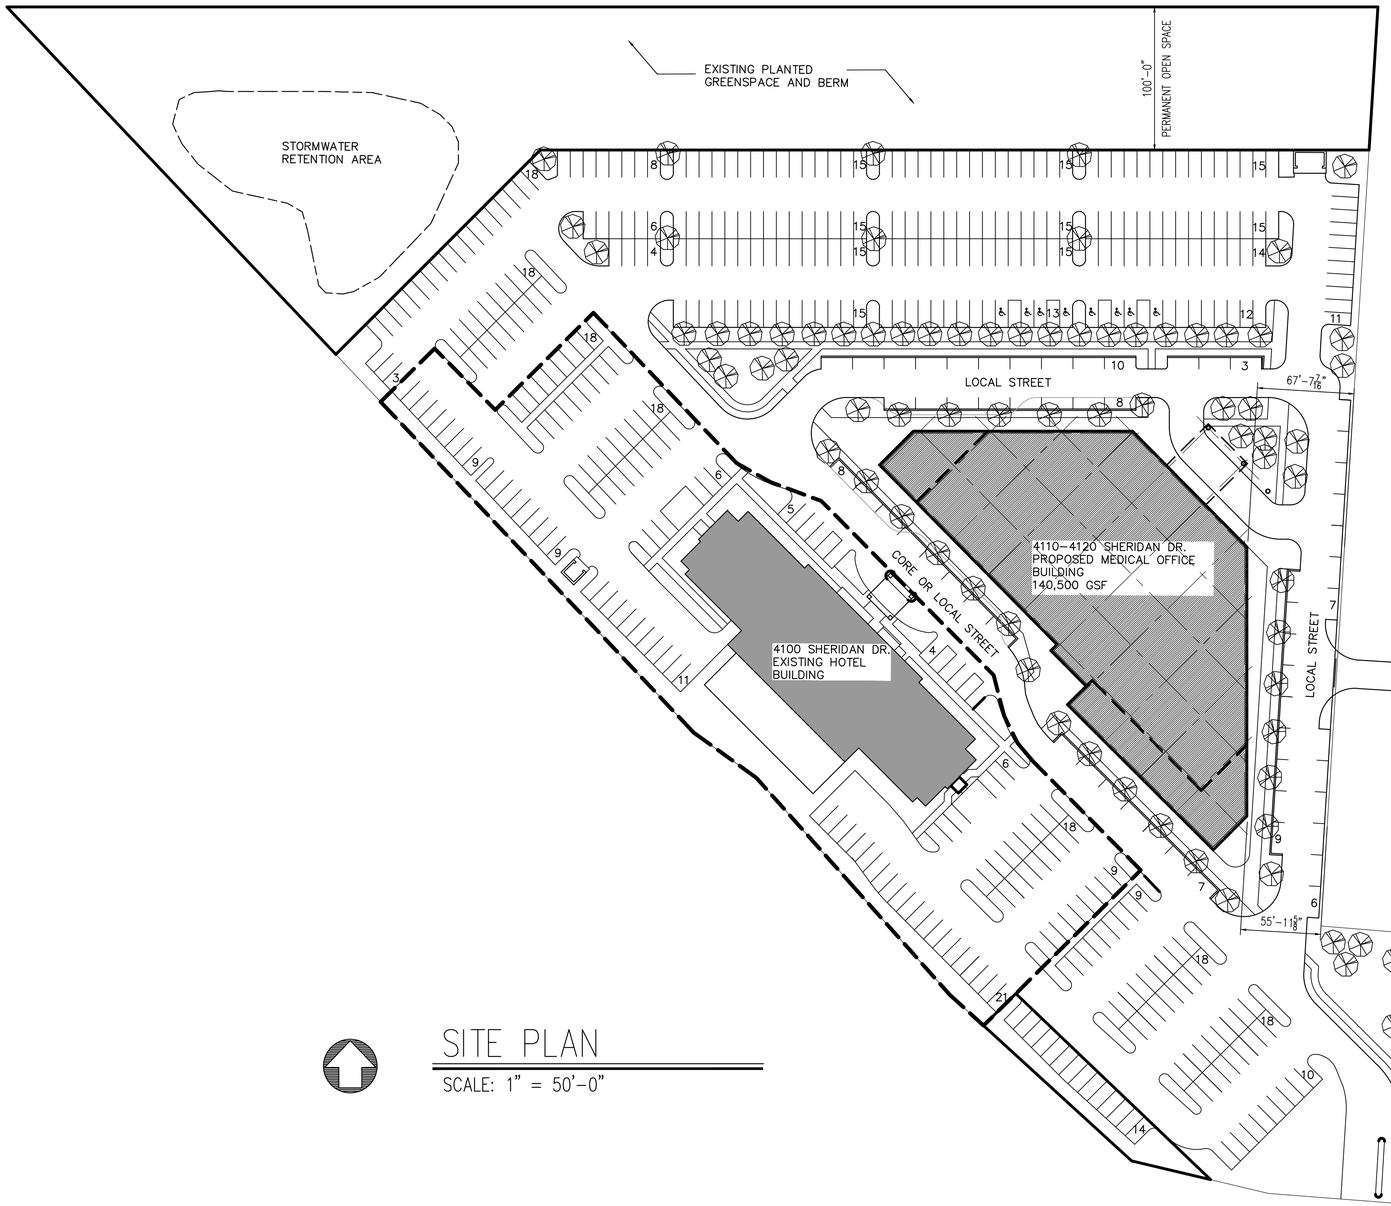
   Not Applicable.

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: □ Yes ☒ No
   Describe: Not Applicable.

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project TBD
   Source: Traffic Impact Study being prepared by SRF Associates and will be submitted upon completion.

8. Will blasting occur during construction? □ Yes ☒ No



9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes □ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    14,500 average flow 58,000 gpd peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? □ Yes ☒ No

WHEREAS the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on the Request to remove a Declaration of Restrictions imposed as part of a rezoning decision, and

WHEREAS the Planning Board has reviewed plans and other materials regarding the rezoning proposal, and

WHEREAS the materials and plans have been referred to the Town's various review agencies, and

WHEREAS in accordance with Section 8-3-5 of the Zoning Ordinance the Planning Board finds that:

A. The proposed zoning and development plan is generally consistent with the policies of the Comprehensive Plan and the Zoning Ordinance.

B. There are adequate services and utilities available or proposed to be made available in the construction of the development.

C. The proposal is compatible with the present zoning and conforming uses of nearby property and with the character of the neighborhood.

D. The proposed change does tend to improve the balance of uses, or meets a specific demand in the Town.

WHEREAS pursuant to Local Law #3-82, as amended, the Planning Board recommends that the Town Board determine that the requirements of SEQR are complete and that the subject proposal is not expected to have a significant adverse effect on the environment.

NOW THEREFORE BE IT RESOLVED that the Planning Board recommends to the Town Board in accordance with Section 8-3-4 of the Zoning Ordinance, that the relief of a deed restriction imposed by a zoning decision be **approved** subject to the following conditions:

PLANNING BOARD ITEM (ID # 26192)

The Amherst Urban Renewal Agency's Boulevard Central District Urban Renewal Plan, SR-2022-05

Town of Amherst, Petitioner

The Boulevard Central District Urban Renewal Plan provides a framework for the potential revitalization and redevelopment of various properties located in what the Town Board, as the Amherst Urban Renewal Agency (AURA), has designated as an Urban Renewal Area in accordance with Article 15 of the General Municipal Laws of New York State.

Brian Kulpa, Town Supervisor, explained the proposal and was available to answer questions from the Board.

No further comments were heard on this proposal. The hearing was closed.

Following discussion, Ms. Penberthy moved to approve the request based on the resolution. The motion was seconded by Mr. Giuliani and carried. Ayes 5, Noes 0, Absent 2 (Kahn, Raffaele).

1. EXTENT AND PURPOSE OF THE BOULEVARD CENTRAL DISTRICT URBAN RENEWAL PLAN

This Town of Amherst Boulevard Central District Urban Renewal Plan (the "Plan") provides a framework for the potential revitalization and redevelopment of various properties located in what the Town Board, as the Urban Renewal Agency (the "Agency" or "AURA"), has designated as an Urban Renewal Area in accordance with Article 15 of the General Municipal Laws of New York State by resolution dated June 27, 2022. The Boulevard Central District Urban Renewal Area (the "Urban Renewal Area") is within a larger area designated by the Town as the Boulevard Central District. The boundaries of the Urban Renewal Area are described in Exhibit A and shown on Map 1: Boulevard Central District Urban Renewal Area (Exhibit B). The Urban Renewal Area includes approximately 194.9 acres with 60 properties.

This Plan puts particular focus on addressing the Boulevard Mall and immediately adjacent properties, which the Agency has determined to be the main driver of economic underdevelopment, underutilization, stagnation, and blight. This focus includes approximately 62 acres and 8 properties as shown in Exhibit B.

The Town envisions the Boulevard Mall site being transformed incrementally into a walkable, mixed-use, transit-oriented development serving contemporary retail commercial demands while creating a new, thriving "center" for the local community and the greater region. Establishing this Boulevard Central District Urban Renewal Area provides the foundation for this vision to come to fruition.

The provisions of this Urban Renewal Plan, described in the following sections, are based on the requirements for a redevelopment plan set forth in Article 15 of the General Municipal Laws of New York State. In enacting Article 15, the State Legislature stated:

> *There exist in many municipalities within this state residential, non-residential, commercial, industrial or vacant areas, and combinations thereof, which are slum or blighted, or which are becoming slum or blighted areas because of substandard, insanitary, deteriorated or deteriorating conditions, factors, and characteristics, with or without tangible physical blight. The existence of such areas constitutes a serious and growing menace, is injurious to the public safety, health, morals and welfare, contributes increasingly to the spread of crime, juvenile delinquency and disease, necessitates excessive and disproportionate expenditures of public funds for all forms of public service and constitutes a negative influence on adjacent properties impairing their economic soundness and stability, thereby threatening the source of public revenues.*[1]

The Town of Amherst Town Board, in 1) creating the Town of Amherst Urban Renewal Agency, 2) designating the Urban Renewal Area, and 3) formulating a Plan for this Urban Renewal Area, is taking steps that will stem the decline of the Boulevard Central District, and by revitalizing and redeveloping the Urban Renewal Area, will return the Boulevard Central District to its place as a leading commercial and residential corridor in the Town and region.

[1] N.Y. Gen. Mun. Law § 501 (McKinney).

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

2. DESCRIPTION OF THE BOULEVARD CENTRAL DISTRICT URBAN RENEWAL AREA

The boundaries of the Urban Renewal Area established by the Town are described in Exhibit A and shown in Exhibit B. The Urban Renewal Area includes approximately 194.9 acres with 60 properties in need of redevelopment. The focus in the Boulevard Mall area includes approximately 62 acres and 8 properties.

Located on the western boundary of the Town, the Boulevard Mall has long served as a local and regional commercial center for the Town. The Mall is located in the southeastern corner of the intersection of Niagara Falls Boulevard and Maple Road. It is essentially a large block bordered by Niagara Falls Boulevard on the west, Alberta Drive on the east, Maple Road on the north, and Almeda Avenue on the south. Opened in 1962 as the first indoor shopping center in the Buffalo area, the Mall thrived along with the Town largely due to its location near strong residential neighborhoods, access to a major inter-county arterial, the University at Buffalo North Campus, and proximity to the Canadian border, helping the Boulevard Mall become the central point of a thriving commercial corridor.

Like similar properties regionally and nationally, changing demographics and shopping habits have posed financial challenges for commercial enterprises, setting the stage for revitalization of the Mall and surrounding areas. The Western New York Region is currently seeing vacancy rates for retail space of over 20%. While big box retailers like Walmart, Target, Tops and Wegmans have held steady, many of the retail locations that depend on in line retailers of both national and local types have experienced major challenges. Most new retail development is being constructed with standalone structures. Other regional malls such as the Walden Galleria in the Town of Cheektowaga, the Eastern Hills Mall in the Town of Clarence, and the McKinley Mall in the Town of Hamburg have all had little investment, have been recently sold at auctions for drastically lower Assessed Values, or have been defaulting on loans.

Several anchor stores at the Boulevard Mall are closed and many well-known stores have left. Some have moved just down the street to newer, more updated open-air spaces while others are completely leaving the area. As a result, the Mall is faced with rising vacancy rates, and more marginal stores. The vast surface parking lots that surround the Mall, containing little to no landscaping, were constructed to accommodate a fully occupied, auto-oriented, regional mall destination. These now sit nearly empty at many times of the day.

The Urban Renewal Area is located within the Town's only federally designated Opportunity Zone which is coterminous with U.S. Census Bureau Tract 92, on the western portion of Town. This area of Town is also known as the Boulevard Central District ("BCD"), an approximately 1,260-acre triangular area bounded by Niagara Falls Boulevard (US Route 62) on the west, the Interstate (I-290) on the north and east, and Sheridan Drive (NYS Route 324) on the south (including some parcels directly south of Sheridan) as shown in Exhibit C.

Emblematic of the decline in the BCD are the assessed valuations and vacancy rates for the affected properties. From 2009 to today, the Assessed Value of the mall property has decreased from $61,281,200 in 2009 to $18,286,812 in 2022. This is a $40,958,492 reduction of 62.37%. The Equalized Full Market Value has decreased from $61,281,200 in 2009 to $24,711,908 in 2022. Reductions have been a result of the vacancies and loss of anchor retailers such as Sears, Macy Men's, Buy Buy Baby, plus many in line retailers. It is anticipated that current owners under Tax Certiorari Agreements will request additional reductions. These reductions all impact the Taxable Assessed Values in the Town of Amherst, Sweet Home Schools, and Erie County, which creates increased tax rates with less taxable value to spread the Tax Levy against.

Total revenue from current rents and leases within the mall decreased from $15,070,346 in 2016 to $4,265,297 in 2019, a 71.6% decline. In 2018 the mall was approximately 74.6% occupied, but in 2020 that had decreased by 7.1% to approximately 69.3% occupied.

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

A. The Boulevard Central District Action Plan

Recognizing the arising need, revitalization of the BCD has been under consideration for some time by the Town. The Town and the Boulevard Central District have seen a great deal of development and investment over the past few decades as they continued to grow. In recent years though, the Town has undergone a fundamental transition from a growing community to one that is mature and largely built out, resulting in more redevelopment of blighted and underutilized properties rather than new greenfield development. Although the BCD has become the Town's largest concentrated commercial area and contains some very economically successful development sites, it also contains many large "big box" stores and strip plazas that are aging and underutilized. It also contains the large parcel that houses the Boulevard Mall, which has recently been experiencing significant decline.

The BCD today exhibits characteristics typical of suburban development found throughout New York and the surrounding Western New York region. Commercial areas such as this have been developed with primarily single-use office or retail uses surrounded by large surface parking lots. A sparse network of street thoroughfares (including Niagara Falls Boulevard, Maple Road, Sweet Home Road, Bailey Avenue, and Sheridan Drive) carry all of the area traffic. As changing market trends of online shopping, new technologies, and work-from-home options have emerged, this area has begun to deteriorate and impact the Town's tax base due to the need for less physical office and retail space.

There is a growing consensus around transforming the built environment through redevelopment of existing commercial areas and street redesign to better serve community needs and improve safety as well as economic outcomes. To be proactive, the Town focused revitalization goals and efforts within the BCD. To support these efforts, the Town created the Boulevard Central District Action Plan (the "Action Plan").

This Urban Renewal Plan builds on the Boulevard Central District Action Plan, prepared by the Town in cooperation with neighborhood stakeholders. The Action Plan, which includes the Urban Renewal Area, was evaluated under the New York State Environmental Quality Review Act (SEQRA) for environmental impacts. The Town Board prepared a Generic Environmental Impact Statement (GEIS) that evaluated a projected growth scenario and the cumulative environmental impacts of that growth over a 20-year period. The Town Board approved the GEIS and the Findings Statement in January 2020. As one of the first steps in implementing the Action Plan, most commercial properties within the BCD were recently rezoned applying the Town's new Mixed-Use Zoning Districts. This replaced the single use-based provisions with a more form-based zoning approach, and an important foundational step in the area's potential revitalization.

3. RELATIONSHIP TO COMMUNITY GOALS AND OBJECTIVES

This Urban Renewal Plan, which will be administered by the Town of Amherst Urban Renewal Agency (hereinafter, the "Agency") lays out the rationale and process for the area's revitalization, including the potential acquisition of Urban Renewal Area properties or their improvement through agreements with parcel owners. The Plan's goal is the redevelopment of these properties for the purposes of the elimination of slum and blight, to benefit low and/or moderate income residents living in or near the Urban Renewal Area, and the redevelopment of underutilized parcels through an overall land use strategy consistent with the housing, economic, and community development strategies of the Town's Bicentennial Comprehensive Plan and the Town's Community Development Block Group (CDBG) Program.

The Town's 2020-2024 Five-Year Consolidated Plan for Community Development has designated Census Tract 92, within which the Urban Renewal Area is located, as a Target Area for Community Development Block Grant

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

investments. Majority of the Urban Renewal Area also falls within Block Group 4 of Census Tract 92, which is designed by HUD as a Low-to-Moderate Income (LMI) Area, based on having 71% of its population considered Low-to-Moderate Income. HUD's LMI Areas are eligible for a larger amount of community investment activities within CDBG funding regulations in order to improve neighborhoods and housing serving LMI Populations.

This Plan is in line with the Town's Comprehensive Plan's Vision Statement which states that the Town should *"in carefully managing growth, balance the benefits of economic development with the need to maintain livability and preserve community character."*[2] The Vision Statement notes the Town's exceptional quality of life was tied to three factors, one of these is Community Character, and specifically recognizes the that the Town should "*revitalize older neighborhoods and commercial corridors while accommodating quality new development*."[3]

This Urban Renewal Plan carries forward one of the Comprehensive Plan's Key Initiatives to achieve the Vision: *"Revitalization: To become a model for effective reinvestment and revitalization of older neighborhoods and commercial areas, though creative use of investment incentives targeted toward revitalization."*[4] The following are various goals and objectives of the Plan regarding land use and development, housing and neighborhoods, and economic development:

A. Land Use and Development

Goal: An interconnected mix of land uses that includes revitalized older neighborhoods and commercial centers and corridors, quality new development, vibrant activity centers, agriculture, and green spaces throughout the community.

Objectives:

- Promote the development/revitalization of walkable higher density, mixed-use centers surrounded by lower density development
- Implement context-sensitive zoning and incentives to improve the quality and appearance of non-residential development
- Encourage revitalization and reinvestment in older neighborhoods and commercial corridors in Amherst
- Target capital improvements to leverage private investment and enhance community appearance
- Establish a town-wide network of parks, open spaces, and greenway corridors
- Improve the predictability and consistency of the development review and decision-making process

B. Economic Development

Goal: A Town with a strong tax base and ample economic opportunities for a diverse base of employers and employees, housed in attractive, state-of-the-art commercial developments in convenient and accessible locations.

Objectives:

- Maintain Amherst's strong tax base
- Attract more high-paying jobs to the Town
- Ensure that economic development and redevelopment respect the character and quality of life of Amherst's residential communities

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

- Capitalize on the presence of the University at Buffalo to leverage University-related economic development opportunities
- Build partnerships with development agencies, private industry, and educational and research institutions to promote economic development in Amherst and throughout the region

C. Housing and Neighborhoods

Goals: Have decent and affordable housing choices available to all residents and have healthy and diverse neighborhoods, including conserved and revitalized older parts of Amherst.

Objectives:

- Ensure the availability of housing that is affordable to all socioeconomic groups in Amherst
- Promote a diverse housing stock, with higher density housing focused in mixed-use activity centers
- Implement a coordinated program to conserve and revitalize Amherst's neighborhoods

The Comprehensive Plan also includes the Boulevard Central District (BCD) as a Focal Planning Area (see Exhibit D) and identifies several key issues and opportunities for the BCD's planning efforts such as:

- Employ mixed-use zoning and financial incentives to foster predictable development review and encourage investment.
- Redevelop aging traditional plazas and big box retail sites emblematic of suburban retail development through the early 21st century.
- Re-imagine a declining suburban mall (Boulevard Mall) into a new mixed-use center with buildings of varying scales, walkable streets and open spaces that serve as hubs of activity and vibrancy for the area.
- Introduce new street connections to provide more ways to circulate, and encourage 'complete street' treatments to enhance mobility.
- Expand market rate and mixed income residential offerings to support future neighborhood vibrancy and a base for area workforce and commercial markets.
- Several major highways traverse the BCD and play a key role in defining its identity. Major arterials such as Niagara Falls Boulevard, Sheridan Drive and Maple Road serve important transportation functions, but their design, physical size and design speeds make them inhospitable to bicycle or pedestrian travel. If the BCD is to transform from an automobile-oriented area to a walkable live, work, and shop destination, measures to transform segments of these major highways are necessary.
- The Niagara Frontier Transportation Authority (NFTA) is planning a future light rail or bus rapid transit extension corridor that will traverse the BCD. The corridor will connect the three University at Buffalo campuses, downtown Buffalo and the Buffalo waterfront.
- The future transit corridor has three planned enhanced transit stops identified within the BCD. The corridor and stops will feature improved multi-modal transportation mobility and support mixed use centers by allowing greater connectivity within and outside of the BCD.

The Agency, utilizing the powers granted by General Municipal Law Article 15, and acting through the employees and members of the Agency, will use its planning and land disposition expertise to acquire and thereafter dispose of the properties in an appropriate fashion consistent with the identified needs of the area and Town as a whole for better housing, commercial services, recreational facilities, employment opportunities, and the removal of blighting influences that presently discourage investment in properties and further the deterioration of surrounding neighborhoods. Use of CDBG funds, other grants, and Town capital improvements will be coordinated for the property acquisition, improvement, and disposition activities of the Agency.

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

4. PROPOSED LAND USES

The Action Plan shows how various opportunity sites in the BCD, including the Boulevard Mall, could redevelop according to the provisions in the Town's new Mixed-Use Zoning Districts and Design Guidelines. The Mixed-Use Districts establish standards for a transformation, setting rules for a network of pedestrian-oriented streets; building uses, height and placement; public open spaces; parking location; transparency of facades; and other standards that can deliver the walkable mixed-use environment desired. The recent rezoning to the Mixed-Use Districts in the BCD, the Urban Renewal Area, and on the Mall site as shown in Exhibit E aims to create an environment with smaller, walkable blocks to provide interconnectivity among residents, businesses, and surrounding areas.

The Boulevard Mall itself is an opportunity for walkable, transit-oriented development that can become the vital mixed-use hub of the BCD (see Exhibit F). In many ways, the mall site is the centerpiece of the Boulevard Central District. The mall also fronts the location of a possible enhanced transit line envisioned along Niagara Falls Boulevard, turning east on to Maple Road, and heading north to the University at Buffalo North Campus. This presents a unique opportunity to build upon future enhanced mobility and provide access to current and future users and residents of the site and surrounding neighborhoods. The Boulevard Mall site can become an anchor, serving as an economic catalyst not only for the BCD and Amherst, but also for the Western New York region over many years to come.

The following describes the various types of land uses that are envisioned in the future on the Boulevard Mall site and within the Urban Renewal Area:

a. A primary objective of this Urban Renewal Plan includes the inspection, rehabilitation, demolition, or replacement of existing structures in the Boulevard Central District Urban Renewal Area, including the acquisition and disposal of those properties. New land uses must comply with the Town's Master Site Plan of the site and Zoning Ordinance of the Town of Amherst.

b. The redevelopment of the area offers many opportunities. To guide specific development of the site, the Agency will formulate a Master Site Plan which will specify proposed land uses, public street rights of way, public spaces and facilities, and essential utilities, as shown in Exhibits G & H. These include a purposeful mix of commercial, retail, restaurant, office, residential, and open space uses along with new public streets to create smaller, walkable blocks.

c. Potential land uses, which are not limited to those discussed in this Plan, shall be in conformance with the Town of Amherst Zoning Ordinance and as shown on Map 3: Zoning (Exhibit E) which exhibits the existing zoning currently within the Urban Renewal Area. Zoning may be changed or amended in the future within this Urban Renewal Area.

5. PROPOSED LAND ACQUISITION

A. Proposed Land Acquisition

Land Acquisition proposed within the Urban Renewal Area will be determined as needed and will start with the Boulevard Mall property and some adjacent parcels. As such, any proposed land acquisition will be approved by the Agency in accordance with General Municipal Law § 506 and, to the extent necessary, the Eminent Domain Procedure Law. It is anticipated that the Boulevard Mall property and adjacent parcels will be acquired pursuant to the Eminent Domain Procedure Law.

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

B. Standards for Acquisition

Real property or any interest in real property may be acquired on the basis of current inspections. The Agency determines that deficiencies exist which 1) create hazards to the community; and/or 2) cause a blighting influence on the surrounding neighborhood; and/or 3) render the property as severely underutilized; and/or 4) otherwise hinder the completion of goals of the Urban Renewal Program, the Agency, and/or this Plan.

C. Methods of Acquisition

The Agency may acquire real property or any interest therein by gift, grant, devise, purchase, condemnation, or by any other process allowable pursuant to Articles 15 of the General Municipal Law.

D. Post Acquisition

Upon the acquisition of real property, the Agency may undertake any of the following activities:

1. Deconstruct or demolish any structure on the property;
2. Sell the property subject to rehabilitation in accordance with this plan;
3. Rehabilitate any structure(s) on the property and sell such rehabilitated structures for use in accordance with this plan;
4. Sell the property subject to development correcting underutilization;
5. Develop underutilized properties, allowing them to function at the peak of their economic and community potential;
6. With regards to vacant properties without structures, sell said property to an adjacent land owner, subdivide the property for sale to multiple adjacent land owners, or sell the property subject to redevelopment in accordance with this plan;
7. Sell, lease for a term not exceeding ninety-nine years, or otherwise dispose any real property by any method permissible pursuant to Article 15of the General Municipal law.

6. PROPERTY DISPOSITION

A. Property Disposition and Redevelopment

The Town is authorized to dispose of acquired property, in whole or in part, by sale, lease, exchange, or other appropriate means for redevelopment for uses and purposes specified in this Plan. For property identified for acquisition in this Plan, the Agency proposes to enter into an agreement with an eligible sponsor (a "Funding, Disposition, and Redevelopment Agreement"), as determined following the procedures set forth below, prior to acquisition, that will govern the funding of the acquisition, the disposition of the property, as well as the property's redevelopment in accordance with this plan.

The Agency may dispose of any land it has acquired by any method authorized by General Municipal Law § 507, on such terms and conditions as the Agency considers in the best interests of the Town. It is anticipated that a Funding, Disposition, and Redevelopment Agreement may be entered into prior to land acquisition.

B. Rules and Procedures for Determining Qualified and Eligible Sponsors

The Agency shall evaluate any developers who declare their intent, following a public solicitation, to become a qualified and eligible sponsor for purposes of this Plan. The Agency shall designate said developers as qualified and eligible based on the following criteria, none of which is dispositive, but each may be given appropriate weight in the Agency's sole discretion:

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

- The Developer's willingness to enter into an acceptable Funding, Disposition, and Redevelopment Agreement, which includes offsetting municipal costs for land acquisition referenced herein
- The Developer's capabilities to develop or redevelop property in accordance with the land-use provisions and other requirements specified in this Plan
- The Developer's willingness to generally comply with the Town's Master Site Plan of the Urban Renewal Area
- The Developer's financial capabilities
- The Developer's experience with similar redevelopment projects, including mixed-use projects of similar size and scope
- Proposed project timeframes
- Support for use of local labor
- Other criteria the Agency determine to be relevant, consistent with this Plan

C. Deed Restrictions

The disposition of any real property shall include all deed restrictions and covenants deemed appropriate by the Agency in order to carry out the public purpose of this Plan.

D. Reverter Clauses

All purchase agreements, leases, deeds, and option agreements pertaining to property shall contain a reverter clause whereby tide to or control of the development area shall automatically revert back to the Agency if the agreed upon re-planning, and/or clearing, and/or rehabilitation, and/or restoration, and/or renewing, and/or conservation, and/or improvement, and/or reconstruction, and/or redevelopment does not occur within the time frame stipulated in said purchase agreements, lease, deed, or option agreement. Said reverter clauses at the option of the Agency may be made subject to any financing approved by the Agency.

E. Extensions of Time

The Agency shall have authority to grant extensions on any purchase, lease, or option agreement where such a request is directed in writing to the Agency for its consideration.

7. PROPOSED PUBLIC, SEMI-PUBLIC, PRIVATE, OR COMMUNITY FACILITIES OR UTILITIES

Included in the Boulevard Central District Urban Renewal Area may be areas designated for park lands, public facilities and/or other necessary utilities. The Agency will work with developers, the NFTA, and other agencies as deemed necessary to provide desired public properties and facilities to reach their full operating potential.

8. PROPOSED METHODS AND TECHNIQUES OF URBAN RENEWAL

The methods and techniques of Urban Renewal proposed for use within this Plan include but are not limited to:

a. Acquisition of largely vacant, underutilized, deteriorated, and/or unproductive properties by the Town of Amherst or the Urban Renewal Agency, for disposition to qualified developers, development, or redevelopment entities that will further the planned redevelopment strategies that are part of this Urban Renewal Plan and the adopted Master Site Plan.

b. The Master Site Plan will guide the re-planning of development areas, parcels, and/or subdivision patterns for public and/or private uses within the area, including provisions for pedestrian, vehicular and service access from the area or adjacent public rights-of-way.

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

c. The planning, sitting, design, and construction of new public amenities within the area in a manner designed to enhance pedestrian enjoyment and increase the attractiveness of the area for both public use and private investment in new uses and structures.

d. The deconstruction or demolition of some existing structures within the area in order to correct substandard conditions and enable planning for redevelopment in accordance with the Plan.

e. The disposition of area development sites by sale or lease, and, subject to development standards incorporated in binding disposition agreements, to qualified public or private development entities for developments which carry out the provisions of this Plan.

f. The construction of new buildings, subject to design review by the Agency and the Town's Design Guidelines as maintained by the Town Design Advisory Board, and in accordance with this Plan.

g. The planning, design, and construction of utility and other infrastructure adjustments, connections, and replacements as needed.

h. The preservation and restoration of key architectural properties that have a viable public or private use, and which are consistent with the redevelopment objectives in this Plan.

i. Actions designed to implement provisions and objectives of the plan through: 1) adjustments or amendments to the Town's Zoning; 2) concentrated enforcements of the existing code within the Urban Renewal Area; 3) identification and referral of properties to the Agency for purpose of acquisition and 4) cooperation and coordination between various Town Departments and the Agency with regards to the monitoring and management of Agency owned properties.

j. The coordination with the Town of Amherst and/or the developer(s) for the remediation of brownfields for the sites that have potential use for economic development.

9. CODE & ORDINANCE CHANGES TO IMPLEMENT THE PLAN

New ordinances, provisions, or amendments to existing codes may occur to effectuate the Urban Renewal Plan. It is anticipated that future redevelopment in the Urban Renewal Area and on the Boulevard Mall site will adhere to the Town's Zoning Ordinance, in particular to Section 5-A of that ordinance regarding Mixed-Use District provisions. The Town Board may also consider adopting specialized provisions for the Urban Renewal Area that will allow for flexibility in the review and approval of specific development projects noted herein.

10. DEVELOPMENT STANDARDS

In order to carry out the public purpose of the Urban Renewal Plan, all development of property originally disposed or transferred by the Agency (pursuant to Section 13 of this Plan) and within the Urban Renewal Area shall be in compliance with the standards set forth below. Development at the Boulevard Mall should also be in compliance with Town's Master Plan of the site. The Agency, in conjunction with other town boards and committees, shall review all proposals to ensure that these standards are met. Definitions shall be consistent with those contained in the Town of Amherst Zoning Ordinance and Town Design Guidelines except where otherwise noted in this Plan.

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

A. Permitted Uses

Any building constructed in the project area shall contain one or more of the uses identified in Section 4 of this Plan.

B. Changes in Use

Changes in land use within the Urban Renewal Area may be reviewed and authorized by the Agency.

11. TIME SCHEDULE

The implementation of this Plan will begin upon its adoption by the Agency. It is proposed that property acquisition of the Mall will begin immediately. Acquisition of other properties in the Urban Renewal Area may subsequently follow. The overall redevelopment of the entire Urban Renewal Area is envisioned to be completed within a ten-year time period.

12. DURATION OF PLAN CONTROLS

The regulations, standards, and controls, contained in this Plan will be binding and effective by deed or lease upon all purchasers or lessees of land disposed of or transferred pursuant to this Plan, as well as their heirs or assigns for a period of fifteen (15) years from the date of approval of this Plan by the Town Board and Urban Renewal Agency of the Town of Amherst, New York.

13. CHANGES IN THE APPROVED PLAN

This Plan may be amended at any time by the Agency in accordance with the requirements of Article 15 of the New York General Municipal Law.

14. ACQUISITION OF AIR RIGHTS AND CONCOMITANT EASEMENTS OR OTHER RIGHTS OF USER NECESSARY FOR THE USE AND DEVELOPMENT OF SUCH AIR RIGHTS

The basic objectives of the Boulevard Central District Urban Renewal Plan include the acquisition, improvement, inspection, rehabilitation, demolition, disposal and/or deconstruction of existing structures. A statement of proposed acquisition of air rights is not necessary as it is not anticipated that the Agency will not acquire any air rights other than those air rights that come generally associated with the acquisition of any parcel of real property within the Urban Renewal Area. The Town will consider adoption of a Transferable Development Rights regulation if the opportunity presents itself to serve the community through such legislation.

15. PROPOSED PROGRAM OF CODE ENFORCEMENT

The Agency will cooperate and coordinate with the Town of Amherst Building Department and the Zoning Enforcement Officer in establishing a program of code enforcement within the Urban Renewal Area which includes but is not limited to:

A. The concentrated enforcement of the Town of Amherst Zoning Ordinance and applicable building codes within the Urban Renewal Area

B. The utilization of various Town Departments to assist the Agency with certain aspects of management of Agency-owned properties.

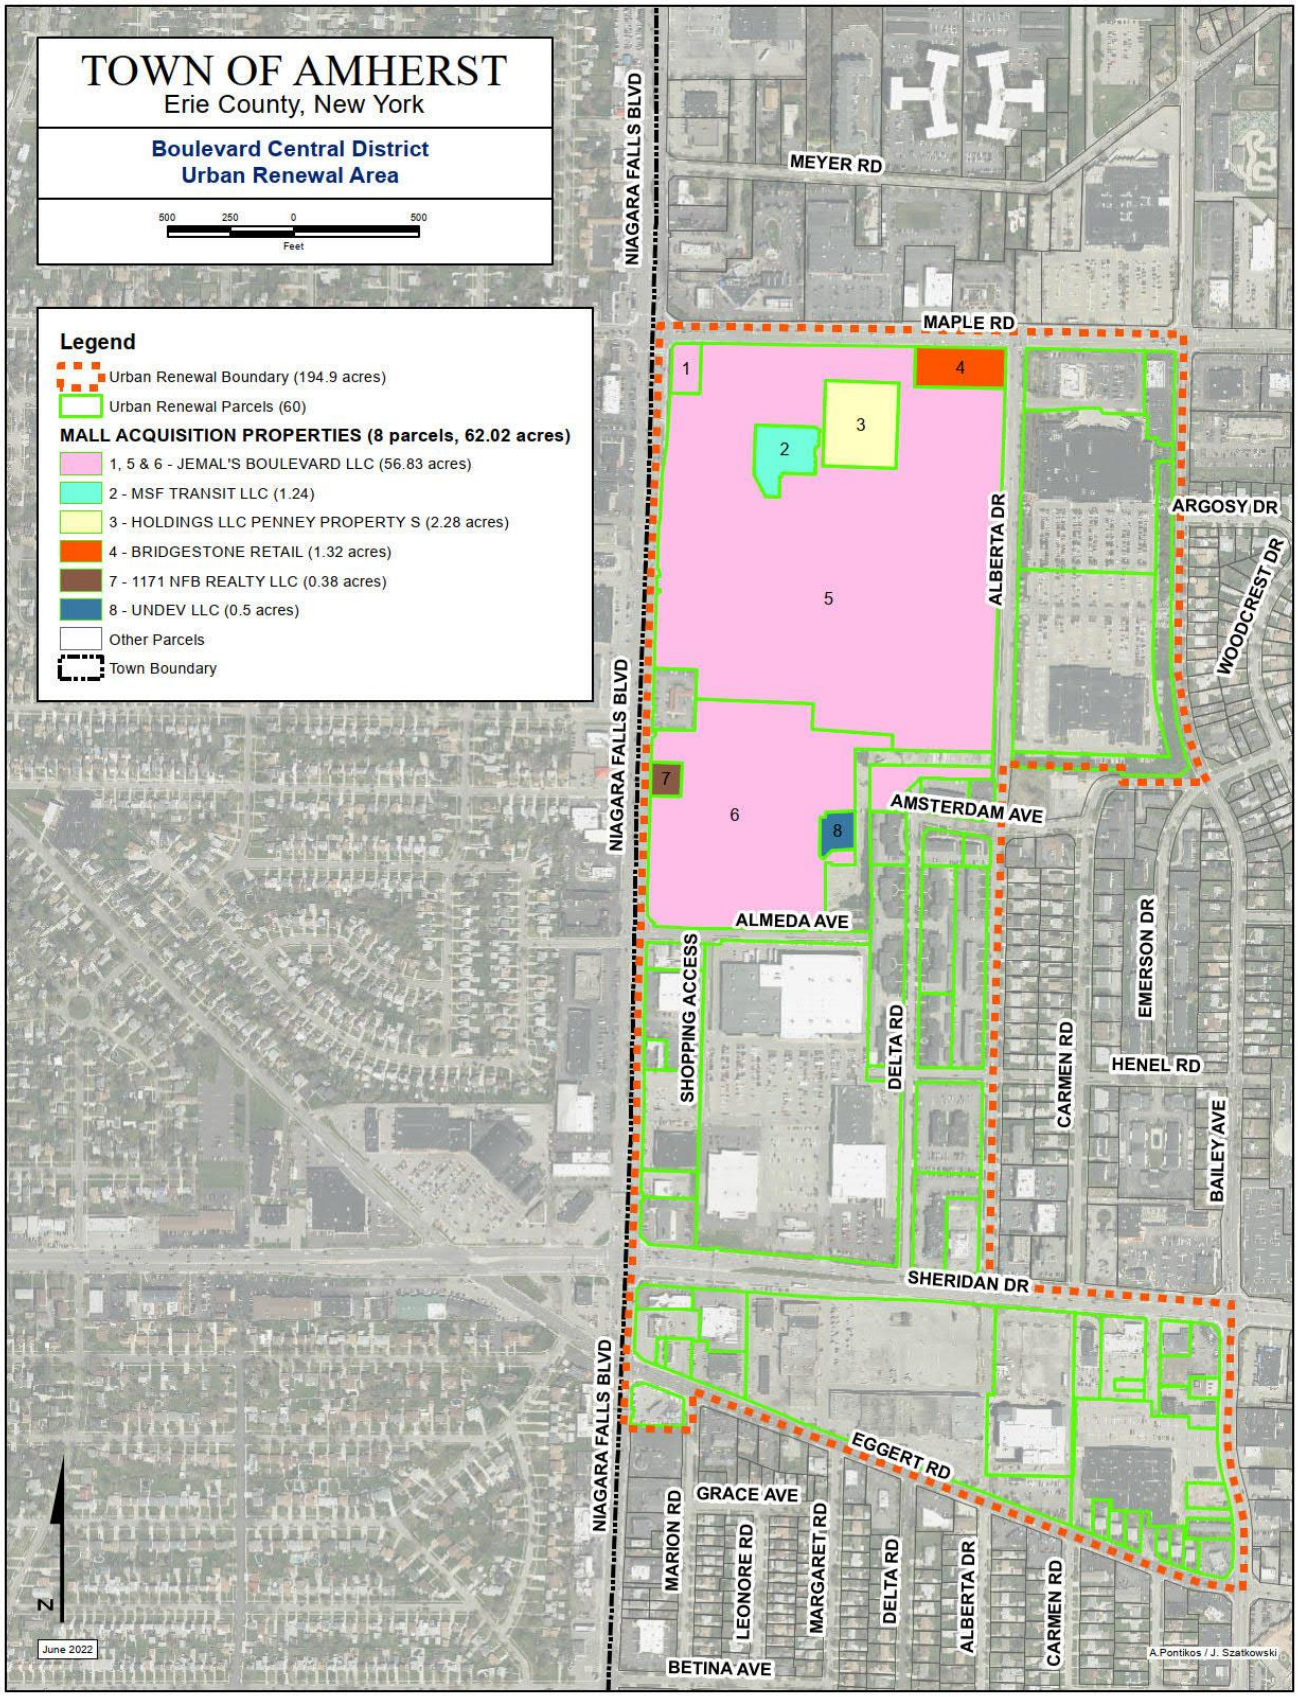
EXHIBITS

DRAFT

Attachment: SR-2022-05_Draft Urban Renewal Plan_092222 (26192 : Boulevard Mall Urban Renewal Plan, SR-2022-05)

EXHIBIT A – Description of Urban Renewal Area

The Boulevard Central District Urban Renewal Area, as designated by the Town Board pursuant to General Municipal Law § 504, is located on the western portion of the Town and can be described as follows:



Beginning at the southeast corner of the intersection of Niagara Falls Boulevard and Maple Road, the Urban Renewal area extends approximately 2,085 feet east along the centerline line of Maple Road to the centerline of Bailey Avenue, then turns southerly along the centerline of Bailey Avenue for approximately 1,800 feet to the intersection of the centerline of Amsterdam Avenue and the centerline of Bailey Avenue, then turns westerly for 335 feet along the centerline of Amsterdam Avenue, then turns north approximately 60 feet to the south parcel line of a National Grid parcel (SBL- 54.03-1-12.1), then turns west along the National Grid parcel line for approximately 470 feet to the centerline of Alberta Drive, then turns southerly along Alberta Drive for approximately 2,060 feet to the intersection of the centerline of Alberta Drive and the centerline of Sheridan Drive, then turns easterly along Sheridan Drive for approximately 957 feet to the intersection of the centerline Sheridan Drive and the centerline of Bailey Avenue, then turns southerly along Bailey Avenue approximately 1,145 feet to the intersection of the centerline of Bailey Avenue and the centerline of Eggert Road, then turns north westerly along the centerline of Eggert Road for approximately 2,330 feet to the intersection of the centerline of Eggert Road and the centerline of Marion Road, then turns southerly along the centerline of Marion Road for approximately 160 feet, then turns westerly for approximately 275 feet along the southern parcel boundary of (925 Niagara Falls Boulevard SBL-67.39-5-1) to the centerline of Niagara Falls Boulevard, then turns northerly along Niagara Falls Boulevard for approximately 4,387 feet back to the intersection of the centerline of Niagara Falls Boulevard and the centerline of Maple Road (the beginning point).

The Urban Renewal Area totals approximately 194.9 acres and includes 60 parcels.

DRAFT (9/22/22)
TOWN OF AMHERST
PLANNING BOARD
BOULEVARD CENTRAL DISTRICT URBAN RENEWAL PLAN
SR-2022-05

PETITIONER
Town of Amherst
5583 Main Street
Williamsville, NY 14221

WHEREAS, pursuant to Article 15 of the New York General Municipal Law, the Town is authorized to undertake urban renewal programs for the redevelopment of substandard, underutilized, or insanitary areas that are having a blighting influence on the surrounding property; and

WHEREAS, on June 27, 2022, the Town Board took several actions in regards to Article 15 of the New York General Municipal Law:

A. Designated itself as the Amherst Urban Renewal Agency (AURA), as defined in §502(4) of the General Municipal Law, for the purposes of carrying out the functions vested in that office by Article 15 of the General Municipal Law

B. Pursuant to §504 of the General Municipal Law, designated the "Boulevard Central District Urban Renewal Area" as an area appropriate for urban renewal as defined in §502(3) of the General Municipal Law

C. Said designation was made because the site is underutilized and having a long-term deteriorating impact on the community, particularly the neighboring commercial properties

D. Directed AURA to prepare an Urban Renewal Plan, as that term is defined in §502(7) of the General Municipal Law, for the redevelopment of a portion of the Boulevard Central District Urban Renewal Area consisting of the Boulevard Mall property and nearby properties as determined by AURA, which shall conform to the Comprehensive Plan of the Town and the Boulevard Central District Action Plan

E. Submit the Urban Renewal Plan to the Town Planning Board, which, after a duly noticed public hearing, shall certify whether the Plan complies with §502(7) of the General Municipal Law; and

WHEREAS the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on the proposed Boulevard Central District Urban Renewal Plan; and

WHEREAS the Planning Board has reviewed the proposed Boulevard Central District Urban Renewal Plan; and

DRAFT (9/22/22)
TOWN OF AMHERST
PLANNING BOARD
BOULEVARD CENTRAL DISTRICT URBAN RENEWAL PLAN
SR-2022-05

PETITIONER
Town of Amherst

WHEREAS the Planning Board finds that:

A. The Plan complies with §502(7) of the General Municipal Law and includes a discussion of the required elements set forth therein.

B. The Plan conforms with the finding made pursuant to §504 of the General Municipal Law

C. The Plan conforms to and is in furtherance of the Comprehensive Plan and is consistent with and in furtherance of the Town's objectives.

C. The subject area is suitable for uses permitted by the current land use designation and the current mixed-use zoning districts.

E. The proposed change does improve the balance of land uses, and does meet a specific demand in the Town.

NOW THEREFORE BE IT RESOLVED that the Planning Board certifies its unqualified approval of the Boulevard Central District Urban Renewal Plan to the Town Board in accordance with §505 of the New York General Municipal Law and finds that this resolution shall constitute the Planning Board's report to the Town Board as is required by Section 505(2) of the General Municipal Law.

The foregoing resolution was adopted by the Town of Amherst Planning Board, _____; moved by –; seconded by –; ayes – ; noes –.

PLANNING BOARD ITEM (ID # 26343)

Request to Amend the Bicentennial Comprehensive Plan for 22.78± Acres of Land from Commercial Office to Medium Residential, BCPA-2022-05

Property located at 2360-2370 Wehrle Drive (portion)
Omni Smart Living, Petitioner

Proposal to amend the Towns Comprehensive Plan to recommend a land use that allows for the future development of a senior living community.

Jeffrey Palumbo, Esq., Block. Longo, LaMarca & Brzezinski, represented the petitioner, explained the proposal and was available to answer questions from the Board. Gary Palace, Omni Smart Living, was also present.

Bob Shaw, 162 Berkley Road; James O'Donnell, 81 Oakwood Drive; and Bob Reynolds, 142 Ferndale Road spoke in opposition of the proposal.

No further comments were heard on this proposal. The hearing was closed.

Following discussion, Ms. Penberthy moved to approve the request based on the resolution. The motion was seconded by Mr. Giuliani and carried. Ayes 5, Noes 0, Absent 2 (Kahn, Raffaele).

SECTION 809 CERTIFICATION

The undersigned certifies that all information required to be disclosed pursuant to Section 809 of the General Municipal Law (see below) is as follows:

The undersigned swears or affirms that all statements made herein are true, that all drawings submitted correctly show the situation involved in this petition.

_____
Signature of Petitioner

Subscribed and sworn to before me this _____ *day of* August, *20*22

Notary Public, Erie County, New York _____

N.Y.S. General Municipal Law - Section 809 Disclosure in certain applications:

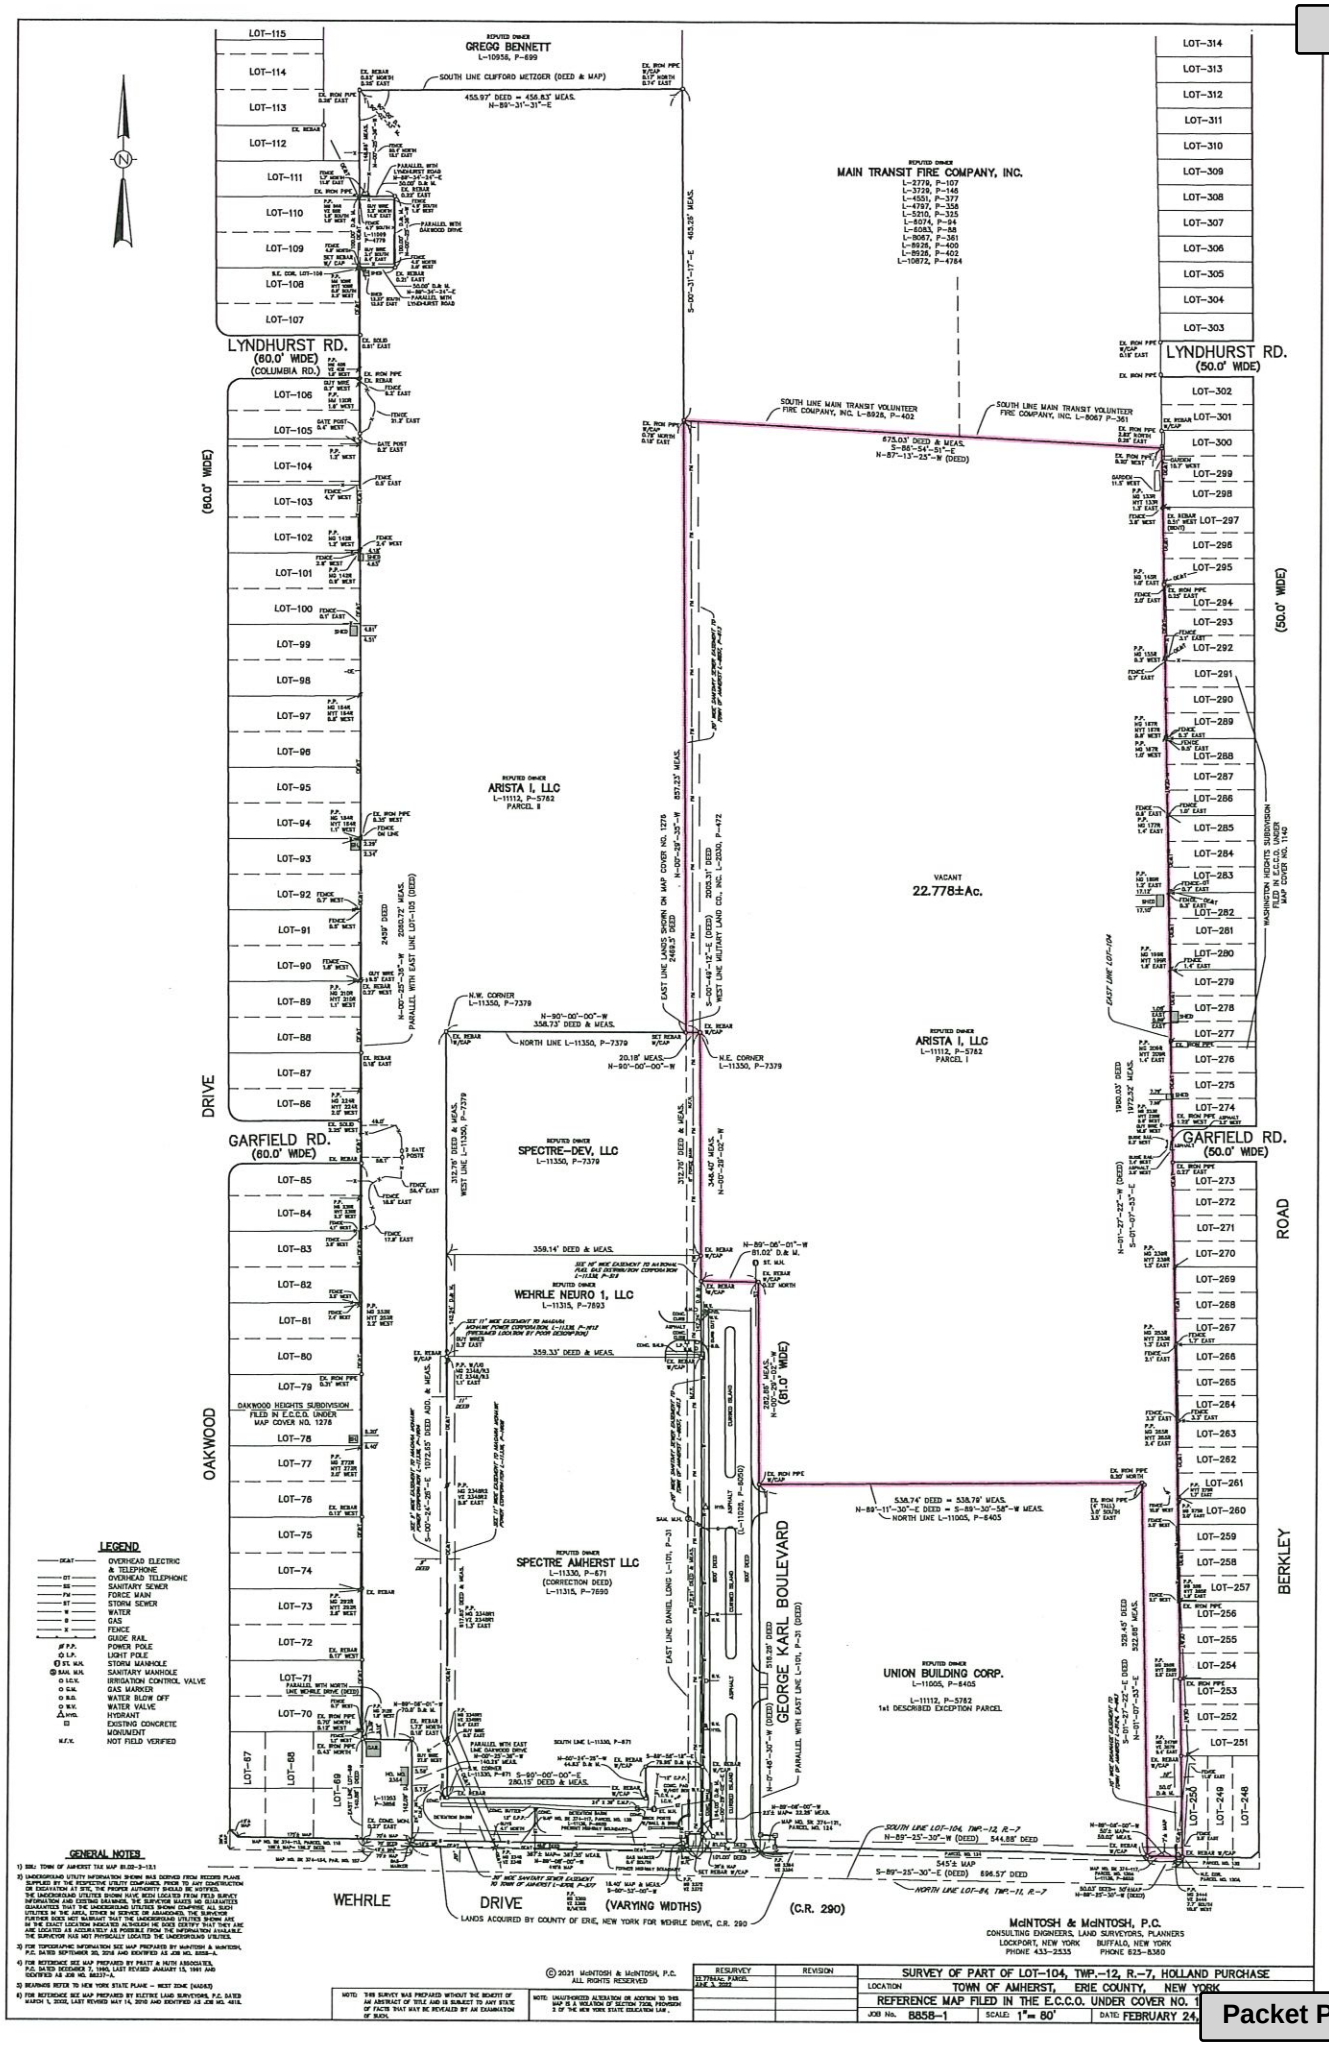
1. Every application, petition or request submitted for a variance, amendment, change of zoning, approval of a plat, exemption from a plat or official map, license or permit, pursuant to the provision of any ordinance, local law, rule or regulation constituting the zoning and planning regulations of a municipality shall state the name, residence and the nature and extent of the interest of any state office or any office or employee of such municipality or of a municipality of which such municipality is a part, in the person, partnership or association making such application, petition or request (hereinafter called the applicant) to the extent known to such applicant.

2. For the purpose of this section an officer or employee shall be deemed to have an interest in the applicant when he, his spouse, or their brothers, sisters, parents, children, grandchildren, or the spouse of any of them

   (a) is the applicant, or
   (b) is an officer, director, partner or employee of the applicant, or
   (c) legally or beneficially owns or controls stock of a corporate applicant or is a member of a partnership or association applicant, or
   (d) is a party to an agreement with such an applicant, express or implied, whereby he may receive any payment or other benefit, whether or not for services rendered, dependent or contingent upon the favorable approval of such applicant, petition or request.

3. In the county of Nassau the provisions of subdivisions one and two of this section shall also apply to a party officer. "Party Officer" shall mean any person holding any position or office, whether by election, appointment or otherwise, in any party as defined by subdivision four or section two of the election law.

4. Ownership of less than five per cent of the stock of a corporation whose stock is listed on the New York or American Stock Exchanges shall not constitute an interest for the purposes of this section.



5. A person who knowingly and intentionally violates this section shall be guilty of a misdemeanor.

Town of Amherst Bicentennial Comprehensive Plan

The Conceptual Land Use Plan is intended to communicate the overall direction and concept of future development. While it is not a zoning map and does not show the existing or proposed use of individual parcels, it is intended to show land use relationships, provide a generalized guide for future development, and establish a context for detailed area planning and design.

Comprehensive Plan Amendment Analysis
2360 – 2370 Wehrle Drive

As set forth in the Town of Amherst Bicentennial Comprehensive Plan ("Plan") Amendment Application Form, Petitioner must provide information on the prospective action in relation to the Plan. The Application Form questions are outlined below in bold with Petitioner's response noted.

A. Description of any prospective action:

Petitioner's Response: Petitioner is proposing an adult living community with first class amenities. This community will consist of a combination of Independent Living, Assisted Living, Memory Care and Villas. It will provide housing for Amherst residents who no longer want the responsibility of maintaining a home but who would like to continue to reside in Amherst.

B. Rationale for request of amendment:

1. **How will the requested amendment to the Bicentennial Comprehensive Plan be consistent with *Section 2.2 (Vision Statement)*?**

Petitioner's Response: As noted, the requested amendment enhances the livability of the area in offering additional choices in lifestyle and having options that are not otherwise available. It also serves to enhance community character by removing commercial zoning and continuing investment in older neighborhoods. Further, the requested amendment and subsequent development meet a very high standard for quality development while respecting appropriate buffers in existing neighborhoods. Finally, the requested amendment is consistent with the shared direction as set forth in the "Plan" as it enhances the diverse economy of the town, strengthening the tax base and attraction to the community by carefully using vacant land with an infill development that will coexist with both the commercial and residential character of the area.

2. **How will the requested amendment to the Bicentennial Comprehensive Plan be consistent with Section 2.3 (key initiatives)**

Petitioner's Response: Regarding "aesthetic/community character" the requested amendment certainly does not detract, but rather adds to the renowned beauty, character and environmental quality of the Town. The "Plan" sets forth various initiatives designed to "raise the bar" in order to move further towards a position of excellence. By approving this senior housing development, the Town moves even closer to the goal. In every way the Petition provides Amherst seniors with a truly first class living community.

The requested amendment is also consistent with the "Education" key initiative. In other existing communities developed by Petitioner, residents "go back to college." They have teamed with local universities by providing residents with the ability to go back to school to learn about their passions and about new interests as well.

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

Regarding the "Revitalization" initiative, this proposal injects new life into an older area of the Town by providing a diverse choice of retirement housing. The requested amendment coincides nicely with both the adjoining residential and commercial neighborhoods.

Lastly, the requested amendment is consistent with the "Governance" initiative. The resulting adult community does not introduce inconsistency or unfairness in zoning and land usage.

C. How is the requested amendment aligned with the defined policies in Sections:

1. *3.0 Land Use and Development?*

Petitioner's Response: The requested amendment adds new diverse housing and an investment to the established community and does so with a context-sensitive architectural and site design. Ultimately, the Properties call for residential dwellings and the requested amendment and development result in residential dwellings. Specifically, the requested amendment seeks to have the Properties classified as "Mixed Residential." Mixed residential is appropriate for residence along roads like Wehrle Drive and as a buffer to more traditional single-family neighborhoods. The Properties and Development perfectly capture Mixed Residential as set forth in the Comprehensive Plan.

2. *4.0 Natural and Cultural Resources?*

Petitioner's Response: The Development is adjacent to both residential and commercial neighborhoods. The adult community will provide buffering from neighboring parcels, preserving the status quo in terms of privacy and buffer, while also saving important natural vegetation through strategically limited clearing.

3. *5.0 Economic Development?*

Petitioner's Response: The proposed amendment balances economic growth and livability by providing Amherst adults with a diverse choice of housing alternatives. The development is not obtrusive to established neighboring residences. Buffering and landscaping will ensure that all neighbors are properly protected.

4. *6.0 Transportation?*

Petitioner's Response: As the property is currently zoned commercial, for office development, the proposed adult community will generate far less traffic, particularly at the peak hours. Typically, transportation is provided to residents for travel to various business and cultural establishments, reducing the need for individual car traffic.

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

5. *7.0 Infrastructure*?

Petitioner's Response: The proposed amendment will not stress existing storm sewer or waste water service. The Properties are within the Town of Amherst Consolidated Sanitary Sewer District, so the development will not be on septic. Capacity exists for the number of units proposed. The development is anticipated to produce approximately 40,300 gallons per day.

6. *8.0 Housing & Neighborhoods*?

Petitioner's Response: The proposed amendment furthers the Comprehensive Plan objective to achieve a diversity of housing options. The Petitioner is also an experienced senior housing developer, which will ensure that the diverse housing option will be well managed and contribute to surrounding neighborhood's health and stability. While the proposed amendment changes the Comprehensive Plan conceptual land use plan, Figure 6, by making the Properties mixed residential, the change allows Amherst residents to remain in Amherst. As stated previously, Petitioner is well versed in respecting existing neighborhoods by appropriate buffering and landscaping.

7. **9.0 Community Facilities & Services?**

Petitioner's Response: The proposed community is very close to the Transit and Main Street corridors. By providing its residents with safe transportation, it is insured that nearby businesses, restaurants, movie theaters, etc. will be utilized by the community residents.

Full Environmental Assessment Form
Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1is accurate and complete.

A. Project and Applicant/Sponsor Information.

Name of Action or Project:		
Project Location (describe, and attach a general location map): 2360-2370 Wehrle Drive, Amherst, New York		
Brief Description of Proposed Action (include purpose or need):		
Name of Applicant/Sponsor: Omni Smart Living	Telephone: (440) 773-1934 E-Mail: wlynch@omnismartliving.com	
Address: 33095 Bainbridge Road		
City/PO: Solon	State: Ohio	Zip Code: 44139
Project Contact (if not same as sponsor; give name and title/role): Jeffery D. Palumbo / Block, Longo, LaMarca & Brzezinski, P.C.	Telephone: (716) 317-0667 E-Mail: jpalumbo@blockandlongo.com	
Address: 9276 Main Street		
City/PO: Clarence	State: New York	Zip Code: 14031
Property Owner (if not same as sponsor): Arista I, LLC	Telephone: E-Mail:	
Address: 1330 Niagara Falls Boulevard		
City/PO: Tonawanda	State: New York	Zip Code: 14150

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

B. Government Approvals

B. Government Approvals, Funding, or Sponsorship. ("Funding" includes grants, loans, tax relief, and any other forms of financial assistance.)

Government Entity	If Yes: Identify Agency and Approval(s) Required	Application Date (Actual or projected)
a. City Counsel, Town Board, or Village Board of Trustees ☑Yes ☐No	Town of Amherst Town Board - Rezoning	08/2022
b. City, Town or Village Planning Board or Commission ☑Yes ☐No	Town of Amherst Planning Board - Site Plan Approval	TBD
c. City, Town or Village Zoning Board of Appeals ☑Yes ☐No	Town of Amherst Zoning Board of Appeals - Variances	TBD
d. Other local agencies ☑Yes ☐No	Erie County Water Authority -Watermain Extension & Approval of Backflow Prevention	TBD
e. County agencies ☐Yes ☐No		
f. Regional agencies ☐Yes ☐No		
g. State agencies ☐Yes ☐No	NYSDEC - SPDES Permit (Stormwater)	TBD
h. Federal agencies ☑Yes ☐No	Federal Aviation Admin. - Proximity to Buffalo Niagara Internation Airport	TBD

i. Coastal Resources.

i. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐Yes ☑No

ii. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☐Yes ☑No

iii. Is the project site within a Coastal Erosion Hazard Area? ☐Yes ☑No

C. Planning and Zoning

C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed? ☐Yes ☑No

- **If Yes,** complete sections C, F and G.
- **If No,** proceed to question C.2 and complete all remaining sections and questions in Part 1

C.2. Adopted land use plans.

a. Do any municipally- adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☑Yes ☐No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☑Yes ☐No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☑Yes ☐No

If Yes, identify the plan(s):

NYS Heritage Areas:West Erie Canal Corridor

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan? ☐Yes ☑No

If Yes, identify the plan(s):

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No
If Yes, what is the zoning classification(s) including any applicable overlay district?
OB (Office Building District) and R-3 (Residential District 3)

b. Is the use permitted or allowed by a special or conditional use permit? ☐ Yes ☑ No

c. Is a zoning change requested as part of the proposed action? ☑ Yes ☐ No
If Yes,
i. What is the proposed new zoning for the site? MFR-7 (Multifamily Residential District 7)

C.4. Existing community services.

a. In what school district is the project site located? Williamsville Central School District

b. What police or other public protection forces serve the project site?
Town of Amherst Police Department

c. Which fire protection and emergency medical services serve the project site?
Main-Transit Fire Department

d. What parks serve the project site?
Island Park, Glen Park, Garrison Park, Dana Heights Park, Wehrle FAA Recreation Park

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? Residential

b. a. Total acreage of the site of the proposed action? 22.778 +/- acres
b. Total acreage to be physically disturbed? 16.6 +/- acres
c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? 22.778 +/- acres

c. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No
i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % _____ Units: _____

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No
If Yes,
i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
ii. Is a cluster/conservation layout proposed? ☐ Yes ☑ No
iii. Number of lots proposed? _____
iv. Minimum and maximum proposed lot sizes? Minimum _____ Maximum _____

e. Will the proposed action be constructed in multiple phases? ☑ Yes ☐ No
i. If No, anticipated period of construction: _____ months
ii. If Yes:
- Total number of phases anticipated 2
- Anticipated commencement date of phase 1 (including demolition) 4 month 2023 year
- Anticipated completion date of final phase 12 month 2025 year
- Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _____

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

f. Does the project include new residential uses? ☑ Yes ☐ No

If Yes, show numbers of units proposed.

	One Family	Two Family	Three Family	Multiple Family (four or more)
Initial Phase				
At completion of all phases				

g. Does the proposed action include new non-residential construction (including expansions)? ☐ Yes ☑ No

If Yes,

i. Total number of structures _____

ii. Dimensions (in feet) of largest proposed structure: _____ height; _____ width; and _____ length

iii. Approximate extent of building space to be heated or cooled: _____ square feet

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage? ☑ Yes ☐ No

If Yes,

i. Purpose of the impoundment: Stormwater detention

ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☑ Other specify: stormwater runoff

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _____ million gallons; surface area: TBD acres

v. Dimensions of the proposed dam or impounding structure: _____ height; _____ length (Unknown at this time - TBD)

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? ☐ Yes ☑ No
(Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)

If Yes:

i .What is the purpose of the excavation or dredging? _____

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards): _____
- Over what duration of time? _____

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials? ☐ Yes ☐ No
If yes, describe. _____

v. What is the total area to be dredged or excavated? _____ acres

vi. What is the maximum area to be worked at any one time? _____ acres

vii. What would be the maximum depth of excavation or dredging? _____ feet

viii. Will the excavation require blasting? ☐ Yes ☐ No

ix. Summarize site reclamation goals and plan: _____

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area? ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description): _____

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

iii. Will the proposed action cause or result in disturbance to bottom sediments? ☐Yes ☐No
If Yes, describe:

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation? ☐Yes ☐No
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):
- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

c. Will the proposed action use, or create a new demand for water? ☑Yes ☐No
If Yes:

i. Total anticipated water usage/demand per day: 40,340 gallons/day

ii. Will the proposed action obtain water from an existing public water supply? ☑Yes ☐No
If Yes:

- Name of district or service area: Erie County Water Authority
- Does the existing public water supply have capacity to serve the proposal? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No
- Do existing lines serve the project site? ☐Yes ☑No

iii. Will line extension within an existing district be necessary to supply the project? ☑Yes ☐No
If Yes:

- Describe extensions or capacity expansions proposed to serve this project: line extension along George Karl Blvd. which is to be extended (approx. 400 feet +/-)
- Source(s) of supply for the district: Erie County Water Authority

iv. Is a new water supply district or service area proposed to be formed to serve the project site? ☐Yes ☑No
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: _____ gallons/minute.

d. Will the proposed action generate liquid wastes? ☑Yes ☐No
If Yes:

i. Total anticipated liquid waste generation per day: 40,340 gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each): sanitary wastewater

iii. Will the proposed action use any existing public wastewater treatment facilities? ☑Yes ☐No
If Yes:

- Name of wastewater treatment plant to be used: Town of Amherst Wastewater Treatment Plant
- Name of district: Town of Amherst
- Does the existing wastewater treatment plant have capacity to serve the project? ☑Yes ☐No
- Is the project site in the existing district? ☑Yes ☐No
- Is expansion of the district needed? ☐Yes ☑No

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

- Do existing sewer lines serve the project site? ☑ Yes ☐ No
- Will a line extension within an existing district be necessary to serve the project? ☑ Yes ☐ No

If Yes:

- Describe extensions or capacity expansions proposed to serve this project: line extension along George Karl Blvd. which is to be extended (approx. 400 feet +/-)

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐ Yes ☑ No

If Yes:

- Applicant/sponsor for new district: _____
- Date application submitted or anticipated: _____
- What is the receiving water for the wastewater discharge? _____

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: _____

e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑ Yes ☐ No

If Yes:

i. How much impervious surface will the project create in relation to total size of project parcel?

_____ Square feet or 13.6 acres (impervious surface)

_____ Square feet or 22.8 acres (parcel size)

ii. Describe types of new point sources. Stormwater discharge from project site which will either tie into municipal storm sewer system on George Karl Blvd. or discharge to a stormwater injection well.

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

on-site stormwater management facilities

- If to surface waters, identify receiving water bodies or wetlands: Eventually connects to Ellicott Creek
- Will stormwater runoff flow to adjacent properties? ☐ Yes ☑ No

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☑ Yes ☐ No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐ Yes ☑ No

If Yes, identify:

i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐ Yes ☑ No

If Yes:

i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐ Yes ☐ No

ii. In addition to emissions as calculated in the application, the project will generate:

- _____ Tons/year (short tons) of Carbon Dioxide (CO_2)
- _____ Tons/year (short tons) of Nitrous Oxide (N_2O)
- _____ Tons/year (short tons) of Perfluorocarbons (PFCs)
- _____ Tons/year (short tons) of Sulfur Hexafluoride (SF_6)
- _____ Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)
- _____ Tons/year (short tons) of Hazardous Air Pollutants (HAPs)

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)? ☐Yes ☑No

If Yes:

i. Estimate methane generation in tons/year (metric): _____

ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring): _____

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations? ☐Yes ☑No

If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services? ☐Yes ☑No

If Yes:

i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☑Weekend
☐ Randomly between hours of _____ to _____. (Not specified in ITE Trip Generation Manual)

ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): _____

iii. Parking spaces: Existing 0 Proposed 329 Net increase/decrease 329

iv. Does the proposed action include any shared use parking? ☐Yes ☑No

v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:
extension of George Karl Blvd. by approximately 400 feet +/-

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? ☑Yes ☐No

vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? ☑Yes ☐No

viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? ☑Yes ☐No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy? ☑Yes ☐No

If Yes:

i. Estimate annual electricity demand during operation of the proposed action: _____
Unknown at this time

ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
via grid/local utility

iii. Will the proposed action require a new, or an upgrade, to an existing substation? ☐Yes ☑No

l. Hours of operation. Answer all items which apply.

i. During Construction:
- Monday - Friday: 7am - 6pm
- Saturday: 7am - 6pm
- Sunday: N/A
- Holidays: N/A

ii. During Operations:
- Monday - Friday: 24/7 facility
- Saturday: 24/7 facility
- Sunday: 24/7 facility
- Holidays: 24/7 facility

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? ☑ Yes ☐ No

If yes:

i. Provide details including sources, time of day and duration:

The use of construction equipment and construction activities for this project will result in unavoidable noise impacts during daytime hours.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? ☐ Yes ☑ No

Describe:

n. Will the proposed action have outdoor lighting? ☑ Yes ☐ No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

New street lighting, exterior building lighting and pole mounted lighting to comply with the Town of Amherst's Town Code.

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? ☐ Yes ☑ No

Describe:

o. Does the proposed action have the potential to produce odors for more than one hour per day? ☐ Yes ☑ No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? ☐ Yes ☑ No

If Yes:

i. Product(s) to be stored

ii. Volume(s) _____ per unit time _____ (e.g., month, year)

iii. Generally, describe the proposed storage facilities:

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? ☐ Yes ☑ No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? ☐ Yes ☐ No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? ☑ Yes ☐ No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

- Construction: to be determined tons per _____ (unit of time)
- Operation : to be determined tons per _____ (unit of time)

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

- Construction: Recycling of salvageable construction items.
- Operation: Recycling programs by use.

iii. Proposed disposal methods/facilities for solid waste generated on-site:

- Construction: Via agreement with waste disposal company.
- Operation: Via agreement with waste disposal company.

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

s. Does the proposed action include construction or modification of a solid waste management facility? ☐ Yes ☑ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities): _____

ii. Anticipated rate of disposal/processing:

- _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
- _____ Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: _____ years

t. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? ☐ Yes ☑ No

If Yes:

i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility: _____

ii. Generally describe processes or activities involving hazardous wastes or constituents: _____

iii. Specify amount to be handled or generated _____ tons/month

iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents: _____

v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? ☐ Yes ☐ No

If Yes: provide name and location of facility: _____

If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☐ Urban ☐ Industrial ☑ Commercial ☑ Residential (suburban) ☐ Rural (non-farm)
☐ Forest ☐ Agriculture ☐ Aquatic ☑ Other (specify): Community Facility (Fire Department)

ii. If mix of uses, generally describe:

residential subdivisions to the east and west of the parcel, commercial properties to the west and south of the parcel, fire department to the north of the parcel.

b. Land uses and covertypes on the project site.

Land use or Covertype	Current Acreage	Acreage After Project Completion	Change (Acres +/-)
• Roads, buildings, and other paved or impervious surfaces	0	13.6	+13.6
• Forested	11.6	0	-11.6
• Meadows, grasslands or brushlands (non-agricultural, including abandoned agricultural)	11.178		-11.178
• Agricultural (includes active orchards, field, greenhouse etc.)			
• Surface water features (lakes, ponds, streams, rivers, etc.)		0.50	+0.50
• Wetlands (freshwater or tidal)			
• Non-vegetated (bare rock, earth or fill)			
• Other Describe: Lawn/Landscaping	0	8.678	+8.678

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

c. Is the project site presently used by members of the community for public recreation? ☐Yes ☑No
i. If Yes: explain: _____

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site? ☐Yes ☑No
If Yes,
i. Identify Facilities:

_____
_____

e. Does the project site contain an existing dam? ☐Yes ☑No
If Yes:
i. Dimensions of the dam and impoundment:

- Dam height: _____ feet
- Dam length: _____ feet
- Surface area: _____ acres
- Volume impounded: _____ gallons OR acre-feet

ii. Dam's existing hazard classification: _____
iii. Provide date and summarize results of last inspection:

_____
_____

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility? ☐Yes ☑No
If Yes:
i. Has the facility been formally closed? ☐Yes ☐ No

- If yes, cite sources/documentation: _____

ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:

_____
_____

iii. Describe any development constraints due to the prior solid waste activities: _____

_____

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste? ☐Yes ☑No
If Yes:
i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:

_____
_____

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site? ☐Yes ☑ No
If Yes:
i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply: ☐Yes ☐No

☐ Yes – Spills Incidents database — Provide DEC ID number(s): _____
☐ Yes – Environmental Site Remediation database — Provide DEC ID number(s): _____
☐ Neither database

ii. If site has been subject of RCRA corrective activities, describe control measures: _____

_____
_____

iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database? ☐Yes ☑No
If yes, provide DEC ID number(s): _____
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):

_____
_____

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

v. Is the project site subject to an institutional control limiting property uses? ☐ Yes ☑ No

- If yes, DEC site ID number: _____
- Describe the type of institutional control (e.g., deed restriction or easement): _____
- Describe any use limitations: _____
- Describe any engineering controls: _____
- Will the project affect the institutional or engineering controls in place? ☐ Yes ☐ No
- Explain: _____

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? 1.5 to 3.5 feet

b. Are there bedrock outcroppings on the project site? ☐ Yes ☑ No
If Yes, what proportion of the site is comprised of bedrock outcroppings? _____ %

c. Predominant soil type(s) present on project site:

Wassaic silt loam	95 %
Farmington channery loam	3.9 %
Ovid silt loam	1.2 %

d. What is the average depth to the water table on the project site? Average: >10 feet

e. Drainage status of project site soils:

☑ Well Drained:	3.9 % of site
☑ Moderately Well Drained:	95 % of site
☑ Poorly Drained	1.2 % of site

f. Approximate proportion of proposed action site with slopes:

☑ 0-10%:	100 % of site
☐ 10-15%:	% of site
☐ 15% or greater:	% of site

g. Are there any unique geologic features on the project site? ☐ Yes ☑ No
If Yes, describe: _____

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? ☐ Yes ☑ No

ii. Do any wetlands or other waterbodies adjoin the project site? ☐ Yes ☑ No

If Yes to either *i* or *ii*, continue. If No, skip to E.2.i.

iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? ☐ Yes ☑ No

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

- Streams: Name _____ Classification _____
- Lakes or Ponds: Name _____ Classification _____
- Wetlands: Name _____ Approximate Size _____
- Wetland No. (if regulated by DEC) _____

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? ☐ Yes ☑ No

If yes, name of impaired water body/bodies and basis for listing as impaired: _____

i. Is the project site in a designated Floodway? ☐ Yes ☑ No

j. Is the project site in the 100-year Floodplain? ☐ Yes ☑ No

k. Is the project site in the 500-year Floodplain? ☐ Yes ☑ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? ☐ Yes ☑ No
If Yes:

i. Name of aquifer: _____

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

m. Identify the predominant wildlife species that occupy or use the project site:

White tailed deer	raccoon	squirrel
eastern chipmunk	skunk	woodchuck
field mice	common garter snake	red fox

n. Does the project site contain a designated significant natural community? ☐Yes ☑No

If Yes:

i. Describe the habitat/community (composition, function, and basis for designation): _____

ii. Source(s) of description or evaluation: _____

iii. Extent of community/habitat:

- Currently: _____ acres
- Following completion of project as proposed: _____ acres
- Gain or loss (indicate + or -): _____ acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? ☐Yes ☑No

If Yes:

i. Species and listing (endangered or threatened): _____

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? ☐Yes ☑No

If Yes:

i. Species and listing: _____

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? ☐Yes ☑No

If yes, give a brief description of how the proposed action may affect that use: _____

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? ☐Yes ☑No

If Yes, provide county plus district name/number: _____

b. Are agricultural lands consisting of highly productive soils present? ☐Yes ☑No

i. If Yes: acreage(s) on project site? _____

ii. Source(s) of soil rating(s): _____

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? ☐Yes ☑No

If Yes:

i. Nature of the natural landmark: ☐ Biological Community ☐ Geological Feature

ii. Provide brief description of landmark, including values behind designation and approximate size/extent: _____

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? ☐Yes ☑No

If Yes:

i. CEA name: _____

ii. Basis for designation: _____

iii. Designating agency and date: _____

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places? ☐ Yes ☑ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☐ Historic Building or District

ii. Name: _____

iii. Brief description of attributes on which listing is based:

_____

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): _____

ii. Basis for identification: _____

h. Is the project site within fives miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☐ Yes ☑ No

If Yes:

i. Identify resource: _____

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.): _____

iii. Distance between project and resource: _____ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☐ Yes ☑ No

If Yes:

i. Identify the name of the river and its designation: _____

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☐ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name _____ Date _____

EAF Mapper Summary Report

Wednesday, August 17, 2022 1:04 PM

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No
C.2.b. [Special Planning District]	Yes - Digital mapping data are not available for all Special Planning Districts. Refer to EAF Workbook.
C.2.b. [Special Planning District - Name]	NYS Heritage Areas:West Erie Canal Corridor
E.1.h [DEC Spills or Remediation Site - Potential Contamination History]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Listed]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.i [DEC Spills or Remediation Site - Environmental Site Remediation Database]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.1.h.iii [Within 2,000' of DEC Remediation Site]	No
E.2.g [Unique Geologic Features]	No
E.2.h.i [Surface Water Features]	No
E.2.h.ii [Surface Water Features]	No
E.2.h.iii [Surface Water Features]	No
E.2.h.v [Impaired Water Bodies]	No
E.2.i. [Floodway]	No
E.2.j. [100 Year Floodplain]	No
E.2.k. [500 Year Floodplain]	No
E.2.l. [Aquifers]	No
E.2.n. [Natural Communities]	No
E.2.o. [Endangered or Threatened Species]	No
E.2.p. [Rare Plants or Animals]	No

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

E.3.a. [Agricultural District]	No
E.3.c. [National Natural Landmark]	No
E.3.d [Critical Environmental Area]	No
E.3.e. [National or State Register of Historic Places or State Eligible Sites]	Digital mapping data are not available or are incomplete. Refer to EAF Workbook.
E.3.f. [Archeological Sites]	Yes
E.3.i. [Designated River Corridor]	No

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

Town Environmental Assessment Form Addendum

Attachment: BCPA-2022-05_application_090822 (26343 : Bcpa-2022-05)

TOWN OF AMHERST
State Environmental Quality Review
ENVIRONMENTAL ASSESSMENT FORM
-- ADDENDUM --

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305):*

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Wassaic Silt Loam	Severe	Moderate	Severe	Moderate	Moderate
Farmington Channery Loan	Severe	Severe	Severe	Severe	Severe
Ovid Silt Loam	Severe	Severe	Severe	Severe	Severe

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

   X Geotechnical report attached _____ Not applicable

3. Is your property located: On Youngs Road between Dodge and Klein Roads? ☐ Yes ☒ No
   On Wehrle Dr. between Spindrift Dr. and Oakwood Rd? ☐ Yes ☒ No

   If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.

4. Are there alternative locations on the site for this project? ☐ Yes ☒ No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:
   N/A

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request: ☐ Yes ☒ No

   Describe _____

   (Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project _____
   Source: 178 (Saturday peak) ITE Trip generation Manual

8. Will blasting occur during construction? ☐ Yes ☒ No (TBD - Depending on Rock Hardness)

9. Does the project propose to connect and be tributary to the public sanitary sewer system? ☒ Yes ☐ No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:
    40,340 average flow 161,360 peak flow.

    (Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)

11. Based on the Town's *2011 Reconnaissance Level Survey of Historic Resources,* is your property 'blue-rated' for historic significance? ☐ Yes ☒ No

WHEREAS the Town of Amherst Planning Board on Thursday, September 22, 2022 held a public hearing on the proposed amendment to the Bicentennial Comprehensive Plan to **mixed residential or medium residential** land use, and

WHEREAS the Planning Board has reviewed the Town of Amherst Bicentennial Comprehensive Plan, and

WHEREAS the Planning Board has reviewed plans and other materials regarding the proposal, and

WHEREAS the materials and plans have been referred to the Town's various review agencies, and

WHEREAS the Planning Board finds that:

A. The proposed request is generally consistent with the following sections of the Comprehensive Plan and the Zoning Ordinance:
- 3.0 Land Use and Development
- 4.0 Natural and Cultural Resources
- 5.0 Economic Development
- 6.0 Transportation

B. The subject property is suitable for uses permitted by the proposed land use designation.

C. The proposed change improves the balance of land uses, and meets a specific demand in the Town.

D. The land surrounding the subject request is comprised of single-family housing, office buildings and a fire department developed according to the requirements of the R-3, OB and CF districts respectively.

NOW THEREFORE BE IT RESOLVED that the Planning Board recommends to the Town Board in accordance with New York State Town Law §272-a Subsection 4, that the request to amend the Bicentennial Comprehensive Plan for the area depicted in the attached map be approved.
