Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.21-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.21.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Joseph Colern Jr., CEO

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Elma.

Table 9.21-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Elma	16	21	$52,116	9	4

Source: *FEMA 2020a, FEMA 2020b*
RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

Floodprone areas within the town include Winspear Road Flats. There are not any RiskMAP projects currently underway in the town. The Town of Elma's flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

The Building Department is responsible for floodplain management and the Code Enforcement Officer is the FPA. There are certified floodplain managers on staff in the town. The floodplain management staff would like additional assistance/training if available. NFIP administration services the town provides include permit review, town/planning boards, and an engineer. The Town of Elma determines if proposed development in an existing structure would qualify as a substantial improvement by reviewing the plan. The town explained that the barriers to running an effective NFIP program include plan reviews and board reviews. The town does not have any outstanding NFIP compliance violations that need to be addressed. Chapter 82 of the municipal code is the flood damage prevention ordinance and it is supported by Planning, Zoning, and Town Boards. The floodplain management program meets the minimum requirements. The most recent Community Assistance Contact (CAC) was on April 8, 2005 and the most recent Community Assistance Visit (CAV) was on March 29, 2012.

9.21.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Elma has identified the following routes and procedures to evacuate residents prior to and during an event.

- Jamison Road
- Rice Road
- Bullis Road
- Interstate 400 – Aurora Expressway

Sheltering

The Town of Elma has identified the following designated emergency shelters within the town.

Table 9.21-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Iroquois HS	2111 Girdle Rd	100	Yes	Yes	Yes	Unknown	-
Senior Center	3007 Bowen Road	100	Yes	Yes	Yes	Unknown	-
Jamison Rd FC	1071 Jamison Rd	100	Yes	Yes	Unknown	Unknown	-
Blossom FC	1000 N. Blossom Rd	100	Yes	Yes	Yes	Unknown	-

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Elma has identified the following sites suitable for placing temporary housing units.

Table 9.21-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Iroquois HS	2111 Girdle Rd	100	Parking Lot	Yes	Unknown
Senior Center	3007 Bowen Rd	100	Parking Lot	Yes	Unknown
Jamison Rd FC	1071 Jamison Rd	100	Parking Lot	Yes	Unknown
Blossom FC	1000 N Blossom Rd	100	Parking Lot	Yes	Unknown

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Elma has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.21-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Jamison Rd FC	1071 Jamison Rd	100	Open Lot	Yes	Unknown

9.21.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.21-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.21-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

** Only location-specific hazard zones or vulnerabilities identified.*

9.21.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Elma's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Elma has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.21-1. Town of Elma Hazard Area Extent and Location Map 1

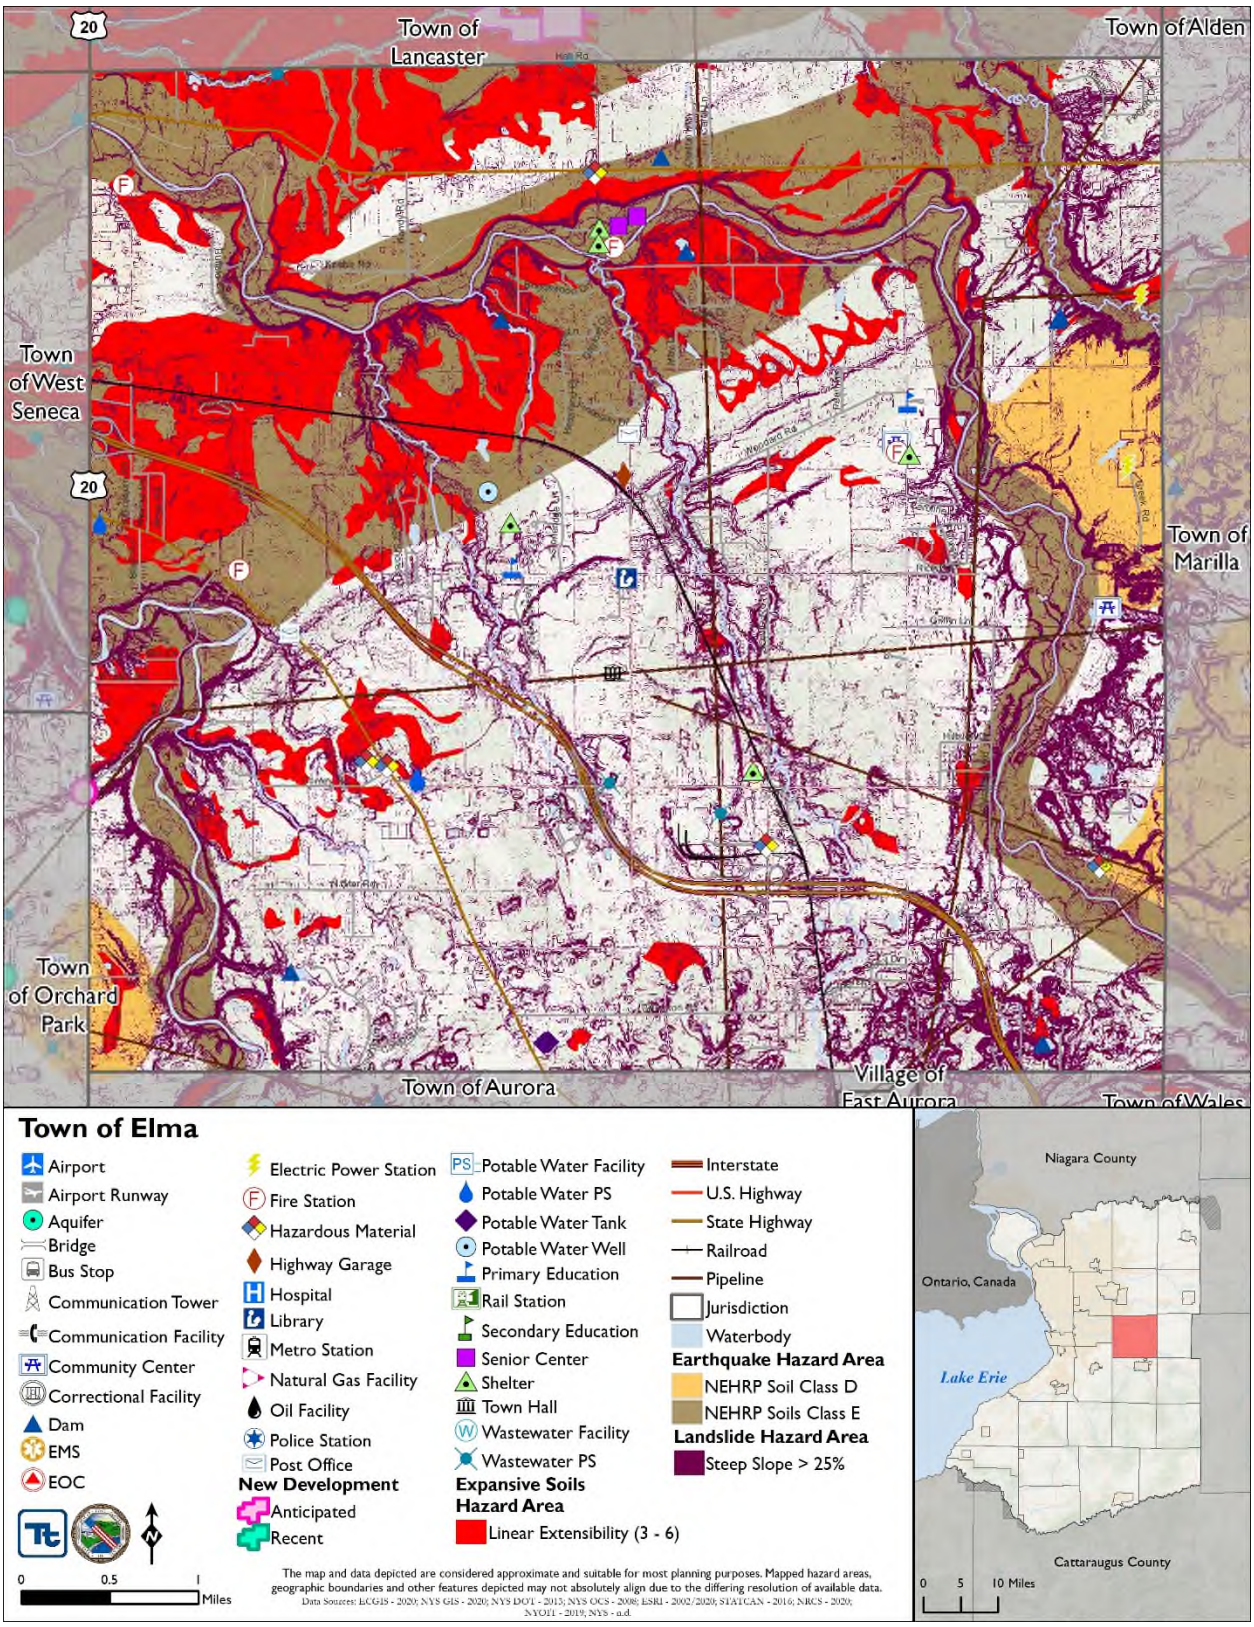
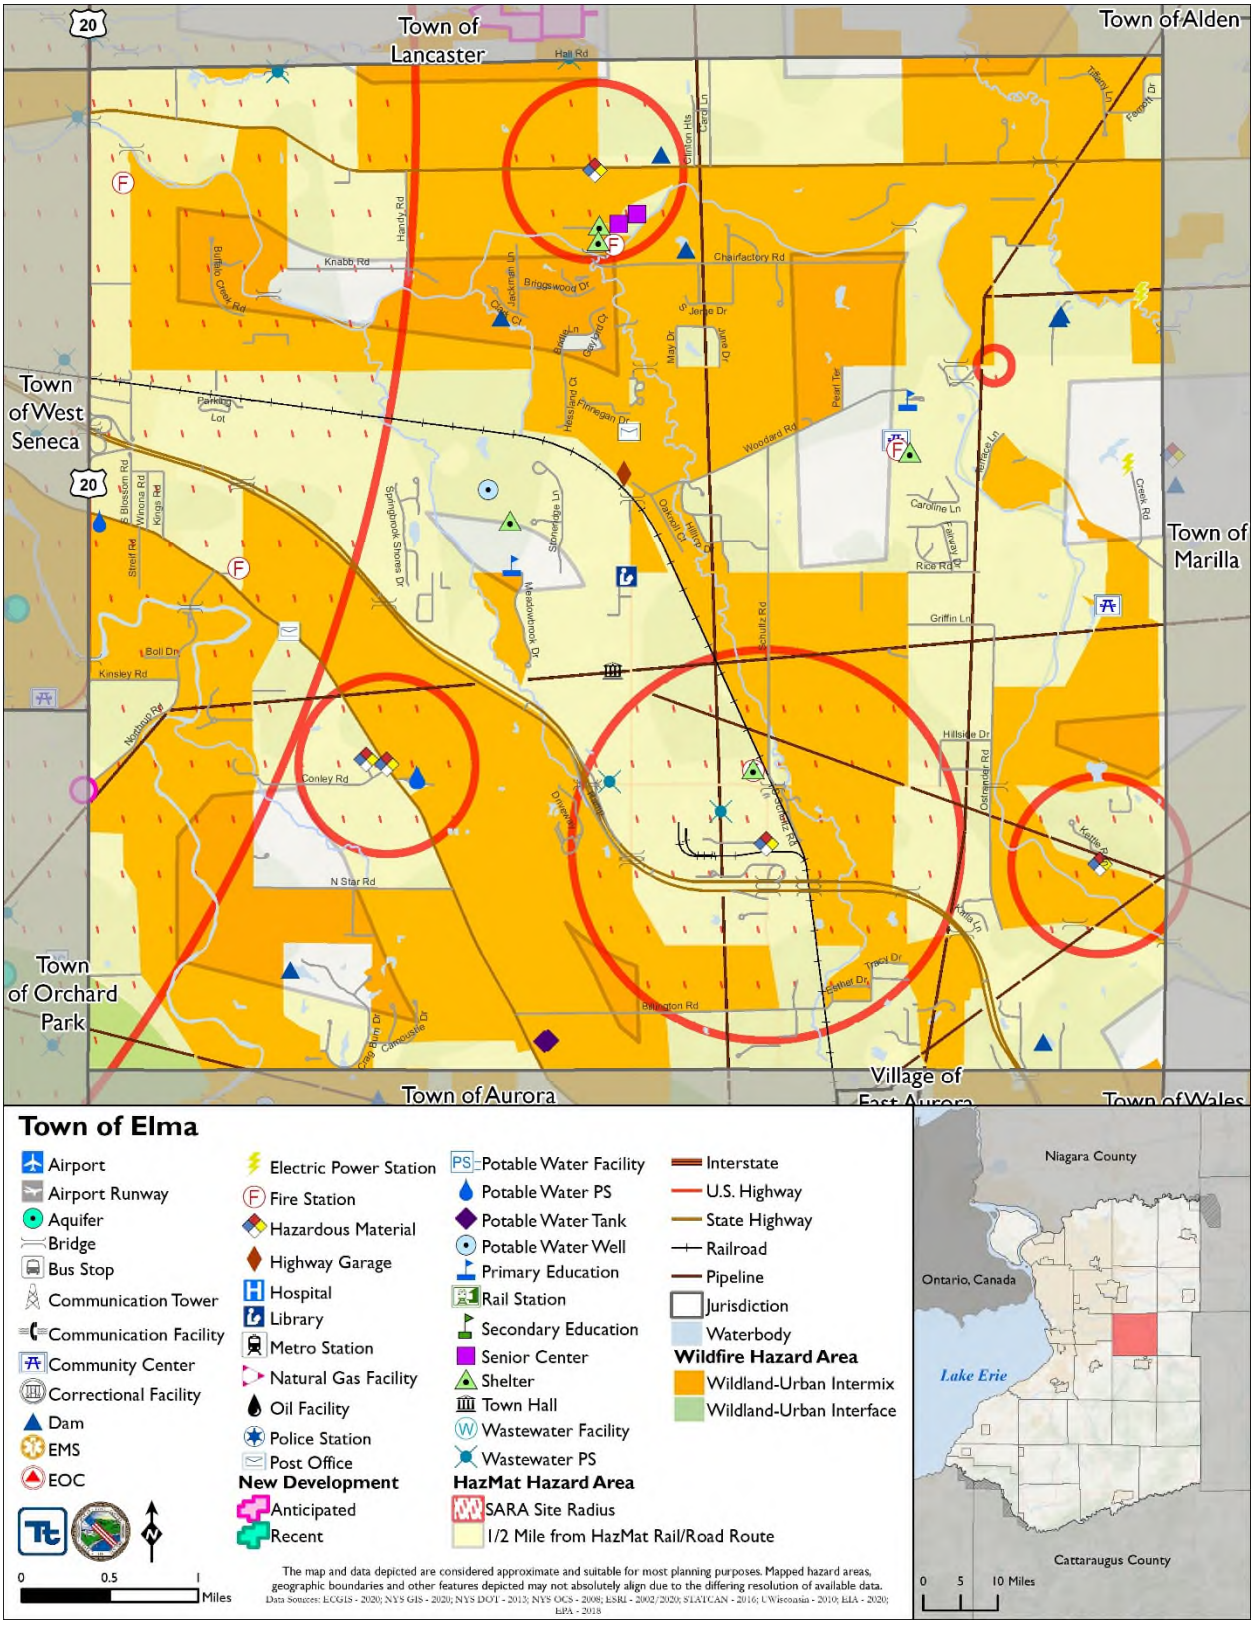
Figure 9.21-2. Town of Elma Hazard Area Extent and Location Map 2



Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.21-3. Town of Elma Hazard Area Extent and Location Map 3



Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Elma's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.21-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.21-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	Yes	Town of Elma did not report any damages.
August 11-15, 2015	Flash Flood	Yes	Town of Elma did not report any damages.
October 28-29, 2015	High Wind	Yes	Town of Elma did not report any damages.
November 6, 2015	Thunderstorm Wind	Yes	Town of Elma did not report any damages.
November 12, 2015	High Wind	Yes	Town of Elma did not report any damages.
November 18, 2015	High Wind	Yes	Town of Elma did not report any damages.
January 11, 2017	High Wind	Yes	Town of Elma did not report any damages.
March 8, 2017	High Wind	Yes	Town of Elma did not report any damages.
March 13, 2017	Winter Storm	Yes	Town of Elma did not report any damages.
July 20, 2017	Tornado	Yes	Town of Elma did not report any damages.
August 4, 2017	Thunderstorm Wind	Yes	Town of Elma did not report any damages.
December 10-15, 2017	Lake-effect Snow	Yes	Town of Elma did not report any damages.
December 24-29, 2017	Lake-effect Snow	Yes	Town of Elma did not report any damages.
January 2, 2018	Blizzard	Yes	Town of Elma did not report any damages.
October 6, 2018	Lightning	Yes	Town of Elma did not report any damages.
February 24, 2019	High Wind	Yes	Town of Elma did not report any damages.
February 24, 2019	Lakeshore Flooding	Yes	Town of Elma did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Town of Elma did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Town of Elma did not report any damages.
November 27, 2019	Lakeshore Flooding	Yes	Town of Elma did not report any damages.
January 12, 2020	Lakeshore Flooding	Yes	Town of Elma did not report any damages.
January 18, 2020	Lakeshore Flooding	Yes	Town of Elma did not report any damages.
2020-21	COVID 19	Yes	Multiple business closures, social distancing, required mask mandate and self-quarantine. Many municipal services were terminated as a result and reduced funding had a major negative impact on the town.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Elma's risk assessment results and data used to determine the hazard ranking.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Elma. The Town of Elma has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town had the following comments:

- Severe Winter storms are a threat but the municipality has a high capability to address them so will re rank high to medium.
- The Municipality has not had significant threat to utility failure and will re rank from high to medium.

Table 9.21-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Medium	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	Medium	Medium	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.21-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Elma Fire Station	Fire Station		X	No

Source: 2021 GIS

Identified Issues

After review of the Town of Elma's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Elma has identified the following vulnerabilities within their community:

- Creeks and drains within the town are getting overwhelmed due to sediment and debris during heavy rain events. Many of the existing stormwater infrastructure is undersized and under capacity and, with global warming and increasing magnitude of hazard events, the town has identified stormwater rightsizing as a top priority.
- Concern with occupant safety and continual operation of building during significant utility interruption.
- The town has an outdated floodplain management ordinance.
- The Donald Lischer Pond Dam, Rowley Dam, NYSEG – Stolle Road Substation, Bulls Road Substation, National Fuel Gas Supply- Porterville, and Speedway 9969 are in the earthquake hazard area.
- The Briggs Dam, Donald Lischer Pond Dam, Bulls Road Electric power station, R. Conley LLC, Speedway 9969 and Elma Post Office are located in the wildfire hazard area.
- Several critical facilities in the Town of Elma may be at risk of being exposed to hazardous materials incidents**.**
- The Charles Wick Pond Dam and Crag Burn Golf Course Pond Dam are located on steep slopes and may be at risk of landslides.
- The Donald Lischer Pond Dam and Bulls Road Electric Power Station may be at risk of experiencing damages caused by expansive soils.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.21.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.21-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Creek Flood Water and Sediment Deposit Monitoring for periodic survey and assessment of established drainage districts for maintenance needs such as sediment and debris removal	Flooding	OEM	Creek levels monitored by multiple town departments during high water events	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as Action 2022-Town of Elma-001 2. See wording in mitigation table below 3.
2	Survey and assess municipal and fire service buildings for storm preparedness and seismic hazard identification and minimization	Storms and Seismic Events	OEM	Concern with occupant safety and continual operation of building during significant utility interruption	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as Action 2022-Town of Elma-002 2. See wording in mitigation table below 3.
3	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	Elma Building Department	Outdated floodplain management ordinance	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as Action 2022-Town of Elma-003 2. See wording in mitigation table below 3.
4	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Elma Building Department	Outdated floodplain management ordinance	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as Action 2022-Town of Elma-003 2. See wording in mitigation table below 3.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Elma has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Elma participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.21-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake				X	X		X			
Expansive Soils				X			X			
Extreme Temperature										
Flood	X	X		X	X	X			X	
Hazardous Materials				X			X			
Landslide				X			X			
Pandemic										
Severe Storm	X			X	X					
Severe Winter Storm										
Utility Failure										
Wildfire				X			X			

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.21-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Elma would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Error! Reference source not found. provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.21-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Elma-001	Creek levels monitored by multiple town departments during high water events	1,2	Flood, Severe Storm	**Problem**: Creeks and drains within the town are getting overwhelmed due to sediment and debris during heavy rain events. Many of the existing stormwater infrastructure is undersized and under capacity and, with global warming and increasing magnitude of hazard events, the town has identified stormwater rightsizing as a top priority. **Solution**: The town will conduct a thorough assessment of the existing stormwater capacities of the municipality as well as the creek conditions. While dredging has for a while been the primary solution to mitigating drainage clogging, this is not a sustainable solution. Thus, the town will develop a management plan for streams and stormwater and increase existing stormwater drainage capacity across the town, i.e. increasing culvert size, ditch size, stream bed widening, etc. These measures would be implemented based on plan guidance. This mitigation action is solely for the assessment and development of a water and stormwater management plan.	No	None	5 years	OEM	$100,000	Flood Mitigation	HMGP, WQIP	High	LPR	PR
2022-Town of Elma - 002	Storm and seismic preparedness for municipal and fire service buildings	1,2,3,4	Severe Storms, Earthquake	**Problem**: Concern with occupant safety and continual operation of building during significant utility interruption. **Solution**: Survey and assess municipal and fire service	Yes	None	5 years	OEM	Low	Utility Failure	Municipal Budget	High	EAP	PR

				buildings for storm preparedness and seismic hazard identification. Conduct construction and retrofitting as needed.										
2022-Town of Elma - 003	Update the Floodplain Management Ordinance	1,2,3	Flood	**Problem**: The town has an outdated floodplain management ordinance. **Solution**: Update/revise floodplain management ordinances to comply with latest FEMA regulations to include the required 2' freeboard and be consistent with potential new FIRMs	No	None	3 years	Elma Building Department	Low	Flood	Municipal Budget	High	LPR	PR
2022-Town of Elma - 004	Elma Fire Station Flood Mitigation and Updating	1,2	Flood	**Problem**: The Elma Fire Station is in the 0.2% annual chance flood event and experiences flooding. **Solution:** The town shall work with the fire station operator to conduct a thorough assessment of the existing flooding vulnerabilities of the site and determine whether retrofitting and other mitigation measures might be adequate to address existing concerns. If not, the facility might need to relocate. Otherwise, the town would further, conduct additional needs assessment to determine other space and resources needed to expand facility capacity. This includes, additional fire station space for trucks, emergency water tanks/ fuel tanks, generators, storm lights, and shelter facilities. 				required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).										

Notes:
Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:
Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.21.9 Action Worksheets

The following action worksheets have been developed by the Town of Elma to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Creek and Stormwater Management Assessment and Plan		
Project Number:	2022-Town of Elma-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storms		
Description of the Problem:	Creeks and drains within the town are getting overwhelmed due to sediment and debris during heavy rain events. Many of the existing stormwater infrastructure is undersized and under capacity and, with global warming and increasing magnitude of hazard events, the town has identified stormwater rightsizing as a top priority.		
Action or Project Intended for Implementation			
Description of the Solution:	The town would need to conduct a thorough assessment of the existing stormwater capacities of the municipality as well as the creek conditions. While dredging has for a while been the primary solution to mitigating drainage clogging, this is not a sustainable solution. Thus, the town would need to develop a management plan for streams and stormwater and increase existing stormwater drainage capacity across the town, i.e. increasing culvert size, ditch size, stream bed widening, etc. These measures would be implemented based on plan guidance. This mitigation action is solely for the assessment and development of a water and stormwater management plan.		
Is this project related to a Critical Facility?	Yes ☐	No X	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No X	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Flood Reduction
Useful Life:	50 years	**Goals Met:**	All
Estimated Cost:	$100,000	**Mitigation Action Type:**	Local Plans and Regulations
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	5 years
Estimated Time Required for Project Implementation:	5 years	**Potential Funding Sources:**	HMGP, WQIP
Responsible Organization:	DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
	Action	**Estimated Cost**	**Evaluation**
Alternatives:	No Action	$0	Problem continues.
	Cap Any Flooding stormwater and streams	High	Not feasible and expensive
	Stormwater and Stream Management	High	Best Option

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Creek and Stormwater Management Assessment and Plan	
Project Number:	2022-Town of Elma-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This project protects property
Cost-Effectiveness	1	This is most cost effective in the long run
Technical	1	This project is technically feasible
Political	1	There is no political opposition
Legal	1	There are no legal issues
Fiscal	-1	The town needs resources
Environmental	1	This has positive environmental impact
Social	1	Has positive social impact
Administrative	0	Town Board
Multi-Hazard	1	Yes – Flood and Severe Storm
Timeline	1	Feasible
Agency Champion	1	Town DPW
Other Community Objectives	1	community safety
Total	11	
Priority (High/Med/Low)	High	

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Elma Fire Station Flood Mitigation and Updating		
Project Number:	2022- Town of Elma -004		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Elma Fire Station is in the 0.2% annual chance flood event and experiences flooding. In the case of a flood, the facility is potentially vulnerable to flooding. Additionally, the facility is outdated and has limited capacity in terms of expansion of emergency services for the community.		
Action or Project Intended for Implementation			
Description of the Solution:	The town shall work with the fire station operator to conduct a thorough assessment of the existing flooding vulnerabilities of the site and determine whether retrofitting and other mitigation measures might be adequate to address existing concerns. If not, the facility might need to relocate. Otherwise, the town would further, conduct additional needs assessment to determine other space and resources needed to expand facility capacity. This includes, additional fire station space for trucks, emergency water tanks/ fuel tanks, generators, storm lights, and shelter facilities.		
Is this project related to a Critical Facility?	Yes X	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes X	No ☐	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	Flood mitigation and hazard preparation.
Useful Life:	30 years	**Goals Met:**	1,2
Estimated Cost:	$100,000-$500,000	**Mitigation Action Type:**	Structural and Infrastructure Projects
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	5 years	**Potential Funding Sources:**	HMGP, Fire Management Assistance Grant Program, Assistance to Firefighters Grant Program, Department of Homeland Security Grant Program (HSGP)
Responsible Organization:	Town of Elma Office of Emergency Management/ Fire Station	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation and Emergency Preparedness
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Close Existing Facility	Low	Capacity Decreases and existing issue continues
	Retrofit and Upgrade Existing Facility	High	Best option in the long run
Progress Report (for plan maintenance)			
Date of Status Report:

9.22 Town of Evans

This section presents the jurisdictional annex for the Town of Evans. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Evans's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.22.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Evans's hazard mitigation plan primary and alternate points of contact. The Town of Evans followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: Planning & Community Development, Code Enforcement, Engineering. The Director of Planning & Community Development represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.22-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: William Smith, Director of Planning & Community Development Address: 8787 Erie Rd., Angola, NY 14006 Phone Number: 716-549-0945 Email: wsmith@townofevans.org	Name/Title: Corey Baskerville, Supervising Code Enforcement Officer & MS4 Officer Address:8787 Erie Rd., Angola, NY 14006 Phone Number: 716-549-5753 Email: cbaskerville@townofevans.org
NFIP Floodplain Administrator	
Name/Title: Corey Baskerville, Supervising Code Enforcement Officer & MS4 Officer Address:8787 Erie Rd., Angola, NY 14006 Phone Number: 716-549-5753 Email: cbaskerville@townofevans.org	
Additional Contributors	
Name/Title: Dave Johnson, Town Engineer Method of Participation: Provided Data and Information	

9.22.2 Municipal Profile

The Town of Evans is 41.5 square miles and is bounded on the north by the Town of Hamburg, on the east by the Town of Eden, on the south by the Town of Brant and on the west by Lake Erie. The town has a long and rich history as a waterfront and railroad community. In 1804, the first white settler to the town arrived on the west side of Eight-Mile Creek near its confluence with Lake Erie and opened a tavern, the Frontier House. The town incorporated in 1821 and derived its name from David E. Evans, an agent of the Holland Land Company and nephew of land agent Joseph Ellicott (Town of Evans website, accessed 2020). Immigrants

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

came to the town after the War of 1812. Later in the century, proximity to Lake Erie spurred the development of seasonal residences. While Evans Center remained the community's main hub, Evans Station, to the south, steadily developed due to construction of the Buffalo and State Line Railroad. As the railroad stimulated more growth a post office was founded and this area eventually incorporated as the separate Village of Angola (Town of Evans & Village of Angola Comprehensive Plan, 2019).

According to the U.S. Census, the 2010 population for the Town of Evans was 14,229. The estimated 2019 population was 13,782, a 3.1 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.2 percent of the population is 5 years of age or younger and 21.5 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.22.3 Jurisdictional Capability Assessment and Integration

The Town of Evans performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 0). The Town of Evans's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Evans. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.22-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	2020 NYS Building Standards	local	Building Dept./Town of Evans
Comments: NYS Uniform and Energy Code 2020; The fact that a building or structure exists in violation of the applicable provisions of the New York State Uniform Fire Prevention and Building Construction Code or of an earlier Town building code, as the case may be, or of any local law of the Town of Evans, when found as other violations in addition to conditions deemed to be in violation of this chapter, may be considered in determining whether a building or structure is hazardous, dangerous or unsafe.					
Zoning Code	Yes	Yes	Chapter 200, Evans Town Code	local	Planning Dept./Town of Evans

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The purpose of this chapter and the intent of the legislative authority in its adoption is to promote and protect to the fullest extent permissible the environment of the Town and its public health, safety, convenience, comfort, prosperity and the general welfare by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, lot coverage and location of structures; by regulating and limiting population density; and, for the aforesaid purposes, to divide the land within the limits of the Town into districts of such number and dimensions in accordance with the objectives of the Comprehensive Plan; and to provide procedures for the administration and amendment of said chapter.					
Subdivision Ordinance	Yes	Yes	Chapter 178, Evans Town Code	local	Planning Dept./Town of Evans
Comment: It is declared to be the policy of the Planning Board and Town Board to consider the subdivision of land and the subsequent development of the subdivided plat as subject to control by the Town for the orderly, planned, efficient, physical and economic development of the town. This means, among other things, that land to be subdivided shall be of such character that it can be used safely for building purposes without danger to health or peril from fire, flood or other menace, that proper provision shall be made for drainage, water supply, sewerage and other needed improvements; that all proposed lots shall be so laid out and of such size as to be in harmony with the development pattern of the neighboring properties; that the proposed streets shall compose a convenient system conforming to the Official Map, if such exists, and shall be properly related to the proposals shown on the Master Plan, if such exists, and shall be of such width, grade and location as to accommodate the prospective traffic, to facilitate fire protection and to provide access of fire-fighting equipment to buildings; and that proper provision shall be made for open spaces for parks and playgrounds.					
Stormwater Management Ordinance	Yes	Yes	Chapter 170 and Chapter 200. Article XII of Evans Town Code	local	Engineering (CPL) and Building Dept./Town of Evans
Comment: The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the Town of Evans through the regulation of nonstormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with the requirements of the SPDES General Permit for MS4s.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	2019 Evans-Angola Comprehensive Plan	Local	Planning Dept./Town of Evans
Comment: See Comprehensive Plan, below					
Site Plan Review	Yes	Yes	Chapter 200-42, Evans Town Code	Local	Planning Dept./Town of Evans
Comment: The content of the site plan shall be approved by the Building Inspector prior to filing. The approved submission shall be filed with the Town Clerk, who, upon payment of the required fees, shall transmit it to the Building Inspector for distribution to such officials and agencies as he may deem appropriate for their review, report and recommendation. The site plan shall include or be accompanied by the following information, prepared by a licensed engineer, architect, landscape architect, surveyor or attorney as appropriate. The number of copies shall be determined by the Building Inspector.					
Environmental Protection Ordinance	Yes	Yes	State Environmental Quality Review Act	local	Planning Dept./Town of Evans
Comment: New State Environmental Quality Review Act (SEQR) Title 6 NYCRR Part 617 Regulations are in effect as of January 1st, 2019					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 113, Evans Town Code	Local	Code Enforcement Officer
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. • It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement					

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 170 and Chapter 200. Article XII of Evans Town Code	local	Engineering (CPL) and Building Dept./Town of Evans
Comment: This requires urbanized areas (local governments) to develop a stormwater management program that will reduce the amount of pollutants carried by stormwater during storm events to waterbodies to the "maximum extent practicable". The goal of the program is to improve water quality and recreational use of waterways. A Municipal Separate Storm Sewer Systems Permit, GP-0-15-003 is required.					
Emergency Management Ordinance	No	No	-	-	-

Other	No	No	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	Yes	Town of Evans/ Village of Angola Comprehensive Plan Update January 14, 2019	Local	Planning Dept./Town of Evans
Comment: Goals/Objectives to reduce vulnerability: 1) To preserve and enhance the character of the Town and Village through high quality design, responsible stewardship and application of sustainability principles. 2) Support infrastructure that balances growth and development with environmental quality, specifically as related to stormwater, utilities, renewable energy and agricultural preservation. 3) Protect water quality and, prevent shoreline erosion, and protect sensitive habitats. Actions to reduce vulnerability: 1) Prepare an engineering study to address infrastructure issues and deficiencies, especially related to stormwater and drainage concerns in the Town and Village. 2) Prevent nutrient runoff and excessive phosphorus build-up from fertilizer use; promote stormwater retention and treatment practices to remove nutrients and minimize erosion; ensure proper setbacks from waterbodies and buffer areas. 3) Develop a conservation zoning overlay that provides a regulating framework to protect sensitive environmental features. 4) Develop and implement a green streets- green site policy to encourage the use of a natural systems approach to help address current stormwater and flooding concerns, manage stormwater, reduce flows, improve water quality and enhance watershed health.					
Capital Improvement Plan	Yes	No	Ongoing	Local	Finance Office
Comment: Within Annual Budget					
Disaster Debris Management Plan	No	No	-	-	-
Comment: None					
Floodplain or Watershed Plan	Yes	Yes	Chapter 113, Evans Town Code	local	Building Dept./Town of Evans
Comment: The State Pollutant Discharge Elimination System (SPDES) permit program is a primary way the DOW implements its watershed protection and restoration activities.					
Stormwater Plan	Yes	No	Stormwater Management Program Plan May 1, 2015 – April 30, 2017	local	Supervisor, Planning

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: Goals/Objectives to reduce vulnerability: 1) To reduce the discharge of pollutants to the maximum extent practicable. Actions to reduce vulnerability: 1) Prepare public education posters that can be placed within municipal buildings, libraries, and schools. 2) Implement enforcement action per the Local Law to prohibit illicit discharges, activities and connections to separate storm sewer system.

Shoreline Management Plan	Yes	Yes	2013 Local Waterfront Revitalization Program (currently being updated) Waterfront Ordinance, 2011	Local	Building Dept./Town of Evans
Comment: Goals/Objectives to reduce vulnerability: 1) The preservation, enhancement and utilization of the natural and man-made resources of the waterfront area of the Town occur in a coordinated and comprehensive manner to ensure a proper balance between the protection of natural resources and the need to accommodate growth and economic development. 2) To prevent the beneficial use of waterfront resources while preventing the loss and degradation of living waterfront resources and wildlife; adverse impacts to historic structures; diminution of open space areas or public access to the waterfront; disruption of natural waterfront processes; impairment of scenic, cultural or historical resources; losses due to flooding, erosion and sedimentation; impairment of water quality; and permanent adverse changes to ecological systems. Actions to reduce vulnerability: 1) Ensure that development occurs where adequate public infrastructure is available to reduce health and pollution hazards (LWRP Policy 5). 2) Minimize flooding and erosion hazards through nonstructural means, carefully selected, long-term structural measures and the appropriate siting of structures (LWRP Policies 11, 12, 13, 14, 16, 17).

development plan, etc.)					
Comment: Goals/Objectives to reduce vulnerability: 1) Formulate strategies to eliminate structures presently located on problematic sites limited by access or vulnerable to environmental impacts such as flooding or erosion. 2) Utilize storm water management techniques to reduce flooding within the Lake Erie Beach Neighborhood. 3) Ensure storm water management is considered for all new construction to reduce or eliminate storm water runoff impacts upon existing development. Actions to reduce vulnerability: 1) Acquire available properties along Muddy Creek and Fern Brook as they become available as a means to protect the natural rights of way and prevent new housing from developing in the floodplains. 2) Employ progressive storm water management techniques to combat persistent flooding. 3) Develop a comprehensive Storm Water Management Plan for Lake Erie Beach and surrounding neighborhoods and add techniques to zoning code. 4) Use bio-retention storage areas to collect and filter water. 5) Reduce and disconnect impervious areas such as parking lots to reduce volume and velocity of runoff. 6) New development should be prohibited from located within the adjacent floodplain and each proposed project should be strictly reviewed for flooding impacts in adjacent neighborhoods. 7) Trails in flood prone areas should be crushed gravel and stone construction.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Evans to oversee and track development.

Table 9.22-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning and Building Departments

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Yes, floodplain permits are tracked.
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The town still maintains are large amount of vacant and buildable land.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Evans and their current responsibilities which contribute to hazard mitigation.

Table 9.22-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Division Provides: Application assistance for: • Site Plan Review • Rezoning • Major and Minor Subdivisions • Special Use Permits • Local Waterfront Revitalization Program (LWRP) Consistency Review • Telecommunication Towers • Commercial, Agricultural and Residential Windmills General Assistance with: • Zoning and Development issues • The New York State Environmental Quality Review (SEQR) Process • The Town of Evans Comprehensive Plan • Development in the Local Waterfront Revitalization Area • Agricultural Protection • Town of Evans Stormwater Management
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals is a seasoned board comprised of members with varied background and experience. The Zoning Board of Appeals is charged with addressing the requests by residents to either obtain an interpretation of the zoning ordinance or zoning map designation; appeal to a type of property use for something other than what is allowed; appeal for variance to a zoning ordinance; which is generally due to the size or location of a proposed new structure.
Planning Department	Yes	The role of planning in the Town of Evans has diversified to include issues related to long-term Comprehensive planning and zoning, as well as the day-to-day issues associated with growth and development. The Town has adopted a Comprehensive Plan, a Local Waterfront Revitalization Program and an Agricultural Protection Plan, and the implementation of the recommendations contained in these documents.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Conservation Advisory Commission makes recommendations to the Towns Board regarding open space conservation program, and conservation priorities for the Town of Evans.
Open Space Board/Committee	No	-

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Economic Development Commission/Committee	Yes	The Evans Town Board formed the Economic Development Advisory Committee in May 2002, to assist with development issues and implementation of the Master Plan. The Committee currently consists of 12-members from various professions such as: banking; legal; real estate; industrial development; local government; small business; and, health and human services. EDAC, a recommending committee, has been actively engaged in local economic development matters, working to enhance development opportunities in the Town of Evans. Most recently, EDAC has been involved in advancing the Residential Tax Enhancement Project as well as the Lake Erie Beach Neighborhood Revitalization Strategy.
Public Works/Highway Department	Yes	The main mission of the Highway Department is the maintenance and improvement of a network of approximately 140 lane miles of town highways for the safe operation of the motoring public. In recent years, the Department has taken on the additional task of new road construction. The Highway Superintendent is the custodian of the right-of-way. In addition to road maintenance, within the borders of the right-of-way, the department maintains drainage and the removal of brush and grass cutting. Recently, the Highway Department has added the service of residential brush pickup for town residents and the community. The department is accountable to keep four bridges in repair. During the winter months, the department is responsible for snow removal and ice control not only to the Town of Evans' 140 lane miles of town road, but also an additional 70 lane miles of County of Erie highways.
Construction/Building/Code Enforcement Department	Yes	It is the mission of the Code Enforcement Department of the Town of Evans to work in partnership with the Evans Town Board, Planning Division, Director of Community Development and the Police Department to promote and maintain a safe and desirable living and working environment. We help maintain or improve the quality of our community by administering a fair and unbiased enforcement program to correct violations of the Building Codes of New York, Municipal Codes, and land use requirements.
Emergency Management/Public Safety Department	Yes	Police Department
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED Emergency Alerts
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Responsibility of the Highway Department (see above)
Mutual aid agreements	Yes	-
Other	Yes	Climate Smart Committee Task Force
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Town Engineer
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Engineer
Planners or engineers with an understanding of natural hazards	Yes	Town Engineer
Staff with expertise or training in benefit/cost analysis	Yes	Town Engineer

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Professionals trained in conducting damage assessments	Yes	Town Engineer, Code Enforcement Officer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Planning Department
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	Yes	Engineering
Emergency Manager	Yes	-
Grant writer(s)	Yes	Planning Department
Resilience Officer	No	-
Other	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Evans.

Table 9.22-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Evans.

Table 9.22-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Managed by the Supervisor's Office.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Personnel skilled or trained in website development	Yes	The Town Clerk currently manages website; however, the Town is in process of hiring a new communications person to handle website.
Hazard mitigation information available on your website	Yes	Available on the Planning and Building Dept pages.
Social media for hazard mitigation education and outreach	Yes	The town regularly uses its social media pages to communicate with residents about potential hazards.
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Various Committees, including Drainage Committee that works to address flooding issues.
Other programs already in place that could be used to communicate hazard-related information	Yes	The town has developed an online Flood Reporting Systems connected to the town's website.
Warning systems for hazard events	Yes	See above
Natural disaster/safety programs in place for schools	Yes	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Evans.

Table 9.22-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	In Process	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	-
NYSDEC Climate Smart Community	In Process	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.22-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	Moderate
Extreme Temperature	Moderate
Flood	Moderate
Hazardous Materials	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Strong
Utility Failure	Moderate
Wildfire	Moderate

**Strong* *Capacity exists and is in use*

Moderate *Capacity may exist; but is not used or could use some improvement*

Weak *Capacity does not exist or could use substantial improvement*

9.22.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Corey Baskerville, Supervising Code Enforcement Officer & MS4 Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Evans.

Table 9.22-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Evans	106	100	$450,489	24	71

Source: *FEMA, 2019*

Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*

RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The town has identified areas within the Fern Brook and Muddy Creek Watersheds in the Lake Erie Beach and Grandview neighborhoods as flood prone areas within the town. Ice jams are frequent on Big Sister Creek in the Evans Center Neighborhood. There are numerous property owners within the town that are interested in flood mitigation projects for their properties and the town keeps this list to provide support. However, there have been no properties that have been mitigated by either elevation or acquisition. There are currently no RiskMAP projects being undertaken within the town. The town also notes that the flood hazard maps available to the town do not accurately address flood risk because they do not account for ice jam flooding.

Substantial Damage determinations are made by the Town Building Inspector, who determines a damage value threshold for the property.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The Town of Evans Building Department is responsible for floodplain management. While there are certified floodplain managers (CFM) within the town, assistance for staff with a full overview of the Flood Assistance Program has been requested to support the floodplain management efforts. Barriers to an effective NFIP program include the employment of qualified personnel. The town reviews all floodplain building permit applications with engineering guidance and support from a retained engineering consultant. The Town Building Inspector determines if proposed developments qualify as "substantial improvements." The Planning Board and Town Board both consider floodplains and take flood risk into account when developing codes and reviewing site plans.

There are currently no outstanding compliance issues within the town. The most recent Community Assistance Visit (CAV) was completed on March 16, 2020.

Chapter 113 of the Town of Evans Town Code details the local Flood Damage Prevention Ordinance, last amended on April 17, 2019. The floodplain management program meets minimum requirements. The town is in the process of joining the Community Rating System (CRS) program.

9.22.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Evans has identified the following routes and procedures to evacuate residents prior to and during an event.

- Any evacuation would be directed from town roads to county roads and finally to state roads (Routes 5 and 20) that are accessible. The NYS Thruway would be considered if necessary and possible. NYS detour routes would be used if necessary. Evacuation procedures and response plans are kept at the Police Department. These plans would be coordinated with NITTEC (Niagara International Transportation Technology Coalition) as well as other support local, county, and state agencies.

Sheltering

The Town of Evans has identified the following designated emergency shelters within the Town.

Table 9.22-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Highland VFC	1 George Nablo, Derby	250	Yes	Yes	Yes	Ambulance, basic first aid	Fire/Rescue
N Evans VFC	6980 Versailles, Derby	150	Yes	Yes	Yes	Basic first aid	Fire/Rescue
Evans Center VFC	8298 Erie Road, Angola	50	Yes	Yes	Yes	Ambulance – basic first aid	Fire/Rescue

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Lake Erie Beach VFC	9483 Lake Shore, Angola	150	Yes	Yes	Yes	Ambulance – basic first aid	Fire/Rescue

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Evans has identified the following sites suitable for placing temporary housing units.

Table 9.22-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify Permanent Housing Locations. See Mitigation Action #2022-T. Evans-001.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Evans has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.22-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify Permanent Housing Locations. See Mitigation Action #2022-T. Evans-001.					

9.22.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.22-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.22-13. Recent and Expected Future Development

9.22.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Evans's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Evans has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.22-1. Town of Evans Hazard Area Extent and Location Map 1

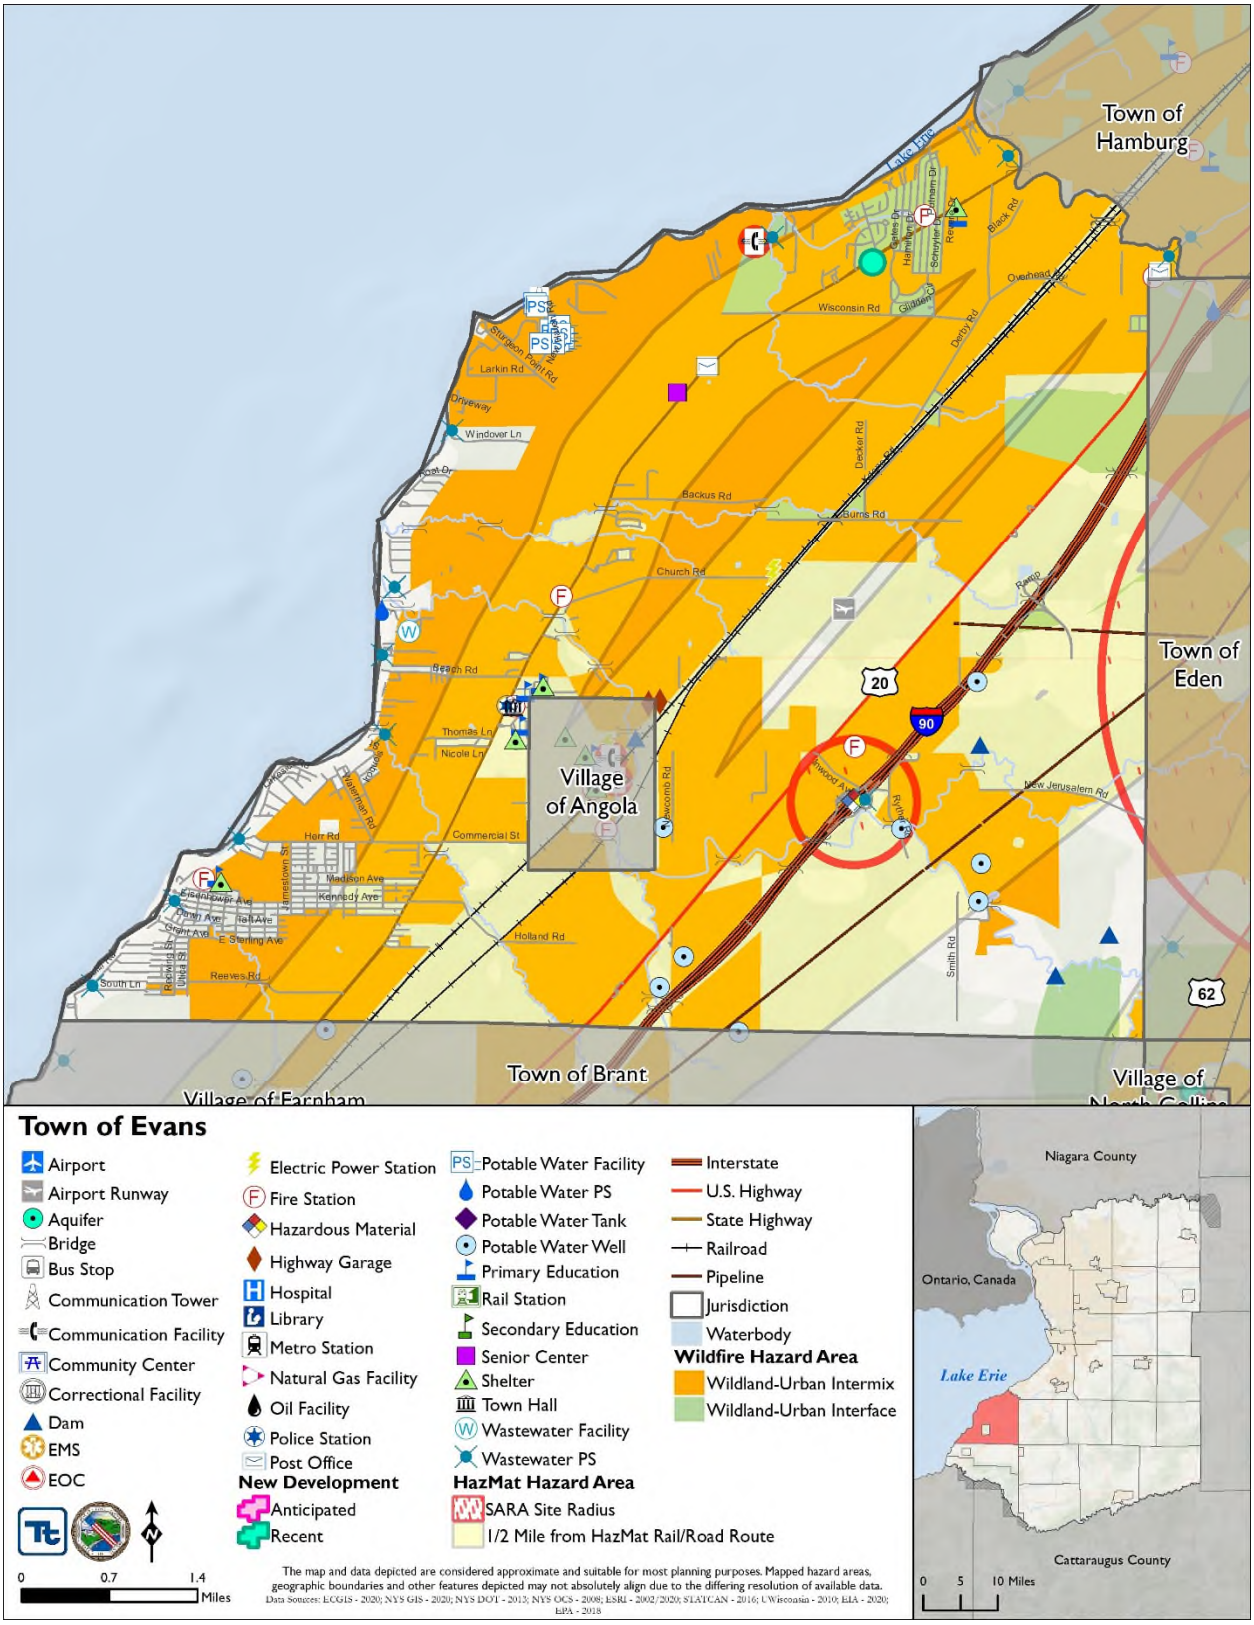
Figure 9.22-3. Town of Evans Hazard Area Extent and Location Map 3



Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Evans's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.22-14 provides details regarding municipal-specific loss and damages the Town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.22-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 12, 2015	High Wind	No	A strong cold front, followed y strong winds impacted the coasts of Lake Erie and Ontario. Wind gusts were measured in excess of 60 mph.	In Evans Center, a tree was knocked down by the wind, cutting off a gas line to a home, then striking a car.
February 4, 2019	Flood	No	Record high temperatures occurred on February 4, resulting in almost total snow melt and ice break off on local rivers.	Route 5 was closed in Evans in both directions due to flooding of the Big Sister Creek.
October 27-November 1, 2019	Lakeshore Flooding and High Winds DR-4472-NY	Yes	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	Lakeshore flooding occurred as a result of the storm due to wave action and wave run-up, particularly in lower elevation areas along the Lake Erie shoreline. Losses included the following: • Damage to private property (seawalls, foundations, docks, etc.) in the amount of approximately $750,000. • Damage to Evans Town Park fence in the amount of in the amount of approximately $15,000 • Damage to Lake Erie Beach Park (bridge and retaining wall) in the amount of approximately $250,000 • Damage to Sturgeon Point Marina (breakwater, electrical, and revetment) in the amount of approximately $2,850,000. • More than 500 NYSEG customers lost power in Evans and Angola.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
October 31-November 1, 2019	High Wind DR-4472-NY	Yes	See above	While high winds were also the cause of the above listed damage along the shoreline, both emergency and town wide debris removal from high winds (such as downed trees and limbs) was estimated at a cost of approximately $200,000 to the town.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Evans's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Evans. The Town of Evans has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- In recent years, there has been ongoing and significant erosion of both public and private property along the Lake Erie shoreline due to record high water levels combined with strong winds, wave action, wave run-up in creeks and streams, and recurring seiches. This includes both shoreline erosion as well as streambank erosion around the outlets of several Lake Erie tributaries located in the Town of Evans. This coastal erosion has also been occurring around a number of public parks, impacting the quality of life for residents and local tourism economy.
- Historically, the frequency and intensity of earthquakes in the town has been extremely low. The town is not aware of any new and imminent threats that would warrant the high risk ranking, therefore it has been decreased to medium.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- An increase in the frequency of localized flooding has occurred throughout the town as a result of heavy rainfalls and inadequate stormwater infrastructure in certain areas. The most problematic in recent years has been the Fern Brook and Muddy Creek watersheds in the southern portion of the town, such as the Lake Erie Beach neighborhood. An increase in coastal flooding has also occurred due to high water levels and extreme winds resulting in wave action and wave-run up along several tributaries.
- Historically, the frequency and intensity of wildfires in the town has been extremely low. The town is not aware of any new and imminent threats that would warrant the high risk ranking, therefore it has been decreased to medium.

Table 9.22-15. Hazard Ranking Input

Coastal Erosion*	Cyber Attack	Earthquake*	Expansive Soils	Extreme Temperature	Flood*	Hazardous Materials
High	Medium	Medium	Medium	Medium	High	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire*
Low	High	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.22-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Lake Bay Grove Wastewater Pump Station	Water	Yes	Yes	2022-T. Evans-002
Point Breeze #1 Wastewater Pump Station	Water	No	Yes	2022-T. Evans-002
Point Breeze #2 Wastewater Pump Station	Water	No	Yes	2022-T. Evans-002

Source: Effective DFIRM

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Town of Evans's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Evans has identified the following vulnerabilities within their community:

- There has been significant erosion of both public and private property along the Lake Erie shoreline due to record high water levels combined with strong winds and recurring seiches. This includes both shoreline erosion as well as streambank erosion around the outlets of several Lake Erie tributaries located in the Town of Evans, such as Muddy Creek.
- Extreme wind storms have increased in magnitude and frequency causing significant damage along the Lake Erie shoreline as well as throughout the town. Shoreline damage in the form of coastal erosion has occurred from more extreme winds and subsequent wave action as well as wave run-up along several tributaries. Extreme wind damage has also occurred throughout the entire town in the form of downed trees and general property damage.
- An increase in the frequency of localized flooding has occurred throughout the town as a result of heavy rainfalls and inadequate stormwater infrastructure in certain areas. The most problematic in recent years has been the Fern Brook and Muddy Creek watersheds in the southern portion of the town, such as the Lake Erie Beach neighborhood. An increase in coastal flooding has also occurred due to high water levels and extreme winds resulting in wave action and wave-run up along several tributaries.
- There has been an increase in ice jams in recent years resulting in localized flooding along Big Sister Creek.
- An increase in wave action and wave run-up along the shoreline and several Lake Erie tributaries in the town has led to significant damage to the lakefront properties (including public facilities) as well as acceleration of streambank erosion issues.
- While not necessarily an increase in frequency, there has been an increase in the overall intensity of winter storms in terms of both heavy snowfall and high winds.
- Flood-prone areas include:
    - Localized flooding throughout the Muddy Creek watershed in the Lake Erie Beach neighborhood.
    - Coastal flooding and erosion due to wave-run up at the mouth of Muddy Creek.
    - Localized flooding throughout the Fern Brook watershed in the Lake Erie Beach and Grandview neighborhoods.
    - Localized flooding around the Pike Creek watershed in the Derby neighborhood.
    - Ice jamming and upstream flooding occurring on Big Sister Creek near Evans Center.
    - Flooding and erosion of Lake Erie coastal neighborhoods such as Shore Meadows, Lake Erie Beach, Grandview Bay, and Angola on the Lake
    - Flooding and erosion Lake Erie coastal public facilities such as Sturgeon Point Marina, Evans Town Park, Lake Erie Beach Park (town-owned), Wendt Beach County Park and Bennet Beach County Park.

9.22.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.22-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Creeks and stream clean out	Flooding	LEBVFC and Highway Dept.	Help low area not flood	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-003 2. The town is working with Erie County Soil and Water to identify areas of local creeks and streams in need of clearing. The town is also embarking on a comprehensive drainage study of the Fern Brook and Muddy Creek watersheds, which will also include recommendations for stream clearing and debris removal. Responsible parties are Planning, Engineering and Highway Depts.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
2	Program to update public about disasters	All Hazards	LEBVFC	Help get word out on what to do in a disaster	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-004 2. Town is working with both online and print materials to spread information about flood mitigation and to quickly notify residents of potential flood issues/events. Responsible parties are Planning, Community Development, Code Enforcement, Fire and Police Depts.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
3	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances	Flooding	Building Dept.	Not Identified	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-005 2. Town is working to improve in-house floodplain management capabilities. Currently utilizing the engineering consultant but training Code Enforcement Officers to fill this role. Responsible parties are Code Enforcement and Engineering Depts.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
4	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Building Dept.	Not Identified	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-006 2. Town is working to address new pending FIRMs which resulted in FEMA's recent Coastal Mapping of Great Lakes Communities to include wave run-up.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
5	Require staff involved in floodplain management and ordinance enforcement to become Certified Floodplain Managers	Flooding	Building Dept.	Not Identified	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-007 2. Town is working to improve in-house floodplain management capabilities. Currently utilizing the engineering consultant but training Code Enforcement Officers to fill this role. Responsible parties are Code Enforcement and Engineering Depts.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. 6	Join the Community Rating System (CRS)	Flooding	Building Dept.	Not Identified	In Progress	Cost	-	1. Include in 2022 HMP as 2022-T. Evans-008 2. The town has been working with NYSDEC Western Flood Hub representative and Erie County Dept of Env and Planning to address any outstanding violations (complete), and to now register, build resources, and develop an initial ranking in the CRS program. Responsible parties are Planning, Code Enforcement and Engineering Depts.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Evans has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

Mitigation Action	Responsible Party / Lead Agency	Comments/Details
Shoreline Management Solutions at Lake Erie Beach	Planning, Engineering and Parks Depts.	In-progress – The goal of the Plan is to identify innovative strategies and sustainable shoreline management practices, including both nature-based and structural alternatives. Funded in part by the NYSDEC and town.
Mitigation Enhancements to Sturgeon Point Marina Breakwater	Planning, Engineering and Parks Depts.	In-progress – Town is currently working on repair and design of mitigation measures to help ensure the long-term stability of the western Sturgeon Point Marina Breakwater which protects the public harbor. This is also a project under review with FEMA from the October 31, 2019 storm. Partially funded by, NYSDOS, ESD and the town.
Townwide Drainage Study	Planning and Engineering Depts.	The town has developed a scope of work and applied for funding for a town-wide drainage study. The initial focus will be on the Fern Brook and Muddy Creek watersheds which historically have been the most problematic. Funding application currently submitted to FEMA.
Online Flood Reporting System	Planning and Engineering Depts.	The town has created an online tool for flood reporting, text notifications, and educational materials on preparedness and mitigation. Includes GIS mapping of reported flooding issues and known hazards. Partially funded by the Lake Erie Watershed Protection Alliance (LEWPA).
Revisions to Drainage Code	Planning, Engineering and Code Enforcement Depts.	The town has completed a first draft of a revision to Section 200. Article XII. Stormwater Management of the Evans Town Code in order to help address drainage issues associated with impacts of new development on drainage issues.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Evans participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 ‘Selecting Appropriate Mitigation Measures for Floodprone Structures’ (March 2007) and FEMA ‘Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards’ (January 2013).

The table below indicates the range of proposed mitigation action categories.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.22-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X	X	X	X		X	X	X	X
Cyber Attack	X			X			X			X
Earthquake	X			X			X			X
Expansive Soils	X			X			X			X
Extreme Temperature	X			X			X			X
Flood	X	X	X	X	X		X	X	X	X
Hazardous Materials	X			X			X			X
Landslide	X			X			X			X
Pandemic	X			X			X			X
Severe Storm	X		X	X			X	X		X
Severe Winter Storm	X		X	X			X	X		X
Utility Failure	X			X			X			X
Wildfire	X			X			X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.22-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Evans would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.22-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.22-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T. Evans-001	Permanent and Temporary Housing	1, 2, 3	All Hazards	**Problem**: The town does not have any designated Temporary or Permanent Housing locations to be used to house displaced residents, or to use to relocate homes that experience repetitive flood damages and losses, respectively. **Solution**: The town will work with Erie County Emergency Services to identify, purchase and designate sites to be owned by the jurisdiction that meet applicable local zoning requirements and floodplain laws for the purpose of relocation of repetitive loss flood-damaged homes to preserve the tax base and population size. If there is no land available, the town will work with the county to identify land in neighboring jurisdictions for the same purpose. The town will also seek to identify and designate land meeting the same requirements for the purpose of placing temporary housing units for displaced residents.	No	No	Short	Town of Evans, Erie County	Low-Medium	High, ensures locations for alternative housing during and after hazards	Municipal Budget, NYSDHSES	High	LRP	ES
2022-T. Evans-002	Wastewater Pump Station Flood Mitigation	1, 2, 3	Flood	**Problem**: The Lake Bay Grove Wastewater Pump Stations is located within the 1% SFHA (100-year floodplain), and the Point Breeze #1 and #2 Pump Stations are located within the 0.2% SFHA (500-year floodplain). **Solution:** The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at each of the Wastewater Pump Stations to protect them to the 0.2% annual chance flood event. Options include: •Elevation of facility	Yes	No	Short	Town of Evans DPW	Medium-High	High, reduces flooding at critical facilities	FMA, CDBG	High	SIP	SP

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.22.9 Action Worksheets

The following action worksheets have been developed by the Town of Evans to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Wastewater Pump Station Flood Mitigation		
Project Number:	2022-T. Evans-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Lake Bay Grove Wastewater Pump Stations is located within the 1% SFHA (100-year floodplain), and the Point Breeze #1 and #2 Pump Stations are located within the 0.2% SFHA (500-year floodplain).		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at each of the Wastewater Pump Stations to protect them to the 0.2% annual chance flood event. Options include: •Elevation of facility •Floodproofing of facility •Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	High, reduces flooding at critical facilities
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	Medium-High	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	1-2 years	**Potential Funding Sources:**	FMA, CDBG
Responsible Organization:	Town of Evans DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Relocate pump stations	$500,000	Not cost effective
	Decommission pump stations	N/A	Not feasible, remaining stations cannot handle capacity needed

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Wastewater Pump Station Flood Mitigation	
Project Number:	2022-T. Evans-002	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Ensures safe drinking water
Property Protection	1	Reduces flooding at critical facilities
Cost-Effectiveness	1	
Technical	1	DPW/Engineering
Political	1	Town supports project
Legal	1	
Fiscal	-1	Town will seek funding support
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	0	Flood
Timeline	1	
Agency Champion	1	
Other Community Objectives	1	
Total	11	
Priority (High/Med/Low)	High	

Attachment: 61-Section-9.22-Evans-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Drainage Study		
Project Number:	2022-T. Evans-010		
Risk / Vulnerability			
Hazard(s) of Concern:	Coastal Erosion, Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The town is in the process of completing a drainage study to address flooding concerns during storms and potential damages.		
Action or Project Intended for Implementation			
Description of the Solution:	Upon completion of the study, the town will work to seek funding to implement recommendations. Recommendations include paving 24 roads in the Lake Erie Beach Area, and revitalization of the area. The town will also address loss of trees from storms by improving vegetation and adding green infrastructure solutions where drainage has become an increasing issue.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces flooding and damages
Useful Life:	30 years	**Goals Met:**	1, 2, 3
Estimated Cost:	High	**Mitigation Action Type:**	Local Plans and Regulation, Structure and Infrastructure Project, Natural Systems Protection
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on Funding
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	FMA, HMA, HMGP, CDBG
Responsible Organization:	Building Department, Engineering	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadways	$250,000	May not solve drainage issues
	Build retention walls	$250,000	Will not solve drainage issues, town relies on tourism at beach

9.23 Village of Farnham

This section presents the jurisdictional annex for the Village of Farnham. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Farnham's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.23.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Farnham's hazard mitigation plan primary and alternate points of contact. The Village of Farnham followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: The Mayor's Office, Clerk, and Department of Public Works. The Mayor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.23-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Jere R. Hoisington, Mayor Address: 526 Commercial St, Farnham, NY 14061 Phone Number: 716-549-0890 Email: Farnhammayor@roadrunner.com	Name/Title: Jackie Hoisington, Clerk Address: 526 Commercial St, Farnham, NY 14061 Phone Number: 716-549-0890 Email: Farnhamclerk@farnham.brantny.com
NFIP Floodplain Administrator	
Name/Title: Ellsworth Nolan, DPW Supervisor Address: 526 Commercial St, Farnham, NY 14061 Phone Number: 716-549-0890 Email: Farnhamclerk@farnham.brantny.com	

9.23.2 Municipal Profile

The Village of Farnham is a semi-rural community that is located about 25 miles southwest of downtown Buffalo. The village is one square mile in size and is located wholly within the Town of Brant. The Village of Farnham is located in the western part of the Town of Brant, north of the Cattaraugus Reservation and southeast of Evangola State Park. The village incorporated in 1892 and is named after Leroy Farnham, a local landowner and merchant (Village of Farnham website, accessed 2020).

According to the U.S. Census, the 2010 population for the Village of Farnham was 382. The estimated 2019 population was 459, a 20.2 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 7.0 percent of the population is 5 years of age or younger and 12.0 percent is

65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.23.3 Jurisdictional Capability Assessment and Integration

The Village of Farnham performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.23.3). The Village of Farnham's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Farnham. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.23-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Farnham to oversee and track development.

Table 9.23-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	-
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Farnham and their current responsibilities which contribute to hazard mitigation.

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.23-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	No Comment
Zoning Board of Adjustments	Yes	No Comment
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	No Comment
Construction/Building/Code Enforcement Department	Yes	No Comment
Emergency Management/Public Safety Department	Yes	No Comment
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Exterior Fire Siren System
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW maintains drainage within village
Mutual aid agreements	Yes	Fire and EMS Services
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	DPW Supervisor
Surveyor(s)	No	-
Emergency Manager	No	-
Grant writer(s)	Yes	Mayor
Resilience Officer	No	-

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Farnham.

Table 9.23-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	No
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Farnham.

Table 9.23-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	https://www.brantny.com/Farnham.php
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Farnham.

Table 9.23-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.23-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.23.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Ellsworth Nolan, DPW Supervisor

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Farnham.

Table 9.23-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Farnham	1	5	$20,817	3	0

Source: *FEMA 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The village did not indicate any areas prone to flooding within the jurisdictions. There are no current RiskMAP projects underway and the village does not maintain a list of property owners interested in flood mitigation. There have been no mitigated properties in the village through wither elevation or acquisition. According to FEMA, there are no SFHAs within the village at time of publication.

NFIP Compliance

The Village Department of Public Works is responsible for floodplain management. The Floodplain Management Program for the village satisfies NFIP regulations. There are no Certified Floodplain Managers within the village, and the village does not need any assistance or trainings to support the floodplain management program. The Village Planning, Board, Zoning Board, and Building Inspector determine is proposed developments are substantial improvements. There are no outstanding compliance issues and the last Community Assistance Contact (CAC) was on June 20, 2007.

9.23.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Farnham has identified the following routes and procedures to evacuate residents prior to and during an event.

- Routes 5 and 20

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Commercial Street (Route 249)

Sheltering

The Village of Farnham has identified the following designated emergency shelters within the Village.

Table 9.23-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Village Hall	Commercial Street	100	Yes	Yes	Yes	Fire/EMS	Kitchen/Generator

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Farnham has identified the following sites suitable for placing temporary housing units.

Table 9.23-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Village Park	Commercial Street	5	Park Land	Water, electric, septic	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Farnham has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.23-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Village Park	Detroit Street	5	Vacant Lot	Water, electric, Septic	None

9.23.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.23-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.23-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

9.23.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Farnham's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Farnham has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Farnham's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.23-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.23-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	No municipal damages reported
August 11-15, 2015	Flash Flood	No	No municipal damages reported
October 28-29, 2015	High Wind	No	No municipal damages reported
November 6, 2015	Thunderstorm Wind	No	No municipal damages reported
November 12, 2015	High Wind	No	No municipal damages reported
November 18, 2015	High Wind	No	No municipal damages reported
January 11, 2017	High Wind	No	No municipal damages reported
March 8, 2017	High Wind	No	No municipal damages reported
March 13, 2017	Winter Storm	No	No municipal damages reported
July 20, 2017	Tornado	No	No municipal damages reported
August 4, 2017	Thunderstorm Wind	No	No municipal damages reported
December 10-15, 2017	Lake-effect Snow	No	No municipal damages reported
December 24-29, 2017	Lake-effect Snow	No	No municipal damages reported
January 2, 2018	Blizzard	No	No municipal damages reported
October 6, 2018	Lightning	No	No municipal damages reported
February 24, 2019	High Wind	No	No municipal damages reported
February 24, 2019	Lakeshore Flooding	No	No municipal damages reported
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	No municipal damages reported
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	No municipal damages reported
November 27, 2019	Lakeshore Flooding	No	No municipal damages reported
January 12, 2020	Lakeshore Flooding	No	No municipal damages reported
January 18, 2020	Lakeshore Flooding	No	No municipal damages reported

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Farnham's risk assessment results and data used to determine the hazard ranking.

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Farnham. The Village of Farnham has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village agreed that the calculated rankings accurately reflected the risk posed to the community

Table 9.23-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.23-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
None Identified				

Source: Effective DFIRM

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Village of Farnham's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Farnham has identified the following vulnerabilities within their community:

- HazMat situation due to Village Hall (emergency Shelter) and Fire/EMS equipment being situated between two sets of railroad tracks. Increased traffic on railways make the village susceptible to "lock out" event as a result of spill or derailment.

9.23.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Table 9.23-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)	Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
The Village of Farnham had no projects identified as part of the 2015 HMP.							

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Farnham has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Farnham participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.23-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake										
Expansive Soils										
Extreme Temperature										
Flood										
Hazardous Materials	X	X			X				X	X
Landslide										
Pandemic										
Severe Storm	X	X			X			X		
Severe Winter Storm	X	X			X			X		
Utility Failure	X	X			X			X		
Wildfire										

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.23-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Farnham would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.23-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 62-Section-9.23-Farnham-V-121021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.23-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. Farnham-001	Tree Trimming and Maintenance	1, 2	Severe Storm, Severe Winter Storm, Utility Failure	**Problem**: During storm events, downed trees can cause road closures and property damages. **Solution**: The village will develop a maintenance program to monitor dead trees and remove branches before and after storm events to reduce property damages and power outages.	No	No	Ongoing once established	Village of Farnham DPW	Medium	High	Municipal Budget, HMGP	High	LPR, NSP	PR, NRP
2022-V. Farnham-002	Village Hall Vulnerability Study	1, 2	Hazardous Materials	**Problem**: Village Hall (emergency Shelter) and Fire/EMS equipment is situated between 2 sets of railroad tracks. Increased traffic on railways make us susceptible to "lock out" event as a result of spill or derailment. **Solution**: The village will conduct a vulnerability assessment of the Village Hall and Fire/EMS building to determine risk posed by the location proximity to the railroads and the possibility of "lock outs." If determined to pose increased risk, the village will seek to relocate the Village Hall and Fire/EMS equipment away from the risk to train and hazmat transportation accidents to ensure operations of government and emergency services during hazards.	Yes	No	Short	Village of Farnham	Low to conduct study, High to relocate building	High, ensures continuity of operations	Municipal Budget, HMGP	High	LPR, SIP	PR, SP, ES
2022-V. Farnham-003	Critical Facility Vegetation Management	1, 2	Wildfire	**Problem:** The Village Hall, fire station, and wastewater pump station are near wooded areas. In the case of the pump station and Village Hall, trees from the nearby wooded areas actually touch the structures. This puts these critical facilities at risk of burning during a wildfire/brush fire affecting those wooded areas. **Solution:** The village will assess the vegetation around each critical facility and manage that vegetation as necessary to reduce the risk of fire	Yes	Yes	Within 6 months	Village of Farnham DPW	Low	High	Municipal Budget	High	NSP	PR

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*

Packet Pg. 2051

- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NRP) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.23.9 Action Worksheets

The following action worksheets have been developed by the Village of Farnham to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Action Worksheet			
Project Name:	Tree Trimming and Maintenance		
Project Number:	2022-V. Farnham-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Storm, Severe Winter Storm, Utility Failure		
Description of the Problem:	During storm events, downed trees can cause road closures and property damages.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will develop a maintenance program to monitor dead trees and remove branches before and after storm events to reduce property damages and power outages.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High
Useful Life:	N/A	**Goals Met:**	1, 2
Estimated Cost:	Medium	**Mitigation Action Type:**	Local Plans and Regulations, Natural Systems Protections
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months
Estimated Time Required for Project Implementation:	Ongoing once established.	**Potential Funding Sources:**	Municipal Budget, HMGP
Responsible Organization:	Village of Farnham DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Ask residents to alert village to dangerous trees.	$1,000	Reactive. Likely to miss most trees.
	Remove all trees along areas with powerlines and property	N/A	Not feasible/environmentally damaging

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.24 Village of Gowanda

This section presents the jurisdictional annex for the Village of Gowanda. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Gowanda's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.24.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Gowanda's hazard mitigation plan primary and alternate points of contact. The Village of Gowanda followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Village departments, including: the Mayor, Deputy Mayor, and Disaster Coordinator. The Deputy Mayor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, Steering Committee, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

9.24.2 Municipal Profile

The name "Gowanda" is derived from the Seneca Indian phrase meaning "a valley among the hills" referring to the village's location below the Zoar Valley gorge along the Cattaraugus Creek. Gowanda is unique in that it is situated in both Cattaraugus and Erie counties. The village is approximately 30 miles from downtown Buffalo. The Cattaraugus Reservation is located northwest of the village. To the north and east is the Town of Collins and to the south is the Town of Persia in Cattaraugus County.

After the Revolutionary War, the American government secured land treaties with the Iroquois nations in western New York. The majority of the nations had been allies of the British, and they were forced to cede most of their lands in New York after the British defeat. Gowanda's first white settler purchased 707 acres on both sides of

the creek from the Holland Land Company. The village incorporated in 1848 (Village of Farnham website, accessed 2020).

Throughout the years, Gowanda has regularly experienced flooding. In August 2009, a large flash devastated much of the village. One man drowned, and houses and cars were washed away. A total of two fatalities were caused directly from the flooding. Gowanda's water reservoir at Point Peter Road was completely destroyed, leaving the village without water. The village experienced another flood, resulting in a state of emergency, when two waterways, Cattaraugus Creek and Thatcher Brook, flooded their banks in May 201. (Wikipedia Village of Farnham, accessed 2020).

According to the U.S. Census, the 2010 population for the Village of Gowanda was 975. The estimated 2019 population was 1,043, a 7.0 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 9.5 percent of the population is 5 years of age or younger and 18.5 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.24.3 Jurisdictional Capability Assessment and Integration

The Village of Gowanda performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.24.3). The Village of Gowanda's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Gowanda. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.24-2. Planning, Legal, and Regulatory Capability and Integration

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Gowanda to oversee and track development.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.24-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Village Code
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Village Code
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No,	A buildable land analysis is noted in Section 4 (County Profile)

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Gowanda and their current responsibilities which contribute to hazard mitigation.

Table 9.24-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Village Board of Trustees
Zoning Board of Adjustments	Yes	Village Board of Trustees
Planning Department	Yes	Village Board of Trustees
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Village Highway Department maintains, operates and manages the following: • 11.79 miles of village streets • 30 miles of storm sewers • 20.3 acres of park land • 5 municipal parking lots totaling 5.5 acres • Equipment maintenance garage • 30 miles of sidewalk (sidewalks plowed by the Village, maintained by homeowner)
Construction/Building/Code Enforcement Department	Yes	The Code Enforcement Officer administers and enforces all the provisions of the Uniform Code and local law within the Village of Gowanda.
Emergency Management/Public Safety Department	Yes	OEM
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRed/911
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Water Development Work underway
Mutual aid agreements	Yes	County
Other	No	-
Technical/Staffing Capability		

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineer
Planners or engineers with an understanding of natural hazards	Yes	Engineer
Staff with expertise or training in benefit/cost analysis	Yes	Engineer
Professionals trained in conducting damage assessments	Yes	Engineer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	County Training
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	Disaster Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Gowanda.

Table 9.24-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes – Village Board
Capital improvements project funding	Yes – Village Board
Authority to levy taxes for specific purposes	Yes – Village Board
User fees for water, sewer, gas or electric service	Yes – Village Board
Impact fees for homebuyers or developers of new development/homes	Yes – Village Board
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes – Village Board
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes – Village Board
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes – Village Board

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Gowanda.

Table 9.24-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Emergency Management
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Code Red/911
Natural disaster/safety programs in place for schools	Yes	Internal training
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Gowanda.

Table 9.24-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.24-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.24.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

David Smith, Mayor

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Gowanda.

Table 9.24-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Gowanda	80	135	$2,332,781	46	70

Source:
Notes:
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The Village of Gowanda identified two flood-prone areas within the community – Thatcher Brook and Grannis. The village does not maintain a list of property owners interested in flood mitigation. There are RiskMAP projects currently underway within the village. Substantial Damage Determinations are made using FEMA Codes. At present, six homes within the Village of Gowanda have been mitigated through elevation or acquisition. Flood hazard maps for the community adequately address the flood risk within the village.

The local department responsible for floodplain management within the Village of Gowanda is Code Enforcement and there are no certified floodplain managers on staff. The village indicated that it has access to resources to determine possible future flooding conditions from climate change.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The Village of Gowanda indicated that its staff need assistance or training to support its floodplain management program. Cattaraugus County provides NFIP administration services for the village. The village uses Village Code to determine whether proposed development on an existing structure qualifies as a substantial improvement. The village did not identify any barriers to running an effective NFIP program in the community.

NFIP Compliance

The Village of Gowanda's last Community Assistance Visit took place on April 23, 2008. The last Community Assistance Contact took place on November 2, 2009.

The flood damage prevention ordinance of the Village of Gowanda can be found under Chapter 34 – 2019 update. The village indicated that its floodplain management program meets or exceeds the minimum requirements. Other local ordinances, plans, or programs that support floodplain management and meeting the NFIP requirements include the 205 Study.

9.24.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Gowanda has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 62
- Route 39
- Aldrich Street
- Broadway Road

Sheltering

The Village of Gowanda has identified the following designated emergency shelters within the Village.

Table 9.24-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Gowanda High School	Village	As needed	Optional	Yes	Yes	As Needed	Food
Gowanda Elementary School	Village	As needed	Optional	Yes	Yes	As needed	Food
Gowanda Fire Hall	230 Aldrich Street	As needed	Optional	Yes	Yes	As needed	Food

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Gowanda has identified the following sites suitable for placing temporary housing units.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.24-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
The Village of Gowanda did not identify any areas suitable for placing temporary housing units but will work with the county to identify appropriate locations (2022-Village of Gowanda-013).					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Gowanda has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.24-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
The Village of Gowanda did not identify any areas suitable for relocating homes outside of the floodplain. A buildable land analysis is noted in Section 4 (County Profile). The village will work with the county to identify appropriate locations (2022-Village of Gowanda-013).					

9.24.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.24-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.24-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

** Only location-specific hazard zones or vulnerabilities identified.*

9.24.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Gowanda's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Gowanda has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.24-1. Village of Gowanda Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Gowanda's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.24-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.24-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the village did not report damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the village did not report damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the village did not report damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the village did not report damages.
November 12, 2015	High Wind	No	Although the county was impacted, the village did not report damages.
November 18, 2015	High Wind	No	Although the county was impacted, the village did not report damages.
January 11, 2017	High Wind	No	Although the county was impacted, the village did not report damages.
March 8, 2017	High Wind	No	Although the county was impacted, the village did not report damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the village did not report damages.
July 20, 2017	Tornado	No	Although the county was impacted, the village did not report damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the village did not report damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the village did not report damages.
October 6, 2018	Lightning	No	Although the county was impacted, the village did not report damages.
February 24, 2019	High Wind	No	Although the county was impacted, the village did not report damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, the village did not report damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, the village did not report damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report damages.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report damages.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Gowanda's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Gowanda. The Village of Gowanda has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village agreed that the calculated rankings accurately reflected the risk posed to the community

Table 9.24-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.24-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event

Identified Issues

After review of the Village of Gowanda's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Gowanda has identified the following vulnerabilities within their community:

- The village has numerous critical facilities in the Special Flood Hazard Area.
- Flood prone areas require a warning system.
- The Gowanda water reservoir on Point Peter Rd is prone to landslides along its banks.
- Allen Springs and Thatcher Brook have stream bank erosion issues. These could be solved through seeding, rip rap, and stream bank stabilization.
- The village requires an emergency warning system which would include the water and sewer facilities.
- The village requires an Emergency Operations Plan.
- Johnson Street, West Main Street, and Jamestown Street (near the railroad) requires stormwater drainage to be established to eliminate residential flooding
- The village requires another trash rack on Thatcher Brook to prevent debris jams
- The following culverts in Gowanda have incurred damages and require to be upsized:
    - Grannis Brook
        - Union Street
        - Buffalo Street
        - Rail Road Bridge

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

        - Cemetery Hill culvert
    - Thatcher Brook
        - Chaple Street Bridge
- The Gowanda Historic Hollywood Theater at 39 West Main Street is a non-profit cultural asset that is also commonly used for outreach on hazards and emergency management education events. The corner of the building rests in the floodplain and the structure has been impacted by flooding in the past.

9.24.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.24-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
#1	Participate with the USACE Section 205 Flood Mitigation Feasibility Study of Thatcher Brook	Flooding	Gowanda Water & Sewer Dept. Village of Gowanda	Not Identified	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
#2	Implement the Thatcher Brook Mitigation Plan after the Section 205 Flood Mitigation Feasibility Study	Flooding	Gowanda Water & Sewer Dept. Village of Gowanda	Not Identified	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
#3	Implementation of the actions identified in the Village of Gowanda Flood Mitigation Plan	Flooding	Gowanda Water & Sewer Dept. Village of Gowanda	Not Identified	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
#4	Implementation of actions identified in the Thatcher Brook Watershed Management Plan	Flooding	Gowanda Water & Sewer Dept. Village of Gowanda	Not Identified	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
#5	Floodproof/ Elevate/ Acquire homes in the flood prone areas (approximately 500 structures)	Flooding	Village of Gowanda Code Enforcement	Not Identified	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. No longer a priority

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
#6	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Gowanda Water & Sewer Dept. Village of Gowanda	Not Identified	Ongoing Capability	Cost		1. Discontinue 2. 3. Ongoing Capability
						Level of Protection		
						Damages Avoided; Evidence of Success		

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Gowanda has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Gowanda participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.24-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X									X
Cyber Attack	X									X
Earthquake	X									X
Expansive Soils	X									X
Extreme Temperature	X									X
Flood	X	X	X	X		X	X	X	X	X
Hazardous Materials	X									X
Landslide	X	X	X			X		X		X
Pandemic	X									X
Severe Storm	X	X	X			X		X	X	X
Severe Winter Storm	X		X					X		X
Utility Failure	X		X					X		X
Wildfire	X									X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.24-19 summarizes the comprehensive-range of specific mitigation initiatives the Village of Gowanda would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.24-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.24-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Gowanda-001	Critical Facilities Outreach	1, 3	Flood	**Problem**: The village has numerous critical facilities in the Special Flood Hazard Area. These facilities are not municipally owned: • Verizon CO (VZ-NY62848) • Gowanda Free Library • Emmanuel Lutheran Church • First Baptist Church • Free Methodist Church • St Mary's Episcopal Church • United Methodist Church **Solution**: The FPA will conduct outreach to facility managers to discuss flood exposure and potential mitigation actions.	Yes	None	Within 6 months	FPA	Staff time	Facility managers educated on flood exposure and potential mitigation actions	Village budget	High	EAP	PI
2022-Village of Gowanda-002	Flood Warning System	1, 3	Flood	**Problem**: Flood prone areas require a warning system. **Solution**: The village will evaluate areas that need a flood warning system constructed and construct the system where necessary. The system will place specific emphasis on warnings for water and sewer facilities. The System	No	None	2 years	FPA, OEM	$7 million	Warning system established	HMGP, NWS, USGS, village budget	High	SIP	ES

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Table 9.24-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low

9.24.9 Action Worksheets

The following action worksheets have been developed by the Village of Gowanda to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Flood Warning System		
Project Number:	2022-V. Gowanda-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm		
Description of the Problem:	Currently, the Village of Gowanda does not have a method to identify flood levels and distribute warnings to prepare the population for flooding events.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will evaluate areas that need a flood warning system constructed and construct the system where necessary. The system will place specific emphasis on warnings for water and sewer facilities. The Thatcher Brook Diversion Channel is currently in design phase. The System will also be able to be used to distribute warnings regarding other emergency events.		
Is this project related to a Critical Facility or Lifeline?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
Level of Protection:	Flood warning system	**Estimated Benefits (losses avoided):**	Increased flood warning with better quality data
Useful Life:	15 years	**Goals Met:**	1, 3
Estimated Cost:	$7 Million	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6-12 months
Estimated Time Required for Project Implementation:	Three years	**Potential Funding Sources:**	HMGP, NWS, USGS, Municipal budget
Responsible Organization:	NFIP Floodplain Administrator, OEM	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Rely on the NWS updates	$0	Do not provide real-time information, delay in information could impact the village on responding properly
	Conduct manual readings by emergency personnel	Staff time	Inaccurate and time consuming

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:

Total	11	
Priority (High/Med/Low)	High	

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Stormwater Improvements		
Project Number:	2022-V. Gowanda-008		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm		
Description of the Problem:	Johnson Street, West Main Street, and Jamestown Street (near the railroad) requires stormwater drainage to be established to eliminate residential flooding.		
Action or Project Intended for Implementation			
Description of the Solution:	The Village Engineer will design the necessary stormwater improvements and new features. The DPW will install the stormwater system components designed by the Engineer.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	TBD by engineering study	**Estimated Benefits (losses avoided):**	Increased drainage, reduction in flooding
Useful Life:	20 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	Within 5 years	**Potential Funding Sources:**	HMGP, BRIC, CHIPS, village budget
Responsible Organization:	Engineer, DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard mitigation, Stormwater management

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Buyout homes exposed to flooding	High	Costly
	Close roadways that experience flooding	Low	Loss of access

Total	11	
Priority (High/Med/Low)	High	

Attachment: 63-Section-9.24-Gowanda-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Repetitive Loss Properties		
Project Number:	2022-Village of Gowanda-012		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm		
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. The Village of Gowanda has 46 repetitive loss properties.		
Action or Project Intended for Implementation			
Description of the Solution:	Conduct outreach to 60 flood-prone property owners, including RL/SRL property owners and provide information on mitigation alternatives. After preferred mitigation measures are identified, collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/purchase/moving/elevating residential homes in the flood prone areas that experience frequent flooding (high risk areas).		
Is this project related to a Critical Facility or Lifeline?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
Level of Protection:	1% annual chance flood event + freeboard *(in accordance with flood ordinance)*	**Estimated Benefits (losses avoided):**	Eliminates flood damage to homes and residents, creates open space for the municipality increasing flood storage.
Useful Life:	Acquisition: Lifetime Elevation: 30 years (residential)	**Goals Met:**	1, 2
Estimated Cost:	$6 Million	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6-12 months
Estimated Time Required for Project Implementation:	Three years	**Potential Funding Sources:**	FEMA HMGP and FMA, local cost share by residents
Responsible Organization:	NFIP Floodplain Administrator, supported by homeowners	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate homes	$500,000 per home	When this area floods, the entire area is impacted; elevating homes would not eliminate the problem and still lead to road closures and impassable roads
	Elevate roads	$500,000	Elevated roadways would not protect the homes from flood damages

9.25 Town of Grand Island

This section presents the jurisdictional annex for the Town of Grand Island. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Grand Island's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.25.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Grand Island's hazard mitigation plan primary and alternate points of contact. The Town of Grand Island followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including the Highway Department and Supervisor's office. The Town Supervisor and Highway Superintendent represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.25-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: John Whitney, P.E., Town Supervisor Address: 2255 Baseline Road, Grand Island, NY 14072 Phone Number:716-773-9600 x616 Email: jwhitney@grand-island.ny.us	Name/Title: Richard Crawford, Highway Superintendent Address: 2255 Baseline Road, Grand Island, NY 14072 Phone Number: 716-773-9632 Email: dcrawford@grand-island.ny.us
NFIP Floodplain Administrator

9.25.2 Municipal Profile

The Town of Grand Island is located between City of Buffalo and Niagara Falls, dividing the Niagara River in half upriver from the famous Falls. The town is in the northwestern corner of Erie County and is 33 square miles in size. The town shares an international border with Ontario, Canada, although no bridges cross the river from the town, which is traversed by Interstate 190 and NYS Route 324.

The town's original inhabitants were Seneca Indians. The town was founded in 1651 and became part of the British Colony of New York in 1764. New York State purchased Grand Island and other islands on the

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Niagara River in 1815. In 1825 Grand Island established a connection to the mainland by ferry. The town incorporated in 1852. In 1993, a federal lawsuit was filed by the Seneca Nation of Indians who sought to have Grand Island returned to native ownership, but the island remained part of the United States (Town of Grand Island Comprehensive Plan 1998). The town was once nominated to be the headquarters for the United Nations due to its location on a friendly international border, before New York City was ultimately chosen (Wikipedia 2020).

According to the U.S. Census, the 2010 population for the Town of Grand Island was 20,374. The estimated 2019 population was 21,047, a 3.0 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.4 percent of the population is 5 years of age or younger and 17.6 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.25.3 Jurisdictional Capability Assessment and Integration

The Town of Grand Island performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.25.3). The Town of Grand Island's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Grand Island. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.25-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Local Law 1971, Construction Codes, Uniform, Chapter 125	Local	Code Enforcement/Building
Comment: This chapter shall provide for administration and enforcement of the New York State Uniform Fire Prevention and Building Code, the State Energy Code and such other laws as are applicable to the construction in the State of New York (collectively, "Uniform Code") in the Town of Grand Island. Consistent administration of the town's building code supports construction of hazard resistant buildings.					
Zoning Code	Yes	No	LL3-2004, Zoning, Chapter 407	Local	Code Enforcement/Building

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The purpose of the Zoning Code is to provide for the orderly growth of the Town of Grand Island. The Zoning Code sets requirements on the use of land and size, height, and bulk of uses. Specific areas have been designated for residential, business, and industrial growth to protect the overall character of the town, ensure the development of cohesive neighborhoods, and minimize conflicts among land uses. Specifically, the Zoning Code is developed to: • Implement the Town Comprehensive Plan, Grand Island Local Waterfront Revitalization Plan (LWRP), and the Ferry Village Master Plan. • Promote the health, safety, and general welfare of the public and provide safety from fire, flood, and other dangers. • Provide adequate light, air, and outdoor uses to include public, common, and private open space areas. • Prevent overcrowding of land and ensure structure and land use arrangements are aesthetically harmonious to surrounding areas and structures. • Avoid undue concentration of population or sparse, uncoordinated development. • Facilitate the adequate provision of transportation, water, sewer, school, parks, and other public services. • Protect the character and values of residential, institutional, public, business, and industrial uses and to ensure their orderly and beneficial development. • Regulate the location of buildings and intensity of uses in relation to streets to ensure minimal interference with and by traffic movements, reduce congestion on Town streets and improve public safety. • Preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve development purposes only. Protects the town from flood danger. R-2 and R-3 Districts shall preserve and incorporate into the landscaping of the development, natural features including streams, drainageways, and existing trees. Site plans must include a drainage plan showing existing and finished grades, size and type of pipe, location of receivers, and stormwater management plan evaluating the impacts on the watershed; the best management practices employed to mitigate the impacts of stormwater. In all districts, no permanent structure shall be permitted within the setbacks from the ten-year flood stage edge of any stream or existing natural drainage channel, established on the Town Official Map.					
Subdivision Ordinance	Yes	No	Subdivision of Land, 1971, Chapter 327	Local	Code Enforcement/Building
Comment: It is declared to be the policy of the Town Board and the Town Planning Board to consider land subdivision plats as part of a plan for the orderly, efficient, and economical development of the Town of Grand Island. This means, among other things: • A. That land to be subdivided shall be of such character that it can be used safely for building purposes without danger to health, or peril from fire, flood or other menace; • B. That proper provision shall be made for drainage, water supply, sewerage, other underground utilities, and other needed improvements; • C. That all proposed lots shall be so laid out and of such size as to be in harmony with the development pattern of the neighboring properties. • D. That the proposed streets shall compose a convenient system conforming to the Official Map, if such exists, and shall be properly related to the proposals shown on the Master Plan, and shall be of such width, grade, and location as to accommodate the prospective traffic, to facilitate fire protection and to provide access of fire-fighting equipment to buildings; and • E. That proper provision shall be made for open spaces for parks and playgrounds. •					
Stormwater Management Ordinance	Yes	Yes	LL # 5 of 2007, Article XXXV 407-195 through 407-201*	Local/State/Federal	Code Enforcement & Engineering
Comment: The purpose of this article is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction. This article seeks to meet those purposes by achieving the following objectives: (1) Meet the requirements of minimum measures 4 and 5 of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02 or as amended or revised; (2) Require land development activities to conform to the substantive requirements of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, Permit No. GP-02-01 or as amended or revised; (3) Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels; (4) Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality; (5) Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and (6) Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	No	-	-	-

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	No	LL # 3 OF 2004, Zoning, Chapter 407	Local	Zoning/Engineering
Comment: The growth management framework is established in the Zoning Code.					
Site Plan Review	Yes	No	Zoning Chapter 407, Article XXIV Site Plan Review	Local	Zoning/Engineering and Planning Board
Comment: Site Plan review by the Planning Board and as administered by the Building Department includes assessment of hazard risk.					
Environmental Protection Ordinance	Yes	No	State Environmental Quality Review (SEQR) LL 8-0101	Local/State	Town Board/Town Engineer
Comment: The town includes SEQR review in the development review process.					
Flood Damage Prevention Ordinance	Yes	Yes	LL # 1 – 2019 Chapter 155, Flood Damage Prevention Ordinance	Local/State/Federal	FPA
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program. BFE+2 feet is required for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	MS4 General Permit GP-0-15-003, Chapter 267, Sewers, Article IX Storm Sewers	Local/State	Town Engineer
Comment: No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, cooling water or unpolluted industrial process waters to any sanitary sewer.

Planning Documents					
Comprehensive Plan	Yes	No	Town of Grand Island Comprehensive Plan, 2018	Local	Town Board
Comment: The Comprehensive Plan includes the following Objectives: Determine the breadth and extent of available natural resources in the Town with an inventory of assets, including forested trees, wetlands, grasslands, shorelines, wildlife, and historical/cultural sites. 2. Prepare an inventory/map of open space in the Town. Create a plan for protection of selected natural areas with ecological significance. 3. Work with land trusts and property owners to protect natural areas. 4. Promote the conservation of trees by preparing an inventory of trees on Town-owned streets, parks, and public spaces. Create a management plan for care and maintenance of these trees. Educate residents and developers about the potential invasive species that threaten trees. 5. Capitalize on the economic potential of natural resources by encouraging uses that relate to and actively engage with them rather than isolating them, including recreation, ecotourism, cultural education/interpretation, and supporting business ventures. 6. Ensure that buffer areas are created and maintained around water bodies and water courses to protect water quality, reduce erosion, and preserve aquatic ecosystems. Develop and implement a program to monitor water quality. Community Values • Natural resources are our biggest asset • We are a unique island community • We're more than just a passthrough • Gateways make the first impression • We desire a true Town Center • Establish a more prominent identity • Future lies in diversity 37 Town of Grand Island : Bridging the Gap 4 Goals & Objectives 7. Adopt environmental practices and policies that promote the conservation of birds, wildlife, and wildlife habitat. 8. Encourage trails or other public access for any non-residential development that contain streams, wetlands, floodplains, or other features that are not developable due to environmental constraints. 9. Promote efforts that recognize the importance of environmental sustainability such as recycling, clean energy, controlling invasive/non-native species, fertilizer use, composting, etc. (Refer to local law #1 (2017) chapter 407-165.1) 10. Engage with local agencies and groups that promote environmental protection and restoration initiatives. 11. Promote stewardship of our natural resources through educational workshops, pamphlets, and outdoor events/activities. 12. Encourage renewable energy systems at an appropriate scale and density to decrease local utility loads and minimize carbon emissions. 13. Promote the use of energy-efficient systems, materials, and equipment for private development; consider a requirement for municipal buildings to reduce their carbon footprint. 14. Encourage agricultural ventures in appropriate areas of the Town to conserve rural landscapes and support local agricultural business opportunities. Promote practices that balance farm productivity with green space protection and sustainability. 15. Seek reductions in greenhouse gas emissions and the overall carbon footprint of the Town and identify potential mitigation measures, starting with municipal operations, processes, and facilities. 16. Encourage the development of a local Farmland Protection Plan to support agricultural businesses and farms on Grand Island. The intent is to create an environment in which the community and agriculture can coexist.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Grand Island to oversee and track development.

Table 9.25-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	File is maintained in Engineering (Floodplain Development)
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The level of buildout in the town is unknown

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Grand Island and their current responsibilities which contribute to hazard mitigation.

Table 9.25-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board. This board's mission is three-fold: • to recommend to the Town Board any laws, regulations or rules that relate to town planning and development, • to report to the Town Board on all matters referred to it, including all applications for site plan, sub-division, special use and zoning changes, • to make such investigations, maps, reports, and recommendations in connection with the planning and development of the town as it deems desirable.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		The Planning Board is an advisory board to the Town Board (Volunteer).
Zoning Board of Appeals	Yes	The Zoning Board of Appeals hears and decides appeals from, and reviews any order, requirement, decision, interpretation, or determination made by, the administrative official charged with the enforcement of any zoning ordinance or law. The ZBA considers hazard exposure in its deliberations on variances to the zoning code.
Planning Department	No	Contract engineer
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Conservation Advisory Board (CAB) reviews proposals or applications resulting in the use or development of any open space identified in the approved Town of Grand Island Open Space Plan. Recommendations that reasonably achieve the goal of maintaining, improving or otherwise enhancing the environmental quality of Grand Island are provided to the Town Board for consideration. The CAB also serves as a consultant to the Town Board on environmental matters.
Open Space Board/Committee	Yes	Conservation Advisory Board (see above)
Economic Development Commission/Committee	Yes	Economic Development Advisory Board. The mission of this board is to pro-actively develop Grand Island's business community. It is charged with helping existing businesses survive and prosper, identifying and attracting new businesses that are compatible with our environment, and working with economic development opportunities as they occur.
Public Works/Highway Department	Yes	The Grand Island Highway Department provides a wide variety of services including: • Issue permits for work to be performed in town Highway rights-of-way. For example: o Curb cuts o Driveway culvert permits o Road push or boring permits o Open road cuts o Power and telephone pole location permits and gas line permits. • Snow and ice removal on all town roads and roads owned by Erie County which are done under contract. • The upkeep of all town owned roads • Road sweeping on town roads, curbed areas mostly. • Roadside mowing of town roads. • Traffic control sign installation and maintenance. • Maintenance of roadside ditches. For example: o Roadside ditching o Installing driveway culverts-by permit o Installing pipe across the premises-by permit. • Fleet Maintenance for all town owned vehicles. Richard W. Crawford, Jr. – Superintendent
Construction/Building/Code Enforcement Department	Yes	Ron Milks, Department Head. The Building/Code Enforcement/Zoning Department is responsible for the enforcement of the New York State Commercial and Residential Building Codes and Fire Prevention inspections, within the Town of Grand Island, as well as the various portions of the Town Code. Building permits are issued, plans and specifications are reviewed, and various inspections are conducted. The Department assists the public, contractors, and design professionals in the understanding of the various code requirements as they apply to their projects. The Department prepares periodic reports, notices, and

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		related documents and performs required fire safety inspections of existing buildings and investigate complaints relating to code violations.
Emergency Management/Public Safety Department	Yes	Community Emergency Response Team. GIPD – Robert Rine, Officer in Charge
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department – Right – of – way maintenance, Engineering Department by contracts
Mutual aid agreements	Yes	The town maintains mutual agreements with other municipality's Fire, Police, Highway, Water/Wastewater operators
Other	Yes	Agricultural Advisory Board, Architectural Review Board, Historic Preservation Board, Parks and Recreation Committee and Traffic Safety Committee
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering & Zoning
Engineers or professionals trained in building or infrastructure construction practices	Yes	Building: Ron Milks, Code Enforcement/Building inspector Engineering: Robert H. Westfall, P.E., Town Engineer
Planners or engineers with an understanding of natural hazards	Yes	Town Engineer
Staff with expertise or training in benefit/cost analysis	Yes	Various within departments
Professionals trained in conducting damage assessments	Yes	Engineering & Building Departments
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Engineering Department and GIS consultant
Scientist familiar with natural hazards	Yes	Various within community
NFIP Floodplain Administrator (FPA)	Yes	Town Engineer
Surveyor(s)	No	Hired professional service
Emergency Manager	No	-
Grant writer(s)	Yes	Rotella Grants
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Grand Island.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.25-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes, Town Board, Accountant and Engineer
Capital improvements project funding	Yes, Town Board, Accountant Engineering
Authority to levy taxes for specific purposes	Yes, Town Board, Assessor, Accounting
User fees for water, sewer, gas, or electric service	Yes, Town Board, Accountant and Engineer
Impact fees for homebuyers or developers of new development/homes	Yes, Town Board
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes, Town Board, Accountant
Incur debt through special tax bonds	Yes, Town Board, Accountant
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes, Town Board, Accountant and Engineer
Open Space Acquisition funding programs	Yes, Town Board, Accountant and Engineer
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes, Town Board, Accountant and Engineer

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Grand Island.

Table 9.25-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	Information on stormwater and wetlands is available on the town website.
Social media for hazard mitigation education and outreach	Yes	The Town of Grand Island uses Facebook as its social media
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Website/social Media
Natural disaster/safety programs in place for schools	No	-
Other	Yes	GIFD – Fire Prevention Programs

Community Classifications

The table below summarizes classifications for community programs available to the Town of Grand Island.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.25-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.25-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.25.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Robert Westfall, Town Engineer

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Grand Island.

Table 9.25-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Grand Island	46	30	$62,488	7	23

Source: FEMA, 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Areas in the Town of Grand Island that are prone to flooding include the shoreline of the Niagara River and various tributaries discharging to that river.

The town does not maintain a list of properties that have been damaged by flooding nor a list of property owners interested in flood mitigation. There are not any RiskMAP projects currently underway in the town. The town did not identify how many (if any) properties have been mitigated. The town's flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

The Engineering & Building Department is responsible for floodplain administration; however, there are no Certified Floodplain Managers on staff at the town. The town's floodplain management program is implemented in various ways, but most directly via site plan review and building permit approval process. The Town of Grand Island takes a proactive approach in managing its floodplain. The FPA and other staff speak with residents almost weekly about violations and measures to address them. The town assists residents in understanding requirements and procedures for development in the regulated floodplain, and provides residents with information about the SFHA for residents' use with other agencies (e.g., banks, lending institutions). The town also helps residents understand and meet requirements for accessory structures. When determining if proposed development on an existing structure qualifies as a substantial improvement, the FPA will estimate the value of new work versus the assessed value of the entire property.

The town's floodplain management program meets NFIP standards. The town's most recent Community Assistance Visit (CAV) was in June 2020, and there are no outstanding NFIP compliance violations to be addressed. Town staff would find refresher training on the requirements of the NFIP useful. The town does not participate in the Community Rating System, but does have numerous elevation certificates on file at the town office.

9.25.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Grand Island has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route I-190 is the only exit point from the island, therefore the town will coordinate with county and state agencies as needed for access along this critical roadway.

Sheltering

The Town of Grand Island has identified the following designated emergency shelters within the town.

Table 9.25-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Grand Island High	1100 Ransom Rd, Grand Island	Unknown	No	Yes	No	School nurse	None
Grand Island Middle	1100 Ransom Rd, Grand Island	Unknown	No	Yes	No	School nurse	None
Huth Road Elementary	1773 Huth Rd, Grand Island	Unknown	No	Yes	No	School nurse	None
Kaegabein Elementary	1690 Love Rd, Grand Island	Unknown	No	Yes	No	School nurse	None
Sidway School	2451 Baseline Rd, Grand Island	Unknown	No	Yes	No	School nurse	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Grand Island has identified the following sites suitable for placing temporary housing units.

Table 9.25-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Nike Base	3278 Whitehaven Rd, Grand Island	Unknown	Building	Water, electric, septic	Complies with Codes

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Grand Island has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.25-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
K.O.A.	2570 Grand Island Blvd, Grand Island	Unknown	Campground	Water, electric, septic	None
Branches of Niagara	2659 Whitehaven Rd, Grand Island	Unknown	Campground	Water, electric, septic	None
Cinderella Campground	2797 Grand Island Blvd Grand Island	Unknown	Campground	Water, electric, septic	None

9.25.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.25-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.25-13. Recent and Expected Future Development

Type of Development	2015**		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA
Single Family	N/A	N/A	25	0	54	0	64	0	48	0	31	1
Multi-Family	N/A	N/A	20	0	2	0	9	0	18	0	0	0
Other (commercial, mixed-use, etc.)	N/A	N/A	5	0	2	0	5	0	6	0	7	0
Total Permits Issued	**N/A**	**N/A**	**50**	**0**	**58**	**0**	**78**	**0**	**72**	**0**	**38**	**1**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Heron Pointe – Phase 1	Residential	232 units/20 buildings	101 Heron Pointe Pkwy	Expansive soils	Multi-unit apartments
Gun Creek Phase 1 & 2	Residential	45 buildings	101 Stonebridge Road	None identified	Single-family homes
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Type of Development	2015**	2016	2017	2018	2019	2020
None Anticipated						

SFHA Special Flood Hazard Area (1% flood event)

*** 2015 development data was not provided by the town.*

** Only location-specific hazard zones or vulnerabilities identified*

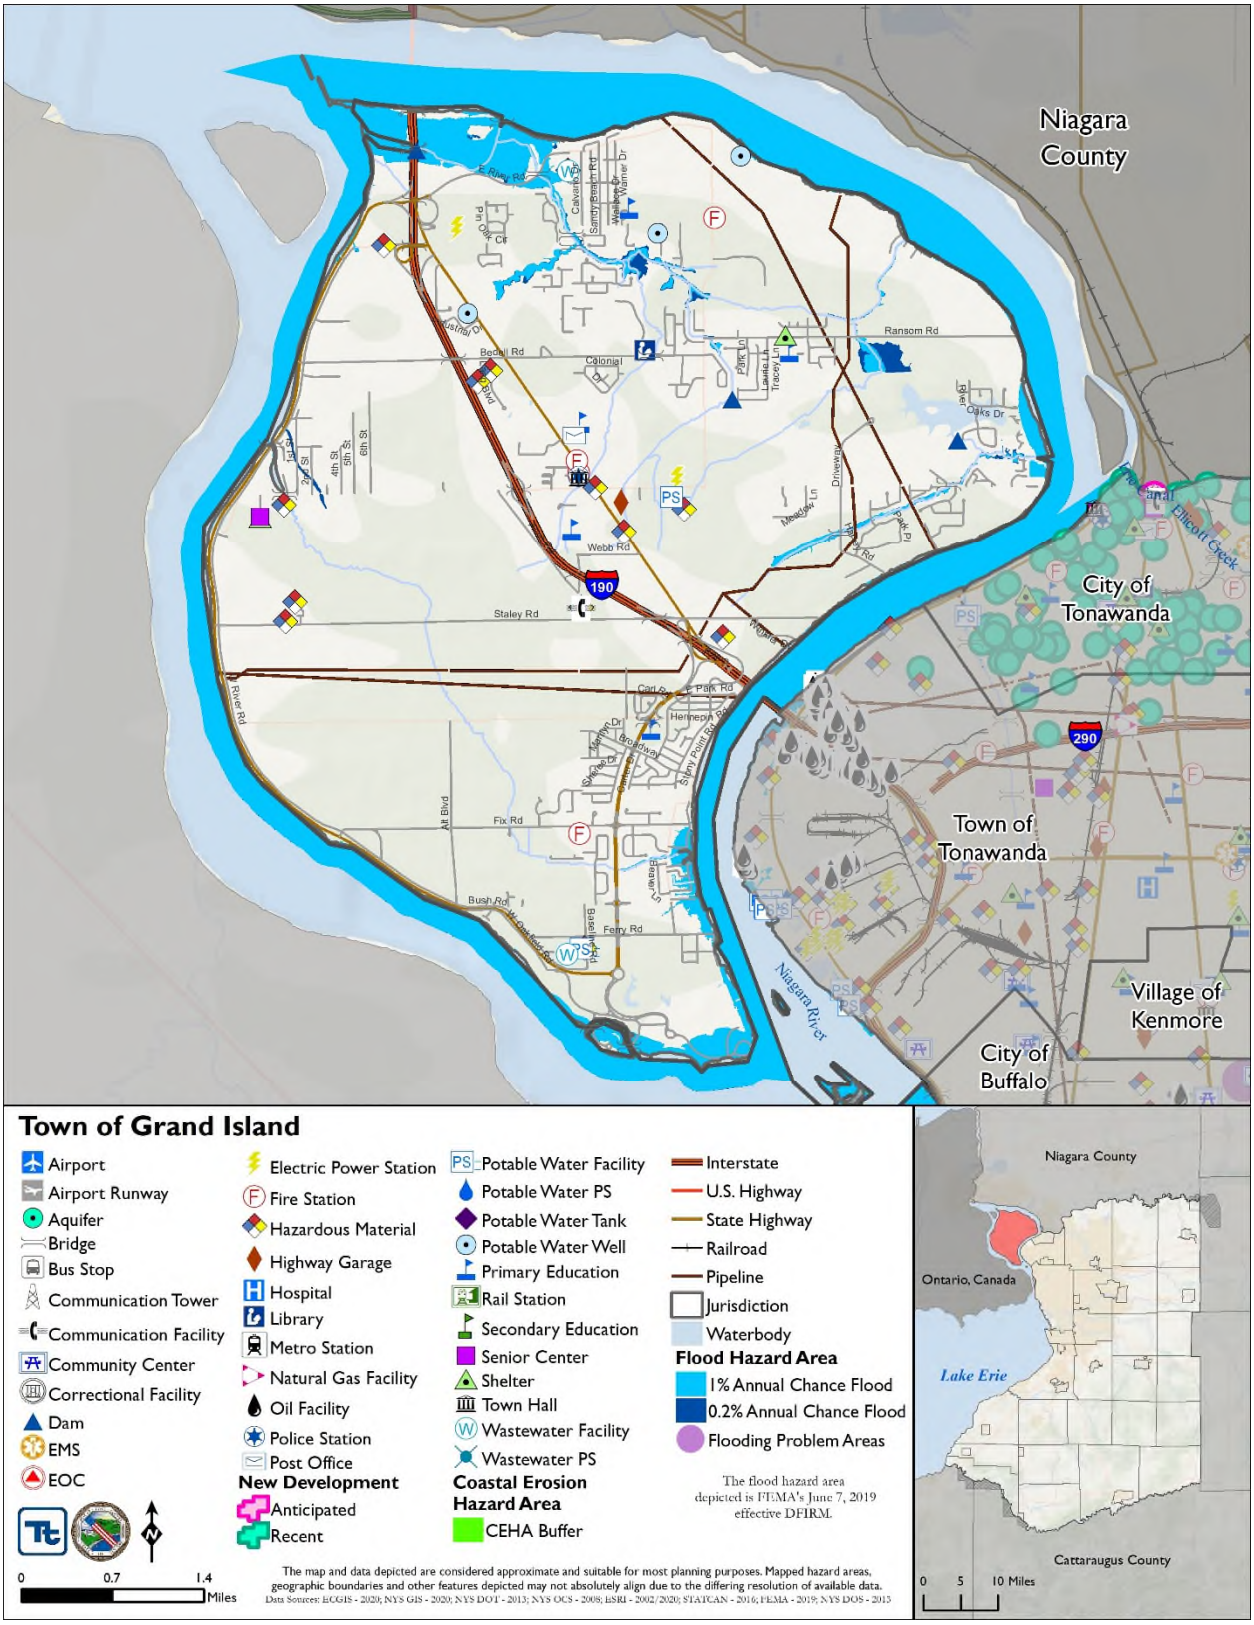
9.25.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Grand Island's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Grand Island has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.25-1. Town of Grand Island Hazard Area Extent and Location Map 1



Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Grand Island's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.25-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.25-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted the Town of Grand Island did not report damage.
August 11-15, 2015	Flash Flood	No	Although the county was impacted the Town of Grand Island did not report damage.
October 28-29, 2015	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
November 12, 2015	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
November 18, 2015	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
January 11, 2017	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
March 8, 2017	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
March 13, 2017	Winter Storm	No	Although the county was impacted the Town of Grand Island did not report damage.
July 20, 2017	Tornado	No	Although the county was impacted the Town of Grand Island did not report damage.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted the Town of Grand Island did not report damage.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted the Town of Grand Island did not report damage.
January 2, 2018	Blizzard	No	Although the county was impacted the Town of Grand Island did not report damage.
October 6, 2018	Lightning	No	Although the county was impacted the Town of Grand Island did not report damage.
February 24, 2019	High Wind	No	Although the county was impacted the Town of Grand Island did not report damage.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted the Town of Grand Island did not report damage.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted the Town of Grand Island did not report damage.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted the Town of Grand Island did not report damage.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted the Town of Grand Island did not report damage.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted the Town of Grand Island did not report damage.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted the Town of Grand Island did not report damage.
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Grand Island's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Grand Island. The Town of Grand Island has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated that the coastal erosion risk should be decreased from High to Medium, that the earthquake hazard risk should be decreased from Medium to Low and the Severe Storm risk should be decreased from High to Low. These changes reflect the town's risk assessment.

Table 9.25-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Medium	Medium	Low	High	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	Low	Medium	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.25-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Buckhorn Marsh Dam & Dike	Dam	X	X	2022-Town Grand Island-002

Source: FEMA 2021

Identified Issues

After review of the Town of Grand Island's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Grand Island has identified the following vulnerabilities within their community:

- The town's municipal building lacks backup emergency power. The phone system (VOIP) utilizes UPS to remain functional. In the event of a power outage, very little emergency operations capability would be possible during and after an emergency.
- The Buckhorn Marsh Dam & Dike is in the Special Flood Hazard Area.
- Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.
- The town contains repetitive loss flood properties
- Some homeowners are unaware of their exposure to flood risk
- The town was unable to identify capacity of emergency shelters and temporary housing locations.

9.25.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.25-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	East Park Outfall Reconstruction – replacing existing deteriorated storm sewer outfall at East Park and East River Roads	Erosion, Flooding	Prevent erosion and properly direct storm water to the Niagara River	Engineering Department	Complete	Cost	$ 106,000	1. Discontinue 2. 3. Complete
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Fix Road Drainage Improvements – installing 1500 linear feet of 18" diameter new storm sewer	Drainage, Flooding	alleviate drainage problems and flooding and to improve capacity in the 2300 block of Fix Road	Engineering Department	Complete	Cost		1. Discontinue 2. 3. Complete
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Ferry Village Drainage Improvements- replacing severely deteriorated 140 linear feet of 24" diameter culvert pipe	Drainage, Flooding	Alleviate flooding and drainage problems to improve capacity on Elmwood Road	Engineering Department	Complete	Cost		1. Discontinue 2. 3. Complete
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Engineering and Water Resources	Complete	Cost	N/A	1. Discontinue 2. 3. Ordinance was recently updated.
						Level of Protection		
						Damages Avoided; Evidence of Success		

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Grand Island has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The Engineering Department repaired the stormwater pond on Amy Drive, including excavation of two silted ponds to reduce stormwater and repair backups.
- The Bedell Road drainage/culvert was replaced to improve hydraulics and carrying capacity.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Grand Island participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.25-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	X	-	-	X	-	-	-	-	X
Cyber Attack	-	X	-	-	X	-	-	-	-	X
Earthquake	-	X	-	-	X	-	-	-	-	X
Expansive Soils	-	X	-	-	X	-	-	-	-	X
Extreme Temperature	-	X	-	-	X	-	-	-	-	X
Flood	-	X	-	X	X	X	X	-	-	X
Hazardous Materials	-	X	-	-	X	-	-	-	-	X
Landslide	-	X	-	-	X	-	-	-	-	X
Pandemic	-	X	-	-	X	-	-	-	-	X
Severe Storm	-	X	-	-	X	-	-	-	-	X
Severe Winter Storm	-	X	-	-	X	-	-	-	-	X
Utility Failure	-	X	-	-	X	-	-	-	-	X
Wildfire	-	X	-	-	X	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.25-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Grand Island would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.25-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.25-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town Grand Island-001	Floodplain Administrator to attend training on floodplain management	3	Flood	**Problem:** Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties. **Solution:** Obtain/host training and certification for floodplain managers.	No	No	Within 3 years	FPA, Emergency Manager	$3,000	Certified floodplain managers trained Floodplain management improved.	County or municipal budget	High	EAP	PR
2022-Town Grand Island-002	Encourage protection of the Buckhorn Marsh Dam & Dike to the 0.2% annual chance flood event	1	Flood	**Problem**: The NYSDEC owned Buckhorn Marsh Dam & Dike is in the Special Flood Hazard Area. The dam provides important flood protection services. **Solution**: The town will contact New York State, owner of the Buckhorn Marsh Dam and Dike to protect it to the 500-year flood level. New York State will survey the dam to determine what protections are necessary and carry out the necessary upgrades. The NYSDEC will report findings to the town.	Yes	No	Within 3 years	Town Engineer, NYSDEC	TBD per engineering feasibility analysis	Ensure this critical facility continues to provide flood protection services	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	EAP	PI
2022-Town Grand Island-003	Protect the town's municipal building from power outage	1	All Hazards, Utility Failure	**Problem**: The Town Municipal building lacks emergency power and is vulnerable to utility failure with potential disruption to service from this important facility. **Solution**: Town staff will conduct a feasibility analysis to determine the proper size backup	Yes	No	Within 3 years	Town Board, Emergency Manager	~$75,000 for a backup generator	Ensure this critical facility continues to provide government services	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	SIP	ES

2022-Town Grand Island-006	Determine capacity of Emergency Shelters and Temporary Housing locations	1	All Hazards	**Problem:** The town is not able to identify the capacity of emergency shelters and temporary housing locations **Solution:** The town will work with the county to identify the capacity of emergency shelters and temporary housing locations	No	No	Within 3 years	Town Board	Staff time	Ensure that emergency shelters and temporary housing locations provide adequate capacity to deal with post disaster demand	Municipal budget	High	LPR	ES, PR

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.25.9 Action Worksheets

The following action worksheets have been developed by the Town of Grand Island to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 64-Section-9.25-Grand-Island-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Grand Island Action Worksheet			
Project Name:	Protect the town's municipal building from power outage		
Project Number:	2022-Town Grand Island-003		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	Town Municipal building lacks emergency power and is vulnerable to utility failure leading to potential disruption of service at this important facility which houses emergency services such as police, water, and engineering services.		
Action or Project Intended for Implementation			
Description of the Solution:	Town staff will conduct a feasibility analysis to determine the proper size backup generator to install at the municipal building. Town staff will install and maintain the generator.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensure this critical facility continues to provide government services
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	~$75,000 for a backup generator	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program
Responsible Organization:	Town Board, Emergency Manager	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Develop a dedicated solar array	High	Variable power service, infeasible
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

9.26 Town of Hamburg

This section presents the jurisdictional annex for the Town of Hamburg. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Hamburg's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.26.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Hamburg's hazard mitigation plan primary and alternate points of contact. The Town of Hamburg followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Emergency Management and Code Enforcement. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.26-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Sean Crotty, Emergency Manager Address: 6100 South Park Avenue, Hamburg, New York 14075 Phone Number: 716-649-6111 ext. 2811 Email: scrotty@thpdny.org	Name/Title: Nicholas Pikul, Deputy Emergency Manager Address: 6100 South Park Avenue, Hamburg, New York 14075 Phone Number: 716-649-6111 ext. 2835 Email: npikul@thpdny.org
NFIP Floodplain Administrator	
Name/Title: Roger Gibson, Supervising Code Enforcement Officer Address: 6100 South Park Avenue, Hamburg, New York 14075 Phone Number: 716-649-6111 ext. 2210 Email: rgibson@townofhamburgny.com	

9.26.2 Municipal Profile

The Town of Hamburg is 41 square miles in size and is named after the German City of the same name. The town is on the county's western side and is one of the county's "Southtowns". The town includes the Villages of Hamburg and Blasdell. Hamburg is bounded by Lake Erie to the west, the Town of Lackawanna to the north, the Town of Orchard Park to the east, and the Town of Eden to the south. Eighteenmile Creek traverses the town.

The Town of Hamburg was formed from the larger town of Willink. In 1850, the town was further reduced to form the Towns of East Hamburg and West Seneca. The New York State Thruway (Interstate 90), U.S. Route 62, US 20, and NY Route 5 pass through the town. The first white landowner in the area was John Cummings, who built a grist mill in 1806. In 1852, the Erie Railroad was built through the area. In 1868 the Erie County

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Fair came to the town and has been there since that time. Weekly publication of the *Erie County Independent* began in 875 (Wikipedia, Town of Hamburg, accessed 2020). Polish and Italians immigrants began to arrive in the area around 1890 to work in the area's rapidly growing steel industry (Town of Hamburg website, accessed 2020).

According to the U.S. Census, the 2010 population for the Town of Hamburg was 44,974. The estimated 2019 population was 45,985, a 2.2 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.9 percent of the population is 5 years of age or younger and 19.9 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.26.3 Jurisdictional Capability Assessment and Integration

The Town of Hamburg performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 0). The Town of Hamburg's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Hamburg. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.26-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	IBC2020 Hamburg Town Code Chapter 76	Local	Code Enforcement
Comments: It is the intent of this chapter to provide for the administration and enforcement of the provisions of all laws, codes, ordinances, regulations and orders applicable to: • The location, design, materials, construction, alteration, repair, equipment, maintenance, use, occupancy, removal and demolition of buildings, structures and appurtenances within the Town. • Fire prevention and fire safety regulations consistent with nationally recognized good practices for safeguarding of life and property from the dangers of fire and explosions arising from hazardous conditions in the use or occupancy of buildings or premises and from the storage and use of hazardous substances, materials and devices.					

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Zoning Code	Yes	Yes	Hamburg Town Code Chapter 280	Local	Code Enforcement
Comment: A Comprehensive Zoning Plan is hereby established for the area of the Town of Hamburg outside the Villages of Blasdell and Hamburg by dividing the territory thereof into certain districts and prescribing regulations for buildings or other structures and the use of land therein. The Comprehensive Zoning Plan, set forth in the text and map which constitute this chapter, is adopted in order to promote and protect public health, safety, comfort, convenience, prosperity and other aspects of the general welfare. These general goals include, among others, the following specific purposes: to provide adequate light, air and convenience of access; to prevent undue concentration of population and overcrowding of land; to lessen congestion in the streets; to secure safety from fire, flood, panic and other dangers; to enhance the environment by the conservation of certain open land areas with certain desirable or unique characteristics worthy of preservation; to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements; and to preserve and promote the attractiveness of the community.					
Subdivision Ordinance	Yes	Yes	Hamburg Town Code Chapter 230	Local	Planning Department
Comment: The public health, safety, morals and general welfare require harmonious, orderly and progressive development of land within towns of the state. In furtherance of this purpose, regulations of the subdivision of land by Town governing authorities is desired for the following purposes, among others: • To encourage the development of economically sound and stable communities. • To assure the provision of required streets, utilities and other facilities and service to new land developments. • To assure the adequate provision of safe and convenient traffic access and circulation, both vehicular and pedestrian, in new land developments. • To assure the provision of needed public open spaces and building sites in new land developments through the dedication or reservation of land for recreational educational and other public purposes. • To assure, in general, the wise development of new areas in harmony with the Master Plan of the town. • To assure coordination of intergovernmental public improvement plans of the town. • To assure coordination of intergovernmental public improvement plans and programs within the county. • To assure proper legal description, identification, monumentation and recording of real estate boundaries. • (9) To secure equitable handling of all subdivision plats by providing uniform standards and procedures, thus providing suitable sites for building purposes and human habitation.					
Stormwater Management Ordinance	Yes	Yes	Hamburg Town Code Chapter 280-351	Local	Engineering Department
Comment: No application for approval of a land development activity shall be reviewed until the appropriate board has received a stormwater pollution prevention plan (SWPPP) prepared in accordance with the specifications in this article and Chapter 226A.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	Town of Hamburg Code Chapter 280-333	Local	Planning Department
Comment: All applications requiring a special use permit are also subject to site plan review and the requirements of this section. Applications only requiring site plan review may have some of the following requirements waived by the Town, based on the tower's location and size. Applications for microcells requiring site plan approval may have some of these requirements waived (many may not be applicable to these types of installations). • All applicants, after obtaining Town of Hamburg and other required approvals, must obtain a building permit from the Code Enforcement Officer of the Town of Hamburg. The Code Enforcement Officer is hereby authorized to issue building permits under this article if it is determined that an applicant has met the requirements established in this article. • B. Site plan applications will be processed by the Town of Hamburg Planning Board. The intent of site plan review is to evaluate site plans and require changes consistent with minimizing conflicts which may result between the site layout and design of proposed uses and natural site conditions and features and/or existing or planned adjacent uses. Site plan review is also responsible

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
for ensuring that development comply with clearly calculated planning goals and policies as are provided in the Town of Hamburg's Comprehensive Plan and other area-specific planning documents.					
Environmental Protection Ordinance	No	No	-	-	-
Comment: None					
Flood Damage Prevention Ordinance	Yes	Yes	Town of Hamburg Code Chapter 115	Local	Code Enforcement
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: • Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; • Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; • Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; • Control filling, grading, dredging and other development which may increase erosion or flood damages; • Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and • Qualify and maintain for participation in the National Flood Insurance Program. Meets state requirements – BFE+2 feet for all construction in the SFHA (residential and non-residential)					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	SPDES GP	NYS	NYS DEC
Comment: This requires urbanized areas (local governments) to develop a stormwater management program that will reduce the amount of pollutants carried by stormwater during storm events to waterbodies to the "maximum extent practicable". The goal of the program is to improve water quality and recreational use of waterways. A Municipal Separate Storm Sewer Systems Permit, GP-0-15-003 is required.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Hamburg to oversee and track development.

Table 9.26-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Inspection
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Underutilized Sites Study completed January 2018

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Hamburg and their current responsibilities which contribute to hazard mitigation.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.26-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board is responsible for decisions on land use planning in Hamburg and specifically subdivision and site plan review and approval, advice toward revisions of the Comprehensive Plan and the review and granting of special use permits. Approvals of the Planning Board are independent of those of the Town Board.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals – Approval of Variances
Planning Department	Yes	See Above
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The "Conservation Advisory Board" is a member of the New York State Association of Conservation Commissions, and is charged with doing environmental assessments on all new projects in the Town of Hamburg. The assessments are done in accordance with NYS SEQRA law. The assessments are provided to the Planning Board and the Town Board to guide them in their decisions. Other functions of the CAB are: • The preservation of open space/green space – including acquisitions by the DEC and Town. • Evaluation of wetlands and other natural resources. • Assisting the DEC, the Army Corps of Engineers and other agencies as necessary. • Advising the Town Board, Building Inspection and Engineering departments on environmental issues.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Hamburg Community Development Department
Public Works/Highway Department	Yes	The Town of Hamburg Highway Department performs numerous secondary tasks, in addition to the primary responsibilities of Road Maintenance, Snow Removal, Drainage, and Brush/Rubbish Pickup. The department is responsible for maintenance of right-of-ways for safety and beautification purposes. This includes cutting brush and removal of trees where necessary. The department works with the Town Board to alleviate off road, backyard, and side yard problems when many residents are involved. We also regularly clean drop inlets as part of our drainage system maintenance. The department responds to notices of excavation given by the Underground Facilities Protective Organization, protecting underground lines from damage. The department maintains its own fleet of over 50 vehicles and a large tool inventory. The department's own mechanic shop conducts its own state vehicle inspections and 90% of its own vehicle repairs. Small engine repair, carpentry, and welding work is also completed by the department.
Construction/Building/Code Enforcement Department	Yes	Building Inspection Responsibilities: Enforce the New York State Uniform Fire Prevention and Building Code and the Town of Hamburg, Village of Hamburg and Village of Blasdell Zoning Codes. Reviews plans for building permits to ensure the plans, specifications and any other information that may be required is in compliance with all codes before issuing the proper permits Performs inspections on all building permits to ensure compliance with proper codes.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		Address complaints and alleged violations for validity and resolution per zoning codes and property maintenance compliance, if there is a violation and it is not corrected we will bring the property owner into court and the judge will decide the final disposition. Conducts fire inspections on commercial building and multiple unit apartment buildings to verify all smoke detectors and exit signs are functioning properly, fire extinguishers, sprinkler systems and fire suppression systems are inspected and exit ways are clear of debris. Receives and maintains storm water pollution Prevention Plan (SWPPP) reports for private subdivisions and commercial construction.
Emergency Management/Public Safety Department	Yes	The Town of Hamburg Public Safety Dispatch Center provides dispatching services to many agencies in the South Towns of Erie County, New York. The primary agencies served are the Police, Fire and EMS (Emergency Medical Services) units of the Town of Hamburg. This includes all of the Villages of Blasdell, and Hamburg. The Dispatch Center is the contact point for the Dog Control Officers throughout the Town of Hamburg. The Dispatch Center also answers all 911 hardwired telephone calls within the Town of Hamburg, and dispatches the Southtowns Hazmat Team, and the Town of Hamburg Water Rescue Unit. The Dispatch Center is also the afterhours contact point for many Town Agencies, including the Buildings and Grounds, and Town Highway Departments.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department (see above)
Mutual aid agreements	Yes	Highway agreements with the Village of Hamburg, Erie County DPW and NYS DOT. Emergency Services agreements as part of the Erie County Fire, Law Enforcement & Emergency Services Mutual Aid Agreements.
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering Department
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering Department
Planners or engineers with an understanding of natural hazards	Yes	Engineering Department
Staff with expertise or training in benefit/cost analysis	Yes	Engineering Department
Professionals trained in conducting damage assessments	Yes	Engineering Department
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Engineering Department/Planning Department
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.26-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.26.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Roger Gibson, Supervising Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Hamburg.

Table 9.26-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Hamburg	90	202	$1,824,818	66	37

Source: FEMA, 2019
Notes: Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The Town of Hamburg is vulnerable to flooding, but does not maintain a lost of property owners that are interested in flood mitigation, nor a list of properties that have been damaged by flooding. There are currently no RiskMAP projects underway, however a property on Big Tree Road was previously mitigated against flood damages. Substantial Damage determinations are made by reviewing construction repair estimates, if the cost to repair is 50% or more of the market value, minus the land value. Flood Hazard maps adequately address the flood risk within the town.

NFIP Compliance

Town of Hamburg Code Enforcement is responsible for floodplain management, however there are no certified floodplain mangers on staff. Code Enforcement is responsible for plan reviews, permitting, and inspections. The Flood Damage Prevention Ordinance is located in Chapter 115 of the Town Code, and meets minimum requirements. The most recent Community Assistance Visit was in 2019. There are no outstanding compliance issues.

9.26.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Hamburg has identified the following routes and procedures to evacuate residents prior to and during an event.

- Evacuation routes are determined by NYSDOT via Predesignated Routes and are dependent on the event.

Sheltering

The Town of Hamburg has identified the following designated emergency shelters within the Town.

Table 9.26-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None identified. The Town will work with the county to identify and designate an Emergency Shelter. See Mitigation Action 2022-T. Hamburg-#001							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Hamburg has identified the following sites suitable for placing temporary housing units.

Table 9.26-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The Town will work with the county to identify temporary housing locations. See Mitigation Action 2022-T. Hamburg-#002					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Hamburg has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.26-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The Town will work with the county to identify and designate Permanent Housing Locations. See Mitigation Action 2022-T. Hamburg-#002					

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.26.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.26-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.26-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

** Only location-specific hazard zones or vulnerabilities identified.*

9.26.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Hamburg's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Hamburg has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Hamburg's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.26-14 provides details regarding municipal-specific loss and damages the Town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.26-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 9, 2015	Lake Effect Snow	No	Lake effect snow moved across Lake Erie, creating blizzard-like conditions with zero visibility and wind gusts of 45 mph. A portion of the New York State Thruway was closed Friday morning, with rates of snow falling up to four inches per hour.	Estimated snowfall totals reached 19 inches in Hamburg.
January 1, 2016	Lake Effect Snow	No	Bands of lake effect snow developed over the course of New Year's Eve, with peak snowfall on New Year's Day reaching snowfall peaks of two inches per hour, and reports of thunder within the band.	Estimated snowfall totals reached 10 inches in Hamburg.
January 10, 2016	Lake-Effect Snow	No	A strong cold front resulted in significant lake effect snow across Lake Erie, accumulating up to 3 inches per hour.	An estimated 9 inches of snow was reported in Hamburg.
February 12, 2016	Lake-Effect Snow	No	Lake effect snow bands formed across Lake Erie in the morning, and later off Lake Ontario bringing two inches of snow per hour. The snowfall was during the early morning commute and caused several accidents and slowed traffic.	An estimated 8 inches of snow was reported in Hamburg.
February 15, 2016	Winter Storm	No	A low pressure system moved across Pennsylvania into New York, bringing minor snow accumulations and half an inch of ice. Heaviest snowfalls were in Rochester (22 inches).	An estimated 10 inches of snow was reported in Hamburg.
January 4-7, 2017	Lake-Effect Snow	No	A long duration, high impact lake effect snow event produced three to four feet of snow east of Lake Erie and Lake Ontario. Snowfall rates reached up to 5 inches per hour, which combined with people leaving work and school in the afternoon, brought traffic to a standstill. Snow accumulated so quickly that the plows were unable to keep up and people abandoned their cars on the Thruway and local roads, evening commutes reached 6 hours or mere and school busses were unable to bring	Total snowfall report in Hamburg amounted to 23 inches.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			students home. Snow continued into Saturday morning, creating hazardous road conditions along I-90 near Angola.	
March 8, 2017	High Wind	No	A deep low pressure system brought strong winds to the entire region with sustained winds up to 49 mph and gusts reaching 81 mph. Hundreds of thousands of people were without power in Monroe County, NY alone. Strong winds derailed 12 train cars in Batavia (Genesee County). Numerous flights into the Buffalo and Rochester Airports had to be diverted due to the high winds.	Measured wind gusts reached 75 mph in Hamburg.
June 27, 2017	Hail	No	Thunderstorms in Orchard Park and West Seneca produced three-quarter inch hail.	Three-quarter inch (0.75) hail was reported in Hamburg.
July 20, 2017	Thunderstorm Wind/Tornado	No	A cluster of thunderstorms resulted in four tornadoes across Western NY.	A tornado began in Hamburg before moving across Orchard Park. Hundreds of car windows were blown out at the Hamburg Fairgrounds, where several buildings were damaged, including the Grandstand. Numerous trees were downed across the fairgrounds. An NWS storm survey confirmed an EF2 tornado touched down in Hamburg.
August 4, 2017	Thunderstorm Wind	No	Thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, winds partially tore the roof off a building. One inch hail was also reported.	Law enforcement reported trees down by thunderstorm winds in the Village of Hamburg.
December 6, 2017	Lake-Effect Snow	No	A cold front brought lake-effect snow across Lake Erie and Lake Ontario, resulting in heavy snow accumulation across Erie County.	An estimated 12 inches of snow were reported in Hamburg.
December 10, 2017	Lake-Effect Snow	No	Heavy snow fell throughout Erie County, accompanied by reports of thunder and lightening throughout the duration of the event.	An estimated 16 inches of snow were reported in Hamburg
December 29, 2017	Lake-Effect Snow	No	Bands of lake-effect snow developed throughout the afternoon, with snowfall rates reaching three inches per hour.	An estimated 9inches of snow were reported in Hamburg.
March 1, 2018	Winter Storm	No	A winter storm brought heavy snow across the entire region. There were several reports of downed trees and wires due to the weight of the snow and high winds.	Fifteen (15) inches of snow were reported in Hamburg.
October 27-November 1, 2019	Lakeshore Flooding and High Winds	DR-4472-NY	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	Hoover Beach in Hamburg became inundated from lakeshore flooding. Homes were flooded on Grand Island and along Route 5 near Hamburg. Water levels

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
				reached 10.67 feet above low water. Rainfall totals reached 2.3 inches in Hamburg.
November 27, 2019	High Wind	No	A strong low pressure front followed by a cold front produced favorable conditions for high winds and storms across western NY. Water Levels in Lake Erie peaked at 9.56 feet above low water and remained above flood stage for four hours.	Peak wind speeds reached 66 mph in Hamburg.
January 12, 2020	High Wind	No	Wind gusts along the Lake Erie shore exceeded 65 mph, resulting in widespread damage in all lakeshore counties.	High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg. Due to the seiche, water levels peaked in Buffalo at 9.85 feet above low water.
January 18, 2020	Lakeshore Flood	No	Heavy snowfalls and precipitation followed by a cold front resulted in a seiche on Lake Erie that caused lakeshore flooding throughout the county. Peak water levels on Lake Erie reached 8.18 feet above low water.	The seiche on Lake Erie resulted in flooding and the closure of Route 5 in Hamburg.
February 26, 2020	Lake-Effect Snow	No	A low-pressure system brought lake-effect snow across Lakes Erie and Ontario. Widespread snow accumulations of 1-2 feet of snow occurred east of Lake Erie, accompanied by strong wind gusts and lakeshore flooding. The biggest seiche of the month occurred during the event, brining the water level in Lake Erie to 7.5 feet above low water.	Sustained wind speeds reached 56 mph in Hamburg. Minor flooding along Route 5 was reported.
August 25, 2020	Thunderstorm Wind	No	A cold front generated scattered thunderstorms throughout the evening, increasing in intensity as they crossed Lake Ontario moving south into Buffalo.	Several trees were down onto Smith Road in Hamburg.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Hamburg's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Hamburg. The Town of Hamburg has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the Town of Hamburg indicated the following:

- The town agreed that the calculated rankings accurately reflected the risk posed to the community.

Table 9.26-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	High	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.26-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
George Ricaby Co Dam #1	Dam	A	V	2022-T. Hamburg-004
Rogers Road PS	Wastewater Pump Station	A	-	2022-T. Hamburg-003
Wanakah PS	Wastewater Pump Station	A	-	2022-T. Hamburg-003
Woodlawn Beach PS	Wastewater Pump Station	A	-	2022-T. Hamburg-003

Source: Effective DFIRM

Identified Issues

After review of the Town of Hamburg's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Hamburg has identified the following vulnerabilities within their community:

- A community of approximately 100 homes on Lake Erie at Hoover Beach are at extreme risk of flooding and freezing due high wave action and ice buildup.
- The town does not have any designated Emergency Shelter Locations.
- The town does not have any designated Temporary or Permanent Housing locations to be used to house displaced residents, or to use to relocate homes that experience repetitive flood damages and losses, respectively.
- The Rogers Road, Wanakah, and Woodlawn Beach Wastewater Pump Stations are located within the 1% SFHA (100-year floodplain).
- The George Ricaby Co Dam #1 is located within the 0.2% SFHA (500-year floodplain).
- High water from creek floods over golf course causing substantial damage to grounds causing financial impact on town.
- The Town and Village of Hamburg have aging infrastructure systems and experience increased flooding outside of the SFHA during storm events.
- Thurston Avenue experiences ongoing drainage problems causing road closures and damages during storm events.
- A blocked pipe at Twin Willows causes flooding and drainage issues during storm events.
- Flood-prone areas include:
    - 18 Mile Golf Course
    - Wanakah Heights
    - Thurston/Richmond Area
    - Eckhardt Rd at Boston State

9.26.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.26-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	18 Mile Creek Golf Course Flood Mitigation Project	Flooding	Town Engineering	High water from creek floods over golf course causing substantial damage to grounds causing financial impact on Town	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as 2022-T. Hamburg-005 2. 3.
-	Smith Road Box Culvert Replacement	Flooding	Town Engineering	Flooding 30 residential properties and roadway upstream of inadequate sized culvert	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Complete
-	Town-wide drainage study to assess infrastructure: To adequately measure the ability to handle storm water and drainage	Flooding	Town Engineering	Aging infrastructure	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP as 2022-T. Hamburg-006 2. 3.
-	Installation of reinforced break wall along Hoover Beach neighborhood along Lake Erie	Coastal Flooding	Town Engineering	Not Identified	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Property was sold, discontinue.

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Hamburg has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Hamburg participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.26-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X									X
Cyber Attack	X									X
Earthquake	X									X
Expansive Soils	X									X
Extreme Temperature	X									X
Flood	X	X		X	X		X		X	X
Hazardous Materials	X									X
Landslide	X									X
Pandemic	X									X
Severe Storm	X	X							X	X
Severe Winter Storm	X	X							X	X
Utility Failure	X									X
Wildfire	X									X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.26-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Hamburg would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.26-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.26.9 Action Worksheets

The following action worksheets have been developed by the Town of Hamburg to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 65-Section-9.26-Hamburg-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Wastewater Pump Stations Flood Protections		
Project Number:	2022-T. Hamburg-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Rogers Road, Wanakah, and Woodlawn Beach Wastewater Pump Stations are located within the 1% SFHA (100-year floodplain).		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at each of the Wastewater Pump Stations to protect them to the 0.2% annual chance flood event. Options include: •Elevation of facility •Floodproofing of facility •Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	High, reduces flooding at critical facilities
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	Medium-High	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	1-2 years	**Potential Funding Sources:**	FMA, CDBG
Responsible Organization:	Town of Hamburg DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Relocate pump stations	$500,000	Not cost effective
	Decommission pump stations	N/A	Not feasible, remaining stations cannot handle capacity needed

Action Worksheet			
Project Name:	Town and Village Drainage Study		
Project Number:	2022-T. Hamburg-006		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The Town and Village of Hamburg have aging infrastructure systems and experience increased flooding outside of the SFHA during storm events.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town and Village of Hamburg will coordinate a large scale drainage study of the communities to adequately measure the ability to handle storm water and drainage. Upon completion of the assessment, the town and village will seek funding to implement the recommendations of the Engineer, including updating and increasing the capacity of drainage systems, redirecting flow via sump pumps, or upsizing culverts as necessary.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces roadway flooding and storm impacts
Useful Life:	30 years	**Goals Met:**	1, 2, 3
Estimated Cost:	Low to conduct study, High to implement	**Mitigation Action Type:**	Local Plans and Regulations, Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FMA, BRIC, HMGP
Responsible Organization:	Town of Hamburg, Village of Hamburg Engineering and DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning, Shared Services Agreements with Town/Village

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadways	N/A	May not solve issues, not cost effective
	Build bridges at intersections	N/A	Need to determine cause and source of flooding

9.27 VILLAGE OF HAMBURG

This section presents the jurisdictional annex for the Village of Hamburg. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Hamburg's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.27.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Hamburg's hazard mitigation plan primary and alternate points of contact. The Village of Hamburg followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Village departments, including: Emergency Management and Code Enforcement. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.27-1. Hazard Mitigation Planning Team

Name/Title: Dean Messing, Assistant Emergency Manager Method of Participation: Provided data and information	

9.27.2 Municipal Profile

The Village of Hamburg is 2.5 square miles in size and lies in the southeast part of the Town of Hamburg, south of Buffalo. Eighteen Mile Creek flows in the south part of the village towards Lake Erie. The village is located entirely within the Town of Hamburg. US Route 62 passes through the village.

The village was first settled by whites in 1806 and was then a rural farming community for generations. The town was first known as White's Corners. Early settlers located in what is now the village center. As Hamburg's population increased, new businesses and residences were built. The village incorporated in 1874 at which time the population of the approximately 700. By 1900, the village's population had grown to approximately 2,000. After World War II, the village developed suburban-scaled neighborhoods and commercial nodes (Village of Hamburg Comprehensive Plan, 2012).

According to the U.S. Census, the 2010 population for the Village of Hamburg was 9,409. The estimated 2019 population was 9,636, a 2.4 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.8 percent of the population is 5 years of age or younger and 19.3 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.27.3 Jurisdictional Capability Assessment and Integration

The Village of Hamburg performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.27.3). The Village of Hamburg's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Hamburg. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.27-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 123	Local	Code Enforcement
Comment: It is the purpose of this chapter to provide for the administration and enforcement of the Uniform Fire Prevention and Building Code established by Article 18 of the Executive Law as added by Chapter 707 of the Laws of 1981 of the State of New York, as the same may be applicable to the Village of Hamburg, New York.					
Zoning Code	Yes	Yes	Village Code Chapter 250	Local	Code Enforcement

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The purposes of this chapter, regulations and zoning districts, as outlined on the Zoning Map, are to provide for orderly growth in accordance with a comprehensive plan, to lessen congestion in the streets, to secure safety from fire, flood and other dangers, to provide adequate light and air, to prevent overcrowding of land, to avoid undue concentration of population, to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements, and to promote the health, safety and general welfare of the public.					
Subdivision Ordinance	Yes	Yes	Village Code Chapter 207	Local	Code Enforcement
Comment: By authority of the resolution adopted by the Village Board of Trustees on the 24th day of July, 1967, pursuant to the provision of Article VIA of the Village Law, the Planning Commission of the Village of Hamburg is empowered and authorized to approve plans for land subdivision within the Village of Hamburg. These regulations are adopted for the purpose of providing for the future growth and development of the village and affording adequate facilities for the housing, transportation, distribution, comfort, convenience, safety, health and welfare of its population.					
Stormwater Management Ordinance	Yes	Yes	Village Code Chapter 200	Local	Code Enforcement
Comment: The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 200-1A. This chapter seeks to meet those purposes by achieving the following objectives: • Meet the requirements of minimum measures 4 and 5 of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, as amended or revised; • Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, Permit No. GP-02-01, as amended or revised; • Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels; • Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality; • Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and • Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	Village Code Chapter 250-19	Local	Code Enforcement
Comment: In addition to all other powers provided by law the Planning Commission is empowered to approve, disapprove or approve with modifications special permits required by this chapter. The procedures hereinafter set forth for site plan review shall also apply to special permits and in addition if the application indicates that a special permit will be required, the Building Inspector shall, not less than five days prior to the meeting of the Planning Commission at which the application is to be considered, mail a notice which briefly but clearly describes the intent of the proposed special permit to all property owners abutting and within 100 feet of the property which is the subject of the proposed special permit. If the application is approved or approved with modifications, the Building Inspector shall issue the permit, provided that the Building Inspector has determined that all code requirements have been met and approved modifications, if any, have been met.					
Environmental Protection Ordinance	No	No	-	-	-
Comment: None					

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Flood Damage Prevention Ordinance	Yes	Yes	Village Code 146	Local	Code Enforcement
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas, by provisions designed to: • Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities; • Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; • Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; • Control filling, grading, dredging and other development which may increase erosion or flood damages; • Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and • Qualify for and maintain participation in the National Flood Insurance Program.

Comprehensive Plan	Yes	No	2012 Comprehensive Plan	Local	Village of Hamburg
Comment: The Primary Objectives of the Comprehensive Plan Update were: a.) Review the existing comprehensive plan to determine which recommendations have already been accomplished and what items still remain and determine whether remaining actions still make sense in light of the Village's vision and primary goals. b.) Revise existing policy/strategy sections and provide additional to address needs and issues. Primary Focus Areas: This update concentrated on several key areas within the Village: a.) Main Street - Professional Office b.) Lake Street Corridor c.) Buffalo Street d.) Pine Street e.) West End (industrial area). The plan addresses future land use issues, such as the boundaries and uses in the Commercial District, the Lake Street Corridor, protecting the character of Main Street between Lake and Center and addressing the Village's west end – near the train tracks.

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Hamburg to oversee and track development.

Table 9.27-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Town of Hamburg issues on behalf of Village of Hamburg
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Underutilized Sites Study Completed January 2018

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Hamburg and their current responsibilities which contribute to hazard mitigation.

Table 9.27-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planning Board	Yes	Reviews site plans, including new construction
Zoning Board of Adjustments	Yes	Hears requests for variances to village code
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Village has Advisory Commission
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Village has Volunteer Committee
Public Works/Highway Department	Yes	DPW Superintendent
Construction/Building/Code Enforcement Department	Yes	Town of Hamburg
Emergency Management/Public Safety Department	Yes	OEM Coordinator
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Website may be used for these purposes, currently no mass notification system.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW mitigates natural disasters regarding wind events, snow events, and rain events, among others.
Mutual aid agreements	Yes	Town of Hamburg
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineer
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineer or Building Code Officer
Planners or engineers with an understanding of natural hazards	Yes	Engineer or Building Code Officer
Staff with expertise or training in benefit/cost analysis	Yes	Clerk/Treasurer
Professionals trained in conducting damage assessments	Yes	Chief Building Official
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	OEM Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other	No	-

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Fiscal Capability

The table below summarizes financial resources available to the Village of Hamburg.

Table 9.27-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Other State Grants as eligible for mitigation

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Hamburg.

Table 9.27-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	Yes	Village Administrator/Clerk-Treasurer
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Police and Recreation Social Media Accounts
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Environmental Commission, Planning Commission, ZBA
Other programs already in place that could be used to communicate hazard-related information	Yes	Annual Newsletter to Community
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	Yes	School Safety Plans
Other	No	-

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Community Classifications

The table below summarizes classifications for community programs available to the Village of Hamburg.

Table 9.27-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.27-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.27.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Floodplain Administrator (FPA)

Mr. Roger Gibson, Supervising Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Hamburg.

Table 9.27-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Hamburg	5	26	$214,636	7	1

Source: FEMA, 2019

Notes: Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.

RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

There are no areas prone to flooding or floodplains within the village. Therefore, the village does not maintain a list of property owners that are interested in flood mitigation projects, nor are there any RiskMAP projects currently underway. The flood hazard maps for the village adequately address the flood risk. There have been zero homes that have previously been mitigated against flood damages. The Code Enforcement Officer makes Substantial Damage determinations based on if the repair cost of a home is 50 percent or more of the market value, excluding land.

NFIP Compliance

The Town of Hamburg Code Enforcement Officer is responsible for floodplain management within the Village of Hamburg. There are no certified floodplain managers within the own or Village of Hamburg. NFIP Administration services available to the village include plan review, engineering review, and inspections.

The village determines if proposed developments to existing structures qualify as a "substantial improvement" if the construction estimates exceed 50 percent of the market value of the structure, excluding land.

Local Law 146-2 of the Village of Hamburg Code refers to the Village Flood Damage Prevention Ordinance, which meets or exceeds minimum requirements. Village site plan review supports floodplain management and discourages development within flood-prone areas.

There are no outstanding NFIP compliance issues within the village.

9.27.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Hamburg has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 62, Route 20, and Route 5 can be used for evacuations going North or South from the village.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Lakeview Road can be used for evacuations East or West from the village.
- Interstate 90 could be used to evacuate residents in either direction, as well as Route 391-S.
- The best evacuation route is event-dependent, and the village can contact residents through the media, or a reverse-911 call to provide current information.

Sheltering

The Village of Hamburg has identified the following designated emergency shelters within the village.

Table 9.27-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Hamburg High School	Legion Drive	Unknown	No	Yes	Yes	Fire department	Kitchen facilities, showers bathrooms
Hamburg Middle School	Division Street	Unknown	No	Yes	Yes	Fire department	Kitchen facilities, showers bathrooms
Charlotte Avenue School	Charlotte Avenue	Unknown	No	Yes	Yes	Fire department	Kitchen facilities, showers bathrooms
Union Pleasant Grade School	Pleasant Avenue	Unknown	No	Yes	Yes	Fire department	Kitchen facilities, showers bathrooms

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Hamburg has identified the following sites suitable for placing temporary housing units.

Table 9.27-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
The village indicated that they could use all the schools within the village for temporary housing, as well as hotels as they all have the necessary utilities. The schools would be the first choice.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Hamburg has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.27-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code

Quality Inn	Camp Road	Dependent on rooms available	Hotel	Yes	None
Super 8	Camp Road	Dependent on rooms available	Hotel	Yes	None

9.27.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.27-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.27-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

9.27.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Hamburg's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Hamburg has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.27-1. Village of Hamburg Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Hamburg's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.27-14 provides details regarding municipal-specific loss and damages the Village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.27-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 9, 2015	Lake Effect Snow	No	Lake effect snow moved across Lake Erie, creating blizzard-like conditions with zero visibility and wind gusts of 45 mph. A portion of the New York State Thruway was closed Friday morning, with rates of snow falling up to four inches per hour.	Estimated snowfall totals reached 19 inches in Hamburg.
January 1, 2016	Lake Effect Snow	No	Bands of lake effect snow developed over the course of New Year's Eve, with peak snowfall on New Year's Day reaching snowfall peaks of two inches per hour, and reports of thunder within the band.	Estimated snowfall totals reached 10 inches in Hamburg.
January 10, 2016	Lake-Effect Snow	No	A strong cold front resulted in significant lake effect snow across Lake Erie, accumulating up to 3 inches per hour.	An estimated 9 inches of snow was reported in Hamburg.
February 12, 2016	Lake-Effect Snow	No	Lake effect snow bands formed across Lake Erie in the morning, and later off Lake Ontario bringing two inches of snow per hour. The snowfall was during the early morning commute and caused several accidents and slowed traffic.	An estimated 8 inches of snow was reported in Hamburg.
February 15, 2016	Winter Storm	No	A low pressure system moved across Pennsylvania into New York, bringing minor snow accumulations and half an inch of ice. Heaviest snowfalls were in Rochester (22 inches).	An estimated 10 inches of snow was reported in Hamburg.
January 4-7, 2017	Lake-Effect Snow	No	A long duration, high impact lake effect snow event produced three to four feet of snow east of Lake Erie and Lake Ontario. Snowfall rates reached up to 5 inches per hour, which combined with people leaving work and school in the afternoon, brought traffic to a standstill. Snow accumulated so quickly that the plows were unable to keep up and people abandoned their cars on the Thruway and local roads, evening commutes reached 6 hours or mere and school busses were unable to bring	Total snowfall report in Hamburg amounted to 23 inches.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			students home. Snow continued into Saturday morning, creating hazardous road conditions along I-90 near Angola.	
March 8, 2017	High Wind	No	A deep low pressure system brought strong winds to the entire region with sustained winds up to 49 mph and gusts reaching 81 mph. Hundreds of thousands of people were without power in Monroe County, NY alone. Strong winds derailed 12 train cars in Batavia (Genesee County). Numerous flights into the Buffalo and Rochester Airports had to be diverted due to the high winds.	Measured wind gusts reached 75 mph in Hamburg.
June 27, 2017	Hail	No	Thunderstorms in Orchard Park and West Seneca produced three-quarter inch hail.	Three-quarter inch (0.75) hail was reported in Hamburg.
July 20, 2017	Thunderstorm Wind/Tornado	No	A cluster of thunderstorms resulted in four tornadoes across Western NY.	A tornado began in Hamburg before moving across Orchard Park. Hundreds of car windows were blown out at the Hamburg Fairgrounds, where several buildings were damaged, including the Grandstand. Numerous trees were downed across the fairgrounds. An NWS storm survey confirmed an EF2 tornado touched down in Hamburg.
August 4, 2017	Thunderstorm Wind	No	Thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, winds partially tore the roof off a building. One inch hail was also reported.	Law enforcement reported trees down by thunderstorm winds in the Village of Hamburg.
December 6, 2017	Lake-Effect Snow	No	A cold front brought lake-effect snow across Lake Erie and Lake Ontario, resulting in heavy snow accumulation across Erie County.	An estimated 12 inches of snow were reported in Hamburg.
December 10, 2017	Lake-Effect Snow	No	Heavy snow fell throughout Erie County, accompanied by reports of thunder and lightening throughout the duration of the event.	An estimated 16 inches of snow were reported in Hamburg
December 29, 2017	Lake-Effect Snow	No	Bands of lake-effect snow developed throughout the afternoon, with snowfall rates reaching three inches per hour.	An estimated 9inches of snow were reported in Hamburg.
March 1, 2018	Winter Storm	No	A winter storm brought heavy snow across the entire region. There were several reports of downed trees and wires due to the weight of the snow and high winds.	Fifteen (15) inches of snow were reported in Hamburg.
October 27-November 1, 2019	Lakeshore Flooding and High Winds, DR-4472-NY	Yes	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	Hoover Beach in Hamburg became inundated from lakeshore flooding. Homes were flooded on Grand Island and along Route 5 near Hamburg. Water levels

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
				reached 10.67 feet above low water. Rainfall totals reached 2.3 inches in Hamburg.
November 27, 2019	High Wind	No	A strong low pressure front followed by a cold front produced favorable conditions for high winds and storms across western NY. Water Levels in Lake Erie peaked at 9.56 feet above low water and remained above flood stage for four hours.	Peak wind speeds reached 66 mph in Hamburg.
January 12, 2020	High Wind	No	Wind gusts along the Lake Erie shore exceeded 65 mph, resulting in widespread damage in all lakeshore counties.	High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg. Due to the seiche, water levels peaked in Buffalo at 9.85 feet above low water.
January 18, 2020	Lakeshore Flood	No	Heavy snowfalls and precipitation followed by a cold front resulted in a seiche on Lake Erie that caused lakeshore flooding throughout the county. Peak water levels on Lake Erie reached 8.18 feet above low water.	The seiche on Lake Erie resulted in flooding and the closure of Route 5 in Hamburg.
February 26, 2020	Lake-Effect Snow	No	A low-pressure system brought lake-effect snow across Lakes Erie and Ontario. Widespread snow accumulations of 1-2 feet of snow occurred east of Lake Erie, accompanied by strong wind gusts and lakeshore flooding. The biggest seiche of the month occurred during the event, brining the water level in Lake Erie to 7.5 feet above low water.	Sustained wind speeds reached 56 mph in Hamburg. Minor flooding along Route 5 was reported.
August 25, 2020	Thunderstorm Wind	No	A cold front generated scattered thunderstorms throughout the evening, increasing in intensity as they crossed Lake Ontario moving south into Buffalo.	Several trees were down onto Smith Road in Hamburg.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Hamburg's risk assessment results and data used to determine the hazard ranking.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Hamburg. The Village of Hamburg has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village agreed that the calculated rankings accurately reflected the risk posed to the community.

Table 9.27-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Village of Hamburg's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Hamburg has identified the following vulnerabilities within their community:

- During extended power outages, most residential homes do not have power backups. The longest period of power loss lasted four to five days, and most residents chose to shelter-in-place.

9.27.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.27-17. Status of Previous Mitigation Actions

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Hamburg has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Indicated

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Hamburg participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.27-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake				X			X			
Expansive Soils										
Extreme Temperature										
Flood	X	X		X	X		X		X	
Hazardous Materials										
Landslide										
Pandemic										
Severe Storm	X	X			X				X	
Severe Winter Storm	X	X			X				X	
Utility Failure										
Wildfire										

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.27-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Hamburg would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.27-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes 💧 *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*

- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.27.9 Action Worksheets

The following action worksheets have been developed by the Village of Hamburg to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Schoepflin Mill Dam Flood Mitigation		
Project Number:	2022-V. Hamburg-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Schoepflin Mill Dam is located within the 1% SFHA (100-year floodplain).		
Action or Project Intended for Implementation			
Description of the Solution:	The privately owned Schoepflin Mill Dam is classified as a Class D dam, posing no hazard to the village. The village will conduct outreach to the dam owner about the condition of the dam and potential risks posed by a flood and support an inspection plan of the dam by an engineer in accordance with NYSDEC Dam Safety guidelines. The village will aid in any flood mitigation measures as determined by the owner as necessary.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	High, reduces flooding at critical facilities
Useful Life:	30 years	**Goals Met:**	1, 2, 3
Estimated Cost:	Low to conduct outreach	**Mitigation Action Type:**	Education and Awareness Programs
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	ASAP
Estimated Time Required for Project Implementation:	6 months	**Potential Funding Sources:**	Municipal Budget, FMA
Responsible Organization:	Village of Hamburg Code Enforcement	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Decommission Dam	$500,000	Privately owned, dam is not in hazardous condition, unnecessary
	Reinforce Dam	$500,000	Privately owned, dam is not in hazardous condition, unnecessary

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Schoepflin Mill Dam Flood Mitigation	
Project Number:	2022-V. Hamburg-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Critical Facility in SFHA
Property Protection	1	Protects downstream properties
Cost-Effectiveness	1	
Technical	1	
Political	0	
Legal	0	Village does not own dam
Fiscal	1	
Environmental	1	No concerns
Social	1	
Administrative	1	
Multi-Hazard	0	Flood
Timeline	1	
Agency Champion	1	
Other Community Objectives	0	
Total	10	
Priority (High/Med/Low)	High	

Attachment: 66-Section-9.27-Hamburg-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Town and Village Drainage Study		
Project Number:	2022-V. Hamburg-004		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The Town and Village of Hamburg have aging infrastructure systems and experience increased flooding outside of the SFHA during storm events.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town and Village of Hamburg will coordinate a large scale drainage study of the communities to adequately measure the ability to handle storm water and drainage. Upon completion of the assessment, the town and village will seek funding to implement the recommendations of the Engineer, including updating and increasing the capacity of drainage systems, redirecting flow via sump pumps, or upsizing culverts as necessary.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces roadway flooding and storm impacts
Useful Life:	30 years	**Goals Met:**	1, 2, 3
Estimated Cost:	Low to conduct study, High to implement	**Mitigation Action Type:**	Local Plans and Regulations, Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FMA, BRIC, HMGP
Responsible Organization:	Town of Hamburg, Village of Hamburg Engineering and DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning, Shared Services Agreements with Town/Village

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadways	N/A	May not solve issues, not cost effective
	Build bridges at intersections	N/A	Need to determine cause and source of flooding

9.28 Town of Holland

This section presents the jurisdictional annex for the Town of Holland. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Holland's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.28.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Holland's hazard mitigation plan primary and alternate points of contact. The Town of Holland followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: council, supervisor, and building inspector The disaster coordinator and town council member represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.28-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Michael C. Kasprzyk – Supervisor Address: 47 Pearl Street, Holland, NY 14080 Phone Number: 716-537-9443x1 Email:mkasprzyk@townofhollandny.com	Name/Title: Geoff Hack – Councilman / Disaster Coordinator Address: 47 Pearl Street, Holland, NY 14080 Phone Number: 716-537-3191 Email:hckgff23@gmail.com
NFIP Floodplain Administrator	
Name/Title: Michael C. Kasprzyk – Supervisor Address: 47 Pearl Street, Holland, NY 14080 Phone Number: 716-537-9443x1 Email:mkasprzyk@townofhollandny.com	

9.28.2 Municipal Profile

The Town of Holland is in southeast Erie County, approximately 25 miles from downtown Buffalo. The town is bordered by the Town of Sardinia to the south, the Town of Colden to the west, the Town of Wales to the north, and the Town of Java (Wyoming County) to the east. The Town of Holland is 36 square miles in size. (Town of Holland 2012)

The Town of Holland is named after the Holland Land Company. The first part of the town to be settled was the northern edge, known as the "Humphrey Valley," along what is now Rt. 16. In 1818, the Town of Holland was officially formed from the original Town of Willick. Although primarily agrarian for many generations, Holland today has few large farms. Some light industry remains active. (Town of Holland 2020)

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

According to the U.S. Census, the 2010 population for the Town of Holland was 3,401. The estimated 2019 population was 3,355, a 1.4 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.3 percent of the population is 5 years of age or younger and 16.1 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.28.3 Jurisdictional Capability Assessment and Integration

The Town of Holland performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.28.3). The Town of Holland's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Holland. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.28-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 55 (Building Construction)	Local	Town Board
Comment: *The main purpose of building codes are to protect public health, safety and general welfare as they relate to the construction and occupancy of buildings and structures.*					
Zoning Code	Yes	No	Chapter 120 (Zoning); adopted by the Town Board on 4/11/1973	Local	Town Board
Comment: *Guidelines for community safety include the following: 1) Existing natural features, such as trees, brooks, drainage channels and views, shall be retained. Whenever such features interfere with the proposed use of such property, a retention of the maximum amount of such features consistent with the use of the property shall be required. 2) Light industrial uses are not permitted if they may result in hazard of fire or explosion or other physical hazard to any adjacent building or to any plant growth on any land adjacent to the site of the use. 3) Excavations made to a water-producing depth shall be properly sloped to the waterline, with banks sodded or surfaced with soil of an equal quality to adjacent land area topsoil; such topsoil required under this section shall be planted with trees, shrubs, legumes or grasses upon the parts of such areas where revegetation is possible. 4) All pond building permit applications shall be accompanied by a site plan drawn to scale showing the total acreage of the property, property lines, existing features and structures (i.e., dwellings, accessory structures, drives, septic fields, wells, floodplains, wetlands, streams and topographical features) and the proposed pond location.*					

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Subdivision Ordinance	Yes	No	Chapter 104 (Subdivision of Land); adopted by the Town Board on 4/11/1973	Local	Town Board
Comment: *The subdivision ordinance incorporates resilience related measures through the following means: 1) Where a subdivision is traversed by a drainageway, channel or stream, a drainageway easement, conforming substantially to the lines of such watercourse, shall be provided. The easement shall be 20 feet wide or such width as will be adequate to preserve natural drainage and provide sufficient width for maintenance. 2) Floodways, as defined by the United States Army Corps of Engineers, and land deemed by the Planning Board to be otherwise uninhabitable shall not be platted for residential occupancy nor for such other uses as may increase danger to health, life or property or aggravate the flood hazard. Floodplain areas subject to periodic minor flooding may be developed, provided that structures are adequately floodproofed as provided in Chapter 69, Flood Damage Prevention.*					
Stormwater Management Ordinance	No	Yes – for county	-	County	-
Comment:					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-
Comment:					
Site Plan Review	Yes	Yes	Chapter 77 – development plan review Local Law Number 5 of 1993.	Local	Town Board
Comment: *The application must contain an endorsement by the State and/or County Health Department indicating compliance with the standards of the applicable sanitary code, Public Health Law or the applicable health codes. In the event that the proposed open development area does not require approval of the State and/or County Health Departments, a statement to this effect must be submitted with the application and verified by the State and/or County Health Department.* *All requirements of the State Environmental Quality Review Act shall be complied with by the applicant prior to consideration by the Town Board.*					
Environmental Protection Ordinance	Yes	Yes	Chapter 16 – Environmental Council.	Local	Environmental Advisory Council/ Planning Board
Comment: *The intent of the council and the protection ordinance is for the town to comply with local and state environmental protection ordinances and protect the health and safety of the community.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 69 (Flood Damage Prevention); adopted by Town Board on 8/13/2008	Federal	Town Supervisor
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;*					

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and *F. Qualify for and maintain participation in the National Flood Insurance Program.* *The Town Supervisor is the appointed floodplain administrator for the town. Duties include: permit application review, using flood data, notify proper agencies about watercourse alterations, conduct site inspections, issue certificate of compliance, and retain information. For new construction or substantial improvements for residential and non-residential properties in the SFHA, the town requires the lowest floor be elevated to or above two feet above the BFE.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Holland to oversee and track development.

Table 9.28-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building and Zoning Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Flood Zone
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The town is rural and has abundant land, though it is privately owned.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Holland and their current responsibilities which contribute to hazard mitigation.

Table 9.28-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board reviews requests for special use permits and development projects, and makes recommendations to the Town Board.
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals hears and deliberates applications for variances to town ordinances. The committee meets on an "as needed" basis. Appeal applications are available from the Building Zoning Officer.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planning Department	Yes	Members of the Planning Board
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The environmental commission conducts various reviews on local and regional development to mitigate any environmental issues.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department
Construction/Building/Code Enforcement Department	Yes	Building and Zoning
Emergency Management/Public Safety Department	No	New York State Police substation (unmanned) at Town Hall
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Highway Department
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Town Supervisor is the appointed FPA for the town
Surveyor(s)	No	-
Emergency Manager	Yes	Town Emergency Management
Grant writer(s)	Yes	Various individuals on a volunteer basis
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Holland.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.28-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Holland.

Table 9.28-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Clerk and Supervisor
Personnel skilled or trained in website development	Yes	Town Clerk and Supervisor
Hazard mitigation information available on your website	Yes	Website
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	None	-
Warning systems for hazard events	Yes	CODE Red and Alert NY
Natural disaster/safety programs in place for schools	None	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Holland.

Table 9.28-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A Not applicable
NP Not participating
- Unavailable

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.28-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Weak
Cyber Attack	Moderate
Earthquake	Weak
Expansive Soils	Weak
Extreme Temperature	Strong
Flood	Moderated
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Moderated
Severe Winter Storm	Moderated
Utility Failure	Medium
Wildfire	Medium

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement
NOTE: For severe storm and severe winter storm, limited resources could overburden the town's ability to provide services to the community. For Utility failure, a lack of generators at key, town facilities could overload the capacity when needed. Addressed in mitigations actions 1,2, and 3.

9.28.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael C. Kasprzyk – Supervisor

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Holland.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.28-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Holland	3	2	$2,738	0	2

Source: FEMA 2020a, FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The town does not have any areas prone to flooding and does not maintain a list of properties interested in flood mitigation. The Town does not have any ongoing RiskMAP projects underway or planned. The Town has not made any substantial damage determinations and has not mitigated any properties within the town. Flooding has not changed significantly in the town and the flood maps adequately address flood risk within the town.

NFIP Compliance

The supervisor is responsible for floodplain management, though the town does not have any certified floodplain managers on staff. The town does not have adequate resources to address climate change and no staff is in need of assistance to support the town flood mitigation program. The current town NFIP program provides EC GIS System and building inspection services to its community. For substantial improvement determination, the building inspector is in charge of determination.

At this time, there are no barriers to running an effective NFIP program and the current program does not have any violations. The town received a CAC visit on May 5, 2020.

Town supervisor is in charge of floodplain prevention ordinance and the program meets the basic requirements. Given the town's characteristics, the municipality does not have any additional plans pertaining to the NFIP program and is not interested in participating in the FEMA CRS Program.

9.28.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Holland fire department has identified routes and procedures to evacuate residents prior to and during an event. In the time of event and magnitude, the town FD will determine best routes for evacuation. The main routes that are considered evacuation routes are state and county routes. Most municipal routes are not evacuation routes, though based on the location of the event, municipal routes might have to be used.

Sheltering

The Town of Holland has identified the following designated emergency shelters within the town.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.28-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Community Center	3 Legion Dr	100	No	Yes	Yes	HFD EMT	None
Holland School	103 Canada St	500	No	Yes	Yes	HFD EMT	None
Town Hall	47 Pearl St	50	No	Yes	Yes	HFD EMT	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Holland has identified the following sites suitable for placing temporary housing units.

Table 9.28-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Town Park	Legion Drive	5	Park	Water and Electric	None
Three Valley	Olean Rd	50	Camp Site	Electric	None
Mountain Meadows	Parker Rd	50	Camp Site	Electric	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Holland has not identified permanent housing locations, but will work with the county and land owners to determine future locations for permanent housing locations.

Table 9.28-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Mountain Meadows	Parker Rd	50	Camp Site	Electric	None

9.28.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.28-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.28-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

Recent Major Development and Infrastructure from 2015 to Present					
R & S Development	Commercial	3	Olean Rd	Near Caz Creek	Not in flood plain
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
R & S Development	Commercial	Up to 15	Olean Rd	Near Caz Creek	Not in flood plain

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

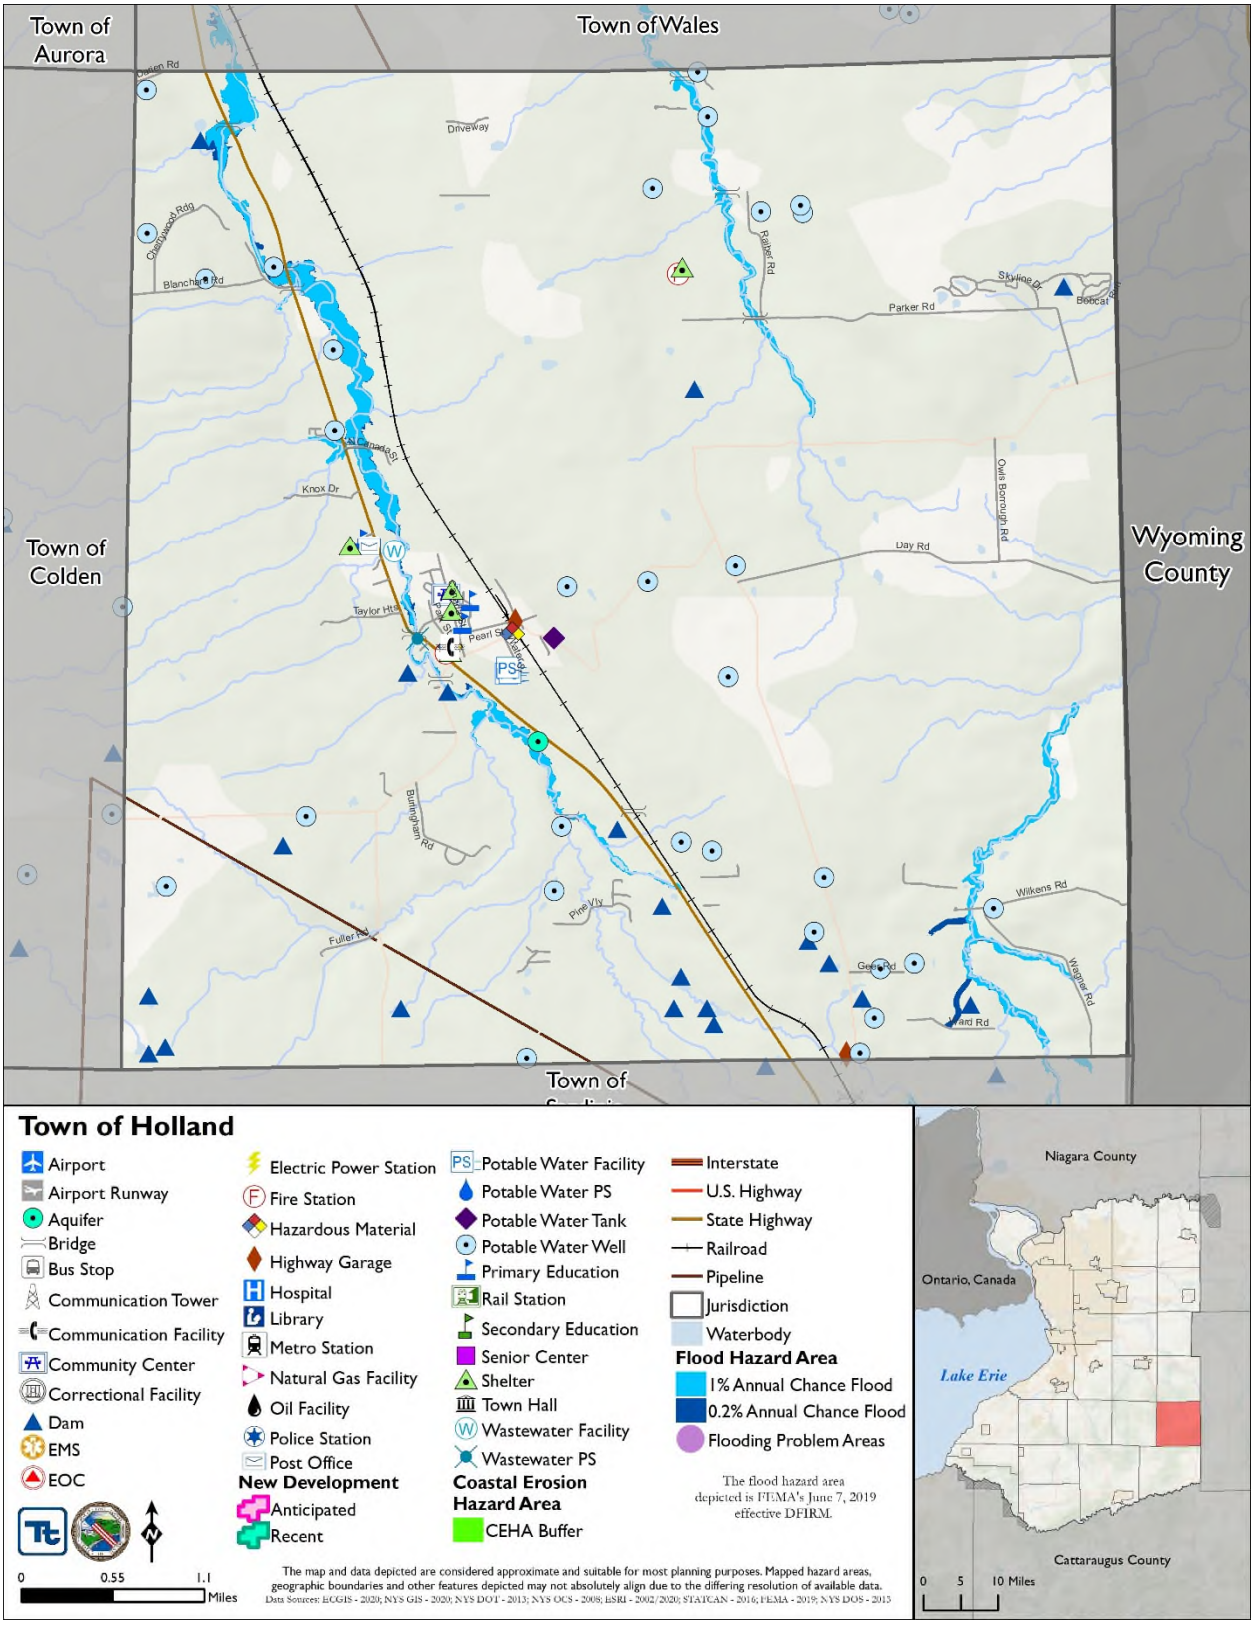
9.28.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Holland's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Holland has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.28-1. Town of Holland Hazard Area Extent and Location Map 1



Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Holland's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.28-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.28-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	Yes	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and	Although the County was impacted, the town did not report damages

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wires in Forestville, Sardinia, Cheektowaga, and South Wales.	
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	Although the County was impacted, the town did not report damages
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low-pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees.	Although the County was impacted, the town did not report damages

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	Although the County was impacted, the town did not report damages
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Increased expenses for manpower and equipment, contractor cost
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds	Although the County was impacted, the town did not report damages

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing	Although the County was impacted, the town did not report damages

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			the low sliced through western New York trailing it and ushering in very gusty winds.	
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	No	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	No	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	Although the County was impacted, the town did not report damages
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5-hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-	Although the County was impacted, the town did not report damages

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the town did not report damages
July 16, 2020	Tornado	No	A mesoscale convective vortex pulled a pair of fronts across the area during the afternoon and evening near the time of peak heating. Due to cloud cover ahead of the MCV, instability was not very strong, however shear was impressive. Helicity values were impressive, and the presence of the MCV likely added to it locally over the western Southern Tier. Precipitable water values were between 1.75 and 2 inches, which resulted in torrential rainfall in concert with severe thunderstorm development.	Trees uprooted, power loss, and home damage.
2020-21	COVID 19	No	Pandemic – EM 3504	Various business closures, social distancing, and recorded deaths across Erie County.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Holland's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Holland. The Town of Holland has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- Flooding is more of an issue than surrounding communities, the town adjusted the ranking from low to medium.
- Wildfires have historically not been an issue for the municipality; ranking adjusted from medium to low

Table 9.28-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Medium	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Medium	Medium	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.28-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
No critical facilities in the floodplain				

Source: 2021 GIS

Identified Issues

After review of the Town of Holland's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Holland has identified the following vulnerabilities within their community:

- The town does not have a salt barn and the salt is stored outside and often gets buried in snow as a result. There have been times where municipal staff need to continuously keep the pile free from snow. As a result, the operations and response of the Highway Department is hindered during a snowstorm, which is one of the highest hazards in the community.
- The town Highway Department community center (2 Legion Drive) (which is used as the community emergency shelter) do not have adequate backup power. Both of these facilities are used as emergency operation centers during a hazard event. It is critical that both remain operational through all hazard events and have power at all times.
- Both Fire Departments (Building #1 @ 49 North Main Street and #2 7640 Hunters Creek Road) do not have generators, except for a portable generator which is not enough power for power the entire facility. Due to the lack of backup power, the facilities cannot adequately operate during a power outage. This is essential as the departments provide emergency services to the town.
- Cellular service throughout the town is limited and causes communications disruptions. Due to the relatively rural characteristic of the town, municipal services have limited capacity to respond to emergencies in areas where lack of cell service exists.
- The Hamlet of Holland has a box culvert that is in disrepair on Pearl/ Canada/ Route 16, running east to west. It drains into Cazenovia Creek. Recently, there was remedial work conducted to reduce road flooding, but further work and improvements need to be done to increase capacity of existing stormwater drainage and prevent further road flooding that often occurs now with increasing rain events.
- Vermont St, Partridge, Warner Gulf , Old Route 16/ South Protection Road are all routes that are in severe disrepair. However, the town does not have jurisdictional authority over these routes because they are owned by the County. These roads have major drainage issues (shoulders and ditches are in disrepair) and need to be rebuilt prior to rehab of the road itself, beyond re-pavement. According to the town, many of the county roads do not have shoulders and have clogged stormwater systems which would need to be repaired, prior to any upgrading.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.28.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.28-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Provide portable generators, improvising shelter, and restore electric power	Ice Storm	Ice storms causing extensive damage primarily to electric wires	Holland Fire Dept, Power Co.	Ongoing Capability	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Ongoing capability
2	Public awareness about wildfires, recruit new firefighters, enforce codes	Wildfire	Fire damages to structures	Holland Vol. Fire Dept	Ongoing Capability	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success		3. Ongoing capability
3	Improve shelter planning, public awareness about winter storm events, plowing and salting roads	Winter Snowstorm, Transportation	Low temperatures, Large amount of snow	Holland DPW	Ongoing Capability	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Ongoing capability

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Holland has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- No additional actions identified.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Holland participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.28-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X								X
Cyber Attack		X								X
Earthquake		X								X
Expansive Soils		X								X
Extreme Temperature		X								X
Flood		X				X		X	X	X
Hazardous Materials		X								X
Landslide		X								X
Pandemic		X								X
Severe Storm		X							X	X
Severe Winter Storm		X							X	X
Utility Failure		X								X
Wildfire		X								X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Error! Reference source not found. summarizes the comprehensive range of specific mitigation initiatives the Town of Holland would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Error! Reference source not found. provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.28-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Holland Town - 001	Salt Barn	1,2	Severe Winter Storm	**Problem**: The town does not have a salt barn and the salt is stored outside and often gets buried in snow as a result. There have been times where municipal staff need to continuously keep the pile free from snow. As a result, the operations and response of the Highway Department is hindered during a snowstorm, which is one of the highest hazards in the community. **Solution**: The town would like to install a new facility at 14 Edgewood Drive, same location as the highway facility. The facility would be used to house the town's salt supply. Current efforts would reduce overall manpower needed to maintain salt pile and would facilitate the response time of the various Highway Department workers.	Yes	No	2 years	Highway Department	$300,000	High	HMGP, Climate Smart Communities Grant Program	High	SIP	SP
2022-Holland Town - 002	Generator Installation	1,2	Flood, Severe Storm, Severe Winter Storm, Utility Failure	**Problem**: The town Highway Department and Community Center (2 Legion Drive) (which is used as the community emergency shelter) do not have adequate backup power. Both of these facilities are used as emergency operation centers during a hazard event. It is critical that both remain operational through all hazard events and have power at all times. **Solution**: Install a 3-phase generator that will provide adequate electricity to the two separate facilities. The town engineer would need to be consulted to determine the best location of the generator and the proper size generator to power both facilities. Once determined, the town will purchase and install the generator	Yes	No	1 year	Highway Department, Town Engineer	$100,000	High	HMGP	High	SIP	ES

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Holland Town - 003	Fire Department Generator Installation	1,2	Flood, Severe Storm, Severe Winter Storm, Utility Outage	**Problem**: Both Fire Departments (Building #1 @ 49 North Main Street and #2 7640 Hunters Creek Road) do not have generators, except for a portable generator which is not enough power for power the entire facility. Due to the lack of backup power, the facilities cannot adequately operate during a power outage. This is essential as the departments provide emergency services to the town. **Solution**: Install a 3-phase generator that will provide adequate electricity to the two separate facilities. The town engineer would need to be consulted to determine the best location of the generator and the proper size generator to power both facilities. Once determined, the town will purchase and install the generator	Yes	No	1 year	Town Fire Department	$100,00	High	HMGP, Department of Homeland Security Grant Program (HSGP), Assistance to Firefighters Grant Program	High	SIP	SP
2022-Holland Town - 004	Verizon Cell Tower	1,2	All	**Problem**: Cellular service throughout the town is limited and causes communications disruptions. Due to the relatively rural characteristic of the town, municipal services have limited capacity to respond to emergencies in areas where lack of cell service exists. **Solution**: Working with cellular providers (e.g. Verizon), the town will conduct a feasibility study to determine the best locations to install towers and cellular antennas. Once identified, the town will work with cellular providers to install towers and antennas.	No	No	2 years	Town Board, Engineer, Verizon and other cellular providers	$150,000	High	Municipal Budget	High	SIP	ES
2022-Holland Town - 005	Box Culvert Replacement	1,2	Flood, Severe Storm	**Problem**: The Hamlet of Holland has a box culvert that is in disrepair on Pearl/ Canada/ Route 16, running east to west. It drains into Cazenovia Creek. Recently, there was remedial work conducted to reduce road flooding, but further work and improvements need to be done to	No	No	2 years	Town DPW	$500,000	High	HMGP, Clean Water Act Section 604(b) Water Quality Planning Grants Water Quality Improvement	High	SIP	SP

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
				increase capacity of existing stormwater drainage and prevent further road flooding that often occurs now with increasing rain events. **Solution**: Working with the town engineer and Highway Department, a study will be done to determine the proper size needed to upgrade the culvert. Once the proper size is determined, the town will work on removing the old culvert and replacing it with a new one to increase capacity.							Project (WQIP) Program, New York State DEC/EFC Wastewater Infrastructure Engineering Planning Grant (EPG)			
2022-Holland Town - 006	County Road Assessment	2,3,4	Flood, Severe Storm	**Problem:** Vermont St, Partridge, Warner Gulf , Old Route 16/ South Protection Road are all routes that are in severe disrepair. However, the town does not have jurisdictional authority over these routes because they are owned by the County. These roads have major drainage issues (shoulders and ditches are in disrepair) and need to be rebuilt prior to rehab of the road itself, beyond re-pavement. According to the town, many of the county roads do not have shoulders and have clogged stormwater systems which would need to be repaired, prior to any upgrading. **Solution:** Working with the County, conduct an assessment on the existing county roads in the Town of Holland to prioritize areas in need of repair to reduce hazardous road conditions. Once identified, the town and county will work to make the repairs and upgrades.	No	No	5 years	Town DPW and Erie County	Low for Municipality, High for County	High	Municipal Budget, Transportation Investment Generating Economic Recovery (TIGER), HMGP, County DPW Funds	High	SIP	SP, ES
2022-Holland Town - 007	Residential Property Flood Mitigation.	1	Flood	**Problem:** Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.	No	No	Within 3 years	Supervisor	TBD per cost and number of properties to be purchased.	Remove residents and homes from the flood	BRIC, HMGP, FMA, cost share by homeowners	High	EAP, SIP	PI, PP

				Solution: The town will work with the county to conduct outreach to flood-prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).						threatened homes				

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.28.9 Action Worksheets

The following action worksheets have been developed by the Town of Holland to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Salt Barn		
Project Number:	2022-Holland Town - 001		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Winter Storm		
Description of the Problem:	The town does not have a salt building. Currently there is no salt barn and the salt is stored outside and often gets buried in snow as a result. Sometimes the municipality needs to have someone to continuously keep the salt pile free of any snow. As a result, the operations and response of the DPW is hindered during a snowstorm, which is one of the highest hazards in the community.		
Action or Project Intended for Implementation			
Description of the Solution:	The town would like to install a new facility at 14 Edgewood drive same location as the highway facility. Approximate costs are 300000 and would be used to house the town's salt supply. Current efforts would reduce overall manpower needed to maintain salt pile and would facilitate the response time of the various DPW workers.		
Is this project related to a Critical Facility?	Yes X	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No X	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	Increase overall capacity and improve response time
Useful Life:	30 years	**Goals Met:**	1,2
Estimated Cost:	$300,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP, Climate Smart Communities Grant Program
Responsible Organization:	Town DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Coordinate with neighboring town salt barn	Low	Would protect salt from natural elements but other issues will continue
	Build Salt Barn	$300,000	Best option

Attachment: 67-Section-9.28-Holland-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.29 Village of Kenmore

This section presents the jurisdictional annex for the Village of Kenmore. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Kenmore's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.29.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Kenmore's hazard mitigation plan primary and alternate points of contact. The Village of Kenmore followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including the Village Clerk and Police Department. The Police Department represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.29-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Kathleen Johnson, Clerk/Treasurer Address: 2919 Delaware Avenue, Kenmore, NY 14217 Phone Number: 716-583-0557 (cell) 716-873-5700 Email: kjohnson@vi.kenmore.ny.us	Name/Title: AJ Kiefer, Captain, Kenmore Police Address: 2919 Delaware Avenue, Kenmore, NY 14217 Phone Number: 716-262-6624 (cell) 716-875-1234 (work) Email: akiefer@kenmorepolice.org
NFIP Floodplain Administrator	
Name/Title: Michael Berns, Code Enforcement Officer Address: 2919 Delaware Avenue, Kenmore, NY 14217 Phone Number: 716-913-4353 (cell) 716-873-5700 Email: mberns@vi.kenmore.ny.us	

9.29.2 Municipal Profile

The Village of Kenmore is located within the southern part of the Town of Tonawanda, and together the two are referred to as "Ken-Ton". It is bordered on three sides by the town and on the south by the City of Buffalo. The village is in the northwest corner of Erie County and is 1.4 square miles in area. No significant waterways/waterbodies are located within the village. NYS 265 and NYS Route 384 traverse it.

The Village of Kenmore was "Buffalo's First Suburb". Following the Civil War, the City of Buffalo's population grew very quickly. With the invention of electric streetcars, people were able to live further than walking distance from their jobs. Around 1888, the first homes and then neighborhoods began to be laid out on future Village of Kenmore territory just north of Buffalo. The first church in the village was erected in 1891 and the first store opened in 1897. The village incorporated in 1899 (Village of Kenmore 2020).

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

According to the U.S. Census, the 2010 population for the Village of Kenmore was 15,423. The estimated 2019 population was 15,132, a 1.9 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 3.2 percent of the population is 5 years of age or younger and 17.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.29.3 Jurisdictional Capability Assessment and Integration

The Village of Kenmore performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.29.3). The Village of Kenmore's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Kenmore. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.29-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	No	Local Law 1962, Chapter 7, Buildings and Building Regulations	Local	Code Enforcement
Comment: Proactive management of construction will help mitigate against different hazards.					
Zoning Code	Yes	No	LL1-2015; Chapter 25, Zoning	Local	Planning Board, Village Board
Comment: Establishes minimum stormwater management requirements. Easement shall provide for access to the facility at reasonable times for periodic inspection by the village to ensure that the facility is maintained in proper working condition to meet design standards and any other provisions established by this article. Enactment of zoning will protect against hazard exposure.					
Subdivision Ordinance	Yes	Yes	LL7-2018,Chapter 17 Planning and Development; Subdivision	Local	Code Enforcement, Planning Board
Comment: Avoid, minimize, or mitigate natural hazards and protect natural resources. There shall be no subdivision of land in the village without planning board approval.					

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Stormwater Management Ordinance	Yes	Yes	LL1-2008 and Village of Kenmore. 1970. Chapter 18 Sewers and Sewage Disposal.	Local	Village DPW
Comment: Avoid, minimize, or mitigate natural hazards and protect natural resources. There shall be no subdivision of land in the village without planning board approval. Provide for the health, safety, and general welfare of the citizens of the village through the regulation of stormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. Controls discharges to waterways.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	LL1-2015; Chapter 25, Zoning	Local	Village Planning Board
Comment: The Zoning Code includes growth management components, such as requiring site plan review for most development proposals.					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment: None					
Site Plan Review	Yes	No	LL1-2015; Chapter 25, Zoning	Local	Village Planning Board
Comment: Site plan review requirements for locations, dimensions, grades and flow directions of existing sewers, drainage ditches, culverts, and water lines, as well as other communication facilities or underground and above ground utilities within or adjacent to the property. The planning board will pay special attention to the adequacy of structures, roadways, and landscaping in areas susceptible to flooding, ponding, or erosion.					
Flood Damage Prevention Ordinance	Yes	Yes	Local Law#2 2019, Article 2, Chapter 8 Flood Damage Prevention	Local	FPA
Comment: BFE+2 feet is required for all construction in the SFHA (residential and non-residential). It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: (1) Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; (2) Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; (3) Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; (4) Control filling, grading, dredging and other development which may increase erosion or flood damages; (5) Regulate the construction of flood barriers which will unnaturally divert flood waters, or which may increase flood hazards to other lands; and (6) Qualify and maintain for participation in the National Flood Insurance Program.					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 18 Sewers and Sewage Disposal	Local	Public Works Department
Comment: The Village participates as an MS4 and is required to limit pollution discharge into stormwater channels.					
Emergency Management Ordinance	No	Yes	-	-	-
Comment: None					
Climate Change Ordinance	No	Yes	-	-	-
Comment: None

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Kenmore to oversee and track development.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.29-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	The village Building Department administers construction permits
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	The village is fully developed, and no buildable land remains.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Kenmore and their current responsibilities which contribute to hazard mitigation.

Table 9.29-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Village Department of Public Works staff ensure safe passage over village roads and regularly maintain a variety of facilities.
Construction/Building/Code Enforcement Department	Yes	The Building Department administers the building code in part of reduce exposure to risk.
Emergency Management/Public Safety Department	No	The village does not have an Emergency Management Department
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Police, via social media including Facebook, Village website, One Pause Code Red
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Neighboring Fire Districts provide added capacity in emergency response.
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	The village works with a consultant engineering firm.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Engineers or professionals trained in building or infrastructure construction practices	Yes	The village works with a consultant engineering firm.
Planners or engineers with an understanding of natural hazards	Yes	Planning and Zoning Boards incorporate natural hazards exposure into review of development proposals.
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	The Building Inspector and Police are trained in damage assessment.
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Michael Borth, Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	The Police Captain is the designated Emergency Manager
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Consultant engineer

Fiscal Capability

The table below summarizes financial resources available to the Village of Kenmore.

Table 9.29-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	CHIPS, EWR, Pave NY
Open Space Acquisition funding programs	N/A
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Kenmore.

Table 9.29-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Clerk
Personnel skilled or trained in website development	No	The village retains a consultant technical professional.
Hazard mitigation information available on your website	Yes	The town website contains information about flooding and drainage problems.
Social media for hazard mitigation education and outreach	Yes	The Police Department employs Facebook as social media
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Planning Board/ZBA
Other programs already in place that could be used to communicate hazard-related information	Yes	Village website, Police, social media, news media, One Pause/Code Red
Warning systems for hazard events	Yes	NY Alert/NY Warn
Natural disaster/safety programs in place for schools	N/A	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Kenmore.

Table 9.29-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.29-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.29.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael Berns, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Kenmore.

Table 9.29-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Kenmore	1	8	$3,379	0	0

Source: *FEMA 2020a and 2020b*
Notes:
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The village did not identify particular locations that are prone to flooding. The village does not maintain a list of properties that have been damaged by flooding. The village does not maintain a list of property owners interested in flood mitigation. There are not any RiskMAP projects currently underway in the village. The village did not identify how many (if any) properties have been mitigated. The village's flood hazard maps adequately address the flood risk within the jurisdiction.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The Village of Kenmore does not have any outstanding NFIP compliance violations that need to be addressed. There is no record of a Community Assistance Visit (CAV) or a Community Assistance Contact having occurred with the village. The Building Department is responsible for floodplain administration however, there are not any certified floodplain managers on staff. The village does not have access to resources to determine possible future flooding conditions from climate change. The village feels that its floodplain management staff would benefit from assistance or training to support its floodplain management program. The town references construction estimates and knowledge of value of work and scope state and federal authorities for their NFIP administration services as well as how to determine if proposed development on an existing structure would qualify as a substantial improvement. The Planning Board's site plan review process is an important component of the local NFIP administration. The village identified that the barriers to include a lack of knowledge about the location of floodplains and a disregard for regulations/limitations on property. There are outstanding issues with NVIP compliance involving the elevation of flood gates and a missing development permit. The village's NFIP program meets minimum requirements.

9.29.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Kenmore identified two designated evacuation routes. The village will coordinate with county and state agencies when needed. The evacuation routes are listed below:

- Delaware Avenue, Elmwood Avenue and Colvin Boulevard, which traverses north to south.
- Kenmore Avenue, which traverses east to west.

Sheltering

The Village of Kenmore has identified the following designated emergency shelters within the village.

Table 9.29-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Kenmore Community Center	135 Wilber; Kenmore, NY 14217	Unknown, addressed by 2022-Village Kenmore-005	No	Yes	No	Kenmore	Kitchen on premises
Kenmore Middle School	155 Delaware Road, Kenmore, NY 14217	Unknown, addressed by 2022-Village Kenmore-005	No	Yes	Yes	Kenmore	Kitchen on premises

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Kenmore has identified the following sites suitable for placing temporary housing units.

Table 9.29-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Kenmore Community Center	135 Wilber; Kenmore, NY 14217	Unknown, addressed by 2022-Village Kenmore-005	Community Center	All available	Unknown
Kenmore Middle School	155 Delaware Road, Kenmore, NY 14217	Unknown, addressed by 2022-Village Kenmore-005	Public School	All available	Unknown
Roosevelt Elementary	283 Washington; Kenmore, NY 14217	Unknown, addressed by 2022-Village Kenmore-005	unknown	All available	Unknown

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Kenmore has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.29-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
The village did not identify any permanent housing locations. Village staff will identify and coordinate with the county on identifying these sites as addressed in Proposed Mitigation Action #2022-Village Kenmore-005					

9.29.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.29-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.29-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	0	0	0	0	0	0	0	0	0	0	0	0
Multi-Family	0	0	0	0	0	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	0	0	0	0	0	0	0	0	0	0	0	0
Total Permits Issued	0	0	0	0	0	0	0	0	0	0	0	0

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
The village did not identify any recent major developments					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
The village did not identify any major developments anticipated in the next 5 years.					

SFHA Special Flood Hazard Area (1% flood event. The Village did not provide building permit data.

** Only location-specific hazard zones or vulnerabilities identified.*

9.29.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Kenmore's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Kenmore has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Kenmore's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.29-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.29-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted by this event, the village did not report any damage
August 11-15, 2015	Flash Flood	No	Although the county was impacted by this event, the village did not report any damage
October 28-29, 2015	High Wind	No	Although the county was impacted by this event, the village did not report any damage
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted by this event, the village did not report any damage
November 12, 2015	High Wind	No	Although the county was impacted by this event, the village did not report any damage
November 18, 2015	High Wind	No	Although the county was impacted by this event, the village did not report any damage
January 11, 2017	High Wind	No	Although the county was impacted by this event, the village did not report any damage
March 8, 2017	High Wind	No	Although the county was impacted by this event, the village did not report any damage
March 13, 2017	Winter Storm	No	Although the county was impacted by this event, the village did not report any damage
July 20, 2017	Tornado	No	Although the county was impacted by this event, the village did not report any damage
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted by this event, the village did not report any damage
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted by this event, the village did not report any damage
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted by this event, the village did not report any damage
January 2, 2018	Blizzard	No	Although the county was impacted by this event, the village did not report any damage
October 6, 2018	Lightning	No	Although the county was impacted by this event, the village did not report any damage
February 24, 2019	High Wind	No	Although the county was impacted by this event, the village did not report any damage
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted by this event, the village did not report any damage
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted by this event, the village did not report any damage
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted by this event, the village did not report any damage
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted by this event, the village did not report any damage

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted by this event, the village did not report any damage
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted by this event, the village did not report any damage
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Kenmore's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Kenmore. The Village of Kenmore has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results and the village agrees with the relative risk of the hazards of concern to the community.

Table 9.29-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.29-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure				Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage		
None Identified

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Village of Kenmore's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Kenmore has identified the following vulnerabilities within their community:

- The municipal building lacks a back-up power source.
- Floodplain management capabilities need improvement.
- Stormwater catch basins need rebuilding.
- There may be Repetitive Loss Properties in the village.
- The village should identify locations for permanent housing for use after a natural disaster.

9.29.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.29-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Backup power generation for Village Municipal Building to prevent loss of government functions	All Hazards	Location at 2919 Delaware Ave, Kenmore, NY 14217	Village DPW	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Adopt the new FIRM's and replace our local law with DEC's model floodplain management law	Flooding	Not Identified	Village DPW, Village Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	Work with DEC for preparing policies and procedures to administer the program.	Flooding	Not Identified	Village DPW	Completed	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	Have personnel attend Flood Plain Managers training and become Certified Floodplain Managers (CFMs)	Flooding	Not Identified	Village DPW, Village Board	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Work with local homeowners to determine interest in inclusion in a grant application to FEMA for mitigation project funding (flood proof/elevate/acquire) and apply to FEMA on homeowner behalf	Flooding	Frequent flooded properties	Village DPW	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
		Flooding		Village DPW	Ongoing	Cost		1. Discontinue

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Cleaning of existing storm sewer by flushing systems of silt and debris		Done over a five-year period to prevent/correct flood problems			Level of Protection Damages Avoided; Evidence of Success		2. 3. Ongoing capability
	Rebuild existing storm catch basins	Flooding	Alleviate water restriction caused by broken concrete in catch basin	Village DPW	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	Not Identified	Village Board	Completed	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances	Flooding	Not Identified	Village Board	Completed	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	Install creek gauging stations and conduct annual flood channel inspections/clearing	Flooding	Not Identified	Village Board	Ongoing	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing capability

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Kenmore did not identify any mitigation projects/activities that have been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Kenmore participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.29-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	X	-	X	-	-	-	-	-	X
Cyber Attack	-	X	-	X	-	-	-	-	-	X
Earthquake	-	X	-	X	-	-	-	-	-	X
Expansive Soils	-	X	-	X	-	-	-	-	-	X

Flood	X	X	-	X	X	X	-	-	-	X
Hazardous Materials	-	X	-	X	-	-	-	-	-	X
Landslide	-	X	-	X	-	-	-	-	-	X
Pandemic	-	X	-	X	-	-	-	-	-	X
Severe Storm	-	X	-	X	X	-	-	-	-	X
Severe Winter Storm	-	X	-	X	-	-	-	-	-	X
Wildfire	-	X	-	X	-	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.29-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Kenmore would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.29-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.29-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village Kenmore-001	Protect the village municipal building from power interruption	1	All Hazards, Utility Failure	**Problem**: The municipal building lacks back-up power source. Vulnerable to Utility Failure hazard. **Solution**: The village will conduct an engineering analysis to determine what size of generator should be installed to provide backup power for the Village municipal building. The Village DPW will then purchase and install the generator	Yes	No	Within 3 years	Village DPW, Village Board	~$75,000 for a generator	Operational continuity of critical facility services	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, Municipal Budget	High	SIP	ES
2022-Village Kenmore-002	Improve floodplain management capabilities	3	Flood	**Problem**: Floodplain management staff at the village could benefit from additional training. **Solution**: Procure trainings in floodplain management capabilities.	No	No	Within 2 years	FPA, Village Board	$5,000	Improve administration of floodplain management in the village.	Municipal budget	High	LPR	PR
2022-Village Kenmore-003	Rebuild stormwater catch basins	1	Flood, Severe Storm	**Problem:** Stormwater catch basins are inadequately sized or not functioning properly. During storm events this can cause pooling on village roads. **Solution:** The Village DPW will conduct an engineering design of stormwater catch basin repair measures.	No	No	Within 5 years	Village DPW, Village Board	TBD by engineer's analysis	Improve stormwater management within the village	FEMA HMGP, BRIC, Municipal Budget	High	SIP	SP

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.29-19. Proposed Hazard Mitigation Initiatives

	shelters and temporary housing locations			**Solution:** Work with the County to identify these housing locations and capacities										

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*

- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.29-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-Village Kenmore-001	Protect the village municipal building from power interruption	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- Village Kenmore -002	Improve Floodplain management capabilities	1	1	1	1	1	1	1	1	0	0	0	1	1	1	11	High
2022- Village Kenmore -003	Rebuild stormwater catch basins	1	1	1	1	1	1	1	1	1	1	1	0	1	0	12	High
2022-Village Kenmore-004	Residential Property Flood Mitigation.	1	1	1	1	1	1	1	1	0	0	0	1	1	1	11	High
2022-Village Kenmore-005	Identify locations for temporary and permanent housing	1	1	1	1	0	1	1	1	0	0	1	1	1	1	11	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.29.9 Action Worksheets

The following action worksheets have been developed by the Village of Kenmore to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Village of Kenmore Action Worksheet			
Project Name:	Protect the village's municipal hall from power outage		
Project Number:	2022-Village Kenmore-001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	The village municipal building lacks back-up power source and is vulnerable to the Utility Failure hazard.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will conduct an engineering analysis to determine what size of generator should be installed to provide backup power for the village municipal building. The Village DPW will then purchase and install the generator		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensures continuity of operations at the village municipal building
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	~$75,000 for a backup generator	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FEMA HMGP and PDM, USDA Community Facilities Grant Program, Municipal Budget
Responsible Organization:	Village DPW, Village Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Construct new municipal hall	Very High	Prohibitively expensive
	Install solar farm to supply power	High	Variable power generation, infeasible
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 68-Section-9.29-Kenmore-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect the village municipal hall from power outage	
Project Number:	2022-Village Kenmore-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will protect critical services provided at the municipal building
Property Protection	1	Project will protect the municipal hall from utility failure risk.
Cost-Effectiveness	1	
Technical	1	
Political	1	
Legal	1	The village has legal authority to complete the project.
Fiscal	0	Project requires funding support

9.30 City of Lackawanna

This section presents the jurisdictional annex for the City of Lackawanna. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the city participated in the planning process; an assessment of the City of Lackawanna's risk and vulnerability; the different capabilities utilized in the city; and an action plan that will be implemented to achieve a more resilient community.

9.30.1 Hazard Mitigation Planning Team

The following individuals have been identified as the City of Lackawanna's hazard mitigation plan primary and alternate points of contact. The City of Lackawanna followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many city departments, including: the Mayor's Office and Public Works. The Mayor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.30-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Annette Iafallo, Mayor Address: 714 Ridge Road, Lackawanna, New York 14218 Phone Number: (716) 827-6464 Email: Mayor@lackny.com	Name/Title: Anthony DeSantis, Public Works Commissioner Address: 714 Ridge Road, Lackawanna, New York 14218 Phone Number: (716) 827-6426 Email: dpwcommissioner@lackny.com
NFIP Floodplain Administrator	
Name/Title: Richard Stanton, Director of Development Address: 714 Ridge Road, Lackawanna, New York 14218 Phone Number: (716) 827-6421 Email: development@lackny.com	
Additional Contributors	
Name/Title: John Wolf, Director of Public Safety/Emergency Manager Method of Participation: Provided data and information, supported mitigation strategy	
Name/Title: Richard Juda, Attorney Method of Participation: Provided data and information, supported mitigation strategy	

9.30.2 Municipal Profile

The City of Lackawanna is approximately six square miles. The city is bounded on the north by the City of Buffalo, on the east by the Town of West Seneca, on the south by the Town of Hamburg and the Village of Blasdell and to the west by Lake Erie. Exit 55 W of the New York State Thruway services Lackawanna. U.S. Rt. 62 and New York Rt. 5 also traverse the city.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The Seneca Indians were original inhabitants of the area that became Lackawanna. Around 1780, the British helped the Seneca establish log cabin villages on Buffalo Creek and supplied them with clothing, agricultural equipment and seeds. In 1838, the Seneca Indians were forced to leave the Buffalo Reservation and white settlers moved in. In 1899, John Albright purchased all the land along the shore of Lake Erie for Republic Steel which would become the largest steel plant in the world at that time (City of Lackawanna 2020).

According to the U.S. Census, the 2010 population for the City of Lackawanna was 18,141. The estimated 2019 population was 17,831, a 1.7 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 8.3 percent of the population is 5 years of age or younger and 16.5 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.30.3 Jurisdictional Capability Assessment and Integration

The City of Lackawanna performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.30.3). The City of Lackawanna's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the City of Lackawanna. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.30-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	NYS Unified Building Code, Chapter 75 Building Code Administration.	Local	City Code Enforcement
Comment: This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the City of Lackawanna.					
Zoning Code	Yes	No	City Code Chapter 230 Zoning	Local	Code Enforcement

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The purpose of the City Council in adopting this chapter is to provide for the orderly development of the City of Lackawanna in accordance with the recently adopted City of Lackawanna Comprehensive Plan. The Zoning Chapter is developed to: • Protect the character and values of open space, residential, commercial, industrial and institutional land uses; • Regulate the location and intensity of buildings and uses; • Preserve and protect significant natural features and vegetation, thereby preventing ecological damage and visual blight which occur when those features or vegetation are eliminated or substantially altered to serve economic purposes alone; • Encourage the use of the Lake Erie shoreline within the boundaries of the City of Lackawanna as a unique resource with regional significance; • Preserve and promote the general attractiveness of the city and ensure that structures and land use arrangements are aesthetically harmonious with surrounding structures and land uses; • Facilitate the provision of adequate transportation and parking facilities to maximize the utility of transportation infrastructure, protect the safety of pedestrians and motorists, and promote the convenience of consumers and employers; • Encourage the efficient use of community development infrastructure while preventing the overcrowding of land and excessive concentration of population; • Provide adequate open spaces for light, air and outdoor uses; and • Protect persons and property from damage and injury due to fire or flood; and to respect and implement the purposes and scope of the Federal Flood Insurance Study for the City of Lackawanna, and all amendments thereto, as a guide to orderly flood plain management in the City of Lackawanna.					
Subdivision Ordinance	Yes	No	City Code Chapter 144 Land Subdivision Regulations	Local	Development
Comment: The purpose of these regulations shall be to provide rules, regulations and standards to guide land subdivision within the City of Lackawanna in order to promote the public health, safety, convenience and general welfare of the city. They shall be administered to ensure the orderly growth and development, conservation, protection and proper use of land and adequate provision for circulation, utilities and services and to ensure that land utilized for building purposes shall be without danger to health or peril from fire, flood or other menace and that provision is made for adequate light and air, fire protection, recreation areas and other amenities.					
Stormwater Management Ordinance	Yes	Yes	City Code Chapter 185 Sewers Article IX Storm Drainage	Local	Code Enforcement
Comment: The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the City through the regulation of non-stormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with the requirements of the SPDES General Permit for Stormwater Discharges From MS4s, Permit No. GP-02-02. The objectives of this article are: • To meet the requirements of the SPDES General Permit for Stormwater Discharges From MS4s, Permit No. GP-02-02; • To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge non-stormwater wastes; • To prohibit illicit connections, activities and discharges to the MS4; • To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this article; and • To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	-	-	-	-
Comment: None					
Site Plan Review	Yes	No	City Code Chapter 230-71 Site Plan Review	Local	Code Enforcement
Comment: The Planning and Development Board is authorized to review and approve, approve with modifications or conditions or disapprove site plans in accordance with the standards outlined in this chapter. Site plan review and site plan approval by the City of Lackawanna					

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Planning and Development Board shall be required for all uses, buildings and structures that require site plan approval as outlined in this chapter. Fees outlined and adopted by the City of Lackawanna will apply to all site plan reviews.					
Environmental Protection Ordinance	Yes	Yes	City Code Chapter 114 Environmental Quality Review, SEQR Article 8 NY ECL	Local	All city agencies, boards, departments, and offices
Comment: The purpose of this chapter is to implement, for the City of Lackawanna, the provisions of the State Environmental Quality Review Regulations, thereby incorporating environmental factors into existing planning and decision-making processes.					
Flood Damage Prevention Ordinance	Yes	Yes	City Code Chapter 230-68 Flood Development Permits	Local	Floodplain Administrator
Comment: It is the purpose of this section to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: • Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; • Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; • Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; • Control filling, grading, dredging and other development which may increase erosion or flood damages; • Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and • Qualify for and maintain participation in the National Flood Insurance Program. The city requires BFE+2 feet for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	City Code Chapter 185 Sewers Article IX Storm Drainage	Local	Code Enforcement
Comment: The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the city through the regulation of non-stormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with the requirements of the SPDES General Permit for Stormwater Discharges From MS4s, Permit No. GP-02-02. The objectives of this article are: • To meet the requirements of the SPDES General Permit for Stormwater Discharges From MS4s, Permit No. GP-02-02; • To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge non-stormwater wastes; • To prohibit illicit connections, activities and discharges to the MS4; • To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this article; and • To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.

Other (this could include a tourism plan, business development plan, etc.)	Yes	No	Brownfield Opportunity Plan	Local, Federal	City, BOA
Comment: The Lackawanna First Ward BOA represents a unique opportunity for the community and the City to work together to capitalize on core strengths, mitigate environmental and market challenges and capture projected local and regional growth industries, making economic growth and community renewal the focus for the First Ward. As the strategy for the Lackawanna First Ward BOA evolved, boundaries for smaller Target Areas, each with distinct qualities, assets and potential, were first identified and then revised. Each area represents a logical collection of land parcels and has its own development emphasis. While the Target Areas are unique in character, land uses within and between areas are complementary. This provides a vibrant overall land use mix while ensuring compatibility between adjacent uses.

Development and Permitting Capability

The table below summarizes the capabilities of the City of Lackawanna to oversee and track development.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.30-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Development and Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	Not Officially but available land maps are kept

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the City of Lackawanna and their current responsibilities which contribute to hazard mitigation.

Table 9.30-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning and Development Board has the authority to perform the following duties: • Prepare or change a Comprehensive Plan for the City of Lackawanna; • Make investigations, maps, reports and recommendations regarding planning and development matters, upon its own initiative or referral by the City Council or Zoning Board of Appeals, provided such expenditures do not exceed appropriations; • Refer matters to the County Planning Agency for review in accordance with § 239-m of the General Municipal Law; • Review and approve, approve with conditions or deny site plans; • Review and comment on all proposed zoning amendments; and • Adopt, after public hearing and City Council approval, such rules and regulations as it deems reasonably necessary to carry out its duties under this chapter and with regard to any subject over which it has jurisdiction under any law.
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals has duties that include but are not limited to: • Interpretation. Upon appeal from a decision by the Zoning Officer, the Zoning Board of Appeals shall decide any question involving interpretation of any provisions of this chapter. Such appeal shall be initiated within 60 calendar days of the adverse decision. • Refer matters to the County Planning Agency for review in accordance with § 239-m of the General Municipal Law. • Variances. On an appeal from an order, requirement, decision or determination of any administrative official charged with the enforcement of this chapter, where it is alleged by the appellant that there are practical difficulties or unnecessary hardships in the way of carrying out the strict applications of this chapter, the Zoning Board of Appeals may grant a variance in the strict application of this chapter in accordance with Article VII.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Department of Public Works is responsible for weekly garbage removal, recycling, grass, yard waste, and branches, bridge and road updates, and ice and snow removal from roadways.
Construction/Building/Code Enforcement Department	Yes	The City of Lackawanna Department of Code Enforcement works closely with all departments within city government. The Code Enforcement Officer dedicates his time to enforcing Ordinances and New York State Statutes. But more importantly, the Code Enforcement Officer promotes education and cooperation between community partners and the citizens we serve. Through enforcement and education we hope to preserve and improve the quality of life and public safety for all who work, live in and visit our community. As Code Enforcement Officers, this position is to enforce the City of Lackawanna Municipal Code and the New York State Uniform Codes, particularly as it relates to land use, property maintenance and building construction. These efforts can improve the quality of the city's neighborhoods, protect property values and the environment and keep Lackawanna a safe and desirable community. Specifically, the Code Enforcement Officer concentrates on the investigation and abatement of complaints involving land use (zoning), housing conditions (substandard structures), abandoned vehicles, signs, pools, fences and general public nuisances. Code enforcement also serves the Building Department, which enforces ordinances pertaining to new construction, reconstruction, additions, demolitions and storm water and floodplain regulations.
Emergency Management/Public Safety Department	Yes	The Department of Public Safety contains the following divisions: Police Department, Fire Department, Animal Control.
Warning Systems / Services (mass notification system, outdoor warning signals)	No	CodeRED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Annual Inspections of Smokes Creek with NYSDEC
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineers outsourced with coordination by Public Works and Development
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineers outsourced with coordination by Public Works and Development
Planners or engineers with an understanding of natural hazards	Yes	Engineers outsourced with coordination by Public Works and Development
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Engineers outsourced with coordination by Public Works and Development
Personnel skilled or trained in GIS and/or Hazards United States	No	-

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
(HAZUS) – Multi-Hazards (MH) applications		
Scientist familiar with natural hazards	Yes	Engineers outsourced with coordination by Public Works and Development
NFIP Floodplain Administrator (FPA)	Yes	Development Director
Surveyor(s)	Yes	Retained as necessary
Emergency Manager	No	-
Grant writer(s)	No	Currently seeking new grant writers
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Attorney with strong environmental law background on staff

Fiscal Capability

The table below summarizes financial resources available to the City of Lackawanna.

Table 9.30-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes – Engineering or Development
Capital improvements project funding	Yes – admin and finance department
Authority to levy taxes for specific purposes	Yes – Mayor
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes – admin and finance department
Incur debt through special tax bonds	Yes – Mayor
Incur debt through private activity bonds	Yes – admin and finance department
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes – Development
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes – Development

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the City of Lackawanna.

Table 9.30-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	The Public Information Officer direct reports to the Mayor.
Personnel skilled or trained in website development	Yes	City Hall staff member trained as webmaster for City web-site – works in collaboration with Public Information Officer
Hazard mitigation information available on your website	Yes	Information is hosted on the city website (www.lackawannany.org) under Public Safety-Code Red System.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Social media for hazard mitigation education and outreach	Yes	Facebook (Lackawanna NY 0 City Government). City also has a Twitter handle which is less frequently used but can be.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Code Red phone notification system. Also, direct relationships with local media.
Warning systems for hazard events	Yes	Code Red phone notification system
Natural disaster/safety programs in place for schools	N/A	Lackawanna City School District runs independently from city government and would lead such efforts.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the City of Lackawanna.

Table 9.30-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.30-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.30.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Richard Stanton, Director of Development

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the City of Lackawanna.

Table 9.30-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
City of Lackawanna	184	94	$118,735	0	164

Source: FEMA 2020a, FEMA 2020b
Notes: SRL property information was not included in the available data set.
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The city has identified areas around the creek bank as flood prone although there has been no flooding in recent years. The city keeps a list of property owners that are interested in flood mitigation projects for their properties, around 10 a year. However, there have been no properties that have been mitigated by either elevation or acquisition. There are currently no RiskMAP projects being undertaken within the city. The city also notes that the flood hazard maps available accurately address flood risk.

Substantial Damage determinations are made by via inspections completed by the Code Enforcement Official, but no such events have been declared.

NFIP Compliance

The Development Department is responsible for floodplain management. There are no certified floodplain managers (CFM) within the city, and no barriers to an effective NFIP program have been identified. The Code Enforcement and Development Departments review all floodplain building permit submissions from builders. The Code Enforcement Official determines if proposed developments qualify as “substantial improvements.” The Planning Board and Zoning Board both consider floodplains and take flood risk into account when developing codes and reviewing site plans.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Chapter 230-68 of the City Code details the local Flood Damage Prevention Ordinance, last amended on April 29, 2019. The floodplain management program meets minimum requirements. The city does not participate in the Community Rating System (CRS) program. The most recent Community Assistance Contact (CAC) was on June 26, 1998 and the most recent Community Assistance Visit (CAV) was on May 16, 2018. There are currently no outstanding compliance issues.

9.30.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The City of Lackawanna has identified the following routes and procedures to evacuate residents prior to and during an event.

- Contact NFTA for bussed; first and second would take Martin Road to senior center, the third and fourth would take Abbot and/or Ridge Road to senior center.

Sheltering

The City of Lackawanna has identified the following designated emergency shelters within the city.

Table 9.30-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Lackawanna Senior Center	230 Martin Rd, Lackawanna, NY 14218	Unknown	No	Yes	Yes	Red Cross	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The City of Lackawanna has identified the following sites suitable for placing temporary housing units.

Table 9.30-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The city will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-C. Lackawanna -#013					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

requirements and floodplain laws. The City of Lackawanna has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.30-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The city will work with the county to identify and designate permanent housing locations. See Mitigation Action 2022-C. Lackawanna -#013					

9.30.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.30-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.30-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA	Total	Within SFHA
Single Family	5	0	2	0	6	0	6	1	2	1	3	1
Multi-Family	0	0	1	0	1	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	2	0	1	0	1	0	11	0	1	0	9	0

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Time Release Property	Manufacturing	1	6 Dona Street	None	95% Complete
Sucro	Manufacturing	5	2303 Hamburg Turnpike	None	50% Complete
Premium Coffee	Commercial	1	2520 Hamburg Turnpike	None	Open Food Prep
Steelwinds	Wind Energy	14	2303 Hamburg Turnpike	None	Construction on-going
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
Uniland Spec Building	Manufacturing/distribution	1	8 Dona Street	None	Permits Approved
Splash Pad Park	Recreational	3	600 Ridge Rd	None	Environmental Review Stage
Mt. Olive	Senior Housing/Medical/Youth Facility	3	66 Wasson Ave	Non	Plan Review

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

300 Commerce	PPE Manufacturing	1	300 Commerce Dr	None	Permitting
Warsaw Bridge Replacement	Public Infrastructure	1	Warsaw Street	Floodplain	Engineering
City Hall Replacement	Public Infrastructure	1	2838 South Park Avenue	None	Architecture Planning

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.30.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the City of Lackawanna's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the City of Lackawanna has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The City of Lackawanna's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.30-14 provides details regarding municipal-specific loss and damages the city experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.30-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Overtime Costs
August 11-15, 2015	Flash Flood	No	Overtime Costs
October 28-29, 2015	High Wind	No	Overtime Costs
November 6, 2015	Thunderstorm Wind	No	Overtime Costs
November 12, 2015	High Wind	No	Overtime Costs
November 18, 2015	High Wind	No	Overtime Costs
January 11, 2017	High Wind	No	Overtime Costs
March 8, 2017	High Wind	No	Overtime Costs
March 13, 2017	Winter Storm	No	Overtime Costs
July 20, 2017	Tornado	No	Although the county was impacted, the city did not report damages
August 4, 2017	Thunderstorm Wind	No	Overtime Costs
December 10-15, 2017	Lake-effect Snow	No	Overtime Costs
December 24-29, 2017	Lake-effect Snow	No	Overtime Costs
January 2, 2018	Blizzard	No	Overtime Costs
October 6, 2018	Lightning	No	Overtime Costs
February 24, 2019	High Wind	No	Overtime Costs
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the city did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, the city did not report damages
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the city did not report damages
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the city did not report damages
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the city did not report damages

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the City of Lackawanna's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the City of Lackawanna. The City of Lackawanna has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the city did not provide feedback on the following risk rankings. The city noted the following:

- There has been a slight increase in the frequency of occurrence of Extreme Temperature and Extreme Wind Events in the city.
- Due to mitigation efforts, there has been a decrease in frequency and impacts of flood events in recent years.

Table 9.30-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.30-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Bethlehem Steel Station #212	Electric Power Station	X	X	2022-City of Lackawanna-001

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the City of Lackawanna's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the City of Lackawanna has identified the following vulnerabilities within their community:

- Critical facilities located within the floodplain, wildfire hazard area, hazardous materials hazard area, and are vulnerable to utility failures.
- Several community centers, a communications facility, electric power stations, hazardous material facilities, private schools, and other critical facilities are in the city are in the earthquake hazard area.
- The current City Hall is suspended on steel columns showing signs of structural deterioration. If they further destabilize before replacement, City Hall operations will be disrupted, which will affect ability to coordinate any disaster response.
- Numerous bridges throughout Lackawanna are deteriorating and in poor condition, including Warsaw Bridge, two bridges on Electric Avenue, and McKinley Bridge.
- There is a beaver dam off of Smoke Creek behind residences on Highview Circle, which results in flooding.
- The city does not have identified temporary or permanent housing locations.
- There are 164 homeowners living within the SFHA.

9.30.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.30-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Eliminate beaver population and break up dams when they are formed in the Cleveland and Electric Ave. area	Flooding	Not Identified	Engineering	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Completed
	Install stormwater receiver on property in question to prevent the flooding on residential property on Smith Dr.	Flooding	Repetitive Flooding	Engineering	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. National Grid Resolved Problem
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Engineering	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing capability of the city to use updated FIRMS

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The City of Lackawanna has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The City of Lackawanna participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.30-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X				X			X	X
Cyber Attack	X	X				X			X	X
Earthquake	X	X		X		X	X		X	X
Expansive Soils	X	X				X			X	X
Extreme Temperature	X	X				X			X	X
Flood	X	X	X	X		X	X	X	X	X
Hazardous Materials	X	X		X		X	X		X	X
Landslide	X	X				X			X	X
Pandemic	X	X				X			X	X
Severe Storm	X	X				X			X	X
Severe Winter Storm	X	X				X			X	X
Utility Failure	X	X				X			X	X
Wildfire	X	X		X		X	X		X	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.30-19 summarizes the comprehensive range of specific mitigation initiatives the City of Lackawanna would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.30-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.30.9 Action Worksheets

The following action worksheets have been developed by the City of Lackawanna to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	City Hall Building Replacement		
Project Number:	2022- City of Lackawanna -010		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	Current City Hall is suspended on Steel columns showing signs of structural deterioration. If they further destabilize before replacement City Hall operations will be disrupted, which will affect ability to coordinate any disaster response.		
Action or Project Intended for Implementation			
Description of the Solution:	The city will determine the feasibility to replace the City Hall building due to the structural instability of the front pillars.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High, ensures continuity of operations
Useful Life:	50 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	ASAP
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	Municipal Budget, BRIC
Responsible Organization:	Engineering	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Replace steel columns	$500,000	Possibility to deteriorate in future and problem re-occurs
	Relocate City Hall	N/A	No available land

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 69-Section-9.30-Lackawanna-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Bridge Upgrades		
Project Number:	2022- City of Lackawanna -011		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	Numerous bridges throughout Lackawanna are deteriorating and in poor condition, including Warsaw Bridge, two bridges on Electric Avenue, and McKinley Bridge.		
Action or Project Intended for Implementation			
Description of the Solution:	The city will seek funding for the following upgrades: • Warsaw Bridge – replace the bridge and raise the roadway and new bridge above the floodplain. Engineers are currently inspecting and conducting a structural review of sections of the Bridge with NYS DOT to determine level of disrepair and deterioration. The city will seek funding to preform a complete rehabilitation of the bridge. It currently is closed to vehicle traffic until repairs are complete. • Electric Ave Bridges – repair and replace the bridges crossing Smoke Creek • McKinley Bridge – needs to be dismantled		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐

9.31 TOWN OF LANCASTER

This section presents the jurisdictional annex for the Town of Lancaster. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Lancaster's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.31.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Lancaster's hazard mitigation plan primary and alternate points of contact. The Town of Lancaster followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Disaster Coordinator, Supervisor, and Code Enforcement Officer. The Disaster Coordinator represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.31-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Ronald Rozler, Disaster Coordinator Address: 21 Central Ave #1, Lancaster, NY 14086 Phone Number: (716) 684-1232 Email: rrozler@lancasterny.gov	Name/Title: Ronald Ruffino Sr, Supervisor Address: 21 Central Ave #1, Lancaster, NY 14086 Phone Number: (716) 683-1610 Email: rruffino@lancasterny.gov
NFIP Floodplain Administrator	
Name/Title: Matt Fischione, Code Enforcement Officer Address: 21 Central Ave #1, Lancaster, NY 14086 Phone Number: (716) 684-4171 Email: mfischione@lancasterny.gov	

9.31.2 Municipal Profile

The Town of Lancaster is in the north central portion of Erie County. The town is bounded by the Town of Clarence to the north, the Town of Elma to the south, the Town of Alden to the east, and the Town of Cheektowaga to the west. The town contains both the Village of Lancaster and the Village of Depew. The town is located approximately 11 miles east of downtown Buffalo and is 37 square miles in size. Cayuga Creek and Ellicott Creek run through the town.

The Town of Lancaster was first settled by members of the Erie Indian tribe and later by the Seneca Indians. In the early 1800s, white settlers displaced the Seneca. The town was originally called Cayuga Creek when it was formed from a part of the original Town of Clarence, the town incorporated in 1833 and then in 1857, the town's southern half was taken to form the Town of Elma. An important part of Lancaster's history has included

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

immigration from different nations. German and Dutch and later eastern Europe and Italy immigrants arrived in waves over the years. Five major railroads were developed in the town during the 19th and 20th centuries. The town's first schoolhouse was constructed in 1868 and the town continued to experience rapid growth. Most residents were farmers and most of the land was cleared for farming. Twelve buildings in the town are on the National Register of Historic Places.

During the Second World War, war materials were produced in the town. By 1950, Lancaster's population reached 18,471; with most development situated in the two Villages of Lancaster and Depew. The 1960 census showed a population of 25,605. In the 1980s, the population growth slowed. For several decades Lancaster has served as a bedroom community of Buffalo. Lancaster High School is Erie County's largest school in both student population and square footage. The New York State Thruway, US Route 20 and NYS 33 and 78 pass through the town. (Town of Lancaster 2020)

According to the U.S. Census, the 2010 population for the Town of Lancaster was 25,865. The estimated 2019 population was 27,625, a 6.8 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.2 percent of the population is 5 years of age or younger and 17.8 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.31.3 Jurisdictional Capability Assessment and Integration

The Town of Lancaster performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.31.3). The Town of Lancaster's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Lancaster. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.31-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Adopted 7-16-1984 by Local Law Number 1-1984. Chapter 140 – Uniform Construction Code.	Local	Building Department / Code Enforcement Officer
Comment: *The following is meant to provide information on the intent of the building permits:* *The building permits are required for bonfires and burning of rubbish; and storage of underground tanks, explosives, cryogenic liquids.* *The Building Inspector may address dangerous or unsafe buildings or structures pursuant to the code and the terms of this article.* *Whenever the Fire Inspector finds a building or structure, or part thereof, to be an imminent danger to life and safety of the public as a result of a fire or explosion, the Fire Inspector shall report the same to the Building Inspector, and the Building Inspector may cause it to be demolished and removed or may cause work to be done in and about the building or structure as may be necessary to remove the danger.*					
Zoning Code	Yes	No	Adopted by the Town Board of the Town of Lancaster 11-16-2020 by Local Law Number 1-2020. Chapter 400, Zoning.	Local	Planning Board
Comment: *The purpose and intent of this Zoning Law is to provide for the orderly growth of the Town and to promote and protect to the fullest extent permissible the environment of the Town and the public health, safety, convenience, comfort, prosperity and general welfare of its residents by regulating the use of buildings, other structures and land for residences, open space, public facilities, business, services, industry or other purposes; by regulating and restricting the bulk, height, design, lot coverage and location of structures, by regulating and limiting population density; and, for the aforesaid purposes, to divide the land within the limits of the Town into districts of such number and dimensions in accordance with the objectives of the Comprehensive Plan; and to provide procedures for the administration and amendment of said Zoning Law.* *The town has an environmental resource protection overlay district (ERPOD). The purpose of this district is to provide special controls for development in significant sensitive environmental areas within the Town of Lancaster, as determined by the Town Board. These regulations are superimposed over general zoning district provisions and should be considered as additional requirements to be met by the applicant or developer prior to project approval. These regulations are in addition to the requirements for floodplain development contained in Town Code, Chapter 182, Flood Damage Prevention, as well as any wetlands regulations and permit requirements promulgated by the federal or state government. There are four ERPODs – wetlands, watercourses, steep slopes, and woodlots. Any proposed development in these districts need to be reviewed by the Planning Board as part of the subdivision or site review process.*					
Subdivision Ordinance	Yes	No	Chapter 400-38 - Subdivision.	Local	Planning Board
Comment: *These regulations for the subdivision of land were enacted to provide for the orderly growth and coordinated development of the Town of Lancaster (the "Town") and its subdivisions, to ensure the comfort, convenience, safety, health, and welfare of Town residents. Any proposed subdivisions must be approved by the Planning Board.*					
Stormwater Management Ordinance	Yes	Yes – for county	Chapter 300 - Stormwater Management and Erosion and Sediment Control.	Local	Stormwater Management Officer
Comment: *The purpose of this chapter and Chapter 400, Article XIII, is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 300-1 hereof. This chapter and Chapter 400, Article XIII, seeks to meet those purposes by achieving the following objectives:* *A. Meet the requirements of minimum measures four and five of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* *B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01, or as amended or revised;* *C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* *D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* *E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* *F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-
Comment:					
Site Plan Review	Yes	Yes	Chapter 400-75 Article XIV Administration and Enforcement.	Local	Planning Board
Comment: *The intent of site plan review is to evaluate specified land uses in terms of their suitability to natural site conditions, their compatibility with surrounding land uses and their conformance with overall plans for the community, thus minimizing possible adverse effects on the health, safety and welfare of local residents.*					
Environmental Protection Ordinance	Yes	Yes	400 -26, Environmental Protection Overlay District.	Local	Planning Board
Comment: *The purpose of this section is to provide special controls for development in significant sensitive environmental areas within the Town of Lancaster, as determined by the Town Board. These regulations are superimposed over general zoning district provisions and should be considered as additional requirements to be met by the applicant or developer prior to project approval. These regulations are in addition to the requirements for floodplain development contained in Town Code, Chapter 182, Flood Damage Prevention, as well as any wetlands regulations and permit requirements promulgated by the federal or state government.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 182 – Flood Damage Prevention	Local	Building Inspector
Comment: *It is the purpose of this chapter to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities.* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.* *C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters.* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages.* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands.* *F. Qualify for and maintain participation in the National Flood Insurance Program.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 300 Stormwater Management and Erosion and Sediment Control	Local	Stormwater Management Officer
Comment: *The purpose of this chapter and Chapter 400, Article XIII, is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 300-1 hereof. This chapter and Chapter 400, Article XIII, seeks to meet those purposes by achieving the following objectives:* *A. Meet the requirements of minimum measures four and five of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* *B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01, or as amended or revised;* *C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* *D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* *E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* *F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.*

Planning Documents					
Comprehensive Plan	Yes	No	Town of Lancaster Comprehensive Plan Adopted February 2018	Local	Planning Board
Comment: *The goals and intent of the comprehensive plan include the following: 1) Prioritize a list of critical open spaces to preserve the Town's important environmental features, such as stream corridors, wetlands and forested lands, through a variety of tools from acquisition to conservation easements. 2) Allow conservation development in the Town code. 3) The communities should invite the participation of land trusts to help obtain the preservation of valuable land; this could include the Penora Woods area. Land trusts may also play an important role in the acquisition of public access along stream corridors or conservation easements to protect other sensitive environmental or aesthetic features. 4) The Town of Lancaster and Villages of Lancaster and Depew should consider developing a coordinated storm water management plan for the three communities. 5) Storm water drainage plans for proposed new developments should be reviewed by representatives of potentially affected communities. 6) Existing storm water problem areas should be jointly addressed. Such areas include erosion problems along Zurbrick Road in Depew, siltation problems along Scajaquada Creek and seasonal overflows of tributaries to Cayuga Creek. The Zurbrick Road area has recently received funding to improve the erosion problems and additional funding should be sought. 7) Continue to include an assessment of creek cresting patterns when reviewing new development. The cresting patterns determine the expected timing of floods and will enable the communities to plan for flooding situations. This information will also enable the communities to provide appropriate storm water detention for creek waters. 8) Consider soil conditions, topography, floodplains and other environmental conditions when it reviews new development projects. 9) The Town of Lancaster and Villages of Lancaster and Depew should require a drainage plan and detention/retention ponds as appropriate before approving individual site developments. The communities should ensure that site drainage will not adversely affect the property or adjacent properties before granting approval.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Lancaster to oversee and track development.

Table 9.31-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Department – before any person erects, constructs, alters, moves, demolishes or commences to erect, constructs, alters, moves or demolishes any building or structure in the town or village, a building permit must be applied for and approved by the Building Inspector.
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Yes
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The town is relatively built out and is suburban in characteristic.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Lancaster and their current responsibilities which contribute to hazard mitigation.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.31-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Town of Lancaster Planning Board reviews all development projects which take place in the Town and makes recommendations to the Town Board based on its findings. The Planning Board may also generate or review proposed ordinances that may become part of Town law and make the appropriate recommendations to the Town Board. Public Hearings for proposed subdivisions will be held before the Planning Board. The Planning Board is therefore seen as a referral and advisory body.
Zoning Board of Adjustments	Yes	The Town Clerk attends all meetings of the Zoning Board of Appeals and must keep a complete and accurate record of all official actions of the Zoning Board.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Town of Lancaster Highway Department performs year-round maintenance on 154 lane miles of Town roads. The Highway Department is under contract with Erie County for 16 miles of County roads in the Town of Lancaster for snow and ice removal. Listed below are the services provided by the Highway Department. • Brush Pick up • Carcass Removal • Ditch Clean Up • Leaf Pick up • Paving and Pot Hole Repair (Town roads only) • Snow Plowing/Snow Removal • Roadside culvert pipe installation • Road Sweeping • Drainage • County/State Road List
Construction/Building/Code Enforcement Department	Yes	The main function of the Building Department is to issue and inspect issued building permits for the Town and Village of Lancaster. The department enforces the IBC, fire codes, local zoning codes, and federal floodplains. The department also receives resident complaints with regard to building and zoning issues.
Emergency Management/Public Safety Department	Yes	The main functions of emergency management include: • Support all Emergency Services organizations in the Town. • Provides Public Education to residents – FEMA Emergency Preparedness classes. • Emergency Operations Center used during large incidents and State of Emergency. • Table-top training area available for all departments to run scenarios. • Performs emergency planning for the Town. • Available for mutual aid to surrounding communities.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED - The secure, customized Community Notification Enrollment (CNE) page allows residents and businesses to add or update their contact information to ensure they will be included when a message is sent – unlisted numbers, mobile numbers, TDD/TTY requirements can all be entered.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Fire
Other		-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Town Engineering
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Engineering
Planners or engineers with an understanding of natural hazards	Yes	Town Engineering
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Building Inspector
Surveyor(s)	No	-
Emergency Manager	Yes	Disaster Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Lancaster.

Table 9.31-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	None

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Lancaster.

Table 9.31-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Clerk
Personnel skilled or trained in website development	Yes	Clerk
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	The town uses CodeRED to issue emergency warnings and notifications to residents.
Natural disaster/safety programs in place for schools	No	-
Other	None	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Lancaster.

Table 9.31-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.31-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong – NA
Cyber Attack	Moderate
Earthquake	Strong – NA
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Strong
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.31.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Matt Fischione, Building Inspector

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Lancaster.

Table 9.31-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Lancaster	74	52	$366,231	10	41

Source: *FEMA 2020a, FEMA 2020b*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

There are various areas within the municipality that flood and are addressed in the mitigation actions. Currently there is no inventory of properties damaged by flooding. The town does not have a list of property owners interested in flood mitigation as mitigation is not a topic of interest to residents or business owners outside of avoiding Flood Insurance requirements. There are no RiskMAP projects underway. The town makes substantial damage determinations through visual inspections conducted by the building inspector. Currently there is no inventory of damaged properties from flood events as historically this has not been a significant concern in the municipality. Thus, there are been no property mitigation projects in recent years. The only project that was related to flood mitigation was Stony Road Bridge replacement conducted by Erie County Highway Department. Current flood maps adequately address existing areas of concern in the municipality.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The Town of Lancaster Building Department is responsible for floodplain management and has certified floodplain managers on staff. The department has adequate resources to address flood concern from climate change. The department is currently seeking public outreach and planning board training opportunities regarding floodplain management. The department capabilities include floodplain permit review and enforcement of the NFIP program. Substantial improvement is determined if the property is new construction or substantial value in terms of repair and replacement with consideration to the overall property value. Current property owners and funding is lacking. The most recent Community Assistance Visit (CAV) was on October 6, 2016. The local law number for FDPO is Town Code, Chapter 182 (Flood Damage Prevention) May 6, 2019 and the existing program meets minimum standards. Other programs, ordinances, and plans that support floodplain management includes the Planning Board. The town is not interested in joining the CRS program, though there are preliminary discussions occurring regarding the program.

9.31.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Lancaster has identified the following routes and procedures to evacuate residents prior to and during an event.

- East and West Evacuation: Broadway, Walden Avenue, and Green Street
- North and South: Transit Road, Central Avenue, Bowen Road, Pavement Road, and Town Line Road.

Sheltering

The Town of Lancaster has identified the following designated emergency shelters within the town.

Table 9.31-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	100 Oxford Ave, Lancaster, NY 14086	200	No	Yes	Yes	Immediate Care	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Lancaster has identified the following sites suitable for placing temporary housing units.

Table 9.31-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Senior Center	100 Oxford Ave, Lancaster, NY 14086	200	Lot	All	Unknown

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Lancaster has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.31-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Como Lake Park	2220 Como Park Blvd, Lancaster, NY 14086	Unknown	Park	All	Will need to work with County/ State to clarify town's needs

9.31.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.31-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.31-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	149	0	106	0	76	0	80	0	82	0	107	0
Multi-Family	19	0	23	0	2	0	0	0	0	0	1	0

** Only location-specific hazard zones or vulnerabilities identified.*

9.31.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Lancaster's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Lancaster has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Lancaster's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.31-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.31-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	*No*	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	While this event impacted Erie County, the town did not identify losses or damages.
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden, and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	While this event impacted Erie County, the town did not identify losses or damages.
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	While this event impacted Erie County, the town did not identify losses or damages.
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	While this event impacted Erie County, the town did not identify losses or damages.
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara	While this event impacted Erie County, the town did not identify losses or damages.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low-pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	While this event impacted Erie County, the town did not identify losses or damages.
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia, and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	While this event impacted Erie County, the town did not identify losses or damages.
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	While this event impacted Erie County, the town did not identify losses or damages.
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	While this event impacted Erie County, the town did not identify losses or damages.
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	While this event impacted Erie County, the town did not identify losses or damages.
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In	While this event impacted Erie County, the town did not identify losses or damages.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	While this event impacted Erie County, the town did not identify losses or damages.
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	While this event impacted Erie County, the town did not identify losses or damages.
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	While this event impacted Erie County, the town did not identify losses or damages.
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	While this event impacted Erie County, the town did not identify losses or damages.
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	While this event impacted Erie County, the town did not identify losses or damages.
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	While this event impacted Erie County, the town did not identify losses or damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher-than-normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	While this event impacted Erie County, the town did not identify losses or damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	While this event impacted Erie County, the town did not identify losses or damages.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3–5-hour period in the cold advection behind the cold front.	While this event impacted Erie County, the town did not identify losses or damages.
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	While this event impacted Erie County, the town did not identify losses or damages.
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	While this event impacted Erie County, the town did not identify losses or damages.
2020-21	COVID 19 - EM 3504	Yes	National Pandemic that affected the entire nation, including the Town of Lancaster and Erie County	Business closings, social distancing, masking, and numerous deaths reported.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Lancaster's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Lancaster. The Town of Lancaster has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town did not provide any feedback on the following hazard rankings.

- Earthquakes are not a significant hazard in the town and thus will be re-ranked from a high to a medium.
- While expansive soils might be present in the town, the municipality has been working to mitigate this hazard and thus has expanded capacity and will re-ranked this from a high to medium.
- Flooding has caused significant damage to the community and will be re-ranked from a low to high.
- Hazardous material has posed numerous threats to the community with heavy thru traffic and will be re-ranked from low to medium.
- Wildfires have previously posed threat to the community and will be re-ranked from low to medium.

Table 9.31-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Medium	Medium	High	Medium

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Town of Lancaster's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Lancaster has identified the following vulnerabilities within their community:

- The Lancaster Country Club Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Bowmansville Fire Station is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Main Street Potable Water Facility is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Bowmansville #3 Pump Station is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Lancaster Airport, dams, hazardous material facilities, private schools, and the Trocaire College are located in the earthquake hazard area.
- There are several private critical facilities in the town that are located in the wildfire hazard area.
- Several of the critical facilities in the Town of Lancaster may be at risk of being exposed to hazardous materials incidents.
- Ansel Morris Pond Dam, Dolatowski Pond Dam, Lancaster Country Club Dam, Lynn Wanamaker Pond Dam Tops Markets Distribution Center, and United Silicone Inc are located on steep slopes and at risk of landslides.
- There are several communication facilities, dams, and Hazardous Material facilities located on expansive soils and may be at risk of experiencing damages caused by expansive soils.
- The channel of Ellicott Creek Corridor has been cleaned many times due to sediment accumulation. This is the result of the erosion of the banks of Ellicott Creek. The neighboring Town of Alden is also experiencing similar issues around bank erosion, and thus sediment accumulation downstream. While the town has previous tried to deal with this issue using dredging and stream clearing, it is not a sustainable solution and thus proper mitigation measures are needed.
- The channel of Slate Bottom Creek and Plum Bottom Creek have been cleaned many times due to sediment accumulation. This is the result of the erosion of the banks of these two creeks. The neighboring Town of Alden is also experiencing similar issues around bank erosion, and thus sediment accumulation downstream. While the town has previous tried to deal with this issue using dredging and stream clearing, it is not a sustainable solution and thus proper mitigation measures are needed.
- The Town of Lancaster has two landfills within the jurisdiction as well as rail lines and major routes like Interstate 90 that often have vehicles that contain/ carry hazardous waste. Naturally, the town is

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

vulnerable to the potential failure of these various entities due to severe storm, severe winter storm, earthquake/ ground failure, flooding, and other natural hazards. While for most municipalities, these events would only bring minor property damage to the community, for the Town of Lancaster, any of these events that have the ability to cause property damage/ vehicular accidents, could lead to catastrophic scenarios where the entire town would need to evacuate due to hazardous waste spillage facility failure, and thus causing temporary or even permanent contamination and damage to the entire community.

- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.31.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.31-17. Status of Previous Mitigation Actions

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Lancaster has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The town continues to maintain and upgrade existing stormwater and road infrastructure to reduce threat to flooding.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Lancaster participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.31-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake				X			X			
Expansive Soils				X			X			
Extreme Temperature										
Flood		X	X	X		X	X	X		X
Hazardous Materials		X		X			X			X
Landslide				X			X			
Pandemic										
Severe Storm		X	X					X		X
Severe Winter Storm		X	X					X		X
Utility Failure		X								X
Wildfire				X			X			

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.31-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Lancaster would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.31-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Potential FEMA HMA Funding Sources:

FMA *Flood Mitigation Assistance Grant Program*
HMGP *Hazard Mitigation Grant Program*
BRIC *Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.31.9 Action Worksheets

The following action worksheets have been developed by the Town of Lancaster to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Ellicott Creek Bank Stabilization		
Project Number:	2022-Town of Lancaster-010		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The channel of Ellicott Creek Corridor has previously been cleaned many times due to sediment accumulation. This is the result of the erosion of the banks of Ellicott Creek. The neighboring Town of Alden is also experiencing similar issues around bank erosion, and thus sediment accumulation downstream. While the town has previous tried to deal with this issue using dredging and stream clearing, it is not a sustainable solution and thus proper mitigation measures are needed.		
Action or Project Intended for Implementation			
Description of the Solution:	The town would conduct a comprehensive assessment of the banks of the creek within the town and determine the priority areas that need erosion mitigation measures. Once these sites are determined, the town would work with the necessary stakeholders such as the SWCD and DEC to determine the appropriate mitigation measures that can be taken. Such bank stabilization measures could include riparian buffer restoration, use of green infrastructure technology to stabilize banks, concrete walls to mitigate severely eroding areas, and even re-routing stream corridors that are experiencing major land destabilization due to erosion.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Flood Mitigation
Useful Life:	30 years	**Goals Met:**	1,2
Estimated Cost:	$1 Million	**Mitigation Action Type:**	Natural System Protection
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	HMGP, BRIC
Responsible Organization:	Town Highway	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Redirect Stream	Extremely Expensive	Nearly impossible
	Riparian Buffer restoration	Expensive	Best solution

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 70-Section-9.31-Lancaster-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Ellicott Creek Bank Stabilization	
Project Number:	2022-Town of Lancaster-010	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This project protects property
Cost-Effectiveness	1	This project is most cost effective in the long run
Technical	1	This is technically feasible
Political	1	No political opposition
Legal	1	No legal opposition
Fiscal	-1	Not enough resources
Environmental	1	Positive environmental impact
Social	1	Positive social impact
Administrative	1	No administrative barriers

9.32 Village of Lancaster

This section presents the jurisdictional annex for the Village of Lancaster. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Lancaster's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.32.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Lancaster's hazard mitigation plan primary and alternate points of contact. The Village of Lancaster followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Director of Emergency Management, Assistant Disaster Coordinator, Department of Public Works Superintendent. The Director of EM represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.32-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Scott M. Kuhlmey, Director of Emergency Management Address: 5423 Broadway, Lancaster, NY 14086 Phone Number: (716) 861-7933 Email: skuhlmey@lancastervillage.org	Name/Title: Scott M. Robinson, Assistant Disaster Coordinator Address: 5423 Broadway, Lancaster, NY 14086 Phone Number: (716) 430-7530 Email: srobinson@lancastervillage.org
NFIP Floodplain Administrator	
Name/Title: William G. Cansdale/ DPW Superintendent Address: 5423 Broadway, Lancaster, NY 14086 Phone Number: (716) 683-1028 Email: wcansdale@lancastervillage.org	

9.32.2 Municipal Profile

The Village of Lancaster is in the western part of the Town of Lancaster and is 2.7 square miles in size. The village is surrounded by the Town of Lancaster on three sides and by the Village of Depew on its west border. The Cayuga Creek flows through the village and US Route 20 is the village's main road. Bowmansville is a hamlet in the northwest part of town.

The village area was first settled by the Erie Indian and later by the Seneca Indians. After the Revolutionary War, the Holland Land Company sold former Indian reservation lands to immigrants from New England and Europe. The village area at that time was known as Cayuga Creek. The 1825 opening of the Erie Canal spurred more rapid settlement of the village because farmers could ship their crops outside the region. In the 1830s,

large numbers of German immigrants moved into the Lancaster area followed in the 1840s by immigrants from Ireland and Britain who worked on the railroad. The village incorporated in 1849.

Four railroads; Erie RR, Lehigh Valley RR, Delaware, Lackawanna and Western RR, and New York Central Railroads once traversed the village, but today only two remain. Each railroad had a station on Central Ave. (Wikipedia Village of Lancaster, accessed 2020). During succeeding decades, the growing industrial community attracted immigrants from Poland, Italy, Greece and Lithuania. Population growth accelerated during the 1920s but slowed during the Great Depression. The Second World War quickly revived the village's economy as factories produced war materials. (Town of Lancaster, Village of Lancaster, Village of Depew Comprehensive Plan 2000)

According to the U.S. Census, the 2010 population for the Village of Lancaster was 10,352. The estimated 2019 population was 10,144, a 2.0 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.7 percent of the population is 5 years of age or younger and 16.9 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.32.3 Jurisdictional Capability Assessment and Integration

The Village of Lancaster performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.32.3). The Village of Lancaster's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Lancaster. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.32-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	VC Chapter 156-7, 1970 BOCA	Local	Village Building Department

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: *The main purpose of building codes is to protect public health, safety, and general welfare as they relate to the construction and occupancy of buildings and structures.*					
Zoning Code	Yes	No	VC Chapter 350 Amended 4-27-1981 by Local Law Number 2-1981 – Zoning	Local	Village Building Department and Zoning Board
Comment: *The comprehensive zoning plan set forth in the text and maps which constitute this chapter is adopted in order to promote and protect public health, safety, comfort, convenience, prosperity and other aspects of the general welfare. These general goals include, among others, the following specific purposes: to provide for adequate light, air and convenience of access; to prevent undue concentration of population and overcrowding of land; to lessen congestion in the streets to secure safety from fire, flood, panic and other dangers; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements.*					
Subdivision Ordinance	Yes	No	VC Chapter 301, 1976 Adopted by the Board of Trustees of the Village of Lancaster 3-22-1965 – Subdivision of Land	Local	Village Building Department and Zoning Board
Comment: *The regulations herein contained are adopted for the purpose of providing for the sound growth and development of the Village and of affording adequate sites and facilities for transportation and for the safety, health and welfare of its population and for providing reasonable and equitable requirements in the interests of developers, investors and homeowners so as to ensure stable property values, all pursuant to § 334 of the Real Property Law and Article 6-A of the Village Law. No subdivision of land shall be made, nor shall any contract be made for the sale of any part thereof and no permit for the erection of a structure in any proposed subdivision shall be granted and no street, sanitary sewer or water main shall be laid out, constructed, opened or dedicated except in accordance with the provisions of these regulations.*					
Stormwater Management Ordinance	Yes	Yes – for county	VC Chapter 292, 2019. Stormwater Management	Local	Stormwater Management Officer
Comment: *The purpose of this ordinance is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing in the village. It is hereby determined that:* *A. Land development activities and associated increases in site impervious cover often alter the hydrologic response of local watersheds and increase stormwater runoff rates and volumes, flooding, stream channel erosion, or sediment transport and deposition;* *B. This stormwater runoff contributes to increased quantities of waterborne pollutants, including siltation of aquatic habitats for fish and other desirable species;* *C. Clearing and grading during construction tends to increase soil erosion and add to the loss of native vegetation necessary for terrestrial and aquatic habitats;* *D. Improper design and construction of stormwater management practices can increase the velocity of stormwater runoff, thereby increasing stream bank erosion and sedimentation;* *E. Impervious surfaces allow less water to percolate into the soil, thereby decreasing groundwater recharge and stream baseflow;* *F. Substantial economic losses can result from these adverse impacts on the waters of the municipality;* *G. Stormwater runoff, soil erosion and nonpoint source pollution can be controlled and minimized through the regulation of stormwater runoff from land development activities;* *H. The regulation of stormwater runoff discharges from land development activities in order to control and minimize increases in stormwater runoff rates and volumes, soil erosion, stream channel erosion, and nonpoint source pollution associated with stormwater runoff is in the public interest and will minimize threats to public health and safety;* *I. Regulation of land development activities by means of performance standards governing stormwater management and site design will produce development compatible with the natural functions of a particular site or an entire watershed and thereby mitigate the adverse effects of erosion and sedimentation from development.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Site Plan Review	Yes	Yes	VC Chapter 350-56 1-9-1978 by Local Law Number 1-1978; amended 1-22-2007 by Local Law Number 4-2007	Local	Village Planning Commission/ Town Building Department
Comment: *The village planning board reviews the new site in order to improve the functionality or mitigate any potential adverse impacts of the proposed development on neighboring properties. The end result of the process is for the applicant to obtain a special use permit.*					
Environmental Protection Ordinance	Yes	Yes	LL6-1979. Adopted by the Board of Trustees of the Village of Lancaster 6-25-1979 by Local Number 6-1979; amended 1-22-2007 by Local Law Number 4-2007 – Environmental Quality Review	Local	Planning
Comment: *The village to implement SEQR and NYCRR 618. The purpose of this chapter is to implement for the Village of Lancaster SEQR and Part 617.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 160 (Flood Damage Prevention); amended 4/22/2019	Local	DPW Superintendent
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands; and* *F. Qualify and maintain for participation in the National Flood Insurance Program.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 292 (Stormwater Management); adopted 11/26/2006	Local	Village Dept. Public Works
Comment: *The purpose is to provide for the health, safety, and general welfare of the citizens of the Village of Lancaster through the regulation of non-stormwater discharges to the municipal separate storm sewer system (MS4) to the maximum extent practicable as required by federal and state law. This Part 2 establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with requirements of the SPDES General Permit for Municipal Separate Storm Sewer Systems. The objectives of this Part 2 are:* *A. To meet the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit No. GP-02-02, as amended or revised;* *B. To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge non-stormwater wastes;* *C. To prohibit illicit connections, activities and discharges to the MS4;* *D. To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this Part 2; and* *E. To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.*					
Emergency Management Ordinance	Yes	Yes	Emergency Regulations – Various sections of Chapter 160 and 325.	Local	Village OEM
Comment: *It is hereby found and declared to be in the best interest and welfare of the general public to expedite the removal of snow, reduce driving hazards and to ensure open roads for the movement of emergency vehicles during snowstorms, flood, serious fire or other extreme public emergency.*

Planning Documents					
Comprehensive Plan	Yes	No	Town of Lancaster, Village of Lancaster, Village of Depew Joint Comprehensive Plan. 5/21/18	Local	Village Planning
Comment: *1) Prioritize a list of critical open spaces to preserve the Town's important environmental features, such as stream corridors, wetlands and forested lands, through a variety of tools from acquisition to conservation easements. 2) Allow conservation development in the Town code. 3) The communities should invite the participation of land trusts to help obtain the preservation of valuable land; this could include the Penora Woods area. Land trusts may also play an important role in the acquisition of public access along stream corridors or conservation easements to protect other sensitive environmental or aesthetic features. 4) The Town of Lancaster and Villages of Lancaster and Depew should consider developing a coordinated storm water management plan for the three communities. 5) Storm water drainage plans for proposed new developments should be reviewed by representatives of potentially affected communities. 6) Existing storm water problem areas should be jointly addressed. Such areas include erosion problems along Zurbrick Road in Depew, siltation problems along Scajaquada Creek and seasonal overflows of tributaries to Cayuga Creek. The Zurbrick Road area has recently received funding to improve the erosion problems and additional funding should be sought. 7) Continue to include an assessment of creek cresting patterns when reviewing new development. The cresting patterns determine the expected timing of floods and will enable the communities to plan for flooding situations. This information will also enable the communities to provide appropriate storm water detention for creek waters. 8) Consider soil conditions, topography, floodplains and other environmental conditions when it reviews new development projects. 9) The Town of Lancaster and Villages of Lancaster and Depew should require a drainage plan and detention/retention ponds as appropriate before approving individual site developments. The communities should ensure that site drainage will not adversely affect the property or adjacent properties before granting approval.*

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Lancaster to oversee and track development.

Table 9.32-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	This is done by the Town of Lancaster's Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	NA	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Lancaster and their current responsibilities which contribute to hazard mitigation.

Table 9.32-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Commission
Zoning Board of Adjustments	Yes	Zoning Board of Appeals
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Village Department of Public Works - Sewer Inspections, Snow Plow Permits, Curb Cut Permits, Leaf Pick Up, Banner and sign reservations, and other services.
Construction/Building/Code Enforcement Department	Yes	Lancaster (Town) Building Dept.-Administer/Enforce State and Local Code
Emergency Management/Public Safety Department	Yes	The Village of Lancaster Office of Emergency Management is actively involved in preparedness activities such as community hazard assessments, multi-jurisdictional hazard mitigation planning, maintaining National Incident Management System NIMS training compliance, maintenance of a special needs registry, drills/exercises, public/private outreach, and emergency planning for events in the Village of Lancaster Special Events Series.

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		The Village of Lancaster OEM operates out of the Lancaster Municipal Building located at 5423 Broadway in Lancaster. This building also serves as the Emergency Operations Center (EOC) for use during emergencies. The OEM office is equipped with backup generator power and essential equipment and resources necessary for operations. The Village of Lancaster OEM automatically responds to major incidents and alarms involving at-risk facilities and is capable of deploying mobile resources to assist with emergency operations. Emergencies requiring assets beyond the scope of our agency are supplemented through mutual aid agreement, including neighboring towns and villages, Erie County Emergency Services, and public/private partnership.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code RED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW
Mutual aid agreements	Yes	Fire and DPW
Other	NA	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Lancaster Building Dept. NYS CEDAR Program
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	William G. Cansdale/ DPW Superintendent
Surveyor(s)	No	-
Emergency Manager	Yes	Scott M. Kuhlmey, Director of Emergency
Grant writer(s)	Yes	Sarah Meredith
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Lancaster.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.32-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes – for sewer rents only
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Lancaster.

Table 9.32-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Clerk's Office manages website and social media
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	https://www.lancasteroem.org/
Social media for hazard mitigation education and outreach	Yes	Facebook/ Twitter
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Education Outreach events to community and children.
Warning systems for hazard events	Yes	Code RED
Natural disaster/safety programs in place for schools	Yes	Each school has its own under guidance of OEM.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Lancaster.

Table 9.32-7. Community Classifications

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

The Village of Lancaster would like the impacts of climate change to be considered in the 2022 update of the Erie County Hazard Mitigation Plan. Climate change may affect a community's vulnerability to flooding, wildfire, drought, and extreme temperatures. Impacts such as power outages during summer heat waves; increased home, street, and sewer flooding due to heavy precipitation and increased structural damage and impaired operations of critical infrastructure are possible. The Village of Lancaster encourages identification of mitigation actions that reduce these risks and vulnerabilities.

Table 9.32-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong – NA
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.32.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Floodplain Administrator (FPA)

William G. Cansdale/ DPW Superintendent

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Lancaster.

Table 9.32-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Lancaster	16	5	$4,698	0	5

Source: FEMA 2020a, FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The village does not maintain a list of flood damaged properties. Existing levees have been built in the late 1930s and are prone to flooding. A steering committee has been formed by the town to work with FEMA, USACE, and DEC to coordinate floodplain mapping updates. There are no risk maps underway nor are there any methods to determine substantial damage determinations. No properties have been mitigated. The flood maps adequately address existing floodplains.

NFIP Compliance

The village DPW deals with floodplain management but there are no certified floodplain managers working for the municipality. The municipality believes they have adequate resources to determine and address flooding issues due to climate change. The village would like assistance with floodplain management certification. No administrative services are provided by the village NFIP program. The Town of Lancaster's Building Department determines substantial damage determination. The village determined that cost is a substantial barrier to running an adequate NFIP program. The most recent Community Assistance Visit (CAV) was on October 6, 2016. The NFIP flood damage prevention ordinance law number is in Chapter 160, Amended in April 2019. The program meets basic requirements. The village site plan review process does account for flood vulnerability. The municipality does not wish to participate in CRS.

9.32.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

Evacuations involve several factors, including characteristics of the hazard or threat itself, the magnitude, intensity, speed of onset, duration, and impact on the Village of Lancaster.

These factors will determine the number of people to be evacuated, time available in which to effect the evacuation, and the time and distance of travel necessary to ensure safety. Evacuees are moved from their homes to a designated area within the Village or a neighboring jurisdiction not impacted by the hazard that caused the evacuation.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Sheltering

The Village of Lancaster has identified the following designated emergency shelters within the village.

Table 9.32-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Village of Lancaster Municipal Building	5423 Broadway, Lancaster, New York 14086	Unsure	Yes	Yes	Yes	None	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Lancaster has identified the following sites suitable for placing temporary housing units.

Table 9.32-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Como Lake Park	2220 Como Park Blvd, Lancaster, NY 14086	Unsure	Park	Water	Electricity

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Lancaster has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.32-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Como Lake Park	2220 Como Park Blvd, Lancaster, NY 14086	Unknown	Park	All	Will need to work with County/ State to clarify town's needs

9.32.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.32-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.32-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.32.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Lancaster's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Lancaster has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.32-1. Village of Lancaster Hazard Area Extent and Location Map 1

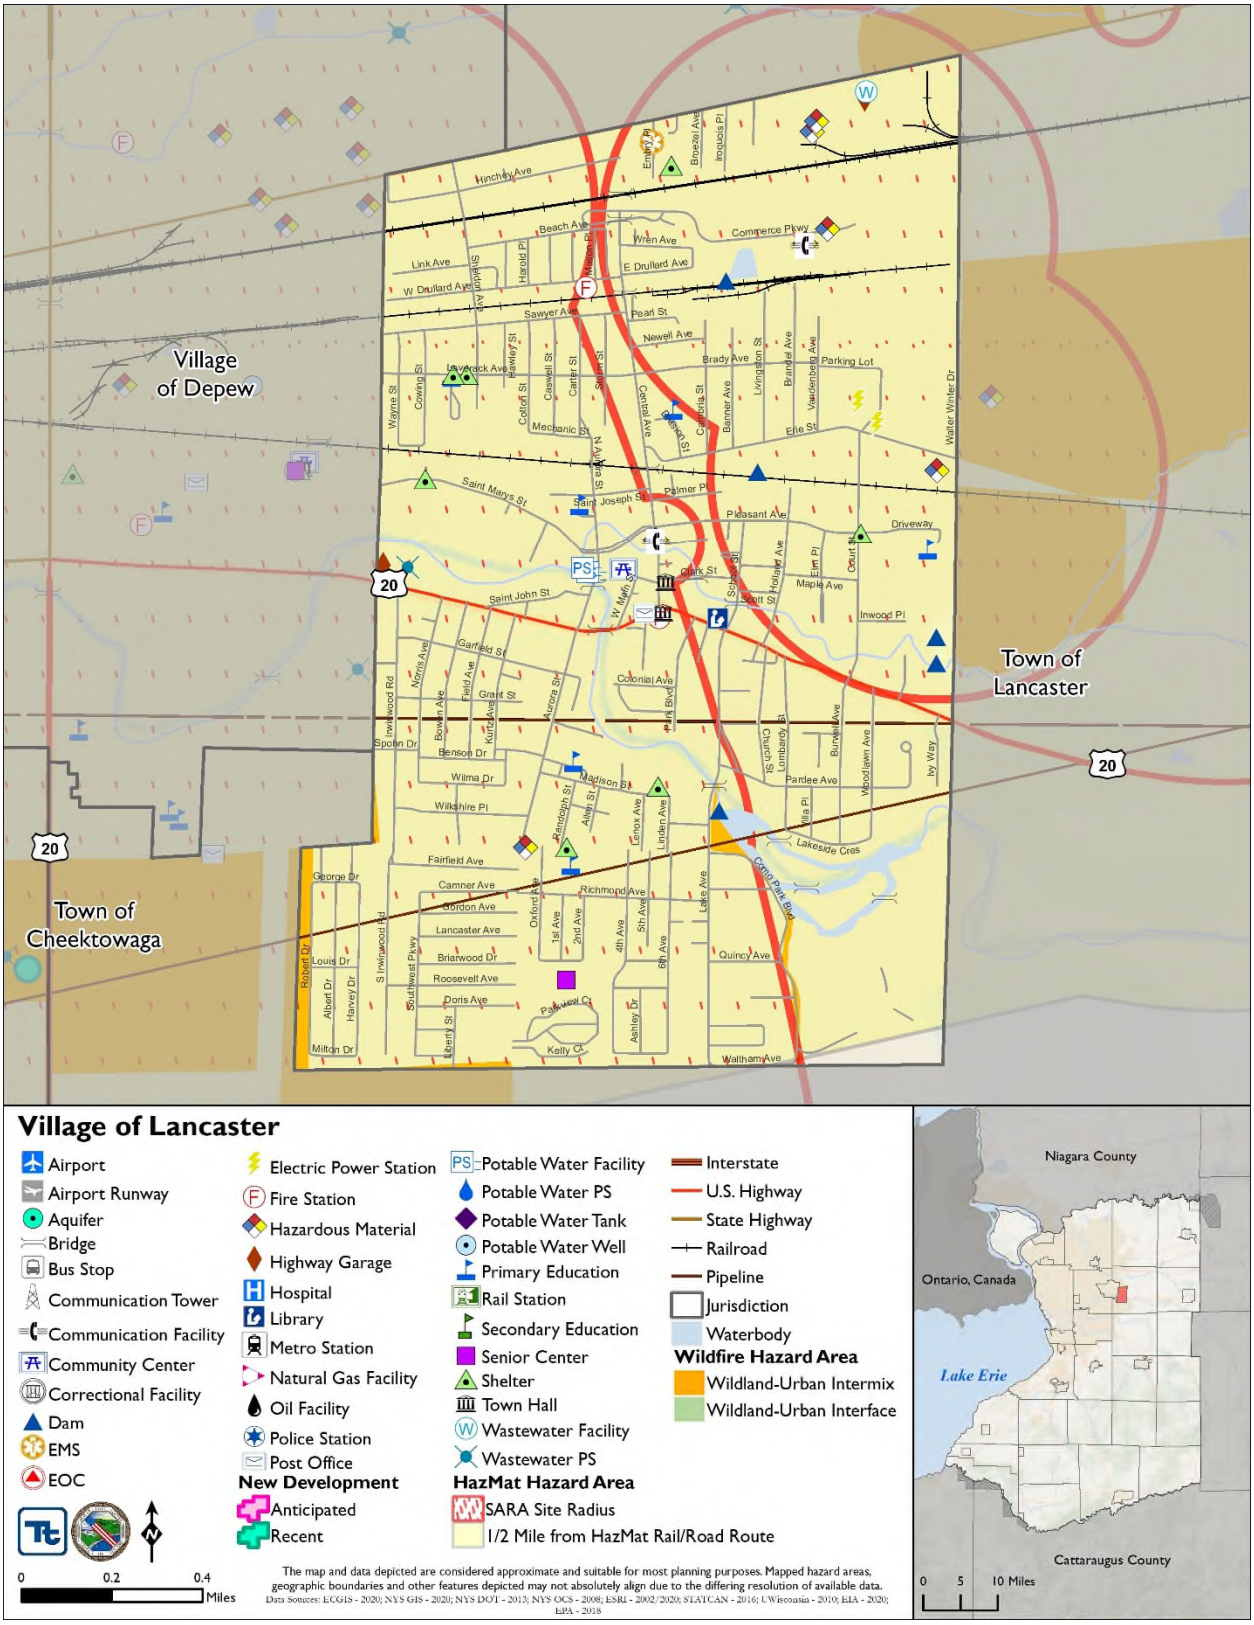
Figure 9.32-3. Village of Lancaster Hazard Area Extent and Location Map 3



Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Lancaster's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.32-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.32-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden, and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning	While this event impacted portions of Erie County, the village did not

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	identify any losses or damages associated with this event.
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma, and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low-pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia, and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher-than-normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3–5-hour period in the cold advection behind the cold front.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	While this event impacted portions of Erie County, the village did not identify any losses or damages associated with this event.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
2020-21	COVID 19 - EM 3504	Yes	National Pandemic that affected the entire nation, including the Village of Lancaster and Erie County	Business closings, social distancing, masking, and numerous deaths reported.

Notes:

EM *Emergency Declaration (FEMA)*

FEMA *Federal Emergency Management Agency*

DR *Major Disaster Declaration (FEMA)*

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Lancaster's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Lancaster. The Village of Lancaster has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The Village has significant risk to flooding and thus would like to re rank Flood from low to high.
- Hazardous materials pose a significant threat due to hazardous material being transported through the village and would like to re rank the hazard from low to high.
- Utility failure is an issue, but the town has capabilities to address this so will re rank from high to medium.

Table 9.32-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Medium	Medium	High	High

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	Medium	Low

Note: *The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction*

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.32-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Erie County Park Commission Dam	Dam	X	X	001
Mook Dam	Dam		X	No
Palmers Dam	Dam	X	X	003
Soemans Dam	Dam	X	X	004

Source: GIS 2020

Identified Issues

After review of the Village of Lancaster's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Lancaster has identified the following vulnerabilities within their community:

- The Erie County Park Commission Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.
- The Mook Dam is in the 0.2% annual chance flood event.
- The Palmers Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Soemans Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- Verizon, YMCA, several dams, electric power stations, hazardous material facilities, Lancaster post office, and private schools in the village are in the earthquake hazard area.
- All of the critical facilities in the Village of Lancaster may be at risk of being exposed to hazardous materials incidents.
- Several private facilities are located on steep slopes and at risk of landslides
- Communications facilities, YMCA, dams, electric power stations, post office, hazardous materials facilities, and private schools may be at risk of experiencing damages caused by expansive soils.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- None

9.32.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.32-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Stream channel enhancement/mitigation of Plumb Bottom Creek for flood hazard reduction through measures such as sediment removal, debris clearance, and bank stabilization.	Flooding	Not Identified	DPW	Ongoing Capability	Cost	-	1. Discontinue 2. 3. This needs to be an on-going review and dialogue to maintain a level of protection.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
2	Stream channel enhancement/mitigation of Spring Creek for flood hazard reduction through measures such as sediment removal, debris clearance, and bank stabilization.	Flooding	Not Identified	DPW	No Progress	Cost	-	1. Discontinue 2. 3. This needs to be an on-going review and dialogue to maintain a level of protection.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
3	Ongoing inspections of the Village of Lancaster Flood Control Project, as completed by the US Army Corps of Engineers in 1948, with repairs/ improvements/mitigation undertaken as needed to ensure system functionality and continued flood protection in the Village.	Flooding	Not Identified	DPW	No Progress	Cost	-	1. Discontinue 2. 3. This needs to be an on-going review and dialogue to maintain a level of protection.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
4	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Not Identified	Code Enforcement	Ongoing Capability	Cost	-	1. Discontinue 2. 3. This needs to be an on-going review and dialogue to maintain a level of protection.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
5	Update/revise floodplain management ordinances	Flood	Not Identified	Code Enforcement	No Progress	Cost	-	1. Discontinue

	to be consistent with potential future new FIRMs					Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. This needs to be an on-going review and dialogue to maintain a level of protection.
6	Join the Community Rating System (CRS)	Flood	Not Identified	Village Board	No Progress	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Noe enough community support

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Lancaster has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Lancaster participated in a mitigation action workshop in March 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.32-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake				X			X			
Expansive Soils				X			X			
Extreme Temperature										
Flood		X		X		X	X		X	
Hazardous Materials				X			X			
Landslide				X			X			
Pandemic										
Severe Storm		X							X	
Severe Winter Storm		X							X	
Utility Failure										
Wildfire										

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.32-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Lancaster would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.32-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.32-19. Proposed Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Lancaster - 001	Erie County Park Commission Dam Flood Mitigation Outreach	1,3,4	Flood	**Problem**: The Erie County Park Commission Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution:** The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	The dam owner will be aware of options to protect the dam to the 0.2% annual chance flood event.	Village Budget	High	EAP	PI
2022-Village of Lancaster-002	Assess the flood risk at the Mook Dam	1,3,4	Flood	**Problem**: The Mook Dam is in the 0.2% annual chance flood event. **Solution:** The FPA will conduct outreach and contact the facility owner and assess the flood risk at the facility.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	Ensures continuity of operations of the facility	Village Budget	High	EAP	PI
2022-Village of Lancaster-003	Palmers Dam Flood Mitigation	1,3,4	Flood	**Problem**: The Palmers Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution:** The FPA will conduct outreach and contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	The dam owner will be aware of options to protect the dam to the 0.2% annual chance flood event. 				prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).										

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.32.9 Action Worksheets

The following action worksheets have been developed by the Village of Lancaster to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Erie County Park Commission Dam Flood Mitigation Outreach		
Project Number:	2022-Village of Lancaster -001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Erie County Park Commission Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.		
Action or Project Intended for Implementation			
Description of the Solution:	The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event. Once the needs have been identified, the village shall work with the owner to determine the adequate funds needed to retrofit the existing facility. The actions will be implemented as identified over the course of 2 years.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☒	No ☐	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500 years storm	**Estimated Benefits (losses avoided):**	Flood Mitigation
Useful Life:	20 years	**Goals Met:**	1,2
Estimated Cost:	$100,000-$500,000	**Mitigation Action Type:**	Structural and Infrastructure Project, Education and Awareness Program
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year once funding secured
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP, Climate Smart Communities Grant Funding, Municipal Budget
Responsible Organization:	FPO and Village	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Divert water from dam	High	Very costly and difficult
	Facility upgrade	High	Less costly

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Erie County Park Commission Dam Flood Mitigation Outreach	
Project Number:	2022-Village of Lancaster -001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This project protects property
Cost-Effectiveness	1	This is most cost effective in the long run
Technical	0	The technical issues have not yet been identified
Political	1	No political issues
Legal	0	Legal issues have not been identified
Fiscal	-1	Inadequate resources
Environmental	1	Positive impact
Social	1	Positive impact
Administrative	1	Have administrative capabilities
Multi-Hazard	0	Addresses flooding
Timeline	1	Feasible timeline
Agency Champion	1	Yes
Other Community Objectives	1	Yes
Total	9	
Priority (High/Med/Low)	High	

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Residential Property Flood Mitigation.		
Project Number:	2022-Village of Lancaster-009		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will work with the county to conduct outreach to flood-prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	100-year flood	**Estimated Benefits (losses avoided):**	Remove residents and homes from the flood threatened homes
Useful Life:	To be determined	**Goals Met:**	1
Estimated Cost:	TBD per cost and number of properties to be mitigated	**Mitigation Action Type:**	SIP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	Within 3 years	**Potential Funding Sources:**	BRIC, HMGP, FMA, cost share by homeowners
Responsible Organization:	Village FMA	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Enhance overall outreach program	$1,000	Does not reach a specific area vulnerable to flooding
	Residential property flood mitigation outreach	Staff Time	Selected project
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

Evaluation and Prioritization		
Project Name:	Residential Property Flood Mitigation.	
Project Number:	2022-Village of Lancaster-009	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This project protects property
Cost-Effectiveness	1	This is most cost effective in the long run
Technical	1	
Political	1	
Legal	1	
Fiscal	1	Have fiscal resources to conduct outreach
Environmental	1	
Social	1	
Administrative	1	Have administrative capabilities
Multi-Hazard	0	Addresses flooding
Timeline	1	To be completed within 3 years
Agency Champion	1	
Other Community Objectives	1	
Total	13	
Priority (High/Med/Low)	High	

Attachment: 71-Section-9.32-Lancaster-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.33 Town of Marilla

This section presents the jurisdictional annex for the Town of Marilla. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Marilla's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.33.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Marilla's hazard mitigation plan primary and alternate points of contact. The Town of Marilla followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Emergency Manager and Supervisor. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.33-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Brian Nolan, Emergency Manager Address: 1740 Two Rod Rd, Marilla, NY Phone Number: (716) 857-0103 Email: bnolan@townofmarilla.com	Name/Title: Earl Gingerich, Jr, Supervisor Address: 1740 Two Rod Rd, Marilla, NY Phone Number: (716) 310-7907 Email: egingerich@townofmarilla.com
NFIP Floodplain Administrator	
Name/Title: Scott Rider, CEO Address: 1740 Two Rod Rd, Marilla, NY Phone Number: (716) 857-0103 Email: srider@townofmarilla.com	

9.33.2 Municipal Profile

The Town of Marilla is 27.5 square miles in size and the town is located on Erie County's east and central portion. The Town of Alden forms the north boundary while on the west is the Town of Elma and the Town of Wales borders to the south.

Marilla was first settled by Europeans in 1827 and was originally part of the Buffalo Creek Indian Reservation. The land was opened to general settlement shortly after the Treaty of Buffalo Creek was finalized in 1842. (Town of Marilla 2020) White settlers began arriving to the area in 1832, particularly in the Porterville hamlet area. The town was organized in 1853 from portions of the towns of Alden and Wales and incorporated in 1854. The town's name town is derived from Marilla Rogers, an early schoolteacher. (Town of Marilla 1998) Excellent soils supported widespread agricultural development. In 1937, the Town experienced the worst flooding on

record, which did considerable damage to crops In the latter half of the century, more people began moving out of Buffalo and Marilla now serves as a bedroom community to Buffalo.

According to the U.S. Census, the 2010 population for the Town of Marilla was 5,327. The estimated 2019 population was 5,378, a one percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.1 percent of the population is 5 years of age or younger and 21.1 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.33.3 Jurisdictional Capability Assessment and Integration

The Town of Marilla performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.33.3). The Town of Marilla's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Marilla. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.33-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 209 (Uniform Construction Codes)	Local	Building Department and Code Enforcement
Comment: *This article provides for the administration and enforcement of the International Codes (the Uniform Code), the State Energy Conservation Construction Code (the Energy Code) and the Code of the Town of Marilla (the Code) in this Town. This article is adopted pursuant to Section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this article, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this article. The Code Enforcement Officer administers and enforces the provisions of Chapter 209.*					
Zoning Code	Yes	No	Local Law Number 1-1999 – Zoning. Chapter 700.	Local	Code Enforcement Officer
Comment: *For the purpose of promoting the health, safety and general welfare of the people of the Town of Marilla, this chapter is adopted pursuant to Article 16 of the Town Law of the State of New York. Its purpose is to regulate and restrict the height, number of stories and size of buildings and other structures; the percentage of lot that may be occupied; the size of yards, courts and other open space; the density of*

	Jurisdiction (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
population and the location and use of buildings, structures and land for business, industry, agriculture, residence or other purposes. This chapter and the Zoning Map, which is a part of this chapter, are designed to lessen congestion in the streets; to secure safety from fire and other dangers; to provide adequate light and air; to provide for solar access and the implementation of solar energy systems; to prevent the overcrowding of land and to avoid undue concentration of population; to facilitate the efficient and adequate provision of public facilities and services; and to provide the maximum protection to residential areas from the encroachment of adverse environmental influences. This chapter and the Zoning Map were made after reasonable consideration, among other things, as to the character of the Town and its peculiar suitability for particular uses and with a view to conserving property values and natural resources and encouraging the most appropriate use of land throughout the Town.					
Subdivision Ordinance	Yes	No	Local Law Number 1-1997 Chapter 644 Town of Marilla Subdivision Law	Local	Code Enforcement Officer
Comment: *The purpose of the town's subdivision is to amend the Code of the Town of Marilla to add a new provision governing the subdivision of land within the Town of Marilla and to protect the public health, safety and general welfare while allowing for cost-saving efficiencies.*					
Stormwater Management Ordinance	No	Yes – for county	-	-	-

Comment: *The Town prepared the original Comprehensive Plan in 1982, which was updated in 1998 and 2018. Since that time, the Town has maintained its rural and agricultural character and current views and policies for future land use planning and management have necessitated this update of the Comprehensive Plan. Goals and projects within the comprehensive plan include the following: 1) Coordinate drainage planning efforts with neighboring towns that share drainage basins. Carefully evaluate the effects on drainage of all proposals for development. 2) Require developers to dedicate easements along creeks and other major drainage was to allow for their maintenance and to reduce the risk of flood damages. 3) Prohibit drainage, filling, and development in wetland areas.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Marilla to oversee and track development.

Table 9.33-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement Officer
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	No – the town is relatively rural and sparsely populated and would like to keep it that way.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Marilla and their current responsibilities which contribute to hazard mitigation.

Table 9.33-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The ultimate goal of this planning board is to ensure that the long-range planning and land use objectives of the community can be achieved.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals as per Chapter 704 of the municipal code
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Conservation Advisory Board was established to preserve and improve the quality of the natural and manmade environment within the town. The board

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		consists of seven regular members and three alternates. The powers and duties of the board include: A. Advise the Town Board on matters affecting the preservation, development and use of the natural and man-made features and conditions of the Town insofar as beauty, quality, biologic integrity and other environmental factors are concerned and, in the case of man's activities and developments, with regard to any major threats posed to environmental quality, so as to enhance the long-range value of the environment to the people of the Town. B. Develop and, after receiving general approval by resolution of the Town Board, conduct a program of public information in the community which shall be designed to foster increased understanding of the nature of environmental problems and issues and support for their solutions. C. Conduct studies, surveys and inventories of the natural and man-made features within the Town of Marilla and such other studies and surveys as may be necessary to carry out the general purposes of this chapter and submit copies of the same to the Town Board. D. Maintain an up-to-date inventory or index of all open spaces in public or private ownership within the Town of Marilla, including, but not limited to, natural landmarks, glacial and other geomorphic or physiographic features; streams and their floodplains, swamps, marshlands and other wetlands; unique biotic communities; scenic and other open areas of natural or ecological value and of the ownership, present use and proposed use of such open areas, so as to provide a base of information for recommendations by the Board for their preservation and/or use and submit copies of the same to the Town Board. E. Seek to coordinate, assist and unify the efforts of private groups, institutions and individuals within the Town of Marilla in accordance with the purpose of this chapter. F. Maintain liaison with public and private agencies and organizations of local, state and national scope whose programs and activities have an impact on the quality of the environment or who can be of assistance to the Board. G. Working in cooperation with the Town Planning Board, recommending from time to time to the Town Board features, plans and programs relating to environmental improvement for inclusion in the Master Plan of the Town of Marilla and, similarly, recommend to the Town Board appropriate and desirable changes in local laws and ordinances relating to environmental control. H. Carry out such other duties as may be assigned from time to time by the Town Board or as set forth under § 239-x of the General Municipal Law.
Open Space Board/Committee	Yes	See above for description of the Conservation Advisory Board
Economic Development Commission/ Committee	No	-
Public Works/Highway Department	Yes	The Marilla Highway Department is responsible for 13.61 miles of town roads. This includes sweeping, mowing, snow plowing, and any maintenance of these roads. The department also snow plows 47.96 lane miles of Erie County Roads. The Highway Superintendent oversees the Sanitation Department, the Town Park, and all Town Buildings. The department currently employs six full-time employees and several seasonal, part-time employees. The town currently has in use two sanitation trucks for garbage collection and three trucks for snow removal on town and county roads.
Construction/Building/Code Enforcement Department	Yes	The Building Inspector issues building permits. The Code Enforcement Officer supports the compliance with Town Of Marilla ordinances and building codes. The Building Inspector must issue a Certificate of Occupancy before residents can move into new homes.
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code Red

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department - sweeping, mowing, snow plowing, and maintenance of town-owned roadways
Mutual aid agreements	Yes	Local Fire Company/Towns/County/State

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.33-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	NA
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	NA
Extreme Temperature	Moderate
Flood	Strong
Hazardous Materials	Moderate
Landslide	*NA*
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.33.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Scott Rider, CEO

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Marilla.

Table 9.33-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Marilla	2	1	$15,190	0	0

Source: FEMA 2020a, FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The town did not identify any barriers to running an effective NFIP program in the community. The town does not have any outstanding NFIP compliance violations. The local law number of the flood damage prevention ordinance is 559.1 Marilla Town Code; Chapter 559. The flood management program meets the minimum requirements. There are other local ordinances and plans that support the floodplain management program.

The town does not maintain a list of properties that have been damaged by flooding and they do not maintain a list of property owners interested in flood mitigation. No RiskMAP projects are currently underway. The town identified they do not make Substantial Damage determinations. No properties have been mitigated in the town. The town's flood hazard maps adequately address the flood risk.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The Code Enforcement and Town Engineer are responsible for floodplain management and the Town Engineer Firm has certified floodplain managers. The Town of Marilla has access to resources to determine possible future flooding conditions from climate change. The town's floodplain management staff does not need assistance or training to support the floodplain management program. The last Community Assistance Visit was April 9, 2010.

9.33.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Marilla has identified the following routes and procedures to evacuate residents prior to and during an event.

- Two Rod Road (North/South)
- Bullis Road (East/West)

Sheltering

The Town of Marilla has identified the following designated emergency shelters within the town.

Table 9.33-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Marilla Fire Co.	1950 West Ave, Marilla, NY 14102	100	Yes	Yes	Yes	First Aid	Kitchen
Marilla Primary School	11683 Bullis Rd, Marilla, NY 14102	500	Yes	Yes	Yes	First Aid	Kitchen
Community Center	1810 Two Rod Road	100	Yes	Yes	Yes	First Aid	Kitchen

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Marilla has identified the following sites suitable for placing temporary housing units.

Table 9.33-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Marilla Primary School	11683 Bullis Rd, Marilla, NY 14102	25-30	Lot	All	None
Fireman's Grounds	West Ave.	30-35	Lot	All	None

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Marilla has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.33-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified – mitigation action number 005					

9.33.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.33-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.33-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)

** Only location-specific hazard zones or vulnerabilities identified.*

9.33.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Marilla's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Marilla has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Marilla's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.33-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.33-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a	Although the County was impacted, the town did not report damages

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to	Although the County was impacted, the town did not report damages

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario	Although the County was impacted, the town did not report damages

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			seiche, and river flooding in the North Country	
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5 hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	The Town of Marilla did not report any damages.
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	The Town of Marilla did not report any damages.
2020-21	COVID 19 - EM 3504	Yes	National Pandemic that affected the entire nation, including the Town of Lancaster and Erie County	Business closings, social distancing, masking, and numerous deaths reported.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Marilla's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Marilla. The Town of Marilla has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town changed the coastal erosion hazard ranking from low to not applicable since they are not on the coast
- The town changed the cyber-attack hazard ranking from medium to low given this has never happened before.
- The earthquake hazard ranking was changed from high to medium due to lack of such events.
- Severe storm and severe winter storm were changed from high to medium due higher community resilience.
- Wildfire was changed from high to low given the low frequencies of the event.

Table 9.33-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Low	Medium	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	Medium	High	Low

Note: *The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction*

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.33-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
No critical facilities located in the floodplain				

Source: GIS 2021

Identified Issues

After review of the Town of Marilla's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Marilla identified the following issues in the community:

- The Marilla Community Center, Handy Bros Pond Dam, Porterville Aurora Milling Co Dam, Wood Spring Farm Pond Dam, and the NYSEG - Stolle Road Substation are in the earthquake hazard area.
- The Mark Andol Dam is located in the wildfire hazard area.
- Clayton Hopper Marsh Dam, Cornelius Eiss Farm Pond Dam, Haungs Dam, Mark Andol Pond Dam, Pierce Pond Dam, Porterville Aurora Milling Co Dam, Wood Spring Farm Pond Dam, and Marilla Post Office may be at risk of being exposed to hazardous materials incidents. Pierce Pond Dam, Porterville Aurora Milling Co Dam, and the Wood Spring Farm Pond Dam are located on steep slopes and at risk of landslides.
- The town of Marilla currently does not have any official permanent housing location within the town. Given the town has limited land and does not have any specific place for the repetitive housing relocation, the town needs identify new land for this effort.
- The following roads experience recurrent flooding and erosion: Marion Lane, Parker Rd, Renee Ct, Anne Dr, S. Anne Dr, Winchester Dr, Timothy Ln, & Meadowvale Dr. This poses a threat to private property and can cause interruption to traffic and other services.
- The Fireman's Grounds has been identified as a primary temporary housing location if and when a disaster were to occur. However, without the proper equipment and facilities, this site would no longer be suitable as a temporary housing location.
- The Fireman's Grounds has been identified as a primary temporary housing location if and when a disaster were to occur. However, the grounds does not have a temporary backup water system for temporary housing location. Without the proper equipment and facilities, this site would no longer be suitable as a temporary housing location.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- None

9.33.8 Mitigation Strategy and Prioritization

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.33-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Flood and erosion control through upgrades/ improvements to culverts and ditches on Marion Lane, Parker Rd, Renee Ct, Anne Dr, S. Anne Dr, Winchester Dr, Timothy Ln, & Meadowvale Dr	Flood, Erosion	Not Identified	Marilla Highway Dept.	No Progress	Cost	-	1. Include in the 2022 HMP 2. 2022- Town of Marilla-006 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Marilla has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Marilla participated in a mitigation action workshop in June 2021, and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.33-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X							X	
Cyber Attack		X							X	
Earthquake		X		X			X		X	
Expansive Soils		X							X	
Extreme Temperature		X							X	
Flood		X	X			X		X	X	
Hazardous Materials		X		X			X		X	
Landslide		X		X			X		X	
Pandemic		X							X	
Severe Storm		X							X	
Severe Winter Storm		X							X	
Utility Failure		X							X	
Wildfire		X		X			X		X	

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.33-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Marilla would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.33-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.33-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Marilla -001	Earthquake Hazard Mitigation	All	Earthquake	**Problem**: The Marilla Community Center, Handy Bros Pond Dam, Porterville Aurora Milling Co Dam, Wood Spring Farm Pond Dam, and the NYSEG - Stolle Road Substation are in the earthquake hazard area. **Solution**: Conduct necessary outreach to property owners and assess the structures and determine if they are at risk of earthquakes and determine necessary mitigation measures to protect them from earthquakes	Yes	None	Within 6 months for outreach	Town of Marilla	<$100 for outreach, TBD by engineering study	The facility owners are aware of options to protect the facilities facility from potential earthquake damage	Town Budget	High	EAP	PI
2022-Town of Marilla -002	Wildfire Mitigation	All	Wildfire	**Problem:** The Mark Andol Dam is located in the wildfire hazard area. **Solution:** Conduct outreach and work with facility owners to determine the risk from wildfires and identify possible property maintenance actions that can help protect the dam.	Yes	None	Within 6 months for outreach	Town Budget	<$100 for outreach, TBD by engineering study	The facility owner is aware of options to protect the facility from potential wildfire damage	Town Budget	High	EAP	PI
2022-Town of Marilla -003	HazMat Incident Mitigation	All	Hazardous Materials Incidents	**Problem:** Clayton Hopper Marsh Dam, Cornelius Eiss Farm Pond Dam, Haungs Dam, Mark Andol Pond Dam, Pierce Pond Dam, Porterville Aurora Milling Co Dam, Wood Spring Farm Pond Dam, and Marilla Post Office may be at risk of being exposed to hazardous materials incidents. **Solution:** Develop and maintain a plan or procedures to ensure that the facilities can safely continue their operations or be shut down if personnel are evacuated from the buildings due to a hazmat release.	Yes	None	Within 6 months for outreach	Town of Marilla	<$100 for outreach, TBD by engineering study	Continuity of operations in place	Town Budget	High	EAP	PI

Marilla -004				Spring Farm Pond Dam are located on steep slopes and at risk of landslides. **Solution:** Conduct outreach and work with the dam owners to determine if landslide risk exists and to assess the structures and determine necessary mitigation measures to protect them from landslides.			for outreach		by engineering study	operations in place				
2022-Town of Marilla -005	Permanent Housing Location	1,2	All	**Problem**: The town of Marilla currently does not have any official permanent housing location within the town. Given the town has limited land and does not have any specific place for the repetitive housing relocation, the town needs identify new land for this effort. **Solution**: The town will conduct an assessment of existing sites across the town that are best suited for permanent housing relocation. These sites should have access to all utilities. The town would then need to work with the land owner to acquire the property, if not yet owned by the town. The town would then apply for FEMA funding to acquire the property and purchase. Additional improvements to the site are TBD and will be determined once the site is identified by the town board and town DPW/ OEM.	No	Yes	5 years	Town of Marilla OEM	High	Permanent Housing	HMGP, BRIC	High	SIP	SP, ES
2022-Town of Marilla -006	Flood Erosion Control	1,2	Flood	**Problem:** The following roads experience recurrent flooding and erosion: Marion Lane, Parker Rd, Renee Ct, Anne Dr, S. Anne Dr, Winchester Dr, Timothy Ln, & Meadowvale Dr. This poses a threat to private property and can cause interruption to traffic and other services. **Solution:** Working with Erie County and the town DPW, a feasibility study will be	No	No	3 years	Town DPW	$100,000	Flood Mitigation	HMGP, BRIC	High	NSP, SIP	PP, NR, ES

				done to understand the existing stormwater flooding issues. As part of the study, the town will determine culverts that need to be upgraded and those that need to be repaired. In the event the study determines that the stormwater infrastructure needs to be expanded, the town will hire external design expertise to identify the needs of the system. This may include installing/ building a retention basin and installation of green infrastructure across the town stormwater system.											
2022-Town of Marilla -007	Temporary Housing Generator	1,2	All	**Problem:** The Fireman's Grounds has been identified as a primary temporary housing location if and when a disaster were to occur. However, without the proper equipment and facilities, this site would no longer be suitable as a temporary housing location. **Solution:** The town will install backup generators on this site. Given this is located on the fireman's grounds, the main point of contact would need to be the fire department as well as any relevant municipal officials. This group of individuals would need to decide what energy demands are needed for temporary housing. Once the proper size generator and fuel source is identified, the town will apply for grant funding on behalf of the fire department to purchase and install.	Yes	No	1 year	OEM	$100,000	Adequate backup power	HMGP	High	SIP	SP
2022-Town of Marilla -008	Temporary Housing Potable Water	1,2	All	**Problem:** The Fireman's Grounds has been identified as a primary temporary housing location if and when a disaster were to occur. Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.33.9 Action Worksheets

The following action worksheets have been developed by the Town of Marilla to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Temporary Housing Generator		
Project Number:	2022- Town of Marilla -007		
Risk / Vulnerability			
Hazard(s) of Concern:	All		
Description of the Problem:	Fireman's grounds does not currently have backup power for temporary housing location. The Fireman's Grounds has been identified as a primary temporary housing location if and when a disaster were to occur. However, without the proper equipment and facilities, this site would no longer be suitable as a temporary housing location.		
Action or Project Intended for Implementation			
Description of the Solution:	The town would like to install backup generators on this site. Given this is located on the fireman's grounds, the main point of contact would need to be the fire department as well as any relevant municipal officials. This group of individuals would need to decide what energy demands are needed for temporary housing. The town would them use HMGP funding to secure these assets and install on site.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500 year storm	**Estimated Benefits (losses avoided):**	Stable Electric Supply
Useful Life:	50 years	**Goals Met:**	1,2
Estimated Cost:	$100,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	HMGP

Total	10	
Priority (High/Med/Low)	High	

Attachment: 72-Section-9.33-Marilla-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Flood Erosion Control		
Project Number:	2022- Town of Marilla -006		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The following roads experience recurrent flooding and erosion: Marion Lane, Parker Rd, Renee Ct, Anne Dr, S. Anne Dr, Winchester Dr, Timothy Ln, & Meadowvale Dr. This poses threat to private property and can cause interruption to traffic and other services.		
Action or Project Intended for Implementation			
Description of the Solution:	The town needs to work with the DPW and county to address existing stormwater flooding issues. The first step would be for the town to determine specific culverts that need upgrading and those that need to be repaired. Additionally, the stormwater infrastructure might also need to be expanded for capacity. This includes installing/ building a retention basin and installation of green infrastructure across the town stormwater system. Such projects might require external design expertise which would be contracted out as needed.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.34 Town of Newstead

This section presents the jurisdictional annex for the Town of Newstead. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Newstead's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.34.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Newstead's hazard mitigation plan primary and alternate points of contact. The Town of Newstead followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including the Clerk's office and the Supervisor's office. The Supervisor and Town Clerk represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.34-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: David Cummings, Supervisor Address: Town Hall 5 Clarence Center Road Akron, NY Phone Number: 716-542-4573 Email: dcummings@townofnewstead.com	Name/Title: Dawn D Izydorczak, Town Clerk Address: Town Hall 5 Clarence Center Road Akron, NY Phone Number: 716-542-4573 #2 Email: dizydorczak@townofnewstead.com
NFIP Floodplain Administrator	
Name/Title: David Miller, CEO Address: Town Hall 5 Clarence Center Road Akron, NY Phone Number: 716-542-4573 #4 Email: dmiller@townofnewstead.com	

9.34.2 Municipal Profile

The Town of Newstead is in Erie County's northeast corner and is 51 square miles in size. The town's borders are Genesee County to the east, Niagara County (to the north, the Town of Clarence to the west and Town of Alden to the south. The Village of Akron is located near the geographic center of the town. The central business district and town government offices are situated in the Village of Akron. A portion of the Tonawanda Indian Reservation is in the town's northeast corner.

The town was first settled around 1801. The town of Newstead was established in 1823 as the "Town of Erie" and was formed from the large original Town of Clarence. The town name was changed later in the 1800s and is reportedly derived from Newstead Abbey in England. Historically, the Town of Newstead has been an agricultural community. Approximately 40 percent of the town's land is still used for agriculture, however

several farms are now fallow or have been developed to low-density dwelling units. Interstate 90, and NYS Routes 5 and 93 traverse the town (Town of Newstead and Village of Akron Comprehensive Plan, 2001).

According to the U.S. Census, the 2010 population for the Town of Newstead was 5,726. The estimated 2019 population was 5,804, a 1.4 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 3.5 percent of the population is 5 years of age or younger and 18.8 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.34.3 Jurisdictional Capability Assessment and Integration

The Town of Newstead performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.34.3). The Town of Newstead's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Newstead. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.34-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 150, Construction Codes, Uniform	Local	CEO/Building Department
Comment: This article provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code), the State Energy Conservation Construction Code (the Energy Code) and the Code of the Town of Newstead (the Code) in this Town. High quality construction will be resistant to hazard impacts.					
Zoning Code	Yes	No	LL2-1988, Chapter 450, Zoning	Local	CEO/Building Department
Comment: The purpose of this Zoning Law is to promote and protect, to the fullest extent permissible, the environment of Newstead and its public health, safety, convenience, comfort, prosperity and general welfare by regulating the use of buildings, other structures and land: by regulating and restricting the bulk, height, design, lot coverage and location of structures; and by regulating and limiting population density and, for the aforesaid purposes, to divide the land within the limits of Newstead into districts of such number and dimensions in accordance with the objectives of the Comprehensive Plan and to provide procedures for the administration and amendment of said Zoning Law.					

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Individual lots shall be graded in a manner which will avoid surface water runoff on adjacent lots, and which will divert water away from buildings, prevent standing water and soil saturation detrimental to structures and lot use.					
Subdivision Ordinance	Yes	Yes	Chapter 360, Subdivision	Local	CEO/Building Department
Comment: The purpose of this chapter is to amend the Code of the Town of Newstead to add a new provision governing the subdivision of land within the Town of Newstead outside of the village and to protect the public health, safety and general welfare while allowing for cost-saving efficiencies. Subdivided land shall be safe from flood or other menace; drainage and other needed improvements will be provided. The development shall be laid out to avoid adversely affecting groundwater and aquifer recharge; to reduce cut and fill; to avoid unnecessary impervious cover; to prevent flooding; to provide adequate access to lots and sites; and to mitigate adverse effects of shadow, noise, odor, traffic, drainage, and utilities on neighboring properties. Land subject to flooding and land deemed to be uninhabitable for other reasons shall not be platted for residential occupancy, nor for such other uses as may increase danger to health, life or property or aggravate a flood hazard.					
Stormwater Management Ordinance	Yes	No	LL2-1996, Chapter 349, Stormwater Management and Erosion Control	Local	Highway Department
Comment: In order to protect, maintain and enhance both the immediate and the long-term health, safety, and general welfare of the citizens on the town, this chapter has the following objectives: A. To prevent decreases in groundwater recharge and stream base flow to maintain aquatic life, assimilative capacity, and potential water supplies. B. To maintain the integrity of stream geometry to sustain the hydrologic functions of streams. C. To facilitate the removal of pollutants in stormwater runoff to perpetuate the natural biological functions of streams. The granting of a variance will not: increase or decrease the rate or volume of surface water runoff; have an adverse impact on a wetland, watercourse, or water body; contribute to the degradation of water quality.					
Post-Disaster Recovery Ordinance	No	Yes	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	No	Town of Newstead Comprehensive Plan, 2003	Local	Town Board and Planning Board
Comment: Comprehensive Plan contains guidance on achieving growth management that considers to risks of hazard exposure.					
Site Plan Review	Yes	No	Chapter 450 Zoning, Article XII Site Plan Review	Local	CEO and Building Department
Comment: The intent of this article is to set forth additional general standards applying to certain land uses and activities. The nature of these uses and activities requires special consideration of their impacts upon surrounding properties, the environment, community character and the ability of the Town of Newstead to accommodate development consistent with the objectives of the Comprehensive Plan and with this chapter. Site plan review of proposed development includes assessment of hazard exposure risks.					
Environmental Protection Ordinance	Yes	Yes	State SEQRA laws	State	Planning Board
Comment: The town includes SEQR review in its land use development processes.					
Flood Damage Prevention Ordinance	Yes	Yes	LL1-2019, Chapter 202,Flood Damage Prevention Ordinance	Local	Floodplain Administrator
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; D. Control filling, grading, dredging and other development which may increase erosion or flood damages;

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Newstead to oversee and track development.

Table 9.34-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Floodplain development permits issued by the Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain development permits
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	82% buildout currently

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Newstead and their current responsibilities which contribute to hazard mitigation.

Table 9.34-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Seven Planning Board members. Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Five members and two alternates of Zoning Board of Appeals. Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	Yes	Two staff members focus upon planning work, including supporting the Planning Board.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Conservation Advisory Council is a seven-person board charged with assisting the town in any matter that involves conservation and environmental issues.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department. Eight staff at the Department. Department staff ensure safe passage over village roads and regularly maintain a variety of facilities.
Construction/Building/Code Enforcement Department	Yes	Building Department. Two staff members. Code Enforcement office provides effective administration of building code.
Emergency Management/Public Safety Department	Yes	Emergency Services. Three members. The Emergency Management/Disaster Coordinators handle the coordination of services in the event of an emergency in the Akron-Newstead area. They work closely with local officials and County, State and Federal officials to set up any necessary command centers and shelters. The coordinators are highly trained local volunteer firemen who are cross trained in incident command management.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Emergency Broadcast System, Cooperative with Akron Central School System
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Town Highway Department and FPA
Mutual aid agreements	Yes	Between village/town/county and state
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Consulting planners, Wendel Engineers
Engineers or professionals trained in building or infrastructure construction practices	Yes	Consulting planners, Wendel Engineers
Planners or engineers with an understanding of natural hazards	Yes	Contract planners/engineers, Wendel Engineers
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Code Enforcement Officer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Contract with Wendel Engineers and three in-house staff
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	Daniel Kowalik, Emergency Services Coordinator
Grant writer(s)	Yes	Contract with Rotella Grant Management
Resilience Officer	No	-

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Newstead.

Table 9.34-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Newstead.

Table 9.34-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Clerk and Emergency Management Coordinator
Personnel skilled or trained in website development	Yes	Town Clerk and Assessor's Clerk
Hazard mitigation information available on your website	Yes	Town website includes a link to the countywide Hazard Mitigation Plan process https://www2.erie.gov/exec/index.php?q=press/erie-county-continuing-update-hazard-mitigation-plan
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Emergency Management and Conservation Advisory Committee
Other programs already in place that could be used to	Yes	Emergency Management

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
communicate hazard-related information		
Warning systems for hazard events	Yes	Cooperative with Akron Central School System
Natural disaster/safety programs in place for schools	Yes	Akron Central School System
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Newstead.

Table 9.34-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	4 commercial and 4 residential	Unknown
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	5	Unknown
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.34-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.34.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

David Miller, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Newstead.

Table 9.34-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Newstead	11	8	$26,190	2	6

Source: FEMA 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The town did not identify areas that are prone to flooding. The town does not maintain a list of properties that have been damaged by flooding. The town does not maintain a list of property owners interested in flood mitigation. There are not any Risk MAP projects currently underway in the town. The town stated that no properties have been mitigated. The town's flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

Town Code Enforcement staff are responsible for floodplain administration however, there are not any certified floodplain managers on staff. The town does not have access to resources to determine possible future flooding conditions from climate change. The town stated that floodplain management staff would benefit from assistance or training to support its floodplain management program. The town provides a comprehensive permit review process that involves both the Building Department and the Town Engineer. The town has localized GIS capabilities specific to the municipality to help with inspections of any project within the Town of Newstead. The town refers to state and federal authorities for their NFIP administration services as well as how to determine if proposed development on an existing structure would qualify as a substantial improvement. The town's floodplain management program meets minimum requirements. Site plan review by the Town Engineer is required of all substantial development associated with a floodplain development permit. The Zoning Board of Appeals reviews variance applications for floodplain development. Grading and drainage plans are reviewed by the Town Engineer and the Planning Board when applicable. The town does not participate and is not interested in participating in the Community Renewal System.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The Town of Newstead does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Visit (CAV) was in May 2010.

9.34.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Newstead has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 93 starting at Route 5 going north through the town and village up to the Niagara County line. This is a north/south route which is owned and plowed by NYSDOT
- Hunts Corner Road starting at Route 93 going west to the Town of Clarence line close to Salt Road. This is an east/west route. owned by Erie County & plowed by the Town of Newstead Highway Department.
- Route 5 from Genesee County line going east to the Town of Clarence line at Davison Road. This is an east/west route which is owned and plowed by the NYSDOT.
- North Millgrove Road from Route 5 going south to Route 33 in the Town of Alden. This is a north/south Route which is owned and plowed by the Erie County Highway Department.

Notification will be given to residents through local media, radio, & TV stations and/or a message through the public-school Emergency Broadcast System. The system will inform residents which evacuation routes to use.

Sheltering

The Town of Newstead has identified the following designated emergency shelters within the town.

Table 9.34-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Newstead Senior Center	5691 Cummings Road Akron, NY 14001	48	Yes	Yes	Yes	Basic First Aid	Food, heat, A.C., sleeping area
Newstead Fire Hall Station #1	5691 Cummings Road Akron, NY 14001	250	Yes	Yes	Yes	Paramedic services by Twin City Ambulance	Food, Heat, AC, Sleeping Area
Newstead Fire Hall Sta. #2	12012 Rapids Road, Akron, NY 14001	25	Yes	No	No	Basic First Aid	Warming Shelter

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Newstead has identified the following sites suitable for placing temporary housing units.

Table 9.34-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Veteran's Park	5929 Buell Street/Route 93 Akron, NY 14001	100 trailers	Open mowed field with a stone roadway	Water, electric	Permits and inspection
Newstead Sports complex	44 Skyline Drive Akron, NY 14001	100 trailers	Open mowed field with stone roadway	Water, electric	Permits and inspection
Town property	5750 Crittenden Road Akron, NY 14001	100 trailers	Open field mowed. No road	Water and electric available at the road	Permits and inspection

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Newstead did not identify any sites suitable for relocating homes outside of the floodplain.

Table 9.34-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with county staff to identify permanent housing locations, as specified in Proposed Action #2022-Town of Newstead-011					

9.34.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.34-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.34-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	12	0	12	0	22	0	7	0	23	0	15	0
Multi-Family	0	0	0	0	0	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	4	0	4	0	11	0	1	0	8	0	4	0
Total Permits Issued	**16**	**0**	**16**	**0**	**33**	**0**	**8**	**0**	**31**	**0**	**19**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None identified by the town					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
MGA Research	Commercial	1	13311 Main Street, 651.00-4-49.111	None	Planning submission
Bedford Greenhouses	Commercial	Multiple	5675 Buell Road, 61.00-2-4.1	None	In Phase 1 of development
Arrowhead Motel	Commercial	35	12292 Clarence Center Road, 46.00-4-49.1	½ Mile Buffer from HazMat Pipelines	Planning submission

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.34.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Newstead's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Newstead has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Newstead's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.34-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.34-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted by this event, the town did not report any damage
August 11-15, 2015	Flash Flood	No	Although the county was impacted by this event, the town did not report any damage
October 28-29, 2015	High Wind	No	Although the county was impacted by this event, the town did not report any damage
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted by this event, the town did not report any damage
November 12, 2015	High Wind	No	Although the county was impacted by this event, the town did not report any damage
November 18, 2015	High Wind	No	Although the county was impacted by this event, the town did not report any damage
January 11, 2017	High Wind	No	Although the county was impacted by this event, the town did not report any damage
March 8, 2017	High Wind	No	Although the county was impacted by this event, the town did not report any damage
March 13, 2017	Winter Storm	No	Although the county was impacted by this event, the town did not report any damage
July 20, 2017	Tornado	No	Although the county was impacted by this event, the town did not report any damage
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted by this event, the town did not report any damage
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted by this event, the town did not report any damage
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted by this event, the town did not report any damage
January 2, 2018	Blizzard	No	Although the county was impacted by this event, the town did not report any damage
October 6, 2018	Lightning	No	Although the county was impacted by this event, the town did not report any damage
February 24, 2019	High Wind	No	Although the county was impacted by this event, the town did not report any damage
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted by this event, the town did not report any damage
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted by this event, the town did not report any damage
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted by this event, the town did not report any damage
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted by this event, the town did not report any damage

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted by this event, the town did not report any damage
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted by this event, the town did not report any damage
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Newstead's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Newstead. The Town of Newstead has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated that the Flood hazard risk ranking should be increased from Low to Medium.

Table 9.34-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Low	Medium	Medium	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.34-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None identified.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the Town of Newstead's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Newstead has identified the following vulnerabilities within their community:

- Spring / Fall flooding is regular in area of Cedar Street and Koepsel Road located in Zone A. and Burdick Road, Fletcher Road, Tonawanda Creek Road, and Kelkenberg Road in Zone B.
- Culverts and storm water channels become blocked with debris and contribute to flooding.
- The Tonawanda Creek is eroding the roadway at Bruning Road which results in need for regular repair.
- The Pohl Road Bridge has sustained damage from storm debris impacts.
- Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.
- The Montgomery Marsh Dam is in the 0.2 percent floodplain.
- The town lacks a stockpile of sand piles, sandbags, dyke and plug material.
- Certain residential properties have flooded multiple times.
- Floodplain Management ordinances may not be consistent with FIRMs.
- Use of Geographic Information Systems could benefit the town's flood management efforts.
- The town was unable to identify permanent housing locations.

9.34.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.34-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Installation of backup generator at town of Newstead/Village of Akron joint DPW facility. (joint project between town and village - Town of Newstead to be lead agency)	Power Outage/ Storms	Will mitigate impact of severe storms and Disaster-related power outages by allowing Continuity of operations for DPW services and Response in town of Newstead/Village of Akron	Town Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Generator is in place and functional, just minor security and landscaping items remain to be finished.
	Open storm water channels and culverts and rremove debris from key drainage waterways to aaccommodate storm water/flooding	Flooding	Will mitigate the effects of flooding and high-water events	Town Hwy Dept	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Erosion mitigation Tonawanda Creek at Bruning Rd. – take action to stop	Flooding	Encroachment of creek to roadway; mitigate Eroding soils and undermining of road bed and threat to roadway	Town Board	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Pohl Rd Bridge improvements. Abutment strengthening, improve drainage capacity, mitigate bridge damage from debris	Flooding	Not Identified	Town Board	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	GIS system expansion – additional data layers and increased training to FD's. Increase training efforts to fire depts to allow maximum use of	HAZMAT/ Multi-Hazard	Will help to improve operational efficiency during disaster events and thus mitigate effects of disaster	GIS Dept	In Progress	Cost Level of Protection Damages Avoided;		1. Include in 2022 HMP 2. 3.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	system for emergency planning					Evidence of Success		
	Develop modest stockpile/easy access to sand piles, sandbags, dyke/plug materials at joint DPW facility; joint project with Village of Akron, Town Newstead to be lead	HAZMAT/ Flooding/ Storm	Will mitigate effects of future hazmat/flooding events by having supplies readily at hand and accessible to both municipalities to stop damage during disaster events	Hwy Dept	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Develop modern and efficient salt storage facility at joint DPW facility. Joint project with Village of Akron, Town of Newstead lead	Winter Storm	Will mitigate effects of future winter storms by allowing de-icing materials to be readily accessible and available to DPW	Town Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Project completed.
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Not Identified	Building Dept	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. Currently reviewing FEMA regulation requirements 3.
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Building Dept	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. Update to most recent FIRMS 3.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Newstead participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.34-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X	-	-	-	-	-	-	-	X
Cyber Attack	X	X	-	-	-	-	-	-	-	X
Earthquake	X	X	-	-	-	-	-	-	-	X
Expansive Soils	X	X	-	-	-	-	-	-	-	X
Extreme Temperature	X	X	-	-	-	-	-	-	-	X
Flood	X	X	X		X	X		X		X
Hazardous Materials	X	X	-	-	-	-	-	-	-	X
Landslide	X	X	-	-	-	-	-	-	-	X
Pandemic	X	X	-	-	-	-	-	-	-	X
Severe Storm	X	X	-	-	-	-	-	-	-	X
Severe Winter Storm	X	X	-	-	-	X	-	-	-	X
Wildfire	X	X	-	-	-	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.34-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Newstead would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.34-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.34-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Anticipated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Newstead-001	Open storm water channels and culverts and remove debris from key drainage waterways to accommodate storm water/flooding	1	Flood, Severe Storm	**Problem**: Culverts and storm water channels become blocked with debris and contribute to flooding. Affected roads include Tonawanda Creek Road, Burdick Road, Koepsel Road, Martin Road, Cedar Street, Berghorn Road, Brackett Road, Bruning Road and Brucker Road. **Solution**: Remove debris from key drainage floodways to accommodate storm water surges.	No	No	1 year	Town Highway Department	Staff time	Reduce flooding hazard	Municipal budget	High	SIP	SP
2022-Town of Newstead-002	Mitigate erosion along Tonawanda Creek at Bruning Road	2	Flood	**Problem**: The Tonawanda Creek is eroding the roadway at Bruning Road which results in need for regular repair. **Solution**: Complete an engineering study. Design and install flood mitigation at this location. Such measures could include rip rap installation, floodwalls, and other measures.	No	No	2 years	Town Highway Department	Pending Engineering analysis	Reduce flooding and protect travel along Bruning Road	FEMA, HMGP, BRIC	High	NSP	NR

				Solution: Town Highway Department will conduct an analysis to determine the best methods, including log removal, to reduce flooding form the stream.										

Notes:
Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:
The time required for completion of the project upon implementation

Cost:
The estimated cost for implementation.

Benefits:
A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:
Yes *Critical Facility located in 1% floodplain*

Mitigation Category:
- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.34.9 Action Worksheets

The following action worksheets have been developed by the Town of Newstead to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Newstead Action Worksheet			
Project Name:	Protect Emergency Management from utility failure		
Project Number:	2022-Town of Newstead-006		
Risk / Vulnerability			
Hazard(s) of Concern:	Utility Failure, All Hazards		
Description of the Problem:	The new Emergency Management Office at 50 John Street lacks backup power and is vulnerable to power failure.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town will assess the cost and determine the proper size of a backup generator for the Emergency Management facility. The Highway Department will install the generator and necessary electrical components and be responsible for maintenance.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect against utility failure	**Estimated Benefits (losses avoided):**	Ensures continuity of operations at the town's municipal emergency management facility
Useful Life:	~20 Years	**Goals Met:**	1
Estimated Cost:	~$50,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	Within 3 years	**Potential Funding Sources:**	FEMA HMGP and PDM, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Town Emergency Management	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Potential loss of services from this critical facility
	Construct a solar farm	Very High	Prohibitively expensive
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 73-Section-9.34-Newstead-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect Emergency Management from utility failure	
Project Number:	2022-Town of Newstead-006	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will protect critical services provided at this facility
Property Protection	1	Project will protect the emergency management office
Cost-Effectiveness	1	
Technical	1	
Political	0	
Legal	1	The town the has legal authority to complete the project.
Fiscal	1	Project requires funding support
Environmental	1

Town of Newstead Action Worksheet			
Project Name:	Develop stockpile of sand piles, sandbags, dyke and plug material at joint DPW facility. Joint project with Village of Akron		
Project Number:	2022-Town of Newstead-007		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, HazMat		
Description of the Problem:	Danger of hazmat spills and flooding throughout the town. Need to contain water and hazard materials. Share stockpile with Village of Akron		
Action or Project Intended for Implementation			
Description of the Solution:	Stockpile sand piles, bags, and associated equipment. Share cost and maintenance and access to material with Village Akron.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect against damage from flooding and HazMat leaks	**Estimated Benefits (losses avoided):**	Ensures protection of life and property during hazard events
Useful Life:	Ongoing program once established	**Goals Met:**	1
Estimated Cost:	$100,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	Within 1 year	**Potential Funding Sources:**	Town Budget, EMPG
Responsible Organization:	Town Emergency Management, and Village of Akron Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Potential loss of services from this critical facility
	Remove all property from hazard exposure areas	Very High	Prohibitively expensive
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

9.35 Town of North Collins

This section presents the jurisdictional annex for the Town of North Collins. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of North Collins's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.35.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of North Collins's hazard mitigation plan primary and alternate points of contact. The Town of North Collins followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments. The Town Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.35-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: John M. Tobia, Town Supervisor Address:10569 Main St., North Collins, NY 14111 Phone Number: 716-337-3839 Email: jtobia@northcollinsny.org	Not Identified
NFIP Floodplain Administrator	
Name/Title: John M. Tobia, Town Supervisor Address:10569 Main St., North Collins, NY 14111 Phone Number: 716-337-3839 Email: jtobia@northcollinsny.org	

9.35.2 Municipal Profile

The Town of North Collins is in the south-central portion of Erie County. The town is approximately 43 square miles in size and contains the Village of North Collins. The town is bounded on the north by the Towns of Eden and Boston, on the east by the Town of Concord, to the south by the Town of Collins and on the west by the Town of Brant and the Cattaraugus Indian Reservation. North Collins was founded in 1852 as the "Town of Shirley", and was formed from the northern portion of the original Town of Collins. In 1853 the town adopted its current name and in incorporated in 1911. The village is the community's main settlement.

The first white settlers arrived in the area in 1809 and were primarily English Quakers from New England. The second wave of settlers arrived from Germany beginning about 1830. The third wave was mostly Italians, after 1900, from the City of Buffalo who came to work on town farms. The Town of North Collins is a predominantly rural community but improvements in transportation coupled with available, inexpensive land have drawn

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

residents seeking a rural lifestyle. Significant suburban residential development occurred in the town during the late 20th Century. (comp plan), U.S. Route 62 and NYS Routes 75 and 249 traverse the town. The south branch of Eighteen Mile Creek flows through the town on its way to Lake Erie (Town of North Collins website, accessed 2020).

According to the U.S. Census, the 2010 population for the Town of North Collins was 2,291. The estimated 2019 population was 2,130, a seven percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.2 percent of the population is 5 years of age or younger and 15.1 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.35.3 Jurisdictional Capability Assessment and Integration

The Town of North Collins performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.35.3). The Town of North Collins's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of North Collins. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.35-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 114	Local	Code Enforcement
Comment: NYS Uniform and Energy Code 2020; The purpose of this chapter is to provide for the removal or repair of buildings in business, industrial and residential sections of the Town of North Collins that, from any cause, may now be or shall hereafter become dangerous or unsafe to the public, and which continue in violation of the Town Code and to also provide for a means of abatement and enforcement of Town Law regarding continuing violations of the Town Code.					
Zoning Code	Yes	Yes	Chapter 265	Local	Zoning Board
Comment: A comprehensive zoning plan is hereby established for the area of the Town of North Collins outside the incorporated area of the Village of North Collins by dividing the territory thereof into certain districts and prescribing regulations for buildings or other structures and the use of land therein. The comprehensive zoning plan set forth in the text and map which constitute this chapter is adopted in order to

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
promote and protect the public health, safety, comfort, convenience and prosperity and other aspects of the general welfare. These general goals include, among others, the following specific purposes: to provide for adequate light, air and convenience of access; to prevent undue concentration of population and overcrowding of land; to lessen congestion in the streets; to secure safety from fire, flood, panic and other dangers; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements. The comprehensive zoning plan also gives consideration to the recommendations contained in the Master Plan for the Town of North Collins prepared in 1969.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of North Collins to oversee and track development.

Table 9.35-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning/Zoning/Town Boards
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Town has land adjacent to park that could be used for housing/other projects

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of North Collins and their current responsibilities which contribute to hazard mitigation.

Table 9.35-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	-Meetings are scheduled by the request of the Town Board.
Zoning Board of Adjustments	Yes	Board Meetings are scheduled by request of the petitioner.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	-
Construction/Building/Code Enforcement Department	Yes	Code Enforcement is responsible for permitting, zoning, and site plans.
Emergency Management/Public Safety Department	Yes	-
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Not indicated
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	-

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Engineers or professionals trained in building or infrastructure construction practices	Yes	Code Enforcement
Planners or engineers with an understanding of natural hazards	Yes	Code Enforcement
Staff with expertise or training in benefit/cost analysis	Yes	Code Enforcement
Professionals trained in conducting damage assessments	Yes	Code Enforcement
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	Yes	-
Grant writer(s)	Yes	-
Resilience Officer	No	-
Other	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of North Collins.

Table 9.35-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of North Collins.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.35-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Clerk
Personnel skilled or trained in website development	Yes	Town Clerk
Hazard mitigation information available on your website	Yes	http://www.northcollinsny.org/default.html
Social media for hazard mitigation education and outreach	Yes	Facebook
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Planning and Zoning Boards
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Code Red
Natural disaster/safety programs in place for schools	Yes	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of North Collins.

Table 9.35-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:

NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.35-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.35.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

John Tobia, Town Supervisor

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of North Collins.

Table 9.35-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of North Collins	0	0	$0	0	0

Source: *FEMA, 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

The Town of North Collins has identified the New Oregon Park as being vulnerable to flooding, and that flood hazard maps adequately address the flood risk within the jurisdiction. There have been no previous Substantial Damage determinations within the village, nor any RiskMAP projects. The town does not maintain a lost of property owners interested in flood mitigation, due to low risk.

NFIP Compliance

The Town does not participate in the NFIP.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.35.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of North Collins has identified the following routes and procedures to evacuate residents prior to and during an event.

- Code Red is sounded to all residents giving directions for routes and shelters, specific to each event. The town also uses social media to reach residents.

Sheltering

The Town of North Collins has identified the following designated emergency shelters within the town.

Table 9.35-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	Gowanda State Rd	100	No	Yes	No	None	Shelter/Kitchen
Langford Fire Dept.	Langford Rd	125	No	Yes	Yes	EMT	Food/Shelter
Town Hall	Gowanda State Rd	125	No	Yes	No	Sheriff/EMT	Shelter/Water

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of North Collins has identified the following sites suitable for placing temporary housing units.

Table 9.35-11. Temporary Housing Locations

Site Name	Site Address	Infrastructure /Utilities Available	Capacity (number of sites)	Type	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Fricano Park	Gowanda State Road	Yes	800	Park Grounds	Will need toilet facilities to accommodate big crowd
Langford Park	Langford Road	Water/electric	300	Park Grounds	Will need toilet facilities to accommodate big crowd
Tractor Pull Area	Sission Highway	Water/electric	500	Park Grounds	Will need toilet facilities to accommodate big crowd

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

requirements and floodplain laws. The Town of North Collins has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.35-12. Permanent Housing Locations

Site Name	Site Address	Infrastructure /Utilities Available	Capacity (number of sites)	Type	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Fricano Park area	Gowanda State Road	Nearby	30	Vacant unused park land	Everything would need to be brought to code

9.35.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.35-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.35-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

None Identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.35.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of North Collins's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

using mapping techniques and technologies and for which the Town of North Collins has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of North Collins's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.35-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.35-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the town did not report damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the town did not report damages.
November 12, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
November 18, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
January 11, 2017	High Wind	No	Although the county was impacted, the town did not report damages.
March 8, 2017	High Wind	No	Although the county was impacted, the town did not report damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the town did not report damages.
July 20, 2017	Tornado	No	Although the county was impacted, the town did not report damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the town did not report damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the town did not report damages.
October 6, 2018	Lightning	No	Although the county was impacted, the town did not report damages.
February 24, 2019	High Wind	No	Although the county was impacted, the town did not report damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
October 27-November 1, 2019	Lakeshore Flooding High Wind DR-4472 NY	Yes	No

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
February 2020	COVID-19	Yes	Multiple ongoing costs to town - PPE

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of North Collins's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of North Collins. The Town of North Collins has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town agreed that the calculated rankings accurately reflected the risk posed to the community

Table 9.35-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.35-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None Identified						

Source: FEMA DFIRM

Identified Issues

After review of the Town of North Collins's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of North Collins has identified the following vulnerabilities within their community:

- Town Hall and Evacuation Center (Senior Center) do not have backup power.
- New Oregon Road area experiences flooding issues.
- The town now has a water district and any power outages or flooding could cause problems.

9.35.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.35-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Storm water management to reduce the damage to the North East corner of North Collins Village. Diversion of stormwater in conjunction with village storm sewer repair.	Runoff Flooding	DPW	Not Identified	No Progress	Cost	-	1. Include in the 2022 HMP as 2022-T. North Collins-001. 2. The existing storm drainage system is inadequate for the needs of the town and village. 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of North Collins has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of North Collins participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.35-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X								X
Cyber Attack		X								X
Earthquake		X								X
Expansive Soils		X								X
Extreme Temperature		X								X
Flood		X	X					X	X	X
Hazardous Materials		X								X
Landslide		X								X
Pandemic		X								X
Severe Storm		X								X
Severe Winter Storm		X								X
Utility Failure		X								X
Wildfire		X								X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.35-19 summarizes the comprehensive range of specific mitigation initiatives the Town of North Collins would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.35-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.35-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T. North Collins-001	Storm Drainage System Improvements	1, 2	Flood, Severe Storm, Severe Winter Storm	**Problem**: The existing storm drainage system is inadequate for the needs of the town and village. **Solution**: The village and town are currently seeking CDBG funding to increase the storm drainage system within the village. As part of this project, the village will install storm drains along Railroad Ave between Harrison and Sherman Avenues. These drains will improve runoff and stormwater drainage, and reduce impacts of storms on the properties along Railroad Ave.	No	No	Short	Village of North Collins and Town of North Collins	High	High, property protections and reduces flooding and erosion	CDBG	High	SIP, NSP	SP, NR
2022-T. North Collins-002	Town Hall and Senior Center Generators	1, 2	All Hazards	**Problem**: The Town Hall and Evacuation Center (Senior Center) are critical facilities and do not have backup power. **Solution**: The Town of North Collins will seek funding to purchase and install automatic permanent generators at these facilities to ensure continuity of operations of government and life safety and use of the evacuation center. The town will ensure that both generators are installed outside of increased areas for additional hazard impacts (outside of floodprone areas, covered from storm impacts, etc.).	Yes	No	Short	Town of North Collins	High, estimated $75,000/ generator	High, ensures continual operations of government and life safety	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget	High	SIP	ES

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.35.9 Action Worksheets

The following action worksheets have been developed by the Town of North Collins to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 74-Section-9.35-North-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Storm Drainage System Improvements		
Project Number:	2022-T. North Collins-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The existing storm drainage system is inadequate for the needs of the Town and Village.		
Action or Project Intended for Implementation			
Description of the Solution:	The village and town are currently seeking CDBG funding to increase the storm drainage system within the village. As part of this project, the village will install storm drains along Railroad Ave between Harrison and Sherman Avenues. These drains will improve runoff and stormwater drainage, and reduce impacts of storms on the properties along Railroad Ave.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, property protections and reduces flooding and erosion
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	SIP, NSP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	As soon as funding is available
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	CDBG
Responsible Organization:	Village of North Collins and Town of North Collins	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadway	$500,000	Costly and may not solve problem
	Install sump pumps	$500,000	May not fully solve problem, needs to cover large area, not feasible

9.36 Village of North Collins

This section presents the jurisdictional annex for the Village of North Collins. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of North Collins's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.36.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of North Collins's hazard mitigation plan primary and alternate points of contact. The Village of North Collins followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: The Mayor's office, Clerk/Treasurer, and Department of Public Works. The Mayor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.36-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Vincent George, Mayor Address: 10543 Main St., PO Box 459, North Collins, NY Phone Number: 716-570-5992 Email: NCMayor2020@gmail.com	Name/Title: Jan Hutchinson, Clerk/Treasurer Address: 10543 Main St., PO Box 459, North Collins, NY Phone Number: 716-337-3160 Email: VillageClerk@VillageofNorthCollins.org
NFIP Floodplain Administrator	
Name/Title: Michael W. Perry, DPW Supervisor Address: 10543 Main St., PO Box 459, North Collins, NY Phone Number: 716-570-5991 Email: NCDPW@Yahoo.com	

9.36.2 Municipal Profile

The Village of North Collins is in the southwest portion of Erie County approximately 22 miles south of downtown Buffalo. The village is surrounded by the Town of North Collins to the north, east, and south and by the Town of Brant to the west. The village is 0.8 square miles (comp plan) in size. Big Sister Creek passes very close to the village border. US Route 62 and 249 traverse the town. The community was formerly known as "Rose's Corners" and "Kerr's Corners" (Village of North Collins, 2020).

According to the U.S. Census, the 2010 population for the Village of North Collins was 1,232. The estimated 2019 population was 2,130, a 72.8 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 8.2 percent of the population is 5 years of age or younger and 12.8

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.36.3 Jurisdictional Capability Assessment and Integration

The Village of North Collins performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.36.3). The Village of North Collins's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of North Collins. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.36-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Article II: Chapter 62	Local	Code Enforcement
Comment: NYS Uniform and Energy Code 2020; The Uniform Fire Prevention and Building Code of the State of New York shall be applicable in the Village of North Collins.					
Zoning Code	Yes	Yes	Article VIII: Section 181-51	Local	Board of Trustees
Comment: Pursuant to the authority conferred by Article 7 of the Village Law of the State of New York and for each of the purposes specified therein, the Village Board of the Village of North Collins, County of Erie and State of New York, has ordained and does hereby enact the following chapter, regulating and restricting the location, size and use of buildings and other structures and the use of land in the Village of North Collins.					
Subdivision Ordinance	Yes	Yes	Article II: Chapter 154	Local	Board of Trustees
Comment: The purpose of subdivision regulations in the Village of North Collins is to: • Enable the Planning Board to implement its authority and power to approve subdivision plats in the public interest. • Achieve the orderly, efficient and economical development of the village through subdivision. • Promote development in accordance with the Master Plan of the Village of North Collins. • D. Promote and protect the health, safety and welfare of the entire community.					
Stormwater Management Ordinance	Yes	Yes	Article V: Section 103-28	Local	Code Enforcement

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: Storm drainage provisions: • Roofs and paved areas, including yards and courts, shall be drained. Storm drainage shall be conveyed to an adequate and approved system of stormwater disposal, where available. Storm drains shall be discharged in such manner that water will not flow onto sidewalks. • Where a drainage system may be subject to backwater, suitable provision shall be made to prevent its overflow into the building. • Leaders and gutters, if used, shall be constructed of noncombustible material. • Where storm drainage is interrupted by altering the ground level or contour or by any other means, adequate drainage must be provided to prevent flooding or an unnecessary accumulation of surface water, either up or down stream from the altered site.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	Article I: Chapter 26-2	Local	Board of Trustees
Comment: The Planning Board is hereby authorized and empowered to approve plats showing lots, blocks or sites, with or without streets or highways, and to pass and approve the development of plats already filed in the office of the Clerk of the county if such plats are entirely or partially undeveloped.

Development and Permitting Capability

The table below summarizes the capabilities of the Village of North Collins to oversee and track development.

Table 9.36-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	-

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Farmland purchased by developer to either subdivide or build apartment buildings

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of North Collins and their current responsibilities which contribute to hazard mitigation.

Table 9.36-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Joint Planning Board
Zoning Board of Adjustments	Yes	Zoning Board of Appeals
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Village DPW. Duties and services include: paving; plowing, streets and sidewalks; highway maintenance; brush and leaf pickup; and taking care of water system.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement/Building Inspector. Duties and services include providing information and enforcement of village codes and issuing building permits.
Emergency Management/Public Safety Department	Yes	Emergency Manager
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED; outside Fire Alarm
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Managed by DPW
Mutual aid agreements	Yes	With Fire, Police, etc.
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	Yes	One emergency manager
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of North Collins.

Table 9.36-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes; Clerk/Board of Trustees
Capital improvements project funding	Yes; Clerk/Board of Trustees
Authority to levy taxes for specific purposes	Yes, Board of Trustees
User fees for water, sewer, gas or electric service	Yes, Board of Trustees
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes, Clerk/Mayor
Incur debt through special tax bonds	Yes, Clerk/Mayor
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes, Clerk/Board of Trustees
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of North Collins.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.36-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Information available through Mayor and Clerk.
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	CodeRED and the outdoor fire siren
Natural disaster/safety programs in place for schools	Yes	Regular drills done at both schools.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of North Collins.

Table 9.36-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:

N/A *Not applicable*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2014). In other words, it describes a jurisdiction’s current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction’s rating.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.36-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.36.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael W. Perry, DPW Supervisor

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of North Collins.

Table 9.36-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of North Collins	0	0	$0	0	0

Source: *FEMA, 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The Village of North Collins is not participating in the NFIP Program. Flood risk to the village is minimal.

NFIP Compliance

Not applicable.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.36.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of North Collins has indicated that evacuation routes are specific to hazard event and routes will vary according to the location and type of event.

Sheltering

The Village of North Collins has identified the following designated emergency shelters within the Village.

Table 9.36-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None identified. The village will work with the county to identify and designate an Emergency Shelter. See Mitigation Action 2022-V. North Collins-#001							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of North Collins has identified the following sites suitable for placing temporary housing units.

Table 9.36-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-V. North Collins-#002					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of North Collins has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.36-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-V. North Collins-#002					

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.36.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.36-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.36-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	0	-	0	-	0	-	0	-	2	0	1	0
Multi-Family	0	-	0	-	0	-	0	-	0	-	0	-
Other (commercial, mixed-use, etc.)	0	-	2	0	1	0	0	-	2	0	0	-
Total Permits Issued	**0**	**0**	**2**	**0**	**1**	**0**	**0**	**0**	**4**	**0**	**1**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Timberbuilt	Commercial	2	Eagle Drive	SFHA, NEHRP Soil Class D and E Hazard Area, Wildland-Urban Interface Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, ½ Mile Buffer from HazMat Pipelines	Rebuilt and Expanded with new building
Tractor Supply	Commercial	1	Main Street	None	Demo existing building and rebuild new
Best Self Behavioral Health	Commercial	2	Spruce Street	Wildland-Urban Intermix Hazard Area, NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, ½ Mile Buffer from HazMat Pipelines, Expansive Soils Hazard Area	Remodeled and expanded w/ engineering
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
Cricket Meadows	Residential	1 or 2	Langford Rd	Possible flood or landslide areas due to no engineering consult	Possible apartment buildings
Subdivision of home lots	Residential	Up to 6	Langford Rd – upper	None	Housing Subdivision

SFHA *Special Flood Hazard Area (1% flood event)*

** Only location-specific hazard zones or vulnerabilities identified.*

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.36.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of North Collins's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of North Collins has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of North Collins's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.36-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.36-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	-
August 11-15, 2015	Flash Flood	No	-
October 28-29, 2015	High Wind	No	-
November 6, 2015	Thunderstorm Wind	No	-
November 12, 2015	High Wind	No	-
November 18, 2015	High Wind	No	-
January 11, 2017	High Wind	No	-
March 8, 2017	High Wind	No	Yes, flagpole broken from wind = $750
March 13, 2017	Winter Storm	No	-
July 20, 2017	Tornado	No	-
August 4, 2017	Thunderstorm Wind	No	-
December 10-15, 2017	Lake-effect Snow	No	-
December 24-29, 2017	Lake-effect Snow	No	-
January 2, 2018	Blizzard	No	-
October 6, 2018	Lightning	No	-
February 24, 2019	High Wind	No	-

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of North Collins's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of North Collins. The Village of North Collins has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village agreed that the calculated rankings accurately reflected the risk posed to the community.

Table 9.36-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.36-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None identified

Identified Issues

After review of the Village of North Collins's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of North Collins has identified the following vulnerabilities within their community:

- Back yard flooding of residents inside the block of Sherman Ave (Route 249), Park Avenue, Harrison Avenue, and Railroad Avenue.
- Culvert replacement and redirection of creek on Gurney Avenue (eroding into the foundation of the house next door). See Mitigation Action 2022-V. North Collins-003.
- 3 Sisters Creek realignment or erosion prevention needed in residential backyards inside the block of Main Street, Kimble Avenue, Elm Street, and Southside Avenue. See Mitigation Action 2022-V. North Collins-004.
- Reported incidents of excessive flooding between Southside Avenue and Franklin Avenue.
- Dead trees resting in Right-of-way on wires along Main Street (across from Franklin Avenue)
- Storm drains needed along the portion of Railroad Avenue between Harrison Avenue and Sherman Avenue. See Mitigation Action 2022-V. North Collins-005.

9.36.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.36-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Replacement and enlargement of existing storm sewer system	Runoff, Flooding	DPW	Flooding	No Progress	Cost	-	1. Include in 2022 HMP. 2. See Mitigation Action 2022-V. North Collins-005 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of North Collins has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of North Collins participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.36-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X						X			X
Cyber Attack	X						X			X
Earthquake	X						X			X
Expansive Soils	X						X			X
Extreme Temperature	X						X			X
Flood	X	X	X				X	X	X	X
Hazardous Materials	X						X			X
Landslide	X						X			X
Pandemic	X						X			X
Severe Storm	X	X	X				X	X	X	X
Severe Winter Storm	X	X	X				X	X	X	X
Utility Failure	X						X			X
Wildfire	X						X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.36-19 summarizes the comprehensive range of specific mitigation initiatives the Village of North Collins would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.36-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Table 9.36-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-V. North Collins-001	Emergency Shelter	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022-V. North Collins-002	Temporary and Permanent Housing	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022-V. North Collins-003	Gurney Ave Culvert Replacement	1	1	1	1	1	0	-1	0	1	1	1	1	1	0	9	High
2022-V. North Collins-004	Three Sisters Creek Stabilization	1	1	1	1	1	0	-1	0	1	1	1	1	1	0	9	High

9.36.9 Action Worksheets

The following action worksheets have been developed by the Village of North Collins to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 75-Section-9.36-North-Collins-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Gurney Ave Culvert Replacement		
Project Number:	2022-V. North Collins-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	Severe storms and flooding have exacerbated erosion along Gurney Avenue, destroying the foundation of homes along the creek.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will seek funding to upsize and replace the culvert on Gurney Avenue to increase flow of water away from the homes and reduce flooding. If deemed necessary by engineering, the village will employ green infrastructure improvements to the area to stabilize the creek bed to further eliminate erosion and property destructions.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, property protections
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	Estimated $50,000/culvert	**Mitigation Action Type:**	Structure and Infrastructure Projects, Natural Systems Protection
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	ASAP dependent on funding
Estimated Time Required for Project Implementation:	6 months	**Potential Funding Sources:**	HMGP
Responsible Organization:	Village of North Collins DPW, Engineering	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadway	$500,000	Costly and may not solve problem
	Relocate roadway	N/A	Not possible

9.37 Town of Orchard Park

This section presents the jurisdictional annex for the Town of Orchard Park. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Orchard Park's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.37.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Orchard Park's hazard mitigation plan primary and alternate points of contact. The Town of Orchard Park followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Emergency Manager, Building Inspector, Town Engineer, Code Enforcement, and Town Supervisor. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.37-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Rich Mrugalski/ Emergency Manager Address: 4295 S. Buffalo Street, Orchard Park, New York 14127 Phone Number: 716-545-0557 Email: mrugalskir@orchardparkny.org	Name/Title: Wayne Bieler/ Town Engineer Address: 4295 S. Buffalo Street, Orchard Park, New York 14127 Phone Number: 716-662-6425 Email: bielerw@orchardparkny.org
NFIP Floodplain Administrator	
Name/Title: Steve Bremer/ Building Inspector Address: 4295 S. Buffalo Street, Orchard Park, New York 14127 Phone Number: 716-662-6430 Email: breners@orchardparkny.org	

9.37.2 Municipal Profile

In 1850, the Town of Orchard Park was formed from the original Town of Hamburg. It is 39 square miles and is one of the county's "South Towns". The separate Village of Orchard Park is entirely contained within the town. US Routes 20 and 219 pass through the town.

The first settlers in the area arrived in 1803, mainly Quaker families established farmsteads in the town's southwest corner. German families later settled south of the village area. As the community grew, links with neighboring communities improved. Some dirt roads became plank roads in the 1840s, and were gradually upgraded to stone, macadam, and brick as transportation technology changed. A railroad was extended to Orchard Park in 1883. In 1900, an electric trolley line began running between Buffalo and the town but was abandoned in 1932, with the advent of buses and automobiles. Orchard Park experienced significant residential

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

suburban development in the latter half of the 20th century. The South Buffalo residents of Irish heritage were the first to arrive and the town generally became a bedroom community of Buffalo. (Town of Orchard Park 2020) The building of Rich Stadium, now New Era Field, as the home of the Buffalo Bills football team, was a defining development within the town. (Town of Orchard Park 2007)

According to the U.S. Census, the 2010 population for the Town of Orchard Park was 25,808. The estimated 2019 population was 26,361, a 2.1 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.9 percent of the population is 5 years of age or younger and 22.2 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.37.3 Jurisdictional Capability Assessment and Integration

The Town of Orchard Park performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.37.3). The Town of Orchard Park's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Orchard Park. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.37-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 45 Building Construction, Adopted 1970	Local	Building Inspectors Department
Comment: *This article provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Town of Orchard Park. This article is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this article, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this article.*					
Zoning Code	Yes	No	Chapter 144 Zoning, Adopted 1985	Local	Building Inspectors Department and Planning Department

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: *Adopted by the Town Board of the Town of Orchard Park 5-15-1985. Such regulations shall be made in accordance with the general plan and designed to lessen congestion in the streets; to secure safety from fires, flood, panic, and other dangers; to promote the health and general welfare; to provide adequate light and air; to prevent overcrowding of land; to facilitate the provision of transportation, water, sewerage, schools, parks, and other public requirements. Such regulations shall be made with reasonable consideration, among other things, to the characteristics of the district and its peculiarities for particular uses and with a view to conserving the value of buildings and encouraging the most appropriate use of land throughout the town.*					
Subdivision Ordinance	Yes	No	Chapter 121 Subdivision, Adopted 1958	Local	Building Inspectors Department, Engineering Department and Planning Department
Comment: *Site plan procedures include: 1) Sketch plan to include data showing how development may impact an adjoining property, the availability of utilities, the effect on drainage systems, natural watercourses, and other environmental concerns. 2) Where a subdivision or open development area is traversed by a watercourse, drainageway, channel or stream, there shall be provided a stormwater easement or drainage right-of-way conforming substantially to the lines of such watercourse and such further width or construction, or both, as will be adequate for the purpose. 3) Land subject to flooding shall not be platted for residential occupancy nor for such other uses as may increase danger to life or property or aggravate the flood hazard. 4) Surface water retention facilities shall be developed where required in order that the rate of stormwater runoff after construction is no greater than the rate of runoff prior to construction.*					
Stormwater Management Ordinance	Yes	Yes – for county	Chapter 119A & 119B Storm Sewer and Stormwater Management & Erosion Control, Adopted 2007	Local	Engineering Department and Building Inspectors Department
Comment: *The purpose of this chapter and Chapter 144, Article XII, is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 119B-1 hereof. This chapter and Chapter 144, Article XII, seek to meet those purposes by achieving the following objectives:* *A. Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* *B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01, or as amended or revised;* *C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* *D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* *E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* *F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.* *The ordinance includes but is not limited to the following guidelines: 1) At a minimum, a development's site map should show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s); wetlands and drainage patterns that could be affected by the land development activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and the location(s) of the stormwater discharge(s). 2) A description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in stormwater runoff.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Site Plan Review	Yes	Yes	Chapter 45; Building Construction Adopted 1970.	Local	Planning Department, Building Inspectors Department and Engineering Department
Comment: *The Town uses a subdivision plan review and a commercial plan review process:* *1) An applicant's site plan will include the following: legal data, impact on the environs, natural features, existing man-made features, proposed development, impact on stormwater pollution, and other information or materials. If a stormwater pollution prevention plan (SWPPP) is submitted pursuant to § 95-4B(6) of this chapter, such SWPPP shall be considered by the Town Board, Planning Board and others as part of an analysis of an applicant's site plan, and the site plan and SWPPP shall not be approved unless they comply with the performance and design criteria and standards in Chapter 96, Stormwater Management, of the Code. 2) Topographical features, including a map showing existing contour intervals of no more than five feet. Two-foot contour intervals will be required if the topography is relatively flat. Areas of steep slopes should be delineated as necessary. 3) Hydrologic features, which should include drainage and natural runoff patterns, flood zones, noted wetlands, vegetative cover and average depth to groundwater.*				
Environmental Protection Ordinance	No	Yes	Chapter 144 – Zoning. Adopted by the Town Board of the Town of Orchard Park 5-15-1985.		
Comment: *The Town does not have dedicated ordinance put parts of environmental protection are found in the zoning and stormwater prevention ordinances. The intent is to enforce environmental compliance through zoning.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 66 (Flood Damage Prevention); adopted 5/1/2019	Local	Building Inspector
Comment: *The Orchard Park Town Building Inspector is hereby appointed local administrator to administer and implement this chapter by granting or denying floodplain development permits in accordance with its provisions.* *It is the purpose of this chapter to promote the public health, safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* F. *Qualify for and maintain participation in the National Flood Insurance Program.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 119A, Stormwater Management Erosion & Sediment Control, Adopted 2007	Local	Stormwater Management Officer
Comment: *The purpose of this chapter and Chapter 144, Article XII, is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 119B-1 hereof. This chapter and Chapter 144, Article XII, seek to meet those purposes by achieving the following objectives:* *A. Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* *B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01, or as amended or revised;* *C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* *D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* *E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* F. *Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Orchard Park to oversee and track development.

Table 9.37-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Inspector, Engineering, Planning Departments, Town Board for Commercial Developments
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Building Inspector / Code Enforcement Department
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The process for controlling buildable land is handled through the Zoning Ordinance. No quantitative number are kept.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Orchard Park and their current responsibilities which contribute to hazard mitigation.

Table 9.37-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board, established in 1948 pursuant to New York State and Town Law, consists of seven members and one alternate appointed by the Town Board. The members serve for a seven-year term, with one members' term expiring annually, except for the alternate member who is appointed annually for a one-year term. The Planning Board reviews all development projects and subdivision developments which take place in the town, and makes recommendations on all commercial, industrial, and business development to the Town Board. The Planning Board has full approval authority, and binding jurisdictional authority regarding all residential subdivision developments, on which the Town Board may make recommendations. The Board is also charged with generating and reviewing proposed ordinances intended to become part of Orchard Park Town Law, review and recommendation on proposed zoning changes and review from time to time of existing zoning codes with recommendations for updating and appropriate changes. The Planning Board works closely with the Conservation Board, the Town Board, the Engineering Department, and the Planning Department.
Zoning Board of Appeals	Yes	The Zoning Board of Appeals was established in 1941 and is currently made up five members. The Zoning Board of Appeals hears and deliberates on cases from citizens seeking relief from the Town ordinances. Decisions by the Board are based on strict criteria defined by the State and may be appealed by court action. The Board can also advise the Town Board regarding zoning and development issues as they deem necessary. Lastly, the Zoning Board of Appeals has the authority to approve the location of cell towers as per Town of Orchard Park Code.
Planning Department	Yes	The role of the planning department includes but is not limited to developing planning documents, conducting analysis, and helping create a more sustainable and healthy community for all.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Mitigation Planning Committee	Yes	The Public Safety Committee is made up volunteers appointed each year by the Town Board. The Public Safety Committee works closely with law enforcement, fire departments, and other relevant agencies. The Orchard Park Police Captain acts in an advisory role and as liaison to the Town. Requests regarding the placement of stop signs, no parking restrictions, speed limits, traffic signals, intersections, traffic issues and other areas where public safety is a concern are referred to the Public Safety Committee for review and recommendations to the Town Board.
Conservation Board	Yes	The Conservation Board consists of seven members appointed by the Town Board. Each member serves for a two-year term, with three members' terms expiring in even years and four members' terms expiring in odd years. The function of the Conservation Board is to approve or deny submitted landscape plans and determine what is the required landscaping for Commercial projects. The board serves for the purpose of generating and reviewing proposed environmental ordinances intended to become part of Orchard Park Town Law, to review, amend, and approve required landscape plans submitted as part of required documents for business, commercial and industrial development projects, to review and recommend to the Town Board on requests for Conservation Easements. In the past this Board has completed an open space inventory, which was updated several years ago. It has researched and produced a Town Open Space Plan and has recently worked on the establishment of the Town Green Print.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	It is the mission of the Orchard Park Economic Development Committee to assist businesses to locate and expand in Orchard Park. In an effort to help promote Orchard Park to the commercial and industrial community, the OPEDC has compiled the following list of available commercial and industrial properties in Orchard Park for purchase, lease, or rent. For additional information on specific listings, please contact the respective company contact person.
Public Works/Highway Department	Yes	The Highway and Parks Department is responsible for services ranging from snowplowing and road repair to planting the flowers and trees in the town parks.
Construction/Building/Code Enforcement Department	Yes	Building Inspector/Code Enforcement Department – reviews building permits
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED Community Notification System and App
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department – snowplowing, road repairs
Mutual aid agreements	Yes	Town has a MA agreement with Erie County and through the Superintendent of Highways Association
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering Department and the Planning Department

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering Department and Building Inspectors Department
Planners or engineers with an understanding of natural hazards	Yes	Engineering Department
Staff with expertise or training in benefit/cost analysis	Yes	Engineering Department
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Town Building Inspector
Surveyor(s)	Yes	Engineering Department
Emergency Manager	Yes	Currently the Town does not have a designated department for this function; however, there is an emergency manager
Grant writer(s)	Yes	Town Board, On Call Basis
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Orchard Park.

Table 9.37-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Orchard Park.

Table 9.37-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	Has various information regarding preparedness for the community as well as guidance on what to do during and after an event.
Social media for hazard mitigation education and outreach	Yes	Has various information regarding preparedness for the community as well as guidance on what to do during and after an event.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	The Town uses CodeRed messaging system
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Orchard Park.

Table 9.37-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Class 4 - Areas with Hydrants, Class 8 - Areas without Hydrants	2019
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:

N/A *Not applicable*

NP *Not participating*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2014). In other words, it describes a jurisdiction’s current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.37-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	N/A
Cyber Attack	Moderate
Earthquake	Weak
Expansive Soils	Weak
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.37.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Steve Bremer, Building Inspector

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Orchard Park.

Table 9.37-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Orchard Park	20	14	$8,609	0	2

Source: FEMA 2020a, FEMA 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The town does not have a list of properties that have been damaged by flooding or those that are interested in flood mitigation. The town does not have any RiskMAP projects underway in the jurisdiction. The town has not identified any way they make substantial damage determination, nor do they have properties that are mitigated. The existing flood hazard maps adequately address flood risk within the town.

NFIP Compliance

The building inspector is in charge of floodplain management and the town engineer is a certified floodplain manager. The town does not have access to resources to determine the impacts of climate change. The town

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

would like to have training as needed for any changes that occur national flood plan standards for staff in the Building Inspectors Department and the Engineering Department. Additional training for Engineering Staff on modeling of flood plains would be useful. As the NFIP provides permit review, the town would need additional funding and staff to increase service capacity. The town does not have any outstanding violations and the municipality had a CAV on May 18, 2020.

The local law number for the flood damage prevention ordinance is Chapter 66, Flood Damage Prevention, Last update 2019. The existing program meets all requirements, and the town does use the planning process, subdivision review, commercial review, and stormwater Phase II program to reduce flooding. The town is not interested in participating in the FEMA CRS. The Orchard Park Town Building Inspector is appointed local administrator to administer and implement this chapter by granting or denying floodplain development permits in accordance with its provisions. The municipality has a freeboard of two feet.

9.37.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Orchard Park has identified the following routes and procedures to evacuate residents prior to and during an event: Route 20, Route 20A, Abbott Road, Route 179 (Milestrip Road), Route 219, Route 240/277, Baker Road, Jewett Holmwood Road, New Armor Duells Road, and Transit Road. In the event of an evacuation, the Orchard Park Police Department is tasked with directing traffic to the main evacuation routes within the Town and Village.

Sheltering

The Town of Orchard Park has identified the following designated emergency shelters within the town.

Table 9.37-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Orchard Park Community Activity Center	4520 California Road	100	Yes, not at site, can utilize Dog Control Facility	Yes	No	None	Warming and cooling station only
Orchard Park Middle School	60 S. Lincoln Ave	100	Yes, not at site, can utilize Dog Control Facility	Yes	Yes	None	Warming and cooling station only

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Orchard Park has identified the following sites suitable for placing temporary housing units.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.37-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Compost/Soccer Complex	6909 Milestrip Road	300,000 Sq. Ft. Available	Parkland	Yes	Yes, satisfied
Webster Road Vacant Land	Webster Road, SBL162.00-1-28.121	400,000 Sq. Ft. Available	Vacant Parkland	Yes	Yes, satisfied
Orchard Park Little League Baseball Parking Lot	Thorn Ave, SBL 172.11-1-3.11	52,000 Sq. Ft. Available	Parking Lot	Yes	Yes, satisfied
Brush Mountain Park	4520 California Road	200,000 Sq. Ft. Available	Parkland	Yes	Yes, satisfied

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Orchard Park has not identified any permanent housing locations.

Table 9.37-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified – mitigation action number 009					

9.37.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.37-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.37-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	68	0	57	0	55	0	49	0	40	0	33	0
Multi-Family	2	0		0		0	3	0	10	0	8	0
Other (commercial, mixed-use, etc.)	5	0	3	0	2	0	5	0	7	0	1	0
Total Permits Issued	75	0	60	0	57	0	57	0	57	0	42	0

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Riley Meadows West	Residential	29 Homes	Murphy Road	None	One phase remaining to be constructed
Pleasant Acres West	Residential	18 Homes	New Taylor Road	0.2-percent Annual Chance Flood Event Hazard Area, Wildland-Urban Intermix Hazard Area, Steep Slopes (Greater Than 25% Grade) Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines	Last two phase under construction

Williamsburg Subdivision	Residential	16 Lots	Diller Drive	None	Review Submission

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.37.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.3 (Hazard Ranking) for a detailed summary for the Town of Orchard Park's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Orchard Park has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Orchard Park's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.37-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.37-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden, and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a	Although the County was impacted, the town did not report damages

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma, and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low-pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia, and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the town did not report damages

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	Although the County was impacted, the town did not report damages
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Yes, a few homes were damaged, and one garage had its roof torn off. No dollar damage was assessed to the Town.
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher-than-normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of	Although the County was impacted, the town did not report damages

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3–5-hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the town did not report damages
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the town did not report damages

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.4 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Orchard Park's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Orchard Park. The Town of Orchard Park has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

- Expansive soils have not been an issue for the town and thus will be re ranked as medium to low.
- Hazardous materials travel through the town which pose threat to community members and will be re ranked from low to medium.
- Wildfires have not been a significant threat so will be marked from high to medium.

Table 9.37-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Medium

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.37-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	**0.2% Event**	
Green Lake Dam	Dam	Yes	Yes	007

Source: GIS 2021

Identified Issues

After review of the Town of Orchard Park's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Orchard Park has identified the following vulnerabilities within their community:

- Only a portion of the main highway building can be run with the current generator and the sewer building does not have a generator. The facility is critical for municipal operation and the building needs power at all times to operate and serve the community at full capacity.
- The community activity center does not have a generator. This facility is often used during hazard evets as an emergency operations center and needs to be in full operation for the town to allocate resources and respond in a timely manner.
- Undersized drainage facilities in the Bussendorfer, Forsythia, & Willowbrook area has caused an increase in the amount of water flowing downstream to the Elmtree Road crossing. This issue is continually becoming worse, and the town believes immediate intervention is necessary to mitigate future damage.
- The current Highway Department communication system restricts communication, by radio, with municipal police, fire, and EMS agencies. This slows down the communication and response of the various departments during hazard events because the Highway Department needs to use analog methods of communication.
- Two creeks that go under town-owned bridges are experiencing problems with sediment build up and creek bank erosion.
- Due to the rural nature of the town, the Fire Districts has dead radio zones in south and north parts of the Town.
- The Green Lake Dam is located in the 100-year floodplain.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- None

9.37.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.37-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Cleaning of existing storm sewer system; Will flush existing storm sewer systems of silt and debris to correct flooding problems – currently done every 5 years	Flooding	Not Identified	Town Hwy Dept.	Ongoing Capability	Cost		1. Discontinue 2. - 3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
						Level of Protection		
						Damages Avoided; Evidence of Success	Decrease in roadway flooding and neighborhood flooding	
2	Rebuild existing storm catch basin; Will rebuild to alleviate restriction caused by broken concrete in catch basin – done on an add needed basis	Flooding	Not Identified	Town Hwy Dept.	Ongoing Capability	Cost		1. Discontinue 2. - 3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
						Level of Protection		
						Damages Avoided; Evidence of Success	Decrease in roadway flooding and neighborhood flooding	
3	Stream Channel Mitigation: Will continue to clean stream corridors as needed to reduce flooding and erosion of banks near bridge and culverts	Flooding	Not Identified	Town Hwy Dept.	Ongoing Capability	Cost		1. Discontinue 2. - 3. This is an ongoing capability that is incorporated into the day-to-day operations of the town. Will be discontinued, and a new mitigation action will be included to address more immediate concerns in action 005.
						Level of Protection		
						Damages Avoided; Evidence of Success	Stabilization measures have decreased the amount of sediment in local creeks allow greater flow.	
4	Purchase Land in Flood Plain Areas; Will continue to evaluate land that may be purchased that falls within the flood plain areas of the Town for recreation and stormwater management purposes	Flooding	Not Identified	Engineering Dept.	Ongoing Capability	Cost	-	1. Discontinue 2. - 3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	Decreased downstream flooding	
5	Generator Maintenance: Will continue to run	Power Outage	Power outages	Maintenance Dept.	Ongoing Capability	Cost		1. Discontinue

	generators on a monthly basis to determine the condition of each unit under load		caused by storms, or down power lines in the area			Level of Protection		2. -
						Damages Avoided; Evidence of Success	Provide power during outages. Fire and Police Dispatch to function	3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
6	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Not Identified	Building Inspector, Legal	Complete	Cost	Low	1. Discontinue
						Level of Protection	Moderate	2. -
						Damages Avoided; Evidence of Success	Regulatory Compliance	3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
7	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Building Inspector, Legal	Ongoing Capability	Cost		1. Discontinue
						Level of Protection		2. -
						Damages Avoided; Evidence of Success	Ongoing as necessary	3. This is an ongoing capability that is incorporated into the day-to-day operations of the town.
8	Require staff involved in floodplain management and ordinance enforcement to become Certified Floodplain Managers (CFMs)	Flood	Not Identified	Building Inspector	No Progress	Cost	-	1. Discontinue
						Level of Protection	-	2. -
						Damages Avoided; Evidence of Success	-	3. The Town does not have the resources to complete this task
9	Join the Community Rating System (CRS)	Flood	Not Identified	Building Inspector, Legal	No Progress	Cost	-	1. Discontinue
						Level of Protection	-	2. -
						Damages Avoided; Evidence of Success	-	3. The Town does not have the resources to complete this task

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Orchard Park has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Green Lake Dredging and Dam Reconstruction - The project started in 2016 and completed early 2017. The project included dredging the entire lake, removing over 118,000 cubic yards of material, rebuilding the spillway from the dam, and reshaping the downstream face of the dam to meet NYSDEC requirements.
- Green Lake Weir Project - The project is scheduled to start in early 2021. The channel will be dredged to allow grader flow into Green Lake reducing downstream flooding
- Bussendorfer Regional Detention Pond Drainage Improvement Project – This project was completed in 2019. The pond will reduce flooding in the Bussendorfer and Elmtree area of the town and is in conjunction with the Bussendorfer Forsythia Phase 2 Drainage Improvements

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Orchard Park participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.37-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X		X					X	X
Cyber Attack		X		X					X	X
Earthquake		X		X					X	X
Expansive Soils		X		X					X	X
Extreme Temperature		X		X					X	X
Flood		X	X	X	X	X		X	X	X
Hazardous Materials		X		X					X	X
Landslide		X		X					X	X
Pandemic		X		X					X	X
Severe Storm		X		X	X	X			X	X
Severe Winter Storm		X		X	X	X			X	X
Utility Failure		X		X					X	X
Wildfire		X		X					X	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.37-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Orchard Park would like to pursue in the future to reduce the effects of hazards. Some upon of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.37-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.37-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Orchard Park - 001	Orchard Park Highway Department Buildings - Generators	1,2,	Severe Storm, Winter Storm, and Flood	**Problem**: Only a portion of the main highway building can be run with the current generator and the sewer building does not have a generator. The facility is critical for municipal operation and the building needs power at all times to operate and serve the community at full capacity. **Solution**: Install a new 3 phase generator to run the entire main highway building and install a generator for the entire sewer building. The DPW Superintendent shall conduct a preliminary assessment as to where the new generator shall be installed and to make sure it is not placed in an area where flood can occur.	Yes	No	2 years	Town Highway Dept.	$200,000	High	HMGP, Municipal Budget	High	SIP	PR, PP
2022-Town of Orchard Park - 002	Community Activity Center - Generator	1,2	Severe Storm, Winter Storm, and Flood	**Problem**: The community activity center does not have a generator. This facility is often used during hazard evets as an emergency operations center and needs to be in full operation for the town to allocate resources and respond in a timely manner. **Solution**: Install a generator for the entire building. The first step for this would be to have the facility operator determine the existing capacity needs for the facility in order to determine the generator size	Yes	No	2 years	Town OEM, Community Center Operator	$800,000	High	HMGP, Municipal Budget	High	SIP	PR, PP

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Table 9.37-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
				needed. Once the size is determined, the town shall work with the facility operator to apply for HMGP funding and hire a contractor to install the generator. The location for the new generator shall be in a place that is safe from any hazard event.										
2022-Town of Orchard Park - 003	Bussendorfer Forsythia Phase 2 Drainage Improvements	1,2	Flood, Severe Storm	**Problem**: Undersized drainage facilities in the Bussendorfer, Forsythia, & Willowbrook area has caused an increase in the amount of water flowing downstream to the Elmtree Road crossing. This issue is continually becoming worse, and the town believes immediate intervention is necessary to mitigate future damage. **Solution**: The Town Highway Department and the Town Engineer will re-design the current drainage system in the area. The re-design will include directing water to a detention basin in Brush Mountain Park. This will reduce the amount of water flowing downstream towards Elmtree Road. During this design process, additional professional assistance might be needed to determine. Once the design phase is complete, the town shall apply for funding. Orchard Park 004	channels for Highway, OEM, Sewer and Village of Orchard Park DPW			communication system restricts communication, by radio, with municipal police, fire, and EMS agencies. This slows down the communication and response of the various departments during hazard events because the Highway Department needs to use analog methods of communication. **Solution**: An assessment will be done to determine the proper system for the town. Once identified, the town will update their system to meet the needs of the town and village. The system will be similar to what other municipalities use in the region. The update will include obtaining new channels and installing new radios in all town and village vehicles. 				fabric. Additional consulting shall be provided by the County SWCD to address the immediate erosion concerns.										
2022-Town of Orchard Park - 006	Orchard Park Fire District Communication Enhancement Project	1,2,3	All	**Problem**: Due to the rural nature of the town, the Fire Districts has dead radio zones in south and north parts of the Town. **Solution**: Install a radio tower in the south part of the town or work other agencies to co-locate antennas on their towers. This would require the municipality to go through the SEQR process and determine whether the new tower would have any adverse impacts on the surrounding communities as well as visual impacts. Additional community comment would also be necessary. In addition to the tower, the town will install additional repeaters and boosters. This project will facilitate the communication between the Fire department, OEM, and other municipal and county agencies. Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.37.9 Action Worksheets

The following action worksheets have been developed by the Town of Orchard Park to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 76-Section-9.37-Orchard-Park-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Community Activity Center - Generator		
Project Number:	2022-Town of Orchard Park -002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	Problem: The community activity center does not have a generator. This facility is often used during hazard evets as an emergency operations center and needs to be in full operation for the town to allocate resources and respond in a timely manner.		
Action or Project Intended for Implementation			
Description of the Solution:	Solution: Install a generator for the entire building. The first step for this would be to have the facility operator determine the existing capacity needs for the facility in order to determine the generator size needed. Once the size is determined, the town shall work with the facility operator to apply for HMGP funding and hire a contractor to install the generator. The location for the new generator shall be in a place that is safe from any hazard event.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Continued Operation
Useful Life:	20 years	**Goals Met:**	1,2
Estimated Cost:	$800,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	HMGP, Municipal Budget
Responsible Organization:	Town OEM, Community Center Operator	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard mitigation
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install solar panels	High	Unstable energy source
	Generator	High	Best option

9.38 Village of Orchard Park

This section presents the jurisdictional annex for the Village of Orchard Park. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Orchard Park's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.38.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Orchard Park's hazard mitigation plan primary and alternate points of contact. The Village of Orchard Park followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Code Enforcement, Emergency Management, and Clerk. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.38-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Richard J. Mrugalski/ Emergency Manager Address: 4295 S. Buffalo Street, Orchard Park NY Phone Number: 716-545-0557 Email: mrugalskir@orchardparkny.org	Name/Title: John Gullo/ Code Enforcement Address: 4295 S. Buffalo Street Municipal Building – 1st Floor Orchard Park, NY 14127 Phone Number: 716.662.9327 Email: BuildingInspector@OrchardParkVillage.org
NFIP Floodplain Administrator	
Name/Title: John Gullo/ Code Enforcement Address: 4295 S. Buffalo Street Municipal Building – 1st Floor Orchard Park, NY 14127 Phone Number: 716.662.9327 Email: BuildingInspector@OrchardParkVillage.org	

9.38.2 Municipal Profile

The Village of Orchard Park is 1.4 square miles and is situated entirely within the Town of Orchard Park. The first settlers to the village area were Quakers who arrived in 1803. The village was first called Potter's Corners" and incorporated with its current name in 1821. U.S. Route 20A and NYS Route 277 traverse the village.

According to the U.S. Census, the 2010 population for the Village of Orchard Park was 3,246. The estimated 2019 population was 3,148, a three percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 3.2 percent of the population is 5 years of age or younger and 20.6 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.38.3 Jurisdictional Capability Assessment and Integration

The Village of Orchard Park performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.38.3). The Village of Orchard Park's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Orchard Park. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.38-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 92 - Building Code Administration and Enforcement	Local	Code Enforcement Office
Comment: *This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Village. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter. The Code Enforcement Officer administers and enforces all provisions of this chapter.*					
Zoning Code	Yes	No	Chapter 225 – Zoning; adopted 12/3/1979 and amended as needed	Local	Code Enforcement Officer
Comment: *Such regulations are made in accordance with the Comprehensive Plan and designed to lessen congestion in the streets, to secure safety from fire, panic, floods, and other dangers; to promote the health and general welfare; to provide adequate light and air; to prevent overcrowding of land; to facilitate the provision of transportation, water, sewerage, schools, parks and other public requirements. Such regulations are made with reasonable consideration, among other things as to the characteristics of the district and its peculiarities for particular uses and with a view to conserving the value of buildings and encouraging the most appropriate use of land throughout the Village.* *The chapter identifies several zoning districts that promote the public health, safety, morals, and general welfare of the village. This includes: residential low-density, residential medium-density, residential medium-high density, commercial, professional-commercial, industrial, and land conservation.*					
Subdivision Ordinance	No	No	-	-	-
Comment:					

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Stormwater Management Ordinance	Yes	Yes – for county	Chapter 185 – Stormwater Management and Erosion Control; adopted 12/29/2008	Local	Department of Public Works
Comment: *The purpose of this chapter, is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 185-1 hereof. This chapter seeks to meet those purposes by achieving the following objectives:* *A. Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* *B. Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, GP-02-01, or as amended or revised;* *C. Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* *D. Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* *E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* *F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.*				
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-
Comment:					
Site Plan Review	Yes	Yes	Village Code 225 -21 7/1998	Local	Code Enforcement Office
Comment: *Site plan review considers the compatibility of the proposed project with adjoining land uses and with other proposed development, having particular reference to its probable effect on the value of other land and to the adequacy of features intended to promote public health, safety and welfare and the general purposes of this chapter.*					
Environmental Protection Ordinance	Yes	Yes	Chapter 107 Adopted 1979 Local Law 1. Environmental Quality Review	Local	Planning Board
Comment: *The purpose of this chapter is to implement for the Village of Orchard Park SEQR and comply with the minimum environmental standard to protect the environment and overall health of the community.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 123 – Flood Damage Prevention; adopted 4/8/2019	Local	Code Enforcement Officer
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and;* *F. Qualify and maintain for participation in the National Flood Insurance Program.*					

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
The Village Code Enforcement Officer is appointed local administrator to administer and implement this chapter by granting or denying floodplain development permits in accordance with its provisions.					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 184 – Storm Sewers; adopted 12/29/2008	Local	Stormwater Management Officer
Comment: *The purpose of this chapter is to provide for the health, safety, and general welfare of the citizens of the Village of Orchard Park through the regulation of non-stormwater discharges to the municipal separate storm sewer system (MS4) to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with requirements of the SPDES General Permit for Municipal Separate Storm Sewer Systems. The objectives of this article are:* *A. To meet the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit No. GP-02-02, or as amended or revised;* *B. To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge non-stormwater wastes;* *C. To prohibit illicit connections, activities and discharges to the MS4;* *D. To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this article; and* E. *To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.*

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Orchard Park to oversee and track development.

Table 9.38-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	The Code Enforcement Department is responsible for issuing permits. Building permits are required for the following: • For all new construction, remodeling or additions • When a repair to an existing building is required • When a repair affects the structure of an existing building • When an electrical circuit is installed or extended • When a generator is installed • When remodeling involves the removal or relocation of walls; or affects the structure of a building • When a solid fuel device or natural gas insert, such as a wood burning stove or fireplace is installed or repaired • When the use of a building is changed (e.g., a retail store to a doctor's office…) • When the required fire safety features in an existing building are affected by repairs, remodeling or alterations • For a deck, shed, fence, pool, sign or newly paved surfaces • A Building Permit is required if the roof structure requires replacement or repairs
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The village is fully built out.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Orchard Park and their current responsibilities which contribute to hazard mitigation.

Table 9.38-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Village Planning Board reviews permit applications in residential and non-residential zones, all referrals from the Zoning Board of Appeals, and any other permits or matters referred by the Code Enforcement Officer or the Village Board.
Zoning Board of Adjustments	Yes	The Village Code Enforcement Officer reviews all permit applications to determine if variances to the Village's Municipal Code are needed. If a variance is required, the applicant completes a Zoning Board of Appeals application and a public hearing is scheduled.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Department of Public Works (DPW) monitors and maintains the village streets; this includes all pavement maintenance, management and snow plowing duties. The DPW also implements the stormwater management plan to stay current with EPA and DEC regulations.
Construction/Building/Code Enforcement Department	Yes	The Village Code Enforcement Officer reviews all permit applications to determine if variances to the Village's Municipal Code are needed. If a variance is required, the applicant completes a Zoning Board of Appeals application and a public hearing is scheduled.
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code RED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW – road maintenance, snow plowing, water quality monitoring, and storm sewer system cleaning
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Code Enforcement Officer
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer is the appointed local administrator to administer and implement Chapter 123 of the village code.
Surveyor(s)	No	-
Emergency Manager	Yes	Emergency Manager
Grant writer(s)	No	On Call Basis

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Orchard Park.

Table 9.38-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Orchard Park.

Table 9.38-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Mayor
Personnel skilled or trained in website development	Yes	Office Administrator
Hazard mitigation information available on your website	Yes	The village maintains a municipal website that includes public notices, upcoming events and meetings, announcements, and information pertaining to hazards
Social media for hazard mitigation education and outreach	Yes	The village has a social media page on Facebook where they post about upcoming events in the municipality.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	The village could use their website and Facebook page to post additional information about specific hazards of concern to the village.
Warning systems for hazard events	Yes	Code RED
Natural disaster/safety programs in place for schools	No	-

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Other	No	

Community Classifications

The table below summarizes classifications for community programs available to the Village of Orchard Park.

Table 9.38-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Class 4 - Areas with Hydrants	2019
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:

N/A *Not applicable*

NP *Not participating*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.38-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	NA
Cyber Attack	Moderate
Earthquake	Weak
Expansive Soils	Weak
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong* *Capacity exists and is in use*

Moderate *Capacity may exist; but is not used or could use some improvement*

Weak *Capacity does not exist or could use substantial improvement*

9.38.4 National Flood Insurance Program (NFIP) Compliance

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

John Gullo, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Orchard Park.

Table 9.38-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Orchard Park	7	7	$59,650	2	2

Source: FEMA 2020a, FEMA 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The Village of Orchard Park maintains a list of flood-prone properties as well as a list of homeowners that are interested in flood mitigation. There are no RISK Map projects at this time. After significant flood events, the Code Enforcement Officer conducts substantial damage assessments; however, no assessments were made during recent flood events. At the time of this HMP update, no properties have been mitigated. The villages indicated that flood maps adequately address the areas that are prone to flooding.

NFIP Compliance

The village Code Enforcement Officer is in charge of floodplain manager and there are no certified floodplain managers in the village at this time. The village has access to resources to determine future flooding conduction from climate change through the village and county. The village would like to have the general training for staff regarding floodplain management. The FPA provides permit review, education, inspections, issues certificate of compliance, and engineering services for all residents and businesses

The village does not have any outstanding violations at this time and the last CAV was 08/04/2014. Chapter 123 of the village code pertains to flood damage prevention in the village. It was adopted on April 8, 2019. The current chapter meets the minimum state and federal standards, requiring all new construction or substantial improvements of structures in the SFHA to have their lowest floor elevated at least two feet above the base flood elevation.

The village does not have any other programs, plans, or ordinances in place that support the NFIP program. At the time of this plan update, the village is not interested in joining the CRS program.

9.38.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Village of Orchard Park has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 20, Route 20A, Abbott Road, Route 179 (Milestrip Road), Route 219, Route 240/277, Baker Road, Jewett Holmwood Road, New Armor Duells Road, and Transit Road.

The Town of Orchard Park Police Department will be tasked with directing traffic to the main evacuation routes within the town and village.

Sheltering

The Village of Orchard Park has identified the following designated emergency shelters within the village.

Table 9.38-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Orchard Park Community Activity Center	4520 California Road	100	Yes, not at site, can utilize Dog Control Facility	Yes	No (action 003)	None	Warming and cooling station only
Orchard Park Middle School	60 S. Lincoln Ave	100	Yes, not at site, can utilize Dog Control Facility	Yes	Yes	None	Warming and cooling station only

Temporary Housing

The Village of Orchard Park has identified the following sites suitable for placing temporary housing units.

Table 9.38-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Compost/Soccer Complex	6909 Milestrip Road	Yes	300,000 Sq. Ft. Available	Parkland	Yes
Webster Road Vacant Land	Webster Road, SBL162.00-1-28.121	Yes	400,000 Sq. Ft. Available	Vacant Parkland	Yes
Orchard Park Little League Baseball Parking Lot	Thorn Ave, SBL 172.11-1-3.11	Yes	52,000 Sq. Ft. Available	Parking Lot	Yes
Brush Mountain Park	4520 California Road	Yes	200,000 Sq. Ft. Available	Parkland	Yes

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Orchard Park has not identified any permanent housing locations and believes coordination for this would need to be determined with each landowner outside of the village due to the limited space within the municipality.

Table 9.38-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified – proposed in mitigation action 007					

9.38.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.38-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.38-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	0	0	1	0	0	0	0	0	1	0	0	0
Multi-Family	1	0	0	0	0	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	0	0	0	0	1	0	0	0	0	0	1	0
Total Permits Issued	1	0	1	0	1	0	0	0	1	0	1	0

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None identified					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.38.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

5.4 (Hazard Ranking) for a detailed summary for the Village of Orchard Park's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Orchard Park has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.38-1. Village of Orchard Park Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Orchard Park's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.38-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.38-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the village did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the village did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the village did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	Although the County was impacted, the village did not report damages

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the village did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the village did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the village did not report damages
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	Although the County was impacted, the village did not report damages
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began	Although the County was impacted, the village did not report damages

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the village did not report damages
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the village did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the village did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the village did not report damages
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the village did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher	Although the County was impacted, the village did not report damages

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the village did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the village did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the village did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	Although the County was impacted, the village did not report damages
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5 hour period in the cold advection behind the cold front.	Although the County was impacted, the village did not report damages

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the village did not report damages
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the village did not report damages
2020-21	COVID 19 - EM 3504	Yes	National Pandemic that affected the entire nation, including the Village of Orchard Park and Erie County	Business closings, social distancing, masking, and numerous deaths reported.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Orchard Park's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Orchard Park. The Village of Orchard Park has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

The village had no edits to the following hazard rankings.

Table 9.38-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.38-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Freemans Dam	Dam	Yes	Yes	004
Green Lake Dam	Dam	Yes	Yes	004

Source: GIS 2021

Identified Issues

After review of the Village of Orchard Park's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Orchard Park has identified the following vulnerabilities within their community:

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Reduced retention capacity of Freemans Pond is causing upstream problem, backyard flooding and increased creek bank erosion. With increasing intense precipitation due to climate change, the village needs to increase its stormwater control and retention capacity.
- The current DPW system cannot communicate by radio with police, fire and EMS agencies in the village. This slows down the communication and response of the various departments during hazard events and thus time is wasted using analog methods of communication.
- The community activity center does not have a generator. This facility is often used during hazard evets as an emergency operations center and needs to be in full operation for the village to allocate resources and respond in a timely manner.
- The Freemans Dam and Green Lake Dam are both located in the 1% annual chance flood area.
- The village does not have an emergency management ordinance. This is out of compliance with the state and federal standard for municipalities and the Village of Orchard Park needs to adopt a model emergency management ordinance.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- None

9.38.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.38-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Cleaning of existing storm sewer system; Will flush existing storm sewer systems of silt and debris to correct flooding problems – currently done every 2 years	Flooding	Not Identified	DPW	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing project
						Level of Protection	-	
						Damages Avoided; Evidence of Success	Decrease in roadway flooding and neighborhood flooding	
2	Rebuild existing storm catch basin; Will rebuild to alleviate restriction caused by broken concrete in catch basin – done on an add needed basis	Flooding	Not Identified	DPW	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing project
						Level of Protection	-	
						Damages Avoided; Evidence of Success	Decrease in roadway flooding and neighborhood flooding	
3	Stream Channel Mitigation; Will continue to clean stream corridors as needed to reduce flooding and erosion of banks near bridge and culverts	Flooding	Not Identified	DPW	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
4	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Not Identified	Village Board, Legal	Complete	Cost	Low	1. Discontinue 2. 3. Completed
						Level of Protection	Moderate	
						Damages Avoided; Evidence of Success	Regulatory Compliance	
5	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Village Board, Legal	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing project
						Level of Protection	-	
						Damages Avoided; Evidence of Success	Ongoing as necessary	

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Orchard Park has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Cleaning of existing storm sewer system.
- Rebuild existing storm catch basins.
- continue to clean stream corridors as needed to reduce flooding and erosion of banks near bridge and culverts.
- Updating/revising floodplain management ordinances to comply with latest FEMA regulations.
- Update/revise floodplain management ordinances to be consistent with potential future new FIRMs.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Orchard Park participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013). The table below indicates the range of proposed mitigation action categories.

Table 9.38-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion				X						X
Cyber Attack				X						X
Earthquake				X						X
Expansive Soils				X						X
Extreme Temperature				X						X
Flood		X	X	X		X		X	X	X
Hazardous Materials				X						X
Landslide				X						X
Pandemic				X						X
Severe Storm		X		X	X	X				X
Severe Winter Storm				X						X
Utility Failure		X		X	X	X				X
Wildfire				X						X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.38-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Orchard Park would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.38-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Freemans Pond Dredging and Stream Rehabilitation Project	
Project Number:	2022-Village of Orchard Park -001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This project protects property
Cost-Effectiveness	1	This is the most cost effective based on village's evaluation
Technical	1	There are no technical issues
Political	1	There are no political opposing parties
Legal	1	There are no legal issues
Fiscal	-1	The village does not have the fiscal resources for this
Environmental	1	This has positive impact on the environment
Social	1	This has a positive social impact
Administrative	1	There are no administrative issues
Multi-Hazard	0	This addresses a single hazard
Timeline	1	The designated timeline is feasible
Agency Champion	1	This project is under the responsibility of the DPW
Other Community Objectives	1	Various objectives
Total	11	
Priority (High/Med/Low)	High	

Attachment: 77-Section-9.38-Orchard-Park-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Community Activity Center - Generator		
Project Number:	2022-Village of Orchard Park -003		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Storm, Utility Failure		
Description of the Problem:	The community activity center does not have a generator. This facility is often used during hazard evets as an emergency operations center and needs to be in full operation for the village to allocate resources and respond in a timely manner.		
Action or Project Intended for Implementation			
Description of the Solution:	Install a generator for the entire building. The first step for this would be to have the facility operator determine the existing capacity needs for the facility in order to determine the generator size needed. Once the size is determined, the village shall work with the facility operator to apply for HMGP funding and hire a contractor to install the generator. The location for the new generator shall be in a place that is safe from any hazard event.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500 year storm	**Estimated Benefits (losses avoided):**	Continued Operation
Useful Life:	20 years	**Goals Met:**	1,2
Estimated Cost:	$800,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP, Municipal Budget
Responsible Organization:	OEM and Village, Community Center Operator, Municipal Engineers	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install Solar	High	Variant based on weather
	Generator	High	Best option

9.39 Town of Sardinia

This section presents the jurisdictional annex for the Town of Sardinia. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Sardinia's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.39.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Sardinia's hazard mitigation plan primary and alternate points of contact. The Town of Sardinia followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including the Emergency Manager and Supervisor. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from person with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.39-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Gerard Whittington, Emergency Manager Address: 12320 Savage Road, Sardinia, NY 14134 Phone Number: 716-432-2435 Email: Gerard.whittington@erie.gov	Name/Title: Beverly Gambino, Supervisor Address: 12320 Savage Road, Sardinia, NY 14134 Phone Number: 716-496-8900 Email: beverlygambino@outlook.com
NFIP Floodplain Administrator	
Name/Title: Gene Degman, Code Enforcement Office Address: 12320 Savage Road, Sardinia, NY 14134 Phone Number: 716-807-7818 Email: accugene2@att.net	

9.39.2 Municipal Profile

Sardinia is a rural community located in the southeast corner of Erie County. The town is approximately 50 square miles, and contains three hamlets: Sardinia, Protection and Chaffee. The town is bordered by Wyoming County to the east and Cattaraugus County to the south. The Towns of Holland and Colden are to the north and the Town of Concord is on the west. The town is approximately 35 miles from downtown Buffalo. The Town contains two state highways, NYS Route 39 and NYS Route 16. Town of Sardinia is situated within three watersheds: Cazenovia Creek-Buffalo River watershed in the north; Buffalo Creek watershed in the northeast; and Cattaraugus Creek watershed in the south. The area's first white settlement around 1809. George Richmond and Ezra Nott were the first settlers. By 1810, there were fifteen other families in the area. The town contains 38 registered historic buildings. (Town of Sardinia 2003)

According to the U.S. Census, the 2010 population for the Town of Sardinia was 2,775. The estimated 2019 population was 2,780, a 0.1 percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.9 percent of the population is 5 years of age or younger and 19.7 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.39.3 Jurisdictional Capability Assessment and Integration

The Town of Sardinia performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.39.3). The Town of Sardinia's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Sardinia. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.39-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	LL2-2006, Chapter 52, Construction Code, Uniform	Local, State	Code Enforcement/Building Department
Comment: This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this Town. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.					
Zoning Code	Yes	No	LL1-2005, Chapter 115, Zoning	Local	Planning Board, Code Enforcement Officer
Comment: The purpose of this chapter is to provide for the orderly growth of the Town of Sardinia by setting minimum requirements in accordance with a comprehensive plan designed to lessen congestion in the streets; to secure safety from fire, flood, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements. Specifically, this chapter is adopted to: A. Implement the Town of Sardinia Comprehensive Plan. B. Regulate the use of land. C. Regulate the location, height and bulk of buildings and their accessory structures.					

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
D. Preserve and protect significant natural resources. E. Preserve and protect the rural character of the community.					
Subdivision Ordinance	No	No	-	-	-
Comment: None					
Stormwater Management Ordinance	No	Yes	-	-	-
Comment: None					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	LL1-2005, Chapter 115, Zoning Article IX Site Plan Approval	Local	Planning Board
Comment: Prior to the development of individual parcels for commercial activities, including but not limited to multifamily residential and manufactured housing parks, a site plan for the land activity or development must be reviewed and approved. The purpose of these regulations is to enable the town to control the placement of buildings and accessory structures and ancillary improvements so that they do not impact neighboring land uses or negatively impact the surrounding community. The implementation of these requirements furthers the public health, safety and general welfare of the community by allowing the reviewing body to restrict the number, size and location of vehicular access points along all roads; require buffering of incompatible land uses; require adequate aesthetic enhancements in the form of soft and hard landscaping features; require buildings to have architectural features which are consistent with human scale and/or require architectural styles that are consistent or reflective of the surrounding community; and require the provision of open space in multifamily residential or manufactured housing parks for recreational opportunities or permit the town to accept monies in lieu of providing such open space for the creation of recreational opportunities elsewhere in the community. Site plan review includes assessment of hazard risk					
Environmental Protection Ordinance	Yes	Yes	LL1-2005, Chapter 115, Zoning	Local	Planning and Zoning Board
Comment: Zoning administration includes assessment of hazard risk.					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 63, Flood Damage Prevention	Local	FPA
Comment: BFE+2 feet is required for all construction in the SFHA (residential and non-residential). It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; D. Control filling, grading, dredging and other development which may increase erosion or flood damages; E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and F. Qualify for and maintain participation in the National Flood Insurance Program.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Sardinia to oversee and track development.

Table 9.39-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Town Building Department/Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	The town provided data for this Plan that detailed the lack of development within the floodplain in the past five years.
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	There is adequate land in the town to accommodate permanent and temporary locations

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Sardinia and their current responsibilities which contribute to hazard mitigation.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.39-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board conducts site plan and development reviews that incorporate natural hazard exposure
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals conducts variance hearings to determine if proposals may proceed in contravention of zoning and in consideration of natural hazard risks.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department is one of the core functions of the town government
Construction/Building/Code Enforcement Department	Yes	Code Enforcement/Building Inspector provides effective administration of building code.
Emergency Management/Public Safety Department	Yes	Department of Emergency Management
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Ready Erie Preparedness
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Roadway maintenance is performed, as appropriate, by the State Department of Transportation, Erie County Highway Department and Town Highway Department.
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Floodplain Administrator enforces building restrictions in floodplains.
Surveyor(s)	No	-

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Emergency Manager	No	-
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Sardinia.

Table 9.39-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Sardinia.

Table 9.39-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Supervisor
Personnel skilled or trained in website development	Yes	Town Clerk
Hazard mitigation information available on your website	Yes	Hazard mitigation information is posted as necessary
Social media for hazard mitigation education and outreach	Yes	Town Clerk
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to	No	Links to established websites

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
communicate hazard-related information		
Warning systems for hazard events	Yes	Ready Erie Preparedness, NY Alert, website, Facebook
Natural disaster/safety programs in place for schools	No	School System/Board of Cooperative Educational Services
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Sardinia.

Table 9.39-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.39-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.39.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Gene Degman, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Sardinia.

Table 9.39-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Sardinia	4	6	$114,205	0	3

Source: FEMA 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Areas prone to flooding in the town are mainly along Cattaraugus Creek and some of its tributaries. There are no RiskMAP projects currently underway in the town. The town indicated that no properties have been mitigated and that a list of property owners interested in mitigation is not maintained. The town's flood hazard maps adequately address the flood risk within the jurisdiction. The town does not have access to resources to determine possible future flooding conditions from climate change.

NFIP Compliance

The Town of Sardinia does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Contact (CAC) was in May 2016. The Code Enforcement Officer is responsible for floodplain administration and this individual is not a certified Floodplain Manager. The town does not have access to resources to determine possible future flooding conditions from climate change. The town stated that its floodplain management staff are not in need of assistance or training to support its floodplain management program. The town does not make Substantial Damage determination. The town's floodplain management meets minimum requirements and incudes inspections and permit review utilizing GIS technology. The town does not participate in the Community Rating System.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.39.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Sardinia has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 39
- Route 16
- Genesee Road, Savage Road, Allen Road, and Middle Road are also evacuation routes and are county owned.

The town will coordinate with the County Highway Department and fire departments to keep evacuation routes clear and coordinate public notifications. The fire department and the Highway Department will coordinate with the Sheriff and NYS Police for purposes of notification, planned routes and shelter locations. First responders will assist evacuees as needed.

Sheltering

The Town of Sardinia has identified the following designated emergency shelters within the town.

Table 9.39-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Town Hall	12320 Savage Road	TBD	No	Yes	Yes	First Responders/Red Cross	-
St. Jude's Roman Catholic Church	12800 Genesee Road	TBD	No	Yes	TBD	First Responders/Red Cross	-

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Sardinia has identified the following sites suitable for placing temporary housing units and has stated its intention to coordinate with the American Red Cross during emergencies.

Table 9.39-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to address this # 2022-Sardinia Town-006					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Sardinia has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.39-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to address this # 2022-Sardinia Town-006					

9.39.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.39-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.39-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None Identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.39.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Sardinia's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

using mapping techniques and technologies and for which the Town of Sardinia has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Sardinia's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.39-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.39-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, town did not report any damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, town did not report any damages.
November 12, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
November 18, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
January 11, 2017	High Wind	No	Although the county was impacted, town did not report any damages.
March 8, 2017	High Wind	No	Although the county was impacted, town did not report any damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, town did not report any damages.
July 20, 2017	Tornado	No	Although the county was impacted, town did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, town did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
January 2, 2018	Blizzard	No	Although the county was impacted, town did not report any damages.
October 6, 2018	Lightning	No	Although the county was impacted, town did not report any damages.
February 24, 2019	High Wind	No	Although the county was impacted, town did not report any damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, town did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, town did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Sardinia's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Sardinia. The Town of Sardinia has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated to make the following changes based upon relative rate of occurrence.

- Change the Flood risk from Low to Medium
- Change the Hazardous Materials risk from Medium to High
- Change the Landslide risk from Medium to Low.

Table 9.39-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Medium	High

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	High

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.39-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Donald Kelleck Pond Dam	Dam	X	X	2022-T Sardinia-002
Erie County Conservation Society Dam	Dam	X	X	2022-T Sardinia-003
Pfarners Pond Dam	Dam	X	X	2022-T Sardinia-004

Source: FEMA 2021

Identified Issues

After review of the Town of Sardinia's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Sardinia has identified the following vulnerabilities within their community:

- Trucks become a problem on roadways during heavy snow and storm events. Trucks should follow designated detour routes during these hazard events.
- The town has been impacted by COVID-19.
- There are three dams located within the Special Flood Hazard Area.
- There may be Repetitive Loss Properties located within the town.
- The town was not able to identify temporary and permanent housing locations.

9.39.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.39-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)	1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Work with landowner, farmer, and Town to implement a Water Retention solution at corner of Genesee Rd and Savage Rd	Flood	Flood conditions during thaw	Town of Sardinia	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	1. Discontinue 2. 3. Complete
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Not Identified	Planning Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	1. Discontinue 2. 3. Complete
	Designate/install a specific person to be your municipality's Floodplain Administrator	Flood	Not Identified	Code Enforcement	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	1. Discontinue 2. 3. Complete
	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances	Flood	Not Identified	Code Enforcement	Ongoing	Cost Level of Protection Damages Avoided; Evidence of Success	1. Discontinue 2. 3. Ongoing capability
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Planning Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	1. Discontinue 2. 3. Complete
	Require staff involved in floodplain management and ordinance enforcement to	Flood	Not Identified	Code Enforcement	Ongoing	Cost Level of Protection	1. Discontinue 2.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Sardinia participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.39-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X			X			X			X
Cyber Attack	X			X			X			X
Earthquake	X			X			X			X
Expansive Soils	X			X			X			X
Extreme Temperature	X			X			X			X
Flood	X	X		X		X	X			X
Hazardous Materials	X			X			X			X
Landslide	X			X			X			X
Pandemic	X			X			X			X
Severe Storm	X			X			X			X
Severe Winter Storm	X			X			X			X
Utility Failure	X			X			X			X
Wildfire	X			X			X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.39-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Sardinia would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.39-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.39-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T Sardinia-001	Truck Traffic Detours during Weather Events	1	All Hazards	**Problem**: Trucks passing through the town, sometimes loaded with hazardous materials, should be aware of best routes to use during storm events. **Solution**: The town will coordinate with the County Public Works Department and the NYS Department of Transportation to ensure that needed information gets to truck haulers.	No	No	Within 3 years	Town Highway Department, County Public Works, NYS Department of Transportation	$500 staff time	Reduce risk of road accidents and HazMat releases during hazard events	Municipal budget	High	LPR, EAP	PI
2022-T Sardinia-002	Protect the Donald Kelleck dam to the 0.2% annual flood chance event	1, 2	Flood	**Problem**: The Donald Kelleck Dam is in the Special Flood Hazard Area. **Solution**: The town will contact the facility managers of the privately owned dam and discuss options for protecting the dams to the 0.2% annual chance flood.	Yes	No	Within 5 years	Town Highway Department, Emergency Manager	$500	Ensure continued operation of this flood protection facility	Municipal budget	High	EAP	PI
2022-T Sardinia-003	Protect Erie County Conservation Society dam to the 0.2% chance annual flood	1, 2	Flood	**Problem:** The Erie County Conservation Society Dam is in the Special Flood Hazard Area and is subject to flooding hazard.	Yes	No	Within 3 years	Town Highway Department, Emergency Manager, County DPW	<$500 for outreach, TBD by engineering analysis for county owned dams	Facility managers aware of options to protect dams to the 0.2% annual	County and municipal budget	High	EAP	PI

NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.39.9 Action Worksheets

The following action worksheets have been developed by the Town of Sardinia to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Sardinia Action Worksheet			
Project Name:	Truck Traffic Detours during Weather Events		
Project Number:	2022-T Sardinia-001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	Trucks passing through the town, sometimes loaded with hazardous materials, should be aware of best routes to use during storm events.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will coordinate with the County Public Works Department and the NYS Department of Transportation to ensure that needed information gets to truck haulers.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	All Hazards	**Estimated Benefits (losses avoided):**	Reduce risk of road accidents and HazMat releases during hazard events
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	<$500 for outreach analysis , TBD by engineering for county owned dams	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 year	**Potential Funding Sources:**	Municipal budget
Responsible Organization:	Town Highway Department, County Public Works, NYS Department of Transportation	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Shut down roadways during emergencies	Very High	Not feasible, endangers safety
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

Agency Champion	1	Town Highway Department, Emergency Manager, County DPW
Other Community Objectives	1	
Total	12	
Priority (High/Med/Low)	High	

Attachment: 78-Section-9.39-Sardinia-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Sardinia Action Worksheet			
Project Name:	Residential Property Flood Mitigation		
Project Number:	2022-T Sardinia-005		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will work with the county to conduct outreach to flood-prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	BFE +2	**Estimated Benefits (losses avoided):**	Provide flood protection for residential property owners
Useful Life:	Ongoing	**Goals Met:**	1
Estimated Cost:	TBD by engineer's analysis and cost of each property	**Mitigation Action Type:**	Structure and Infrastructure Improvement
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 year	**Potential Funding Sources:**	BRIC, HMGP, FMA, cost share by property owners
Responsible Organization:	Town Board, FPA, homeowners	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Encourage property owners to abandon their homes	Very High	Not feasible
Progress Report (for plan maintenance)

9.40 Village of Sloan

This section presents the jurisdictional annex for the Village of Sloan. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Sloan's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.40.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Sloan's hazard mitigation plan primary and alternate points of contact. The Village of Sloan followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Department of Public Works, Code Enforcement, and the clerk treasurer. The DPW chief, CEO, and clerk treasurer represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.40-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Debra Smith, Clerk Treasurer Address: 425 Reiman Street, Sloan, New York 14212 Phone Number: (716) 897-1560 Email: sloanny@roadrunner.com	Name/Title: Karen M. Gold, Deputy Clerk Address: 425 Reiman Street, Sloan, New York 14212 Phone Number: (716) 897-1560 Email: kgold@villageofsloan.org

Name/Title: Vincent Ferraraccio, CEO Method of Participation: Submitted data and worksheets.	

9.40.2 Municipal Profile

The village was incorporated in 1896 from portions of the original Town of Cheektowaga. Its name honors Samuel Sloan, President of the Lackawanna Railroad. The village is surrounded on three sides by the Town of Cheektowaga and on the west by the City of Buffalo. The Indian trail from Buffalo to Batavia ran through the village and continued to be well travelled and then improved by white settlers from a mud path to a wooden plank road, and toll booths in 1850. The village was a historically important railroad center. Five railroads were built into the village between 1850 to 1880 (Village of Sloan website, accessed 2020).

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

According to the U.S. Census, the 2010 population for the Village of Sloan was 3,661. The estimated 2019 population was 3,562, a 2.7 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.7 percent of the population is 5 years of age or younger and 15.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.40.3 Jurisdictional Capability Assessment and Integration

The Village of Sloan performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6 (Mitigation Strategy) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 0). The Village of Sloan's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Sloan. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.40-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	19 NYCRR Part 1203; Village Code Ch 205	State	Code Enforcement
Comments: NYS Uniform and Energy Code 2020; This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Village of Sloan. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter.					
Zoning Code	Yes	No	VC 455, Zoning	Local	Code Enforcement
Comment: The zoning regulations and districts hereinafter set forth are made in accordance with a comprehensive plan for classifying, regulating and restricting the height, number of stories and size of buildings and other structures, the percentage of lot that may be occupied, the size of yards, courts and other open spaces, the density of population and the location and use of buildings, structures and land for trade, industry, residence or other purposes; establishing the boundaries of districts for said purposes; and providing fines and penalties for violations, so as to promote the health, safety, morals and general welfare of the Village of Sloan.					

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Subdivision Ordinance	No	-	-	-	-
Comment: None					
Stormwater Management Ordinance	Yes	Yes	VC 390, Stormwater Management	Local	DPW/CEO
Comment: Codes Rules and Regulations of the State of New York, Title 6. Department of Environmental Conservation, Chapter X. Division of Water Resources, Subchapter A. General Article 3. State Pollutant Discharge Elimination System, Part 750. State Pollutant Discharge Elimination System(SPDES) Permits. New York Environmental Conservation Law, Article 17, Titles 7, 8 and Article 70. New development and redevelopment projects that result in a land disturbance of one acre or greater, including projects less than one acre if they are part of a larger common plan of development or sale or if controlling such activities in a particular watershed is require a permit by the Department					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	-	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	VC 205, 455	Local	CEO
Comment: The authority to require site plan review is derived from the State enabling Statutes (General City Law s. 27-a, Town Law s. 247a, Village Law s. 7-725a)The local legislative body has the power to delegate site plan review to the planning board, zoning board, etc. • The general standards and considerations when reviewing a site plan include; the adequacy of stormwater and drainage facilities; the adequacy, type and arrangement of trees, shrubs, and other landscaping constituting a visual and/or noise buffer between the applicant's and adjoining lands, including the maximum retention of existing vegetation; and Special attention to the adequacy and impact of structures, roadways, and landscaping in areas with susceptibility to ponding, flooding and/or erosion. • Where applicable, the Applicant must indicate measures and features to comply with flood hazard and flood insurance regulations.					
Environmental Protection Ordinance	No	-	-	-	-
Comment: None					
Flood Damage Prevention Ordinance	Yes	Yes	VC 390	Local	Zoning Board
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.					
Municipal Separate Storm Sewer System (MS4)	Yes	No	VC 360-34	Local	Board of Trustees
Comment: The purpose of this article is to provide for the health, safety and general welfare of the citizens of the Village of Sloan through the regulation of nonstormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with the requirements of the SPDES general permit for stormwater discharges from MS4s, Permit No. GP-02-02. The objectives of this article are:					

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
• To meet the requirements of the SPDES general permit for stormwater discharges from MS4s, Permit No. GP-02-02; • To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge nonstormwater wastes; • To prohibit illicit connections, activities and discharges to the MS4; • To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this article; and • To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Sloan to oversee and track development.

Table 9.40-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	-
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The village is fully developed

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Sloan and their current responsibilities which contribute to hazard mitigation.

Table 9.40-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	No	-
Zoning Board of Adjustments	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Public Works/Highway Department	Yes	Department of Public Works
Construction/Building/Code Enforcement Department	Yes	One part-time Code Enforcement Officer
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Annual tasks undertaken by DPW: tree maintenance on right of way, snow/ice removal from streets.
Mutual aid agreements	Yes	With Erie County
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	The village subcontracts for engineering services
Engineers or professionals trained in building or infrastructure construction practices	Yes	The village subcontracts for engineering services
Planners or engineers with an understanding of natural hazards	Yes	The village subcontracts for engineering services
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	Yes	The village has a shared service with the Town of Cheektowaga.
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Sloan.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.40-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Sloan.

Table 9.40-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village of Clerks' Office
Personnel skilled or trained in website development	Yes	Subcontract with Webmaster
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Official Facebook page for village
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	The village is a member of the Western New York Stormwater Coalition.
Warning systems for hazard events	No	None other than social media
Natural disaster/safety programs in place for schools	Yes	School and volunteer fire department
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Sloan.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.40-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	N/A	No results for 2020 yet
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	3	2019
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

N/A Not applicable
NP Not participating
- Unavailable

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.40-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.40.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Robert Smith, DPW Crew Chief

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Sloan.

Table 9.40-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Sloan	0	0	$0	0	0

Source: *FEMA 2019*

Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*

RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

The municipality does not have a list of properties that have been damaged by flooding, but the village is aware of areas with street flooding in heavy rains. Some areas are being addressed through curbing installation. The village does not maintain a list of property owners interested in flood mitigation and there are no RiskMAP projects underway. The village does not make Substantial Damage determinations and no properties have been mitigated.

NFIP Compliance

The DPW department is responsible for floodplain management. There are not any certified floodplain managers on staff. The village does not have access to resources to determine possible flooding condition from climate change other than FEMA publications. The village's floodplain management staff does not need assistance or training because they are not located in a floodplain or have shorelines. The flooding that occurs in the village is minor, and from heavy rains and snow melt. They are partially mitigated by curbing, storm sewer maintenance and repair, assessment and rehabilitation of underground flume.

The village has not had a Community Assistance Contact (CAC) or Community Assistance Visit (CAV). The Village of Sloan's administration services include outreach through the WNYSC Code official completed time of sale inspections of stormwater facilities for both commercial and residential determines any illegal connection. There are not any outstanding NFIP compliance violations that need to be addressed. The local law number of the village's flood damage prevention ordinance is VC 390 December 11, 2007. The Code Official supports floodplain management when completing site plan reviews and determining requirements pertaining to landscape and parking lot drainage.

9.40.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Sloan has identified the following routes and procedures to evacuate residents prior to and during an event.

- The Village of Sloan is located within the Town of Cheektowaga and would follow their emergency plan of evacuation and housing.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Sheltering

The Village of Sloan has identified the following designated emergency shelters within the village.

Table 9.40-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Piekarski Community Center	140 Halstead Avenue	75	Yes	Partial	Yes	First aid and EMS with local fire department	Short term shelter use (1-2 days)

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Sloan has identified the following sites suitable for placing temporary housing units.

Table 9.40-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify and designate locations for Temporary Housing. See Mitigation Action 2022-V. Sloan-#005					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Sloan has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.40-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify and designate locations for Permanent Housing. See Mitigation Action 2022-V. Sloan-#005					

9.40.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.40-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.40-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

** Only location-specific hazard zones or vulnerabilities identified.*

9.40.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Sloan's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Sloan has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.40-1. Village of Sloan Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Sloan's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.40-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.40-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the village did not report any damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the village did not report any damages.
November 12, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
November 18, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
January 11, 2017	High Wind	No	Although the county was impacted, the village did not report any damages.
March 8, 2017	High Wind	No	Although the county was impacted, the village did not report any damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the village did not report any damages.
July 20, 2017	Tornado	No	Although the county was impacted, the village did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the village did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the village did not report any damages.
October 6, 2018	Lightning	No	Although the county was impacted, the village did not report any damages.
February 24, 2019	High Wind	No	Although the county was impacted, the village did not report any damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, the village did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, the village did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Sloan's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Sloan. The Village of Sloan has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village did not provide feedback on the following hazard rankings.

Table 9.40-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.40-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None Identified						

Source: HAZUS-MH 4.2

Identified Issues

After review of the Village of Sloan's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Sloan has identified the following vulnerabilities within their community:

- Sloan Municipal Building 425 Reiman Street- lacks backup generator power. See Mitigation Action 2022-V. Sloan-001.
- Street and residential basement flooding during heavy rains and/or snowmelt. Under NYS DEC Order on Consent, the villages' sanitary sewer infrastructure is under a multi-year rehabilitation. The project does not include the stormwater system. Drain inlets require replacement/repair and the village has an underground concrete flume that all storm sewers located north of the railroad yard flows into. The flume has not been inspected for debris buildup or condition in excess of thirty years. In 2021, the village is undertaking a multi-year project of curbing and DI inspection/repair/replacement on the following streets: Grattan, Lehigh, Celina, Mann Streets. All streets are located off of William Street, south of the railroad yard, which do not flow into the flume. See Mitigation Action 2022-V. Sloan-002
- Currier Street and portions of Atlantic Avenue do not have curbing, which reduces storm water flow to existing drain inlets, leading to water ponding on street. See Mitigation Action 2022-V. Sloan-003

9.40.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.40-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Undertake smoke tests to determine inappropriate hookups to our storm water system from downspouts, roof leaders, sump pumps, etc.	Flooding	Engineering	Village submitted for an EPA Urban Waters Grant. Reduction of inappropriate hookups would lessen storm water flooding and backups.	Complete	Cost	EPG Monies Used	1 Discontinue 2. 3. Project was completed in 2018.
						Level of Protection	High	
						Damages Avoided; Evidence of Success	352 deficiencies were noted and letters sent to property owners	
	Inspection of stream flume with sewer camera	Flooding	Engineering	Approx. 75 years ago, village diverted a small stream underground through a flume. The flume has not been assessed for damage/ blockage/ infiltration in excess of 30 years	No Progress	Cost		1. Include in 2022 HMP as action 2022-Village of Sloan-002
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	DPW, Engineering	Outdated floodplain management ordinance	No Progress	Cost		1. Include in the 2022 HMP as action 2022-Village of Sloan-004
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	DPW, Engineering	Floodplain management ordinance is not updated to be consistent with new FIRMS	No Progress	Cost		1. Include in the 2022 HMP as action 2022-Village of Sloan-004
						Level of Protection		
						Damages Avoided; Evidence of Success		

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Sloan has not identified any mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Sloan participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.40-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X			X					X
Cyber Attack	X	X			X					X
Earthquake	X	X			X					X
Expansive Soils	X	X			X					X
Extreme Temperature	X	X			X					X
Flood	X	X			X				X	X
Hazardous Materials	X	X			X					X
Landslide	X	X			X					X
Pandemic	X	X			X					X
Severe Storm	X	X			X				X	X
Severe Winter Storm	X	X			X				X	X
Utility Failure	X	X			X					X
Wildfire	X	X			X					X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.40-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Sloan would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.40-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.40-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Sloan-001	Generator for Sloan Municipal Building	1, 2	Utility Failure, All Hazards	**Problem**: Sloan Municipal Building 425 Reiman Street lacks backup power source Lack of power results in a breakdown of continuity of operations and prevents the Sloan Municipal Building from providing critical services during a hazard event. **Solution**: The village will work with the county to research and purchase the approximately sized backup generator for the building. The DPW will install the backup generator and necessary electrical components and will be responsible for testing and upkeep of the generator after installation.	Yes	None	1 year	Village of Sloan, DPW, Erie County	$50,000	Continuity of operations of the Sloan Municipal Building	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget	High	SIP	ES
2022-Village of Sloan-002	Drain inlet replacement and repair and inspection of flume	1, 2	Flood, Severe Storm, Severe Winter Storm	**Problem**: Street and residential basement flooding during heavy rains and/or snowmelt. Under NYS DEC Order on Consent, the villages' sanitary sewer infrastructure is under a multi-year rehabilitation. The project does not include the stormwater system. Drain inlets require replacement/repair and the village has an underground concrete flume that all storm sewers located north of the railroad yard flows into. The flume has not been inspected for debris buildup or condition in excess of thirty years. **Solution**: In 2021, the village is undertaking a multi-year project of curbing and DI inspection/ repair/ replacement on the following streets: Grattan, Lehigh, Celina, Mann Streets. All streets are located off of William Street, south of the railroad yard, which do NOT flow into the flume.	No	None	Within 5 years	DPW, DEC, Engineering, Construction	High	High, reduces flooding	FEMA BRIC and HMGP	High	SIP	SP

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.40.9 Action Worksheets

The following action worksheets have been developed by the Village of Sloan to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 79-Section-9.40-Sloan-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Generator for Sloan Municipal Building		
Project Number:	2022-Village of Sloan-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Utility Failure, All Hazards		
Description of the Problem:	Sloan Municipal Building 425 Reiman Street lacks backup power source Lack of power results in a breakdown of continuity of operations and prevents the Sloan Municipal Building from providing critical services during a hazard event.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will work with the county to research and purchase the approximately sized backup generator for the building. The DPW will install the backup generator and necessary electrical components and will be responsible for testing and upkeep of the generator after installation.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Continuity of operations of the Sloan Municipal Building
Useful Life:	20 years	**Goals Met:**	1, 2
Estimated Cost:	$50,000	**Mitigation Action Type:**	SIP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	6 months	**Potential Funding Sources:**	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Village of Sloan, DPW, Erie County	**Local Planning Mechanisms to be Used in Implementation if any:**	Economic Development, Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Install solar panels	$100,000	Weather dependent; need large amount of space for installation; expensive if repairs needed
	Install wind turbine	$100,000	Weather dependent; poses a threat to wildlife; expensive repairs if needed

Progress Report (for plan maintenance)

Action Worksheet			
Project Name:	Drain inlet replacement and repair and inspection of flume		
Project Number:	2022-Village of Sloan-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	Street and residential basement flooding during heavy rains and/or snowmelt. Under NYSDEC Order on Consent, the villages' sanitary sewer infrastructure is under a multi-year rehabilitation. The project does not include the stormwater system. Drain inlets require replacement/repair and the village has an underground concrete flume that all storm sewers located north of the railroad yard flows into. The flume has not been inspected for debris buildup or condition in excess of thirty years.		
Action or Project Intended for Implementation			
Description of the Solution:	In 2021, the village is undertaking a multi-year project of curbing and DI inspection/ repair/ replacement on the following streets: Grattan, Lehigh, Celina, Mann Streets. All streets are located off of William Street, south of the railroad yard, which do NOT flow into the flume. The Village DPW, supported by NYSDEC and engineering and construction as necessary, will seek funding to replace and repair drain inlets to improve water flow and reduce flooding at these locations.		
Is this project related to a Critical Facility?		Yes ☐	No ☒
Is the critical facility located in the 1% annual chance flood area?		Yes ☐	No ☒
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces flooding
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	SIP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	ASAP
Estimated Time Required for Project Implementation:	3-5 years	**Potential Funding Sources:**	FEMA BRIC and HMGP
Responsible Organization:	Village of Sloan DPW, NYSDEC, Engineering, Construction	**Local Planning Mechanisms to be Used in Implementation if any:**	Economic Development, Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadways	$1 million	Costly and may not solve problem
	Relocate roadway	N/A	Not possible

9.41 Village of Springville

This section presents the jurisdictional annex for the Village of Springville. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Springville's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.41.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Springville's hazard mitigation plan primary and alternate points of contact. The Village of Springville followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including the Village Administrator and the Mayor. The Village Administrator and the Mayor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.41-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Liz Melock, Village Administrator Address: 5 West Main Street Springville, NY 14141 Phone Number: 716-592-4346 Email: lmelock@villageofspringvilleny.com	Name/Title: Bill Krebs, Mayor Address: 5 West Main Street Springville, NY 14141 Phone Number: 716-592-4346 X1573 Email: wkrebs@villageofspringvilleny.com

Name/Title: Duane Boberg, Superintendent of Public Works Method of Participation: Assisted with completion of municipal capabilities worksheet	

9.41.2 Municipal Profile

The Village of Springville is located 45 minutes from downtown Buffalo, almost to Erie County's southern border and among the Allegheny Mountain foothills. The village incorporated in 1834 and was named for its many freshwater springs. It is entirely contained within the Town of Concord. US Route 219 and NYS Route 39 traverse the village.

The first white settler to the area was Christopher Stone in 1807. Historically, Springville was the center of a prosperous agricultural district, providing services and goods to farmers in the countryside and serving as a market for agricultural products. In 1878, the Buffalo, Rochester and Pittsburgh railroad was extended to the village and in 1906 additional railroad connections were established. The railroads improved access and encouraged development of the village by providing a reliable means of obtaining raw materials and distributing manufactured goods. Despite the declining industrial economy regionally, several manufacturing businesses remain important to the local economy. The importance of farming has lessened in recent decades. Extension of US Route 219 as a limited access highway spawned large scale retail development along Cascade Drive (Village of Springville 2020).

"Pop" Warner, the father of Pee Wee football, is a nationally known figure who lived in Springville. His personal collections are housed in the Warner Museum. (village website). The Village of Springville remains the economic and social heart of the community, the only village in the Town of Concord, and an urban center serving southern Erie and Cattaraugus Counties (Village of Springville 2014).

According to the U.S. Census, the 2010 population for the Village of Springville was 4,296. The estimated 2019 population was 4,298, a nearly zero percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.7 percent of the population is 5 years of age or younger and 15.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.41.3 Jurisdictional Capability Assessment and Integration

The Village of Springville performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.41.3). The Village of Springville's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Springville. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.41-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	LL6-2006, Village of Springville. 2006. Building Construction and Fire Prevention. Chapter 73 Village Code	Local	Code Enforcement
Comment: This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Village of Springville. This Chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.					
Zoning Code	Yes	No	Village of Springville. 1979. Zoning, Chapter 200 Village Code	Local	Planning Board, Code Enforcement
Comment: The Zoning Code sets the objectives to lessen the potential for excessive erosion. In the Wellhead Overlay District, no discharging or allowing any sewage or polluted liquid of any kind to flow on or beneath the surface of the ground is permitted. All excavation slopes more than 1:1 shall be adequately fenced and Stripping of topsoil for sale or for use on other premises is prohibited. This chapter is adopted for the purpose of promoting the health, safety, morals, and the general welfare of the community and in furtherance of the following related and more specific objectives relating to hazard mitigation: • To guide and regulate the orderly growth, development, and redevelopment of the municipality in accordance with a Comprehensive Plan and with long-term objectives, principles and standards deemed beneficial to the interests and welfare of the people. • To promote, in the public interest, the utilization of land for the purposes for which it is most appropriate. • To secure safety from fire, panic, and other dangers and to provide adequate light, air, and convenience of access. • To eliminate nonconforming uses gradually. • To lessen the potential for excessive erosion and to conserve and reasonably to protect the natural scenic beauty of the municipality and its environs				
Subdivision Ordinance	Yes	No	Village of Springville. 2007. Subdivision of Land, Chapter 155	Local	Planning Board, Code Enforcement, Village Board
Comment: The Planning Board of the Village of Springville is directed to study each plat of land subdivision within the village and to give approval or disapproval in accordance with the procedure and standards adopted by the Planning Board and approved by the Village Board.					
Stormwater Management Ordinance	Yes	Yes	Chapter 193, Water, Sanitary Sewer, Electric and Storm Sewer Systems, Article IX Storm Sewers	Local	DPW, Planning Board
Comment: The purpose of this chapter is to insure the proper and satisfactory construction of connections and installations of water, sanitary sewer, storm drainage and electric systems of the Village of Springville. The Storm Sewers Article prohibits discharge of anything other than stormwater into the stormwater system; prohibits illicit connections; prohibits activities that could contaminate stormwater; and establishes prevention, control, and reduction of stormwater pollutants by best management practices.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	Yes	-	-	-
Comment: None					
Site Plan Review	Yes	No	Chapter 200, Zoning	Local, County	Local and County Planning Board referral
Comment: The site plan review process is intended to secure compliance with the requirements and standards set forth in this chapter and with accepted professional design practice for such site improvements as grading, drainage, means of access, signs, architectural features, screens, sidewalks, curbs, parking, landscaping, fences, driveways, location, and dimension of buildings. Site Plan review is part of the planning process in the village and deliberations encompass exposure to natural hazard risk.					

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Environmental Protection Ordinance	Yes	Yes	Chapter 200, Zoning	Local	Planning Board
Comment: SEQR is part of the development review process and mandates a thorough environmental review for proposed projects.					
Flood Damage Prevention Ordinance	Yes	Yes	LL3-2019, Chapter 97, Flood Damage Prevention.	Local	FPA
Comment: The Ordinance establishes the following purposes • Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; • Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; • Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; • Control filling, grading, dredging and other development which may increase erosion or flood damages; • Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands, and; • Qualify for and maintain participation in the National Flood Insurance Program. The ordinance requires BFE+2 feet for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	No	Yes	-	-	-
Comment: None					
Emergency Management Ordinance	No	Yes	-	-	-

Comment: None					
Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Disaster Reconstruction Ordinance	No	No	-	-	-
Comment: None					
Other	Yes	No	Chapter 170, Trees	Local	Tree Committee
Comment: The purpose of this chapter is to manage the trees within the public right-of-way, in parks, and on public property in the village; assure the proper planting of new trees in these public spaces, maintain the health of existing trees in these public spaces; aid in maintaining property values in the village; implement the design and environmental goals of the Village Comprehensive Plan, and promote the general health and welfare of the village residents. The chapter aims to: • Create a Tree Committee to establish regulations governing the planting, maintenance, and removal of trees and shrubs in the public streets, rights-of-way, parks and other municipally owned or controlled property in the village; • Preserve green foliage on village streets and public property; • Replace trees that must be removed from public property because of disease, lack of treatment or interference with village utilities; • Prevent interference with village utility pipes, wires, sidewalks, or streets.					
Planning Documents					
Comprehensive Plan	Yes	No	Village of Springville Comprehensive Plan. 2014.	Local	Village Board
Comment: The Comprehensive Plan aims to preserve natural environment by protecting sensitive environmental areas from development and encouraging environmentally sensitive site design. Development of a stormwater management program to control stormwater runoff. Restrict development in areas with steep slopes, wetlands, and floodplains to mitigate flooding and erosion issues by requiring floodplain development permits, environmental protection overlay districts, zoning, and strict adherence to regulatory requirements. The Plan includes Floodplain Overlay District Maps.

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Springville to oversee and track development.

Table 9.41-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Michael Kaleta manages the Code Enforcement Office and issues development permits.
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe	Yes	There is vacant property in various parts of the village and some of these properties have water and sewer access.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
If no, please quantitatively describe the level of buildout in the jurisdiction.		

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Springville and their current responsibilities which contribute to hazard mitigation.

Table 9.41-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Five Planning Board members administer the Zoning Code in consideration of natural hazard exposure
Zoning Board of Adjustments	Yes	Five-member Zoning Board of Appeals considers requests from applicants to vary from the Zoning Code.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Department of Public Works keeps roadways in good condition, manages electric and water facilities and mitigates against natural hazards.
Construction/Building/Code Enforcement Department	Yes	Mike Kaleta, Code Enforcement Officer. The Department issues building permits and examines the location of proposed construction in the flood zone.
Emergency Management/Public Safety Department	Yes	The Police Department provides emergency management services.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	The village Police Department ensures that warnings are issued during a hazard event, via social media and other systems.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Department of Public Works keeps roadways in good condition, manage electric and water facilities and mitigate against natural hazards.
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	The village retains a consulting engineer to assist with planning administration.
Engineers or professionals trained in building or infrastructure construction practices	Yes	The consultant engineer assists with building or infrastructure related projects as needed.
Planners or engineers with an understanding of natural hazards	Yes	The consultant engineer provided guidance about hazard exposure.
Staff with expertise or training in benefit/cost analysis	Yes	The consultant engineer provided guidance about hazard exposure and preparation of benefit cost analysis.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Professionals trained in conducting damage assessments	Yes	Damage assessments at the village can be prepared by the Code Enforcement Officer or the consulting engineer.
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	The village Code Enforcement Officer is the designated Floodplain Administrator.
Surveyor(s)	Yes	Consulting Engineer provides surveying services.
Emergency Manager	Yes	Emergency Management services for the village are provided by the Police Department.
Grant writer(s)	Yes	Consultant grant writer completes funding applications.
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	The village's consulting engineer advises the village on environmental project elements.

Fiscal Capability

The table below summarizes financial resources available to the Village of Springville.

Table 9.41-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Springville.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.41-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Administrator
Personnel skilled or trained in website development	Yes	Office Clerk
Hazard mitigation information available on your website	Yes	The village website contains a large amount of information about zoning and related land use matters, many of which are impacted by hazard exposure.
Social media for hazard mitigation education and outreach	Yes	The village maintains a Facebook page.
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Historic Preservation Committee
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Code Red website, Facebook
Natural disaster/safety programs in place for schools	No	School System/Board of Cooperative Educational Services
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Springville.

Table 9.41-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	5 and 9	June 2014
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	04	January 2015
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:

N/A *Not applicable*

NP *Not participating*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as “the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences” (IPCC 2014). In other words, it describes a jurisdiction’s current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction’s rating.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.41-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.41.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael Kaleta, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Springville.

Table 9.41-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Springville	5	18	$320,646	6	3

Source: FEMA 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Areas prone to flooding in the village are mainly along Spring Brook. It is not known if there are any RiskMAP projects currently underway in the village. The village indicated that no properties have been mitigated. The village's flood hazard maps adequately address the flood risk within the jurisdiction. The village does not have access to resources to determine possible future flooding conditions from climate change.

NFIP Compliance

The Village of Springville does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Visit (CAV) was in December 2009. The Code Enforcement Office is responsible for floodplain administration and this individual is not a certified Floodplain Manager. The village does not have access to resources to determine possible future flooding conditions from climate change. The village stated that its floodplain management staff are not in need of assistance or training to support its

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

floodplain management program. The village makes Substantial Damage determinations after the damage has been assessed. The village's floodplain management meets minimum requirements and includes permit review utilizing GIS technology.

Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Springville has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 39 east and west bound
- Route 219
- Route 240/North Cascade Road.
- Old Route 219.

Sheltering

The Village of Springville has identified the following designated emergency shelters within the village. In case of emergency, the village will coordinate with the Red Cross.

Table 9.41-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None identified. The village will work with county to identify emergency shelter locations, per Proposed Action #2022-Village of Springville-010							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Springville did not identify any sites suitable for placing temporary housing units.

Table 9.41-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with county to identify emergency shelter locations, per Proposed Action #2022-Village of Springville -010					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.41-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with county to identify emergency shelter locations, per Proposed Action #2022-Village of Springville-010					

9.41.5 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.41-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.41-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None identified					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.41.6 Jurisdictional Risk Assessment

The hazard profiles in Section 6 (Mitigation Strategies) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Springville's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Springville has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Springville's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.41-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.41-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, village did not report any damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, village did not report any damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, village did not report any damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, village did not report any damages.
November 12, 2015	High Wind	No	Although the county was impacted, village did not report any damages.
November 18, 2015	High Wind	No	Yes, debris clean up
January 11, 2017	High Wind	No	Yes, debris clean up
March 8, 2017	High Wind	No	Yes, debris clean up
March 13, 2017	Winter Storm	No	Although the county was impacted, village did not report any damages.
July 20, 2017	Tornado	No	Although the county was impacted, village did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, village did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, village did not report any damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, village did not report any damages.
January 2, 2018	Blizzard	No	Yes, snow removal extra effort
October 6, 2018	Lightning	No	Although the county was impacted, village did not report any damages.
February 24, 2019	High Wind	No	Although the county was impacted, village did not report any damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, village did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, village did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, village did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, village did not report any damages.
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, village did not report any damages.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, village did not report any damages.
March 2020 to Present	COVID Pandemic, DR 4480	No	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents. The village was awarded $5,000 to fund PPE and EMS/Fire cleaning equipment

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Springville's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Springville. The Village of Springville has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated that it agreed with the hazard ranking below.

Table 9.41-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.41-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
None Identified				

Source: FEMA 2020

Identified Issues

After review of the Village of Springville's hazard event history, hazard rankings, jurisdiction specific vulnerable

- Flood waters lack open space for open flow.
- The wastewater treatment plant generator only runs the digester building. The facility lacks backup power.
- NYS Route 39 is subject to closure due to hazard events
- Some properties flood repetitively. The village should seek to purchase land that falls within flood plains and assist homeowners with Repetitive Loss Properties.
- The village needs to work with electric service providers to ensure that power is not interrupted during hazard events.
- There are problems with water drainage along NYS Route 39 (Main Street). If the culvert under this state road collapses, it would create a serious problem for the village.
- The culvert over Spring Brook needs replacing.
- Cybersecurity is a serious concern for village operations
- The village is unable to identify locations for emergency shelters, temporary or permanent housing.
- Village offices lack backup power

9.41.7 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.41-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Continue maintenance of drainage ditches, culverts and related structures	Flooding	Not Identified	DPW	Ongoing	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing capability
	The Village will continue evaluate land that may be purchased that falls within the flood plain areas of the Village for recreation and stormwater management purposes	Flooding	Not Identified	Village Board	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. 3.
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	Not Identified	Legal, Code Enforcement	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Legal, Code Enforcement, Village Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete

Packet Pg. 2690

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Springville has not identified mitigation projects/activities that have been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Springville participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.41-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X	-	X	-	-	X	-	-	X
Cyber Attack	X	X	-	X	-	X	X	-	-	X
Earthquake	X	X	-	X	-	-	X	-	-	X
Expansive Soils	X	X	-	X	-	-	X	-	-	X
Extreme Temperature	X	X	-	X	-	-	X	-	-	X
Flood	X	X	X	X	X	X	X	-	-	X
Hazardous Materials	X	X	-	X	-	-	X	-	-	X
Landslide	X	X	-	X	-	-	X	-	-	X
Pandemic	X	X	-	X	-	-	X	-	-	X
Severe Storm	X	X	-	X	-	X	X	-	-	X
Severe Winter Storm	X	X	-	X	-	-	X	-	-	X
Utility Failure	X	X	-	X	-	X	X	-	-	X
Wildfire	X	X	-	X	-	-	X	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.41-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Springville would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.41-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.41-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-V Springville-001	Create open space along riverways to allow for storm water flows	1	1	1	1	1	1	0	1	1	1	0	0	1	1	11	High
2022-V Springville-002	Protect wastewater treatment plan from the risk of power failure	1	1	1	1	1	1	0	1	1	1	1	0	1	0	11	High
2022-V Springville-003	Repetitive Loss Properties	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2022-V Springville-004	Work with NYSDOT to ensure that NYS Route 39 remains functional during hazard incidents	1	1	1	1	1	0	1	1	1	1	1	0	1	0	11	High
2022-V Springville-005	Work with Electric Utilities to ensure that power is not interrupted during hazard events	1	1	1	1	1	0	1	1	1	1	0	1	1	0	11	High
2022-V Springville-006	Backup power for Village offices	1	1	1	1	1	1	0	1	1	1	0	1	1	1	12	High
2022-V Springville-007	Replace culvert over Spring Brook	1	1	1	1	1	0	1	1	1	1	0	1	1	1	12	High
2022-V Springville-008	Address Cybersecurity threats	1	1	1	1	1	1	0	1	1	1	0	1	1	0	12	High
2022-V Springville-009	Identify locations for emergency shelter, temporary and permanent housing locations	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.41.8 Action Worksheets

The following action worksheets have been developed by the Village of Springville to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Protect wastewater treatment plant from the risk of power failure		
Project Number:	2022-V Springville-002		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	The village's Wastewater Treatment Facility lacks backup power. The facility provides critical water treatment services.		
Description of the Solution:	The village will purchase, install, and maintain a backup generator for the Wastewater Treatment Facility.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect against power failure	**Estimated Benefits (losses avoided):**	Ensures continuity of wastewater services
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	~$320,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Village DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues
	Build a dedicated solar field	Very high	Prohibitively expensive

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Backup power for wastewater treatment plant	
Project Number:	2022-V Springville-002	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will protect critical services provided by the wastewater treatment plant
Property Protection	1	Project will protect the plant from power failure
Cost-Effectiveness	1	
Technical	1	
Political	1	
Legal	1	The village has legal authority to complete the project.
Fiscal	0	Project requires funding support
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	1	All Hazards, Utility Failure
Timeline	0	Within 3 years
Agency Champion	1	Village DPW
Other Community Objectives	0	
Total	11	
Priority (High/Med/Low)	High	

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Repetitive Loss Properties		
Project Number:	2022-V Springville-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	There are 9 Repetitive Loss Properties within the village.		
Description of the Solution:	The village will work to notify all property owners with residences within the floodplain and support flood mitigation projects at these addresses. If interested, the village will support grant applications, project development, and administrative tasks related to flood mitigation projects including retrofitting, hardening, and elevation as necessary.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect safety of residents whose homes are in the floodplain	**Estimated Benefits (losses avoided):**	Protect homeowners from flooding
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	Outreach cost is low. Cost to acquire or mitigate properties will vary by property	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 2 years
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP, BRIC FMA, cost-share for residents
Responsible Organization:	FPA, homeowners	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management , Education and Awareness
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues
	Require all homes to be raised six feet	Very high	Prohibitively expensive
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 80-Section-9.41-Springville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.42 City of Tonawanda

This section presents the jurisdictional annex for the City of Tonawanda. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the city participated in the planning process; an assessment of the City of Tonawanda's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.42.1 Hazard Mitigation Planning Team

The following individuals have been identified as the City of Tonawanda's hazard mitigation plan primary and alternate points of contact. The City of Tonawanda followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many city departments, including Emergency Management and the Building Department. The Deputy Director of Emergency Management and the Fire Chief represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.42-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Mark Banks, Director, Emergency Management Address: 200 Niagara Street Tonawanda, NY 14150 Phone Number: 716-692-8400 x408 Email: mbanks@tonawandacityfd.com	Name/Title: Chuck Stuart, Fire Chief and Co-Director of Emergency Management Address: 200 Niagara Street Tonawanda, NY 14150 Phone Number: 716-695-9291 Email: firechief@tonawandacityfd.com
NFIP Floodplain Administrator	
Name/Title: Erik Lindhurst, Building Inspector Address: 200 Niagara Street Tonawanda, NY 14150 Phone Number: 716-695-1806 Email: bldginsp@tonawandacity.com	

9.42.2 Municipal Profile

The City of Tonawanda is four square miles in size and is located within the northwestern corner of Erie County. The Niagara River, Tonawanda Creek/Erie Canal, and the Town of Tonawanda form the city's northern border. The city is entirely contained within the Town of Tonawanda. NYS Routes 265, 266, 384, 425 traverse the city.

The Iroquois Indians named this area after the Tonawanda Creek. The first white settler to the area was Henry Anguish, who built a log home in 1808 (Wikipedia 2014). The completion of the Erie Canal in 1825 spurred development in the new community. A large lumber mill that operated in Tonawanda lent the town the title of the "Lumber Capital of the World" (City Tonawanda 2018). Tonawanda incorporated as a village in 1854. In 1857 the northern portion of the village separated to become the City of North Tonawanda in Niagara County. In 1903, Tonawanda changed its status from village to city and then lobbied New York to re-construct a segment

of the Erie Barge canal. The mouth of Tonawanda Creek, located in the City of Tonawanda, became the western terminus of the Canal. As transportation modes shifted, the Barge Canal's importance quickly declined. A decline in regional manufacturing resulted in the decline of business in the City's downtown area. (City of Tonawanda 2018). The City of Tonawanda is centered on the Gateway Harbor, a public park that runs along the Erie Canal just before it joins the Niagara River. During the summer, local boaters can dock for free in the Harbor (Wikipedia 2020).

According to the U.S. Census, the 2010 population for the City of Tonawanda was 15,130. The estimated 2019 population was 14,830, a two percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.0 percent of the population is 5 years of age or younger and 19.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.42.3 Jurisdictional Capability Assessment and Integration

The City of Tonawanda performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Mitigation Strategies) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.42.3). The City of Tonawanda's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the City of Tonawanda. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.42-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	City of Tonawanda Building Code, Chapter 14, 2008	State and Local	New York State Department of State, New York State Code Council. Enforced by the Building Department.
Comment: This ordinance provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in this city. This ordinance is adopted					

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
pursuant to section 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this ordinance, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this ordinance.					
Zoning Code	Yes	No	Zoning, Chapter 14, 1997, amended 2020	Local	Town Board, Planning Board
Comment: The comprehensive zoning plan is adopted to secure safety from flooding, to promote and protect public health, safety, convenience, and other aspects of the general welfare. These general goals include, among others, the following specific purposes relating to hazard mitigation: • Secure safety from fire, flood, panic, and other dangers. • Lessen congestion in the streets and facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements. • Encourage the most appropriate use of land to protect and conserve property values throughout the city. • Bring about the gradual conformity of land and buildings to the comprehensive zoning plan.					
Subdivision Ordinance	Yes	No	Chapter 58, Subdivision of Land, 1989	Local	Code Enforcement/Building
Comment: This chapter is adopted for the purpose of providing for the orderly growth and development of the city and affording adequate facilities for the housing, transportation, distribution, comfort, convenience, safety, health, and welfare of its population.					
Stormwater Management Ordinance	Yes	Yes	Chapter 52, Stormwater Management	Local	City of Tonawanda Common Council, Enforced by the Building Department, and the Engineering Department.
Comment: Proactive stormwater management reduces flood risk. The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the health, safety, and welfare of the public residing within this jurisdiction. This chapter seeks to meet those purposes by achieving the following objectives: • Meet the requirements of minimum measures 4 and 5 of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02 or as amended or revised; • Require land development activities to conform to the substantive requirements of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, Permit No. GP-02-01 or as amended or revised; • Minimize increases in stormwater runoff from land development activities to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels; • Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality; • Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and • Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	Yes	-	-	-
Comment: None					
Site Plan Review	Yes	No	Ordinances of the City of Tonawanda, Chapter 82, Site Plan, Zoning	Local	City of Tonawanda Common Council, the City of Tonawanda Planning Board, and Enforced by the Building Department.
Comment: Site plan review incorporates consideration of natural hazard exposure					
Environmental Protection Ordinance	Yes	Yes	Chapter 26; Environment	Local	City Council

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The City's Environment Ordinance aims to protect its ecological resources which, in part, provide protection from natural hazard impacts.					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 34 Flood Damage Prevention, 2019	Local	FPA
Comment: It is the purpose of this article to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: • Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; • Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; • Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; • Control filling, grading, dredging and other development which may increase erosion or flood damages; • Regulate the construction of flood barriers which will unnaturally divert floodwaters, or which may increase flood hazards to other lands; and • Qualify and maintain for participation in the National Flood Insurance Program. BFE+2 feet is required for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Division 6, Section 66-351 thru 366	County	FPA, City Engineer
Comment: Coordination of stormwater management to prevent flooding.					
Emergency Management Ordinance	No	Yes	-	-	-
Comment: None					
Climate Change Ordinance	No	Yes	-	-	-
Comment: None					
Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Disaster Reconstruction Ordinance	No	No	-	-	-
Comment: None					
Other	No	No	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	No	City of Tonawanda, Comprehensive Plan, 2002	Local	City of Tonawanda Common Council, Enforced by the Building Department, and the Engineering Department.
Comment: The Comprehensive Plan's objectives are to retain open space through preservation of sensitive environmental areas such as steep slopes and waterways. Development in flood-prone areas should be controlled using zoning laws. Development should not increase run-off in waterway areas. City is awaiting NYS approval of the latest version of our Comprehensive Plan.					
Capital Improvement Plan	No	No	-	-	-
Comment: None					
Disaster Debris Management Plan	No	No	-	-	-
Comment: None					

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Floodplain or Watershed Plan	No	-	-	-	-
Comment:

Urban Water Management Plan	No	No	-	-	-
Comment: None					
Habitat Conservation Plan	No	No	-	-	-
Comment: None					
Economic Development Plan	No	No	-	-	-
Comment: None					
Shoreline Management Plan	Yes	Yes	Local Waterfront Revitalization Plan	Local	LWRP Steering Committee
Comment: The Local Waterfront Revitalization Plan (LWRP), or waterfront plan, is a community-driven document that provides guidance on future policies, projects, and actions specifically related to the waterfront. The original plan was developed in 1986 and updated in 1991; many changes have taken place since that time and the City desires to take a proactive approach by developing a solid plan for the future of the waterfront. Although the Niagara River is the most prominent feature, this plan also includes Two Mile Creek, Tonawanda Creek/Erie Canal, and Ellicott Creek. Funding for the update to the plan was provided by a grant from the New York State Department of State under the Environmental Protection Fund.					
Community Wildfire Protection Plan	No	No	-	-	-
Comment: None					
Forest Management Plan	No	No	-	-	-

Other	Yes	No	Railroad Emergency Plan	Local	City DPW, Emergency Manager
Comment: The Railroad Emergency Plan equips the city to respond effectively to railroad related emergencies.					

Development and Permitting Capability

The table below summarizes the capabilities of the City of Tonawanda to oversee and track development.

Table 9.42-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	The City of Tonawanda Building Department issues the required building, plumbing and electrical permits for the project.
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	If a building is constructed in a floodplain then a floodplain permit is required.
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The Building Department estimates that the City of Tonawanda is roughly 95% fully built out.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the City of Tonawanda and their current responsibilities which contribute to hazard mitigation.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.42-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The City of Tonawanda Planning Board is a separate board of appointed people that reviews project for compliance with New York State planning guidelines.
Zoning Board of Adjustments	Yes	The City of Tonawanda Zoning Board of Appeals is a separate board of appointed people that reviews specific project variance requests for compliance with local ordinance. This board will then decide if the requested variance is approved or denied based on various factors relating to the neighborhood.
Planning Department	No	-
Mitigation Planning Committee	Yes	OEM, Fire, Police, Engineering
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The City Public Works Department mitigates against natural hazards by protecting assets such as roads, sewer, and water infrastructure.
Construction/Building/Code Enforcement Department	Yes	The Building Inspection Department is responsible for enforcement of the New York State Uniform Fire Prevention and Building Code, the City of Tonawanda Zoning Ordinance and other local laws and ordinances.
Emergency Management/Public Safety Department	Yes	City of Tonawanda Emergency Management involves the Volunteer Director, Disaster Planning Advisory Committee. Over sees emergency planning with the city such as the CEMP, Railroad Emergency Plan. Coordinates with all City Departments Hazard Mitigation Planning. Responsible for the operation of the EOC during an emergency or potential emergency. Works daily with the Fire and Police Departments.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Through city applications, NY Alert, School District though phone calling app
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Public Works Department and Parks Department staff maintain programs to reduce hazard risk, including street repair, culvert maintenance and facility management.
Mutual aid agreements	Yes	Police, Fire, Emergency Management. DPW
Other	Yes	Traffic and Safety Board and Local Waterfront Revitalization Committee
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	The Building Inspector and the City Engineer
Engineers or professionals trained in building or infrastructure construction practices	Yes	The Building Inspector and the City Engineer

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planners or engineers with an understanding of natural hazards	Yes	The Building Inspector and the City Engineer
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Trained to perform evaluations and determine the professional assistance required to perform a complete evaluation. Staff performing this level evaluations are the Building Inspector, City Engineer, Fire Inspector and Fire Personnel and Emergency Management Director
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	The Building Inspector and the City Engineer have limited training in the use of GIS software.
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Erik Lindhurst, Building Inspector
Surveyor(s)	No	-
Emergency Manager	Yes	Coordinates all activities for city in concert with the Police Chief and Fire Chief.
Grant writer(s)	Yes	Consultant grant writer
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the City of Tonawanda.

Table 9.42-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	Yes, Treasurer
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	Yes, Treasurer
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes, Treasurer
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the City of Tonawanda.

Table 9.42-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	City Clerk's office
Personnel skilled or trained in website development	Yes	City Clerk's office
Hazard mitigation information available on your website	Yes	https://www.tonawandacity.com/residents/emergency_management.php
Social media for hazard mitigation education and outreach	Yes	Facebook pages for Tonawanda Emergency Management, Fire, Police, Fire Department Union IAFF Local 859. Booths at public events sharing information.
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Disaster Planning Advisory Committee
Other programs already in place that could be used to communicate hazard-related information	Yes	The city provides hazard mitigation information during public and educational events.
Warning systems for hazard events	Yes	Broadcast Media, Social Media, School District Radio Station, NY Alert, ReadyErie App
Natural disaster/safety programs in place for schools	Yes	Project Save, Communicable Disease Disaster Plan, District Wide Safety Plan, Building Level Safety Plan.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the City of Tonawanda.

Table 9.42-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	Unknown	Unknown
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	3	March 1, 2019
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (Intergovernmental Panel on Climate Change, 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.42-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.42.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Erik Lindhurst, Building Inspector

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the City of Tonawanda.

Table 9.42-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
City of Tonawanda	4	9	$26,665	0	0

Source: FEMA 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Areas in the City of Tonawanda that are prone to flooding include a small section of parkland along Tonawanda Creek. There are five structures located in the floodplain which have LOMC's; these structures have been

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

removed from the floodplain. The city does not maintain a list of properties that have been damaged by flooding nor a list of property owners interested in flood mitigation. There are not any RiskMAP projects currently underway in the town. The city did not identify how many (if any) properties have been mitigated. The city flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

The City of Tonawanda does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Contact (CAC) was in February 2017. The Building Department is responsible for floodplain administration, however; the Building Inspector is not a certified Floodplain Manager. The city does not have access to resources to determine possible future flooding conditions from climate change. The city did not identify if the floodplain management staff needs any assistance or training to support its floodplain management program. When determining if proposed development on an existing structure qualifies as a substantial improvement, the FPA will estimate the value of new work completed versus the assessed value of the entire property. The Building Inspector issues floodplain permits for any construction or substantial improvement to properties within the floodplain. The Building Inspector reviews construction documents that are provided with the permit documents for compliance with all applicable codes and ordinances. Once the permit is issued the Building Inspector will conduct the required inspections to verify that construction conforms with submitted plans.

9.42.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The City of Tonawanda has identified the following routes and procedures to evacuate residents prior to and during an event.

- Routes 265/384/425 for north to south evacuation
- Route 266 for westbound evacuation
- Fletcher Street for east and westbound evacuation

The City Police Department coordinates evacuation effort per the Comprehensive Emergency Management Plan. Auxiliary Police and Fire Police may also be utilized during evacuations. Emergency notifications are made via broadcast media, social media, and mobile announcements from emergency vehicles. In some situations, notification will be made door to door by first responders.

Sheltering

The City of Tonawanda has identified the following designated emergency shelters within the city.

Table 9.42-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Tonawanda High School	600 Fletcher Street	500	No, Assistance Provided by SPCA	Yes	Yes	Local EMS and Hospitals in region.	2 Kitchens, Refrigerators, Freezers, Griddles, Ovens, Convection

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
(ARC Approved)							Ovens, Microwave Ovens, 2-way radios, 30 phone lines, PA System, At times Govt. surplus food on site
Tonawanda Senior Center (ARC Approved)	35 Main Street	60	No, Assistance Provided by SPCA	Yes	No	Local EMS and Hospitals in region	Small Kitchen
Tonawanda Youth Center (ARC Approved)	291 Kohler Street	45	No, Assistance Provided by SPCA	Yes	No	Local EMS and Hospitals in region	Small Kitchen
Boys and Girls Club (ARC Approved)	325 Franklin Street	150 sleeping, 250 sitting	No, Assistance Provided by SPCA	Yes	No	Local EMS and Hospitals in region	Kitchen, Steamer, Refrigerators, Freezers, 8 Burners, Maximum seating 250 PA System

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The City of Tonawanda has identified the following sites suitable for placing temporary housing units.

Table 9.42-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Veterans Park	Niagara Street	24	Trailers on Pavement	Water. Power, Sewer in area	Power, Water, Sewer connections required to be run from nearby locations
Big Lots Plaza Parking Lot	750 Young Street	30 to 40 (More if Businesses are Closed)	Trailers on Pavement	Water. Power, Sewer in area	Power, Water, Sewer connections required to be run from nearby locations
Kohler Pool Parking Lot	291 Kohler Street	20	Trailers on Pavement	Water. Power, Sewer in area	Power, Water, Sewer connections required to be run from nearby locations

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The City of Tonawanda did not identify any permanent housing locations.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.42-12. Permanent Housing Locations

Site Name	Site Address	Infrastructure / Utilities Available (water, electric, septic, etc.)	Capacity (number of sites)	Type	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The city will coordinate with county and neighboring municipalities (Action 2022-City Tonawanda-006)					

9.42.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.42-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.42-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	12	0	18	0	14	0	9	0	11	0	7	0
Multi-Family	0	0	1	0	1	0	1	0	3	0	1	0
Other (commercial, mixed-use, etc.)	4	0	3	0	3	0	3	0	8	0	2	0
Total Permits Issued	**16**	**0**	**22**	**0**	**18**	**0**	**13**	**0**	**22**	**0**	**10**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
233 Wales Ave	Commercial	2,376 panel ground mounted solar array.	Wales Avenue	NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area	Completed and occupied
332 Wheeler	Commercial	41,000sf heavy equipment sales & service building – Milton CAT	332 Wheeler Street	½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines	Under construction
378 Franklin	Commercial	12,528 sf Addition	378 Franklin Street	½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area, ½	Under construction

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

				Mile Buffer from HazMat Pipelines	
80 Clinton	Commercial	97.92Kw roof top solar	80 Clinton St.	½ Mile Buffer from HazMat Roadways, Hazardous Materials Facilities Hazard Area	Completed

9.42.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the City of Tonawanda's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the City of Tonawanda has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.42-1. City of Tonawanda Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The City of Tonawanda's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.42-14 provides details regarding municipal-specific loss and damages the city experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.42-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	Though the county was impacted by this event, the city did not report any damages.
August 11-15, 2015	Flash Flood	No	Though the county was impacted by this event, the city did not report any damages.
October 28-29, 2015	High Wind	No	Though the county was impacted by this event, the city did not report any damages.
November 6, 2015	Thunderstorm Wind	No	- Though the county was impacted by this event, the city did not report any damages.
November 12, 2015	High Wind	No	Overtime for tree damage.
November 18, 2015	High Wind	No	Overtime for tree damage.
January 11, 2017	High Wind	No	Overtime for tree damage.
March 8, 2017	High Wind	No	Overtime for tree damage.
March 13, 2017	Winter Storm	No	Overtime for plowing and snow removal.
July 20, 2017	Tornado	No	Though the county was impacted by this event, the city did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Though the county was impacted by this event, the city did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Overtime for plowing.
December 24-29, 2017	Lake-effect Snow	No	Overtime for plowing.
January 2, 2018	Blizzard	No	Overtime for plowing and snow removal.
October 6, 2018	Lightning	No	Though the county was impacted by this event, the city did not report any damages.
February 24, 2019	High Wind	No	Overtime for tree damage.
February 24, 2019	Lakeshore Flooding	No	Though the county was impacted by this event, the city did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Overtime for tree damage.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Though the county was impacted by this event, the city did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Though the county was impacted by this event, the city did not report any damages.
January 12, 2020	Lakeshore Flooding	No	Though the county was impacted by this event, the city did not report any damages.
January 18, 2020	Lakeshore Flooding	No	Though the county was impacted by this event, the city did not report any damages.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the City of Tonawanda's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the City of Tonawanda. The City of Tonawanda has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the city indicated concurrence with the derived Hazard Rankings shown below.

Table 9.42-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Low	Medium	Low	High

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.42-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
City Hall	Public Facility	X	X	2022-City Tonawanda-004

Source: FEMA 2020a and 2020b

Identified Issues

After review of the City of Tonawanda's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the City of Tonawanda has identified the following vulnerabilities within their community:

- Tonawanda Towers apartments at 5 Main Street and apartments at 284 Main Street are residential high-rise buildings that lack adequate backup power. Firefighters have carried residents down 11 flights of stairs in emergency events.
- The city lacks the full range of firefighting equipment to respond to all hazard events as they occur. This includes the ability to effectively respond to hazardous material releases.
- Rail lines within the city present hazardous materials risks
- The City DPW facility provides a range of critical operations and lacks backup power.
- City Hall is in the 0.2% annual chance flood zone. Note, that protection of the town hall is the ultimate responsibility of the town, not the city's administration.
- Certain properties in the city may flood repetitively.
- Trees along public rights of way can damage power lines and other assets.
- Storm sewers backup up during rain events which can cause flooding
- The Floodplain Manager requires training to fully implement the NFIP program within the city.
- The shoreline of the Tonawanda Creek is eroded. The Canal Authority has control over mitigation efforts along the designated canal corridor.
- The City was not able to identify permanent housing locations
- The city lacks up to date emergency equipment.
- Emergency response along the Ellicott Creek, Niagara River and Barge Canal can be improved

9.42.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.42-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Threat of terrorist attacks at mass gatherings and/or along rail lines. Funding for increased security.	Man-Made Hazard	Not Identified	Police	Ongoing	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing capability
	Increase funding for updated firefighting equipment and training facilities.	Fire	Potential for a serious fire due to older construction, separation requirements, and infrastructure	Fire	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP. 2. 3.
	HAZMAT in transit: Increased funding for additional training of 1st responders. Increase security along rail lines.	Man-Made Hazard	Not Identified	Office of Emergency Management	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP. 2. 3.
	Erosion control: Continuing natural erosion of the riverbed along the city shoreline.	Natural	Not Identified	City Engineer	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP. 2. 3.
	Tree Removal to reduce or avoid damage secondary to wind, ice, and storms.	Natural	Not Identified	Parks and Recreation	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP. 2. 3.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The City of Tonawanda has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The city maintains a Fire Prevention and Fire Training Program with personnel assigned to carry out and coordinate these efforts.
- The Comprehensive Emergency Management Plan was updated in 2018.
- The Railroad Emergency Plan developed and adopted in 2017.

Proposed Hazard Mitigation Initiatives for the HMP Update

The City of Tonawanda participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.42-18. Analysis of Mitigation Actions by Hazard and Category

Wildfire	X	X	-	X	-	-	X	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.42-19 summarizes the comprehensive range of specific mitigation initiatives the City of Tonawanda would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.42-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.42-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-City Tonawanda-001	Protect the City DPW facility from loss of power	1	All Hazards, Utility Failure	**Problem**: The City DPW facility provides a range of critical operations including snow plowing, ditch cleaning and road repair. The facility lacks backup power. **Solution**: The City DPW will conduct an engineering analysis to confirm the need for and determine the appropriate size of generator. City DPW will install and maintain backup power at the facility.	Yes	No	Within 2 years	City Department of Public Works	~$75,000	Continuity of critical services for all hazards	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, EMPG, Municipal Budget	High	SIP	ES
2022-City Tonawanda-002	Backup power for Tonawanda Towers & 284 Main Street apartments	1	All Hazards	**Problem**: Tonawanda Towers and the Kibler apartments at 284 Main Street are residential high-rise buildings that lack adequate backup power. Firefighters have had to carry residents multiple flights of stairs in emergency events. **Solution**: Assist owner of Tonawanda Towers and Kibler Apartments to apply for funding to purchase and install a backup generator at the residential high-rise.	No	No	Within 3 years	Owner of Tonawanda Towers & 284 Main Street	~$75,000 per generator installed	Ensure safety within and orderly evacuation of the high-rise building during an emergency	BRIC, HMGP, FEMA	High	EAP	PI
2022-City Tonawanda-003	Update firefighting equipment and training facilities.	1	Wildfire, All Hazards	**Problem**: The City lacks the full range of firefighting equipment to respond to all hazard events as they occur. This includes the ability to effectively respond to	No	No	Within 3 years	City Fire Department, City Board	$1.3 million	Ensure Fire Department is fully capable of responding to emergencies cause by	USDA Community Facilities Grant Program, EMPG,	High	LPR	ES

2022-City Tonawanda-008	Upgrade storm sewers	1	Flood, Severe Storm	**Problem:** Specified storm sewers flood and overtop during heavy rain events. **Solution:** City DPW will determine correct sizing for storm sewers, and will then replace existing infrastructure as appropriate.	No	No	Within 3 years	City Engineer	TBD by engineering analysis	Protect against flooding due to poor water drainage	BRIC, HMGP	High	SIP	SP
2022-City Tonawanda-009	Improve Fire Department emergency response on the Niagara River, Barge Canal, and Ellicott Creek	1	All Hazards	**Problem:** The Fire Department provides All Hazard response to water emergencies on the Niagara River, State Barge Canal, Ellicott Creek as well as other areas of Western New York through mutual aid. The current inflatable boat with a 15 hp motor no long meets the needs of water rescue particularly on the Niagara River. The boat lacks power to work against the current. It limits the number of people that can be on the boat. It is difficult to perform EMS treatment to victims on the boat. **Solution:** Solution: Under the direction of the Fire Chief, the Boat would be replaced. The recommendation is 19'4" Rhibcraft Rescue Boat with trailer. This boat would have 115 hp outboard capable of close shore operations. The boat would	No	No	2 years	Fire Department	$75,000	Enhanced Emergency Response along busy waterways	EMPG, municipal budget	High	LPR	ES

OEM	*Office of Emergency Management*

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.42.9 Action Worksheets

The following action worksheets have been developed by the City of Tonawanda to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

City of Tonawanda Action Worksheet			
Project Name:	Protect the City DPW facility from loss of power		
Project Number:	2022-City Tonawanda-001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	The City DPW facility provides a range of critical operations including snow plowing, ditch cleaning and road repair. The facility lacks backup power.		
Action or Project Intended for Implementation			
Description of the Solution:	The City DPW will conduct an engineering analysis to confirm the need for and determine the appropriate size of generator. City DPW will install backup power at the facility. The City DPW will maintain the backup generator.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect facility from power failure	**Estimated Benefits (losses avoided):**	Ensures continuity of flood protection services at the DPW facility
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	~$75,000 estimate	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 2 years
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	FEMA HMGP, BRIC USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	City DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Construct a dedicated solar array	Very High	Variable power output
	Remove DPW facility	High	Lose the services provided by the facility.

Agency Champion	1	City DPW
Other Community Objectives	0	
Total	12	
Priority (High/Med/Low)	High	

Attachment: 81-Section-9.42-Tonawanda-C-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

City of Tonawanda Action Worksheet			
Project Name:	Update firefighting equipment and training facilities.		
Project Number:	2022-City Tonawanda-003		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	Currently 2 of 3 Fire Department Pumpers are substandard. In addition the lack of Foam equipment limits hazmat responses in some situations. Engine 1, a 1996 model, has a rotten frame which has been reinforced stop gap patch. The Pumper has a large amount of rust and corrosion which weaken the whole truck. The age of the pumper exceeds the NFPA 1901 age for reserve and front line equipment. Engine 2, a 2003 American LaFrance, has had tank, diesel engine and pump issues. In addition each year replacement parts become more limited due to the bankruptcy of American LaFrance and no new parts being manufactured. This engine exceeds the NFPA 1901 standards for first line firefighting equipment. These two Pumpers must be replaced to allow proper fire suppression and rescue operations for All Hazard Situations. This is a carryover item from the original plan. In addition the department needs a Hazmat initial response Trailer to help contain situations until mutual aid Hazmat Teams arrive		
Action or Project Intended for Implementation			
Description of the Solution:	Under the leadership of the Fire Chief, two Pumpers with 750 gal water tank, 30 gal foam tank, LED lighting, proper emergency lights and radio systems, etc. to be purchased. Cost would be $1,200,000. The newer technologies, now as standard equipment on the new apparatus, will provide consistency of operations with other department apparatus. This provides for consistency of operation by the pump operators. A 6x12 hazmat utility trailer will be acquired by the City (with appropriate equipment) for initial responses to Hazmat incidents in the city. Cost approximately $25,000.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect community from all hazards	**Estimated Benefits (losses avoided):**	Improves ability of Fire Department and Emergency Management to respond to emergency events
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	$1.3 million	**Mitigation Action Type:**	Emergency Services
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	USDA Community Facilities Grant Program, EMPG, Municipal Budget

Project Name:	Improve Fire Department emergency response on the Niagara River, Barge Canal and Ellicott Creek		
Project Number:	2022-City Tonawanda-010		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	The Fire Department provides All Hazard response to water emergencies on the Niagara River, State Barge Canal, Ellicott Creek as well as other areas of Western New York through mutual aid. The current inflatable boat with a 15 hp motor no long meets the needs of water rescue particularly on the Niagara River. The boat lacks power to work against the current. It limits the number of people that can be on the boat. It is difficult to perform EMS treatment to victims on the boat. The Fire Department provides 24 hour manned emergency response on the area waterways, both in the city and through mutual aid. The Fire Department works in concert with the Police Department patrol boat. The Fire Department Boat can get into areas that the Police Boat is unable to access. The current boat lacks spotlights, has limited rescue equipment, and is vulnerable to ice.		
Action or Project Intended for Implementation			
Description of the Solution:	Under the direction of the Fire Chief, the Boat would be replaced. The recommendation is 19'4" Rhibcraft Rescue Boat with trailer. This boat would have 115 hp outboard capable of close shore operations. The boat would be equipped with LED search lights, emergency light bars, radios, control counsel, dive ladder, etc. The rigid hull will be less vulnerable to damage from rocks than the current inflatable and able to operate in waterways with ice flows.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	All Hazard Water Rescue	**Estimated Benefits (losses avoided):**	Improve emergency response on waterways
Useful Life:	10 years	**Goals Met:**	1
Estimated Cost:	$74,788.00	**Mitigation Action Type:**	Emergency Services
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	EMPG, municipal budget
Responsible Organization:	Fire Department	**Local Planning Mechanisms to be Used in Implementation if any:**	Emergency Services

Three Alternatives Considered (including No Action)			
	Action	**Estimated Cost**	**Evaluation**
Alternatives:	No Action	$0	Problem continues.
	Repair current boat	High cost	Will not be a permanent solution, infeasible

City Tonawanda Action Worksheet			
Project Name:	Emergency Management equipment		
Project Number:	2022-City Tonawanda-015		
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	Communications between agencies is critical in emergency situations. As Niagara County has moved to trunked P25 radios, the Fire Department and Police Department lacks communications with the City of North Tonawanda. Tonawanda and North Tonawanda back up each other in Police and Fire incidents. In addition Erie County is gradually migrating radios such as the Sheriff Department, fire ground etc to P25 non trunked. These changes make reduces the agencies the City of Tonawanda departments can communicate with on a daily bases or in an all hazard situation		
Action or Project Intended for Implementation			
Description of the Solution:	Under the direction of the Director of Emergency Management, The Police Department would acquire 15 Kenwood P25 portable radios under State Contract to complete the migration to P25 units. The cost would be $28,125. The Fire Department would acquire 53 portables at $99,375 and 12 mobile radios at $22,800, Emergency Management 3 Mobile radios at $5,700 and 3 portables at $5625. 8 radio heads for updating the dispatch equipment at a cost of $14,800. Install of all equipment is included in the State Contract Pricing. Installation and programming of the radios will be performed by FM Communications. Under State Contract. Total Project cost is $176,425

9.43 Town of Tonawanda

This section presents the jurisdictional annex for the Town of Tonawanda. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Tonawanda's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.43.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Tonawanda's hazard mitigation plan primary and alternate points of contact. The Town of Tonawanda followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including the Emergency Services and Police Department. The Emergency Services Director and the Chief of Police represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.43-1. Hazard Mitigation Planning Team

NFIP Floodplain Administrator	
Name/Title: Matt Sutton, Town Engineer Address: 2919 Delaware Avenue, Kenmore, NY 14217 Phone Number: 716-877-8805 Email: msutton@tonawanda.ny.us	

9.43.2 Municipal Profile

The Town of Tonawanda is 30 square miles in size. The town incorporated in 1836, having been formed from the original Town of Buffalo. The town is bounded on the west by the Town of Grand Island, on the south by the Village of Kenmore and the City of Buffalo and on the east by the Town of Amherst. The City of Tonawanda parted from the Town of Tonawanda in 1903 and that municipality is entirely contained within the town.

The area's original inhabitants, the Iroquois Indians, named this area after the Tonawanda Creek (Town of Tonawanda 2005). Tonawanda became an important crossroads in America's westward expansion. French missionaries and explorers visited in the 1600s. The British secured the territory from the French in 1759 and yielded it to the United States in 1796. During the War of 1812, British soldiers burned the Village of

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Tonawanda. The completion of the Erie Canal in the 1820s brought a new wave of workers and settlers and trade and traffic developed swiftly. The town prospered as an agricultural and trading center.

The town has a close relationship with the Village of Kenmore; collectively the two are known as "Ken-Ton". The town was established in 1836. In 1899, Kenmore incorporated as a village, and remained the town's primary residential and commercial district while the rest of the town was developed into suburban housing during the 1940s and 1950s (Town of Tonawanda 2020).

According to the U.S. Census, the 2010 population for the Town of Tonawanda was 58,144. The estimated 2019 population was 57,027, a 1.9 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.2 percent of the population is 5 years of age or younger and 20.9 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.43.3 Jurisdictional Capability Assessment and Integration

The Town of Tonawanda performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.43.3). The Town of Tonawanda's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Tonawanda. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.43-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 54, Building Code Administration	Local, State	Building Department
Comment: This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code). The Code requires that that all roofs, paved					

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
areas, yards, courts, and courtyards shall be drained into a storm sewer system. The building storm sewer shall be so constructed that no stormwater shall run over sidewalks and driveways, into streets or onto other properties.					
Zoning Code	Yes	No	Chapter 215, Zoning	Local	Building Department/Planning
Comment: The regulations of the Zoning Local Law of the Town of Tonawanda, County of Erie, State of New York are made in accordance with a comprehensive plan and are designed to lessen congestion in the streets; to secure safety from fire, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent overcrowding of land; to avoid undue concentration of population; to make provision for, so far as conditions may permit, the accommodations of solar energy systems and equipment and access to sunlight necessary therefor; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements. The Zoning Code requires the following in relation to hazard mitigation: • development must be sensitive to the physical and environmental limitations, such as limited space, floodplains, and wetlands, characterizing much of the land within the Waterfront Mixed Use District. • Where plans for improvements to the public space include adding or replacing sidewalk, the area between curb and sidewalk shall be landscaped to provide a minimum five-foot snow storage area. • Two Mile Creek and Rattlesnake Creek Buffers. Along the creeks or their tributaries shall be maintained in its natural state or as landscaped open space. The setback distance shall be measured from the average adjacent high-water line of the water body.					
Subdivision Ordinance	Yes	No	Chapter 185, Subdivision	Local	Planning/Tech Support
Comment: The purpose of this chapter is to provide for orderly, efficient growth within the community and to afford adequate facilities for the transportation, housing, comfort, convenience, safety, health, and welfare of its population. The subdivision ordinance requires that existing and proposed buildings, environmental features such as steep slopes, watercourses, waterbodies, wetlands, and wooded areas be protected from natural hazard exposure. Features to be retained or those to be removed should be so indicated. A preliminary plat for a major subdivision shall include grading, erosion control and landscaping plans.					
Stormwater Management Ordinance	Yes	Yes	Chapter 73, Stormwater Management	Local	Town Engineer
Comment: It is the intention of the Town Board of Tonawanda to protect the health and welfare of those residing in the Town of Tonawanda by preventing the dangers arising from improper drainage, unwise diversion, use and obstruction of streams and watercourses and to plan for the present and future use of natural drainage systems and watercourses. The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction. This chapter seeks to meet those purposes by achieving the following objectives: A. Meet the requirements of minimum measures 4 and 5 of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised; B. Require construction activities to conform to the substantive requirements of the NYS Department of Environmental Conservation SPDES General Permit for Construction Activities, Permit No. GP-02-01, or as amended or revised; C. Minimize increases in stormwater runoff from construction activities to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels; D. Minimize increases in pollution caused by stormwater runoff from construction activities which would otherwise degrade local water quality; E. Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and F. Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Chapter 185, Property Condition Disclosure Act	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	Yes	-	-	-
Comment: None					
Site Plan Review	Yes	No	Chapter 215-153, Zoning, Article XXIII	Local	Planning and Development
Comment: Site Plan review is part of the town’s development review and incorporates exposure to hazards. The purpose of this article is to define procedures for the Town Planning Board with assistance from the town's Development Services Staff for review of development					

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
proposed throughout the town to ensure that design elements follow the protection of the health, safety and overall welfare of the community. The intent of site plan review is to evaluate site plans and require changes consistent with minimizing conflicts which may result between the site layout and design of proposed uses and natural site conditions and features and/or existing or planned adjacent uses. Site plan review is also responsible for ensuring that development comply with clearly calculated planning goals and policies such as are provided in the town's Comprehensive Plan and other area-specific planning documents.					
Environmental Protection Ordinance	Yes	Yes	Chapter 76, Environmental Quality Review	Local/State	Planning and Development
Comment: The Environmental Quality Review incorporates consideration of hazard exposure.					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 92, Flood Damage Prevention	Local	FPA
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: (1) Regulate uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; (2) Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; (3) Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; (4) Control filling, grading, dredging and other development which may increase erosion or flood damages; (5) Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and (6) Qualify for and maintain participation in the National Flood Insurance Program. The Chapter requires an elevation of BFE+2 feet for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 165 Sewers, Part 3 Nonstormwater Discharges to MS4, MS4 General Permit GP-0-15-003 – 5/1/2015	Local/State	Engineering
Comment: MS4 regulations mandate that 1) It shall be unlawful for any person to place, deposit or cause to be deposited in any unsanitary manner on public or private property within the Town of Tonawanda, wherein a sanitary sewer district or drainage district has been created, any human excrement, garbage, or other objectionable waste. 2) No person shall make connection of roof downspouts, exterior foundation drains, areaway drains or other sources of surface runoff or groundwater to a building sewer or building drain, which in turn is connected directly or indirectly to a public sanitary sewer.

Shoreline Management Plan	Yes	No	Local Waterfront Revitalization Plan (2008)	Local/State	Town Board, Planning Board, Building Department
Comment: The LWRP is integrated into the town's development review process and considers exposure to natural hazards. The LWRP aims to reduce flooding and erosion. The program extends the designated coastal boundary 1,000 feet inland from River Road to provide greater protection of waterfront resources. Buildings and other structures will be sited in the coastal area to minimize damage to property and the endangering of human lives caused by flooding and erosion. Buildings and other structures within special flood hazard areas, including areas identified as special flood hazards on the flood insurance study maps will be sited to minimize damage to property and human life. In the Tonawanda waterfront, any new development or substantial improvements shall be sited outside the flood hazard area or shall be raised above the base floodplain level. Any permitted uses built within the area designated as the 100-year floodplain shall be flood proof including according to guidelines on Anchoring, construction materials and methods, subdivision proposals, and specific standards.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Tonawanda to oversee and track development.

Table 9.43-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning and Development site plan review and Building Department issuance of building permits

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Separate Floodplain Development Permits are issued by the Town Engineer
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	The Office of Planning and Development maintains an inventory of vacant lands available for development. The town also has a Brownfield Opportunity Area Plan that showcases these properties: Tonawandaopportunity.com The lands East of Military Road are mainly built out (95%).

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Tonawanda and their current responsibilities which contribute to hazard mitigation.

Table 9.43-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	Yes	The mission of the Department of Planning and Development is to help improve the quality of our neighborhoods through best practices in urban planning and the effective administration of U.S. Housing and Urban Development (HUD) programs. This includes the Residential Rehabilitation Program and our First Time Homebuyer Program for income-qualified households as well as our Micro-Enterprise Loan Program for small businesses. The Office of Planning and Development administers several local initiatives that provide decent housing, sound infrastructure investment, economic opportunities, and many public services that improve the quality of town neighborhoods. The Department is in the process of implementing several long-term planning objectives outlined in the town's Comprehensive Plan including a comprehensive zoning law update, neighborhood revitalization plans, cleanup efforts along River Road, and several public infrastructure investments.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Environmental Commission preserves and improves the quality of the natural and man-made environment within the Town of Tonawanda, in the face of population growth, urbanization and technological change with their accompanying demands on natural resources, are found to be of increasing and vital importance to the health, welfare and economic well-being of present and future inhabitants and to require forthright action by the governing body of the Town of Tonawanda.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	The Department of Planning and Development forwards economic development efforts for the town.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Public Works/Highway Department	Yes	Highway Department staff ensure safe passage over town roads and regularly maintain a variety of facilities. The Forestry Department is responsible for: • Planting and maintaining 31,000 trees in the public rights of way • Pruning and removing dead trees and trees that are endangering public health or property • Identifying the sites where there are few trees and planting new trees, so our town continues to enjoy the benefits of an urban forestry The Forestry Department also includes information about Emerald Ash Borer on their webpage. The Highway Department is responsible for ensuring the safety and maintaining the condition of all town streets and rights of way. Services provided include: • Facility maintenance • Issuing permits for work to be performed in the town highway rights of way • Curb cut permits • Street cut permits • Storm receiver cleaning • Road maintenance and repair • Snow plowing and salting of streets • Street sign maintenance and repair • Street sweeping • Tree planting • Tree removal / tree trimming
Construction/Building/Code Enforcement Department	Yes	Tom Duncan, Building Department. The Building Department is responsible for the following activities: • Reviewing plans for new residential construction and issuance of permits for new houses and additions, garages, swimming pools and storage sheds and restrictions on fence installations • Reviewing site proposals for development of vacant property and redevelopment of existing land uses and coordinating the review process with all town departments, Erie County and other interested parties • Reviewing building plans for new commercial buildings and renovations to existing structures • Reviewing plans and issuance of permits for electrical work, plumbing and sump pumps • Issuing permits for temporary shelters and temporary structures, signs, communication towers and antennae, above ground and underground tank installations and removals, operating permits, Christmas tree sales and outdoor dining permits • Issuing contractor's licenses and licenses for Master Plumbers and Master Electricians • Issuing zoning compliance decisions and the submittal of Zoning Board of Appeals applications. • Coordinating reviews for rezone applications, special use permits, street cut permits and backflow prevention device applications • Performing fire safety inspections

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Emergency Management/Public Safety Department	Yes	The Town of Tonawanda Police Department's Emergency Services Bureau mission is to assure the safety and health of all its employees and residents before, during and after natural or man-made large-scale emergencies. This is done through continuous evaluation of emergency plans, training and education, outreach and establishing public and private partnerships with both the business sector as well as community organizations. The main responsibility of this bureau is to conduct a hazard analysis of the town to develop a plan identifying resources to address any hazard or emergency which might occur. The Bureau works very closely with the Department of Homeland Security, the New York State Department of Homeland Security and Emergency Services, the Erie County Department of Emergency Services, and the United States Coast Guard.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	TTPD – James Stauffiger, Chief Police Integrated Public Alert and Warning System - FEMA The town uses a special needs registry form, an online form for business and commercial property emergency notification form, and the Ready Erie preparedness mobile app.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway/Technical Support. Town Highway Department staff trim tree branches and keep floodways clear.
Mutual aid agreements	Yes	Fire, Police, Snow, School, Highway – mutual aid agreements increase capacity
Other	Yes	The Water and Sewer Maintenance Division operates and maintains the town's water distribution, sanitary sewer and storm sewer systems from its facility located at 525 Belmont Avenue. The water distribution system consists of roughly 375 miles of water mains, 2,200 hydrants and 5,000 valves, providing water to over 65,000 persons with over 23,000 accounts. The water system provides bulk water to the Village of Kenmore. The town's sewer systems consist of 300 miles of sanitary sewer and 270 miles of storm sewer. Water and Sewer Maintenance manages rehabilitation programs and coordinates with federal and state regulatory agencies and consulting engineering firms working on sewer system projects. This division also coordinates cleaning, maintenance and replacements for sewer system elements using sewer construction, maintenance, and rehabilitation techniques. The Information Technology (IT) Department is responsible for the delivery and management of information technology resources supporting town departments and the community. The IT Department actively works to streamline processes as well as promote compliance with Federal and State cybersecurity standards. Key responsibilities relating to hazard mitigation include: • Data center and server management • Cybersecurity and disaster recovery • Contract and project management • Strategic planning

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		The Town of Tonawanda Department of Youth, Parks and Recreation is responsible for maintenance of Park facilities, buildings, and grounds.
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Planning and Development, Technical Support, Town Engineer
Engineers or professionals trained in building or infrastructure construction practices	Yes	Three engineers on staff: Matt Sutton, Randy Pekarski
Planners or engineers with an understanding of natural hazards	Yes	Planning and Development and Technical Support staff at Town Hall
Staff with expertise or training in benefit/cost analysis	Yes	Planning and Development
Professionals trained in conducting damage assessments	Yes	FPA
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	GIS Consultant, Planning and Development, Technical Support
Scientist familiar with natural hazards	No	Rely on local universities or NYS
NFIP Floodplain Administrator (FPA)	Yes	FPA
Surveyor(s)	No	-
Emergency Manager	Yes	TTPD – Emergency Services Bureau Robert Lutz
Grant writer(s)	Yes	Contracted – O'Connell Assoc, Community Planning and Development office
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Stormwater reporting, Tech Support – Engineer Assistant

Fiscal Capability

The table below summarizes financial resources available to the Town of Tonawanda.

Table 9.43-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Tonawanda.

Table 9.43-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Public Information Office, Town Police Department, Supervisors Office, Town Clerk – Freedom of Information Law Officer
Personnel skilled or trained in website development	Yes	Tech Support Office – Chuck Schultz
Hazard mitigation information available on your website	Yes	Community Emergency Response Team volunteer force of residents prepared to assist with emergency response efforts.
Social media for hazard mitigation education and outreach	Yes	The Town Police Department uses Facebook and Twitter to broadcast natural hazard related information.
Citizen boards or commissions that address issues related to hazard mitigation	No	The town provides free training for the Community Emergency Response Team.
Other programs already in place that could be used to communicate hazard-related information	Yes	Emergency Services Bureau / PSD: "I Am Responding" communications platform which generates mass text and email notification to Industry and safety managers
Warning systems for hazard events	Yes	Town Police Department – James Stauffiger, Chief; Emergency Services Bureau / PSD: IPAWS – FEMA the town uses a special needs registry form, an online form for business and commercial property emergency notification form, and the Ready Erie preparedness mobile app.
Natural disaster/safety programs in place for schools	No	-
Other	Yes	Fire Prevention Programs

Community Classifications

The table below summarizes classifications for community programs available to the Town of Tonawanda.

Table 9.43-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Average for all five Fire Districts is "4"	2017
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Firewise Communities classification	No	-	-
Other	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.43-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.43.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Matt Sutton, Town Engineer, is the designated Floodplain Administrator.

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Tonawanda.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.43-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Tonawanda	32	56	$8,514,400	8	6

Source:
Notes: FEMA 2020a and FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Areas in the Town of Tonawanda that are prone to flooding include along the town's northern boundary in low lying areas near Tonawanda Creek and Ellicott Creek are in the 1 percent annual flood boundary, zone AE and along the town's west boundary along the Niagara River in the 1 percent annual flood boundary, zone A and AE. These areas are sometimes subject to wave action. The town does not maintain a list of homeowners interested in flood mitigation. As a mitigation measure, the town maintains a list of all Letters of Map Change (LOMA/LOMR-F). There are no known RiskMAP projects currently underway in the town. The town did not identify how many (if any) properties have been mitigated. The town's flood hazard maps were updated in 2019 and adequately address the flood risk within the jurisdiction.

NFIP Compliance

The Town of Tonawanda does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Visit (CAV) was in September 2017. The Engineering Department and the FPA are responsible for floodplain administration. One staff member in the Building Department is a Certified Floodplain Manager. The town does not have access to resources to determine possible future flooding conditions from climate change. The town did not identify if the floodplain management staff needs any assistance or training to support its floodplain management program. Training has typically been provided by the NYS Floodplain and Stormwater Manager's Association. The town has not made any Substantial Damage determinations can use permit data to make such determinations. The town's floodplain management program meets minimum requirements. NFIP Administration services provided by the town include permit review, development review, GIS and inspection and the town aims to put more effort into hazards informational outreach. The town does not participate in the Community Rating System and feels it does not have the available resources to do so. There is a current NFIP violation at one location where work has been stopped.

9.43.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Tonawanda has identified the following routes and procedures to evacuate residents prior to and during an event. Note that these routes are owned/maintained by the NYSDOT, Erie County and the town respectively.

- The Grand Island Bridge is a west bound avenue of egress that can potentially be impacted by hazardous materials spills,
- Major eastbound evacuation routes include I-290, Sheridan Drive, Brighton Road, and Kenmore Avenue.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Major N/S routes are River Road, Military Road, Delaware Avenue and Colvin Boulevard

With the complex nature and unpredictability of weather and location for potential hazardous material release evacuation routes would be decided at the time of incident. This information would be broadcast to the public by local officials thru mass media: Radio and TV, social media, twitter, and if needed IPAWS.

Sheltering

The town states that primary contact for shelter operations would be the Erie County Department of Homeland Security and Emergency Services as well as the American Red Cross. The Town of Tonawanda has identified the following emergency shelters within the town boundary:

Table 9.43-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Hoover School	249 Thorncliff	300	Unknown	Yes	Yes	Unknown	Unknown
Multiple Schools	Ken-Ton School District	5000	Unknown	Yes	Yes	Unknown	Unknown

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Tonawanda has identified the following sites suitable for placing temporary housing units.

Table 9.43-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Town of Tonawanda Aquatic Center	1 Pool Plaza	100	Parking lot and one building	Parking lot does not have utilities but inside the building has utilities.	None
Town Tonawanda Senior Center	291 Ensminger	25	Parking lot and building	Parking lot does not have utilities but inside the building has utilities.	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Tonawanda did not identify any locations for relocating homes away from the floodplain.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.43-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work the county to identify permanent housing locations, per Proposed Action #2022-Town Tonawanda-010					

9.43.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.43-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.43-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	1	0	2	0	4	0	3	0	3	0	2	0
Multi-Family	0	0	0	0	0	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	10	0	11	0	13	0	1	0	12	0	7	0
Total Permits Issued	**11**	**0**	**13**	**0**	**17**	**0**	**4**	**0**	**15**	**0**	**9**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Unifrax	Manufacturing	2	55 Pirson Parkway	NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines, Expansive Soils	Project is expanding again
Pine Pharmaceuticals	Manufacturing	1	355 Riverwalk Parkway	NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer	Project is expanding again

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Type of Development	2015	2016	2017	2018	2019	2020
				from HazMat Roadways, Hazardous Materials Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines		
Amazon Delivery	Warehouse and distribution	1	800 Riverwalk Parkway	½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Materials Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines, Expansive Soils	Complete	
Solar Farms	Energy production	Several	Various	Unknown	Complete and more projects are pending	
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years						
Pine Pharmaceuticals	Manufacturing	1	355 Riverwalk Parkway	Unknown	Unknown	

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.43.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Tonawanda's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Tonawanda has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.43-1. Town of Tonawanda Hazard Area Extent and Location Map 1

Figure 9.43-3. Town of Tonawanda Hazard Area Extent and Location Map 3

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Tonawanda's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.43-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.43-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
August 11-15, 2015	Flash Flood	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
October 28-29, 2015	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
November 6, 2015	Thunderstorm Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
November 12, 2015	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
November 18, 2015	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
January 11, 2017	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
March 8, 2017	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
March 13, 2017	Winter Storm	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
July 20, 2017	Tornado	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
August 4, 2017	Thunderstorm Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
December 10-15, 2017	Lake-effect Snow	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
December 24-29, 2017	Lake-effect Snow	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 2, 2018	Blizzard	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
October 6, 2018	Lightning	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
February 24, 2019	High Wind	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
February 24, 2019	Lakeshore Flooding	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
November 27, 2019	Lakeshore Flooding	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
January 12, 2020	Lakeshore Flooding	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
January 18, 2020	Lakeshore Flooding	No	While this hazard event impacted municipalities within the county, the Town of Tonawanda did not report damage.
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Tonawanda's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

rankings of potential natural hazards for the Town of Tonawanda. The Town of Tonawanda has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following change due to relative rates of occurrence:

- Change the Hazardous Materials risk from Low to High.

Table 9.43-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	High

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.43-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
United Refining Company	Oil Facility	X	X	2022-Town Tonawanda-012

Identified Issues

After review of the Town of Tonawanda's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Tonawanda has identified the following vulnerabilities within their community:

- There is a lack of backup power for the Town of Tonawanda Municipal building.
- There are several industrial areas with single point of entry/egress that may experience evacuation issues during a hazard event. This includes the most recently developing areas in the category are the Riverwalk Parkway/Solar Park which now is home to an Amazon distribution hub and Pirson Parkway.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Emergency operators/responders in the town do not all use the same communications platforms.
- The Public Safety building at 1835 Sheridan Drive has an old and unreliable backup generator which has failed in the past. The building houses the Police Department, EMS, Public Safety dispatch and primary computer servers for the town.
- The Town Highway facility provides a range of critical operations and lacks backup power.
- The Park Fire Station at 2 Military Road and the Sheridan Park Fire Station lack a backup generator and is thus vulnerable to interruption of services caused by utility failure.
- The town's pumping station lacks backup power and is vulnerable to utility failure.
- The town's Water Resources facilities contain vulnerable outdoor storage of chlorine. A leak could impact local homes and businesses. This issue needs to be addressed at both the water and the wastewater treatment plants.
- Existing storm sewers need to be rebuilt.
- Floodplain managers require training to carry out their functions most effectively.
- The town does not participate in the Community Rating System.
- The United Refining Company is in the 0.2 percent annual chance flood.
- Residential properties have flooded repeatedly.
- The town was unable to identify permanent housing locations.

9.43.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.43-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Backup power generation for Town of Tonawanda Municipal Building located at 2919 Delaware Ave, Kenmore, NY 14217 to prevent loss of government functions	All Hazards	Not Identified	Technical Support/ Town Board Action	In Progress.	Cost		1. Include in 2022 HMP 2. Partial progress: Tech Support has proposed via 2021 Capital Improvement Program to implement a generator backup for the data center located within the Municipal Building 3.
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Adopt the new FIRM's and replace our local law with DEC's model floodplain management law. They will also assist us with preparing policies and procedures to administer the program. Have personnel attend Flood Plain Managers training.	Flooding	Not Identified	Technical Support/Town Board Action	Complete	Cost		1. Discontinue 2. 3. Completed
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Work with local homeowners of repetitively flooded properties to determine interest in inclusion in a grant application to FEMA for mitigation project funding (floodproof/elevate/acquire) and apply to FEMA on homeowner behalf.	Flooding	Not Identified	Technical Support/Town Board	In Progress	Cost		1. Include in 2022 HMP 2. 3.
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Cleaning of existing storm sewer. The Town of Tonawanda Water Department will flush existing storm sewer	Flooding	Not Identified	Water Resources	In Progress	Cost		1. Include in 2022 HMP 2. Purchasing new equipment to better facilitate cleaning of storm sewers and sanitary lines on a five-year cycle.
						Level of Protection

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Tonawanda has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The Town Police Department has identified the need for emergency equipment and quotes for equipment costs have been procured. The town aims to acquire the following; upgraded police/EMS radio systems to be P25 compliant; includes dispatch radio, mobile radios, and portables.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Tonawanda participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.43-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X	-	X	X	X	X	-	-	X
Cyber Attack	X	X	-	X	X	X	X	-	-	X
Earthquake	X	X	-	X	X	X	X	-	-	X

Utility Failure	X	X	-	X	X	X	X	-	-	X
Wildfire	X	X	-	X	X	X	X	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.43-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Tonawanda would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.43-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.43-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard (s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town Tonawanda-001	Improve emergency communications so that systems are interoperable	2	All Hazards	**Problem**: Emergency operators/responders in the town do not all use the same communications platforms. **Solution**: Upgrade to emergency communications for police/EMS radio system to be P25 compliant. This is to include dispatch radio, mobile radio, and portables.	No	No	Within 2 years	Town Police Department	TBD by feasibility analysis	Improved emergency response	EMPG	High	SIP	ES
2022-Town Tonawanda-002	Replace backup power generator at the Public Safety building	1	All Hazards, Utility Failure	**Problem**: The Public Safety building at 1835 Sheridan Drive has an old and unreliable backup generator which has failed in the past. The building houses the Police Department, EMS, Public Safety dispatch and primary computer servers for the town. **Solution**: Town staff will conduct an engineering analysis to determine the appropriate size backup generator to purchase. The Fire Department will ensure that the generator is installed and maintained.	Yes	No	Within 2 years	Town Engineer and Emergency Services/Police Department	TBD by feasibility analysis	Continuity of emergency services during hazard events	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG, town budget	High	SIP	ES

Project Number	Project Name	Goals Met	Hazard (s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town Tonawanda-003	Establish evacuation routes from specified locations	1	All Hazards	**Problem:** There are several industrial areas with single point of entry/egress that may experience evacuation issues during a hazard event. This includes the most recently developing areas in the category are the Riverwalk Parkway/Solar Park which now is home to an Amazon distribution hub and Pirson Parkway. **Solution:** The town will work with property owners to establish safe evacuation routes.	No	No	Within 3 years	FPA, Emergency Management, Fire Department	Staff time	Secure safe passage out of specified facilities by providing clear evacuation routing	Municipal budget	High	LPR	ES
2022-Town Tonawanda-004	Protect the Sheridan Park Fire District #4 – Station #2 facility from power failure	1, 2	All Hazards, Utility Failure	**Problem**: The Sheridan Park Fire Station facilities lacks a backup generator and is thus vulnerable to interruption of services caused by utility failure. Many emergency services are provided through the facility. **Solution**: The town will encourage the Fire District to conduct an engineering analysis to determine the most appropriate generator to install. The Fire	Yes	No	Within 1 year	Sheridan Park Fire District #4	Staff time	Continuity of services during emergencies	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	EAP	PI

				Department will oversee installation and maintenance of the generator.										
2022-Town Tonawanda-005	Protect the town's pump stations and elevated water towers from utility failure	1	All Hazards, Utility Failure	**Problem**: The town's pumping stations, and elevated water towers lack backup power and are vulnerable to utility failure. **Solution**: The town will conduct an engineering analysis to determine the most appropriate generators to install. The Town Water Resources Department will oversee installation of the generators and maintenance thereafter.	Yes	No	Within 3 years	Town Tonawanda Water Resources Department	TBD by engineering analysis	Continuity of services during emergencies	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	SIP	ES
2022-Town Tonawanda-006	Secure chlorine storage at Town Water Resources facilities	1	HazMat	**Problem:** The town's Water Resources facilities contain vulnerable outdoor storage of chlorine. A leak could impact local homes and businesses. This issue needs to be addressed at both the water and the wastewater treatment plants. **Solution:** The town will conduct an analysis to determine the best ways to mitigate the chlorine	Yes	No	Within 3 years	Town Tonawanda Water Resources	TBD during engineering analysis	Protect community from potential impact of leaks from the chlorine tanks.	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	SIP	PP

				HazMat threat at the two facilities. The Highway Department will implement this solution.										
2022-Town Tonawanda-007	Clean existing storm sewers to protect portions of the town from flood hazard	1, 2	Flood	**Problem:** Storm sewers backup up due to clogs during rain events which can cause flooding. **Solution:** Purchase new equipment to clean storm sewers and sanitary lines on a regular cycle. Some pipes are also undersized. Alternately, purchase new equipment to repair/replace stormwater systems.	No	No	Within 2 years	Town Tonawanda Water Resources	TBD per engineering analysis	Reduce flood risk	Municipal budget	High	SIP	SP
2022-Town Tonawanda-008	Floodplain Administrator to attend training on floodplain management. Require these staff to become Certified Floodplain Managers. Also require staff to examine the Flood Damage Prevention Ordinance to ensure that it meets requirements.	3	Flood	**Problem:** Floodplain Managers require training and certification to fully implement the NFIP program within the town. The staff should also ensure that the Flood Damage Prevention Ordinance meets required standards. **Solution:** Obtain/host training and certification for floodplain managers in part so they can determine the status of	No	No	Within 2 years	ECDHSES, FPA	$3,000	Certified floodplain managers are trained to implement an effective floodplain management program	County and town budgets	High	LPR	PR

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Acronyms and Abbreviations:

CAV	Community Assistance Visit
CRS	Community Rating System
EHP	Environmental Planning and Historic Preservation
FEMA	Federal Emergency Management Agency
FPA	Floodplain Administrator
HMA	Hazard Mitigation Assistance
N/A	Not applicable
NFIP	National Flood Insurance Program
OEM	Office of Emergency Management

Potential FEMA HMA Funding Sources:

FMA	Flood Mitigation Assistance Grant Program
HMGP	Hazard Mitigation Grant Program
BRIC	Building Resilient Infrastructure and Communities Program

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.43.9 Action Worksheets

The following action worksheets have been developed by the Town of Tonawanda to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Tonawanda Action Worksheet			
Project Name:	Expand the Fire Training Facility		
Project Number:	2022-Town Tonawanda-013		
Risk / Vulnerability			
Hazard(s) of Concern:	Wildfire, All Hazards		
Description of the Problem:	The current fire training facility has a small, structurally deteriorating block building that was modified as a maze training building.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town Fire Department and Highway Departments will collaborate to demolish the current structure and replace with a larger, multi-functional facility		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Improve fire and emergency response	**Estimated Benefits (losses avoided):**	Increase fire training options and response effectiveness
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	TBD by engineering analysis	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation1			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	EMPG, BRIC, Assistance to Firefighters grant program.
Responsible Organization:	Town Emergency Manager	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Rent fire training facility from another town	High	No such facilities available
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect the town's pump stations and elevated water towers from utility failure.	
Project Number:	2022-Town Tonawanda-013	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will protect critical services provided by the water infrastructure
Property Protection	1	Project will improve emergency response for all properties
Cost-Effectiveness	1	
Technical	1	
Political	1	
Legal	1	The town has legal authority to complete the project.
Fiscal	0	Project requires funding support
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	1	All Hazards, Wildfire
Timeline	1	Within 3 years
Agency Champion	1	Town Emergency Management
Other Community Objectives	0	
Total	12	
Priority (High/Med/Low)	High	

Attachment: 82-Section-9.43-Tonawanda-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Tonawanda Action Worksheet			
Project Name:	Protect town Senior Center located at 291 Ensminger Drive (Senior Center) and 169 Sheridan Parkway from utility failure		
Project Number:	2022-Town Tonawanda-015		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	The town's Senior Center located at 291 Ensminger Road is subject to frequent power outages. The same is true for 169 Sheridan Parkway a town building from where Meals on Wheels are distributed. Increasing summertime temperatures make this more important. The town has an aging population and low incomes.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town Engineer procure and install at the Senior Center and 169 Sheridan Parkway potentially a 3 phase 120/208 v 600-amp main backup generator. Outfit a cooling center at the Senior Center.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensures continuity of flood protection services at the Highway Department facility. Shelter services for seniors
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	TBD by engineering analysis	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	BRIC, HMPG, municipal budget
Responsible Organization:	Parks and Recreation Department	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Construct a dedicated solar array to supply backup power	High	Variable power output.
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

9.44 Town of Wales

This section presents the jurisdictional annex for the Town of Wales. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the municipality risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.44.1 Hazard Mitigation Planning Team

The following individuals have been identified as the municipality hazard mitigation plan primary and alternate points of contact. The Town of Wales followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Supervisor, Emergency Manager, and Deputy Emergency Manager. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.44-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Walter Raichel – Emergency Manager Address: 12345 Big Tree Rd, Wales Center, NY Phone Number: 716-860-5691 Email: wraichel@gmail.com	Name/Title: Ellen M. Bapst – Deputy Emergency Manager Address: 12345 Big Tree Rd, Wales Center, NY Phone Number: 716-457-4151 Email: bapst14139@gmail.com
NFIP Floodplain Administrator	
Name/Title: Walter Raichel – Emergency Manager Address: 12345 Big Tree Rd, Wales Center, NY Phone Number: 716-860-5691 Email: wraichel@gmail.com	

9.44.2 Municipal Profile

The Town of Wales is situated in the eastern part of Erie County is located southeast of the City of Buffalo. The town is 36 square miles in area. The Town of Aurora makes up the western boundary, the Town of Holland is to the south, the Town of Marilla on the north and Wyoming county on the east.

Wales is one of the earliest towns formed in Erie County. It was created from the large original town of Willink. The area was named for Wales (of Britain) which this pastoral town resembles. The first white settlers arrived in the Town of Wales in 1804. NYS Route 400 runs through the town. The Buffalo Creek flows northward through the town.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

According to the U.S. Census, the 2010 population for the Town of Wales was 3,005. The estimated 2019 population was 3,020, a nearly zero percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.9 percent of the population is 5 years of age or younger and 16.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.44.3 Jurisdictional Capability Assessment and Integration

The Town of Wales performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.44.3). The municipality identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Wales. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.44-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 84 - Building Construction Enforcement, Adopted 1993	Local	Code & Building Enforcement
Comment: *For the purpose of promoting the general welfare of the Town of Wales, the Town Board does hereby enact this article to regulate the use and occupation of property within the Town of Wales in accordance with the powers and authority granted it under the New York Town Law. This article contains provisions for building zoning permits, certificates of occupancy and inspections.*					
Zoning Code	Yes	No	Chapter 200 – Zoning; Adopted 1956, Zoning	Local	Code & Building Enforcement
Comment: *The municipal zoning ordinance includes the following guideline: A special use permit application must include a written description of and plans for water supply, sewage disposal and storm drainage with evidence of acceptability by the Erie County Health Department. The town is divided into four zoning districts – agricultural, residential, business, and manufacturing.*					
Subdivision Ordinance	Yes	No	Chapter 181 – Subdivision of Land; approved 8/2/1971	Local	Code & Building Enforcement
Comment: *The Subdivision ordinance has been developed with, but not limited to the following guidelines: 1) An easement shall be provided for all natural drainageways with more than two-hundred-acre watersheds and all utility lines when such utility line or lines do not fall within a dedicated right-of-way. All easements shall be plotted on the preliminary plat and subdivision plat. A clause shall be inserted in the deed of*					

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
each lot affected by an easement indicating that the easement exists and its purpose. Except as further required in this section, easements shall have a minimum width of 10 feet. Where a subdivision is traversed by a drainageway, channel or stream, a drainageway easement conforming substantially to the lines of such watercourse shall be provided. The easement shall be 20 feet wide or such width as will be adequate to preserve natural drainage and to provide sufficient width for maintenance. 2) The subdivider shall not be permitted to leave any surface depressions which will collect pools of water. 3) Preliminary plats must include proposed provision of water supply, fire protection, disposal of sanitary waste, stormwater drainage, street trees, streetlighting fixtures, street signs, sidewalks and other data.					
Stormwater Management Ordinance	No	Yes – for county	-	-	-
Comment:					
Post-Disaster Recovery Ordinance	Yes	No	Chapter 103	Local	Emergency Manager and Code & Building Enforcement
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-
Comment:					
Site Plan Review	Yes	Yes	Chapter 200, Adopted 1956, Zoning	Local and State	Planning Board
Comment: *Site plan review is intended to reduce the potential for development that might pose a threat to the community and or the environment within the Town of Wales.*					
Environmental Protection Ordinance	Yes	Yes	Chapter 200, Adopted 1956, Zoning	Local	Planning Board
Comment: *Environmental Protection is incorporated into zoning. These are meant to promote sustainable development to increase resilience and safety for the community.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 103 – updated 2019, Flood Damage Prevention.	Local	Code Enforcement Officer
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *(1) Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *(2) Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *(3) Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *(4) Control filling, grading, dredging and other development which may increase erosion or flood damages;* *(5) Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and (6) Qualify and maintain for participation in the National Flood Insurance Program.* *An enclosed area beneath the lowest elevated floor, 18 inches or more in height, which is used to service the underside of the lowest elevated floor. The elevation of the floor of this enclosed area, which may be of soil, gravel, concrete or other material, must be equal to or above the lowest adjacent exterior grade. The enclosed crawl space area shall be properly vented to allow for the equalization of hydrostatic forces which would be experienced during periods of flooding.* *The Code Enforcement Officer is appointed Local Administrator to administer and implement this chapter by granting or denying floodplain development permits in accordance with its provisions.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Wales to oversee and track development.

Table 9.44-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code & Building Enforcement, Town Board Special Use Permit
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	None – the town is relatively rural and sparsely populated

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Wales and their current responsibilities which contribute to hazard mitigation.

Table 9.44-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board has full approval authority, and binding jurisdictional authority regarding all residential subdivision developments, on which the Town Board may make recommendations. This Board is also charged with generating and reviewing proposed ordinances intended to become part of Wales Town Law, review and recommendation on proposed zoning changes and review from time to time of existing zoning codes with recommendations for updating and appropriate changes.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals hears and deliberates on cases from citizens seeking relief from the Town ordinances. Decisions of this Board are based on strict criteria defined by the State and may be appealed by court action.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department – conducts maintenance on roads, and various other infrastructure systems across the town.
Construction/Building/Code Enforcement Department	Yes	Code & Building Enforcement – reviews and issues permits for residential and non-residential property development.
Emergency Management/Public Safety Department	Yes	Emergency Management
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code RED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Town Roads
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	CEO
Surveyor(s)	No	-
Emergency Manager	Yes	Emergency Manager
Grant writer(s)	No	-
Resilience Officer	No	-

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Wales.

Table 9.44-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes, with board approval
Capital improvements project funding	Yes, with board approval
Authority to levy taxes for specific purposes	Yes, with board approval
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes, with board approval
Incur debt through special tax bonds	Yes, with board approval
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes, with board approval
Other federal or state Funding Programs	Yes, with board approval
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Wales.

Table 9.44-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Emergency Manager
Personnel skilled or trained in website development	Yes	Code Official Clerk and town clerk
Hazard mitigation information available on your website	Yes	The town maintains a municipal website where they post news and upcoming events and meetings.
Social media for hazard mitigation education and outreach	Yes	The town has a Facebook page where they post community events and announcements
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Town website, social media, radio, and TV
Warning systems for hazard events	Yes	Town website and social media; CodeRED

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Natural disaster/safety programs in place for schools	Yes	School Superintendent
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Wales.

Table 9.44-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	TBD	2021
Public Protection (ISO Fire Protection Classes 1 to 10)	No	No public water	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

N/A *Not applicable*

NP *Not participating*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.44-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Weak
Cyber Attack	Moderate
Earthquake	Weak
Expansive Soils	Moderate
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong* *Capacity exists and is in use*

Moderate *Capacity may exist; but is not used or could use some improvement*

Weak *Capacity does not exist or could use substantial improvement*

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.44.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Walter Raichel, Town Emergency Manager and Building Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Wales.

Table 9.44-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Wales	1	4	$2,133	1	1

Source: *FEMA 2020a, FEMA 2020b*
Notes: *Data from 2020-21*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The town describes flood-prone areas to be along creeks and farmland within the town. The town does not maintain a list of property owners interested in flood mitigation. There are currently no RiskMAP projects within the jurisdiction. As the building inspector makes substantial damage determinations, there are no specific guidelines established and are determined on a case to case basis. There are no properties that have been mitigated within the town and the current flood maps adequately address the existing sites that have flooding.

NFIP Compliance

The building inspector is in charge of floodplain management, and there are no certified floodplain managers on staff. Given the town's size the town does not have adequate resources to determine future flooding conditions from climate change, nor given the part time and volunteer staff, training is not required nor relevant to increase the town's capabilities. The building officer provides permit and site plan review, and inspection of whether site is located in a floodplain. The town does not have specific guidelines to determine substantial improvement measures at the same time does not have any outstanding violation issues. The municipality is also no aware of any barriers to increasing the effectiveness of the NFIP program.

The town's most recent CAV date on record is 07/17/1997 and is due for a new one. The town has documented that the local chapter for the flood damage prevention ordinance is number 103 titles "Flood Damage Prevention B-26-2008". The town National Flood Insurance Program meets the requirements of the program through the minimum 2 fee freeboard requirement, for example, and local ordinances, plans, and programs, also meet and support the NFIP requirements. The town is not interested in joining the FEMA Community Rating System.

9.44.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Wales has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 20A (East/West)
- Route 78 (South)
- Interstate 400 (North/South)

Sheltering

The Town of Wales has identified the following designated emergency shelters within the town.

Table 9.44-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Town Hall	12345 Big Tree Rd, Wales Center, NY 14169	50	Yes	Yes	Yes	None	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Wales has identified the following sites suitable for placing temporary housing units.

Table 9.44-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Open Land	12345 Big Tree Road	20-25 Acres	Flat Land	Available on demand.	None
Town Park	Rt 20A	30 Acres	Open Space	Available on demand.	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Wales has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.44-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Town Park	Route 20A	30 Acres	Land	None	Would need to draw water and sewer lines

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.44.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.44-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.44-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	**1**	**0**	**5**	**0**	**3**	**0**	**1**	**0**	**4**	**0**	**2**	**0**
Multi-Family	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**
Other (commercial, mixed-use, etc.)	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
No Recent Development to Report					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
No Future Development Planned					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.44.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the municipality risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Wales has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The municipality history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.44-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.44-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a	Although the County was impacted, the town did not report damages

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to	Although the County was impacted, the town did not report damages

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario	Although the County was impacted, the town did not report damages

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			seiche, and river flooding in the North Country	
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5 hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the town did not report damages
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the town did not report damages
2020-21	COVID 19 - EM 3504	Yes	National Pandemic that affected the entire nation, including the Town of Lancaster and Erie County	Business closings, social distancing, masking, and numerous deaths reported.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the municipality risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Wales. The Town of Wales has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- Cyber attack is not a threat to the community and thus has been re ranked from medium to low.
- Earthquakes have not occurred in the past and thus the ranking has changed from high to low.
- Given the amount of traffic along Route 20 carrying hazardous materials on a daily basis, the town believes it poses a threat and would like to increase the HazMat rating from low to medium.
- Wildfires have never occurred and thus would like to reduce the ranking from high to low.

Table 9.44-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Low	Low	Low	Medium	Low	Medium

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	Medium	Medium	Low

Note: *The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction*

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.44-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Erdman Dam	Dam	Yes	Yes	003

Source: GIS 2021

Identified Issues

After review of the municipality hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Wales has identified the following vulnerabilities within their community:

- The town fire hall is under capacity and does not accommodate the equipment for the town. The trucks are not able to fit in the existing building. With continuously new requirement from the state, the facility is unable to continue to meet standardbreds and needs to increase overall capacity.
- The town does not have public utilities and Tworod Road and the northern section of the town experiences water shortages due to low water table and limited water supply. While the snow often helps with the water supply, given climate change, there continues to be less water every year.
- The Erdman Dam is located within the 100-year floodplain. Given the ownership is private, the town does not have authority to conduct an assessment and make improvements.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- None

9.44.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.44-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
No Previous Projects for the Town of Wales	-	-	-	-	-	Cost	-	-
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Wales has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Fire hall recently installed a new diesel generator to power the entire building in 2021
- The town recently developed a heating shelter on Route 20, in 2018. The facility is used for severe winter storms.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Wales participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.44-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X							X	
Cyber Attack		X							X	
Earthquake		X							X	
Expansive Soils		X							X	
Extreme Temperature		X							X	
Flood		X		X		X	X		X	
Hazardous Materials		X							X	
Landslide		X							X	
Pandemic		X							X	
Severe Storm		X							X	
Severe Winter Storm		X							X	
Utility Failure		X							X	
Wildfire		X							X	

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.44-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Wales would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.44-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.44-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Wales -001	Fire Hall Expansion and Retrofitting	1,2	All	**Problem**: The town fire hall is under capacity and does not accommodate the equipment for the town. The trucks are not able to fit in the existing building. With continuously new requirement from the state, the facility is unable to continue to meet standardbreds and needs to increase overall capacity. In addition, the current facility also has issues around flooding and erosion due to surrounding stormwater related issues. The facility operation is thus compromised during extreme weather events when the facility needs to be in full operation. **Solution**: The fire company is looking to purchase the adjacent property that is currently an abandoned property. The fire hall would like to build an additional building and or an extension that could be used as storage and facility expand existing capabilities. The town might need additional backup power but would determine once the facility design phase is complete. To mitigate flooding, the existing facility would also need to retrofitted to mitigate and or eliminate flooding in the facility. An additional study might also need to be	Yes	Yes	5 years	Fire District for the Town of Wales	$2 million	Expanded capabilities for the region.	HMGP, FMA, Firefighters Assistance grant	High	SIP	SP, ES

				conducted to better understand the issues pertaining to flooding, since it is not located in the floodplain.										
2022-Town of Wales -002	Develop Public Water Supply	1,2	Utility Failure	**Problem**: The town does not have public utilities and Tworod Road and the northern section of the town experiences water shortages due to low water table and limited water supply. While the snow often helps with the water supply, given climate change, there continues to be less water every year. **Solution**: The town would like to create a public water supply system for the northern portion of the town that has continuous water shortages. The town would need to work with the Town of Aurora to connect Erie County public utilities and have access to continuous water supplies. The project has previously been proposed, but the Town of Aurora and Village of East Aurora determined the project to be infeasible due to financial constraints. Thus the Town of Wales would need to apply for FEMA grant funding to expand county utilities to the northern portion of the town. This project would also need to include the Erie County Water Department.	No	New	5 years	Town of Wales Public Works Department/ Erie County water Department	$7 million	Water Supply Met	HMGP, BRIC, WQIP	High	SIP	SP

OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.44.9 Action Worksheets

The following action worksheets have been developed by the Town of Wales to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 83-Section-9.44-Wales-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Fire Hall Expansion and Retrofitting		
Project Number:	2022-Town of Wales -001		
Risk / Vulnerability			
Hazard(s) of Concern:	All		
Description of the Problem:	The town fire hall is under capacity and does not accommodate the equipment for the town. The trucks are not able to fit in the existing building. With continuously new requirement from the state, the facility is unable to continue to meet standardbreds and needs to increase overall capacity. In addition, the current facility also has issues around flooding and erosion due to surrounding stormwater related issues. The facility operation is thus compromised during extreme weather events when the facility needs to be in full operation.		
Action or Project Intended for Implementation			
Description of the Solution:	The fire company is looking to purchase the adjacent property that is currently an abandoned property. The fire hall would like to build an additional building and or an extension that could be used as storage and facility expand existing capabilities. The town might need additional backup power but would determine once the facility design phase is complete. To mitigate flooding, the existing facility would also need to retrofitted to mitigate and or eliminate flooding in the facility. An additional study might also need to be conducted to better understand the issues pertaining to flooding, since it is not located in the floodplain.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500 year storm	**Estimated Benefits (losses avoided):**	Expanded Fire and Emergency Services/ State Compliance
Useful Life:	25 years	**Goals Met:**	1,2
Estimated Cost:	$2 Million	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	3 years once funding secured
Estimated Time Required for Project Implementation:	5 years	**Potential Funding Sources:**	HMGP, BRIC, Assistance to Firefighters Grant Program
Responsible Organization:	Wales Fire District	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Build New/ additional facility	High	Potentially higher cost
	Expand existing facility	High	Most cost effective

9.45 Town of West Seneca

This section presents the jurisdictional annex for the Town of West Seneca. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of West Seneca's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.45.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of West Seneca's hazard mitigation plan primary and alternate points of contact. The Town of West Seneca followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Emergency Manager, Captain of WSPD/WSOEM, and Engineer. The Captain of Administration / Liaison to WS OEM represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Additional Contributors	
Name/Title: David Johnson, Engineer Method of Participation: Provided data and information.	

9.45.2 Municipal Profile

The town is 21 square miles in area and incorporated in 1851. Four hamlets are situated in the town; Middle Ebenezer, Upper Ebenezer, Lower Ebenezer and New Ebenezer. The Seneca Indians were the original inhabitants of the town. In 1851 parts of Cheektowaga, Hamburg, and East Hamburg were organized to form the town of Seneca which later was renamed West Seneca. Many Germans immigrated to the town in the 1840s. Some of these new residents took up residence in original Seneca structures. The Buffalo Creek runs through the town. The New York State Thruway, US Routes 20 and 219, and NYS Routes 16, 78, 240, 277, 354 and 400 traverse the town.

The Town of West Seneca is an established first-ring suburban community of Buffalo with residential, retail, commercial and industrial sectors. According to the U.S. Census, the 2010 population for the Town of West Seneca was 44,711. The estimated 2019 population was 45,344, a 1.4 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.4 percent of the population is 5 years of age or younger and 21.1 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.45.3 Jurisdictional Capability Assessment and Integration

The Town of West Seneca performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.45.3). The Town of West Seneca's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of West Seneca. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.45-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Building Code NYS 2020; Town Code Ch. 55	State	Department of State
Comment: NYS Uniform and Energy Code 2020; This chapter shall provide for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (Uniform Code) in the Town of West Seneca. This chapter is adopted pursuant to § 10 of Article 2 of the Municipal Home Rule Law. Except as otherwise provided within this chapter, state law, or within the Uniform Code, all premises, regardless of use, are subject to the provisions which follow.					
Zoning Code	Yes	Yes	Town of West Seneca Zoning Ordinance	Local	Town Board
Comment: As part of the Comprehensive Development Plan for the Town of West Seneca, this Zoning Ordinance, set forth in the text and maps which constitute this chapter, is adopted in order to promote public health, safety, morality and the general welfare. These general goals include, among others, the following specific purposes: to provide for adequate light, air and convenience of access; to prevent overcrowding of the land and undue concentration of population; to secure safety from fire, flood, panic and other dangers; to lessen congestion in the streets and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements; to encourage the most					

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

appropriate use of land in order to protect and conserve property values throughout the town; and to bring about the gradual conformity of land and buildings to the Comprehensive Master Plan.					
Subdivision Ordinance	Yes	Yes	Town Code Chapter 103	Local	Town Board
Comment: The regulations herein contained are adopted for the purpose of providing for the sound growth and development of the town, of affording adequate sites and facilities for the distribution, transportation, safety, health and welfare of its population, and of providing reasonable and equitable requirements in the interest of developers, investors and home owners so as to ensure stable property values.					
Stormwater Management Ordinance	Yes	Yes	Town of West Seneca Zoning ordinance Chapter 102-A	Local	Town Board
Comment: The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 102A-1 hereof. This chapter seeks to meet those purposes by achieving the following objectives: • Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS45), Permit No. GP-02-02, or as amended or revised; • Require land development activities to conform to the substantive requirements of the NYS Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-02-01, or as amended or revised; • Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature and stream bank erosion and maintain the integrity of stream channels; • Minimize the total annual volume of stormwater runoff which flows from land development activities which would otherwise degrade local water quality; • Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and • Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	-	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	Town of West Seneca Zoning Code Chapter 102	Local	Town Board
Comment: It is the intention of this chapter to promote the efficient use and layout of land, and take into consideration the health, safety and general welfare of the public and of the residents and users of the proposed development. This will be accomplished through sound site planning that includes standards in the design, layout, landscaping and construction of development.					
Environmental Protection Ordinance	Yes	Yes	Town Code Chapter 10	Local	Town
Comment: New State Environmental Quality Review Act (SEQR) Title 6 NYCRR Part 617 Regulations are in effect as of January 1st, 2019					
Flood Damage Prevention Ordinance	Yes	Yes	Building Code & Town Code Chapter 77	Local	Floodplain Administrator
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. Meets state requirements - BFE+2 feet for all construction in the SFHA (residential and non-residential) It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-

Development and Permitting Capability

The table below summarizes the capabilities of the Town of West Seneca to oversee and track development.

Table 9.45-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	There are few residential development areas left, the town industrial park is about 50 percent built out

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of West Seneca and their current responsibilities which contribute to hazard mitigation.

Table 9.45-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Seven members
Zoning Board of Adjustments	Yes	Five members
Planning Department	Yes	One Staff through Code Enforcement Office
Mitigation Planning Committee	No	The town is looking to establish one
Environmental Board/Commission	Yes	Town Environmental Conservation Commission
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Public Works/Highway Department	Yes	Staff of approx. 100, tasked with all road work and maintenance, town parks, buildings, and grounds maintenance, sewers
Construction/Building/Code Enforcement Department	Yes	Six staff
Emergency Management/Public Safety Department	Yes	One Emergency Manager, police liaison, integrated with other town officials
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code Red, Social Media
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Sewer crew of three under the Highway Department. Tree Maintenance Plan
Mutual aid agreements	Yes	Erie County Emergency Management Aid Plan/Fire Mutual Aid Plan/Police Mutual Aid Plan
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering/CPL
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering/ Code Enforcement
Planners or engineers with an understanding of natural hazards	Yes	Engineering/CPL
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Engineering/Code Enforcement
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Engineering/CPL
Surveyor(s)	Yes	Engineering/CPL
Emergency Manager	Yes	One EM, two deputies, police liaison
Grant writer(s)	Yes	Private Contractor
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of West Seneca.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.45-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	No
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes, CARES/FEMA DR
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of West Seneca.

Table 9.45-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Supervisor/WSPD and OEM PIO
Personnel skilled or trained in website development	Yes	Private Contractor
Hazard mitigation information available on your website	Yes	Westseneca.net
Social media for hazard mitigation education and outreach	Yes	Town of West Seneca/WSPD/OEM Facebook and Twitter
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Code Red/Facebook and Twitter
Warning systems for hazard events	Yes	Code Red/Facebook and Twitter
Natural disaster/safety programs in place for schools	Yes	WSCSD
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of West Seneca.

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.45-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.45.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Steve Tanner, Town Engineer

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of West Seneca.

Table 9.45-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of West Seneca	123	186	$786,473	18	67

Source: *FEMA 2019*

Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*

RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

The areas prone to flooding in the Town of West Seneca include Lexington Green, areas along Buffalo Creek, Cazenovia Creek, Buffalo River, and Ebenezer Brook. The Building Department maintains a list of flood damaged properties. The town does not maintain a list of property owners interested in flood mitigation, but they do offer assistance with determine preliminary floodplain elevations for all residents who inquire. No RiskMAP projects are currently underway. The town makes Substantial Damage determination by in person inspections. In 2014, Lexington Green flooding: approximately 75 single family homes and a second flooding happened a few months later and affected the 75 homes again were declared damaged from flooding. The other flood was on School Street in 2019, where 10 residential buildings were declared damaged from flooding. No properties have been mitigated in the town. The town's flood hazard maps do not adequately address the flood risk. Ice damming occurs regularly along Cazenovia Creek and Buffalo Creek. It is impossible to determine where snags will occur, and water will back up. Ice dam flooding is not always contained within mapped floodplains.

NFIP Compliance

The Engineering department is responsible for floodplain management. There are not any certified floodplain management on staff. The town has access to resources to determine possible future flooding conditions from climate change. The town has identified that the floodplain management staff needs training on emerging technologies, and climate change effects on flooding and correlation between Great Lake elevation rise and flooding in upstream municipalities. The town's NFIP administration provides permit review, preliminary elevation determination, and inspections. In order to determine if proposed development on an existing structure would qualify as a substantial improvement is through a coordinated review effort between the Consulting Town Engineer and the Town Code Enforcement Officer.

There have not been any major barriers to running an effective NFIP program. The town has outstanding NFIP compliance violations that need to be addressed. The town has been monitoring items such as campers, trailers, and RVs placed in the floodplain by property owners. The most recent Community Assistance Visit (CAV) was on September 10, 2018. The town's flood damage prevention ordinance is Chapter 77- Flood Damage Prevention, last amended 1992. The town's floodplain management does not meet the minimum requirements because the ordinance does not include the required 2' freeboard. Other plans that support the floodplain management include the Site Plan Review, Stormwater Pollution Prevention Plan reviews and MS4 reviews for new projects. The Planning Board limits development in the floodplain to none, as best as possible.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.45.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of West Seneca has identified the following routes and procedures to evacuate residents prior to and during an event.

- Evacuation routes will be situational dependent. The county/state maintain an evacuation route system during a natural disaster (i.e. snow event). The Town of West Seneca is part of the NITECC (County/State) emergency action plan for closure of the RT 400, RT 219, and I-90.

Sheltering

The Town of West Seneca has identified the following designated emergency shelters within the town.

Table 9.45-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Union Fire Co	1845 Union Rd West Seneca, NY 14224	100	Yes	Yes	Yes	Basic EMS & Paramedics as needed	Red Cross trailer on site.

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of West Seneca has identified the following sites suitable for placing temporary housing units.

Table 9.45-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify temporary housing locations (2022-T. West Seneca-014).					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of West Seneca has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.45-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify permanent housing locations (2022-T. West Seneca-014).					

9.45.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.45-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.45-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years						
None Anticipated						

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.45.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of West Seneca's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of West Seneca has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of West Seneca's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.45-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.45-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	No losses/costs from damages identified
August 11-15, 2015	Flash Flood	No	No losses/costs from damages identified
October 28-29, 2015	High Wind	No	No losses/costs from damages identified
November 6, 2015	Thunderstorm Wind	No	No losses/costs from damages identified
November 12, 2015	High Wind	No	No losses/costs from damages identified
November 18, 2015	High Wind	No	No losses/costs from damages identified
January 11, 2017	High Wind	No	No losses/costs from damages identified
March 8, 2017	High Wind	No	No losses/costs from damages identified
March 13, 2017	Winter Storm	No	No losses/costs from damages identified
July 20, 2017	Tornado	No	No losses/costs from damages identified
August 4, 2017	Thunderstorm Wind	No	No losses/costs from damages identified
December 10-15, 2017	Lake-effect Snow	No	No losses/costs from damages identified
December 24-29, 2017	Lake-effect Snow	No	No losses/costs from damages identified
January 2, 2018	Blizzard	No	No losses/costs from damages identified
October 6, 2018	Lightning	No	No losses/costs from damages identified
February 4, 2019	Ice Jam Flooding	No	Municipality identified – Several residences evacuated on School Street
February 24, 2019	High Wind	No	No losses/costs from damages identified
February 24, 2019	Lakeshore Flooding	No	Sewer backup pumping at sewer lift stations, salting of ice covered roads
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	No losses/costs from damages identified
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Road flooding due to heavy rains
November 27, 2019	Lakeshore Flooding	No	No losses/costs from damages identified
January 12, 2020	Lakeshore Flooding	No	Wind caused trees down, stop signs down. Removed tree debris and placed portable stop signs.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Municipal Summary of Damages and Losses
January 18, 2020	Lakeshore Flooding	No	Salting and plowing of roads
June 2, 2020	Flood, Heavy rain flooding	No	Municipality identified – highway pumps, barricades for roads
July 17, 2020	Flood	No	Municipality identified – road closure/barricades. Pumping at sewer lift stations
November 15, 2020	High Wind	No	Municipality identified – Trees down, power outage

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of West Seneca's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of West Seneca. The Town of West Seneca has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town increased the flood ranking from low to high due to reoccurring ice jam flooding and creek bed erosion.
- The town increased the Hazardous Materials Incidents ranking from low to medium because the town has a large volume of commercial traffic on I-90, Routes 400, and 219. There is also the North America Industrial Park within the town that houses several commercial industries using hazardous materials.
- The town increased the wildfire ranking from low to medium because the old Lehigh Valley line along I-90 is under-maintained and has the potential to threaten homes.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.45-15. Hazard Ranking Input

Low	High	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Identified Issues

After review of the Town of West Seneca's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of West Seneca has identified the following vulnerabilities within their community:

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- During the last two major rain events in June and July 2020, there have been flooding issues in the area of 945 Center Road. Other areas of repeated roadway flooding during heavy rains include:
    - 550 Orchard Park Road; 3300 Seneca St; 160 Lein Road (Viaduct); Fisher Court. Neighborhood, Molnar Avenue, Jasmine Ave
- Throughout the past five years, there has been a number of generalized heavy rainfalls resulting in road flooding.

- Ice jam flooding continues to be a yearly concern during the spring thaw. There was one significant event on February 4, 2019 in the School Street neighborhood on Buffalo Creek. Several residences were evacuated and suffered significant structural damage. This flooding event also disrupted power to the pump station at Fairfax & Ashmund resulting in additional pumps being rented to assist the neighboring community's sewer needs.

9.45.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.45-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Continue mitigation efforts in area streams	Stream Flooding	Highway, WSOEM, Engineering Dept	Yearly Ice Jam flooding in Buffalo And Cazenovia Creeks	In Progress	Cost	-	1. Include in 2022 HMP 2. See 2022-Town of West Seneca-016 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
2	Create Public Education Program for Residents	Stream Flooding	Highway, WSOEM, Engineering Dept.	Yearly Ice Jam flooding in Buffalo And Cazenovia Creeks	Ongoing Capability	Cost	-	1. Do not include in 2022 HMP 2. 3. Ongoing capability of public education efforts for residents in Floodprone areas
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
3	Secure funding to buyout properties in floodplain	Stream flooding	Highway, WSOEM, Engineering Dept., Town Govt	Yearly Ice Jam flooding in Buffalo and Cazenovia Creeks	In Progress	Cost	-	1. Include in 2022 HMP 2. See 2022-Town of West Seneca-015 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
4	Continue support of the NWS and Storm Watchers Program	Severe Storm, Severe Winter Storm	WSOEM	Yearly Ice Jam flooding in Buffalo And Cazenovia Creeks, Severe Snow and Wind Events	Ongoing Capability	Cost	-	1. Do not include in 2022 HMP 2. 3. Ongoing capability, WSOEM trains in this area
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
5	Create legislation that will promote “Best Practices” and provide ongoing funding	Stream Flooding	Highway, WSOEM, Engineering Dept	Yearly Ice Jam flooding in Buffalo And Cazenovia Creeks	No Progress	Cost	-	1. Discontinue 2. 3. WSOEM does not create legislation. Any legislation regarding flooding is taken care of on the Town Government level with input from Engineering
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
6	Complete various construction &	Stream Flooding	Highway, WSOEM,	Yearly Ice Jam flooding in Buffalo And Cazenovia Creeks	In Progress	Cost	-	1. Include in 2022 HMP 2. A shared file will be created to maintain a list of all mitigation and maintenance efforts and a schedule
						Level of Protection	-	

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	_maintenance projects; Create a schedule for ongoing maintenance of completed projects		Engineering Dept			Damages Avoided; Evidence of Success	-	maintained for same. See 2022-Town of West Seneca-016 3.
7	Create a Weather Awareness & Discount Purchase Plan	Severe Storm, Severe Winter Storm	Office of Disaster Preparedness	Raise public awareness for severe weather events	No Progress	Cost	-	1. Discontinue 2. 3. Not relevant
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
8	Create a cooperative that maintains program with Town and National Grid, NYSEG	Severe Storm, Severe Winter Storm	Highway Dept.	Power and other utility loss during significant weather events	Ongoing Capability	Cost	-	1. Do not include in 2022 HMP 2. 3. Ongoing capability, ongoing efforts in collaboration with utility companies help in the event of wind and snow events to maintain power and other critical utilities
						Level of Protection		
						Damages Avoided; Evidence of Success		
9	Residential cooperative buying & storage of de-icing materials	Severe Storm, Severe Winter Storm	Highway Dept.	Provide residents with de-icing materials	Complete	Cost	-	1. Do not include in 2022 HMP 2. 3. WS Highway maintains a shared services agreement with surrounding jurisdictions through mutual aid plans
						Level of Protection		
						Damages Avoided; Evidence of Success		
10	Lobby for stringent hazardous materials release laws, enforcement & penalties	Hazardous Materials	Office of Disaster Preparedness	Increase HazMat release laws, enforcement, & penalties to decrease spills and releases	No Progress	Cost	-	1. Discontinue 2. 3. WSOEM is not a lobbying agency
						Level of Protection		
						Damages Avoided; Evidence of Success		
11	Educate public on proper procedures to take if a hazardous material is	Hazardous Materials	WSOEM	Educate the public on HazMat in the event of a release near their location to prevent injuries or death	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing capability - WSOEM will continue public education efforts in all facets of residents disaster planning
						Level of Protection		
						Damages Avoided;

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	released near their locations					Evidence of Success		
12	Establish a radio system that allows interagency communication	Terrorism	Police & Fire Departments	Lack of Interop Comms	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	-	1. Discontinue 2. 3. Ongoing capability – the county has significantly upgraded interop communications countywide. WSPD now carriers Fire Mobiles in the supervisors' vehicles in the even of unified command situations and has access to the same interop channels
13	Establish a radio-based travel advisory system, possibly in cooperation with Amber Alert System and/or various message signs	Transportation Accidents	Police Dept.	Travel advisories could potentially decrease transportation accidents and traffic jams	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	-	1. Discontinue 2. 3. WSPD cannot "establish" a radio system, yet works within the NYS DOT and NITTEC frameworks with their capabilities for advisories
14	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flood	Engineering Dept.	Yearly ice jam flooding in Buffalo and Cazenovia Creeks	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	-	1. Discontinue 2. 3. Engineering will continue to comply with latest FEMA guidelines and update the WS Town Code as appropriate
15	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Engineering Dept.	Yearly Ice Jam flooding in Buffalo and Cazenovia Creeks	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	-	1. Discontinue 2. 3. Engineering will continue to comply with latest FEMA guidelines and update the West Seneca Town Code as appropriate
16	Join the Community Rating System (CRS)	Flood	Highway, WSOEM, Engineering Dept., Town Govt	Decrease cost of flood insurance for businesses and residents in the floodplain	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Ongoing capability

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of West Seneca has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Cayuga creek mitigation efforts

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of West Seneca participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.45-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X								X
Cyber Attack	X	X								X
Earthquake	X	X		X			X			X
Expansive Soils	X	X								X
Extreme Temperature	X	X								X
Flood	X	X	X	X	X		X	X	X	X
Hazardous Materials	X	X		X			X			X
Landslide	X	X								X
Pandemic	X	X								X
Severe Storm	X	X								X
Severe Winter Storm	X	X	X					X	X	X
Utility Failure	X	X								X
Wildfire	X	X		X			X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.45-19 summarizes the comprehensive range of specific mitigation initiatives the Town of West Seneca would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.45-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.45.9 Action Worksheets

The following action worksheets have been developed by the Town of West Seneca to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 84-Section-9.45-West-Seneca-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Protect the Borden Road Potable Water Facility to the 0.2% annual chance flood event		
Project Number:	2022- Town of West Seneca -005		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Borden Road Potable Water Facility is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Borden Road Potable Water Facility to protect it to the 0.2% annual chance flood event. Options include: •Elevation of facility •Floodproofing of facility •Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the facility
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	High, TBD by feasibility assessment	**Mitigation Action Type:**	EAP, SIP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	Within 5 years	**Potential Funding Sources:**	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG
Responsible Organization:	Engineer, facility manager	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Relocate facility	N/A	Not cost effective, may not be necessary after vulnerability assessment
	Decommission facility	N/A	Not feasible

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:

9.46 Village of Williamsville

This section presents the jurisdictional annex for the Village of Williamsville. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Williamsville's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.46.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Williamsville's hazard mitigation plan primary and alternate points of contact. The Village of Williamsville followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Emergency Services and Public Works. The Director of Emergency Services represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.46-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact

Name/Title: Tim Bivonen, DPW Crew Chief Method of Participation: Provided capabilities information via worksheets	

9.46.2 Municipal Profile

The Village of Williamsville is in the northeast quadrant of Erie County. It is one square mile in size and lies mainly within the Town of Amherst with a small portion in the Town of Cheektowaga. Interstate 90 runs through the southern part of the village. The community developed where the major road between Batavia and Buffalo crossed Ellicott Creek. The available waterpower from the Creek attracted millers. The first mill was built by Jonas Williams in 1811. The village was named for Mr. Williams when the town incorporation in 1850. During the War of 1812, American troops stationed within the Village of Williamsville. Williamsville has several parks. Glen Park which offers views of Ellicott Creek as it falls over the Onondaga

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Escarpment. Island Park has a large pavilion and is the site of Old Home Days and the Taste of Williamsville events during the summer. The Williamsville Central School District includes the village, the eastern part of the Town of Amherst, and a small portion the Town of Clarence (Village of Williamsville 2020).

According to the U.S. Census, the 2010 population for the Village of Williamsville was 5,300. The estimated 2019 population was 5,233, a 1.3 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.1 percent of the population is 5 years of age or younger and 23.8 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.46.3 Jurisdictional Capability Assessment and Integration

The Village of Williamsville performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.46.3). The Village of Williamsville's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Williamsville. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.46-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 28, Fire Prevention and Building Code Administration	Local	Building Department
Comment: The Building Code establishes that a permit for development in flood hazard areas shall be required if the proposed construction or any other development is within the area of special flood hazard. Unsafe buildings are addressed in accordance with the procedures established by Chapter 15 of the Village Code					
Zoning Code	Yes	No	Chapter 112, Village of Williamsville Zoning	Local	Planning Board, Building Department
Comment: The Chapter's purpose is to promote and protect public health, safety, comfort, convenience, prosperity and other aspects of the general welfare by providing adequate light, air and convenience of access; preventing undue concentration of population and overcrowding of land; preventing congestion in the streets; securing safety from fire, flood, panic and other dangers; and facilitating adequate provision for					

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
transportation, water, sewerage, schools, parks and other public requirements. These regulations are made with reasonable consideration, among other things, to the peculiar suitability of each district for uses, with a view to encouraging the most appropriate use of land throughout the village and conserving the value of buildings and lands therein.					
Subdivision Ordinance	No	No	-	-	-
Comment: None					
Stormwater Management Ordinance	Yes	Yes	Chapter 112-28 Stormwater Management, 2018	Local	Building Department
Comment: The purpose of this section is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 112-28A of this chapter. This section seeks to meet those purposes by achieving the following objectives: (1) Meet the requirements of minimum measures 4 and 5 of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-0-15-003, as amended or revised; [Amended 11-26-2018 by L.L. No. 13-2018] (2) Require land development activities to conform to the substantive requirements of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, Permit No. GP-0-15-003, as amended or revised; [Amended 11-26-2018 by L.L. No. 13-2018] (3) Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels; (4) Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality; (5) Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and (6) Reduce stormwater runoff rate sand volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	Yes	-	-	-
Comment: None					
Site Plan Review	Yes	No	Chapter 112, Zoning	Local	Building and Planning Department
Comment: Site plan review is part of the village’s land development review process. Site plan approval shall only be granted when increases in stormwater runoff shall be minimized from land development activities to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels.					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment: None					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 31, Flood Damage Prevention ordinance, 2019	Local	FPA

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The Flood Damage Prevention ordinance enforces regulations that reduce flood exposure and risk. It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; D. Control filling, grading, dredging and other development which may increase erosion or flood damages; E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and F. Qualify and maintain for participation in the National Flood Insurance Program. The ordinance requires BFE+2 feet for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 81, 2003, Sewer Uses	Local, county	Village Engineer
Comment: This chapter sets forth requirements for users of the Sanitary Sewer Facilities of the Village of Williamsville and enables the Village to comply with all applicable state and federal laws, including the Clean Water Act (United States Code 33 U.S.C. § 1251 et seq.) and the General Pretreatment Regulations (Code of Federal Regulations 40 CFR 403). It is further the explicit purpose of this chapter to achieve the following: A. To prevent the introduction of pollutants into the Sanitary Sewer Facilities that will interfere with its operation. B. To prevent the introduction of pollutants into the Sanitary Sewer Facilities that will pass through the Sanitary Sewer Facilities inadequately treated, into receiving waters, or otherwise be incompatible with the Sanitary Sewer Facilities. C. To protect Sanitary Sewer Facilities personnel who may be affected by wastewater and sludge in the course of their employment and the public. D. To promote reuse and recycling of industrial wastewater and sludge from the Sanitary Sewer Facilities. E. To establish fees for the equitable distribution of the cost of operation, maintenance, treatment, and improvement of the Sanitary Sewer Facilities. F. To enable the Village of Williamsville to comply with all contractual, environmental, and legal discharge elimination system conditions, and any other federal or state laws to which the Sanitary Sewer Facilities are subject. G. To eliminate the discharge of unpolluted waters into the Sanitary Sewer Facilities. H. To meet the requirements of the SPDES general permit for stormwater discharges from MS4s, Permit No. GP-02-02 or as amended or revised. [Added 12-17-2007 by L.L. No. 5-2007] I. To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process, or discharge non-stormwater wastes. [Added 12-17-2007 by L.L. No. 5-2007] J. To prohibit illicit connections, activities, and discharges to the MS4. [Added 12-17-2007 by L.L. No. 5-2007] K. To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, water containing pollutants, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment, and other pollutants into the MS4. [Added 12-17-2007 by L.L. No. 5-2007]

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Williamsville to oversee and track development.

Table 9.46-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning Board approval required for site plan. Building permit required.
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The village is an urban environment and is almost entirely built out.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Williamsville and their current responsibilities which contribute to hazard mitigation.

Table 9.46-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	Yes	Village planning staff administer and implement planning solutions to natural hazard issues.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Environmental Advisory Commission is composed of six members and they advise the Planning Board and Town Board on natural assets as well as natural hazard exposure.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Community Development Department
Public Works/Highway Department	Yes	The Department of Public Works conducts paving, wastewater drainage facilities clearance, roadway maintenance and tree trimming, all with the effect of reducing natural hazard exposure. The department consists of a General Crew Chief, Working Crew Chief, and eight Motor Equipment Operators. The General Crew Chief oversees the department.
Construction/Building/Code Enforcement Department	Yes	The Building Department is responsible for regulating building construction and adherence to the building and fire codes. Building Department responsibilities include: • Reviewing construction plans and building permit applications for conformance with the Codes of the Village of Williamsville and New York State • Reviewing Site Plans (including grading, utility, parking, etc.) and related documentation for compliance with the Code of the Village of Williamsville • Referring all applicable plans to various Village of Williamsville committees including Traffic & Safety, Environmental, Historic Preservation, etc. • Reviewing and referring as applicable all Zoning Board of Appeals applications and documentation and serving as liaison to the ZBA • Reviewing and referring as applicable all exterior plans, site plans, sign permits, etc. to the Planning & Architectural Review Board (P&ARB) and serving as liaison to the P&ARB

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		• Reviewing and processing all plumbing plans and permit applications for conformance with the Codes of the Village of Williamsville and New York State. This also includes conducting sump pump inspections required for real estate transfers • Reviewing and processing all sign permit applications for conformance with the Code of the Village of Williamsville • Conducting field inspections of all required elements of construction for conformance with the Codes of the Village of Williamsville and New York State and the submitted building permit • Conducting field inspections of all required elements of plumbing for conformance with the Codes of the Village of Williamsville and New York State and the submitted plumbing permit • Investigating all property complaints and issuing citations as applicable. Conducting follow up inspections of violations. Where required, issuing court summons for violations and participate in the court process through resolution • Conducting annual fire inspections of all public buildings including offices, mercantile, public assembly, apartments, and mixed-use buildings for conformance with the Codes of the Village of Williamsville and New York State and the submitted building permit
Emergency Management/Public Safety Department	Yes	Emergency response staff are shared among the village and the Town of Amherst and results in collaboration.
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Village DPW monitors need for hazard mitigation and the Department conducts paving, water drainage facilities clearance, roadway maintenance and tree trimming, all with the effect of reducing natural hazard exposure.
Mutual aid agreements	No	-
Other	No	Traffic and Safety Committee makes recommendations to the Village Board and Planning Board regarding traffic signs and speed limits to ensure the safety of Village residents and those who use the Village streets Tree Board works with the Village Forester assesses present municipal tree population, and works to improve and stabilize the village urban forest through future plantings that enhance the beauty of the greenspace Parks Committee- functions of this committee includes overseeing Garrison Park, Island Park, South Long Park, and Lehigh Memory Trail. The panel plans for park improvements and makes recommendations to the Village Board
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	With the Town of Amherst
Grant writer(s)	Yes	Contracted grant writer is used for grant application preparation
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Engineer on Contract

Fiscal Capability

The table below summarizes financial resources available to the Village of Williamsville.

Table 9.46-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes, Village Board
User fees for water, sewer, gas, or electric service	Yes, Tax Bill Assessment
Impact fees for homebuyers or developers of new development/homes	Yes, Sewer Infrastructure during redevelopment
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes, Village Board
Other federal or state Funding Programs	Yes, Village Board
Open Space Acquisition funding programs	Yes, Village Board
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Williamsville.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.46-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Clerk, public communications support is provided by the county's Lake Erie Watershed Planning Association.
Personnel skilled or trained in website development	Yes	Village Staff
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Lake Erie Watershed Alliance,
Other programs already in place that could be used to communicate hazard-related information	Yes	Village website
Warning systems for hazard events	Yes	The village Police Department broadcasts public emergency notices
Natural disaster/safety programs in place for schools	No	-
Other	Yes	See Table 9.46-4 above

Community Classifications

The table below summarizes classifications for community programs available to the Village of Williamsville.

Table 9.46-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	3	Unknown
NYSDEC Climate Smart Community	No	Registered for 2021-22	2021-22
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.46-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Weak
Landslide	Weak
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.46.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Tim Masters, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Williamsville.

Table 9.46-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Williamsville	26	134	$518,994	5	16

Source: FEMA 2020a and 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The south eastern end of the village has been impacted by flooding from Ellicott Creek. The village does not maintain a list of property owners' interest in flood mitigation. There are no RiskMAP projects currently underway in the village. The village indicated that no properties have been mitigated. The village's flood hazard maps adequately address the flood risk within the jurisdiction. The village does not have access to resources to determine possible future flooding conditions from climate change.

NFIP Compliance

The most recent Community Assistance Visit (CAV) was in December 2009. The Building Department is responsible for floodplain administration staff and one of the staff members is a certified floodplain

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

administrator. The village does have access to resources to determine possible future flooding conditions from climate change and support enforcement via permit review and inspections. The village stated that its floodplain management staff are not in need of assistance or training to support its floodplain management program. The village does not make Substantial Damage determinations and no elevations or acquisitions have been completed. The village's floodplain management meets minimum requirements. The community does not participate in the CRS.

9.46.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Williamsville did not identify routes and procedures to evacuate residents prior to and during an event. The Village will coordinate with the Town of Amherst and county officials during a hazard event.

Sheltering

The Village of Williamsville did not identify any designated emergency shelters within the village.

Table 9.46-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None Identified. The village will collaborate with the county to identify emergency shelter locations, per Proposed Action # 2022-Village Williamsville-006							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Williamsville has identified the following sites suitable for placing temporary housing units.

Table 9.46-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The village will collaborate with the county to identify temporary housing locations, per Proposed Action #2022-Village Williamsville-006					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Williamsville did not identify areas suitable for relocating homes outside of the floodplain.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.46-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The village will collaborate with the county to identify permanent housing locations, per Proposed Action # 2022-Village Williamsville-005					

9.46.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.46-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.46-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	1	0	0	0	1	0	4	0	2	0	1	0
Multi-Family	1	0	20	0	1	0	1	0	0	0	46	0
Other (commercial, mixed-use, etc.)	0	0	4	0	0	0	0	0	0	0	0	0
Total Permits Issued	**2**	**0**	**24**	**0**	**2**	**0**	**5**	**0**	**2**	**0**	**47**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Lymestone Lofts	Residential	13	5933 Main Street	0.2% annual chance floodplain area	Approved
The Williams	Residential	unknown	Unknown	Unknown	Site Plan
Asher Crossing	Residential	unknown	Ward Road	Earthquake	Site Plan
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
Asher Phase 2	Residential	60	Ward Road	Earthquake	In development
Blocher Homes	Residential	90	135 Evans Street	1% annual chance flood area	In development

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.46.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Williamsville's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Williamsville has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Williamsville's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.46-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.46-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the village did not report any damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the village did not report any damages.
November 12, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
November 18, 2015	High Wind	No	Although the county was impacted, the village did not report any damages.
January 11, 2017	High Wind	No	Although the county was impacted, the village did not report any damages.
March 8, 2017	High Wind	No	Although the county was impacted, the village did not report any damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the village did not report any damages.
July 20, 2017	Tornado	No	Although the county was impacted, the village did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the village did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the village did not report any damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the village did not report any damages.
October 6, 2018	Lightning	No	Although the county was impacted, the village did not report any damages.
February 24, 2019	High Wind	No	Although the county was impacted, the village did not report any damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, the village did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, the village did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the village did not report any damages.
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Williamsville's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Williamsville. The Village of Williamsville has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village consented with the following:

Table 9.46-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.46-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Ellicott Creek Dam	Dam	X	X	2022-Village Williamsville-001
Williamsville Dam	Dam	X	X	2022-Village Williamsville-002

Source: FEMA 2021

Identified Issues

After review of the Village of Williamsville's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Williamsville has identified the following vulnerabilities within their community:

- The Ellicott Creek Dam is in the Special Flood Hazard Area and is exposed to flood risk.
- The Williamsville Dam is in the Special Flood Hazard Area.
- Floodplain Managers require training to fully implement the NFIP program within the village.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.
- Certain village roadways are impacted by poor drainage facilities.
- Certain residential properties have been repeatedly flooded
- Drainage is inadequate in specified locations in the village
- The village is not able to identify locations for temporary housing
- The village is not able to identify locations for permanent housing

9.46.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.46-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Flood Mitigation Efforts to include the creek mitigation debris removal program that has been implemented. The Department of Public Works has crews out year-round performing mitigation activities as they see appropriate along the creek removing debris as necessary in accordance with State and federal regulations. This will also continue our program of working with Erie County Public works personnel.	Flooding	Not Identified	Dept. of Public Works	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
	The Village will continue to provide roadside drainage improvements in low lying areas where the drains have proven to be minor problem areas during heavy rainfalls.	Flooding	Not Identified	Dept. of Public Works	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2022 HMP 2. Attachment: 85-Section-9.46-Williamsville-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Williamsville has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The Village connected roadside catch basins which eliminated ponding on certain roadways. The work was completed by the Department of Public Works.
- The Village DPW installed drainage on roadsides and rebuilt Cadman Drive Road.
- The Village retained a contractor to install permeable pavement and bioswales along Spring Street.
- The Village DPW upsized drainage pipes on California Drive to accommodate new development.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Williamsville participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.46-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X	-	-	-	-	-	-	-	X

Utility Failure	X	X	-	-	-	-	-	-	-	X
Wildfire	X	X	-	-	-	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.46-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Williamsville would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.46-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Critical Facility:

Yes 💧 *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Purchase of Wireless Rain Gauge

We are requesting Town Board approval to purchase a wireless rain gauge including installation from TecSmith, Inc. (quote attached). This gauge is used to monitor rainfall amounts for our monthly bypass reports. The total cost for the purchase of the rain gauge inclusive of installation will be $2,500.00.

Funding for this purchase is available from budget code G9000-2600 which requires Town Board approval.

Thank you for considering this request.

Emergency Purchase Authorization - National Water Main CRS# 3271

The Engineering Department is requesting that the Town Board approve an emergency purchase made with National Water Main Cleaning for the rehabilitation of two (2) manholes at the Campbell Boulevard Sanitary Sewer collapse site. The manholes closest to the site were evaluated and the concrete within the manholes was found to be deteriorated, exposing rebar in multiple locations and compromising the integrity of the structures. The quote for this work is attached.

This request is pending successful completion of the contract review process.

The total amount quoted for this work is $18,000.00 and the funding source for this request is to-be-determined.

Thank you for considering this request.

Town of Amherst
Emergency Purchase Documentation Form

This form is to be completed for all emergency purchases made that contravene the Town's Purchasing Policy. You must contact the Supervisor (or Deputy Supervisor in the Supervisors absence) to obtain his/her approval prior to making the purchase. This form must be completed and submitted to the Town Board at the first work session following the Emergency purchase. A copy should also be submitted to the Town Attorney and Contract Compliance & Administration Department.

An exception to the competitive bidding requirements exists for emergency situations (GML §103[4]). There are three basic statutory criteria to be met in order to fall within this exception. These are that (1) the situation arises out of an accident or other unforeseen occurrence or condition; (2) the circumstances affect public buildings, public property, or life, health, safety or property of the political subdivision's residents; and (3) the situation requires immediate action which cannot await competitive bidding.

Generally, there must be a present, immediate and existing condition which is creating an imminent threat or danger and which requires such immediate action that a further delay to comply with competitive bidding requirements is so detrimental to the public interest that it overcomes the strong public policy in favor of bidding. Further, because the emergency must arrive out of an accident or unforeseen occurrence, it is doubtful a local government may invoke the emergency exception in a situation which the result of inaction or dilatory behavior on the part of local officials and which, therefore, could have been foreseen in time to advertise for bids.

Even when a governing board passes a resolution that a public emergency exists, the public interest dictates that purchases are made at the lowest possible costs, seeking competition by informal solicitation of quotes or otherwise, to the extent practical under the circumstances.

1. Date of Emergency Purchase: _____

2. Date you received approval from the Supervisor: 4/6/2022

3. Date of Town Board work session where Board is notified: 4/11/2022

4. Amount of Emergency Purchase. Please provide a detailed listing of items purchased and the cost of each (attach additional detail if necessary): $9,000.00 each for two (2) manholes

5. Is there adequate funding in your current operating budget to cover this purchase? _____
   Identify budget Org/Object: TBD

6. Please describe the circumstances that resulted in the need to make an emergency purchase without following the Town's Purchasing Policy: Two manholes closest to the sanitary sewer collapse were evaluated. The concrete within the manholes is deteriorated exposing rebar in multiple locations compromising the structural integrity of the structures.

7. Please describe what steps were taken to ensure the lowest cost for the Emergency Purchase. If none, please explain why your department was prevented from doing so: National Water Main is already staged for the bypass pumping

8. Department Head Signature: _____ Date: _____

Hi Vaishali,
You can use $9,000.00 each manhole for a 1/2" thick geopolymer liner

Addendum to Contract Major Exposure

1. Notwithstanding any other provision in this Agreement, the following clauses shall be controlling. Should any other provision of the Agreement conflict with the clauses in this Addendum then the provisions of this Addendum are to be enforceable and any conflicting provision shall be considered null and void.

2. No rules, requirements or customs of any society or association of professional Contractors or any similar association shall affect this Agreement in any way whatsoever or be binding upon the Town.

3. To the fullest extent permitted by law, Contractor shall indemnify and hold the Town, its officers, agents, and employees, harmless from any and all liability, demands, claims, or expenses, awards or judgments imposed upon the Town, its officers, agents, and/or employees, arising out of the work of the Contractor its officers, agents, subcontractors, and/or employees as well as the negligence, active or passive, of the Contractor, its officers, agents, subcontractors, and/or employees.

4. Contractor shall not commence work under this Agreement until it has obtained all insurance specified below, produced satisfactory proof of the same and such insurance has been approved by the Town.

(a) Workers' Compensation Insurance: Contractor shall take out and maintain during the life of this Agreement, Workers' Compensation Insurance (both Part A and Part B) for its employees to be assigned to the work hereto under.

(b) General Liability, Professional (if applicable) Liability and Property Damage Insurance: Contractor shall take out and maintain during the life of this Agreement, such general liability and property damage insurance as shall protect it and the Town of Amherst from claims for damages for personal injury, including accidental death, as well as from claims for property damage, which may arise from operations under this Agreement. The amounts of such insurance shall be as follows in an amount not less than $1,000,000.00 per occurrence for bodily injury and property damage including wrongful death, and $2,000,000.00 aggregate. Umbrella coverage shall be in an amount of at least $5,000,000.00.

(c) Contractor shall furnish the above insurances, including subcontractors' insurances, to the Town and shall also assure that any policy procured by it shall name the Town as an additional insured on a primary and non-contributory basis.

(d) Contractor shall ensure all its subcontractors, if any, have obtained all the above insurances and shall also assure that any policy procured by any subcontractor or sub-subcontractor shall name the Town as an additional insured on a primary and non-contributory basis.

Attachment: National Water Main Emergency Purchase Authorization (RES-2022-377 : Emergency Purchase Authorization - National Water

5. Any accident shall be reported to the Office of the Town Attorney as soon as possible and not later than twenty-four (24) hours from the time of such accident. A detailed written report must be submitted to the Town of Amherst as soon thereafter as possible as and no later than three (3) days after the date of such accident.

6. No Assignment: In accordance with the provisions of section 109 of the General Municipal Law, the Contractor is hereby prohibited from assigning, transferring, conveying, subletting or otherwise disposing of this Agreement, or of its right, title or interest in this agreement, or its power to execute this Agreement, to any other person or corporation without the previous consent in writing of the Town.

7. Required Provisions of Law: Each and every provision of law and clause required by law to be inserted in this Agreement shall be deemed to have been inserted herein. If any such provision is not inserted through mistake or otherwise, then upon the application of either party this Agreement shall be physically amended forthwith to make such insertion. In particular, the Contractor shall, among other things, fully comply with:

(a) Article 8 of the NYS Labor Law for public work contracts and Article 9 of the Labor Law regarding prevailing wage for Building Service employees.
(b) Labor Law Section 220-e and Executive Law Sections 291-299 and the Civil Rights Law relating to prohibition against discrimination and equal opportunity.
(c) Affirmative action as required by the Labor Law.
(d) Prevention of dust hazard required by Labor Law Section 222-a.
(e) Preference in employment of persons required by Labor Law Section 222.
(f) Eight-hour workday as required by Labor Law Section 220(2).
(g) Chapter 32 of the Town of Amherst: Minority Women and Business Utilization Commitment.
(h) Chapter 163 of the Town of Amherst: Registration of Sex Offenders.

8. The Contractor, in accordance with its status as an independent Contractor, covenants and agrees that it will conduct itself consistent with such status. It will neither hold itself out as nor claim to be, an officer or employee of the Town by reason hereof, make any claim, demand or application to or for any right or privilege applicable to an officer or employee of the Town, including, but not limited to: workers' compensation coverage, unemployment insurance benefits, Social Security coverage, or retirement membership or credit.

Waiver: No waiver of any breach of any condition of the Agreement shall be binding unless in writing and signed by the party waiving said breach. No such waiver shall in any way affect any other term or condition of this Agreement or constitute a cause or excuse for a repetition of such or any other breach unless the waiver shall include the same.

9. This Agreement shall be governed by, and interpreted according to the laws of the State of New York. If the contract between the parties refers to the laws, statutes, rules, regulations or ordinances for any state other than New York State, to the laws, statutes, rules, regulations or ordinances for any county other than Erie County, New York or to the laws, statutes, rules, regulations or ordinances for any municipality other than the Town of Amherst, then the laws, statutes, rules, regulations or ordinances for New York State, Erie county and/or the Town of Amherst shall apply as applicable. Any and all legal action necessary to enforce the Agreement will be venued in Supreme Court, Erie County, New York or in the United States District Court for the Western District of New York, Buffalo Division.

10. It is hereby acknowledged that performance of this Contract will be undertaken in accordance with the specifications and pricing on which the bid was submitted.

Authority for execution on behalf of Town: The Supervisor has executed this Agreement pursuant to a Resolution adopted by the Town Board of the Town, at a meeting thereof held on _____. Brian J. Kulpa, the Supervisor whose signature appears hereafter, is duly authorized and empowered to execute this instrument and enter into such an Agreement on behalf of the Town as a result of that Resolution. This instrument shall be executed in triplicate. At least one (1) copy shall be permanently filed, after execution thereof, in the office of the Town Clerk of Town.

IRAN DIVESTMENT ACT CERTIFICATION

As a result of the Iran Divestment Act of 2012 (Act), Chapter 1 of the 2012 Laws of New York, a provision was added to the State Finance Law (SFL), Section 165-a, effective April 12, 2012. Under the Act, the Commissioner of the Office of General Services (OGS) will develop a list (prohibited entities list) of "persons" who are engaged in "investment activities in Iran" (both are defined terms in the law). This list is posted on the OGS website.

By submitting a response to this solicitation, or by assuming the responsibility under a Contract/Lease awarded hereunder, Bidder/Contractor/Vendor (or any assignee) certifies that it will not utilize on such Contract/Lease any subcontractor that is identified on the prohibited entities list.

Additionally, Bidder/Contractor/Vendor is advised that any Bidder/ Contractor/Vendor seeking to renew or extend a Contract/Lease (or assume responsibility of a Contract/Lease awarded must certify at the time the Contract/Lease is renewed, extended or assigned that it is not included on the prohibited entities list.

During the term of the Contract/Lease, should the Town of Amherst (Town) receive information that a person is in violation of the above-referenced certification, the Town will offer the person an opportunity to respond. If the person fails to demonstrate that it has ceased its engagement in the investment which is in violation of the Act within 90 days after the determination of such violation, then the Town shall take such action as appropriate including, but not limited to, imposing sanctions, seeking compliance, recovering damages or declaring the Bidder/Contractor/Vendor in default.

The Town reserves the right to reject any Contract/Lease or request for assignment for an entity that appears on the prohibited entities list prior to the award of a Contract/Lease, and to pursue a responsibility review with respect to any entity that is awarded a Contract/Lease and appears on the prohibited entities list after Contract/Lease award.

The Proprietor, Partners or Executive Officers are ☒ included. (Only check box if all partners/officers included) all ☐ excluded or certain partners/officers excluded.

This certifies that the insurance carrier indicated above in box "3" insures the business referenced above in box "1a" for workers' compensation under the New York State Workers' Compensation Law. **(To use this form, New York (NY) must be listed under Item 3A on the INFORMATION PAGE of the workers' compensation insurance policy).** The Insurance Carrier or its licensed agent will send this Certificate of Insurance to the entity listed above as the certificate holder in box "2".

The insurance carrier must notify the above certificate holder and the Workers' Compensation Board within 10 days IF a policy is canceled due to nonpayment of premiums or within 30 days IF there are reasons other than nonpayment of premiums that cancel the policy or eliminate the insured from the coverage indicated on this Certificate. (These notices may be sent by regular mail.) **Otherwise, this Certificate is valid for one year after this form is approved by the insurance carrier or its licensed agent, or until the policy expiration date listed in box "3c", whichever is earlier.**

This certificate is issued as a matter of information only and confers no rights upon the certificate holder. This certificate does not amend, extend or alter the coverage afforded by the policy listed, nor does it confer any rights or responsibilities beyond those contained in the referenced policy.

This certificate may be used as evidence of a Workers' Compensation contract of insurance only while the underlying policy is in effect.

Please Note: Upon cancellation of the workers' compensation policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of Workers' Compensation Coverage or other authorized proof that the business is complying with the mandatory coverage requirements of the New York State Workers' Compensation Law.

Under penalty of perjury, I certify that I am an authorized representative or licensed agent of the insurance carrier referenced above and that the named insured has the coverage as depicted on this form.

To Authorize a Substantial Amendment to the FY 2020 Annual Action Plan for Community Development to Establish the Northwest Amherst Community Center

WHEREAS, the Town has adopted the FY 2020 Annual Action Plan on behalf of the Towns of Amherst, Cheektowaga and Tonawanda (ACT) HOME Consortium which programs the expenditure of funds for the Community Development Block Grant (CDBG) and HOME Investment Partnership (HOME) Funding; and

WHEREAS, the Town is seeking to amend the FY 2020 Action Plan to reallocate $380,000 in Supplemental CDBG-COVID funds awarded by the CARES Act according to the following program/budget lines; and

Decrease/Remove:		
Senior Foundation Community Center	$	300,000
Medical Director Position	$	24,000
Small Business Assistance - Amherst Chamber	$	20,000
CDBG Community Vaccine Logistics	$	30,000
YWCA of WNY, Inc.	$	6,000
Create/Increase:		
Northwest Amherst Community Center	$	380,000

WHEREAS, this amendment provides funds for the establishment of the Northwest Amherst Community Center, which meets the use criteria of the Supplemental CDBG-COVID funds awarded by the CARES Act to "prevent, prepare for, and respond to COVID" by providing critical community space to serve the Creekwoods Neighborhood with social and other supportive programming; now therefore

BE IT RESOLVED, the Town of Amherst Town Board hereby authorizes the above Substantial Amendment to the FY 2020 Annual Action Plan.

Assistant Planning Director

April 6, 2022

Agenda of April 11, 2022

Honorable Town Board
Town of Amherst
5583 Main Street
Williamsville, NY 14221

Subject: To Authorize a Substantial Amendment to the FY 2020 Annual Action Plan for Community Development to establish the Northwest Amherst Community Center.

Honorable Board Members:

Amherst Community Development is proposing a Substantial Amendment to the FY 2020 Annual Action Plan for Amherst's Community Development Block Grant (CDBG) Program to establish the new Northwest Amherst Community Center as part of the Town's CDBG-COVID funding.

The amendment seeks to reallocate $380,0000 of existing underutilized budget lines to a new budget line titled "Northwest Amherst Community Center" in order to create a community center to better serve the Creekwoods Neighborhood with social and other supportive programming. The reallocation will cover the full first year's rent as outlined under the Town of Amherst's lease with Zaepfel for the building located at 220 Northpointe Parkway, Amherst NY 14228.

A 30-day public comment period was initiated on this Substantial Amendment on March 9th, 2022, which will close on April 11, 2022. If public comments are received, the Community Development Director will present those comments to the Town Board upon consideration of the resolution.

A proposed resolution for adopting the Substantial Amendment to the Annual Action Plan is attached for your consideration. Thank you for your assistance with this matter.

Very truly yours,

Daniel C. Howard, AICP
Planning Director

AGREEMENT
BY AND BETWEEN
TOWN OF AMHERST, NEW YORK
AND
SWEET HOME CENTRAL SCHOOL DISTRICT
FOR SCHOOL DISTRICT RESOURCE OFFICER PROGRAM

THIS AGREEMENT made _____, 2022, by and between the TOWN OF AMHERST, NEW YORK, a municipal corporation organized and existing under the laws of the State of New York, having its offices located at 5583 Main Street, Williamsville, New York 14221 (hereinafter referred to as the "Town") and the SWEET HOME CENTRAL SCHOOL DISTRICT, an educational corporation organized and existing under the laws of the State of New York, having its principal offices located at 1901 Sweet Home Road, Amherst, New York 14228 (hereinafter referred to as the "School District").

WITNESSETH:

WHEREAS, the School District is desirous of obtaining the services of one (1) full-time School Resource Officer (hereinafter referred to as an "SRO") for the purposes and to provide the services set forth herein; and

WHEREAS, the Town, through its Police Department (hereinafter referred to as the "Police Department") is desirous of providing law enforcement and related services to the School District through providing to the School District an SRO under the terms and conditions set forth herein; and

WHEREAS, the School District and the Town recognize the potential outstanding benefits of providing an SRO to the School District to both the residents of the Town of Amherst, the School District and the students of the School District; and

WHEREAS, it is in the best interests of the School District and the Town to provide for the provision of an SRO by the Town, through its Police Department, to the School District.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements as set forth hereinbelow, it is hereby agreed between the Town, the Police Department, and the School District as follows:

1. General Purposes, Project Goals, Project Objectives and Performance Indicators.

It is the intent and provision of this Agreement to provide to the School District the services of an SRO from the Police Department to provide those services listed under the job description contained in Exhibit "A" annexed hereto (entitled the "SRO Placement Plan"), with the project goals and project objectives as set forth in Exhibit "A" which can be measured by the performance indicators set forth in Exhibit "A" and evaluated as set forth

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

in the evaluation plan as set forth in Exhibit "A", all as may also be otherwise set forth in the text of this Agreement.

2. Term of Agreement

The term of this Agreement shall be for the period commencing on July 1, 2022 and culminating on June 30, 2023.

3. Renewal of Agreement

Both parties shall notify the other party of their desire to renew the Agreement by written notice at least thirty (30) calendar days prior to the expiration of the term as set forth in Paragraph 2 above. Upon receipt and written acknowledgment of such notice this Agreement shall renew for successive terms of one (1) year until such time as the Agreement is not renewed by failure to notify in writing of desire to renew as stated above or by notice of termination of this Agreement as set forth in Paragraph 4 and Paragraph 5.b.iiii of this Agreement.

4. Termination of Agreement

This Agreement may be terminated by either party upon thirty (30) calendar days written notice to the other party.

5. Assignment of School Resource Officer

The Chief of Police of the Police Department may assign a regularly employed police officer as the SRO to the School District pursuant to this Agreement as follows:

a. The SRO shall be nominated by the Chief of Police of the Police Department to the School District and, upon the concurrence of the Superintendent of Schools (the "Superintendent") of the School District to that nomination, the SRO shall be assigned as the SRO for the School District.

b. The SRO assigned to the School District must meet the following requirements:

i. The SRO must be a volunteer for the position as SRO.

ii. The person nominated to be SRO must be a full-time certified and sworn police officer with a minimum of three (3) years of law enforcement experience.

iii. The person nominated to be SRO must have had or must acquire specialized training to work with youth at a school site. Such training may consist of university course work for potential SRO candidates, law enforcement course work addressing working with youth at a school site, professional training in such areas, or training and experience in connection with other recognized school/youth law enforcement programs (e.g. D.A.R.E). Sufficiency of such experience shall be based upon the joint concurrence of

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

the Chief of Police of the Police Department and the Superintendent. The SRO may be re-assigned by the Chief of Police of the Police Department (or his designee) during periods of police emergency, situations which may require augmentation of the police force, or situations which may arise which may require the SRO to act as an officer of the law which may or may not be within the School District. Other times of reassignment may include, but are not limited to, training as required by the Police Department or federal and/or state law, court appearances as required by law, or time off as permitted by the collective bargaining agreement. The SRO will give consideration to the school calendar and use discretion when taking his/her discretionary time off.

iv. In the event the Police Department cannot provide an SRO, or a suitable replacement, for thirty (30) continuous days, the District has the option to terminate this Agreement immediately.

6. Dismissal of School Resource Officer: Replacement

a. In the event the Superintendent determines, in the sole discretion of the Superintendent, that the SRO is not effectively performing his or her duties and responsibilities, the Superintendent shall advise the Chief of Police of the Police Department.

b. The Chief of Police of the Police Department may dismiss or re-assign the SRO based upon Police Department rules, regulations and/or general orders consistent with the collective bargaining agreement. In such an event, a new SRO may be designated in accordance with the procedure outlined as in Paragraph 5 above.

7. Duties of the School Resource Officer

a. The duties of the SRO will include but not be limited to those duties set forth in the SRO Placement Plan annexed hereto as Exhibit "A" as part of the job description or performance indicators.

b. Consistent with the New York State Education Law and the School District's Code of Conduct, school disciplinary functions, including but not limited to all decisions and determinations regarding student discipline, are delegated to School District administrators. SRO(s) shall engage in separate and distinct work functions such as investigatory and security-based tasks, with the primary objective of securing the safety and well being of School District personnel, students, families, and visitors. SRO(s) shall not take part in the determination, issuance, or implementation of student discipline.

8. Duties of the School District

The School District shall provide the following materials and facilities which are deemed necessary for the performance of the SRO's duties:

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

a. A properly lighted private office which shall contain a telephone and shall be appropriate for private conversations between juveniles and the SRO.

b. A location for files and records which should be properly locked and secured.

c. Access to a computer and/or secretarial assistance, and access to a fax machine.

9. Hours of Duty of SRO

a. The Chief of Police of the Police Department shall arrange for the SRO to work a full day (8.25 hours) on each day when school is in session in the School District, except for the provisions set forth in Section 5.b.iii.

b. Additionally, upon the concurrence of the Superintendent and the Police Department, the SRO may be requested to attend extracurricular events. In the event school is scheduled for only part of a school day, the SRO shall work as SRO for the portion of the work day when school is in session and may otherwise perform such other duties as may be assigned to him within the Police Department.

10. Payment by School District to Town for SRO's Services

a. For the services of the SRO, the School District shall pay the Town, the sum of $5,240.31 per month during the regular school year, September through June.

b. The Town Supervisor, or his/her designee, shall notify the School District in writing by March 1st of the preceding school year of any change in the rate charged by the Town to the School District for the services of the SRO for the following school year.

c. The funds paid by the School District to the Police Department shall remain within the budget of the Police Department to cover the overtime costs of the SRO attending extra-curricular activities which occur outside the regular school day.

d. Both the School District and the Police Department shall establish procedures to track the hours and/or full days for which the Police Department provides the services of the SRO to the School District.

e. The Town shall invoice the School District every month for the services of the SRO. Upon verification of such invoices, the School District shall pay the same within thirty (30) days receipt of each invoice.

f. The School District may require the SRO to conform to a means of verifying the SRO's hours of work in the capacity of SRO, including sign in/sign out sheet and/or time card or such other means as are deemed appropriate and effective.

11. Employment Status of SRO

The SRO shall remain at all times an employee of the Police Department and shall not be for any purpose an employee of the School District. The School District and the

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

Town acknowledge that the SRO shall remain responsive to the chain of command within the Police Department.

12. Grant Funding

The School District may receive local, state and/or federal grants to cover all or part of the costs to be paid to the Police Department for the services of the SRO. The parties agree that they will administer the SRO program at all times to be consistent with the requirements of any such grant. In the event of an inconsistency between this Agreement and the requirements of any such grant, the provisions of such grant shall control, provided that nothing in any such grant shall require an adjustment to the rate of pay by the School District to the Police Department for the services of the SRO, or violate any terms of the Police Department chain of command, rules, regulations, general orders consistent with the collective bargaining agreement.

13. Good Faith

The School District, the Town, their agents and employees agree to cooperate in good faith in fulfilling the terms of this Agreement. Unforeseen difficulties or questions will be resolved by discussion between the Superintendent and the Chief of Police of the Police Department or their designees.

14. Notices

Any and all notices or any other communication herein required or permitted shall be deemed to have been given when deposited in the United States Postal Service as regular mail, postage prepaid, or by express courier service and addressed as follows:

15. Modification

This Agreement constitutes the full understanding of the parties and not terms, conditions or understandings or agreements purporting to modify or vary the terms of this Agreement shall be binding unless made in writing and signed by the duly authorized representatives of the parties.

16. Non-Assignment

Neither the School District nor the Town or Police Department shall assign, transfer, sublet or otherwise dispose of this Agreement or its right, title or interest in this Agreement or its power to execute the same or to any other person or corporation without the previous consent in writing of the governing bodies of both the School District and the Town. Any assignment of this Agreement not complying with the foregoing shall be null and void and of no force and effect whatsoever.

17. Severability

In the event any provision of this Agreement shall be or become invalid under any provision of federal, state, or local law, such invalidity shall not affect the validity or enforceability of any other provision hereof.

18. Agreement Interest

No officer or employee of the Town, who is authorized in such capacity on behalf of the Town to negotiate, make, accept or approve or to take part in negotiating, making, accepting or approving this Agreement, shall be, directly or indirectly, interested personally in this Agreement, or in any part hereof. No officer or employee of the Town who is authorized in such capacity on behalf of the Town to exercise any supervisory or administrative function in connection with this Agreement, shall become directly or indirectly interested personally in this Agreement or in any part hereof.

19. Hold Harmless

To the fullest extent provided by law, the parties agree to indemnify, hold harmless and defend one another, their agents, employees or any other persons authorized to act for them hereunder against loss or expense, including attorney's fees, by reason a a liability imposed by law upon a party, for damages because of or to persons or to property arising out of or in consequence of the performance of this Agreement resulting from that party's negligence, error, omission, or conduct.

EXHIBIT "A"

SCHOOL RESOURCE OFFICER PLACEMENT PLAN

Amherst Police Department &
Sweet Home Central School District

Introduction

With more attention being paid to the safety of students while they are at school, many communities are considering strategies which are intended to make schools safer environments. Although statistics on school crime and violence convey that such crime and violence are not necessarily occurring in greater numbers, there is, at a minimum, anecdotal evidence which suggests that the types of incidents which are taking place on school property may be more severe in nature and may be having marked negative impact on the educational processes for which schools are responsible. Additionally, media coverage of tragic school shootings and other violence which occurred during the past decade has motivated many communities to act.

One of the ways communities are taking action is by making decisions that law enforcement officers need to be assigned to provide coverage to schools so that safety, security, and order can be maintained. The underlying rationale which is being employed by communities is that a given school's crime and violence problems are not exclusively that school's problems, but are reflective of community problems. Such a rationale leads to consideration of community approaches. Hence, in many communities the "School Resource Officer" (SRO) approach is being considered.

The U.S. Departments of Education, Health and Human Services, and Justice provide a definition for "School Resource Officer":

> *A career law enforcement officer, with sworn authority, deployed in community oriented policing, and assigned by the employing police department or agency to work in collaboration with schools and community-based organizations to: (a) address crime and disorder problems, gangs, and drug activities affecting or occurring in or around an elementary or secondary school; (b) develop or expand crime prevention efforts for students; (c) education likely school-age victims in crime prevention and safety; (d) develop or expand community justice initiatives for students; (e) train students in conflict resolution, restorative justice, and crime awareness; (f) assist in the identification of physical changes in the environment that may reduce crime in or around the school; and (g) assist in developing school policy that addresses crime and recommend procedural changes (Safe Schools/Healthy Students Initiative).*

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

The National Association of School Resource Officers (NASRO) defines "School Resource Officer" as:

> *Officers (who) promote a better understanding of our laws, why they were enacted and their benefits. They provide a visible and positive image for law enforcement. They serve as a confidential source of counseling to students concerning the problems they face. They bring expertise into schools that will help young people make more positive choices in their lives. They also work to protect the school environment and to maintain an atmosphere where teachers feel safe to teach and students feel safe enough to learn (NASRO website).*

Regardless of definition, School Resource Officers have three main functions: *law enforcement officer, law-related teacher, and law-related counselor.* First, as a law enforcement officer, the SRO maintains a safe and secure environment on the school campus that will be conducive to an educationally stimulating atmosphere and serve as a means of preventing criminal activities and disturbances. Second, as a teacher, the SRO promotes positive attitudes regarding the police role in society and informs the students of their rights and responsibilities as lawful citizens. Third, as a counselor, the SRO establishes a more complete liaison with school personnel and students in an effort to prevent juvenile delinquency. According to the National Assessment of School Resource Officer Programs (National Institute of Justice, 2005), SRO's spend on average about 60-65 percent of their time on law enforcement, 25-30 percent counseling, and 5-10 percent teaching.

The most effective way an SRO can accomplish these goals is to be a positive role model; students learn from every interaction they have with an SRO. It is essential for an SRO to endorse high moral standards, use good judgment and discretion, be consistent and fair, respect all students, and display a sincere concern for the school community. School Resource Officers must maintain a professional appearance; be visible, accessible and willing to talk to the students; attend and participate in school activities both during the school year and the summer months; interact positively with the students and the community while taking their concerns seriously; maintain a relationship with the students' parents by attending PTA meetings and parent conferences; and maintain a relationship with the faculty and school administrators.

The SRO interacts with the school administrators and faculty, the student body, and the outside community. Although working in the school, the SRO is still an employee of the law enforcement agency and is responsible for identifying and resolving school safety problems. However, the SRO is not the disciplinarian or chaperone for the school –which job remains with the principal and faculty. As a resource for school administrators, the SRO serves as a means of establishing order and safety so learning can take place. The SRO shares information with faculty on gang activity and truants, provides expertise on crime prevention and responds to and investigates criminal activity in the school. The SRO is also a teacher who provides law-related education to students. As a resource for the student body, the SRO's office with the school serves as a resource center and makes available to students information on topics ranging from date rape to drug abuse. The SRO also assists the school guidance department by counseling students; giving them the opportunity to

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

talk about their problems and helping them find positive solutions. When necessary, the SRO refers students and family members to appropriate social agencies for additional assistance. Additionally, the SRO responds to requests from parents and the community regarding truants, drug activity, domestic problems, burglaries, thefts, and other school safety issues.

The SRO Program works to prevent juvenile delinquency and create a favorable student/police officer relationship. The Town of Amherst, the Amherst Town Court, school administrators, teachers, parents, and students are all beneficiaries of the SRO Program and, as stakeholders in the search for safer schools, must support and work with the SRO to reduce criminal conduct both on and off campus.

Job Description

- Provide law enforcement and police services to the school, school grounds and areas adjacent to the school. Investigate allegations of criminal incidents per police department policies and procedures. Enforce state and local laws and ordinances. Make appropriate referrals to juvenile authorities or other governmental agencies
- Work to prevent juvenile delinquency through close contact and positive relationships with students. In addition the SRO shall develop crime prevention programs and conduct security inspections to deter criminal or delinquent activities. The SRO should monitor crime statistics and work with other police personnel, school administration and faculty, and students to design crime prevention strategies.
- Establish and maintain a close partnership with school administrators in order to provide for a safe school environment. Assist school officials with their efforts to enforce School District policies and procedures, Assist school administration in emergency response planning and building security matters. Provide a course of training for school personnel in handling crisis situations, which may arise at the school.
- Be visible within the school community. Attend and participate in school functions. Build working relationships with the school's staff as well as with student and parent groups.
- Develop, implement and instruct classes in law related topics to support the educational efforts of the faculty. Work closely with teachers in designing and presenting law-related topics and the role of police in our society.
- Work with school counselors and other student support staff to assist students and to provide services to students involved in situations where referral to service agencies are necessary. Assist in conflict resolution efforts.
- Initiate interaction with students in the classroom and general areas of the school building; participate in individual and small group meetings and conferences with students. Promote the profession of police officer and be a positive role model. Increase the accessibility of police to the school community.

Juvenile Crime

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

Contemporary theories on juvenile delinquency suggest that the proliferation of negative influences in children's lives relate directly to juvenile crime rates. Some of these negative elements are poverty, discrimination, peer pressure, an unstable home life (broken or single parent homes), and unstable school life, psychological instability, changing morals of society, ineffectiveness of the juvenile justice system, direct influences of the mass media, and ignorance to the law and criminal justice system.

Recent statistics indicate that although the overall juvenile violent crime rate within the nation has been on the decline after decades of escalation, juvenile crime rates for other offenses have remained relatively static. Crime in schools has also seen a steady rise during the same periods. According to the National Crime Safety Center, juveniles commit more than 3 million crimes in schools each year. Although part of these changes may be attributable to greater public awareness of crime in schools and increasing pressure on education officials to report school crime incidents, there is no question that violence and crime are on the rise in our schools and affecting our children's ability to learn.

Project Goals

- To maintain a safe and secure environment on the school campus which will be conducive to an educationally stimulating atmosphere and serve as a means of preventing criminal activities and disturbances.
- To promote positive attitudes regarding the police role in society and to inform the students of their rights and responsibilities as lawful citizens.
- To establish a more complete liaison with school personnel and students in a cooperative effort to prevent juvenile delinquency.
- To bridge the gap between police officers and adolescents in order to increase positive attitudes toward law enforcement and to reduce juvenile crime through counseling, teaching about the criminal justice system, and taking a personal interest in the students.

Project Objectives

- Promote student understanding of the law and the criminal justice system.
- Decrease the number of student conduct/criminal violations occurring during the school day and during extracurricular school functions.
- Decrease gang activity and involvement in gangs by students.
- Improve students' attitudes and relationships with law enforcement personnel.
- Increase access of students, parents, and families to community agencies which offer assistance to youths and their families for problems that require professional help.
- Conduct crime prevention programs and improve school officials' response to criminal activity and violence.

Performance Indicators

Attachment: Sweet Home SRO Contract for Approval (RES-2022-388 : 2022-2023 SRO Contract: Sweet Home Central School District (CRS#

- Present law-related education to classes during the school year. The SRO will keep a record of all law-related courses that are taught including drug prevention presentations and other programs deemed necessary and appropriate by school administrators and police management.
- The number of student conduct/criminal violations for the school year will be compared to the number from previous school years to determine any increase or decrease.
- The SRO will keep a record of all gang activity on or near campus, attempt to identify the individuals involved, and relate this information to the police department. This information will be compared to records from previous years to determine changes in gang activity. If necessary, the SRO will present gang awareness and prevention training to the student body, faculty, and parent organizations.
- The SRO will assess the students' attitudes toward law enforcement by interacting with them during the school day and during extracurricular activities and through the use of student surveys at the beginning and end of each school year. The relationship between the SRO and the student body will also be assessed through surveys completed by parents, faculty members, and administrators to gauge the effectiveness of the SRO program.
- The SRO will research and document all municipal, county, and state agencies available to provide services to students and their families. A directory of such agencies including points of contact will be developed or maintained. The SRO will hold conferences with students, parents, and school faculty when appropriate and keep a log of this activity. The SRO will also maintain a record of all referral services rendered and follow-up the referrals to determine if they were helpful or if other services are necessary.
- The SRO will maintain a record of all crime prevention lectures or seminars given to the student body or public. The SRO will assist school administrators in surveying school facilities for areas that provide opportunities for commission of a crime and develop a plan to correct the problem. The SRO will also assist school violence prevention teams in developing strategic responses to incidents of violence within the school.
- The commanding officer will be responsible to collect and analyze data, prepare progress reports and write the annual evaluation report.
- Data will be gathered on law enforcement related incidents, law enforcement related course grades, parent and teacher survey results, and outcomes of conferences with students, parents and faculty members, as well as any other information that is explicitly mentioned in the projects' performance indicators.

AGREEMENT
BY AND BETWEEN
TOWN OF AMHERST, NEW YORK
AND
AMHERST CENTRAL SCHOOL DISTRICT
FOR SCHOOL DISTRICT RESOURCE OFFICER PROGRAM

THIS AGREEMENT made _____, 2022, by and between the TOWN OF AMHERST, NEW YORK, a municipal corporation organized and existing under the laws of the State of New York, having its offices located at 5583 Main Street, Williamsville, New York 14221 (hereinafter referred to as the "Town") and the AMHERST CENTRAL SCHOOL DISTRICT, an educational corporation organized and existing under the laws of the State of New York, having its principal offices located at 55 Kings Highway, Amherst, New York 14226 (hereinafter referred to as the "School District").

WITNESSETH:

WHEREAS, the School District is desirous of obtaining the services of one (1) full-time School Resource Officer (hereinafter referred to as an "SRO") for the purposes and to provide the services set forth herein; and

WHEREAS, the Town, through its Police Department (hereinafter referred to as the "Police Department") is desirous of providing law enforcement and related services to the School District through providing to the School District an SRO under the terms and conditions set forth herein; and

WHEREAS, the School District and the Town recognize the potential outstanding benefits of providing an SRO to the School District to both the residents of the Town of Amherst, the School District and the students of the School District; and

WHEREAS, it is in the best interests of the School District and the Town to provide for the provision of an SRO by the Town, through its Police Department, to the School District.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements as set forth hereinbelow, it is hereby agreed between the Town, the Police Department, and the School District as follows:

1. General Purposes, Project Goals, Project Objectives and Performance Indicators.

It is the intent and provision of this Agreement to provide to the School District the services of an SRO from the Police Department to provide those services listed under the job description contained in Exhibit "A" annexed hereto (entitled the "SRO Placement Plan"), with the project goals and project objectives as set forth in Exhibit "A" which can be measured by the performance indicators set forth in Exhibit "A" and evaluated as set forth

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

in the evaluation plan as set forth in Exhibit "A", all as may also be otherwise set forth in the text of this Agreement.

2. Term of Agreement

The term of this Agreement shall be for the period commencing on July 1, 2022 and culminating on June 30, 2023.

3. Renewal of Agreement

Both parties shall notify the other party of their desire to renew the Agreement by written notice at least thirty (30) calendar days prior to the expiration of the term as set forth in Paragraph 2 above. Upon receipt and written acknowledgment of such notice this Agreement shall renew for successive terms of one (1) year until such time as the Agreement is not renewed by failure to notify in writing of desire to renew as stated above or by notice of termination of this Agreement as set forth in Paragraph 4 and Paragraph 5b.iiii of this Agreement.

4. Termination of Agreement

This Agreement may be terminated by either party upon thirty (30) calendar days written notice to the other party.

5. Assignment of School Resource Officer

The Chief of Police of the Police Department may assign a regularly employed police officer as the SRO to the School District pursuant to this Agreement as follows:

a. The SRO shall be nominated by the Chief of Police of the Police Department to the School District and, upon the concurrence of the Superintendent of Schools (the "Superintendent") of the School District to that nomination, the SRO shall be assigned as the SRO for the School District.

b. The SRO assigned to the School District must meet the following requirements:

i. The SRO must be a volunteer for the position as SRO.

ii. The person nominated to be SRO must be a full-time certified and sworn police officer with a minimum of three (3) years of law enforcement experience.

iii. The person nominated to be SRO must have had or must acquire specialized training to work with youth at a school site. Such training may consist of university course work for potential SRO candidates, law enforcement course work addressing working with youth at a school site, professional training in such areas, or training and experience in connection with other recognized school/youth law enforcement programs (e.g. D.A.R.E). Sufficiency of such experience shall be based upon the joint concurrence of

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

the Chief of Police of the Police Department and the Superintendent. The SRO may be re-assigned by the Chief of Police of the Police Department (or his designee) during periods of police emergency, situations which may require augmentation of the police force, or situations which may arise which may require the SRO to act as an officer of the law which may or may not be within the School District. Other times of reassignment may include, but are not limited to, training as required by the Police Department or federal and/or state law, court appearances as required by law, or time off as permitted by the collective bargaining agreement. The SRO will give consideration to the school calendar and use discretion when taking his/her discretionary time off.

iv. In the event the Police Department cannot provide an SRO, or a suitable replacement, for thirty (30) continuous days, the District has the option to terminate this Agreement immediately.

6. Dismissal of School Resource Officer: Replacement

a. In the event the Superintendent determines, in the sole discretion of the Superintendent, that the SRO is not effectively performing his or her duties and responsibilities, the Superintendent shall advise the Chief of Police of the Police Department.

b. The Chief of Police of the Police Department may dismiss or re-assign the SRO based upon Police Department rules, regulations and/or general orders consistent with the collective bargaining agreement. In such an event, a new SRO may be designated in accordance with the procedure outlined as in Paragraph 5 above.

7. Duties of the School Resource Officer

a. The duties of the SRO will include but not be limited to those duties set forth in the SRO Placement Plan annexed hereto as Exhibit "A" as part of the job description or performance indicators.

b. Consistent with the New York State Education Law and the School District's Code of Conduct, school disciplinary functions, including but not limited to all decisions and determinations regarding student discipline, are delegated to School District administrators. SRO(s) shall engage in separate and distinct work functions such as investigatory and security-based tasks, with the primary objective of securing the safety and well being of School District personnel, students, families, and visitors. SRO(s) shall not take part in the determination, issuance, or implementation of student discipline.

8. Duties of the School District

The School District shall provide the following materials and facilities which are deemed necessary for the performance of the SRO's duties:

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

a. A properly lighted private office which shall contain a telephone and shall be appropriate for private conversations between juveniles and the SRO.

b. A location for files and records which should be properly locked and secured.

c. Access to a computer and/or secretarial assistance, and access to a fax machine.

9. Hours of Duty of SRO

a. The Chief of Police of the Police Department shall arrange for the SRO to work a full day (8.25 hours) on each day when school is in session in the School District, except for the provisions set forth in Section 5.b.iii.

b. Additionally, upon the concurrence of the Superintendent and the Police Department, the SRO may be requested to attend extracurricular events. In the event school is scheduled for only part of a school day, the SRO shall work as SRO for the portion of the work day when school is in session and may otherwise perform such other duties as may be assigned to him within the Police Department.

10. Payment by School District to Town for SRO's Services

a. For the services of the SRO, the School District shall pay the Town, the sum of $5,240.31 per month during the regular school year, September through June.

b. The Town Supervisor, or his/her designee, shall notify the School District in writing by March 1st of the preceding school year of any change in the rate charged by the Town to the School District for the services of the SRO for the following school year.

c. The funds paid by the School District to the Police Department shall remain within the budget of the Police Department to cover the overtime costs of the SRO attending extra-curricular activities which occur outside the regular school day.

d. Both the School District and the Police Department shall establish procedures to track the hours and/or full days for which the Police Department provides the services of the SRO to the School District.

e. The Town shall invoice the School District every month for the services of the SRO. Upon verification of such invoices, the School District shall pay the same within thirty (30) days receipt of each invoice.

f. The School District may require the SRO to conform to a means of verifying the SRO's hours of work in the capacity of SRO, including sign in/sign out sheet and/or time card or such other means as are deemed appropriate and effective.

11. Employment Status of SRO

The SRO shall remain at all times an employee of the Police Department and shall not be for any purpose an employee of the School District. The School District and the

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

Town acknowledge that the SRO shall remain responsive to the chain of command within the Police Department.

12. Grant Funding

The School District may receive local, state and/or federal grants to cover all or part of the costs to be paid to the Police Department for the services of the SRO. The parties agree that they will administer the SRO program at all times to be consistent with the requirements of any such grant. In the event of an inconsistency between this Agreement and the requirements of any such grant, the provisions of such grant shall control, provided that nothing in any such grant shall require an adjustment to the rate of pay by the School District to the Police Department for the services of the SRO, or violate any terms of the Police Department chain of command, rules, regulations, general orders consistent with the collective bargaining agreement.

13. Good Faith

The School District, the Town, their agents and employees agree to cooperate in good faith in fulfilling the terms of this Agreement. Unforeseen difficulties or questions will be resolved by discussion between the Superintendent and the Chief of Police of the Police Department or their designees.

14. Notices

Any and all notices or any other communication herein required or permitted shall be deemed to have been given when deposited in the United States Postal Service as regular mail, postage prepaid, or by express courier service and addressed as follows:

If to the School District:
Superintendent of Schools
Amherst Central School District
55 Kings Highway
Amherst, New York 14226

If to the Police Department:
Chief of Police
Town of Amherst Police Department
500 John James Audubon Parkway
Amherst, New York 14228

If to the Town:
Town Supervisor
Amherst Town Hall
5583 Main Street
Williamsville, New York 14221

In addition, correspondence will also be sent via email to the particular receiving party as named above.

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

15. Modification

This Agreement constitutes the full understanding of the parties and not terms, conditions or understandings or agreements purporting to modify or vary the terms of this Agreement shall be binding unless made in writing and signed by the duly authorized representatives of the parties.

16. Non-Assignment

Neither the School District nor the Town or Police Department shall assign, transfer, sublet or otherwise dispose of this Agreement or its right, title or interest in this Agreement or its power to execute the same or to any other person or corporation without the previous consent in writing of the governing bodies of both the School District and the Town. Any assignment of this Agreement not complying with the foregoing shall be null and void and of no force and effect whatsoever.

17. Severability

In the event any provision of this Agreement shall be or become invalid under any provision of federal, state, or local law, such invalidity shall not affect the validity or enforceability of any other provision hereof.

18. Agreement Interest

No officer or employee of the Town, who is authorized in such capacity on behalf of the Town to negotiate, make, accept or approve or to take part in negotiating, making, accepting or approving this Agreement, shall be, directly or indirectly, interested personally in this Agreement, or in any part hereof. No officer or employee of the Town who is authorized in such capacity on behalf of the Town to exercise any supervisory or administrative function in connection with this Agreement, shall become directly or indirectly interested personally in this Agreement or in any part hereof.

19. Hold Harmless

To the fullest extent provided by law, the parties agree to indemnify, hold harmless and defend one another, their agents, employees or any other persons authorized to act for them hereunder against loss or expense, including attorney's fees, by reason a a liability imposed by law upon a party, for damages because of or to persons or to property arising out of or in consequence of the performance of this Agreement resulting from that party's negligence, error, omission, or conduct.

EXHIBIT "A"

SCHOOL RESOURCE OFFICER PLACEMENT PLAN

Amherst Police Department &
Amherst Central School District

Introduction

With more attention being paid to the safety of students while they are at school, many communities are considering strategies which are intended to make schools safer environments. Although statistics on school crime and violence convey that such crime and violence are not necessarily occurring in greater numbers, there is, at a minimum, anecdotal evidence which suggests that the types of incidents which are taking place on school property may be more severe in nature and may be having marked negative impact on the educational processes for which schools are responsible. Additionally, media coverage of tragic school shootings and other violence which occurred during the past decade has motivated many communities to act.

One of the ways communities are taking action is by making decisions that law enforcement officers need to be assigned to provide coverage to schools so that safety, security, and order can be maintained. The underlying rationale which is being employed by communities is that a given school's crime and violence problems are not exclusively that school's problems, but are reflective of community problems. Such a rationale leads to consideration of community approaches. Hence, in many communities the "School Resource Officer" (SRO) approach is being considered.

The U.S. Departments of Education, Health and Human Services, and Justice provide a definition for "School Resource Officer":

> *A career law enforcement officer, with sworn authority, deployed in community oriented policing, and assigned by the employing police department or agency to work in collaboration with schools and community-based organizations to: (a) address crime and disorder problems, gangs, and drug activities affecting or occurring in or around an elementary or secondary school; (b) develop or expand crime prevention efforts for students; (c) education likely school-age victims in crime prevention and safety; (d) develop or expand community justice initiatives for students; (e) train students in conflict resolution, restorative justice, and crime awareness; (f) assist in the identification of physical changes in the environment that may reduce crime in or around the school; and (g) assist in developing school policy that addresses crime and recommend procedural changes (Safe Schools/Healthy Students Initiative).*

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

The National Association of School Resource Officers (NASRO) defines "School Resource Officer" as:

> *Officers (who) promote a better understanding of our laws, why they were enacted and their benefits. They provide a visible and positive image for law enforcement. They serve as a confidential source of counseling to students concerning the problems they face. They bring expertise into schools that will help young people make more positive choices in their lives. They also work to protect the school environment and to maintain an atmosphere where teachers feel safe to teach and students feel safe enough to learn (NASRO website).*

Regardless of definition, School Resource Officers have three main functions: *law enforcement officer, law-related teacher, and law-related counselor.* First, as a law enforcement officer, the SRO maintains a safe and secure environment on the school campus that will be conducive to an educationally stimulating atmosphere and serve as a means of preventing criminal activities and disturbances. Second, as a teacher, the SRO promotes positive attitudes regarding the police role in society and informs the students of their rights and responsibilities as lawful citizens. Third, as a counselor, the SRO establishes a more complete liaison with school personnel and students in an effort to prevent juvenile delinquency. According to the National Assessment of School Resource Officer Programs (National Institute of Justice, 2005), SRO's spend on average about 60-65 percent of their time on law enforcement, 25-30 percent counseling, and 5-10 percent teaching.

The most effective way an SRO can accomplish these goals is to be a positive role model; students learn from every interaction they have with an SRO. It is essential for an SRO to endorse high moral standards, use good judgment and discretion, be consistent and fair, respect all students, and display a sincere concern for the school community. School Resource Officers must maintain a professional appearance; be visible, accessible and willing to talk to the students; attend and participate in school activities both during the school year and the summer months; interact positively with the students and the community while taking their concerns seriously; maintain a relationship with the students' parents by attending PTA meetings and parent conferences; and maintain a relationship with the faculty and school administrators.

The SRO interacts with the school administrators and faculty, the student body, and the outside community. Although working in the school, the SRO is still an employee of the law enforcement agency and is responsible for identifying and resolving school safety problems. However, the SRO is not the disciplinarian or chaperone for the school –which job remains with the principal and faculty. As a resource for school administrators, the SRO serves as a means of establishing order and safety so learning can take place. The SRO shares information with faculty on gang activity and truants, provides expertise on crime prevention and responds to and investigates criminal activity in the school. The SRO is also a teacher who provides law-related education to students. As a resource for the student body, the SRO's office with the school serves as a resource center and makes available to students information on topics ranging from date rape to drug abuse. The SRO

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

also assists the school guidance department by counseling students; giving them the opportunity to talk about their problems and helping them find positive solutions. When necessary, the SRO refers students and family members to appropriate social agencies for additional assistance. Additionally, the SRO responds to requests from parents and the community regarding truants, drug activity, domestic problems, burglaries, thefts, and other school safety issues.

The SRO Program works to prevent juvenile delinquency and create a favorable student/police officer relationship. The Town of Amherst, the Amherst Town Court, school administrators, teachers, parents, and students are all beneficiaries of the SRO Program and, as stakeholders in the search for safer schools, must support and work with the SRO to reduce criminal conduct both on and off campus.

Job Description

- Provide law enforcement and police services to the school, school grounds and areas adjacent to the school. Investigate allegations of criminal incidents per police department policies and procedures. Enforce state and local laws and ordinances. Make appropriate referrals to juvenile authorities or other governmental agencies
- Work to prevent juvenile delinquency through close contact and positive relationships with students. In addition the SRO shall develop crime prevention programs and conduct security inspections to deter criminal or delinquent activities. The SRO should monitor crime statistics and work with other police personnel, school administration and faculty, and students to design crime prevention strategies.
- Establish and maintain a close partnership with school administrators in order to provide for a safe school environment. Assist school officials with their efforts to enforce School District policies and procedures, Assist school administration in emergency response planning and building security matters. Provide a course of training for school personnel in handling crisis situations, which may arise at the school.
- Be visible within the school community. Attend and participate in school functions. Build working relationships with the school's staff as well as with student and parent groups.
- Develop, implement and instruct classes in law related topics to support the educational efforts of the faculty. Work closely with teachers in designing and presenting law-related topics and the role of police in our society.
- Work with school counselors and other student support staff to assist students and to provide services to students involved in situations where referral to service agencies are necessary. Assist in conflict resolution efforts.
- Initiate interaction with students in the classroom and general areas of the school building; participate in individual and small group meetings and conferences with students. Promote the profession of police officer and be a positive role model. Increase the accessibility of police to the school community.

Juvenile Crime

Contemporary theories on juvenile delinquency suggest that the proliferation of negative influences in children's lives relate directly to juvenile crime rates. Some of these negative elements are poverty, discrimination, peer pressure, an unstable home life (broken or single parent homes), and unstable school life, psychological instability, changing morals of society, ineffectiveness of the juvenile justice system, direct influences of the mass media, and ignorance to the law and criminal justice system.

Recent statistics indicate that although the overall juvenile violent crime rate within the nation has been on the decline after decades of escalation, juvenile crime rates for other offenses have remained relatively static. Crime in schools has also seen a steady rise during the same periods. According to the National Crime Safety Center, juveniles commit more than 3 million crimes in schools each year. Although part of these changes may be attributable to greater public awareness of crime in schools and increasing pressure on education officials to report school crime incidents, there is no question that violence and crime are on the rise in our schools and affecting our children's ability to learn.

Project Goals

- To maintain a safe and secure environment on the school campus which will be conducive to an educationally stimulating atmosphere and serve as a means of preventing criminal activities and disturbances.
- To promote positive attitudes regarding the police role in society and to inform the students of their rights and responsibilities as lawful citizens.
- To establish a more complete liaison with school personnel and students in a cooperative effort to prevent juvenile delinquency.
- To bridge the gap between police officers and adolescents in order to increase positive attitudes toward law enforcement and to reduce juvenile crime through counseling, teaching about the criminal justice system, and taking a personal interest in the students.

Project Objectives

- Promote student understanding of the law and the criminal justice system.
- Decrease the number of student conduct/criminal violations occurring during the school day and during extracurricular school functions.
- Decrease gang activity and involvement in gangs by students.
- Improve students' attitudes and relationships with law enforcement personnel.
- Increase access of students, parents, and families to community agencies which offer assistance to youths and their families for problems that require professional help.
- Conduct crime prevention programs and improve school officials' response to criminal activity and violence.

Attachment: Amherst SRO Contract for Routing (RES-2022-389 : 2022-2023 SRO Contract: Amherst Central School District (CRS#3217))

Performance Indicators

- Present law-related education to classes during the school year. The SRO will keep a record of all law-related courses that are taught including drug prevention presentations and other programs deemed necessary and appropriate by school administrators and police management.
- The number of student conduct/criminal violations for the school year will be compared to the number from previous school years to determine any increase or decrease.
- The SRO will keep a record of all gang activity on or near campus, attempt to identify the individuals involved, and relate this information to the police department. This information will be compared to records from previous years to determine changes in gang activity. If necessary, the SRO will present gang awareness and prevention training to the student body, faculty, and parent organizations.
- The SRO will assess the students' attitudes toward law enforcement by interacting with them during the school day and during extracurricular activities and through the use of student surveys at the beginning and end of each school year. The relationship between the SRO and the student body will also be assessed through surveys completed by parents, faculty members, and administrators to gauge the effectiveness of the SRO program.
- The SRO will research and document all municipal, county, and state agencies available to provide services to students and their families. A directory of such agencies including points of contact will be developed or maintained. The SRO will hold conferences with students, parents, and school faculty when appropriate and keep a log of this activity. The SRO will also maintain a record of all referral services rendered and follow-up the referrals to determine if they were helpful or if other services are necessary.
- The SRO will maintain a record of all crime prevention lectures or seminars given to the student body or public. The SRO will assist school administrators in surveying school facilities for areas that provide opportunities for commission of a crime and develop a plan to correct the problem. The SRO will also assist school violence prevention teams in developing strategic responses to incidents of violence within the school.
- The commanding officer will be responsible to collect and analyze data, prepare progress reports and write the annual evaluation report.
- Data will be gathered on law enforcement related incidents, law enforcement related course grades, parent and teacher survey results, and outcomes of conferences with students, parents and faculty members, as well as any other information that is explicitly mentioned in the projects' performance indicators.

TEMPORARY ACCESS AGREEMENT

This Temporary Access Agreement ("Agreement") is entered as of the 1 day of April, 2022 by and between Buffalo Armory, LLC, 1050 Military Road, Buffalo, New York 14217 ("Buffalo Armory") and the Town of Amherst, 5583 Main Street, Williamsville, New York and the Town of Amherst Police Department, 500 John James Audubon Parkway, Buffalo, New York 14228 (collectively "Town").

1) To assist the Buffalo Armory with on location filming at 4220 Bailey Avenue, Amherst, New York, bearing SBL #67.65-1-6 ("Bailey Range"), Buffalo Armory needs access to this site for purposes of conducting its video production for marketing.

2) The TOWN, for valuable consideration the sufficiency and receipt of which is hereby acknowledged, hereby grants Buffalo Armory, the right to enter upon the Bailey Range Property for purposes described.

3) Buffalo Armory assumes all risks of, and agrees to indemnify, protect and save harmless the Town and its successors and assigns from all loss, damage, or injury to persons (including, without limitation, personal injuries resulting in death) or property and from all claims, demands, suits, liabilities, obligations and expenses arising therefrom, including reasonable legal fees and expenses, caused by or in any way connected with the exercise of the rights granted hereunder, except to the extent the same shall be caused by the sole negligent or sole intentional acts or omissions of any employee, officer, agent, invitee or representatives of the TOWN. In the event that any judgment, lien or other encumbrance is placed upon or levied against the Bailey Range Property in any suit or other proceedings due to Buffalo Armory's activities, Buffalo Armory will immediately cause the same to be discharged by the posting of a bond or otherwise.

4) Buffalo Armory shall maintain at all times during the term of this Agreement Commercial General Liability insurance in the amount of $1,000,000 per occurrence for personal injury and advertising injury, $2,000,000 aggregate, and $2,000,000 in excess with the TOWN added as an additional insured on a primary and non-contributory basis to protect the TOWN from against any and all claims, demands and cause of actions, arising by reason of any work performed by Buffalo Armory and said work will not commence under this Agreement until an appropriate certificate of insurance has been provided to the TOWN.

5) Tt the fullest extent permitted by law, Buffalo Armory will indemnify and hold the Town, its officers, agents, and employees, harmless from any and all liability, demands, claims, expenses (including legal fees and court costs), awards or judgments imposed upon the Town, its officers, agents, and/or employees, arising from the negligence, active or passive, of Buffalo Armory, its officers, agents, subcontractors, and/or employees in carrying out filming or other related activities on the Bailey Range Property.

6) No waiver of any breach of any condition of the Agreement shall be binding unless in writing and signed by the party waiving said breach. No such waiver shall in any

Attachment: MOU for Routing (RES-2022-390 : MOU: Bailey Training Facility Use: Buffalo Armory, LLC (CRS#3261))

way affect any other term or condition of this Agreement or constitute a cause or excuse for a repetition of such or any other breach unless the waiver shall expressly include the same.

7) This Agreement shall be governed by, and interpreted according to the laws of the State of New York. Any and all legal action necessary to enforce the agreement will be held in Erie County, New York.

8) Each and every provision of law and clause required by law to be inserted in this contract shall be deemed to have been inserted herein. If any such provision is not inserted through mistake or otherwise, then upon the application of either party, this contract shall be physically amended forthwith and executed by the parties to make such insertion.

8.) The Town of Amherst Town will approve this Agreement via the adoption of Resolution during its meeting on April 11, 2022.

9) This Agreement shall be effective as of the date first set forth above and this Agreement shall terminate on April 31, 2022.

IN WITNESS WHEREOF, the parties have executed this Agreement effective as of the date set forth above.

Tom Barillari
Tech Services
Amherst Police Department
500 John James Audubon Pkwy
Amherst, NY 14228

11/8/2021

Dear Tom Barillari,

Digital Surveillance Solutions, Inc. (DSS) is pleased to present this proposal for supplying, installing, and configuring IP video additions. Please find the following scope of work.

Scope of work:

-Project to be completed at Northtown Center at Amherst, Buffalo, 14221.

-Provide and Install 13 cameras:
(8) on Lower Level
(5) on Upper Level

-Add to Exacq server. Configuration of cameras, setup views and assign rights accordingly.

-Rack switch. Connect to network.

-DSS to cable from second floor closet to each camera location. DSS will provide patch cables for the camera end and the switch end.

Exclusions/Out of Scope:

-The Town of Amherst (Northtown Center) is responsible for providing a lift, if needed, for use during the installation.
-Network connectivity.
-Northtown Center to provide adequate rack space for patch panel and switch.
-120V power in closet.
-Paths to network rack.

Attachment: DSS NTC Contract for CRS Routing 3.2.2022 (RES-2022-391 : DSS : NTC Camera Installation (CRS#3190))

digital surveillance solutions

Attachment: DSS NTC Contract for CRS Routing 3.2.2022 (RES-2022-391 : DSS : NTC Camera Installation (CRS#3190))

Assumptions:

1. All conduit pathways, cable pathways and critical points of access must be provided and accessible at time of work.
2. All work shall be performed Monday-Friday during normal business hours (7:00am to 5:00pm).
3. Parking on site shall be provided by client at no cost.
4. Amherst Police Department will provide free and clear access to all working areas.
5. A point of contact (POC) and site access to necessary areas must be provided prior to arrival to the jobsite. This includes all areas to be under surveillance, data center(s), wiring closets and mechanical rooms and any other areas that could impact the deployment of the Video Surveillance System. The POC will be the person to whom all DSS communication will be addressed and who has the authority to act for Amherst Police Department in all aspects of the project. POC responsibilities includes:

    a. Serve as the interface between Digital Surveillance Solutions, Inc. and Amherst Police Department
    b. Identify, schedule and confirm availability of support staff and management for onsite meetings (if necessary) and training.
    c. Schedule meeting/training rooms as necessary.
    d. Work with Digital Surveillance Solutions to administer any project change orders.
    e. Obtain and provide information, data, decisions and approvals, within 1 working day of Digital Surveillance Solutions' request, unless both parties agree to an extended response time.
    f. Resolve deviations from project plans that may be caused by Amherst Police Department
    g. Help resolve project issues, and escalate issues within Amherst Police Department.

6. Any down time resulting from the lack of access or if customer scope of work not completed will not be the responsibility of Digital Surveillance Solutions and is billable at current hourly labor & travel rates.
7. Any hardware not included in DSS scope of work is to be functional and complete. If any hardware is non-functional or not complete, a change order will be required to add additional hardware of this scope. If change order is not provided to DSS in a timely manner, additional hours will be billed at current hourly labor & travel rates.
8. Installation will conform to all State, County and local codes.

digital surveillance solutions

9. All electrical supply to be provided by Amherst Police Department.
10. Environmental conditions required by hardware manufacturers will be maintained by Amherst Police Department for the term of the system warranty. If environmental conditions required by manufacture are not maintained, repairing damage to equipment will be at the expense of the Amherst Police Department.
11. Amherst Police Department to collaborate with DSS on the creation of the business rules that govern the utilization of the video surveillance system.

Terms:

1. Amherst Police Department to provide an adequate path for loading equipment and materials into the facility. This includes, but not limited to, a loading dock, ramp, freight elevator, etc. Additionally, a secure location will be provided by Amherst Police Department or General Contractor to store material and equipment on site during the installation process.
2. Upon delivery to customer site, Amherst Police Department assumes responsibility for the safeguard and condition of all delivered materials.
3. Any damage or loss to Digital Surveillance Solutions installation by others will be billed to client. DSS will not make any corrections to damage until written approval has been provided to DSS by Amherst Police Department with signature of authorized party. If authorization is not given to DSS in a timely manner, DSS will not be held responsible for any delays.
4. Amherst Police Department is responsible for removal of old product, which may include but not limited to, cameras, cabling, recording equipment i.e. DVRs, servers, etc.

Warranty:

1. Digital Surveillance Solutions provides a sixty (60) day warranty on labor.
2. Warranty will begin upon completion of DSS scope items. Warranty will not be delayed due to system dependencies not in scope for DSS. Multi phased projects will have warranties that commence at completion of each phase.
3. Equipment warranty is established by the manufacturers unless specified otherwise in the scope of work.
4. Should any defects develop during the warranty period due to workmanship or equipment failure, Digital Surveillance Solutions shall repair to original working order at no expense to client.

Warranty exclusions:

1. Customer furnished equipment, cables, or connectors.
2. Modification of system by others without the written consent and approval by Digital Surveillance Solutions. Modification(s) of the system by any vendor

Attachment: DSS NTC Contract for CRS Routing 3.2.2022 (RES-2022-391 : DSS : NTC Camera Installation (CRS#3190))

digital surveillance solutions

without written consent of Digital Surveillance Solutions will render the warranty null and void. Repairs and replacements will be subject to Time & Materials at Digital Surveillance Solutions current labor rates at the time of repairs.

3. System abuse or misuse.
4. Floods, fires, earthquakes, lightning strikes, or other events beyond the control of Digital Surveillance Solutions.
5. Environmental conditions required by hardware manufacturers will be maintained by Amherst Police Department for the term of the system warranty. If environmental conditions required by manufacture are not maintained, repairing damage to equipment will be at the expense of the Amherst Police Department.

I appreciate the opportunity to submit this proposal. If you have any questions, comments, or require further details, feel free to contact me.

500 John James Audubon Pkwy
Amherst, NY 14228

3/4/2022

Dear Tom Barillari,

Digital Surveillance Solutions, Inc. (DSS) is pleased to present this proposal for supplying, installing, and configuring access control additions. Please find the following scope of work.

Scope of work:

-Provide and install at
Tech services office: Strike, keypad reader and door contact.
Interview room #1 - Strike, door contact and Bluetooth reader inside room.
Crime Lab - Strike, door contact and Bluetooth reader.
Lab - Strike, door contact and reader on each side of door.

-Provide and install S2 node.
-Provide and install power supply.
-Provide and install battery backup for power supply.
-Access control cabling to each door.

Exclusions/Out of Scope:

-Network connectivity.
-Amherst PD to provide access to IT closets, ceilings, and/or any building location necessary to perform work.
-Amherst PD to provide adequate space for S2 node and power supply.
-120V power.
-Amherst PD responsible for reoccurring annual fee for mobile credentials.
-Amherst PD to provide excel spreadsheet of all mobile users to be added to system.

Attachment: DSS Lab Security Upgrades for Routing (RES-2022-392 : DSS: Security Upgrades: APD Lab & Interview Room (CRS# 3211))

digital surveillance solutions

Attachment: DSS Lab Security Upgrades for Routing (RES-2022-392 : DSS: Security Upgrades: APD Lab & Interview Room (CRS# 3211))

Assumptions:

1. All conduit pathways, cable pathways and critical points of access must be provided and accessible at time of work.
2. All work shall be performed Monday-Friday during normal business hours (7:00am to 5:00pm).
3. Parking on site shall be provided by client at no cost.
4. Amherst Police Department will provide free and clear access to all working areas.
5. A point of contact (POC) and site access to necessary areas must be provided prior to arrival to the jobsite. This includes all areas to be under surveillance, data center(s), wiring closets and mechanical rooms and any other areas that could impact the deployment of the Video Surveillance System. The POC will be the person to whom all DSS communication will be addressed and who has the authority to act for Amherst Police Department in all aspects of the project. POC responsibilities includes:

    a. Serve as the interface between Digital Surveillance Solutions, Inc. and Amherst Police Department
    b. Identify, schedule and confirm availability of support staff and management for onsite meetings (if necessary) and training.
    c. Schedule meeting/training rooms as necessary.
    d. Work with Digital Surveillance Solutions to administer any project change orders.
    e. Obtain and provide information, data, decisions and approvals, within 1 working day of Digital Surveillance Solutions' request, unless both parties agree to an extended response time.
    f. Resolve deviations from project plans that may be caused by Amherst Police Department
    g. Help resolve project issues, and escalate issues within Amherst Police Department.

6. Any down time resulting from the lack of access or if customer scope of work not completed will not be the responsibility of Digital Surveillance Solutions and is billable at current hourly labor & travel rates.
7. Any hardware not included in DSS scope of work is to be functional and complete. If any hardware is non-functional or not complete, a change order will be required to add additional hardware of this scope. If change order is not provided to DSS in a timely manner, additional hours will be billed at current hourly labor & travel rates.
8. Installation will conform to all State, County and local codes.
9. All electrical supply to be provided by Amherst Police Department.

digital surveillance solutions

10. Environmental conditions required by hardware manufacturers will be maintained by Amherst Police Department for the term of the system warranty. If environmental conditions required by manufacture are not maintained, repairing damage to equipment will be at the expense of the Amherst Police Department.
11. Amherst Police Department to collaborate with DSS on the creation of the business rules that govern the utilization of the video surveillance system.

Terms:

1. Amherst Police Department to provide an adequate path for loading equipment and materials into the facility. This includes, but not limited to, a loading dock, ramp, freight elevator, etc. Additionally, a secure location will be provided by Amherst Police Department or General Contractor to store material and equipment on site during the installation process.
2. Upon delivery to customer site, Amherst Police Department assumes responsibility for the safeguard and condition of all delivered materials.
3. Any damage or loss to Digital Surveillance Solutions installation by others will be billed to client. DSS will not make any corrections to damage until written approval has been provided to DSS by Amherst Police Department with signature of authorized party. If authorization is not given to DSS in a timely manner, DSS will not be held responsible for any delays.
4. Amherst Police Department is responsible for removal of old product, which may include but not limited to, cameras, cabling, recording equipment i.e. DVRs, servers, etc.

Warranty:

1. Digital Surveillance Solutions provides a sixty (60) day warranty on labor.
2. Warranty will begin upon completion of DSS scope items. Warranty will not be delayed due to system dependencies not in scope for DSS. Multi phased projects will have warranties that commence at completion of each phase.
3. Equipment warranty is established by the manufacturers unless specified otherwise in the scope of work.
4. Should any defects develop during the warranty period due to workmanship or equipment failure, Digital Surveillance Solutions shall repair to original working order at no expense to client.

Warranty exclusions:

1. Customer furnished equipment, cables, or connectors.
2. Modification of system by others without the written consent and approval by Digital Surveillance Solutions. Modification(s) of the system by any vendor without written consent of Digital Surveillance Solutions will render the warranty

Attachment: DSS Lab Security Upgrades for Routing (RES-2022-392 : DSS: Security Upgrades: APD Lab & Interview Room (CRS# 3211))

digital surveillance solutions

null and void. Repairs and replacements will be subject to Time & Materials at Digital Surveillance Solutions current labor rates at the time of repairs.

3. System abuse or misuse.
4. Floods, fires, earthquakes, lightning strikes, or other events beyond the control of Digital Surveillance Solutions.
5. Environmental conditions required by hardware manufacturers will be maintained by Amherst Police Department for the term of the system warranty. If environmental conditions required by manufacture are not maintained, repairing damage to equipment will be at the expense of the Amherst Police Department.

I appreciate the opportunity to submit this proposal. If you have any questions, comments, or require further details, feel free to contact me.

Addendum to Contract Major Exposure

1. Notwithstanding any other provision in this Agreement, the following clauses shall be controlling. Should any other provision of the Agreement conflict with the clauses in this Addendum then the provisions of this Addendum are to be enforceable and any conflicting provision shall be considered null and void.

2. No rules, requirements or customs of any society or association of professional Contractors or any similar association shall affect this Agreement in any way whatsoever or be binding upon the Town.

3. To the fullest extent permitted by law, Contractor shall indemnify and hold the Town, its officers, agents, and employees, harmless from any and all liability, demands, claims, or expenses, awards or judgments imposed upon the Town, its officers, agents, and/or employees, arising out of the work of the Contractor its officers, agents, subcontractors, and/or employees as well as the negligence, active or passive, of the Contractor, its officers, agents, subcontractors, and/or employees.

4. Contractor shall not commence work under this Agreement until it has obtained all insurance specified below, produced satisfactory proof of the same and such insurance has been approved by the Town.

(a) Workers' Compensation Insurance: Contractor shall take out and maintain during the life of this Agreement, Workers' Compensation Insurance (both Part A and Part B) for its employees to be assigned to the work hereto under.

(b) General Liability, Professional (if applicable) Liability and Property Damage Insurance: Contractor shall take out and maintain during the life of this Agreement, such general liability and property damage insurance as shall protect it and the Town of Amherst from claims for damages for personal injury, including accidental death, as well as from claims for property damage, which may arise from operations under this Agreement. The amounts of such insurance shall be as follows in an amount not less than $1,000,000.00 per occurrence for bodily injury and property damage including wrongful death, and $2,000,000.00 aggregate. Umbrella coverage shall be in an amount of at least $5,000,000.00.

(c) Contractor shall furnish the above insurances, including subcontractors' insurances, to the Town and shall also assure that any policy procured by it shall name the Town as an additional insured on a primary and non-contributory basis.

(d) Contractor shall ensure all its subcontractors, if any, have obtained all the above insurances and shall also assure that any policy procured by any subcontractor or sub-subcontractor shall name the Town as an additional insured on a primary and non-contributory basis.

Attachment: DSS Lab Security Upgrades for Routing (RES-2022-392 : DSS: Security Upgrades: APD Lab & Interview Room (CRS# 3211))

5. Any accident shall be reported to the Office of the Town Attorney as soon as possible and not later than twenty-four (24) hours from the time of such accident. A detailed written report must be submitted to the Town of Amherst as soon thereafter as possible as and no later than three (3) days after the date of such accident.

6. No Assignment: In accordance with the provisions of section 109 of the General Municipal Law, the Contractor is hereby prohibited from assigning, transferring, conveying, subletting or otherwise disposing of this Agreement, or of its right, title or interest in this agreement, or its power to execute this Agreement, to any other person or corporation without the previous consent in writing of the Town.

7. Required Provisions of Law: Each and every provision of law and clause required by law to be inserted in this Agreement shall be deemed to have been inserted herein. If any such provision is not inserted through mistake or otherwise, then upon the application of either party this Agreement shall be physically amended forthwith to make such insertion. In particular, the Contractor shall, among other things, fully comply with:

(a) Article 8 of the NYS Labor Law for public work contracts and Article 9 of the Labor Law regarding prevailing wage for Building Service employees.
(b) Labor Law Section 220-e and Executive Law Sections 291-299 and the Civil Rights Law relating to prohibition against discrimination and equal opportunity.
(c) Affirmative action as required by the Labor Law.
(d) Prevention of dust hazard required by Labor Law Section 222-a.
(e) Preference in employment of persons required by Labor Law Section 222.
(f) Eight-hour workday as required by Labor Law Section 220(2).
(g) Chapter 32 of the Town of Amherst: Minority Women and Business Utilization Commitment.
(h) Chapter 163 of the Town of Amherst: Registration of Sex Offenders.

8. The Contractor, in accordance with its status as an independent Contractor, covenants and agrees that it will conduct itself consistent with such status. It will neither hold itself out as nor claim to be, an officer or employee of the Town by reason hereof, make any claim, demand or application to or for any right or privilege applicable to an officer or employee of the Town, including, but not limited to: workers' compensation coverage, unemployment insurance benefits, Social Security coverage, or retirement membership or credit.

Waiver: No waiver of any breach of any condition of the Agreement shall be binding unless in writing and signed by the party waiving said breach. No such waiver shall in any way affect any other term or condition of this Agreement or constitute a cause or excuse for a repetition of such or any other breach unless the waiver shall include the same.

9. This Agreement shall be governed by, and interpreted according to the laws of the State of New York. If the contract between the parties refers to the laws, statutes, rules, regulations or ordinances for any state other than New York State, to the laws, statutes, rules, regulations or ordinances for any county other than Erie County, New York or to the laws, statutes, rules, regulations or ordinances for any municipality other than the Town of Amherst, then the laws, statutes, rules, regulations or ordinances for New York State, Erie county and/or the Town of Amherst shall apply as applicable. Any and all legal action necessary to enforce the Agreement will be venued in Supreme Court, Erie County, New York or in the United States District Court for the Western District of New York, Buffalo Division.

10. It is hereby acknowledged that performance of this Contract will be undertaken in accordance with the specifications and pricing on which the bid was submitted.

Authority for execution on behalf of Town: The Supervisor has executed this Agreement pursuant to a Resolution adopted by the Town Board of the Town, at a meeting thereof held on _____. Brian J. Kulpa, the Supervisor whose signature appears hereafter, is duly authorized and empowered to execute this instrument and enter into such an Agreement on behalf of the Town as a result of that Resolution. This instrument shall be executed in triplicate. At least one (1) copy shall be permanently filed, after execution thereof, in the office of the Town Clerk of Town.

IRAN DIVESTMENT ACT CERTIFICATION

As a result of the Iran Divestment Act of 2012 (Act), Chapter 1 of the 2012 Laws of New York, a provision was added to the State Finance Law (SFL), Section 165-a, effective April 12, 2012. Under the Act, the Commissioner of the Office of General Services (OGS) will develop a list (prohibited entities list) of "persons" who are engaged in "investment activities in Iran" (both are defined terms in the law). This list is posted on the OGS website.

By submitting a response to this solicitation, or by assuming the responsibility under a Contract/Lease awarded hereunder, Bidder/Contractor/Vendor (or any assignee) certifies that it will not utilize on such Contract/Lease any subcontractor that is identified on the prohibited entities list.

Additionally, Bidder/Contractor/Vendor is advised that any Bidder/ Contractor/Vendor seeking to renew or extend a Contract/Lease (or assume responsibility of a Contract/Lease awarded must certify at the time the Contract/Lease is renewed, extended or assigned that it is not included on the prohibited entities list.

During the term of the Contract/Lease, should the Town of Amherst (Town) receive information that a person is in violation of the above-referenced certification, the Town will offer the person an opportunity to respond. If the person fails to demonstrate that it has ceased its engagement in the investment which is in violation of the Act within 90 days after the determination of such violation, then the Town shall take such action as appropriate including, but not limited to, imposing sanctions, seeking compliance, recovering damages or declaring the Bidder/Contractor/Vendor in default.

The Town reserves the right to reject any Contract/Lease or request for assignment for an entity that appears on the prohibited entities list prior to the award of a Contract/Lease, and to pursue a responsibility review with respect to any entity that is awarded a Contract/Lease and appears on the prohibited entities list after Contract/Lease award.

DB-120.1 (10-17)

Attachment: DSS Lab Security Upgrades for Routing (RES-2022-392 : DSS: Security Upgrades: APD Lab & Interview Room (CRS# 3211))

Additional Instructions for Form DB-120.1

By signing this form, the insurance carrier identified in Box 3 on this form is certifying that it is insuring the business referenced in box "1a" for disability and/or paid family leave benefits under the New York State Disability and Paid Family Leave Benefits Law. The Insurance Carrier or its licensed agent will send this Certificate of Insurance to the entity listed as the certificate holder in Box 2.

The insurance carrier must notify the above certificate holder and the Workers' Compensation Board within 10 days IF a policy is cancelled due to nonpayment of premiums or within 30 days IF there are reasons other than nonpayment of premiums that cancel the policy or eliminate the insured from coverage indicated on this Certificate. (These notices my be sent by regular mail.) Otherwise, this Certificate is valid for one year after this form is approved by the insurance carrier or its licensed agent, or until the policy expiration date listed in Box 3c, whichever is earlier

This certificate is issued as a matter of information only and confers no rights upon the certificate holder. This certificate does not amend, extend or alter the coverage afforded by the policy listed, nor does it confer any rights or responsibilities beyond those contained in the referenced policy.

This certificate may be used as evidence of a Disability and/or Paid Family Leave Benefits contract of insurance only while the underlying policy is in effect.

Please Note: Upon the cancellation of the disability and/or paid family leave benefits policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of NYS Disability and/or Paid Family Leave Benefits Coverage or other authorized proof that the business is complying with the mandatory coverage requirements of the New York State Disability and Paid Family Leave Benefits Law.

DISABILITY AND PAID FAMILY LEAVE BENEFITS LAW

§220. Subd. 8

(a) The head of a state or municipal department, board, commission or office authorized or required by law to issue any permit for or in connection with any work involving the employment of employees in employment as defined in this article, and not withstanding any general or special statute requiring or authorizing the issue of such permits, shall not issue such permit unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand and twenty-one, the payment of family leave benefits for all employees has been secured as provided by this article. Nothing herein, however, shall be construed as creating any liability on the part of such state or municipal department, board, commission or office to pay any disability benefits to any such employee if so employed.

(b) The head of a state or municipal department, board, commission or office authorized or required by law to enter into any contract for or in connection with any work involving the employment of employees in employment as defined in this article and notwithstanding any general or special statute requiring or authorizing any such contract, shall not enter into any such contract unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand eighteen, the payment of family leave benefits for all employees has been secured as provided by this article.

Addendum to Contract VENDOR ON SITE Minor

1. Notwithstanding any other provision in this Agreement, the following clauses shall be controlling. Should any other provision of the Agreement conflict with the clauses in this Addendum then the provisions of this Addendum are to be enforceable and any conflicting provision shall be considered null and void.

2. No rules, requirements or customs of any society or association of professional Vendors or any similar association shall affect this Agreement in any way whatsoever or be binding upon the Town.

3. To the fullest extent permitted by law, Vendor shall indemnify and hold the Town, its officers, agents, and employees, harmless from any and all liability, demands, claims, or expenses, awards or judgments imposed upon the Town, its officers, agents, and/or employees, arising out of the work of the Vendor its officers, agents, sub-Vendors, and/or employees as well as the negligence, active or passive, of the Vendor, its officers, agents, sub-Vendors, and/or employees.

4. Vendor shall not commence work under this Agreement until it has obtained all insurance specified below, produced satisfactory proof of the same and such insurance has been approved by the Town.

(a) Workers' Compensation Insurance: Vendor shall take out and maintain during the life of this Agreement, Workers' Compensation Insurance (both Part A and Part B) for its employees to be assigned to the work hereto under.

(b) General Liability, Professional (if applicable) Liability and Property Damage Insurance: Vendor shall take out and maintain during the life of this Agreement, such general liability and property damage insurance as shall protect it and the Town of Amherst from claims for damages for personal injury, including accidental death, as well as from claims for property damage, which may arise from operations under this Agreement. The amounts of such insurance shall be as follows in an amount not less than $1,000,000.00 per occurrence for bodily injury and property damage including wrongful death, and $2,000,000.00 aggregate.

(c) Vendor shall furnish the above insurances, including sub-Vendors' insurances, to the Town and shall also assure that any policy procured by it shall name the Town as an additional insured on a primary and non-contributory basis.

(d) Vendor shall ensure all its sub-Vendors, if any, have obtained all the above insurances and shall also assure that any policy procured by any sub-Vendor or sub-sub-Vendor shall name the Town as an additional insured on a primary and non-contributory basis.

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

5. Any accident shall be reported to the Office of the Town Attorney as soon as possible and not later than twenty-four (24) hours from the time of such accident. A detailed written report must be submitted to the Town of Amherst as soon thereafter as possible as and no later than three (3) days after the date of such accident.

6. No Assignment: In accordance with the provisions of Section 109 of the General Municipal Law, the Vendor is hereby prohibited from assigning, transferring, conveying, subletting or otherwise disposing of this Agreement, or of its right, title or interest in this agreement, or its power to execute this Agreement, to any other person or corporation without the previous consent in writing of the Town.

7. Required Provisions of Law: Each and every provision of law and clause required by law to be inserted in this Agreement shall be deemed to have been inserted herein. If any such provision is not inserted through mistake or otherwise, then upon the application of either party this Agreement shall be physically amended forthwith to make such insertion. In particular, the Vendor shall, among other things, fully comply with:

(a) Article 8 of the NYS Labor Law for public work contracts and Article 9 of the Labor Law regarding prevailing wage for Building Service employees.
(b) Labor Law Section 220-e and Executive Law Sections 291-299 and the Civil Rights Law relating to prohibition against discrimination and equal opportunity.
(c) Affirmative action as required by the Labor Law.
(d) Prevention of dust hazard required by Labor Law Section 222-a.
(e) Preference in employment of persons required by Labor Law Section 222.
(f) Eight-hour workday as required by Labor Law Section 220(2).
(g) Chapter 32 of the Town of Amherst: Minority Women and Business Utilization Commitment.
(h) Chapter 163 of the Town of Amherst: Registration of Sex Offenders.

8. The Vendor, in accordance with its status as an independent Vendor, covenants and agrees that it will conduct itself consistent with such status. It will neither hold itself out as nor claim to be, an officer or employee of the Town by reason hereof, make any claim, demand or application to or for any right or privilege applicable to an officer or employee of the Town, including, but not limited to: workers' compensation coverage, unemployment insurance benefits, Social Security coverage, or retirement membership or credit.

Waiver: No waiver of any breach of any condition of the Agreement shall be binding unless in writing and signed by the party waiving said breach. No such waiver shall in any way affect any other term or condition of this Agreement or constitute a cause or excuse for a repetition of such or any other breach unless the waiver shall include the same.

9. This Agreement shall be governed by, and interpreted according to the laws of the State of New York. If the contract between the parties refers to the laws, statutes, rules,

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

regulations or ordinances for any state other than New York State, to the laws, statutes, rules, regulations or ordinances for any county other than Erie County, New York or to the laws, statutes, rules, regulations or ordinances for any municipality other than the Town of Amherst, then the laws, statutes, rules, regulations or ordinances for New York State, Erie county and/or the Town of Amherst shall apply as applicable. Any and all legal action necessary to enforce the Agreement will be venued in Supreme Court, Erie County, New York or in the United States District Court for the Western District of New York, Buffalo Division.

10. It is hereby acknowledged that performance of this Contract will be undertaken in accordance with the specifications and pricing on which the bid was submitted.

Authority for execution on behalf of Town: The Supervisor has executed this Agreement pursuant to a Resolution adopted by the Town Board of the Town, at a meeting thereof held on _____. Brian J. Kulpa, the Supervisor whose signature appears hereafter, is duly authorized and empowered to execute this instrument and enter into such an Agreement on behalf of the Town as a result of that Resolution. This instrument shall be executed in triplicate. At least one (1) copy shall be permanently filed, after execution thereof, in the office of the Town Clerk of Town.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

GENERAL LIABILITY DELUXE ENDORSEMENT: HUMAN SERVICES

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE

The following is a summary of the Limits of Insurance and additional coverage provided by this endorsement. For complete details on specific coverages, consult the policy contract wording.

It is our stated intention that the various endorsements, coverage parts or policy issued to you by us, or any company affiliated with us, do not provide any duplication or overlap of coverage for the same claim or "suit." If this endorsement and any other coverage part or policy issued to you by us, or any company affiliated with us, apply to the same claim, "suit," or medical expenses, we shall not be liable under this endorsement for a greater proportion of the total loss for that claim than this endorsement's applicable Limit of Insurance bears to the total applicable Limits of Insurance under all such endorsements, coverage parts or policies.

This condition does not apply to any excess or umbrella policy issued by us specifically to apply as excess insurance over the underlying Commercial General Liability policy.

A. Extended Property Damage

SECTION I – COVERAGES, COVERAGE A BODILY INJURY AND PROPERTY DAMAGE LIABILITY, Subsection **2. Exclusions**, Paragraph **a.** is deleted in its entirety and replaced by the following:

a. Expected or Intended Injury

"Bodily injury" or property damage" expected or intended from the standpoint of the insured. This exclusion does not apply to "bodily injury" or "property damage" resulting from the use of reasonable force to protect persons or property.

B. Limited Rental Lease Agreement Contractual Liability

SECTION I – COVERAGES, COVERAGE A. BODILY INJURY AND PROPERTY DAMAGE LIABILITY, Subsection **2. Exclusions**, Paragraph **b. Contractual Liability** is amended to include the following:

(3) Based on the named insured's request at the time of claim, we agree to indemnify the named insured for their liability assumed in a contract or agreement regarding the rental or lease of a premises on behalf of their client, up to $50,000. This coverage extension only applies to rental lease agreements. This coverage is excess over any renter's liability insurance of the client.

C. Non-Owned Watercraft

SECTION I – COVERAGES, COVERAGE A BODILY INJURY AND PROPERTY DAMAGE LIABILITY, Subsection **2. Exclusions,** Paragraph **g. (2)** is deleted in its entirety and replaced by the following:

(2) A watercraft you do not own that is:

(a) Less than 58 feet long; and

(b) Not being used to carry persons or property for a charge;

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

This provision applies to any person, who with your consent, either uses or is responsible for the use of a watercraft. This insurance is excess over any other valid and collectible insurance available to the insured whether primary, excess or contingent.

D. Damage to Property You Own, Rent or Occupy

SECTION I – COVERAGES, COVERAGE A BODILY INJURY AND PROPERTY DAMAGE LIABILITY, Subsection **2. Exclusions**, Paragraph **j. Damage to Property**, Item **(1)** is deleted in its entirety and replaced with the following:

(1) Property you own, rent, or occupy, including any costs or expenses incurred by you, or any other person, organization or entity, for repair, replacement, enhancement, restoration or maintenance of such property for any reason, including prevention of injury to a person or damage to another's property, unless the damage to property is caused by your client, up to a $30,000 limit. A client is defined as a person under your direct care and supervision.

E. Damage to Premises Rented to You

1. If damage by fire to premises rented to you is not otherwise excluded from this Coverage Part, the word "fire" is changed to "fire, lightning, explosion, smoke, or leakage from automatic fire protective systems" where it appears in:

   a. The last paragraph of **SECTION I – COVERAGES, COVERAGE A BODILY INJURY AND PROPERTY DAMAGE LIABILITY**, Subsection **2. Exclusions**; is deleted in its entirety and replaced by the following:

      Exclusions **c.** through **n.** do not apply to damage by fire, lightning, explosion, smoke, or leakage from automatic fire protective systems to premises while rented to you or temporarily occupied by you with permission of the owner. A separate limit of insurance applies to this coverage as described in **SECTION III – LIMITS OF INSURANCE**.

   b. **SECTION III – LIMITS OF INSURANCE**, Paragraph 6. is deleted in its entirety and replaced by the following:

      Subject to Paragraph 5. above, the Damage To Premises Rented To You Limit is the most we will pay under Coverage A for damages because of "property damage" to any one premises, while rented to you, or in the case of damage by fire, lightning, explosion, smoke, or leakage from automatic fire protective systems while rented to you or temporarily occupied by you with permission of the owner.

   c. **SECTION V – DEFINITIONS**, Paragraph 9.a., is deleted in its entirety and replaced by the following:

      A contract for a lease of premises. However, that portion of the contract for a lease of premises that indemnifies any person or organization for damage by fire, lightning, explosion, smoke, or leakage from automatic fire protective systems to premises while rented to you or temporarily occupied by you with permission of the owner is not an "insured contract";

2. **SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS**, Subsection **4. Other Insurance**, Paragraph **b. Excess Insurance**, **(1) (a) (ii)** is deleted in its entirety and replaced by the following:

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

That is insurance for fire, lightning, explosion, smoke, or leakage from automatic fire protective systems for premises rented to you or temporarily occupied by you with permission of the owner;

3. The Damage To Premises Rented To You Limit section of the Declarations is amended to the greater of:

   a. $1,000,000; or

   b. The amount shown in the Declarations as the Damage to Premises Rented to You Limit.

   This is the most we will pay for all damage proximately caused by the same event, whether such damage results from fire, lightning, explosion, smoke, or leaks from automatic fire protective systems or any combination thereof.

F. HIPAA

SECTION I – COVERAGES, COVERAGE B PERSONAL AND ADVERTISING INJURY LIABILITY, is amended as follows:

1. Paragraph **1. Insuring Agreement** is amended to include the following:

   We will pay those sums that the insured becomes legally obligated to pay as damages because of a "violation(s)" of the Health Insurance Portability and Accountability Act (HIPAA). We have the right and the duty to defend the insured against any "suit," "investigation," or "civil proceeding" seeking these damages. However, we will have no duty to defend the insured against any "suit" seeking damages, "investigation," or "civil proceeding" to which this insurance does not apply.

2. Paragraph **2. Exclusions** is amended to include the following additional exclusions:

   This insurance does not apply to:

   a. **Intentional, Willful, or Deliberate Violations**

      Any willful, intentional, or deliberate "violation(s)" by any insured.

   b. **Criminal Acts**

      Any "violation" which results in any criminal penalties under the HIPAA.

   c. **Other Remedies**

      Any remedy other than monetary damages for penalties assessed.

   d. **Compliance Reviews or Audits**

      Any compliance reviews by the Department of Health and Human Services.

3. **SECTION V – DEFINITIONS** is amended to include the following additional definitions:

   a. "Civil proceeding" means an action by the Department of Health and Human Services (HHS) arising out of "violations."

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

b. "Investigation" means an examination of an actual or alleged "violation(s)" by HHS. However, "investigation" does not include a Compliance Review.

c. "Violation" means the actual or alleged failure to comply with the regulations included in the HIPAA.

G. Medical Payments – Limit Increased to $20,000, Extended Reporting Period

If **COVERAGE C MEDICAL PAYMENTS** is not otherwise excluded from this Coverage Part:

1. The Medical Expense Limit is changed subject to all of the terms of **SECTION III - LIMITS OF INSURANCE** to the greater of:

   a. $20,000; or
   b. The Medical Expense Limit shown in the Declarations of this Coverage Part.

2. **SECTION I – COVERAGE**, **COVERAGE C MEDICAL PAYMENTS**, Subsection **1. Insuring Agreement**, a. (3) (b) is deleted in its entirety and replaced by the following:

   (b) The expenses are incurred and reported to us within three years of the date of the accident.

H. Athletic Activities

SECTION I – COVERAGES, **COVERAGE C MEDICAL PAYMENTS**, Subsection **2. Exclusions**, Paragraph **e. Athletic Activities** is deleted in its entirety and replaced with the following:

e. Athletic Activities

To a person injured while taking part in athletics.

I. Supplementary Payments

SECTION I – COVERAGES, SUPPLEMENTARY PAYMENTS - COVERAGE A AND B are amended as follows:

1. b. is deleted in its entirety and replaced by the following:

1. **b.** Up to $5000 for cost of bail bonds required because of accidents or traffic law violations arising out of the use of any vehicle to which the Bodily Injury Liability Coverage applies. We do not have to furnish these.

1.d. is deleted in its entirety and replaced by the following:

1. **d.** All reasonable expenses incurred by the insured at our request to assist us in the investigation or defense of the claim or "suit", including actual loss of earnings up to $1,000 a day because of time off from work.

J. Key and Lock Replacement – Janitorial Services Client Coverage

SECTION I – COVERAGES, SUPPLEMENTARY PAYMENTS – COVERAGES A AND B is amended to include the following:

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

We will pay for the cost to replace keys and locks at the "clients" premises due to theft or other loss to keys entrusted to you by your "client," up to a $10,000 limit per occurrence and $10,000 policy aggregate.

We will not pay for loss or damage resulting from theft or any other dishonest or criminal act that you or any of your partners, members, officers, "employees", "managers", directors, trustees, authorized representatives or any one to whom you entrust the keys of a "client" for any purpose commit, whether acting alone or in collusion with other persons.

The following, when used on this coverage, are defined as follows:

a. "Client" means an individual, company or organization with whom you have a written contract or work order for your services for a described premises and have billed for your services.

b. "Employee" means:

(1) Any natural person:

(a) While in your service or for 30 days after termination of service;

(b) Who you compensate directly by salary, wages or commissions; and

(c) Who you have the right to direct and control while performing services for you; or

(2) Any natural person who is furnished temporarily to you:

(a) To substitute for a permanent "employee" as defined in Paragraph **(1)** above, who is on leave; or

(b) To meet seasonal or short-term workload conditions;

while that person is subject to your direction and control and performing services for you.

(3) "Employee" does not mean:

(a) Any agent, broker, person leased to you by a labor leasing firm, factor, commission merchant, consignee, independent contractor or representative of the same general character; or

(b) Any "manager," director or trustee except while performing acts coming within the scope of the usual duties of an "employee."

c. "Manager" means a person serving in a directorial capacity for a limited liability company.

K. Additional Insureds

SECTION II – WHO IS AN INSURED is amended as follows:

1. If coverage for newly acquired or formed organizations is not otherwise excluded from this Coverage Part, Paragraph **3.a.** is deleted in its entirely and replaced by the following:

a. Coverage under this provision is afforded until the end of the policy period.

2. Each of the following is also an insured:

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

a. **Medical Directors and Administrators –** Your medical directors and administrators, but only while acting within the scope of and during the course of their duties as such. Such duties do not include the furnishing or failure to furnish professional services of any physician or psychiatrist in the treatment of a patient.

b. **Managers and Supervisors** – Your managers and supervisors are also insureds, but only with respect to their duties as your managers and supervisors. Managers and supervisors who are your "employees" are also insureds for "bodily injury" to a co-"employee" while in the course of his or her employment by you or performing duties related to the conduct of your business.

This provision does not change Item 2.a.(1)(a) as it applies to managers of a limited liability company.

c. **Broadened Named Insured –** Any organization and subsidiary thereof which you control and actively manage on the effective date of this Coverage Part. However, coverage does not apply to any organization or subsidiary not named in the Declarations as Named Insured, if they are also insured under another similar policy, but for its termination or the exhaustion of its limits of insurance.

d. **Funding Source** – Any person or organization with respect to their liability arising out of:

(1) Their financial control of you; or

(2) Premises they own, maintain or control while you lease or occupy these premises.

This insurance does not apply to structural alterations, new construction and demolition operations performed by or for that person or organization.

e. **Home Care Providers –** At the first Named Insured's option, any person or organization under your direct supervision and control while providing for you private home respite or foster home care for the developmentally disabled.

f. **Managers, Landlords, or Lessors of Premises** – Any person or organization with respect to their liability arising out of the ownership, maintenance or use of that part of the premises leased or rented to you subject to the following additional exclusions:

This insurance does not apply to:

(1) Any "occurrence" which takes place after you cease to be a tenant in that premises; or

(2) Structural alterations, new construction or demolition operations performed by or on behalf of that person or organization.

g. **Lessor of Leased Equipment – Automatic Status When Required in Lease Agreement With You –** Any person or organization from whom you lease equipment when you and such person or organization have agreed in writing in a contract or agreement that such person or organization is to be added as an additional insured on your policy. Such person or organization is an insured only with respect to liability for "bodily injury," "property damage" or "personal and advertising injury" caused, in whole or in part, by your maintenance, operation or use of equipment leased to you by such person or organization.

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

A person's or organization's status as an additional insured under this endorsement ends when their contract or agreement with you for such leased equipment ends.

With respect to the insurance afforded to these additional insureds, this insurance does not apply to any "occurrence" which takes place after the equipment lease expires.

h. Grantors of Permits – Any state or political subdivision granting you a permit in connection with your premises subject to the following additional provision:

(1) This insurance applies only with respect to the following hazards for which the state or political subdivision has issued a permit in connection with the premises you own, rent or control and to which this insurance applies:

(a) The existence, maintenance, repair, construction, erection, or removal of advertising signs, awnings, canopies, cellar entrances, coal holes, driveways, manholes, marquees, hoist away openings, sidewalk vaults, street banners or decorations and similar exposures;

(b) The construction, erection, or removal of elevators; or

(c) The ownership, maintenance, or use of any elevators covered by this insurance.

i. Vendors – Only with respect to "bodily injury" or "property damage" arising out of "your products" which are distributed or sold in the regular course of the vendor's business, subject to the following additional exclusions:

(1) The insurance afforded the vendor does not apply to:

(a) "Bodily injury" or "property damage" for which the vendor is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that the vendor would have in the absence of the contract or agreement;

(b) Any express warranty unauthorized by you;

(c) Any physical or chemical change in the product made intentionally by the vendor;

(d) Repackaging, except when unpacked solely for the purpose of inspection, demonstration, testing, or the substitution of parts under instructions from the manufacturer, and then repackaged in the original container;

(e) Any failure to make such inspections, adjustments, tests or servicing as the vendor has agreed to make or normally undertakes to make in the usual course of business, in connection with the distribution or sale of the products;

(f) Demonstration, installation, servicing or repair operations, except such operations performed at the vendor's premises in connection with the sale of the product;

(g) Products which, after distribution or sale by you, have been labeled or relabeled or used as a container, part or ingredient of any other thing or substance by or for the vendor; or

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

(h) "Bodily injury" or "property damage" arising out of the sole negligence of the vendor for its own acts or omissions or those of its employees or anyone else acting on its behalf. However, this exclusion does not apply to:

(i) The exceptions contained in Sub-paragraphs **(d)** or **(f)**; or

(ii) Such inspections, adjustments, tests or servicing as the vendor has agreed to make or normally undertakes to make in the usual course of business, in connection with the distribution or sale of the products.

(2) This insurance does not apply to any insured person or organization, from whom you have acquired such products, or any ingredient, part or container, entering into, accompanying or containing.

j. Franchisor – Any person or organization with respect to their liability as the grantor of a franchise to you.

k. As Required by Contract – Any person or organization where required by a written contract executed prior to the occurrence of a loss. Such person or organization is an additional insured for "bodily injury," "property damage" or "personal and advertising injury" but only for liability arising out of the negligence of the named insured. The limits of insurance applicable to these additional insureds are the lesser of the policy limits or those limits specified in a contract or agreement. These limits are included within and not in addition to the limits of insurance shown in the Declarations

l. Owners, Lessees or Contractors – Any person or organization, but only with respect to liability for "bodily injury," "property damage" or "personal and advertising injury" caused, in whole or in part, by:

(1) Your acts or omissions; or

(2) The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured when required by a contract.

With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

(a) All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or

(b) That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

m. State or Political Subdivisions – Any state or political subdivision as required, subject to the following provisions:

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

(1) This insurance applies only with respect to operations performed by you or on your behalf for which the state or political subdivision has issued a permit, and is required by contract.

(2) This insurance does not apply to:

(a) "Bodily injury," "property damage" or "personal and advertising injury" arising out of operations performed for the state or municipality; or

(b) "Bodily injury" or "property damage" included within the "products-completed operations hazard."

L. Duties in the Event of Occurrence, Claim or Suit

SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS, Paragraph **2.** is amended as follows:

a. is amended to include:

This condition applies only when the "occurrence" or offense is known to:

(1) You, if you are an individual;

(2) A partner, if you are a partnership; or

(3) An executive officer or insurance manager, if you are a corporation.

b. is amended to include:

This condition will not be considered breached unless the breach occurs after such claim or "suit" is known to:

(1) You, if you are an individual;

(2) A partner, if you are a partnership; or

(3) An executive officer or insurance manager, if you are a corporation.

M. Unintentional Failure To Disclose Hazards

SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS, 6. Representations is amended to include the following:

It is agreed that, based on our reliance on your representations as to existing hazards, if you should unintentionally fail to disclose all such hazards prior to the beginning of the policy period of this Coverage Part, we shall not deny coverage under this Coverage Part because of such failure.

N. Transfer of Rights of Recovery Against Others To Us

SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS, 8. Transfer of Rights of Recovery Against Others To Us is deleted in its entirety and replaced by the following:

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Includes copyrighted material of Insurance Services Office, Inc., with its permission.
© 2011 Philadelphia Indemnity Insurance Company

If the insured has rights to recover all or part of any payment we have made under this Coverage Part, those rights are transferred to us. The insured must do nothing after loss to impair them. At our request, the insured will bring "suit" or transfer those rights to us and help us enforce them.

Therefore, the insured can waive the insurer's rights of recovery prior to the occurrence of a loss, provided the waiver is made in a written contract.

O. Liberalization

SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS, is amended to include the following:

If we revise this endorsement to provide more coverage without additional premium charge, we will automatically provide the additional coverage to all endorsement holders as of the day the revision is effective in your state.

P. Personal and Advertising Injury – Abuse of Process, Discrimination

If **COVERAGE B PERSONAL AND ADVERTISING INJURY LIABILITY COVERAGE** is not otherwise excluded from this Coverage Part, the definition of "personal and advertising injury" is amended as follows:

1. **SECTION V – DEFINITIONS**, Paragraph 14.b. is deleted in its entirety and replaced by the following:

   b. Malicious prosecution or abuse of process;

2. **SECTION V – DEFINITIONS**, Paragraph 14. is amended by adding the following:

   Discrimination based on race, color, religion, sex, age or national origin, for damages resulting from injury for which the insured is liable solely due to either disparate impact or vicarious liability. Personal and advertising injury does not mean discrimination:

   a. Done intentionally by or at the direction of, or with the knowledge or consent of:

   (1) Any insured; or

   (2) Any executive officer, director, stockholder, partner or member of the insured;

   b. Directly or indirectly related to the employment, former or prospective employment, termination of employment, or application for employment of any person or persons by an insured;

   c. Directly or indirectly related to the sale, rental, lease or sublease or prospective sales, rental, lease or sub-lease of any room, dwelling or premises by or at the direction of any insured; or

   d. Insurance for such discrimination is prohibited by or held in violation of law, public policy, legislation, court decision or administrative ruling.

   The above does not apply to fines or penalties imposed because of discrimination.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED
PRIMARY AND NON-CONTRIBUTORY INSURANCE

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Effective Date: 11/01/2017

Name of Person or Organization (Additional Insured):

Any person or organization where required by a written contract executed prior to the occurrence of a loss.

SECTION II – WHO IS AN INSURED is amended to include as an additional insured the person(s) or organization(s) shown in the endorsement Schedule, but only with respect to liability for "bodily injury," "property damage" or "personal and advertising injury" arising out of or relating to your negligence in the performance of "your work" for such person(s) or organization(s) that occurs on or after the effective date shown in the endorsement Schedule.

This insurance is primary to and non-contributory with any other insurance maintained by the person or organization (Additional Insured), except for loss resulting from the sole negligence of that person or organization.

This condition applies even if other valid and collectible insurance is available to the Additional Insured for a loss or "occurrence" we cover for this Additional Insured.

The Additional Insured's limits of insurance do not increase our limits of insurance, as described in **SECTION III – LIMITS OF INSURANCE**.

All other terms, conditions, and exclusions under the policy are applicable to this endorsement and remain unchanged.

DB-120.1 (12-21)

Attachment: YMCA Fitness in the Parks (RES-2022-393 : User Agreement - Fitness in the Parks CRS#3257)

Additional Instructions for Form DB-120.1

By signing this form, the insurance carrier identified in Box 3 on this form is certifying that it is insuring the business referenced in Box 1a for disability and/or Paid Family Leave benefits under the NYS Disability and Paid Family Leave Benefits Law. The insurance carrier or its licensed agent will send this Certificate of Insurance Coverage (Certificate) to the entity listed as the certificate holder in Box 2.

The insurance carrier must notify the above certificate holder and the Workers' Compensation Board within 10 days IF a policy is cancelled due to nonpayment of premiums or within 30 days IF there are reasons other than nonpayment of premiums that cancel the policy or eliminate the insured from coverage indicated on this Certificate. (These notices may be sent by regular mail.) Otherwise, this Certificate is valid for one year after this form is approved by the insurance carrier or its licensed agent, or until the policy expiration date listed in Box 3c, whichever is earlier.

This Certificate is issued as a matter of information only and confers no rights upon the certificate holder. This Certificate does not amend, extend or alter the coverage afforded by the policy listed, nor does it confer any rights or responsibilities beyond those contained in the referenced policy.

This Certificate may be used as evidence of a NYS disability and/or Paid Family Leave benefits contract of insurance only while the underlying policy is in effect.

Please Note: Upon the cancellation of the disability and/or Paid Family Leave benefits policy indicated on this form, if the business continues to be named on a permit, license or contract issued by a certificate holder, the business must provide that certificate holder with a new Certificate of Insurance Coverage for NYS disability and/ or Paid Family Leave Benefits or other authorized proof that the business is complying with the mandatory coverage requirements of the NYS Disability and Paid Family Leave Benefits Law.

NYS DISABILITY AND PAID FAMILY LEAVE BENEFITS LAW

§220. Subd. 8

(a) The head of a state or municipal department, board, commission or office authorized or required by law to issue any permit for or in connection with any work involving the employment of employees in employment as defined in this article, and not withstanding any general or special statute requiring or authorizing the issue of such permits, shall not issue such permit unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand and twenty-one, the payment of family leave benefits for all employees has been secured as provided by this article. Nothing herein, however, shall be construed as creating any liability on the part of such state or municipal department, board, commission or office to pay any disability benefits to any such employee if so employed.

(b) The head of a state or municipal department, board, commission or office authorized or required by law to enter into any contract for or in connection with any work involving the employment of employees in employment as defined in this article and notwithstanding any general or special statute requiring or authorizing any such contract, shall not enter into any such contract unless proof duly subscribed by an insurance carrier is produced in a form satisfactory to the chair, that the payment of disability benefits and after January first, two thousand eighteen, the payment of family leave benefits for all employees has been secured as provided by this article.

Re: Request for Relief of Conditions of Zoning Approval (Z-1997-12A)
Property: 7078 Transit Road
Petitioner: Alix Holdings 7078 LLC

Dear Tim:

Please be advised that our office represents the Petitioner in connection with the above-referenced matter. I would respectfully request that the Town Board, at its meeting of April 11, 2022, schedule a public hearing on this Petition for April 25, 2022.

I thank you in advance for your anticipated cooperation.

Very truly yours,

Jeffery D. Palumbo

STATE OF NEW YORK
SUPREME COURT : COUNTY OF ERIE

RENEE D. SIMS
[redacted]

Claimant,

v.

SNYDER FIRE DEPARTMENT
4531 Main St.
Amherst, NY 14226

TOWN OF AMHERST
5583 Main St.
Amherst, NY 14221

JOHN V. FILDES
[redacted]

Respondents.

NOTICE OF CLAIM

Index No.:

RENEE D. SIMS does hereby make her Notice of Claim against the SNYDER FIRE DEPARTMENT, TOWN OF AMHERST and JOHN V. FILDES:

1. The name and address of the claimant is RENEE D. SIMS, [redacted]

2. The name and address of the claimant's attorney is KRISTEN ELMORE-GARCIA, ESQ., 2969 MAIN STREET, SUITE 200, BUFFALO, NY 14214.

3. The nature of the claim is one of negligence and recklessness, including but not limited to negligently causing a motor vehicle collision at the intersection of Burroughs Drive and Main Street in the Village of Snyder, Town of Amherst on January 21, 2022, at approximately 11:12 a.m.

4. The collision occurred when a SNYDER FIRE DEPARTMENT fire truck, being operated by JOHN V. FILDES without activated lights or sirens, attempted to make a left turn from Main Street onto Burroughs Drive. Complainant RENEE D. SIMS was operating a 2007 Chevy Cobalt, and was stopped at a red light at Burroughs Drive. The firetruck struck the front

Attachment: DOC032522-03252022144814 (COM-2022-32 : Notice of Claim: Renee D. Sims Vs. Town of Amherst Et Al.)

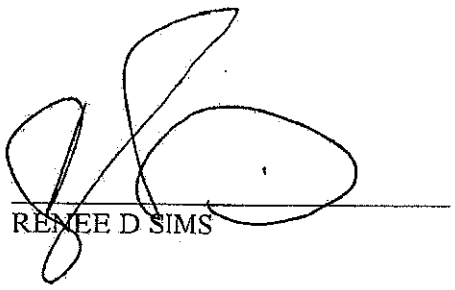
driver's side of the vehicle that RENEE D. SIMS was in as it attempted to make its left turn.

5. Claimant RENEE D. SIMS suffered serious injuries as defined by § 5102(d) of the New York State Insurance Law as a result of this crash, including but not limited to injuries to her dominant right hand.

6. By virtue of the negligence of the SNYDER FIRE DEPARTMENT, TOWN OF AMHERST, and JOHN V. FILDES, and their agents, employees and/or servants, Claimant RENEE D. SIMS makes a claim for lost wages, medical expenses and pain and suffering, the amount of which is undetermined to date.

The undersigned therefore presents this claim for adjustment and payment, and notifies you that unless same is adjusted, compromised and/or paid within the time provided by law from the date of its presentation to you, it is the intention of the undersigned to commence an action thereon.

DATED: March 21, 2022



RENEE D SIMS
