Please list critical facilities that require backup power. If you have specifics (size of the generator, potential cost, etc.), please provide that information as well.

Problem	Solution

Critical Facilities - Flood Protection

If your emailed problem statement list included critical facilities that were located in the special flood hazard area (100-year floodplain), list them here and identify if they are protected from the 0.2% (500-year) flood or what could be done to protect them (relocate, elevate, floodproof, etc.). If you are unsure of their protections, assume they need additional protection.

Problem	Solution

28

Action Worksheets

- Each jurisdiction must develop at least two Action Worksheets.
- Jurisdictions should also develop additional Action Worksheets for projects you plan to apply for FEMA funding support for within the next five years.
- Not every action requires an Action Worksheet to be developed, but the same sort of information about those actions is still needed in the Proposed Actions table of the annex.

Total		
Priority (High/Med/Low)		

44

44

Prioritization of Actions

- Consider the benefits and costs.
- Consider the implementation timeline.
- Consider the areas/problems of greatest need.
- Consider the funding sources.
- High/Medium/Low priority.

45

45

Schedule Review and Next Steps

- Return your Mitigation Development Worksheet by **June 16**.
- Work with your assigned Tetra Tech planner to complete your annex and the development of your actions.
- All annexes and actions must be complete by **June 23**.
- Targeting posting of the draft plan July 9.

AGENDA

ERIE COUNTY HAZARD MITIGATION PLAN UPDATE
Mitigation Strategy Workshop

Wednesday, June 9, 2021 | 9:00 – 11:00 a.m. & 6:00 – 8:00 p.m.

1. **Welcome and Opening Remarks**
2. **Hazard Mitigation Review**
3. **Developing Mitigation Strategies**
   a. NYS Requirements
   b. Areas of Focus
   c. Types of Mitigation Actions
4. **Making Previous Actions More Specific**
5. **Fill Out and Return Your Mitigation Development Worksheet**
6. **Proposed Action Tables**
7. **Action Worksheets**
8. **Questions**
9. **Next Steps**

ERIE COUNTY HAZARD MITIGATION PLAN UPDATE
Mitigation Action Development

Please work with your municipal planning team and complete this worksheet. Please send electronic Word version by June 18, 2021 to:
Tony Subbio, Tetra Tech
Phone: (717)-839-5654 E-mail: tony.subbio@tetratech.com

Municipality: _____
Name and Title of Individual Completing Worksheet*: _____

Check in with your municipal planning team: Municipal officials or residents with historical knowledge, including OEM Coordinator, Police, Fire, DPW, building inspector, municipal engineer, etc.

What is your biggest hazard concern? (flooding, stormwater flooding, falling trees, fuel shortage, hazmat spill, power loss, etc.)

Problem	Solution

Critical Facilities - Backup Power

Please list critical facilities that require backup power. If you have specifics (size of the generator, potential cost, etc.), please provide that information as well.

Problem	Solution

Critical Facilities - Flood Protection

If your emailed problem statement list included critical facilities that were located in the special flood hazard area (100-year floodplain), list them here and identify if they are protected from the 0.2% (500-year) flood or what could be done to protect them (relocate, elevate, floodproof, etc.). If you are unsure of their protections, assume they need additional protections.

Problem	Solution

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Culverts - Undersized/In Need of Upgrade

Please indicate the location (Street? Stream/river?) of any culverts in your community that are undersized or are damaged from past flood events.

Problem	Solution

Flood Protection – Elevation or Buyout

Please identify homes or neighborhoods that would benefit from elevation or buyout to prevent future flood damages.

Problem	Solution

Infrastructure Protection

Please identify roads and other infrastructure that needs protection from flooding, storms, etc. Indicate what the protection measures are (elevate roadway, harden infrastructure, etc.)

Problem	Solution

Other Projects

Please identify other projects that you have in mind after reviewing your problem statements, past actions, risk assessment results, and mitigation catalog.

Problem	Solution

Guidance to Complete the Mitigation Action Worksheet

The following provides additional guidance on how to complete the Mitigation Action Worksheet. Please note that NYS DHSES requires a minimum of two proposed mitigation activities; one of which cannot be a generator.

- If you have NFIP repetitive or severe repetitive flood loss properties, you must include a specific project to mitigate including the general location (neighborhood name, area of town – do not include specific addresses), type of mitigation (acquisition, elevation), details regarding outreach to homeowners and schedule for implementation.

- If you have critical facilities or lifelines in the floodplain, please identify a mitigation project to reduce flood impacts. If you already mitigated, please indicate the action completed. If it is not within your jurisdiction, consider working with the facility owner to conduct a feasibility study to identify the most effective path forward – need an outcome of the study to determine next steps.

Action Worksheet

Project Name: Please identify a unique project name for the mitigation action.

Project Number: 2020-Jurisdiction-001.

Assessing the Risk and Vulnerability

Hazard(s) of Concern: Please identify the hazard(s) being addressed with this action.

Description of the Problem: Provide a detailed narrative of the problem. Describe the hazard you wish to mitigate, its impacts to the jurisdiction, past damages and loss of service, etc. Include the street address of the property/project location (if applicable), adjacent streets, and easily identified landmarks such as water bodies and well-known structures, and end with a brief description of existing conditions (topography, terrain, hydrology) of the site.

Action/Project Intended for Implementation

Description of the Solution: Provide a detailed narrative of the solution. Describe the physical area (project limits) to be affected, both by direct work and by the project's effects; how the action would address the existing conditions previously identified; proposed construction methods, including any excavation and earth-moving activities; where you are in the development process (e.g., are studies and/or drawings complete), etc., the extent of any analyses or studies performed (attach any reports or studies).

Critical Facility: Please indicate whether or not the identified project is related to a critical facility or lifeline in your community.

Level of Protection: Please identify the level of protection the proposed project will provide. For example, 100-year (1%) flood.

Useful Life: Identify the number of years the project will provide protection against the hazard.

Estimated Cost: Identify all estimate costs associated with implementation.

Estimated Benefits: Identify the benefits that implementation of this project will provide (e.g., risk reduction). If dollar amounts are known, include them. If dollar amounts are unknown or are unquantifiable, describe the losses that will be avoided.

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Mitigation Action Type:

Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.

Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.

Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.

Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities.

Goals:

Goal 1: Protect life, property, and critical infrastructure from the impacts of natural, technological, and human-caused hazards.

Goal 2: Reduce the risk of hazards on life, property, and the environment.

Goal 3: Educate the public, officials, and other stakeholders about the hazards they face and what can be done to mitigate hazard impacts.

Plan for Implementation

Prioritization: Please enter High/Medium/Low. Refer to the prioritization exercise and table.

Estimated Time Required for Project Implementation: Provide the estimated time required to complete the project from start to end.

Responsible Organization: Identify the name of a department or agency responsible for implementation, not the jurisdiction.

Desired Timeline for Implementation: Identify the desired start time for this project. For example, within six months.

Potential Funding Source(s): Identify multiple sources of potential funding. For example, FEMA HMGP and PDM Grants, CDBG-DR funding, etc.

Local Planning Mechanism to be Used in Implementation (if any): Consider the use of local planning mechanisms that will be used to implement the project.

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Evaluation of Potential Actions/Projects

Actions/Projects Considered: Please consider three different options to mitigate the problem identified. One alternative is always to accept the current level or risk (tolerate the vulnerability/problem) by deciding to take no action at this time. Please include the name of the action considered, estimated cost to complete the project, and a description of the pros and cons of the project.

Reporting on Progress (for plan maintenance)

Date of Status Report: This section should be completed during plan maintenance/evaluation.

Report of Progress: Describe what progress, if any, has been made on this project. If it has been determined the jurisdiction no longer wishes to pursue implementation, state that here and indicate why.

Update Evaluation of the Problem and/or Solution: Provide an updated description of the problem and solution, and what has happened since initial consideration/development.

Please note this report on progress should be done, at minimum, each year prior to the annual Planning Committee update outlined in the plan maintenance procedures.

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

COASTAL EROSION		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ None

EARTHQUAKES		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ None
• ***Reduce exposure to the hazard***:
  ○ Locate outside of hazard area (off soft soils)
• ***Reduce vulnerability to the hazard:***
  ○ Retrofit structure (anchor house structure to foundation)
  ○ Secure household items that can cause injury or damage, such as water heaters, bookcases, and other appliances
  ○ Build to higher design standards
• ***Increase capability:***
  ○ Practice "drop, cover, and hold"
  ○ Develop household mitigation plan, such as creating a retrofit savings account, communication capability with outside, 72 hr self-sufficiency during an event
  ○ Increase capability by having cash reserves for reconstruction
  ○ Become informed on the hazard and risk reduction alternatives available
  ○ Develop a post-disaster action plan for your household
	• ***Manipulate the hazard:***
	  ○ None
	• ***Reduce exposure to the hazard:***
	  ○ Locate/relocate mission critical functions outside hazard area where possible
	• ***Reduce vulnerability to the hazard:***
	  ○ Build redundancy for critical functions/facilities
	  ○ Retrofit critical buildings/areas housing mission critical functions
	• ***Increase capability:***
	  ○ Adopt higher standard for new construction; consider "performance-based design" when building new structures
	  ○ Increase capability by having cash reserves for reconstruction
	  ○ Inform your employees on the possible impacts of earthquake and how to deal with them at your work facility
	  ○ Develop a Continuity of Operations (COOP) Plan
		• ***Manipulate the hazard:***
		  ○ None
		• ***Reduce exposure to the hazard:***
		  ○ Locate critical facilities or functions outside of hazard area where possible
		• ***Reduce vulnerability to the hazard:***
		  ○ Harden infrastructure
		  ○ Provide redundancy for critical functions
		  ○ Adopt higher regulatory standards for structures
		  ○ Conduct "rapid screening" programs for critical facilities to identify facilities that may be particularly prone to EQ damage, then develop investigation/action plans to address such structures
		• ***Increase capability:***
		  ○ Provide better hazard maps
		  ○ Provide technical information and guidance
		  ○ Enact tools to help manage development in hazard areas: tax incentives, information
		  ○ Include retrofitting/replacement of critical system elements in CIP
		  ○ Develop strategy to take advantage of post-disaster opportunities
		  ○ Warehouse critical infrastructure components such as pipe, power line, and road repair material

EARTHQUAKES		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Develop and adopt a Continuity of Operations/Continuity of Government Plan (COOP/COG) ○ Initiate triggers guiding improvements such as: (< 50% substantial damage/improvements) ○ Further enhance seismic risk assessment to target high hazard buildings for mitigation opportunities ○ Develop a post-disaster action plan that includes a grant funding and debris removal components ○ Utilize warning systems such as NY Alert ○ Educate builders and developers on seismic construction standards

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
• ***Manipulate the hazard:*** ○ Clear stormwater drains and culverts • ***Reduce exposure to the hazard:*** ○ Locate or relocate outside of hazard area ○ Institute low impact development techniques on property • ***Reduce vulnerability to the hazard:*** ○ Retrofit existing structures and utilities above Base Flood Elevation (BFE) ○ Floodproof existing structures (wet or dry flood-proofing) ○ Store hazardous materials above BFE or outside of flood-prone areas • ***Increase capability:*** ○ Develop household mitigation plan, such as retrofit savings, communication capability with outside, 72-hr self-sufficiency during and after an event ○ Buy flood insurance	• ***Manipulate the hazard:*** ○ Clear stormwater drains and culverts • ***Reduce exposure to the hazard:*** ○ Locate business critical facilities or functions outside hazard area ○ Institute low impact development techniques on property • ***Reduce vulnerability to the hazard:*** ○ Build redundancy for critical functions/ retrofit critical buildings ○ Provide flood-proofing measures when new critical infrastructure must be located in floodplains ○ Harden structures and infrastructure (wet and dry flood-proofing) ○ Store hazardous materials above BFE or outside of flood-prone areas • ***Increase capability:*** ○ Increase capability by having cash reserves for reconstruction ○ Develop and adopt a COOP Plan ○ Solicit “cost-sharing” through partnerships with private sector stakeholders on projects with multiple benefits ○ Dam owner/operators should continue to be aware of and understand dam inspection and reporting requirements ○ Ensure that all dam EAPs are kept in compliance with NYSDEC Regulations	• ***Manipulate the hazard:*** ○ Clear stormwater drains and culverts ○ Dredging, levee construction, providing retention areas ○ Structural flood control: levees, dams, channelization, revetments ○ Construct regional stormwater control facilities ○ Lead and develop a county-wide stream clearing strategy, including the development of thresholds for response/action • ***Reduce exposure to the hazard:*** ○ Locate/relocate critical facilities outside of hazard area ○ Acquire or relocate identified repetitive loss properties ○ Promote open space uses in identified high hazard areas via techniques such as: PUDs, easements, setbacks, greenways, sensitive area tracks ○ Adopt land development criteria such as PUDs, density transfers, clustering ○ Institute low impact development techniques on property ○ Acquire vacant land or promote open space uses in developing watersheds to control increases in runoff ○ Pass an ordinance to incorporate additional zoning classifications into flood zones within each municipality ○ Increase floodplain standards within municipal ordinances and include

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
		provisions for enforcing best practice standards by requiring a minimum freeboard of 2' to align with NY State Standards ○ Continue development application reviews by County Planning Board to reduce risky development practices • ***Reduce vulnerability to the hazard:*** ○ Harden structures and infrastructure (wet and dry flood-proofing) ○ Provide redundancy for critical functions and infrastructure ○ Adopt appropriate regulatory standards such as cumulative substantial improvement/damage, freeboard, lower substantial damage threshold, compensatory storage ○ Stormwater management regulations and master planning ○ Adopt "no-adverse impact" floodplain management policies that strive to not increase the flood risk on down-stream communities ○ Participate in the Community Rating System (CRS) ○ Implement as-built regulatory requirements ○ Implement site review ordinances/requirements ○ Establish stream maintenance programs with stakeholders (e.g., Soil and Water Conservation District) and support county leads of such efforts

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Incorporate retrofitting/replacement of critical facilities and infrastructure in Capital Improvement Plans (CIPs) ○ Promote the use of vegetation/plants as green erosion control measures to reduce localized flooding ○ Work with the SWCD and other groups to address removal of debris, log jams, etc., in flood vulnerable stream sections • ***Increase capability:*** ○ Produce better hazard maps, and improve access to flood hazard mapping ○ Capture/survey "high-water" marks during flood events ○ Provide technical information and guidance on appropriate mitigation options available to businesses and homeowners ○ Enact tools to help manage development in hazard areas (stronger controls, tax incentives, information) ○ Establish an additional layer of zoning within flood hazard areas ○ Develop strategy to take advantage of post-disaster opportunities ○ Improve compliance with and enforcement of the NFIP ○ Develop mitigation partnerships with regional stakeholders ○ Join CRS program or improve level of participation in CRS ○ Develop and implement a public information strategy for flood hazard

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
		awareness, flood insurance (NFIP) and mitigation ○ Maintain existing data as well as gather new data needed to define risks and vulnerability ○ Create a building and elevation inventory of structures in the floodplain ○ Identify flood-prone areas that may be in need of new flood studies ○ Establish a program to identify and educate owners of flood-prone properties of potential mitigation options (e.g., elevations, relocations) ○ Charge a hazard mitigation fee on all new permits to create a hazard mitigation funding source for initiatives or grant cost-share requirements ○ Integrate floodplain management policies into other planning mechanisms within the planning area ○ Establish a Stormwater Utility to deal with urban drainage/flooding issues ○ Establish incentives to promote flood hazard mitigation of private property (e.g., permit fee waivers) ○ Adopt ordinances/standards for cumulative damages and/or improvements ○ Upgrade NFIP Floodplain ordinance as well as other ordinances to current or above current state and federal standards ○ Develop and adopt a COOP ○ Join “StormReady” Program

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Participate in county and regional training programs ○ Provide additional training/certification to NFIP floodplain administrators and code officials ○ Implement annual training to account for turnover of municipal officials ○ Maintain and enhance flood forecasting ability, including the establishment and maintenance of critical stream gages ○ Explore grant funding opportunities and potential partnerships to help maintain existing gages and install additional gages to improve forecasting and flood warning ability ○ Promote awareness and participation in alert systems such as NYAlert ○ Support and participate in regional flood management efforts ○ Support and implement hazard disclosure for the sale/re-sale of property in identified risk zones ○ Provide continued and enhanced training for emergency responders ○ Establish a revolving “bank” or budget line item to fund grant application support ○ Continue to review updated Flood Insurance Rate Maps to ensure accuracy as well as maintaining lines of communication with homeowners to make them aware of potential changes related to their property status

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

FLOOD		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Provide trainings for FPAs on the NFIP/Floodplain Best Practices and also pursue CFM accreditation for municipal FPAs ○ Build and maintain relationships to develop regional watershed/floodplain mitigation solutions ○ Pursue grant funding opportunities to fund repairs of catchments and infrastructure on a proactive basis ○ Explore grant funding opportunities related to climate change to fund mitigation projects

LANDSLIDE		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ Apply soil stabilization measures, such as planting soil stabilizing vegetation on steep slopes
• ***Reduce exposure to the hazard***:
  ○ None
• ***Reduce vulnerability to the hazard:***
  ○ None
• ***Increase capability:***
  ○ None
	• ***Manipulate the hazard:***
	  ○ None
	• ***Reduce exposure to the hazard:***
	  ○ None
	• ***Reduce vulnerability to the hazard:***
	  ○ None
	• ***Increase capability:***
	  ○ None
		• ***Manipulate the hazard:***
		  ○ Implement reinforcement measures in high-risk areas
		  ○ Use debris flow measures that may reduce damage in sloping areas, such as stabilization, emergency dissipation, and flow control measures
		  ○ Apply soil stabilization measures, such as planting soil stabilizing vegetation on steep, publicly owned slopes
		• ***Reduce exposure to the hazard:***
		  ○ Consider hazard areas in land use planning, zoning, and development siting
		  ○ Acquire structures in highest hazard areas (demolish and convert to restricted open space)
		  ○ Relocation of structures
		  ○ Open space preservation
		  ○ Create or increase setback limits on parcels near high-risk parcels
		• ***Reduce vulnerability to the hazard:***
		  ○ Consider hazard areas in land use planning and development siting
		  ○ Stabilize vulnerable slopes near structures and infrastructure
		  ○ Work with stakeholders such as USGS and SWCD to develop appropriate risk reduction strategies

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

LANDSLIDE		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Install catch-fall nets for rocks at steep slopes near roadways • ***Increase capability:*** ○ Increase understanding of hazard areas (e.g., Landslide Susceptibility Maps) geotechnical surveys, LIDAR, and mapping ○ Assessing vegetation in wildfire-prone areas to prevent landslides after fires (e.g., encourage plants with strong root systems) ○ Work with stakeholders such as USGS, NYS - Geological Survey and SWCD to develop appropriate risk reduction strategies ○ Support and implement hazard disclosure for the sale/re-sale of property in identified risk zones ○ Develop county-level programs to document slide events (landslide inventory), and maintain its currency

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

PANDEMIC		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ None
• ***Reduce exposure to the hazard***:
  ○ Proper hygiene
  ○ PPE
  ○ Social distancing
• ***Reduce vulnerability to the hazard:***
  ○ Focus on personal health
• ***Increase capability:***
  ○ Storage of PPE
  ○ Storage of supplies and food to reduce need to enter public spaces
	• ***Manipulate the hazard:***
	  ○ None
	• ***Reduce exposure to the hazard:***
	  ○ PPE
	  ○ Social distancing
	• ***Reduce vulnerability to the hazard:***
	  ○ Distanced work environment
	  ○ Regular cleaning of work environment
	• ***Increase capability:***
	  ○ Storage of PPE
	  ○ Equipment for monitoring
	  ○ Trainings for staff
		• ***Manipulate the hazard:***
		  ○ None
		• ***Reduce exposure to the hazard:***
		  ○ PPE
		  ○ Social distancing
		• ***Reduce vulnerability to the hazard:***
		  ○ Distanced work environment
		  ○ Regular cleaning of work environment
		• ***Increase capability:***
		  ○ Storage of PPE
		  ○ Equipment for monitoring/treatment
		  ○ Trainings for staff
		  ○ Public outreach

SEVERE STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ None
• ***Reduce exposure to the hazard***:
  ○ None
• ***Reduce vulnerability to the hazard:***
  ○ Retrofit structures (improved roofing, glazing, insulation, etc.)
  ○ Provide for redundant heat and power
  ○ Contact municipality or utilities to trim or remove trees that could affect power lines
  ○ Plant appropriate trees near home and power lines ("Right tree, right place" National Arbor Day Foundation Program
• ***Increase capability:***
  ○ Improve awareness of impending severe weather (e.g., joining NYAlert, obtain a NOAA weather radio)
  ○ Promote 72-hour self-sufficiency
  ○ Provide for redundant heat and power
	• ***Manipulate the hazard:***
	  ○ None
	• ***Reduce exposure to the hazard:***
	  ○ None
	• ***Reduce vulnerability to the hazard:***
	  ○ Relocate critical infrastructure, such as power lines, underground
	  ○ Reinforce or relocate critical infrastructure such as powerlines so that it meets performance expectations
	• ***Increase capability:***
	  ○ Contact municipality or utilities to trim or remove trees that could affect power lines
	  ○ Create redundancy (e.g., backup generators)
	  ○ Improve awareness of impending severe weather (e.g., joining NYAlert, obtain a NOAA weather radio)
	  ○ Develop a COOP Plan
	  ○ Monitor impending storm events so that you can release employees in such a manner as to not negatively impact emergency response personnel/services
		• ***Manipulate the hazard:***
		  ○ None
		• ***Reduce exposure to the hazard:***
		  ○ None
		• ***Reduce vulnerability to the hazard:***
		  ○ Harden infrastructure such as locating utilities underground
		  ○ Trimming trees back from power lines
		  ○ Designate and strengthen critical road sections and bridges
		  ○ Adopt ordinances that regulate the type and quantity of trees planted near utility lines
		  ○ Relocate critical infrastructure, such as power lines, underground
		• ***Increase capability:***
		  ○ Support programs such as "Tree Watch" that proactively manage problem areas by use of selective removal of hazardous trees, tree replacement, etc.
		  ○ Enforce building codes
		  ○ Increase communication alternatives
		  ○ Modify land use and environmental regulations to support vegetation management activities that improve reliability in utility corridors
		  ○ Modify landscape and other ordinances to encourage appropriate planting near

SEVERE STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**
		overhead power, cable, and phone lines ○ Promote awareness and participation in alert systems such as NYAlert ○ Provide NOAA weather radios to the public ○ Create/enhance “mutual aid” agreements for response to all emergencies ○ Create/identify evacuation routes to be utilized during severe storm events ○ Develop debris management plans ○ Join StormReady program ○ Provide early warning of impending severe storm events to identified critical or essential facilities, including facilities such as large employments centers, schools, hospitals ○ Promote emergency power supplies to private property ○ Improve, expand, or harden communications facilities and services ○ Recruit additional emergency personnel or use mutual aid agreements ○ Increase sheltering capabilities ○ Increase capability to respond to power outages and downed power lines

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

SEVERE STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**

SEVERE WINTER STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**

• ***Manipulate the hazard:***
  ○ None
• ***Reduce exposure to the hazard***:
  ○ Plant appropriate trees near home and power lines ("Right tree, right place" National Arbor Day Foundation)
• ***Reduce vulnerability to the hazard:***
  ○ Insulate house to provide greater thermal efficiency and reduce heat loss
  ○ Provide redundant heat and power
  ○ Insulate structure
  ○ Ensure natural gas input/release valves do not get covered in snow
• ***Increase capability:***
  ○ Trim or remove trees that could affect power lines
  ○ Prepare emergency food and supplies to be self-sufficient for at least 72 hours in the event of a severe winter storm
  ○ Be aware of inclement weather conditions and move your vehicles off of the street as severe weather systems approach
  ○ Retrofit structures
	• ***Manipulate the hazard:***
	  ○ None
	• ***Reduce exposure to the hazard:***
	  ○ None
	• ***Reduce vulnerability to the hazard:***
	  ○ Relocate critical infrastructure, such as power lines, underground
	  ○ Reinforce or relocate critical infrastructure such as powerlines so that it meets performance expectations
	  ○ Install tree wire
	• ***Increase capability:***
	  ○ Trim or remove trees that could affect power lines
	  ○ Create redundancy in utilities and communications
	  ○ Develop a COOP Plan to address operations before, during, and after coastal storm events
	  ○ Utilize weather radios at the workplace to keep your employees aware of severe weather conditions
		• ***Manipulate the hazard:***
		  ○ None
		• ***Reduce exposure to the hazard:***
		  ○ None
		• ***Reduce vulnerability to the hazard:***
		  ○ Harden infrastructure such as locating utilities underground where appropriate
		  ○ Trimming trees back from power lines
		  ○ Designate snow routes and strengthen critical road sections and bridges
		  ○ Adopt codes and regulations that address the issues of parking vehicles along roadways during severe weather events
		  ○ Develop or enhance the capacity/capability of stormwater conveyance systems
		  ○ Provide backup power sources at vital critical facilities
		• ***Increase capability:***
		  ○ Support programs that proactively manage problem areas by use of selective removal of hazardous trees, tree replacement, etc.
		  ○ Establish and enforce building codes that require all roofs to withstand snow loads
		  ○ Develop, improve, and enforce building codes in hazard areas

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

SEVERE WINTER STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Increase communication alternatives ○ Modify land use and environmental regulations to support vegetation management activities that improve reliability in utility corridors ○ Modify landscape and other ordinances to encourage appropriate planting near overhead power, cable, and phone lines ○ Provide weather radios to vulnerable populations ○ Enhance public awareness campaigns to address those issues of alert and warning and actions to take during severe weather events ○ Utilize the best available technology to enhance the warning systems for all severe weather events (i.e., tornado warning systems) ○ Coordinate severe weather warning capabilities and the dissemination of warning amongst those agencies within the planning are with the highest degree of capability ○ Encourage local ordinances for planting trees near lines and join Tree City USA

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

SEVERE WINTER STORMS		
Personal Scale	**Corporate Scale**	**Government Scale**
		○ Increase tree management programs ○ Join the Community Rating System (CRS) ○ Join StormReady ○ Retrofit critical structures and promote hazard resistant construction ○ Keep open communications and education of hazards for mobile home communities ○ Retrofit above-ground utilities to underground facilities if appropriate ○ Create a salt reserve or research alternates to stretch salt reserve ○ Ensure accessibility to hospitals ○ Provide better debris logistics and removal ○ Provide better communication systems and backup communication systems to inform public of hazards and to communicate during the hazard event

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

Potential Mitigation Funding Sources

While it is important to recognize the mitigation strategies for each jurisdiction to help achieve the mitigation goals and objectives of the Hazard Mitigation Plan (HMP), it is also important to provide sources for funding to implement these strategies. The table below provides a list of programs, descriptions, and links for those seeking funding sources. Please note that this table is not intended to be a comprehensive list but rather a starting point to help identify potential sources of funding for the identified mitigation strategies.

Table 1. Mitigation Funding Sources

Program	Description	Lead Agency	Website
Federal			
Hazard Mitigation Assistance (HMA)	Grants to provide funding for eligible mitigation activities that reduce disaster losses and protect life and property from future disaster damages – includes FMA, HMGP, PDM.	FEMA	https://www.fema.gov/hazard-mitigation-assistance
Flood Mitigation Assistance (FMA)	Program grants to states and communities for pre-disaster mitigation planning and projects to help reduce or eliminate the long-term risk of flood damage to structures insurable under the National Flood Insurance Program.	FEMA	https://www.fema.gov/flood-mitigation-assistance-grant-program
Hazard Mitigation Grant Program (HMGP)	Grants to states and communities for planning and projects providing long-term hazard mitigation measures following a major disaster declaration.	FEMA	https://www.fema.gov/hazard-mitigation-grant-program
Building Resilient Infrastructure and Communities (BRIC)	Grants to states, local communities, tribes, and territories as they undertake hazard mitigation projects, reducing the risks they face from disasters and natural hazards. BRIC is a new FEMA pre-disaster hazard mitigation program that replaces the existing Pre-Disaster Mitigation (PDM) program.	FEMA	https://www.fema.gov/grants/mitigation/building-resilient-infrastructure-communities
Public Assistance: Hazard Mitigation Funding Under Section 406	Hazard mitigation discretionary funding available under Section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act following a Presidentially declared disaster.	FEMA	https://www.fema.gov/news-release/2017/05/03/4309/fema-hazard-mitigation-grants-404-and-406
Assistance to Firefighters Grant Program	The primary goal of the Assistance to Firefighters Grants (AFG) is to enhance the safety of the public and firefighters with respect to fire-related hazards by providing direct financial assistance to eligible fire departments, nonaffiliated Emergency Medical Services organizations, and State Fire Training Academies. This funding is for critically needed resources to equip and train emergency personnel to recognized standards, enhance operations efficiencies, foster interoperability, and support community resilience.	FEMA	https://www.fema.gov/welcome-assistance-firefighters-grant-program
High Hazard Potential Dams (HHPD) Rehabilitation Grant	The Rehabilitation of High Hazard Potential Dams Grant Program (HHPD provides technical, planning, design, and construction assistance in the form of grants to non-Federal governmental organizations or nonprofit organizations for rehabilitation of eligible high hazard potential dams.	FEMA	https://www.grants.gov/web/grants/view-opportunity.html?oppId=316238
Fire Management Assistance Grant Program	Assistance for the mitigation, management, and control of fires on publicly or privately-owned forests or grasslands that threaten such destruction as would constitute a major disaster. Provides a 75% Federal cost share. State pays the remaining 25% for actual cost.	FEMA	https://www.fema.gov/fire-management-assistance-grant-program

Program	Description	Lead Agency	Website
Disaster Housing Program	Emergency assistance for housing, including minor repair of home to establish livable conditions, mortgage, and rental assistance.	HUD	https://www.hud.gov/program_offices/public_indian_housing/publications/dhap
HOME Investment Partnerships Program	Grants to local and state government and consortia for permanent and transitional housing (including financial support for property acquisition and rehabilitation for low-income persons).	HUD	https://www.hud.gov/program_offices/comm_planning/affordablehousing/programs/home/
HUD Disaster Recovery Assistance	Grants to fund gaps in available recovery assistance after disasters (including mitigation).	HUD	https://www.hud.gov/info/disasterresources
Section 108 Loan Guarantee	Enables states and local governments participating in the Community Development Block Grant (CDBG) program to obtain federally guaranteed loans for disaster-distressed areas.	HUD	https://www.hudexchange.info/programs/section-108/
Smart Growth Implementation Assistance (SGIA) program	The SGIA program focuses on complex or cutting-edge issues, such as stormwater management, code revision, transit-oriented development, affordable housing, infill development, corridor planning, green building, and climate change. Applicants can submit proposals under 4 categories: community resilience to disasters, job creation, the role of manufactured homes in sustainable neighborhood design, or medical and social service facilities siting.	EPA	https://www.epa.gov/smartgrowth
Partners for Fish and Wildlife	Financial and technical assistance to private landowners interested in pursuing restoration projects affecting wetlands and riparian habitats.	U.S. Fish and Wildlife Service	https://www.fws.gov/partners/
FHWA Emergency Relief Program	Fund for the repair or reconstruction of Federal-aid highways that have suffered serious damage as a result of (1) natural disasters or (2) catastrophic failures from an external cause.	U.S. Department of Transportation (DOT)	https://www.fhwa.dot.gov/programadmin/erelief.cfm
Transportation Investment Generating Economic Recovery (TIGER)	Investing in critical road, rail, transit, and port projects across the nation.	U.S. DOT	https://www.transportation.gov/tags/tiger-grants
Community Facilities Direct Loan & Grant Program	This program provides affordable funding to develop essential community facilities in rural areas. An essential community facility is defined as a facility that provides an essential service to the local community for the orderly development of the community in a primarily rural area and does not include private, commercial, or business undertakings.	USDA	https://www.rd.usda.gov/programs-services/community-facilities-direct-loan-grant-program
Emergency Loan Program	USDA's Farm Service Agency (FSA) provides emergency loans to help producers recover from production and physical losses due to drought, flooding, other natural disasters, or quarantine.	USDA	https://www.fsa.usda.gov/programs-and-services/farm-loan-programs/emergency-farm-loans/index
Emergency Watershed Protection (EWP) program	Provide assistance to relieve imminent hazards to life and property caused by floods, fires, drought, windstorms, and other natural occurrences.	NRCS	https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/ewpp/
Financial Assistance	Financial assistance to help plan and implement conservation practices that address natural resource concerns or opportunities to help save energy, improve soil, water, plant, air, animal, and related resources on agricultural lands and non-industrial private forest land.	NRCS	https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/financial/

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

Program	Description	Lead Agency	Website
Emergency Management Performance Grants (EMPG) Program	Assist local, tribal, territorial, and state governments in enhancing and sustaining all-hazards emergency management capabilities.	U.S. DHS	https://www.fema.gov/emergency-management-performance-grant-program
Reimbursement for Firefighting on Federal Property	Provides reimbursement only for direct costs and losses over and above normal operating costs.	U.S. DHS	https://www.usfa.fema.gov/grants/firefighting_federal_property.html
Department of Homeland Security Grant Program (HSGP)	HSGP is composed of three interconnected grant programs, including the State Homeland Security Program (SHSP), Urban Areas Security Initiative (UASI), and the Operation Stonegarden (OPSG). Together, these competitive grant programs fund a range of preparedness activities, including planning, organization, equipment purchase, training, exercises, and management and administration.	U.S. DHS	https://www.dhs.gov/homeland-security-grant-program-hsgp
Land & Water Conservation Fund	Matching grants to states and local governments for the acquisition and development of public outdoor recreation areas and facilities (as well as funding for shared federal land acquisition and conservation strategies).	National Park Service	https://www.nps.gov/subjects/lwcf/index.htm
USSBA	Small Business Administration (SBA) provides low-interest disaster loans to homeowners, renters, business of all sizes, and most private nonprofit organizations. SBA disaster loans can be used to repair or replace the following items damaged or destroyed in a declared disaster: real estate, personal property, machinery and equipment, and inventory and business assets.	Small Business Administration (SBA)	https://www.sba.gov/funding-programs/disaster-assistance
State			
Local Government Records Management Improvement Fund (LGRMIF) Disaster Recovery Grants	Grants for disaster recovery projects related to damage caused by a sudden, unexpected event involving fire, water, man-made or natural phenomena where a timely response is necessary to prevent the irretrievable loss of vital or archival records, or to ensure reasonable, timely access to vital records.	New York State Archives / New York State Education Department	http://www.archives.nysed.gov/grants/grants_lgrmif.shtml
The New York State Emergency Services Revolving Loan	Repair of firefighting apparatus, ambulances, or rescue vehicles; renovation, rehabilitation, or repair of facilities that house firefighting equipment, ambulances, rescue vehicles, and related equipment.	NYS DHSES	http://www.dhses.ny.gov/ofpc/services/loan/
Environmental Protection Fund (EPF)	Matching grants for the acquisition, planning, development, and improvement of parks, historic properties.	New York State Parks, Recreation & Historic Preservation (NYSOPRHP)	https://www.dec.ny.gov/about/92815.html
Recreational Trails (RTP)	Program matching grants for the acquisition, development, rehabilitation, and maintenance of trails and trail-related projects.	NYSOPRHP	https://parks.ny.gov/grants/recreational-trails/default.aspx

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the

Program	Description	Lead Agency	Website
Environmental Protection & Improvement Grants	Competitive grants for environmental protection and improvement; available for municipalities, community organizations, not-for-profit organizations, and others.	New York State Department of Environmental Conservation	https://www.dec.ny.gov/about/92815.html
Volunteer Fire Assistance Grants	The grant is a 50/50 matching funds program. Its purpose is to make funds available to rural fire companies for the purchase of wildland firefighting equipment such as portable backpack pumps, Nomex protective clothing, hand tools, hard hats, hose, portable radios, and dry hydrants.	NYSDEC	https://www.dec.ny.gov/regulations/2364.html
Clean Water Act Section 604(b) Water Quality Planning Grants	Provide funding to implement regional comprehensive water quality management planning activities as described in Section 604(b) of the federal Clean Water Act. 604(b) funds are to be used for water quality management planning activities, including tasks to determine the nature, extent, and causes of point and nonpoint source water pollution problems and to develop plans to resolve these problems.	NYSDEC	https://www.dec.ny.gov/lands/53122.html
Water Quality Improvement Project (WQIP) Program	The Water Quality Improvement Project (WQIP) program is a competitive reimbursement grant program that funds projects that directly address documented water quality impairments. Applications are typically available each spring through the Consolidated Funding Application.	NYSDEC	https://www.dec.ny.gov/pubs/4774.html
New York State DEC/EFC Wastewater Infrastructure Engineering Planning Grant (EPG)	The New York State Department of Environmental Conservation (DEC), in conjunction with the New York State Environmental Facilities Corporation (EFC), will offer grants to municipalities to help pay for the initial planning of eligible Clean Water State Revolving Fund (CWSRF) water quality projects. The ultimate goal of the EPG program is to advance water quality projects to construction, so successful applicants can use the engineering report funded by the grant to seek financing through the CWSRF program, Water Quality Improvement Project program, or other funding entities to further pursue the identified solution.	NYSDEC	https://www.dec.ny.gov/pubs/81196.html
Climate Smart Communities Grant Program	The CSC Grant program was established in 2016 to provide 50/50 matching grants to cities, towns, villages, and counties (or boroughs of New York City) of the State of New York for eligible climate adaptation and mitigation projects.	NYSDEC	https://www.dec.ny.gov/energy/109181.html
BRIDGE NY	New York State is making funding available for local governments to rehabilitate and replace bridges and culverts statewide.	NYS DOT	https://www.dot.ny.gov/BRIDGENY

MEETING NOTES

Meeting	Erie County Hazard Mitigation Plan (HMP) Update Plan Draft Review Meeting		
Date	September 8, 2021	**Time**	6:00 – 7:00 p.m.
Location	Webinar		
Attendees	Greg Butcher, Deputy Director, Erie County Department of Homeland Security and Emergency Services		
	Melissa Calhoun, Public Safety Officer, Erie County Department of Homeland Security and Emergency Services		
	Joanna Panasiewicz, Watershed Coordinator, Erie County Department of Environment and Planning		
	Darien Pratchett, Emergency Services Coordinator, Erie County Department of Homeland Security and Emergency Services		
	Elizabeth Cassidy, Clerk, Town of Aurora,/Village of East Aurora		
	Jason Keding, Supervisor, Town of Boston		
	Mike Mazurowski, Emergency Manager, Town of Cheektowaga		
	David Bissonette, Emergency Manager, Town of Clarence		
	Ken Martin, Supervisor, Town of Collins		
	Mike Willibey, Emergency Manager, Town of Concord		
	Robert Westfall, Water Department, Town of Grand Island		
	Geoffrey Hack, Emergency Manager, Town of Holland		
	Rich Stanton, City of Lackawanna		
	Danil Kowalik, Emergency Manager, Town of Newstead		
	Rick Meyers, Emergency Manager, Town of North Collins		
	Richard Mrugalski, Emergency Manger, Town/Village Orchard Park		
	Jerry Whittington, Supervisor, Town of Sardinia		
	Mark Banks, Director, Emergency Management, City of Tonawanda		
	Jim Chatham, Emergency Services Assistant, Town of Tonawanda		
	Robert Lutz, Emergency Manager, Town of Tonawanda		
	James Unger, Police Department, Town of West Seneca		
	Eric Conley, Emergency Manager, Town of West Seneca		
	Jason Tolsma, Emergency Response Manager, National Fuel Gas		
	Kevin Clapp, Program Manager, NYS Division of Homeland Security and Emergency Services		
	Brian Kehoe, Planner, Tetra Tech		
	Kate Long, Planner, Tetra Tech		

Discussion Points

This section summarizes each discussion point addressed during the meeting.

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

MEETING NOTES

Introductions

Mr. Butcher and Mr. Kehoe welcomed attendees and thanked them for participating as the County wraps up the HMP update process.

Mr. Kehoe facilitated the remainder of the meeting and discussed the organization of the HMP, the breakdown of its nine sections, and appendices.

- Section 1: Introduction
  - Mitigation Planning
  - Participating Jurisdictions
  - Overview
- Section 2: Plan Adoption
  - Adoption Process
- Section 3: Planning Process
  - Participants
  - Activities
  - Ongoing Process
- Section 4: County Profile
  - History
  - Physical Setting
  - Population and Demographics
  - General Building Stock
  - Land Use and Population Trends
  - Critical Facilities
- Section 5: Risk Assessment
  - Hazards of Concern
  - Hazard Ranking
  - Hazard Profiles
- Section 6: Mitigation Strategies
  - Past Accomplishments
  - Goals and Objectives
  - Capability Assessment
    - Plans, Programs, and Resources Available
    - Administrative and Technical Capabilities
    - Fiscal Capabilities
  - Mitigation Strategy Development and Update
    - Action Identification
    - Evaluation and Prioritization

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

MEETING NOTES

Attachment: 31-Appendix-C-Meeting-Documentation-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

    - Benefit/Cost Review
- Section 7: Plan Maintenance
    - HMP Coordinator
    - Ongoing Planning Partnership
    - Monitoring
    - Continuous Evaluation and Progress Reports
    - Updating
    - Integration of Hazard Mitigation with Existing and Future Programs
    - Continued Public Involvement
- Section 8: Planning Partnership
    - Participating Jurisdictions
    - Introduce Jurisdictional Annexes
- Section 9: Jurisdictional Annexes
    - Municipal Planning Team
    - Municipal Profile
    - Hazard Event History
    - Vulnerabilities
    - Capabilities
    - Mitigation Strategy
    - Status of Past Mitigation Actions
    - Current Mitigation Actions
- Appendices
    - Appendix A: Adoption Resolutions
    - Appendix B: Participation Matrix
    - Appendix C: Meeting Documentation
    - Appendix D: Public and Stakeholder Outreach
    - Appendix E: Critical Facilities
    - Appendix F: Plan Review Tools
    - Appendix G: Plan Review Matrix
    - Appendix H: Linkage Procedure

Mr. Kehoe showed participants where the plan sections are posted on the project website (https://www.eriecountynyhmp.com/draft-plans/). He emphasized that municipalities have this last opportunity to review their respective jurisdictional annexes and ensure that it faithfully reflects the municipality's intentions, including correctly detailing proposed mitigation actions. Changes requested by the municipality should be provided to the respective Tetra Tech planner by September 12, 2021. Changes will be incorporated into the final version of the annexes.

Mr. Kehoe explained that a municipality's participation in the hazard mitigation planning process, including adoption of the finalized HMP document, is necessary to access certain types of federal funding. Mr. Clapp then provided a comprehensive review of currently available mitigation funding

MEETING NOTES

programs administered through the NYS DHSES and the NYS Department of Environmental Conservation, including the following:

- Building Resilient Infrastructure and Communities – https://www.fema.gov/grants/mitigation/building-resilient-infrastructure-communities
- Flood Mitigation Assistance – https://www.fema.gov/grants/mitigation/floods
- High Hazard Dams - https://www.dec.ny.gov/press/122708.html#:~:text=New%20York%20State%20Department%20of%20Environmental%20Conservation%20%28DEC%29,%28FEMA%29%20High%20Hazard%20Potential%20Dam%20%28HHPD%29%20grant%20program.
- NYS DHSES – http://www.dhses.ny.gov/recovery
- Hazard Mitigation Grant Program (per Disaster Declaration 4480) https://www.fema.gov/disaster/coronavirus/disaster-declarations

Next Steps

Mr. Kehoe concluded the meeting by reminding participants to submit desired changes to their respective jurisdictional annex by September 12, 2021. Submission of the finalized document to NYS DHSES will occur in the near future, beginning a review process that will end with the granting of Approval Pending Adoption status from FEMA.

Meeting materials will be uploaded to the project website by end of day September 9, 2021. Mr. Kehoe provided his contact information: (585)-354-4216 and brian.kehoe@tetratech.com. He thanked everyone for their participation and made himself available after the meeting in order to address municipality-specific questions.

The meeting adjourned at 7:00 p.m.

Subject: Multi Hazard Mitigation Plan Kick Off Meeting
Importance: High

Good afternoon,
As we are moving forward with the Multi Hazard Mitigation Plan, the county chose Tetra Tech as the consultant for the plan updates. Please see the attached letter with the kick off meeting information. This ill be the first meeting of a series of meetings with the consultant to updated the plan. It will lay out the timeline and information they will be asking your agency / municipality for. This will be a webinar so please register with Tony and he will send you the contact information for the meeting.

Any questions feel free to ask.

Thank you!

Melissa

Date: Tuesday, January 12, 2021 5:13:29 PM

CAUTION: This email originated from an external sender. Verify the source before opening links or attachments.

Hello! As you know, we have been working to update the Erie County Hazard Mitigation Plan with our contractor, Tetra Tech. Thank you again to all of the officials who have submitted information via their worksheets, and/or have worked with Tetra Tech's planners to provide input. Later this month, we will be having a set of meetings to collect information and answer any questions you may have. These meetings will consist of the following six webinars, held at various times to accommodate schedules:

- Thursday, January 21, 2:00-4:00 p.m.
- Thursday, January 21, 7:00-9:00 p.m.
- Friday, January 22, 9:00-11:00 a.m.
- Monday, January 25, 2:00-4:00 p.m.
- Tuesday, January 26, 7:00-9:00 p.m.
- Wednesday, January 27, 9:00-11:00 a.m.

The meetings are identical, and you would only need to attend one. Please email Brian Kehoe, from our consultant team, at brian.kehoe@tetratech.com to register your municipality for one of these meetings. He will then send you the information for the meeting. We are limiting registration to up to eight municipalities per session, on a first come-first served basis, so please register as soon as you can! Thank you!

ERIE COUNTY TO UPDATE HAZARD MITIGATION PLAN

Two public webinars planned; public input sought to reduce hazard vulnerability

ERIE COUNTY, NY— Erie County is updating its Hazard Mitigation Plan ("HMP"). The HMP documents Erie County's vulnerability to natural and manmade hazards along with the county's, cities', towns', and villages' strategies to reduce that vulnerability.

There will be a pair of public webinars to discuss hazards and the HMP on:

- **Monday January 25, 2021 from 6:00 to 7:30 PM and**
- **Thursday January 28, 2021 from 6:00 – 7:30 PM**

All interested residents, businesses, and other stakeholders are invited to attend.

Please visit https://www.eriecountynyhmp.com/calendar/ for the meeting links.

Contact Melissa Calhoun, Public Safety Officer - Special Assistant, Erie County Department of Homeland Security and Emergency Services, at (716) 858-6578 for more information.

Later this month, we will be having a set of meetings to collect information and answer any questions you may have. These meetings will consist of the following six webinars, held at various times to accommodate schedules:

- Thursday, January 21, 2:00-4:00 p.m.
- Thursday, January 21, 7:00-9:00 p.m.
- Friday, January 22, 9:00-11:00 a.m.
- Monday, January 25, 2:00-4:00 p.m.
- Tuesday, January 26, 7:00-9:00 p.m.
- Wednesday, January 27, 9:00-11:00 a.m.

The meetings are identical, and you would only need to attend one. Please email Brian Kehoe, from our consultant team, at brian.kehoe@tetratech.com to register your municipality for one of these meetings. He will then send you the information for the meeting. We are limiting registration to up to eight municipalities per session, on a first come-first served basis, so please register as soon as you can! Thank you!

Melissa,

Good morning! Attached is the invitation for the Risk Assessment Review Meeting. Please put it on your letterhead (or in an email) and send it out to the entire Planning Partnership (municipalities and other organizations), like you did for the kickoff meetings in November. As with that meeting, please copy me on the email(s) when you send it out, and then let me know the organizations to which you sent it. Thanks!

Also, here is the text for the public notice for the meeting. Please get it published in the newspaper as soon as you can, and ask for a proof of publication (or photocopy the actual newspaper when it appears). You can also use this text for social media posts. Please forward me the link to any of those as well.

Erie County is updating its Hazard Mitigation Plan (HMP). The HMP is designed to make our communities more resistant to losses from natural and man-made disasters, and to enable the County and municipalities to be eligible for federal funding for qualifying mitigation projects. There will be a public webinar to review the updated risk assessment. The webinar will be held from 6:00-8:00 p.m. on May 19, 2021. All interested residents, businesses, and other stakeholders are invited to attend. For the meeting link, please visit https://www.eriecountynyhmp.com/calendar/. Contact Melissa Calhoun, Public Safety Officer - Special Assistant, Erie County Department of Homeland Security and Emergency Services, at (716) 858-6578 for more information.

Let me know if you have any questions. Thanks!

Have a great day!

Good morning,
First, I would like to say thank you for working with the County to update our Countywide Hazard Mitigation Plan. This is a big endeavor and even larger because of the pandemic. By updating this plan, it shows our commitment to identifying hazards in our communities, figuring out ways we can mitigate them, making our communities safer. In addition, it is the first step to potentially opening the door to mitigation funding for the projects identified in this plan. I truly appreciate all your hard work on this project!!

The next stage of the Mitigation Plan Update is, the Risk Assessment Review Meeting. Tetra Tech would like to go over the results of the risk assessment that they have conducted. They would like your input, discuss the hazards that could affect Erie County and develop strategies for minimizing the impacts of the hazards.

The meeting will be a webinar held on May 19th from 6:00pm-8:00pm. You can find the webinar information by visiting https://www.eriecountynyhmp.com/.

Attached is a letter with additional information as well.

Melissa

RE: Erie County Hazard Mitigation Plan 2021 Update

Dear Planning Team/Municipal Officials/Stakeholders,

The Erie County Department of Homeland Security and Emergency Services has been updating the county's Hazard Mitigation Plan (HMP). The HMP analyzes the hazards faced by the county and its municipalities, and identifies a strategy for minimizing our vulnerability to these hazards. We held kickoff meetings in November 2020 and held several municipal support meetings in late January/early February 2021. Our contract consultant, Tetra Tech, has been working with the cities, towns, and villages to collect vital information for the HMP.

We will be conducting a Risk Assessment Review Meeting webinar from 6:00-8:00 p.m. on Wednesday May 19, 2021. The purpose of this webinar is to review the results of the updated risk assessment and discuss the problems that hazards pose to Erie County and its municipalities, so that we can develop a strategy for minimizing the impacts of hazards. I would appreciate it if someone from your organization would attend the webinar and participate in the discussion. You can find the webinar information by visiting https://www.eriecountynyhmp.com/.

Thank you for your support, and we look forward to hearing from you at the Risk Assessment Review Meeting. Please contact me if you have any questions.

Sincerely,

Melissa Calhoun
Public Safety Officer - Special Assistant

ERIE COUNTY CONTINUING UPDATE OF HAZARD MITIGATION PLAN

Risk Assessment Review Meeting webinar scheduled for May 19; public input sought

Hazard Mitigation Plan analyzes hazards faced by Erie County, identifies strategies to minimize vulnerability

ERIE COUNTY, NY— Erie County is updating its Hazard Mitigation Plan ("HMP"). The HMP documents Erie County's vulnerability to natural and manmade hazards and identifies approaches to diminish the county's, cities', towns', and villages' vulnerability to those hazards. The Erie County Department of Homeland Security and Emergency Services began the process of updating the HMP in November 2020.

Erie County Hazard Mitigation Plan 2021 Update/Risk Assessment Review Meeting Webinar:

- **Wednesday May 19, 2021 from 6:00 – 8:00 PM**

All interested residents, businesses, and other stakeholders are invited to attend.

Please visit http://www.eriecountynyhmp.com/ for webinar information.

Contact Melissa Calhoun, Public Safety Officer - Special Assistant, Erie County Department of Homeland Security and Emergency Services, at (716) 858-6578 for more information.

RE: Erie County Hazard Mitigation Plan 2021 Update

Dear Planning Team/Municipal Officials,

The Erie County Department of Homeland Security and Emergency Services continues to update the county's Hazard Mitigation Plan (HMP). The HMP analyzes the hazards faced by the county and its municipalities, and identifies a strategy for minimizing our vulnerability to these hazards. We held kickoff meetings in November 2020, held several municipal support meetings in late January/early February 2021, and reviewed the results of the updated risk assessment at a public meeting on May 19, 2021.

We will be conducting a pair of Mitigation Strategy Workshop webinars on June 9, 2021. The purpose of the webinars is to discuss developing mitigation actions to address our communities' vulnerabilities, based on the information we have gathered from the planning process so far. The two sessions will be identical, so you only need to attend one session. To meet the varied schedules of our planning partners, the two sessions will be held at the following times:

- 9:00 – 11:00 a.m.
- 6:00 – 8:00 p.m.

I would appreciate it if someone from your municipality would attend one of the webinars and participate in the discussions. You can find the webinar information by visiting the calendar on https://www.eriecountynyhmp.com/.

Thank you for your continued support, and we look forward to hearing from you at one of the Mitigation Strategy Workshops. Please contact me if you have any questions.

Sincerely,

Melissa J Calhoun

RE: Erie County Hazard Mitigation Plan 2021 Update

Dear Planning Team/Municipal Officials/Stakeholders,

As you know, the Erie County Department of Homeland Security and Emergency Services has been updating the Erie County Hazard Mitigation Plan (HMP) since November 2020. Since that time, Erie County and our contractor, Tetra Tech, have been updating the HMP and working with each jurisdiction in the county to develop their respective mitigation strategies. The full, updated HMP is available for review at the project website: https://www.eriecountynyhmp.com/.

We will review the draft of the updated HMP at a meeting of our Planning Partnership. The meeting will **be conducted via webinar from 6:00-8:00 p.m. on September 8, 2021**. Visit the Calendar on the project website for the link.

I would appreciate it if someone from your organization would review the draft HMP and attend the webinar to provide comments on the draft before it is submitted to the New York State Division of Homeland Security and Emergency Services (NYS DHSES) and Federal Emergency Management Agency (FEMA) Region II. This webinar will be open to the general public as well.

Thank you for your support, and we look forward to hearing from you at the Draft Review Meeting. Please contact me if you have any questions.

Sincerely,

Melissa J. Calhoun

Subject: Multi Hazard Jurisdictional Plan Update

Importance: High

⚠ **CAUTION:** This email originated from an external sender. Verify the source before opening links or attachments. ⚠

Good evening,
I just would like to share some updated information with you regarding Multi Hazard Jurisdictional plan update.

Currently, the worksheets are due 12/22 – please try your best to meet that deadline. Link for the worksheet is below. Any questions do not hesitate to ask.

During the kick off meeting there was reference to public information meetings in December (2 webinars).These will now be conducted after the first of the year. Anyone will be able to attend either session. Dates will be sent out soon!

In addition, the consultant will also look at January to do the municipal information gathering sessions. As the deadline for the worksheet is 12/22 – they will do these sessions to assist you with finishing your worksheets and gather additional information if needed. Dates will be sent out soon for those as well.

If you missed the kick off meetings that were held back in Mid-November, you can now access them on the website where the worksheets are. Scroll to the top and you will see the Meetings tab, click on that and the kick off meeting is available there.

Here is the link to the worksheets again: https://www.eriecountynyhmp.com/municipal-information/

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

All municipalities need to fill out worksheets 0-3, 5 & 6, then worksheet 4 there is a specific worksheet per municipality. The information on worksheet 4 is what you submitted in the 2015 plan, you need to update the information in that worksheet via the drop downs and columns on the right of the sheet.

As always, any questions please do not hesitate to ask!

Thank you!

Melissa

Subject: Hazard Mitigation Plan - update 12-2-2020

Date: Wednesday, December 2, 2020 2:39:03 PM

Importance: High

CAUTION: This email originated from an external sender. Verify the source before opening links or attachments.

Good afternoon!

We hope you enjoyed the Thanksgiving holiday with your families. Now that we're all back to work, we wanted to follow up with you on the set of information gathering worksheets that was discussed at the Hazard Mitigation Planning Partnership Kickoff Meetings on November 18th and 19th. You can find the worksheets for download on the project website, here: https://www.eriecountynyhmp.com/municipal-information/.

Here is some information for you as you work through the worksheets:

1. You are not alone in completing the worksheets. You should work with a team of officials

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

from your jurisdictions to fill them out. The Worksheet Outline lists the officials who might be involved in filling out each one. You will also be assigned a planner from our consultant team who will reach out to offer assistance.

2. More information is better. Even if you see a yes/no question, any details you can provide will make our plan stronger.
3. It's best to fill them out in Word rather than printing them out and writing in your answers, so that the rows give you enough room to answer, but if filling them out by hand is easiest for you, that's fine too.
4. **Worksheet 1 – Evaluation of Identified Hazards and Risks** – Please note how your municipality's vulnerability has changed, and identify any additional hazards you think we should examine. Also, please provide some details on how the events listed impacted your municipality, and identify any other hazard events that impacted you. On the last page, tell us about any problems that hazards present in your community, or anything that you'd like to address in this planning process.
5. **Worksheet 2 – Capability Assessment and Integration**
    a. Planning and Regulatory Capability
        i. Identify any local plans and/or regulations that you have in effect in your municipality. For any that you say you have, you must fill in the entire row. Provide a code citation. For regulations, that's the local law number or chapter of your municipal code, and the date. For plans, we need the formal title of the plan and the date it was last updated.
        ii. In the comments, describe how the regulation or plan helps reduce long-term vulnerability. For instance, if you have zoning, does it limit development in hazard areas like the floodplain?
    b. Administrative and Technical Capability
        i. Identify what staff members or technical expertise you have on staff (full time, part time, or volunteer for your municipality), or who you have access to through the county or another organization. If you have that resource, identify who it is by organization/position, not by a person's name.
    c. Community Classifications
        i. Your code enforcement officer should know your BCEGS rating.
        ii. Your fire department might know your ISO Fire Protection Class, if none of your municipal officials know.
        iii. There are links on the last page for finding out your BCEGS rating and Fire Protection Class, as well.
6. **Worksheet 3 – NFIP Floodplain Administrator Questionnaire** –your floodplain administrator will lead the charge on filling this one out, but may need help from other officials (zoning, codes enforcement, etc.). Again, more information is better. Really describe your municipality's programs, rather than just saying yes/no.
7. **Worksheet 4 – Mitigation Action Review Worksheet** – see below
8. **Worksheet 5 – New Development and Building Permits** – identify the number of permits issued in your municipality in each of the last several years (by occupancy), the number of those permits that were for development in the Special Flood Hazard Area (SFHA) – the floodplain, any major development in the last 5 years, and any known or proposed major development on the horizon. For major development, we're looking for any commercial or

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

industrial development, and any apartment buildings, subdivisions, etc. You don't need to list every single residential structure that was built.

9. **Worksheet 6 – Shelters, Evacuation Routes, Temporary Housing, and Long-Term Housing** –
    a. Evacuation Routes – what are the main routes you would use to evacuate your municipality, particularly from a flood?
    b. Sheltering Needs – provide all of the information requested for each facility that has been identified as a potential shelter.
    c. Temporary Housing – the State requires that we identify where we could place FEMA trailers or other temporary housing to help people displaced by an emergency. List any parks, open lots, RV campgrounds, etc. where you could theoretically place temporary housing. The sites do not need to be ready to accept them right now, but if you identify a site that isn't ready yet, the plan will have an action to meet the requirements.
    d. Permanent Housing – the State also requires that we also identify potential sites that can be developed with new permanent housing. Of course, it depends on the landowner being willing to sell, a developer being willing to build new housing, and other factors, but identify any targeted growth areas or sites that have already been identified for future development in your municipality.

Worksheet 4 is different for each jurisdiction, as it capture information about the actions that your municipality included in the 2015 plan. The Erie County Water Authority, Village of Farnham, and Town of Wales do not have a Worksheet 4, because there were no jurisdiction-specific actions in the 2015 plan for those jurisdictions.

- Brief Summary of the Original Problem - the 2015 HMP did not identify the problem being solved for each action, but if you know what problem was to be solved by each, enter it.
- Status (In Progress, Ongoing, No Progress, Complete) – choose the status of the action. If you haven't gotten the project done (or even started) in the last five years, that's OK- we just need to know the status.
- Evaluation of Success (if project status is complete) – these columns are filled in ONLY FOR COMPLETED ACTIONS. If you completed an action, tell us how much it cost, what level of protection it provides (to the 10-year storm, to the 500-year flood, etc.), and describe the benefits it provides in terms of damages avoided or other evidence that it was a successful project.
- In the right-most column, let us know what you want to do with the action.
    - Should it be included in the updated plan or discontinued? If it's no longer relevant, or not specific enough for the updated plan, it can be discontinued.
    - If you want to include it in the updated plan, is the wording OK, or do you want to update it at all?
    - If you discontinued the action, say why.
- On the last page, identify any other actions that you carried out that weren't on the list from the 2015 plan. For instance, did you replace a bridge, update a culvert, update a plan or regulation, etc.? Also include any projects that you know you want to include in the updated plan.

If you need the worksheets emailed to you, or sent via hard copy, please let me know.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Please work with your colleagues to complete and return the worksheets **by December 22, 2020.**

While you're thinking about the HMP, why not provide some additional information on the hazards that impact our communities? Please go to our online problem mapping tool (https://arcg.is/9bzzr) to identify places where hazards affect your municipality.

Please let me know if you have any questions. Thank you!

Best,
Greg Butcher & Melissa Calhoun

Good morning again all,

Ok so I spoke Tony. If you are having issues opening the website, please send me a screen shot of the error message as well as what browser you are using and what antivirus software your municipality/agency has. He will then take that information to his IT people to see if there is a setting or something they can change so the website will not flag your antivirus. Also, you may want to speak to your IT department to see if they can unblock that specific website. I sent a message yesterday to ours and now the site is unblocked.

In the meantime, attached are the 5 documents that are the same for all municipalities. If you still cannot get onto the website, I don't want you to lose time, send me an email and I will then send

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

you Worksheet 4 that is specific to your municipality so you can start the process.

Thank you all for your patience. Stay safe!

Melissa

Subject: Hazard Mitigation Plan - update 12-2-2020
Importance: High

Good afternoon!

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

We hope you enjoyed the Thanksgiving holiday with your families. Now that we're all back to work, we wanted to follow up with you on the set of information gathering worksheets that was discussed at the Hazard Mitigation Planning Partnership Kickoff Meetings on November 18th and 19th. You can find the worksheets for download on the project website, here: https://www.eriecountynyhmp.com/municipal-information/.

Here is some information for you as you work through the worksheets:

1. You are not alone in completing the worksheets. You should work with a team of officials from your jurisdictions to fill them out. The Worksheet Outline lists the officials who might be involved in filling out each one. You will also be assigned a planner from our consultant team who will reach out to offer assistance.
2. More information is better. Even if you see a yes/no question, any details you can provide will make our plan stronger.
3. It's best to fill them out in Word rather than printing them out and writing in your answers, so that the rows give you enough room to answer, but if filling them out by hand is easiest for you, that's fine too.
4. **Worksheet 1 – Evaluation of Identified Hazards and Risks** – Please note how your municipality's vulnerability has changed, and identify any additional hazards you think we should examine. Also, please provide some details on how the events listed impacted your municipality, and identify any other hazard events that impacted you. On the last page, tell us about any problems that hazards present in your community, or anything that you'd like to address in this planning process.
5. **Worksheet 2 – Capability Assessment and Integration**
    a. Planning and Regulatory Capability
        i. Identify any local plans and/or regulations that you have in effect in your municipality. For any that you say you have, you must fill in the entire row. Provide a code citation. For regulations, that's the local law number or chapter of your municipal code, and the date. For plans, we need the formal title of the plan and the date it was last updated.
        ii. In the comments, describe how the regulation or plan helps reduce long-term vulnerability. For instance, if you have zoning, does it limit development in hazard areas like the floodplain?
    b. Administrative and Technical Capability
        i. Identify what staff members or technical expertise you have on staff (full time, part time, or volunteer for your municipality), or who you have access to through the county or another organization. If you have that resource, identify who it is by organization/position, not by a person's name.
    c. Community Classifications
        i. Your code enforcement officer should know your BCEGS rating.
        ii. Your fire department might know your ISO Fire Protection Class, if none of your municipal officials know.
        iii. There are links on the last page for finding out your BCEGS rating and Fire Protection Class, as well.
6. **Worksheet 3 – NFIP Floodplain Administrator Questionnaire** –your floodplain administrator will lead the charge on filling this one out, but may need help from other officials (zoning,

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

codes enforcement, etc.). Again, more information is better. Really describe your municipality's programs, rather than just saying yes/no.

7. **Worksheet 4 – Mitigation Action Review Worksheet** – see below
8. **Worksheet 5 – New Development and Building Permits** – identify the number of permits issued in your municipality in each of the last several years (by occupancy), the number of those permits that were for development in the Special Flood Hazard Area (SFHA) – the floodplain, any major development in the last 5 years, and any known or proposed major development on the horizon. For major development, we're looking for any commercial or industrial development, and any apartment buildings, subdivisions, etc. You don't need to list every single residential structure that was built.
9. **Worksheet 6 – Shelters, Evacuation Routes, Temporary Housing, and Long-Term Housing** –
    a. Evacuation Routes – what are the main routes you would use to evacuate your municipality, particularly from a flood?
    b. Sheltering Needs – provide all of the information requested for each facility that has been identified as a potential shelter.
    c. Temporary Housing – the State requires that we identify where we could place FEMA trailers or other temporary housing to help people displaced by an emergency. List any parks, open lots, RV campgrounds, etc. where you could theoretically place temporary housing. The sites do not need to be ready to accept them right now, but if you identify a site that isn't ready yet, the plan will have an action to meet the requirements.
    d. Permanent Housing – the State also requires that we also identify potential sites that can be developed with new permanent housing. Of course, it depends on the landowner being willing to sell, a developer being willing to build new housing, and other factors, but identify any targeted growth areas or sites that have already been identified for future development in your municipality.

Worksheet 4 is different for each jurisdiction, as it capture information about the actions that your municipality included in the 2015 plan. <u>The Erie County Water Authority, Village of Farnham, and Town of Wales do not have a Worksheet 4</u>, because there were no jurisdiction-specific actions in the 2015 plan for those jurisdictions.

- Brief Summary of the Original Problem - the 2015 HMP did not identify the problem being solved for each action, but if you know what problem was to be solved by each, enter it.
- Status (In Progress, Ongoing, No Progress, Complete) – choose the status of the action. If you haven't gotten the project done (or even started) in the last five years, that's OK- we just need to know the status.
- Evaluation of Success (if project status is complete) – these columns are filled in ONLY FOR COMPLETED ACTIONS. If you completed an action, tell us how much it cost, what level of protection it provides (to the 10-year storm, to the 500-year flood, etc.), and describe the benefits it provides in terms of damages avoided or other evidence that it was a successful project.
- In the right-most column, let us know what you want to do with the action.
    - Should it be included in the updated plan or discontinued? If it's no longer relevant, or not specific enough for the updated plan, it can be discontinued.
    - If you want to include it in the updated plan, is the wording OK, or do you want to

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

update it at all?
    - If you discontinued the action, say why.
- On the last page, identify any other actions that you carried out that weren't on the list from the 2015 plan. For instance, did you replace a bridge, update a culvert, update a plan or regulation, etc.? Also include any projects that you know you want to include in the updated plan.

If you need the worksheets emailed to you, or sent via hard copy, please let me know.

Please work with your colleagues to complete and return the worksheets **by December 22, 2020.**

While you're thinking about the HMP, why not provide some additional information on the hazards that impact our communities? Please go to our online problem mapping tool (https://arcg.is/9bzzr) to identify places where hazards affect your municipality.

Please let me know if you have any questions. Thank you!

Best,
Greg Butcher & Melissa Calhoun

Erie County Hazard Mitigation Plan Update - Individual Mitigation Survey

Erie County Residents,

Erie County has assembled a team to update our hazard mitigation plan which addresses hazards that impact our communities. Please help us plan for future disasters by completing this survey (will take approximately 15 minutes).

Hazard mitigation **is any action taken to reduce the loss of life and property by lessening the impact of disasters. These disasters include floods, severe storms, extreme temperatures, and others.**

This survey is designed to gather information from around Erie County to help us better coordinate activities and reduce the risk of injury or property damage. These questions are for information-gathering only and do not necessarily reflect any intent or future priorities of any governing body. This information will be shared with municipal, state, federal and county entities for planning purposes only.

You will be asked if you live in a floodplain. If you do not know, or are not sure, please check the FEMA website: https://msc.fema.gov/portal/home.

We would like to thank you in advance for your cooperation and participation.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan Update - Individual Mitigation Survey

Hazard Information

In this section, we are looking for your input on the types of hazards that impact Erie County and its residents. Please answer the following questions to help us understand the concerns throughout the county.

1. In the past 10 years, which of the following hazard events has Erie County experienced? Check all that apply.

- [ ] Coastal Erosion
- [ ] Coastal Storm (winds, storm surge)
- [ ] Communications Outage
- [ ] Cyber Attack
- [ ] Expansive Soils
- [ ] Flooding - Street/Property
- [ ] Flooding - Stormwater
- [ ] Flooding - Basement
- [ ] Flooding - 1st floor or above
- [ ] Hazardous Materials Release
- [ ] Other (please specify)
- [ ] Pandemic
- [ ] Power Outage
- [ ] Severe Weather (tornado, thunderstorm, hail)
- [ ] Severe Winter Storms (blizzard, heavy snow, ice)
- [ ] Water/Sewer Outage
- [ ] Wildfire
- [ ] Earthquake
- [ ] Extreme Temperatures (heat and cold)
- [ ] Climate Change (sea level rise or other)
- [ ] None

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

2. How concerned are you about the following natural hazards in Erie County? Please check one for each hazard.

	Not Concerned	Somewhat Concerned	Concerned	Very Concerned	Extremely Concerned
Climate Change (sea level rise or other)	☐	☐	☐	☐	☐
Coastal Erosion	☐	☐	☐	☐	☐
Coastal Storms (winds, storm surge)	☐	☐	☐	☐	☐
Communications Outage	☐	☐	☐	☐	☐
Cyber Attack	☐	☐	☐	☐	☐
Earthquake	☐	☐	☐	☐	☐
Extreme Temperatures (heat and cold)	☐	☐	☐	☐	☐
Expansive Soils	☐	☐	☐	☐	☐
Flooding - Street/Property	☐	☐	☐	☐	☐
Flooding - Stormwater	☐	☐	☐	☐	☐
Flooding - Basement	☐	☐	☐	☐	☐
Flooding - 1st Floor or above	☐	☐	☐	☐	☐
Hazardous Materials Releases	☐	☐	☐	☐	☐
Pandemic	☐	☐	☐	☐	☐
Power Outage	☐	☐	☐	☐	☐
Severe Weather (tornado, thunderstorm, hail)	☐	☐	☐	☐	☐
Severe Winter Storms (blizzard, heavy snow, ice)	☐	☐	☐	☐	☐
Water/Sewer Outage	☐	☐	☐	☐	☐
Wildfire	☐	☐	☐	☐	☐
Other Natural Hazard	☐	☐	☐	☐	☐

Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

3. How prepared is your household to get along without electricity or natural gas for up to five days?

- ◯ Not at all prepared
- ◯ Somewhat prepared
- ◯ Very prepared

4. Please rank how prepared you feel and your household are for disaster events likely to occur within your community. Rank on a scale of 1 to 5, with 5 representing the most prepared.

1 (least) 3 5 (most)

5. How do you receive your information concerning a disaster? Check all that apply.

- ☐ County Website
- ☐ Municipal Websites
- ☐ Newspaper
- ☐ Municipal E-Mail
- ☐ Police, Fire, EMS, 9-1-1
- ☐ Telephone Book
- ☐ Informational Brochures
- ☐ Public Meetings, Workshops, Public Awareness Events
- ☐ Schools
- ☐ TV News
- ☐ TV Advertising
- ☐ Radio News
- ☐ Radio Advertisements
- ☐ Outdoor Advertisements
- ☐ Internet
- ☐ Social Media
- ☐ Chamber of Commerce
- ☐ Academic Institutions
- ☐ Books
- ☐ Public Library
- ☐ Mass Notification System
- ☐ Other (please specify)

6. Of the answers you provided above, what are the top three methods you use?

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

7. Which of the following steps has your household taken to prepare for a local hazard event? Check all that apply.

- [ ] Received first aid/CPR training
- [ ] Made an emergency plan
- [ ] Designated a meeting place
- [ ] Identified utility shutoffs
- [ ] Prepared a disaster supply kit
- [ ] Installed smoke detectors on each level of home
- [ ] Stored food and water
- [ ] Stored flashlights and batteries
- [ ] Stored a battery-operated radio
- [ ] Stored a fire extinguisher
- [ ] Stored medical supplies (first aid kit, medications)
- [ ] Registered to receive emergency alerts (i.e. ReadyErie, NY Alert)
- [ ] Purchased additional insurance to cover losses (i.e. flood insurance)
- [ ] Identified the location of the nearest emergency shelter
- [ ] Received emergency preparedness information from a government source
- [ ] Other (please specify)

8. In the past, has your home been damaged by a hazard event? For example, the basement of your home flooded and damaged the hot water heater.

- ( ) Yes
- ( ) No
- ( ) Other (please specify)

9. If you answered "yes" to question #8, did you report the damages to your insurance company or local officials?

- ( ) Yes
- ( ) No
- ( ) Other (please specify)

10. If you answered "no" to question #9, why did you not report the damages?

11. Please explain the damage your structure sustained and when it occurred.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

12. In the last 10 years, were you evacuated from your home as a result of a disaster (e.g. flooding)? If so, how long were you displaced? Did you go to a shelter?

13. To the best of your knowledge, is your property located in a designated floodplain? If you do not know, click here to find out.

- ◯ Yes
- ◯ No
- ◯ Don't Know

14. If your property is in the floodplain, do you have flood insurance?

- ◯ Yes
- ◯ No
- ◯ N/A

15. If your property is located outside of the floodplain, do you have flood insurance?

- ◯ Yes
- ◯ No
- ◯ N/A

16. If you do NOT have flood insurance, why not? Check all that apply.

- ☐ I don't need it
- ☐ My property has never flooded
- ☐ My property is located on high ground
- ☐ It is too expensive
- ☐ Other (please specify)
- ☐ Not familiar with it/don't know about it
- ☐ Insurance company will not provide
- ☐ I believe my homeowners insurance will cover me

17. Do you or did you have problems getting homeowners/renters insurance due to risks from hazards?

- ◯ Yes
- ◯ No

18. If you answered "yes" to the previous question, please identify the hazard risk that caused you to have problems obtaining homeowners/renters insurance.

Erie County Hazard Mitigation Plan Update - Individual Mitigation Survey

Hazard Mitigation

As defined by FEMA, mitigation is the effort to reduce loss of life and property by lessening the impact of disasters. In order for mitigation to be effective, we need to take action now - before the next disaster - to reduce human and financial consequences later.

Effective mitigation requires that we all understand local risks, address the hard choices, and invest in long-term community well-being. Without mitigation actions, we jeopardize our safety, financial security and self-reliance.

In this section of the survey, we want to hear from you how Erie County can help mitigate the county and become more resilient before the next storm strikes.

19. Please identify any specific vulnerabilities that you are aware of in Erie County (e.g. floodprone areas or specific properties, critical facilities that lack backup power, etc.). Please list street names and other specific identifiers if possible.

20. Please identify any specific vulnerabilities that you are aware of in the municipality you live in (e.g. floodprone areas or specific properties, critical facilities that lack backup power, etc.). Please list street names and other specific identifiers if possible.

You can also plot these vulnerabilities on a map using a simple mapping tool that was developed for this planning process. Click here.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

21. What types of projects do you believe local, county, state, or federal government agencies could be doing to reduce the damage and disruption of disasters in Erie County? Select your top three choices.

- [ ] Retrofit and strengthen essential facilities such as police, schools, and hospitals
- [ ] Retrofit infrastructure, such as elevating roadways and improving drainage systems
- [ ] Work on improving the damage resistance of utilities (electricity, communications, water/wastewater facilities etc.)
- [ ] Install or improve protective structures, such as floodwalls, levees, bulkheads, and firebreaks
- [ ] Enhance stream maintenance programs/projects
- [ ] Replace inadequate or vulnerable bridges and causeways
- [ ] Strengthen codes, ordinances and plans to require higher hazard risk management standards and/or provide greater control over development in high hazard areas
- [ ] Buy out flood prone properties and maintain as open space
- [ ] Inform property owners of ways they can mitigate damage to their properties
- [ ] Improve access to information about hazard risks and high-hazard areas
- [ ] Assist vulnerable property owners with securing funding to mitigate their properties
- [ ] Create a stream gage and weather monitoring program to provide more accurate data and warnings
- [ ] Other (please specify)

22. Do you feel that your municipality is doing enough towards flood prevention and mitigation or prevention/mitigation from other hazards?

- ◯ Yes
- ◯ No

Please provide details for your answer.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

23. If your property were located in a designated high-hazard area (for example, NFIP flood zone) or had received repeated damages from a disaster event, would you consider any of the following options?

If your response is dependent on certain factors, such as the funding source, please indicate those factors in the following question.

	Yes	No	Unsure
Having your property bought out	○	○	○
Moving your structure to another property or a less risky part of your property	○	○	○
Elevating your structure	○	○	○
Floodproof your structure	○	○	○
Look into other ways to mitigate	○	○	○

Other (please specify)

24. Please select the factor(s) that would influence your decision on the mitigation options listed above (buyout/acquisition, relocation, or elevation).

- ☐ Cost
- ☐ Unaware of available programs
- ☐ Do not have the means to move/relocate
- ☐ Length of process
- ☐ Other (please specify)

25. If you have already had to spend money to mitigate your property, how much have you spent and on what measures?

26. Which (if any) incentives would motivate you to spend money on protecting your home from the possible impacts of a disaster? Such as lower interest rates, grant funding, waivers, etc.

27. Please list any additional types of projects you believe local, county, state, or federal government agencies could be doing to reduce the damage and disruption in Erie County.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

28. Do you have any other comments, questions, or concerns regarding hazard mitigation in Erie County?

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan Update - Individual Mitigation Survey

General Household Information

The answers provided in this section will be treated as CONFIDENTIAL and will be used solely for the purpose of preparing this plan. Please note that individual answers will not be published in the plan.

29. Please indicate the municipality in which you live:

- Akron (V)
- Alden (T)
- Alden (V)
- Amherst (T)
- Angola (V)
- Aurora (T)
- Blasdell (V)
- Boston (T)
- Brant (T)
- Buffalo (C)
- Cheektowaga (T)
- Clarence (T)
- Colden (T)
- Collins (T)
- Concord (T)
- Depew (V)
- East Aurora (V)
- Eden (T)
- Elma (T)
- Evans (T)
- Farnham (V)
- Gowanda (V)
- Grand Island (T)
- Hamburg (T)
- Hamburg (V)

- Other (please specify)

30. How long have you lived here?

- Less than 1 year
- 1 to 5 years
- 6 to 9 years
- 10 to 19 years
- 20 years or more

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

31. Do you own or rent your place of residence?

- ◯ Own
- ◯ Rent

32. What type of residence do you live in?

- ◯ Single-family detached
- ◯ Multi-family detached
- ◯ Town Home
- ◯ Other (please specify)
- ◯ Condominium
- ◯ Apartment Complex
- ◯ Commercial

33. If you received real estate disclosure information when you moved into your current residents, did your real estate agent or landlord explain the implications of living in a hazard risk zone and did you understand the information they presented?

- ◯ Yes
- ◯ Other (please specify)

34. Which of the following digital media outlets do you use and/or subscribe to receive general news and information about Erie County? Check all that apply.

- ☐ Facebook
- ☐ Twitter
- ☐ Mass Notification System
- ☐ Other (please specify)
- ☐ Email and/or text messages
- ☐ ReadyErie
- ☐ Local News

35. Please indicate your age range:

- ◯ Under 18
- ◯ 18 to 30
- ◯ 31 to 40
- ◯ 41 to 50
- ◯ 51 to 60
- ◯ 61+

From: Calhoun, Melissa J.
Subject: Please distribute
Date: Friday, January 8, 2021 5:10:47 PM

Sent to LEPC, Disaster Preparedness Advisory Board, Fire Advisory Board, emergency managers, and elected officials

CAUTION: This email originated from an external sender. Verify the source before opening links or attachments.

Good evening,
Please send out the email below to your schools, the business community, nursing homes, hospitals/healthcare facilities, police/fire/EMS agencies within your municipalities.

Thank you!

To Erie County's Stakeholder Community:

Hello! As you know, Erie County is updating its Hazard Mitigation Plan (HMP). The HMP will analyze the hazards faced by the county and its municipalities, residents, and businesses, and will identify a strategy for minimizing the vulnerability to these hazards. You may remember being invited to the Planning Partnership Kickoff webinars that were held on November 18 and 19, 2020. You can find out more about the HMP and the planning process here: https://www.eriecountynyhmp.com/.

I would like to invite you to provide more input into the planning process. We have developed a short survey about the county and the risks it faces. We would greatly appreciate it if you would complete the survey and otherwise participate in this important endeavor. The survey can be found here:
https://www.surveymonkey.com/r/ErieCountyStakeholder

We would appreciate it if you would complete the survey by January 29, 2021.

Please reach out if you have any questions. Thank you very much!

Have a great day!

Melissa

Erie County Hazard Mitigation Plan - Stakeholder Survey

Erie County, along with its cities, towns, and villages, are in the process of updating the Hazard Mitigation Plan (HMP) in order to be eligible for federal grant funding for public and private mitigation projects. The HMP provides a "blueprint" by which participating jurisdictions can make coordinated, cost-effective efforts towards reducing losses from natural and human-caused disasters.

The following survey is designed to help identify general needs for hazard mitigation and resiliency within Erie County from your perspective, as well as to identify specific projects that may be included in the mitigation plan. Given the current COVID-19 pandemic, there are questions specific to this hazard at the end of the survey to help inform future decision making.

Please take a few minutes to answer the following questions and provide feedback on potential mitigation that affects your assets, infrastructure, and/or services within Erie County. Provide as much details as possible to support your choice in the comments box. Where possible, identify specific areas that need to be improved and your suggestions for possible improvements. If there are other important issues that you feel are not covered by this survey.

More information about this planning process and additional mitigation resources may be found at the Erie County Hazard Mitigation Plan website by going to: https://www.eriecountynyhmp.com/

Thank you for supporting the update of this planning process!

Erie County Hazard Mitigation Plan - Stakeholder Survey

Hazard/Damage Identification

9. Looking back at previous hazard events, have buildings/facilities/ structures you have worked in and/ or are responsible for been impacted by a hazard (ex. damage/closures/etc.)?

- ◯ Yes
- ◯ No
- ◯ Don't Know

10. If you answered “Yes” to the above question, in your own words please describe the type of event that caused or is causing (if recurring) damage and loss of service/ property. If quantifiable data is available, please provide that as well (number of damaged structures, monetary loss, etc.) (please explain)

11. What areas (in which you work) do you believe to be the most vulnerable to hazards? What are these hazards? (please explain).

12. Is/ are the facility(ies) that you work in or are responsible for adequately prepared to withstand disasters? If your work involves working at multiple facilities, please provide a brief description in the “other” category, describing which facilities are most vulnerable.

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

13. Based on experience, do you think the transportation infrastructure serving your facility(ies) is adequately designed and equipped to withstand closures and damage due to hazards, and are able to provide long-term support for your community's needs? If not, please indicate why not.

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

14. Overall, do you think the utility infrastructure and service (specifically electricity and communication) are sufficiently equipped/ designed to withstand disasters and has/ have the ability to continue to provide uninterrupted service to your facility(ies)? If not, please indicate why not.

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

15. Are you aware of the number and location of vulnerable populations in your community/operating area?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan - Stakeholder Survey

Community Preparedness

16. Do you think that local public education and awareness programs are effective at informing vulnerable populations on what they should do to prepare for and reduce personal risk to disasters?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

17. Do you think that the public, particularly vulnerable populations, are aware of, understands, and takes advantage of emergency warning and notification systems and service (mass notification system, audible alerts, text services, etc.)?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

18. To your knowledge, are development and land use decisions made with consideration to exposure and or increased of hazard risks?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

19. Do you believe that local government understands, supports, and possesses adequate resources for hazard risk reduction efforts in the community?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

20. Do you believe private businesses in your community (construction companies, supply companies, etc.) play a direct critical role in your organization's operation and daily function?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

21. Does your organization have/ or is part of an emergency response plan?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

22. If you answered yes above, does the plan cover potential impacts to your operations including pandemic?

- ◯ Yes
- ◯ No, we do not need one
- ◯ No, but we will need guidance on how to develop
- ◯ Don't Know
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

23. If your organization is part of an emergency response plan, does your organization have a defined role or responsibility within the plan?

- ○ Yes
- ○ No
- ○ Don't Know
- ○ Other (please specify)

24. Is your organization covered by any of the following plans? Check all that apply

- ☐ Continuity of Operations Plan
- ☐ Continuity of Government Plan
- ☐ Emergency Operations Plan
- ☐ Other (please specify)
- ☐ Business Continuity Plan
- ☐ None
- ☐ Don't Know

25. Do you believe your organization is equipped and resilient enough to handle a disaster?

- ○ Yes
- ○ No
- ○ Maybe
- ○ Don't Know
- ○ Other (please specify)

Erie County Hazard Mitigation Plan - Stakeholder Survey

Project Identification

26. Can you identify projects or programs that will reduce your facility/organization's vulnerability to damages and losses, including loss of operation/service, to hazard events? (Please explain)

27. Can you identify projects or programs that have been recently been implemented to reduce your community's vulnerability, damage and losses, including loss of operation/service, to hazard events? (please explain)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan - Stakeholder Survey

COVID-19

COVID-19 has shed light onto our community's strengths and weaknesses. Please answer the following questions.

28. How has your organization been involved in response to this pandemic? (please explain)

29. How do you believe COVID-19 will reshape your organization's practices/ business framework? (ex. Have employees wear masks during flu season, improve sanitation practices, conduct work remotely whenever possible, etc.) (please explain)

30. What specific services/ infrastructure needs to be built/ improved in your community in order to mitigate damage we have experienced from this pandemic? (please explain)

31. Please share any challenges and obstacles you are facing (you can select more than one)

- [ ] Availability of cleaning supplies
- [ ] Availability of personal protective equipment
- [ ] Clear messaging
- [ ] Finding medical professionals
- [ ] Waste disposal
- [ ] Other (please specify)
- [ ] Contingency/back-up plan for staffing
- [ ] Tracking information
- [ ] Access to community officials
- [ ] Receiving accurate information regarding current situation/resources available

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

32. Do you have procedures/protocols in place to return back to standard operations after the pandemic (e.g. cleaning protocols and frequency, occupancy limits, etc.)?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Final Thoughts

33. Do you have any questions or comments for Erie County?

#	RESPONSES	DATE
1	Snow storm, wind storm caused loss of power at our DPW Garage and, at the time, we didn't have a generator at that facility. That caused our water system to not work. We have since added a generator to keep that from happening again. It also prompted us to have a generator installed at the municipal building that houses the Fire Department, the Police Department, and the Mayor/Clerk.	1/27/2021 1:48 PM
2	NA	1/26/2021 2:38 PM
3	Electric Power Outages - Schools needed to close; Snow Storms - Closures due to weather, Rain - roof damage and leakage	1/26/2021 8:41 AM
4	Heavy rain event caused flooding of Town Water District pump house. No physical damage, just mud and debris cleanup required.	1/21/2021 3:41 PM
5	Primarily impacted in the past by weather closures; currently services are impacted by the COVID-19 Pandemic	1/21/2021 3:14 PM
6	years ago we had a fire in the CCMC area, town responded and put it out	1/21/2021 11:37 AM
7	Several buildings were damaged during snow storm a few years ago.	1/20/2021 5:34 PM
8	The pandemic has required a significant change in how buildings are cleaned and maintained.	1/19/2021 10:54 AM
9	N/A	1/18/2021 1:47 PM
10	Water main breaks, roof damage, heat loss	1/14/2021 2:53 PM
11	We had significant erosion of our Colden Elementary property due to Cazenovia Creek. The remediation work that we completed was at a cost of almost $500,000.	1/13/2021 11:12 AM
12	Not sure if this fits, but the greatest challenge to us actually being able to provide our services is when the snow is too deep to keep the roads open. It is challenging when we continue to get calls for emergency assistance, yet the snow prohibits us from making it to the location.	1/13/2021 8:34 AM
13	N/A	1/13/2021 7:56 AM
14	Damage to infrastructure has caused the authority to shut down rail service for various amounts of time. ex. damage to overhead catenary system.	1/13/2021 7:45 AM
15	Weather events cause closure, wind damage to buildings, heavy rains flood basements and cause roofs to leak, significant snowfalls result in closures and roof issues.	1/12/2021 11:47 AM

#	RESPONSES	DATE
1	wearing masks, social distance and remote learning like today	1/28/2021 7:16 PM
2	Yes	1/28/2021 4:56 PM
3	Created the ability to work remotely; prompted the Village to install a remote teller system so that the office could remain closed to the public and still get business accomplished; prompted the Village to purchase laptops for online training for staff to maintain needed certifications to accomplish their jobs.	1/27/2021 1:53 PM
4	continue to follow COVID guidelines	1/27/2021 12:57 PM
5	We have implemented several practices to keep everyone safe which include: mandatory mask wearing, social distancing, sanitizing, working remotely, etc.	1/26/2021 2:56 PM
6	Pro-active / Preventative measures. Follow Erie County DOH and CDC guidelines and recommendations. Increase cleaning and protocols for safety (Mask/Shields/gloves/gowns/polycarbonate Dividers) Daily Health Questionnaire Immediate plan for effective communication to staff/community using multiple modes The identification of "essential" employees	1/26/2021 9:11 AM
7	Increased use of sanitizing procedures.	1/21/2021 3:57 PM
8	We have done all of these things. We do feel that many of these changes will be permanent in nature.	1/21/2021 3:33 PM
9	less travel, will do more teams meetings. no gatherings for meetings over 6 people, teams meetings, mask wearing for the near future, work remotely, in the corian area we have 124 hand santizing stations	1/21/2021 11:47 AM
10	Has forced the Town to look at technology to address remote working and remote public meetings.	1/21/2021 11:42 AM
11	Still gatheting data	1/20/2021 5:39 PM
12	The use of masks and other PPE will probably be a large part of our future. A new look into sanitation.	1/19/2021 9:31 PM
13	Certainly we will continue to improve sanitation practices. Remote learning will play a larger role in the future. Meetings via zoom or other means in order to reduce the density of groups.	1/19/2021 11:13 AM
14	Nothing will change	1/18/2021 1:56 PM
15	Continuing use of masks in emergency calls and increased cleaning procedures	1/14/2021 6:17 PM
16	We will be more responsive and alert to specific patient conditions and certainly utilize PPE in more cases than prior to the pandemic	1/14/2021 5:30 PM
17	Disinfecting practices and policy implementation.	1/14/2021 3:08 PM
18	We've recognized a shift in our understanding of the ability to work remotely, the confirmation of the need to have our students in person and a vast improvement in our cleaning protocols that will help during flu season.	1/13/2021 11:17 AM
19	Decontamination of ambulance when needed	1/13/2021 9:00 AM
20	Better stockpile of PPE and equipment. Increasing remote work capabilities for some staff. Increasing remote work for some duties that don't require in person contact, including training.	1/13/2021 8:39 AM
21	I think keeping people socially distance will go on into the future	1/13/2021 8:03 AM
22	We have been successful with remote work for non-essential staff, improved sanitation measures in facilities,trains,buses, virtual meetings	1/13/2021 7:58 AM
23	more remote work, increased telehealth services, change in patient throughput and engineered barriers	1/12/2021 10:39 AM
24	No change	1/12/2021 10:06 AM
25	Masks are worn at all times and CDC Guidleines followed	1/12/2021 8:36 AM

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

26	Masks, cleaning etc	1/12/2021 3:39 AM
27	improve cleaning	1/11/2021 8:42 PM
28	Virtual practices, increased hygiene	1/11/2021 7:24 PM
29	No	1/11/2021 5:08 PM
30	All employees have been instructed in proper procedure to follow	1/11/2021 2:37 PM
31	better overall daily hygine	1/11/2021 2:28 PM
32	Sanitation procedures have certainly improved, and will continually be under review and modification is necessary.	1/11/2021 1:48 PM
33	You gave the correct replies	1/11/2021 1:11 PM
34	Improved sanitation practices; staggered start times to maintain physical distancing; limiting access to our facility	1/11/2021 12:34 PM
35	still in progress	1/11/2021 12:22 PM
36	It already has.	1/11/2021 12:00 PM
37	Significant change on the integration of technology in operations and instruction. Incresased saniation schedules and enhanced practices	1/11/2021 11:58 AM
38	Please see above	1/11/2021 11:34 AM
39	remote work has become more integral and online resources for municipalities and elected officials.	1/11/2021 11:08 AM
40	Improved sanitation practices, increased staff working from home, more sick days utilized	1/11/2021 11:02 AM
41	Masks will become part of the health and safety ppe	1/11/2021 10:51 AM
42	All of the above	1/11/2021 10:23 AM
43	We have improved our HAVC system	1/11/2021 9:32 AM
44	conduct work remotely where operational efficient, develop redundancy in key psoitions	1/11/2021 8:17 AM
45	We have implemented several best practices for response to calls for service, including the proper wearing of PPE, social distancing and good sanitizing.	1/10/2021 6:20 PM
46	We do all of the things mentioned above. There are only myself and 3 employees	1/10/2021 6:16 PM
47	Return to normal after the pandemic	1/10/2021 5:58 PM
48	YOU MUST IMPROVE the HVAC systems before you do anything else. Not just the better filters but MUCH MUCH MUCH More outside make up air needs to be introduced into most all public buildings. And in work spaces keep the winter humidity at least 35%.	1/9/2021 10:55 PM
49	mandatory mask wearing	1/9/2021 5:35 PM
50	Yes Sanitation practices have changed for good Town Staff ability to work from home AAR needed to understand more from Town Supervisor and Town Clerk to understand challeges faced	1/9/2021 12:18 PM
51	Need to proceed with more caution to related air borne illnesses	1/9/2021 7:44 AM
52	Yes through our local fire depths.	1/8/2021 6:47 PM

To Erie County's Neighbors:

Hello! As you know, Erie County is updating its Hazard Mitigation Plan (HMP). The HMP will analyze the hazards faced by the county and its municipalities, residents, and businesses, and will identify a strategy for minimizing the vulnerability to these hazards. You may remember being invited to the Planning Partnership Kickoff webinars that were held on November 18 and 19, 2020. You can find out more about our HMP and the planning process here: https://www.eriecountynyhmp.com/.

I would like to invite you to provide input into the planning process, so that we can address issues that cross our borders and affect both our counties and communities. We have developed a short survey to gather this information. We would greatly appreciate it if you would complete the survey and otherwise participate in this important endeavor. The survey can be found here: https://www.surveymonkey.com/r/ErieCountyNeighbor

We would appreciate it if you would complete the survey by January 29, 2021.

Please reach out if you have any questions. Thank you very much!

Have a great day!

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan - Neighboring County Survey

Erie County, along with its municipalities, are in the process of updating the Hazard Mitigation Plan (HMP). Hazard mitigation is any action taken to reduce the loss of life and property by lessening the impact of disasters (natural, technological, and man-made). These include flooding, severe storms, severe winter storms, etc. The HMP provides a "blueprint" by which participating jurisdictions can make coordinated efforts towards reducing losses from natural hazards. It is required by the Federal Emergency Management Agency (FEMA) in order to be eligible for federal grant funding for public and private mitigation projects.

Due to your proximity to Erie County, the effects of many of these disasters would be similar in your county, and your involvement in this process could reap mutual benefits to both counties. By participating in the review of this plan, you will be engaging in the regional coordination of disaster mitigation planning, which is one of the intents of the Mitigation Planning Regulations (44 CFR 201).

The following survey is designed to help Erie County gain a better understanding of how their neighboring counties operate day-to-day and during an emergency and helps our neighboring counties be included in the planning process. This survey consists of 27 questions and will take approximately 15 minutes to complete.

The Erie County Hazard Mitigation Plan Planning Partnership thanks you for taking the time to participate in this information-gathering process. More information about this planning process can be found at the Erie County HMP website: https://www.eriecountynyhmp.com/

Evacuation and Sheltering

The answers provided in this section will be treated as CONFIDENTIAL and will be used solely for the purpose of preparing this plan.

12. Do you collaborate with Erie County on establishing evacuation routes and alternate evacuation routes?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

13. Do you and Erie County consult with one another before making evacuation decisions that would impact one another (recommending evacuation routes into neighboring counties)?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain

14. Are evacuation routes maintained to the same level of protection across county lines?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A
- ◯ Other (please specify)

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

15. Do you collaborate with Erie County on establishing shelters?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

16. Do you and Erie County consult with one another before making sheltering decisions that would impact one another (recommending shelters in neighboring counties)?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

17. Do you and Erie County share any spaces suitable for temporary housing? This includes locations suitable to place temporary housing units to house residents displaced by a disaster.

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

Erie County Hazard Mitigation Plan - Neighboring County Survey

Information Sharing

The answers provided in this section will be treated as CONFIDENTIAL and will be used solely for the purpose of preparing this plan.

18. Does your county have access to contact information for Erie County's emergency operation centers at the county and local level?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

19. Please describe any situations or hazards that are of a concern to both your and Erie County. For example, would flooding along a particular waterway impact both counties, or are there any facilities or infrastructure that would affect both counties if it/they failed?

20. Please explain how information is shared between counties regarding mitigation projects.

21. Is information regarding mitigation shared during the planning and implementation phases of the projects?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

Erie County Hazard Mitigation Plan - Neighboring County Survey

Projects, Grants, Education, and Outreach

The answers provided in this section will be treated as CONFIDENTIAL and will be used solely for the purpose of preparing this plan.

22. Are you aware of any projects for the following that requires cross-collaboration between county boundaries?

- [ ] Stormwater projects
- [ ] Watershed projects or planning
- [ ] Floodplain projects or planning
- [ ] Connected roadway improvements
- [ ] Natural infrastructure restoration
- [ ] Outreach (education and outreach campaigns, programs for public information, etc.)
- [ ] Other (please specify)

23. If you selected anything above, please explain.

24. Have your county and Erie County collaborated on grant applications?

- ( ) Yes
- ( ) No
- ( ) Don't Know
- ( ) N/A

If yes, please explain.

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

25. Are you aware of any organizations that carry out education and outreach regarding hazards in both counties?

- ◯ Yes
- ◯ No
- ◯ Don't Know
- ◯ N/A

If yes, please explain.

26. What are opportunities or ideas to optimize cooperation with Erie County on emergency management operations and hazard mitigation projects?

Attachment: 32-Appendix-D-Public-and-Stakeholder-Outreach-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY

APPENDIX E RISK ASSESSMENT SUPPLEMENTARY DATA

This appendix contains supporting information for the Risk Assessment (Section 5) as available. It contains excerpts of the previous events and losses as presented in the 2015 Hazard Mitigation Plan (HMP), organized by hazard of concern. This information has been compiled into one appendix for ease of reference; however, it has not been updated and is reproduced as documented in the 2015 plan.

In order to create a more streamlined plan, the 2021 HMP was reorganized and condensed into a practical and more readable document for the public with the goal of providing a plan easier to implement for the county and all municipalities to support future risk reduction. The information in this appendix supplements the information provided in Section 5.4 of this plan.

E.1 Critical Facilities and Lifelines

The identification of community lifelines across Erie County provides an enhancement to the 2021 HMP. The Federal Emergency Management Agency (FEMA) defines a lifeline as: *"providing indispensable service that enables the continuous operation of critical business and government functions, and is critical to human health and safety, or economic security."* Identifying community lifelines will help government officials and stakeholders to prioritize, sequence, and focus response efforts towards maintaining or restoring the most critical services and infrastructure within their respective jurisdiction(s). Identifying potential impacts to lifelines can help to inform the planning process and determining priorities in the event an emergency occurs. Figure E-1 is FEMA's fact sheet that describes lifelines further.

Figure E-1. FEMA Community Lifelines

Homeland Security

Fact Sheet

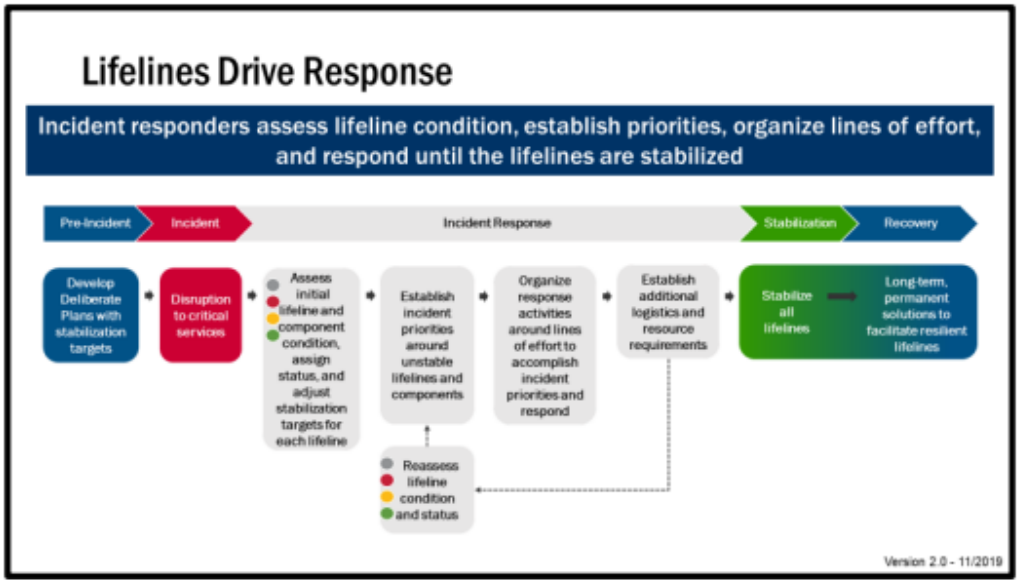
COMMUNITY LIFELINES

Why lifelines?

- FEMA developed the community lifelines construct to increase effectiveness in disaster operations and better position the Agency to respond to catastrophic incidents
- Lifelines are the most fundamental services in the community that, when stabilized, enable all other aspects of society
- When disrupted, decisive intervention (e.g., rapid service re-establishment or employment of contingency response solutions) is required
- During initial response, priority efforts focus on *stabilizing community lifelines*.
- Lifelines provide an outcome-based, survivor-centric frame of reference that assists responders with:
  - Root Cause Analysis
  - Interdependencies
  - Prioritization
  - Ease of Communication

How were lifelines developed?

- FEMA released initial guidance *(Lifelines Toolkit)* introducing the lifelines construct in February 2019, followed by significant stakeholder outreach and feedback including:
  - State and Local Emergency Managers
  - Interagency Partners
  - Private and Non-Profit Stakeholders
- Construct was validated during responses to Hurricanes Michael, Florence, and Dorian, Super Typhoon Yutu, Alaska Earthquake, and during Shaken Fury full-scale exercise.
- Lessons learned from exercises, operations, and stakeholder feedback resulted in refinement and improvement to the construct.
- *National Response Framework (NRF) 4th Edition* formalized lifelines in national response policy
- Enhanced Lifelines guidance *(Lifelines Toolkit 2.0)* released to support NRF Publication.



See the Lifelines Toolkit at:
https://www.fema.gov/media-library/assets/documents/177222

If you have any questions or feedback, please email them to: Lifelines@fema.dhs.gov

E.2 History of Hazard Events in the County – 2015 HMP

E.2.1 Coastal Erosion

December 12, 2000. The high winds caused water levels at the eastern end of Lake Erie to rise over five feet in a few hours. The high water levels coupled with waves of 10 to 14 feet caused shoreline erosion and localized flooding. Evacuations took place at Hoover Beach.

November 6, 2005. High water levels and waves of ten to fifteen feet resulted in some erosion of the lake shore and limited property damage.

January 30, 2008. The high water levels and waves to twelve to sixteen feet resulted in erosion of the lake shore and significant flooding at the extreme eastern end of the lake.

E.2.2 Extreme Temperature

Extreme Cold - February 1, 1993. This extreme cold event was reported to have caused $50,000 in property damage. No other information is available.

Extreme Heat - July 13, 2005. A 25-year-old construction worker collapsed and died from heat stroke as he was walking home from his construction job.

Unseasonable Warmth - October 8, 1993. Period of unseasonably warm temperatures. No further information is available.

E.2.3 Extreme Wind

NOAA's NCDC database [now NCEI] records 287 high wind and thunderstorm wind events affecting Erie County between July 1956 and March 2011 (data includes wind events greater than 50 knots/57.5 mph, with the exception of tornado events which are addressed separately). IThese incidents resulted in a reported total of three deaths and 34 injuries across the region which they affected, as well as more than $34 million in property damages and $200,000 in crop damages.

Date	Area Affected	Description	Recorded Damages
9/29/2005	Greater Buffalo Area	The thunderstorms accompanying the front produced damaging winds that downed trees and power lines. At the peak of the storms, over 30,000 customers were without power. Falling trees damaged homes and/or automobiles in Rochester, Silver Creek and Buffalo.	$30,000
11/3/2005	Hamburg	While most of wind gusts ranged from 45 to 50 mph, the winds did knock down several large trees in Hamburg during the late morning hours.	$4,000
8/2/2006	Tonawanda	Trees and limbs were downed in Constableville and Tonawanda.	$8,000
9/11/2007	Orchard Park, Buffalo, Tonawanda	The thunderstorm winds downed trees and power lines. In Orchard Park, a 15- to 20-foot section of the Buffalo Bills Field house was torn off by the thunderstorm winds.	$50,000
1/30/2008	Various	Sustained winds increased to 30 to 45 mph with gusts measured to 80 mph at the peak of the storm. Trees and power lines were downed by the strong winds. Utility companies reported close to 100,000 customers without power in locations scattered throughout region. Several homes and automobiles were damaged by falling trees and limbs. On Grand Island, the roof a manufacturing company sustained significant damage. The Buffalo Airport was closed between 8:30 a.m. and noon with over half of its scheduled flights canceled for the day. In downtown Buffalo, a building from the 1850s that had been damaged in an earlier January windstorm, sustained further damage and was deemed unsafe and to be demolished.	$250,000

Date	Area Affected	Description	Recorded Damages
12/28/2008	Various	A peak gust of 75 m.p.h. was recorded at 8:21 a.m. EST at the Buffalo Airport. Close to 100,000 customers lost power during the storm and nearly 90,000 were without phone service. Downed trees damaged several structures and automobiles. The strong winds tore off roofs and shingles on many buildings. At the Buffalo Airport, wind gusts blew several jetways into the terminal building and the airport lost power during much of the storm. At Orchard Park, the wind tore 2 feet by 50 feet section of the roof the Buffalo Bills field house. The wind picked up gravel and windows and windshields of numerous cars in the stadium parking lot were broken. Inside the stadium, the strong winds tilted both goal posts. Also, near the stadium, a concession trailer was blown over with only minor injuries to the occupants reported.	$250,000
2/12/2009	Various	Wind gusts were measured to 69 mph with widespread estimated gusts between 55 and 60 mph. The strong winds downed trees and power lines. Electric utilities reported nearly 100,000 customers without power at the peak of the storm.	$50,000
8/9/2009	Various	Trees and wires were downed by thunderstorm winds in East Aurora, Forest Glen, Eden, Springville, Williamsville, Ebenezer	$67,000
8/20/2009	Buffalo	The thunderstorms that developed produced damaging winds that downed trees and power lines.	$15,000
12/9/2009	Various	On the New York State Thruway, several tractor trailers were blown over as winds gusted to near 70 mph. As the system passed to the north, winds shifted to southwest and increased. Gusts were measured to 60 mph at the Buffalo International Airport. The winds downed trees and power lines and utilities reported tens of thousands without power.	$750,000
10/26/2010	Falconwood, Cheektowaga	Thunderstorms accompanying the front produced damaging wind gusts to 60 mph. In Cheektowaga, a traffic signal at Union Road and George Urban Boulevard was blown down.	$29,000

The SHELDUS database lists more than 335 storm events featuring high winds affecting Erie County since January 1960 (including 81 events recorded between 2005 and the present) to which approximately $36.5 million in property damages was attributed.

E.2.4 Flood

Date	Affected Municipalities	Description	Recorded Damages
2/7/94	Various	Three to four inches of rain fell in less than an hour over the towns of Boston and Eden. The flood waters swamped yards and basements and washed out roads, culverts and crops.	$500,000 property damage; $50,000 crop damage
Jan. 1996	Various	Warm temperatures and rapid snowmelt of 8 to 12 inches of snow combined with heavy rainfall produced significant flooding and ice jams. Nearly two hundred homes were damaged by flood waters. In West Seneca, over three feet of water and ice covered some sections of Clinton and Transit Roads. Evacuations occurred and several roads were closed due to the flood waters in West Seneca and Elma.	$1.7 million property damage; $500,000 crop damage
Sept. 1996	Tonawanda	Storm sewers and drains could not handle the runoff forcing the closure of over 30 streets and resulting in serious basement flooding in thousands of homes. Thousands of homes lost both their natural gas and their power.	$400,000 property damage
7/8/98	Various	The extensive flooding closed numerous roads throughout the multicounty area. Several were completely washed out. Specific road closures included: Rte.78 in Depew, Rte.98 in Arcade, Four Rod and Old Three Rod Roads in Alden, Rte.63 in Dansville, and Rte.20 in Darien.	$1.9 million property damage; $100,000 crop damage
Jan. 1999	Various	Ice jam flooding occurred on area Buffalo area creeks. Some evacuations were necessary and roads were closed in the vicinity of south Cheektowaga. Some of the hardest hit areas included Lancaster and	$740,000 property damage

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Date	Affected Municipalities	Description	Recorded Damages
		Williamsville in Erie County. Evacuations occurred in Angola, Chili and Lancaster.	
9/23/00	Blasdell	A State of Emergency was declared in Blasdell. Roads were washed out and basements flooded throughout the southtowns. The heavy rains caused three area creeks to overflow their banks.	$400,000 property damage
12/20/00	Lake Erie coastline (notably Buffalo)	SEICHE. High winds at the eastern end of Lake Erie caused the water to rise above five feet in a few hours. High water levels, along with ten to 14 foot waves, caused shoreline erosion and local flooding. Evacuations were ordered at Hoover Beach. The lake remained above flood stage for a few hours. There were no reports of injuries or fatalities.	$50,000
03/09/02	Lake Erie coastline (notably Angola)	SEICHE. Winds above 50 knots on Lake Erie caused the lake level to rise at the eastern end of the lake. The lake exceeded the eight foot flood stage and peaked at 9 feet 63 inches at 2340 hours. No injuries or fatalities occurred. Evacuations were not ordered.	$35,000
May-June 2004	Not specified	Federal Disaster Declaration for Severe Storms and flooding between May 13th and June 17th resulted in a PA-only declaration for 14 New York Counties. Erie County was included in this declaration. (Neither the NOAA NCDC database nor the SHELDUS database includes this event period in its event history for Erie County.)	FEMA reports $18.7 million in PA payouts across the 14 affected counties
11/06/05	Not specified	SEICHE. High water levels and waves of ten to fifteen feet resulted in some erosion of the lake shore and limited property damage. Several roads along the lake shore were water covered or closed because of spray.	$25,000
12/01/06	Not specified	SEICHE. Along the Lake Erie Shore, the water levels at the eastern end of the lake fell several feet ahead of the storm, then quickly surged as the winds shifted with the passage of the cold front. The lake level rose over ten-and-a-half feet in a matter of hours, peaking at 9.93 feet at the lake level gage at Buffalo.	$10,000
01/30/08	Buffalo	SEICHE. The high water levels and waves to twelve to sixteen feet resulted in erosion of the lake shore and significant flooding at the extreme eastern end of the lake. The FEMA FIS reports that this unnamed storm had sustained winds of 30 to 40 mph and gusts to 60 mph. Coastal flooding occurred in several areas in the City of Buffalo, with high water marks ranging from about 578 to 580 feet.	$50,000
Dec. 27-28, 2008	West Seneca, Marilla, Elma, Lancaster, Buffalo	SEICHE. The combination of the wind shift, rapid strengthening of the wind speed and the long fetch up the length of Lake Erie produced a seiche on the lake. Water levels rose over six and a half feet in about three hours' time. In addition, flooding was reported in West Seneca and near Cazenovia Park in South Buffalo. Cayuga Creek at Lancaster crested above its flood stage at 9.23 feet at 6 p.m. on the 27th. Flooding was reported in Marilla, Alden and Lancaster. Flooding occurred in Elma and Gardenville.	$275,000 property damage (with $25,000 attributed specifically to seiche)
08/09/09	Village of Gowanda	Devastating storms struck the southern area of Erie County, particularly in the Village of Gowanda, where caused extensive building and infrastructure damage occurred. This event received a Federal disaster declaration, and was the highest flow on record for the Cattaraugus Creek gage #04213500 at Gowanda. The Village estimates that nearly $5 million in damages were incurred to Village-owned facilities and infrastructure, including damages to the Village Hall ($534,677), DPW Building ($146,675), Village roads ($1,142,882), Village Water Department ($1,388,475), debris removal ($651,767), creek bank erosion repairs ($611,123), and wastewater treatment plant repairs ($121,232). The FEMA FIS also reports that the New York and Lake Erie Railroad was temporarily suspended due to a washout of track.	More than $15 million
12/09/09	Not specified	SEICHE. The combination of the wind shift, rapid strengthening of the wind speed and the long fetch up the length of Lake Erie produced a seiche on the lake. Water levels rose over six feet in just a few hours.	$15,000

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

E.2.5 Ice Jams

January 18-19, 1996. According to a NWS Flood Statement on 1/18/96, an ice jam formed on Buffalo Creek between Borden and Transit Streets in West Seneca, NY. Borden Street, Transit Street, and Clinton Road were closed due to flooding caused by the mile long ice jam. At about 7PM on 1/18/96 the jam broke and started moving rapidly downstream. Flood waters began to recede after the jam broke. Rapid snowmelt of eight to 12 inches of snow and heavy rainfall of about an inch combined with warm temperatures to produce a major ice jam on the Buffalo Creek in West Seneca. Over three feet of water and ice covered some sections of Clinton and Transit Roads. Evacuations occurred and several roads were closed due to the flood waters in West Seneca and Elma. Nearly two hundred homes were damaged by flood waters. $1.7 million in property damages and $500,000 in crop damages were reported for this event (NOAA NCDC). On 2/9/96 the jam was located between Union and Harlem Rds. It extended from the Black Railroad bridge near Brookview Apartments on Indian Church Rd to just west of Borden Rd. Backyard flooding resulted. A portion of the jam broke at the Black Railroad bridge on 2/10/96. The next day the jam was located just downstream of Union Rd. The water level continued to rise on the river at Union Rd through 2/21/96. Warm temperatures and rain were thought to possibly loosen the jam on 2/23. Jim Lever, CECRL-IE, was at the site of the jam on 2/22/96. He reported that the jam had heavily flooded a strawberry field near Clinton St and Transit Rd. On 2/23/96 it was believed that warm temps and rain might loosen the jam. By 2/28/96 the jam had loosened and cleared and water levels were back to normal. A total of $4500 in damages occurred in West Seneca due to the jams on Buffalo Creek and Cazenovia Creek.

January 23-24, 1999. Ice jam flooding was reported on Buffalo area creeks. Evacuations were necessary and roads were closed in south Cheektowaga. Some of the hardest hit areas included Lancaster and Williamsville. Evacuations also occurred in Angola, Chili and Lancaster. Property damages of $740,000 were reported for this event (NOAA NCDC).

February 4, 2003. An ice jam formed on Cayuga Creek at Four Rod Road in Alden. Ice blocked the bridge and water overflowed. A flood warning was issued for Erie County.

March 2-3, 2004. The NWS reported a major ice jam on the Cazenovia Creek in the Buffalo, NY area near I-90. At least 2 road closures had been reported. At 555 PM, the NWS reported the ice jam on the Cazenovia Creek in South Buffalo broke and progressed downstream into Cazenovia Park resulting in a rapid rise in the creek level downstream into South Buffalo. The Stevenson Street Bridge was closed. The NWS reported that the last jam affecting the Buffalo area eroded by Friday morning, March 5th. The National Weather Service reported an ice jam on the Buffalo Creek near Elma, NY on March 3. The Buffalo Creek overflowed in the town of Elma, flooding the home of an Erie County elected official. During the overnight and into the early morning, several fire companies were in the town of Elma to hold back waters from the overflowing Buffalo Creek. It affected one home. Throughout the overnight, volunteer firefighters and officials from Erie County and the town of Elma checked the banks of the Buffalo Creek and nearby homes for possible flooding. About 7 miles to the south, the siren wailed at Sunset Bay warning residents to get their cars out, as the icy waters of Cattaraugus Creek spilled over its banks.

December 30, 2004. The National Weather Service reported an ice jam on Cazenovia Creek in Buffalo New York between the Stevenson Street Bridge and the Cazenovia Bridge. At 945 AM Friday December 31, the jam was causing water to back up into Cazenovia Park. At that time, no private homes were affected. About a half inch of rain had fallen since midnight, causing runoff from snowmelt that resulted in ice breakup, movement, and jamming. At 1 PM EST on December 31, 2004, the NWS reported that the jam remained in place but water was receding from Cazenovia Park. At 431 PM, the NWS cancelled the flood warning after flood waters receded from Cazenovia Park. USGS real-time stage information for Gage no. 04215500 (Cazenovia Creek at Ebenezer) showed that a jam had been in place at the gage between December 27 and very early in the morning of December

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

31. Stage records show a sudden drop in stage at 3:15 AM on December 31 typical of ice jam failure. (NOAA NCDC records for this event indicate only $3,000 in property damages).

March 15, 2007. Ice on Cattaraugus Creek at Gowanda NY, broke up and has caused river levels to rise eight feet over a two day period, but appeared to have begun to recede midmorning 15 March. Warm temperatures during the past week, the resulting snowmelt, and a period of rain, led to the breakup of numerous rivers across New England, many causing flooding.

E.2.6 Landslide

Cause	Municipality	Location	Description	Damage Estimate
Man-induced	Springville	Route 39	Till or lake clay	Not identified
Not identified	Springville	Route 39	Sheeting 30 feet long, houses on steps, slide	Not identified
Natural	East Aurora	Not identified	Slide into Buffalo Creek. 15 acre lake created. Regional DOT reports creek erosion slides all along Buffalo Creek from [illegible] to county line.	Not identified
Natural	Springville	Near Springville, east of intersection of Route 39 with Route 240	Slumps occur on exposures of clayey till – [illegible]	Not identified
Natural	Springville	Just south of Springville	Slumps occur on exposures of clayey till – [illegible]	Not identified
Natural	Not identified	East of Morton Corners area, on both sides of creek that crosses Route 39	Slumps occur on exposures of clayey till – [illegible]	Not identified
Natural	Sardinia	Just south of Sardinia	Slumps occur on exposures of clayey till	Not identified
Natural	Sardinia	Southwest of Sardinia	Slumps occur on exposures of clayey till	Not identified
Natural	Not identified	Shero Road - west of Patchin	Stream erosion	Not identified
Man-induced (seepage - saturation of embankment)	Cheektowaga	Scajaquada Creek Flood Control Project	Failures have occurred along the cut slopes of a local flood control project. Four separate phases of slides were repaired. The total reach of sliding was about 1/4 mile (both banks). Oversaturated soils after water level drops.	~ $250,000
Natural	Lancaster	Cayuga Creek Flood Control Project	Erosion of outer bend of Cayuga Creek has resulted in sliding and threat to road above	Not identified

E.2.7 Tornado

Date	Location	Magnitude	Impacts	Recorded Property Damage
4/25/57	Erie County	F1	None Reported	$25,000
7/7/1961	Erie County	F2	None Reported	$250,000
6/9/1966	Erie County	F0	None Reported	$3,000
8/19/1970	Erie County	F3	None Reported	$250,000
8/23/1971	Erie County	F2	None Reported	$25,000
5/2/1972	Erie County	F2	None Reported	$250,000
6/30/1976	Erie County	F1	None Reported	-
9/18/1977	Erie County	-	None Reported	$250,000

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Date	Location	Magnitude	Impacts	Recorded Property Damage
7/30/1987	Erie County	F2	None Reported	$2,500,000
4/9/1991	Erie County	F1	None Reported	$25,000
5/1/1991	Erie County	F0	None Reported	$250,000
7/12/1992	Erie County	F1	None Reported	$0
8/31/1993	Clarence	F1	A thunderstorm spawned a small tornado during the early morning hours. Downburst winds with an embedded tornado downed numerous trees; some were 1 to 1.5 feet in diameter and at least 100 feet high. Some structural damage to homes resulted due to falling trees and limbs.	$500,000
9/23/1993	Grand Island	F0	The tornado first touched down on Grand Island where it ripped the antenna off a house and overturned outdoor lawn furniture. The tornado moved southeast downing some trees in Tonawanda.	$50,000
6/24/1994	Angola	F0	The tornado mainly uprooted trees: one fell on a house.	$50,000
8/28/1994	Amherst	F0	No description	$50,000
9/25/1997	Evans Center	F0	Power lines and five large maple trees were downed.	$15,000
4/28/2002	East Concord	F0	In the Town of East Concord, a weak tornado (winds between 70 and 75 mph) briefly touched down. A portion of the back and roof of an outbuilding were blown away, a pier was tossed across a pond, and trees were damaged.	$35,000
6/30/2006	Cheektowaga	F1	A thunderstorm spawned a tornado which moved across the Town of Cheektowaga from the northwest to the southeast, initially touching down at 2:55 pm on Walden Avenue near Harlem Road. On Walden Avenue, a construction trailer was moved several hundred feet. The worker in the trailer suffered minor injuries. It then moved across the New York State Thruway, lifting a tractor trailer and depositing it on its side across the Jersey barrier; the driver suffered a broken leg. It then continued on a southeast trek damaging a 20 by 30 foot section of a wall on a warehouse and then downed trees as it crossed through central Cheektowaga. The tornado touched down several times along its path. Its final touchdown was at the Parkside Village Mobile Home Park around 3:05 pm where three mobile homes sustained significant damage and eight others sustained minor damage. The tornado was ranked an F1 with a path length of three miles and a width of 75 yards.	$250,000

E.2.8 Winter Storm

These events are reported as being responsible for property damage totaling approximately $95.1 million, although this includes damage reported in counties besides Erie County that were affected by the same events. Details and descriptions for some of the events are as follows:

- **Blizzard of 1977**. This storm crippled Western New York with bitter cold temperatures and high winds bringing existing snow into the county off Lake Erie, yet deposited very little new snow.
- **January 3, 1993.** A combination of a cold surface and warm moist air aloft created freezing rain and freezing drizzle which resulted in over a thousand traffic accidents throughout the area.
- **December 9-10, 1995.** Known familiarly as the "Weekend Storm" (and meteorologically as "Gary"), this lake-effect snow storm was declared a snow emergency at the state level. A total of 37.9 inches of snow fell over a 24 hour period. Impacts were less severe because of the storm's occurrence over the weekend when many people were home.

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

- **November 11, 1996.** Lake effect snow squall persisted across the southern portion of the county for nearly three days dropping localized amounts of 10 to 22 inches.
- **December 19, 1996**. Parts of the New York State Thruway were closed for more than 12 hours. Thirty to forty cars were stranded near Angola. A state of emergency was declared in Dunkirk and various municipalities imposed driving bans. Many school districts cancelled classes.
- **January 10, 1997.** Some Buffalo suburbs received 24 to 30 inches of snow. During Saturday morning, over a foot of snow fell in just four hours over Amherst and Tonawanda.
- **March 14, 1997**. Several inches of the icy slush coated trees and power lines, the weight of which downed the trees and lines. Various school districts throughout the area cancelled classes because of the treacherous conditions. Countless automobile accidents were reported.
- **December 5, 1997.** Heavy snow closed the New York State Thruway from Ripley to the Pennsylvania state line.
- **March 2, 1998**. It was the largest snowfall of the entire winter season in the Buffalo metro area. The snow made roadways extremely slick and innumerable accidents resulted. The heavy ice and snow on power lines and trees resulted in scattered power outages throughout the area.
- **January 1999. January 1-15**. Known familiarly as the "Big Dump" (and meteorologically as "Europa"), this series of lake-effect and synoptic snowstorms resulted in 60.5 inches of snow falling over a 15 day period, with a 24-hour maximum of 12.0 inches. A Federal snow emergency was declared. The cumulative effects of these storms caused extensive structural damage throughout the region. January 15-25. In Orchard Park, a man was injured when a garage collapsed on top of him during this period of excessive snow. Roof collapses and entire structure failures were numerous across the area. Numerous barns across the region collapsed under the excessive weight of the snow, in several dairy cows were injured and killed. Several garages collapsed damaging the automobiles and machinery inside them.
- **November 20, 2000.** Known familiarly as "Gridlock Monday" for its occurrence during a Monday morning rush-hour, (and meteorologically as "Chestnut"), this lake-effect storm resulted in a Federal disaster declaration. The storm crippled much of the Buffalo metro area with 24.9 inches of snow falling in a 24-hour period. Tens of thousands of people were stranded in autos as city and suburban streets became clogged with traffic and came to a standstill. Three thousand school children were stranded in buses which were unable to complete their routes.
- **December 24, 2001-January 1, 2001**. This well-forecasted, lake-effect storm known as the "Christmas Storm" or "Bald Eagle" storm resulted in a Federal disaster and emergency declaration. Over a nine-day period, 81.6 inches (6.8 feet) of snow fell. The 24-hour maximum accumulation was 35.4 inches. This storm crippled Buffalo and surrounding areas; however, its occurrence over the holidays when schools and many businesses were already closed, thus minimizing the catastrophic nature of such a large snowfall.
- **April 3, 2005**. Locally heavier amounts of up to two feet were reported along the ridges southeast of Lake Erie. Numerous accidents were blamed on the spring snowstorm. Tens of thousands were without power as the heavy snow downed trees, limbs and power lines.
- **October 12-13, 2006.** This historic lake-effect snow storm was characterized by the NWS Buffalo Forecast Office as a "dramatic, crippling, out of season event". Roughly one million residents of the Niagara Frontier lost power, some for as long as a week. With most trees still in full leaf at the time, damages to vegetation were the worst in recent memory. The 22.6 inches recorded at the Buffalo airport not only blew away any October record (6" in 1909,only 4 falls of 2" or more in 100 years in October), but was the 7th greatest snowfall ever at any time in Buffalo. Depths varied quite a bit, from a minimum of 2 to 10 inches in parts of Grand Island, to 24 inches in Depew and Alden. Even within the City of

Attachment: 33-Appendix-E-Risk-Assessment-Supp-Data-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Buffalo there was marked variation in total accumulations, ranging from 20 inches in the north, to 15 inches downtown, and 10 inches to the south.

- **March 4-7, 2008.** On March 4, general snow of four to six inches blanketed the entire region and was followed by several inches of sleet and up to a half inch of glaze from freezing rain. This system was followed on March 7 by a storm in which 21.6 inches of snow was measured at the Buffalo Airport - the greatest general (non-lake effect) snowfall in Buffalo in 24 years. Numerous automobile accidents were blamed on the slippery conditions and poor visibilities in falling and blowing snow.
- **December 1-2, 2010.** This lake-effect snow storm began on the afternoon of December 1 and continued through December 2, burying parts of Buffalo and surrounding towns. Suburban Depew recorded 42 inches while Buffalo neighborhoods south of downtown got 39 inches, according to the National Weather Service. Hundreds of motorists were stranded overnight when jackknifed tractor trailers on the NYS Thruway just east of Buffalo blocked traffic.
- **February 25, 2011.** A 30-mile stretch of the New York State Thruway between Hamburg and Dunkirk was closed due to multiple accidents. There were several reports of building collapses throughout the region from the weight of the snow which had built up throughout the snowy winter.
- **November 17-26, 2014**. Erie County was hardest hit by lake-effect snow during much of the week before Thanksgiving. The Buffalo southtowns were hardest hit with some areas receiving over 7 feet of snow. A 132 mile stretch of the New York State Thruway was shut down. Snowfall rates were recorded as high as six inches per hour. The extraordinary snow loads took their toll on homes and businesses.

In addition to the events listed by NCDC, the SHELDUS database lists a further 177 winter storm events affecting Erie County since January 1960 (of which all but 35 were recorded before 1993) to which slightly $45.7 million in property damages was attributed.

Worksheet #2 Evaluate Your Planning Team step 3

When gearing up for the plan evaluation, the planning team should reassess its composition and ask the following questions:	YES	NO
Have there been local staffing changes that would warrant inviting different members to the planning team?		
Comments/Proposed Action:		
Are there organizations that have been invaluable to the planning process or to project implementation that should be represented on the planning team?		
Comments/Proposed Action:		
Are there any representatives of essential organizations who have not fully participated in the planning and implementation of actions? If so, can someone else from this organization commit to the planning team?		
Comments/Proposed Action:		
Are there procedures (e.g., signing of MOAs, commenting on submitted progress reports, distributing meeting minutes, etc.) that can be done more efficiently?		
Comments/Proposed Action:		
Are there ways to gain more diverse and widespread cooperation?		
Comments/Proposed Action:		
Are there different or additional resources (financial, technical, and human) that are now available for mitigation planning?		
Comments/Proposed Action:		

If the planning team determines the answer to any of these questions is "yes," some changes may be necessary.

Worksheet #4 Revisit Your Risk Assessment step 4

Risk Assessment Steps	Questions	YES	NO	COMMENTS
Identify hazards	Are there new hazards that can affect your community?			
Profile hazard events	Are new historical records available?			
	Are additional maps or new hazard studies available?			
	Have chances of future events (along with their magnitude, extent, etc.) changed?			
	Have recent and future development in the community been checked for their effect on hazard areas?			
Inventory assets	Have inventories of existing structures in hazard areas been updated?			
	Is future land development accounted for in the inventories?			
	Are there any new special high-risk populations?			
Estimate losses	Have loss estimates been updated to account for recent changes?			

If you answered "Yes" to any of the above questions, review your data and update your risk assessment information accordingly.

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Worksheet #1 Progress Report step 2

Progress Report Period: October 1, 2003 (date) to December 31, 2003 (date)

Project Title: Raging River Views Park Flood Acquisition Project Project ID#: HVMP-2003-01

Responsible Agency: Hazardville Department of Planning

Address: 1909 Burnham Way

City/County: Hazardville, Emergency

Contact Person: Eunice Euclid Title: Grants Administrator

Phone #(s): (555) 555-8473 email address: eeuclid@town.hazardville.ny

List Supporting Agencies and Contacts:

Hazardville Department of Housing: Noah Hudson (555) 555-8465

Hazardville Habitat for Humanity: Carter Goodman (555) 555-9432

Total Project Cost: $360,000

Anticipated Cost Overrun/Underrun: $N/A

Date of Project Approval: July 21, 2003 Start date of the project: November 15, 2003

Anticipated completion date: Summer 2005

Description of the Project (include a description of each phase, if applicable, and the time frame for completing each phase):

Acquire and demolish 14 structures located at the Raging River Views Park. Work with Habitat for Humanity and the Department of Housing to construct new housing or rehabilitate existing housing for displaced low-income residents. The Department of Housing will also provide funds for temporary housing to displaced residents.

Milestones	Complete	Projected Date of Completion
Conduct surveys of ground and first-floor elevations	✓	
Obtain Notices of Intent by owners	✓	
Conduct structure appraisals	✓	
Send letters of offer to homeowners		1/31/04
Perform title work		3/30/04
Acquire structures		6/30/04
Begin construction of new housing or reconstruction of existing housing for relocated residents		6/30/04
Send payment for relocation to renters		9/30/04
Finalize contract for demolition		1/12/05
Demolish structures		4/26/05
Landscape open parcels		6/30/05

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Plan Goal(s)/Objective(s) Addressed:

Goal: Minimize losses to existing and future structures within hazard areas.

Objective: Reduce potential damages to the manufactured home park in the floodplain.

Indicator of Success (e.g., losses avoided as a result of the acquisition program):

In most cases, you will list losses avoided as the indicator. In cases where it is difficult to quantify the benefits in dollar amounts, you will use other indicators, such as the number of people who now know about mitigation or who are taking mitigation actions to reduce their vulnerability to hazards.

Losses Avoided. After a major flood (100-year), the Department of Economic Development will assist the Planning Department in calculating the losses avoided.

Status (Please check pertinent information and provide explanations for items with an asterisk. For completed or canceled projects, see Worksheet #2 — to complete a project evaluation):

Project Status

- ☑ Project on schedule
- ☐ Project completed
- ☐ Project delayed*

*explain: _____

- ☐ Project canceled

Project Cost Status

- ☑ Cost unchanged
- ☐ Cost overrun*

*explain: _____

- ☐ Cost underrun*

*explain: _____

Summary of progress on project for this report:

A. What was accomplished during this reporting period?

The Department of Planning contacted the owners of the properties vulnerable to floods to determine their willingness to sell their properties. Of the 14 property owners contacted, 10 agreed to have their homes acquired. An appraiser contracted by the Department of Planning estimated the value of the 10 properties.

B. What obstacles, problems, or delays did you encounter, if any?

The owners of four properties refused to sell. There has been some limited neighborhood opposition to various suggestions for the community open space created by the acquisitions.

C. How was each problem resolved?

The Department of Planning has proposed to the residents a design charrette to develop alternatives for the open space that would be created, with the understanding that no permanent structures can be constructed on the open parcels after acquisition and demolition has been completed. Recreational activities will be limited to passive uses such as trails and bike paths.

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Next Steps: What is/are the next step(s) to be accomplished over the next reporting period?

1. Send offer letters to homeowners.
2. Do title work.
3. Work with the Department of Housing and Habitat for Humanity to identify existing housing for rehabilitation and viable vacant parcels to construct new housing for the displaced residents.

Other comments:

None

Adapted from the North Carolina HMGP Progress Report Form at http://www.dem.dcc.state.nc.us/mitigation/document_index.htm.

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Worksheet #2 Evaluate Your Planning Team step 3

When gearing up for the plan evaluation, the planning team should reassess its composition and ask the following questions:	YES	NO
Have there been local staffing changes that would warrant inviting different members to the planning team?		✓
Comments/Proposed Action: NA		
Are there organizations that have been invaluable to the planning process or to project implementation that should be represented on the planning team?	✓	
Comments/Proposed Action: Hazardville Habitat for Humanity has been invaluable in assisting the relocation of former Raging River Views Park residents. The organization should be invited to participate in THORR.		
Are there any representatives of essential organizations who have not fully participated in the planning and implementation of actions? If so, can someone else from this organization commit to the planning team?	✓	
Comments/Proposed Action: It is essential that the Department of Public Works be represented at each meeting because so many mitigation actions involve them. However, representatives from the department have been unable to attend meetings consistently since the development of the plan. THORR will work with the departments director to find consistent, active representation.		
Are there procedures (e.g., signing of MOAs, commenting on submitted progress reports, distributing meeting minutes, etc.) that can be done more efficiently?	✓	
Comments/Proposed Action: Again, the Department of Public Works has been unable to provide timely progress reports of its mitigation actions. Administrative duties and paperwork have fallen through the cracks since the department has been assigned numerous new duties in Hazardville's mitigation efforts. Perhaps the department, in partnership with THORR, should approach the Town Council for funding for more department staff.		
Are there ways to gain more diverse and widespread cooperation?	✓	
Comments/Proposed Action: THORR members believe that better publicity about mitigation actions will garner more interest from the public, affected/interested organizations, and state agencies.		
Are there different or additional resources (financial, technical, and human) that are now available for mitigation planning?	✓	
Comments/Proposed Action: THORR has learned about new PDM funding. The state has asked that local jurisdictions submit applications for brick and mortar projects and risk assessments studies.		

If the planning team determines the answer to any of these questions is "yes," some changes may be necessary.

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Worksheet #3 Evaluate Your Project Results step 3

Project Name and Number:

Raging River Views Park Flood Acquisition Project (HVMP-2003-01)

Project Budget:

$360,000

Project Description:

Acquisition and demolition of 14 flood-prone structures

Associated Goal and Objective(s):

Goal: Minimize losses to existing and future structures within hazard areas

Objective: Reduce potential damages to the manufactured home park in the floodplain

Indicator of Success (e.g., losses avoided):

Losses avoided by acquisition and demolition of flood-prone structures

Town of Hazardville Composite Loss Map developed previously during risk assessment (see FEMA 386-2).

Was the action implemented? ☑ YES ☐ NO

IF NO

Why not?	YES	NO
Was there political support for the action?	☐	☐
Were enough funds available?	☐	☐
Were workloads equitably or realistically distributed?	☐	☐
Was new information discovered about the risks or community that made implementation difficult or no longer sensible?	☐	☐
Was the estimated time of implementation reasonable?	☐	☐
Were sufficient resources (for example staff and technical assistance) available?	☐	☐

IF YES

What were the results of the implemented action?

Of the 14 proposed properties, 10 were acquired. The benefit-cost ratio is 2.19, based on project benefits of $789,000 and costs of $360,274. Benefits are based on the net present value of the avoided damages over the project life. Furthermore, about 40 people are no longer in the path of a potential flood, making emergency rescue operations in that area less likely and evacuation easier.

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

	YES	NO
Were the outcomes as expected? If No, please explain:		✓
The project originally set out to acquire 14 properties. Four of the 14 owners did not want to participate in the buyout program.		
Did the results achieve the goal and objective(s)? Explain how:	✓	
Despite four properties still in harm's way, the objective has been largely met. See additional comments.		
Was the action cost-effective? Explain how or how not:	✓	
The FEMA Limited Data module was used to perform the benefit-cost analysis. Data for the analysis was collected from historical flood data and used as benchmarks in the before mitigation section of the analysis. The damages after mitigation section was left blank, due to the properties being permanently acquired, and the economic risk removed completely. The analysis resulted in a benefit-cost ratio of 2.19, with benefits totaling $789,000 for 10 properties.		
What were the losses avoided after having completed the project?		
Total avoided losses are $789,000 over the lifetime of the project (estimated at 100 years).		
If it was a structural project, how did it change the hazard profile?		
N/A		
Additional comments or other outcomes:		
The Planning Department has agreed to work with the remaining four homeowners in evaluating other flood-proofing options.		

Date: October 12, 2005

Prepared by: Hazardville Department of Economic Development
Hazardville Department of Planning

Attachment: 36-Appendix-H-Plan-Review-Tools-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

Worksheet #4 Revisit Your Risk Assessment step 4

Risk Assessment Steps	Questions	YES	NO	COMMENTS
Identify hazards	Are there new hazards that can affect your community?		✓	
Profile hazard events	Are new historical records available?		✓	
	Are additional maps or new hazard studies available?	✓		Recently completed maps and studies showing vulnerability of the new coastal development to erosion and tidal surge are available.
	Have chances of future events (along with their magnitude, extent, etc.) changed?		✓	
	Have recent and future development in the community been checked for their effect on hazard areas?	✓		
Inventory assets	Have inventories of existing structures in hazard areas been updated?	✓		
	Is future land development accounted for in the inventories?	✓		The Planning Department is preparing a coastal development plan to ensure that any future development is set back far enough to be outside the erosion zones and the coastal high hazard areas. Current and future road configurations will also be studied to ensure adequate evacuation times before hurricane events.
	Are there any new special high-risk populations?	✓		Coastal residents and business owners.
Estimate losses	Have loss estimates been updated to account for recent changes?	✓		

If you answered "Yes" to any of the above questions, review your data and update your risk assessment information accordingly.

Hazard Mitigation Plan

Erie County, New York

September 2021

Volume II

Prepared by:
Tetra Tech, Inc.
2000 Linglestown Road, Suite 203 | Harrisburg, PA 17110

SECTION 8. PLANNING PARTNERSHIP

This section describes the Erie County's Hazard Mitigation Plan (HMP) Planning Partnership, its responsibilities throughout the planning process, and the jurisdictional annexes developed as a result of the plan update efforts.

8.1 BACKGROUND

The Federal Emergency Management Agency (FEMA) encourages multi-jurisdictional planning for hazard mitigation. All participating jurisdictions must meet the requirements of Chapter 44 of the Code of Federal Regulations (44 CFR):

> *"Multi-jurisdictional plans (e.g., watershed plans) may be accepted, as appropriate, as long as each jurisdiction has participated in the process and has officially adopted the plan" [Section 201.6a(4)]*

For the Erie County HMP, a Planning Partnership was formed to leverage resources and to meet requirements for the federal Disaster Mitigation Action of 2000 (DMA) for as many eligible governments as possible. Members of the Planning Partnership consisted of representatives from each jurisdiction. The DMA defines a local government as follows:

Members of the planning partnership have the expertise to develop the plan and have their jurisdiction's authority to implement the mitigation strategy developed during the planning process. The planning partnership is responsible for developing and reviewing draft sections of the plan, creating the mitigation strategy for their jurisdiction, and adopting the final plan.

> *Any county, municipality, city, town, township, public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government; any Indian tribe or authorized tribal organization, or Alaska Native village or organization; and any rural community, unincorporated town or village, or other public entity.*

Each participating planning partner has prepared a jurisdictional annex to this plan. These annexes, as well as information on the process by which they were created, are contained in this volume.

8.2 INITIAL SOLICITATION AND LETTERS OF INTENT

Erie County solicited the participation of all municipalities in the county at the commencement of this project. All municipalities interested signed a Letter of Intent and/or a resolution committing their participation and resources to the development of the Erie County HMP (Appendix B). Table 8-1 lists the jurisdictions that elected to participate in the update process and have met the minimum requirements of participation as established by the county and the Steering Committee. Erie County and the municipalities indicated in Table 8-1 participated in the HMP update.

Table 8-1. Participating Jurisdictions in Erie County

8.2.1 Planning Partner Expectations

The Steering Committee developed the following list of planning partner expectations, which were confirmed at the kick-off meeting held on November 2, 2020 (see Appendix C [Meeting Documentation] for details):

- Complete administrative tasks:
  - Complete a letter of intent to participate and return to the Erie County Department of Homeland Security and Emergency Services.
  - Designate points of contact.
- Provide representation at Planning Partnership meetings.
- Provide information about jurisdictional assets (critical facilities, plans/ordinances, hazard events/damages, new development, etc.) as requested.
- Support public outreach efforts within the jurisdictions, including posting of notices and plan links on websites and local media sources, advertising and supporting public meetings, and supporting outreach to National Flood Insurance Program (NFIP) repetitive loss and severe repetitive loss property owners, where applicable.
- Solicit and encourage the participation of regional agencies, a range of stakeholders, and citizens in the HMP development process.
- Assist with the identification of stakeholders within the jurisdiction that should be informed and potentially involved with the planning process.
- Prepare and submit a jurisdictional annex:
  - Attend mitigation workshop.
  - Perform a capability assessment.
  - Review the risk assessment.
  - Involve local NFIP Floodplain Administrator in the planning process and have them complete the NFIP portion of the annex.
  - Review the 201 mitigation strategies and provide a status of each.
  - Identify jurisdiction-specific mitigation strategies to address each of the natural hazards posing a risk to the jurisdiction.
- Review draft plan sections when requested and provide comments and input as appropriate.
- Ensure the HMP update meets the requirements of the DMA 2000 and FEMA and New York State Division of Homeland Security and Emergency Services (NYS DHSES) guidance.
- Adopt the plan by resolution of local governing body after FEMA conditional approval.
- Provide information regarding progress on identified initiatives as requested by the County Hazard Mitigation Planning Coordinator.
- Participate, as able, in additional opportunities:
  - Attend municipal support meetings.

Attachment: 39-Section-8-Planning-Partnership-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

- Participate in and advertise the public review and comment period prior to adoption.

By adopting this plan, each planning partner also agrees to the plan implementation and maintenance protocol established in Volume I. As described in Volume I, Section 7 (Plan Maintenance), it is intended that the Planning Partnership remain active beyond the regulatory update to support plan maintenance. Regarding the composition of the Steering Committee and Planning Partnership, it is recognized that individual commitments change over time, and it shall be the responsibility of each jurisdiction and its representatives to inform the HMP Coordinator of any changes in representation.

8.2.2 Jurisdictional Annex Preparation Process

As stated in the 2017 New York State Hazard Mitigation Planning Standards, jurisdictional annexes provide a unique, stand-alone guide to mitigation planning for each jurisdiction. The Erie County HMP Update is organized so that there is an annex for Erie County and for every jurisdiction within the county's borders. Section 9 (Jurisdictional Annexes) includes an annex for each jurisdiction in Erie County, including those that did not fully participate.

During the Erie County HMP planning process, the nation, the State of New York, and Erie County were facing the COVID-19 pandemic. The COVID-19 pandemic was declared a major disaster on March 20, 2020 (DR-4480). The Governor issued a stay-at-home Executive Order beginning March 22, 2020, which remained in effect the duration of the planning process. With the stay-at-home orders in place, all meetings during the planning process were held virtually.

Annex Development

In order to facilitate update of the County and Jurisdictional Annexes, data from the 2015 Erie County HMP annexes was transferred to the new annex format, which was developed to meet federal and state criteria. Clear instructions were provided to the county and municipality. These instructions provided a basis to address the following:

- Document changes in capabilities and vulnerabilities.
- Provide a current status of the 2015 HMP mitigation strategy.
- Develop a new mitigation strategy to address identified issues and to increase community resiliency.

The county invited all municipalities to participate in a municipal kick-off meeting held on November 18 and 19, 2020, to provide an overview of the planning process. Subsequently, each partner was asked to participate in one of six municipal informational meetings held in January and February 2021, during which key elements of the worksheets were discussed and subsequently completed by the appropriate jurisdictional personnel for each worksheet. The worksheets were collected, and the information was incorporated into each jurisdictional annex. In the event additional information was needed, the jurisdictional point of contact was contacted to provide more input into their annex.

A mitigation workshop was held on June 9, 2021, to provide an overview of developing a strong mitigation strategy. In preparation for this workshop, the consultant provided a consolidated list of problem areas/vulnerabilities identified during the planning process and feedback from the citizen survey to support the development of relevant projects to form the mitigation strategy.

Municipal Support Meetings

In addition to the municipal kick-off meeting, municipal support meetings were held on January 21, 22, 25, 26, and February 2, 2021. At these support meetings, the consultant worked with the Planning Partnership members to discuss the needs for their jurisdictional annexes. This included but was not limited to the following:

Attachment: 39-Section-8-Planning-Partnership-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

- Major incidents and their impacts
- Problem areas
- Flooding concerns
- Projects completed since the last HMP
- Questions on worksheets
    - Evaluation of Identified Hazards of Concern
    - Capability Assessment and Integration
    - NFIP Floodplain Administrator Questionnaire
    - Mitigation Action Progress
    - New Development and Building Permits
    - Shelters, Evacuation Routes, Temporary Housing, and Long-Term Housing
- Outreach conducted by jurisdictions

Hazard Ranking Exercise

The presentation of the risk assessment and risk ranking for each jurisdiction was done on May 19, 2021. At this meeting, the consultant presented the overall risk assessment for the hazards of concern. In addition, each planning partner was asked to review the ranked risk specific for its jurisdiction. Refer to Section 5.3 (Hazard Ranking) for the methodology of the hazard ranking process. The calculated ranking was presented to each jurisdiction, and they were asked to review the ranking and revise based on history of events, probability of occurrence, and the potential impact on people, property, and the economy. The objectives of this exercise were to familiarize the partnership with how to use the risk assessment as a tool to support other planning and hazard mitigation processes and to help prioritize types of mitigation actions that should be considered. Hazards that were ranked as "high" for each jurisdiction as a result of this exercise were considered to be priorities for identifying appropriate mitigation actions, although jurisdictions also identified actions to mitigate "medium" or "low" ranked hazards as appropriate.

Mitigation Strategy Workshop

Two mitigation strategy workshops were conducted the week of June 9, 2021, for all participating jurisdictions to support the development of focused problem statements based on the impacts of natural hazards in the county and their communities. These problem statements are intended to provide a detailed description of the problem area, including its impacts to the municipality/jurisdiction, past damages, loss of service, etc. An effort was made to include the street address of the property/project location, adjacent streets, water bodies, and well-known structures as well as a brief description of existing conditions (topography, terrain, hydrology) of the site. These problem statements form a bridge between the hazard risk assessment, which quantifies impacts to each community with the development of actionable mitigation strategies. In total, two workshops were held for Erie County's municipalities. The nearly 100% participation of the planning partners reflects the excellent outreach and dedication of the planning team. The county and the mitigation consultant team worked with each jurisdiction to identify clear, implementable mitigation actions as well as to further support the completion of the jurisdictional annexes. The NYS DHSES Action Worksheet template and instructions are provided in Appendix J (NYS DHSES Planning Standards).

Jurisdictional Annexes

While the jurisdictional annex format is designed to document and ensure local compliance with the DMA 2000 regulations, its greater purpose and function includes:

- Providing a locally relevant synthesis of the overall mitigation plan that can be readily presented, distributed, and maintained;

Attachment: 39-Section-8-Planning-Partnership-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

- Facilitating local understanding of the community's risk to natural hazards;
- Facilitating local understanding of the community's capabilities to manage natural hazard risk, including opportunities to improve those capabilities;
- Facilitating local understanding of the efforts the community has taken, and plans to take, to reduce their natural hazard risk;
- Facilitating the implementation of mitigation strategies, including the development of grant applications;
- Providing a framework by which the community can continue to capture relevant data and information for future plan updates.

Each jurisdiction's annex is intended to be a *living document* and will continue to be improved as resources permit. As such, its design is intended to promote and accommodate continued efforts to maintain the annex to be current and to improve the effectiveness of the annex as the key tool, reference, and guiding document by which the jurisdiction will implement hazard mitigation locally. The following provides a description of the various elements of the jurisdictional annex.

Section 9.X.1: Hazard Mitigation Planning Team: Identifies the hazard mitigation planning primary and alternate(s) contacts and Floodplain Administrators as identified by the jurisdiction. Provides details on which departments were involved throughout the development of the jurisdictional annex. Plans developed with the participation of the widest range of departments, stakeholders, and persons familiar with the jurisdiction should be involved in the development of the jurisdictional annexes. Further detail is provided in Section 3 (Planning Process), Section 9 (Jurisdictional Annexes), and Appendix B (Participation Matrix).

Section 9.X.2: Municipal Profile: Provides an overview and profile of the jurisdiction, including identification of areas of known and anticipated future development and the vulnerability of those areas to the hazards of concern.

Section 9.X.3: Jurisdictional Capability Assessment and Integration: Provides an inventory and evaluation of the jurisdiction's tools, mechanisms, and resources available to support hazard mitigation and natural hazard risk reduction. Within the municipal annexes, tables provide an inventory of the municipality's planning, regulatory, administrative, technical, and fiscal capabilities. Further, another table identifies the municipality's level of participation in state and federal programs designed to promote and incentivize local risk reduction efforts.

Section 9.X.4: National Flood Insurance Program (NFIP) Compliance: Summarizes jurisdiction-specific information related to managing and regulating the regulatory floodplain, including current and future compliance with the NFIP.

Section 9.X.5: Evacuation, Sheltering, Temporary Housing, and Permanent Housing: To meet the NYS DHSES requirement, jurisdictions provided evacuation routes, sheltering measures, and potential locations for temporary and permanent housing.

Section 9.X.6: Growth/Development Trends: Summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Section 9.X.7: Jurisdictional Risk Assessment: Provides information regarding each plan participant's vulnerability to the identified hazards. Full data and information on the hazards of concern, the methodology used to develop the vulnerability assessments, and the results of those assessments that serve as the basis of these local risk rankings may be found in Section 5.

Attachment: 39-Section-8-Planning-Partnership-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

- ***Hazard Area Extent and Location Map:*** Each annex includes a map (or series of maps) illustrating identified hazard zones and critical facilities. Further, these maps show areas of known or anticipated future development, as available and provided by the jurisdiction.
- ***Hazard Event History:*** Identifies hazard events that have caused significant impacts within the jurisdiction, including a summary characterization of those impacts identified by the jurisdiction.
- ***Hazard Ranking and Vulnerabilities:*** The Erie County HMP identifies and characterizes the broad range of hazards that pose risk to the entire planning area; however, each jurisdiction has differing degrees of risk exposure and vulnerability aside from the whole. The local risk ranking serves to identify each jurisdiction's degree of risk to each hazard as it pertains to them, supporting the appropriate selection and prioritization of initiatives that will reduce the highest levels of risk for each community.
- ***Critical Facilities:*** Identifies potential flood losses to critical facilities in the jurisdiction based on the flood vulnerability assessment process presented in Section 5.
- ***Identified Issues:*** Presents other specific hazard vulnerabilities as identified by the jurisdiction.

Section 9.X.8: Mitigation Strategy and Prioritization: Discusses and provides the status of past mitigation actions and status and describes proposed hazard mitigation initiatives and prioritization.

- ***Past Mitigation Initiative Status:*** Where applicable, a review of progress on the jurisdiction's prior mitigation strategy is presented, identifying the disposition of each prior action, project, or initiative in the jurisdiction's updated mitigation strategy. Other completed or ongoing mitigation activities that were not specifically part of a prior local mitigation strategy may be included in this subsection as well.
- ***Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy:*** Other completed or ongoing mitigation activities that were not specifically part of a prior local mitigation strategy may be included in this subsection as well.
- ***Proposed Hazard Mitigation Initiatives for the Plan Update:*** Table 9.X-11 presents the jurisdiction's updated mitigation strategy. As indicated, applicable mitigation actions, projects, and initiatives are further documented on an Action Worksheet, which provides details on the project identification, evaluation, prioritization, and implementation process. Table 9.X-12 provides a summary of the local mitigation strategy prioritization process discussed in Section 6.

Section 9.X.9: Action Worksheets: Provides each municipality with a more developed starting point for project implementation should funding become available. Following NYS DHSES HMP Standards Guide, each municipality developed a minimum of two action worksheets. Workshops and additional meetings (in person, by email, or by teleconference) to complete the jurisdictional annexes were held with the Steering and Planning Committees throughout the planning process. In summary, all participating communities and the county completed the planning partner expectations and annex preparation process. Details regarding these meetings are described further in Sections 3 (Planning Process) and 6 (Mitigation Strategy). Completed jurisdictional annexes are provided in Section 9 (Jurisdictional Annexes).

8.2.3 Coverage Under the Plan

Of the 44 planning partners, all fully met the participation requirements specified by the Steering Committee. All planning partners are included in this volume. Those that did not meet the requirements will not be able to seek FEMA or NYS DHSES approval at the time of plan submittal nor will they be eligible to obtain FEMA grant funding.

Table 8-2 lists the status of each jurisdiction as well as their status in this plan update. It is noted that participation in scheduled Planning Partnership meetings provides only a partial indication of the level of participation of each jurisdiction. Throughout the bulk of the process, all municipalities' resources were strained due to the Covid-19 pandemic. Due to this, the consultant provided support in the manner of numerous calls as well as virtual

Attachment: 39-Section-8-Planning-Partnership-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation

meetings to ensure each planning partner seeking approval for the HMP met the threshold for participation. Appendix B (Participation Matrix) and Appendix C (Meeting Documentation) provide details on participation and meeting attendance.

9.1 Erie County

This section presents the jurisdictional annex for Erie County. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the county participated in the planning process; an assessment of the county's risk and vulnerability; the different capabilities utilized in the county; and an action plan that will be implemented to achieve a more resilient community.

9.1.1 Hazard Mitigation Planning Team

Erie County followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many county departments, including Public Works, Homeland Security and Emergency Management and Environment and Planning. The Department of Homeland Security and Emergency Services represented the county on the Erie County Hazard Mitigation Plan Planning Partnership and Steering Committee and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.1-1. Hazard Mitigation Planning Team

Name/Title: Jon DePlanche, Senior Engineer, County Highway Department **Method of Participation:** Participated in a meeting and provided input in writing and on the phone	
Name/Title: Joanna Panasiewicz **Method of Participation:** Participated in meetings and completed capabilities information and information about identified hazards and risks	

9.1.2 Jurisdiction Profile

Please refer to Section 4, Volume I of this HMP for details on Erie County's population, location, climate, history, growth, and development.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.1.3 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. The jurisdictional annexes for each municipality summarize recent and expected future development trends, including major residential/commercial development and major infrastructure development. The Erie County Department of Environment & Planning leads the county's economic development efforts, oversees environmental compliance, collaborates on local and regional planning, provides digital mapping services, and provides wastewater treatment services in seven sewer districts across the county. The department also provides technical assistance to municipal boards, such as planning and zoning boards, as well as to municipalities updating their master plans or zoning.

9.1.4 Capability Assessment and Integration

Erie County performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

Areas where mitigation is currently integrated are summarized in this Capability Assessment. Erie County identified specific integration activities that will be incorporated into procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to Erie County. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.1-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible

Comment: This article establishes the county's Department of Homeland Security and Emergency Services					
Climate Change Ordinance	No	Yes	-	-	-
Comment: New York State Climate Leadership and Community Protection Act; NYS Department of Environmental Conservation					
Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Disaster Reconstruction Ordinance	No	No	-	-	-
Comment: None					
Other	Yes	No	LL6-2007, Green Buildings Act	Local	County Department of Public Works Erie County Department of Environment and Planning. And all local municipalities.
Comment: The Plan states that all major facility projects of Erie County shall be designed, constructed, and certified to at least the LEED silver standard. 2) Public buildings can be built and renovated using high-performance methods that save energy costs, preserve the environment, and make workers and students safer and more productive.					
Planning Documents					
Comprehensive Plan	Yes	No	Framework for Regional Growth	Erie & Niagara Counties	Erie County Department of Environment and Planning
Comment: Erie & Niagara Counties have partnered to develop the Framework for Regional Growth. As envisioned by County leaders, the Framework establishes basic policies and principles to guide the future growth and development of the Region. Specifically, the Framework provides: ▪ a vision for how we wish the region to grow and redevelop over the next 15 years. ▪ direction regarding growth and redevelopment matters to county decision-makers and other regional organizations linked to the two counties via funding, membership, or other relationships. ▪ information on the ways local governments, private sector, and non-profit actions and initiatives can reinforce the overall regional vision; and ▪ mechanisms to ensure that the goals, concepts, and recommendations of the Framework for Regional Growth are implemented in an efficient and accountable manner.					
Capital Improvement Plan	No	No	-	-	-
Comment: While the County does not have a capital improvement plan, the Department of Environment Planning plays a lead role in coordination and review of proposed capital projects. Department personnel review capital projects for consistency with the county's comprehensive plan and manage the environmental review process for capital projects. The Division of Sewerage Management has a separate asset management/capital improvement planning process for Erie County Sewer District facilities.					
Disaster Debris Management Plan	Yes	No	County Emergency Management Plan, 2018, Debris Management	-	-
Comment: The development of the New York State Comprehensive Emergency Management Plan (CEMP) is required under NYS Executive Law, Article 2B. The plan is developed and maintained by the New York State Office of Emergency Management and agencies that comprise the NYS Disaster Preparedness Commission (DPC). The CEMP is contained in three distinct, but interconnected volumes The CEMP contains information about debris management planning.					
Floodplain or Watershed Plan	Yes	No	Regional Niagara River/ Lake Erie Watershed Management Plan Phase 2 – June 2019 www.erie.gov/wmp	Erie County and regional counties	Developed by Erie County and the Lake Erie Watershed Protection Alliance and Buffalo Niagara Waterkeeper
Comment: The goal of the Watershed Management Plan is to outline a strategy to improve water quality within the Niagara River/Lake Erie watershed. Active participation and stakeholder involvement is key to developing a comprehensive and successful watershed-wide management plan. Stakeholders such as citizens, community groups, environmental organizations, businesses, agencies, and public officials will have opportunities as detailed in this plan, to shape the resulting findings and recommendations. The Plan is based upon water quality monitoring, modeling and assessments currently underway.					
Stormwater Plan	Yes	No	NYS SPDES Article 17 Title 8, Environmental Conservation Law Implementing Regulations. And County Stormwater Management Plan; November 2010	Local	Erie County Department of Environment and Planning and County Department of Public Works
Comment: The aim of the NYS State Pollution Discharge Elimination System is to protect water quality by reducing pollution.					
Open Space Plan	No	No	-	-	-
Comment: None					
Urban Water Management Plan	No	No	-	-	-
Comment: None					

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Habitat Conservation Plan	Yes	No	Niagara River Habitat Conservation Strategy – August 2021	County	Developed by Buffalo Niagara Waterkeeper
Comment: The purpose of the Strategy is to serve as blueprints for habitat restoration and conservation in both the Niagara River watershed and Niagara River Greenway. Both efforts followed the Conservation Action Planning (CAP) process like that utilized for the Lake Ontario Watershed, the Lake Erie Watershed, and the Niagara River Watershed in Canada.					
Economic Development Plan	Yes	Yes	Erie and Niagara County Framework for Regional Growth, 2017	Regional	Counties, all municipalities
Comment: The Erie County Comprehensive Economic Development Strategy (CEDS) is an extraction and combining of the primary findings and strategic directives of several recent planning studies and reports undertaken by County and City government, economic development organizations and area institutions.					
Shoreline Management Plan	No	No	-	-	-
Comment: None					
Community Wildfire Protection Plan	No	No	-	-	-
Comment: None					
Forest Management Plan	No	No	-	-	-
Comment: A Draft Plan was developed in 2003 but not adopted.					
Transportation Plan	Yes	No	New York State Transportation Improvement Plan Title 23 USC and 49 USC Chapter 53	State	County Department of Environment and Planning and Niagara Frontier Transportation Authority
Comment: The State Transportation Improvement Plan is a five-year capital plan for NYS Transportation facilities and includes certain projects in Erie County. The EC Department of Public Works collaborates with the Greater Buffalo Niagara Regional Transportation Council to develop county projects within the Transportation Improvement Program annually.					
Climate Change /Resilience/ Sustainability Plan	Yes	No	Erie County Climate Action and Sustainability Plan for internal operations, 2019	County	County Department of Environment and Planning
Comment: In addition to this plan the county is also developing a climate vulnerability assessment.					
Agriculture Plan	Yes	No	County Agricultural and Farmland Protection Plan, 2012	County	Erie County Department of Environment and Planning; Erie County Agricultural and Farmland Protection Board
Comment: The Plan sets as its key goal is to keep land in agricultural production by protecting farmland, helping a new generation to farm, and improving the viability of all farms in the County. Included in the Plan are: • an analysis of agriculture and development pressure in the County, • summaries of the various public meetings and individual interviews that were conducted as part of the process, Erie County Agricultural and Farmland Protection Plan pg 2 • summaries of other planning documents specific to agriculture that are currently being used in the County, • information about the "tools in the toolbox" that Erie County does, and can, use to support farms and protect farmland, and • a set of strategies with goals and recommended actions for implementation.					
Other	-	-	-	-	-
Comment: None					
Response/Recovery Planning					
Comprehensive Emergency Management Plan	Yes	Yes	County Emergency Management Plan, 2017	State/ county	Erie County Department of Homeland Security and Emergency Services
Comment: Each county in New York State is required to prepare a CEMP. The purpose of this plan is to minimize the effect of disasters by (i) identifying appropriate local measures to prevent disasters, (ii) developing mechanisms to coordinate the use of local resources and manpower for service during and after disasters and the delivery of services to aid citizens and reduce human suffering resulting from a disaster, and (iii) providing for recovery and redevelopment after disasters.					

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Strategic Recovery Planning Report	No	No	-	-	-
Comment: None					
Threat & Hazard Identification & Risk Assessment (THIRA)	No	No	-	-	-
Comment: See "Other" for information about the county's CEPA.					
Post-Disaster Recovery Plan	Yes	No	Comprehensive Emergency Management Plan Annex 16.0	State and county	Erie County Department of Homeland Security and Emergency Services
Comment: Post Disaster Recovery is a section of the CEMP					
Continuity of Operations Plan	Yes	No	County Continuity of Operations Plan, 2012	State and county	Erie County Department of Homeland Security and Emergency Services
Comment: The COOP states that all emergency response activities within the county will utilize the National Incident Management System (NIMS). This plan employs a MAC structure that includes a MACC coordinator, a Planning section (situation unit / resource unit / strategic foresight unit), a Logistics section, Joint Information Center (JIC) and agency/organization representatives.					
Public Health Plan	No	Yes	-	-	-
Comment: None					
Other	Yes	Yes	County Emergency Preparedness Assessment (CEPA)	State and county	Erie County Department of Homeland Security and Emergency Services
Comment: Every three years, NYS DHSES assesses the county's programs in a manner similar to how the state develops its THIRA.					

Development and Permitting Capability

The table below summarizes the capabilities of Erie County to oversee and track development.

Table 9.1-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	-
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	Buildout varies by municipality.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to Erie County and their current responsibilities which contribute to hazard mitigation.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.1-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	No	-
Zoning Board of Adjustments	No	-
Planning Department	Yes	Erie County Department of Environment and Planning leads the county's economic development efforts, oversees environmental compliance, collaborates on local and regional planning, provides digital mapping services, and provides wastewater treatment services in seven sewer districts across the county.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Division of Environmental Compliance Services develops and implements programs in partnership with a variety of stakeholders to address the pressing environmental needs and concerns of the region. The Division leads and supports a variety of programs in the county, including by not limited to climate action and sustainability, invasive species, public outreach, water quality, and watershed management.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Erie County Office of Economic Development is part of the Department of Environment and Planning. They focus on business development, attraction, retention, and expansion.
Public Works/Highway Department and Weight and Measures	Yes	The Department of Public Works provides safe, functional roadways and bridges for the traveling public. The department also provides leadership and management in the design, construction, maintenance, and management of county-owned facilities. The department is divided into four divisions: Buildings and Grounds, Highways, Weights and Measures, and Fleet. The Department regularly addresses stormwater, sewer and tree trimming needs to address hazard impacts.
Construction/Building/Code Enforcement Department	No	No
Emergency Management/Public Safety Department	Yes	The Department of Homeland Security and Emergency Services is responsible for the overall planning and response coordination for emergencies in the county and ensures the county is prepared to respond to, and recover from, all natural and man-made emergencies for our citizens, employers, and visitors.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	ECDHSES manages the warning system, to include NY-Alert, Ready Erie app, IPAWS, NAWAS
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Department of Public Works provides safe, functional roadways and bridges for the traveling public. The department also provides leadership and management in the design, construction, maintenance, and management of county-owned facilities. The Highway Division is responsible for the engineering and inspection of over a thousand miles of roadways. The Division is currently working on several projects including culvert repairs and replacements, roadway extensions, roadway stabilizations and bridge replacements.
Mutual aid agreements	Yes	The Department of Homeland Security and Emergency Services maintains a mutual aid plan and an Emergency Managers Mutual Aid structure.
Other	No	-
Technical/Staffing Capability		

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planners or engineers with knowledge of land development and land management practices	Yes	The County Department of Environment and Planning leads the County's economic development efforts, oversees environmental compliance, collaborates on local and regional planning, provides digital mapping services, and provides wastewater treatment services in seven sewer districts across the county.
Engineers or professionals trained in building or infrastructure construction practices	Yes	The Division of Buildings and Grounds – designs, constructs, maintains, and manages county-owned facilities. The Division of Sewerage Management designs, constructs, maintains, and manages Erie County Sewer District facilities. Division of Highways designs, constructs and maintains county owned transportation assets.
Planners or engineers with an understanding of natural hazards	Yes	County Department of Public Works and County Department of Environment and Planning
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	County Department of Environment and Planning
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	Yes	The county's Emergency Manager is the Deputy Commissioner of Preparedness and Homeland Security
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	The County Department of Environment and Planning staffs a Compliance Specialist, a Hazardous Waste Coordinator, a Sustainability Coordinator, and a Watershed Protection Coordinator

Fiscal Capability

The table below summarizes financial resources available to Erie County.

Table 9.1-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	Yes (sewer)
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	No
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	EPA Great Lakes Restoration Grants, NYS CFA grants for infrastructure, nonpoint source pollution and conservation.

Education and Outreach Capability

The table below summarizes the education and outreach resources available to Erie County.

Table 9.1-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	Yes	The Office of GIS (EDDEP) and the Department of Information and Support Services
Hazard mitigation information available on your website	Yes	The Department of Homeland Security and Emergency Services has information about hazard mitigation and the HMP update with links to the HMP project website. The main county website has news and announcements on the main page.
Social media for hazard mitigation education and outreach	No	The county employs the following social media platforms to distribute hazard mitigation related information; Facebook, Linked In, Instagram, Twitter and YouTube
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Erie County Environmental Management Council, Lake Erie Watershed Protection Alliance, County Agricultural and Farmland Protection Board, WNY Stormwater Coalition, Solid Waste Management Boards
Other programs already in place that could be used to communicate hazard-related information	Yes	Community Climate Change Task Force, Erie County Hazardous Waste Program, Food Policy Council of Buffalo and Erie County.
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to Erie County.

Table 9.1-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	Yes	Bronze	9/26/2019
Storm Ready Certification	Yes	-	7-13-2016
Fire wise Communities classification	No	-	-
Other	No	-	-

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.1-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.1.5 National Flood Insurance Program (NFIP) Compliance

Management and regulation of the regulatory floodplains are done at the local level. Refer to the individual jurisdictional annexes for details on the NFIP for each municipality.

9.1.6 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

Erie County has an Evacuation Annex 2019 that directs evacuation procedures countywide and provides guidance on operations and responsibilities for evacuations when necessary.

Sheltering

Erie County has identified the following designated emergency shelters within the county.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.1-9. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None Identified. The County will collaborate with municipalities to identify potential emergency shelters, per Proposed Action # 009							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. Erie County has identified the following sites suitable for placing temporary housing units.

Table 9.1-10. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The County will collaborate with municipalities to identify potential temporary housing locations, Proposed Action # 010					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. Erie County has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.1-11. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The County will collaborate with municipalities to identify potential temporary housing locations, Proposed Action # 009					

9.1.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for Erie County's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which Erie County has significant exposure. The maps also show the location of potential new development, where available. These maps are included in the respective Hazard Profiles.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the County and its municipalities. The County's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. For details of hazard events that impacted the County, refer to Volume I, Section 5 of this plan.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes Erie County's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for Erie County. Erie County has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the county indicated agreement with the results as shown below.

Table 9.1-12. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.1-13. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Springville Dam	County owned dam	Yes	Yes	2022-Erie County-002

Source: XXXX

Identified Issues

After review of Erie County's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, Erie County has identified the following vulnerabilities within their community:

- Municipalities are not generally participating in the Community Rating System.
- The Springville dam is county owned and is designated a High Hazard Dam. The county assumed ownership and converted the parcel into a park. The county regularly reports to NYSDEC that the dam is serviceable.
- The Erie County Court building is vulnerable to wind damage.
- The Erie County Correctional Facility parking lots are subject to flooding.
- Coastal erosion is causing damage to lakeside structures
- Ellicott Creek is eroding streambank/road embankment and endangering road which is a main access route to Heim Elementary School, Beechwood Continuing Care Facility, and Getzville Fire Dept.
- Parking lots at the Erie County Correctional Facility are in the floodplain and sometimes are covered with water.
- Several streams throughout the county are eroding.
- Residents living along coastal areas need more information about the hazards.
- The county is not able to identify shelters and temporary/permanent housing locations.
- There are approximately 20 pump stations that lack a backup redundant power source and backup power for cooling centers should be considered.

9.1.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.1-14. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Road repair/ culvert reconstruction – various locations County-wide	Flooding	Not Identified	DPW	Ongoing Capability	Cost		1. Discontinue 2. 3. This is a continuing item across the county and should be removed from this list. Per EC DPW
						Level of Protection		
						Damages Avoided; Evidence of Success		
2	Debris Removal from Creeks & Streams – various locations County-wide	Flooding	Not Identified	DPW	Ongoing Capability	Cost		1. Discontinue 2. 3. This is a continuing item across the county and should be removed from this list. Per EC DPW
						Level of Protection		
						Damages Avoided; Evidence of Success		
3	NOAA Storm Watcher and Storm Ready Programs	Nnatural events	Not Identified	Emergency Services	Ongoing Capability	Cost		1. Discontinue 2. 3. This is a Continuing Item with 3-year renewal Skywarn Spotter Trainings are conducted yearly
						Level of Protection		
						Damages Avoided; Evidence of Success		
4	Tree removal & trimming along various County roads to prevent power outages and road closures.	Severe storms, tornadoes, winter storms, high winds, ice storms	Not Identified	DPW	Ongoing Capability	Cost		1. Discontinue 2. 3. This is a continuing item across the county and should be removed from this list. Per EC DPW
						Level of Protection		
						Damages Avoided; Evidence of Success		
5	Replace & upgrade storm drainage system along various County roads to reduce flood risks.	Flooding	Property Damage	DPW	Ongoing Capability	Cost		1. Discontinue 2. 3. This is a continuing item across the county and should be removed from this list. Per EC DPW
						Level of Protection		
						Damages Avoided; Evidence of Success		

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

Erie County did not identify specific mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Proposed Hazard Mitigation Initiatives for the HMP Update

Erie County participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.1-15. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	-	-	X	-	-	-	-	-	X
Cyber Attack	-	-	-	X	-	-	-	-	-	X
Earthquake	-	-	-	X	-	-	-	-	-	X
Expansive Soils	-	-	-	X	-	-	-	-	-	X
Extreme Temperature	-	-	-	X	-	-	-	-	-	X
Flood	X	X	-	X	X	X	X	X	-	X
Hazardous Materials	-	-	-	X	-	-	-	-	-	X
Landslide	-	-	-	X	-	-	-	-	-	X
Pandemic	-	-	-	X	-	-	-	-	-	X
Severe Storm	-	X	-	X	-	X	X	-	-	X
Severe Winter Storm	-	X	-	X	-	X	X	-	-	X
Utility Failure	-	-	-	X	-	-	-	-	-	X
Wildfire	-	-	-	X	-	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.1-16 summarizes the comprehensive range of specific mitigation initiatives Erie County would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.1-17 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.1-16. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Erie County-001	Community Rating System	1	Flood	**Problem**: Communities are not generally participating in CRS. **Solution**: Encourage all municipalities to participate in the CRS, which will decrease flood insurance rates and protect more properties. The county will provide technical assistance to help interested jurisdictions move forward.	No	No	Within 5 years	County Emergency Management, County Department of Environment and Planning	Staff Time	Protect facilities from flooding damage	Municipal budget	High	LPR	PR
2022-Erie County-002	Protect Springville Dam to the 0.2% flood event	1	Flood	**Problem**: The Springville dam is county owned and is designated a High Hazard Dam. The county assumed ownership and converted the parcel into a park. The county must regularly report to NYSDEC that the dam is serviceable. **Solution**: The county will develop a feasibility study to determine the condition and required repairs of the dam. Once the study is completed, the county will implement a routine inspection, assessment, and maintenance of the dam.	Yes	No	1 year	County Emergency Management, Department of Public Works	TBD by feasibility assessment	Preserve dam functionality and properties downstream from damage	BRIC and High Hazard Potential Dam Program	High	LPR, SIP	PP, PR

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Erie County-003	Manage Streambank erosion and flooding	1	Flood, Severe Storm	**Problem**: Ellicott Creek eroding streambank/road embankment endangering access to Heim Elementary School, Beechwood Continuing Care Facility, and Getzville Fire Department. **Solution**: County Public Works Department will assess the danger posed to the facilities. The DPW will then implement erosion control measures.	Yes	No	Within 1 year	County DPW	$1,200,000	Ensure continued access to these important facilities	Municipal budget	High	EAP	PR
2022-Erie County-004	Erie County Correctional Facility	1	Flood	**Problem**: Several buildings and parking lots of the prison are in the 0.2% annual chance flood area and susceptible to flood damages. **Solution**: The County Sheriff and Public Works Department will complete a study to determine mitigation options to alleviate flooding in this area. Once projects are identified, they will be implemented.	No	No	Within 3 years	County Sheriff and Public Works Department	TBD during design process	Ensure continued access to the Correctional facility	Municipal budget for study; HMGP and FMA for mitigation measures	High	LPR, SIP	PP
2022-Erie County-005	Protect Erie County Court building from wind damage	1	Severe Storm, Severe Winter Storm	**Problem**: The building's exterior cladding is vulnerable to high wind which could generate large pieces of flying debris. **Solution**: The Sheriff Department will determine and implement the optimal	No	No	Within 3 years	County Sheriff Department	TBD by engineering feasibility	Ensure continued access to the County Court	BRIC, HMGP, Municipal budget	High	SIP	PP

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
				wind damage protection measures.										
2022-Erie County-006	Provide/improve backup power to pumping stations and other sewer district facilities	1	Flood	**Problem:** There are approximately 20 county operated pump stations that lack backup redundant power source, with other pumping stations and facilities with older units requiring upgrades. In the event of a power outage, the locations are at risk of not being able to provide the proper services to the county. **Solution:** Develop and prioritize a list of pump stations to receive backup power or for improvements to existing backup systems. This will include identifying the type, size, and fuel source for each generator. Once identified, the county will begin purchasing and installing the generators.	Yes	No	Within 5 years	County Division of Sewerage Management	TBD by feasibility analysis	Ensure continued service from these critical facilities	HMGP, county budget	High	SIP	PP

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Erie County-007	Coastal Resilience Outreach	2	Flood, Severe Storm, Severe Winter Storm	**Problem:** Severe weather including precipitation and wind, coupled with high lake levels have caused severe coastal erosion and flooding of structures along the Lake Erie coastline, exposing these critical facilities to failure. **Solution:** Working with NY Sea Grant, convene with municipal representatives to complete a needs assessment to assess the current understanding of coastal processes, regulations, and programs/resources and develop a Story Map resource with information on natural processes, NFIP, permitting case studies/ examples, and flood mitigation project examples.	No	No	Within 2 years	Sea Grant, County Department of Homeland Security and Emergency Services	$50,000	Improve capacity of local stakeholders to implement hazard mitigation measures along the Lake Erie coastline	Sea Grant, county budget	High	EAP	PI
2022-Erie County-008	Identify Emergency Shelters and temporary/permanent housing locations	1	All Hazards	**Problem:** Erie County does not maintain a list of identified shelters, temporary housing locations, or permanent housing locations. In the event of an emergency or disaster, the county does not have identified facilities for residents to go to. Nor do they have a buildable land inventory to relocate displaced residents or structures in the event of repetitive losses or proximity to hazard areas (i.e., WUI).	Yes	No	Within 3 years	County Department of Homeland Security and Emergency Services	Staff Time	Provide emergency shelters and temporary/permanent locations	BRIC, HMGP, municipal budget	High	LPR, SIP	ES

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
				Solution: The Department of Homeland Security and Emergency Services will work with the necessary departments and agencies to develop and implement a program to identify sites suitable for shelters, temporary housing, and permanent housing. This will also include identifying ways to make the sites suitable to provide these services to the county.										

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Fire wise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.1-17. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low

9.1.9 Action Worksheets

The following action worksheets have been developed by Erie County to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Erie County Action Worksheet			
Project Name:	Protect Springville Dam to the 0.2% flood event		
Project Number:	2022-Erie County- 002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Springville dam is county owned and is designated a High Hazard Potential Dam. The county assumed ownership and converted the parcel into a park. The county must regularly report to NYSDEC that the dam is serviceable.		
Action or Project Intended for Implementation			
Description of the Solution:	The county will develop a feasibility study to determine the condition and required repairs of the dam. Once the study is completed, the county will implement a routine inspection, assessment, and maintenance of the dam.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	0.2% annual chance flood	**Estimated Benefits (losses avoided):**	Ensures continuity of operation of this Potential High Hazard dam
Useful Life:	50 years	**Goals Met:**	1
Estimated Cost:	TBD by feasibility assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	Within 1 year	**Potential Funding Sources:**	BRIC, High Hazard Potential dam
Responsible Organization:	County Emergency Management, Department of Public Works	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Remove dam	Very High	Loss of flood control services provide by the dam, including controlling intrusion from sea lamprey; infeasible
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Erie County Action Worksheet		
Project Name:	Protect Springville Dam to the 0.2% flood event	
Project Number:	2022-Erie County- 002	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will protect critical services provided by the High Hazard dam
Property Protection	1	Project will protect the important flood control services provided by the dam
Cost-Effectiveness	1	
Technical	0	
Political	1	
Legal	1	The county has legal authority to complete the project.
Fiscal	1	Project requires funding support
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	0	Flood
Timeline	1	1 year
Agency Champion	1	
Other Community Objectives	0	
Total	12	
Priority (High/Med/Low)	High	

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Erie County Action Worksheet			
Project Name:	Protect the Erie County Court House from wind damage		
Project Number:	2022-Erie County-005		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Storm, Severe Winter Storm		
Description of the Problem:	Original construction of the building has degrading materials has allowed water to get behind the building. The Building's cladding is vulnerable to high wind which could generate large pieces of flying debris.		
Action or Project Intended for Implementation			
Description of the Solution:	The Department of Public Works will determine and implement wind damage protection measures. The Department will then work with the Sheriff Department to ensure that protective measures are implemented.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect up to 100 mph winds	**Estimated Benefits (losses avoided):**	Ensures continuity of operations at the important county courthouse
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	TBD by feasibility assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	Within 3 years	**Potential Funding Sources:**	BRIC, HMGP, municipal budget
Responsible Organization:	County Sheriff	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Tear down the courthouse building	Very High	Loss of important services provided at the courthouse.
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 40-Section-9.1-Erie-County-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Erie County Action Worksheet		
Project Name:	Protect the Erie County Court House from wind damage

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

9.2 Erie County Water Authority

This section presents the jurisdictional annex for the Erie County Water Authority. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the Water Authority participated in the planning process; an assessment of the Erie County Water Authority's risk and vulnerability; the different capabilities utilized in the Water Authority; and an action plan that will be implemented to achieve more resilient operations.

9.2.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Erie County Water Authority's hazard mitigation plan primary and alternate points of contact. The Erie County Water Authority followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months from the Chief Security Officer and the Chief Operating Officer. The Chief Security Officer represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.2-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Matt Barrett, Chief Security Officer Address: 295 Main Street Buffalo, NY 14203 Phone Number: 716-685-8562 Email: mbarrett@ecwa.org	Name/Title: Russell Stoll, Chief Operating Officer Address: 295 Main Street Buffalo, NY 14203 Phone Number: 716-685-8276 Email: rstoll@ecwa.org

9.2.2 Water Authority Jurisdictional Profile

The Erie County Water Authority (ECWA) is a public benefit authority formed in 1949 to provide a potable water supply to the citizens of Erie County. The ECWA finances, contracts, constructs, and operates a water supply and distribution system for residents of Erie County. The Authority began operating in 1953. The Erie County Water Authority is responsible for the treatment and distribution of 25 billion gallons of safe, clean, potable water annually to more than 540,000 residential, commercial, and industrial customers in 36 municipalities located within Erie County and parts of Chautauqua, Cattaraugus, western Wyoming and western Genesee counties, as well as the territories of the Seneca Nation of Indians (Erie County Water Authority 2021). The Authority employs 40 staff in its headquarters and 190 staff throughout the districts and provides 24/7 operations.

ECWA operates two treatment plants and many pump stations and tank sites throughout Erie County. The water is distributed through 3,600 miles of pipe. ECWA both owns and leases sites throughout Erie County. The Authority owns and operates two treatment plants and many pump stations and tank sites, none of which are in a floodplain. Mitigation projects have included substantial security upgrades at many different locations. Seven

county sewer districts outside of the City of Buffalo serve most, but not all, the suburban area of Erie County. The Authority's Sewer Division is responsible for administering, operating, improving, and maintaining infrastructure within the sewer districts. The Sewer Division operates 6 treatment plants, 100 pumping stations and 1,100 miles of sewer. The sewer division coordinates with Emergency Services when they have events like prolonged outages.

ECWA prioritizes continuous service and has mitigated against power outages by installing backup power at the larger pumping stations. All such stations are equipped with remote telemetry that will alert ECWA to hook up a portable generator. All the Authority's sewer pumping stations are listed as priority facilities with utility providers National Grid and NYSEG. Other local towns/villages, including Buffalo, provide their own water and sewer systems (Erie County Water Authority 2021).

9.2.3 Jurisdictional Capability Assessment and Integration

The Erie County Water Authority performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 5 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.2.3). The Erie County Water Authority's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Erie County Water Authority. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.2-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible

Development and Permitting Capability

The table below summarizes the capabilities of the Erie County Water Authority to oversee and track development.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	ECWA does not issue building permits. Building permits are issued by local municipalities.	
Are permits tracked by hazard area? (For example, floodplain development permits.)		
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.		

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Erie County Water Authority and their current responsibilities which contribute to hazard mitigation.

Table 9.2-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	No	-
Zoning Board of Adjustments	No	-
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	No	-
Construction/Building/Code Enforcement Department	No	-
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	ECWA communicates with the public about warnings via the agency website, Facebook and Twitter
Maintenance programs to reduce hazard (stormwater maintenance, tree trimming, etc.)	Yes	ECWA performs regular trimming of trees that could impact important Authority facilities.
Mutual aid agreements	No	The ECWA is not party to any mutual aid agreements.
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	There are several staff with knowledge of land development, several of whom are engineers
Engineers or professionals trained in building or infrastructure construction practices	Yes	There are many Authority staff with experience with building or infrastructure practices.
Planners or engineers with an understanding of natural hazards	Yes	There are several Authority staff with an understanding of natural hazards.
Staff with expertise or training in benefit/cost analysis	No	-

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Professionals trained in conducting damage assessments	Yes	ECWA works closely with insurance agents to derive damage assessments.
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	ECWA staff includes GIS expertise and the Authority's assets are maintained in GIS data format.
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	No	-
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Erie County Water Authority.

Table 9.2-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community Development Block Grants (CDBG, CDBG-DR)	No
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas, or electric service	Yes, ECWA levies a commodity charge and an infrastructure charge that varies based on size of connection. There are also fees to maintain hydrants.
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Water Infrastructure Finance & Innovation Act

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Erie County Water Authority.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Matthew Barrett; ECWA Security Officer. The Authority contracts with E3 Communications to provide public information services.
Personnel skilled or trained in website development	Yes	Matthew Barrett; ECWA Security Officer. The Authority contracts with E3 Communications to provide public information services.
Hazard mitigation information available on your website	Yes	Matthew Barrett; ECWA Security Officer. The Authority contracts with E3 Communications to provide public information services, particularly regarding water quality and boil water advisories.
Social media for hazard mitigation education and outreach	Yes	Matthew Barrett; ECWA Security Officer. The Authority contracts with E3 Communications to provide public information services and makes use of Facebook and Twitter.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	ECWA is determining whether to provide reverse 9-1-1 service.
Warning systems for hazard events	Yes	Matthew Barrett; ECWA Security Officer, distributes service warnings via the Authority website, Facebook and Twitter.
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Erie County Water Authority.

Table 9.2-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	Not applicable, individual municipalities are responsible for their classifications in various programs		
Building Code Effectiveness Grading Schedule (BCEGS)			
Public Protection (ISO Fire Protection Classes 1 to 10)			
NYSDEC Climate Smart Community			
Storm Ready Certification			
Firewise Communities classification			
Other

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.2.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Not applicable, municipalities are responsible for floodplain administration

National Flood Insurance Program (NFIP) Summary

NFIP Compliance

Not applicable, municipalities are responsible for floodplain administration

9.2.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Evacuation Routes and Procedures

Not applicable, municipalities are responsible for determining evacuation routes and procedures

Sheltering

Not applicable, the Water Authority is not responsible for identifying or operating emergency shelters.

Table 9.2-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Not applicable, municipalities are responsible for identifying emergency shelters							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Erie County Water Authority is not responsible for identifying or operating emergency shelters.

Table 9.2-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Not applicable, municipalities are responsible for determining temporary housing locations.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Erie County Water Authority is not responsible for locating new permanent housing for displaced residents.

Table 9.2-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Not applicable, municipalities are responsible for determining permanent housing locations.					

9.2.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.2-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-13. Recent and Expected Future Development

9.2.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Erie County Water Authority's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the county and the ECWA's coverage area. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Erie County Water Authority has significant exposure. Hazard maps are shown in the respective hazard profiles in Section 5 (Risk Assessment). For security reasons, the Erie County Water Authority assets and infrastructure are not shown in greater detail in this annex.

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Erie County Water Authority's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.2-14 provides details regarding municipal-specific loss and damages the Water Authority experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the Water Authority did not report damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the Water Authority did not report damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the Water Authority did not report damages.
November 12, 2015	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
November 18, 2015	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
January 11, 2017	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
March 8, 2017	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the Water Authority did not report damages.
July 20, 2017	Tornado	No	Although the county was impacted, the Water Authority did not report damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the Water Authority did not report damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the Water Authority did not report damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the Water Authority did not report damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the Water Authority did not report damages.
October 6, 2018	Lightning	No	Although the county was impacted, the Water Authority did not report damages.
February 24, 2019	High Wind	No	Although the county was impacted, the Water Authority did not report damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the Water Authority did not report damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	No	Although the county was impacted, the Water Authority did not report damages.
October 31-November 1, 2019	High Wind DR-4472 NY	No	Although the county was impacted, the Water Authority did not report damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the Water Authority did not report damages.
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the Water Authority did not report damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the Water Authority did not report damages.
March 2020-Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Erie County Water Authority's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Erie County Water Authority. The Erie County Water Authority has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the Water Authority indicated agreement with the results of the risk ranking shown in Table 9.2-15.

Table 9.2-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Table 9.2-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
N/A – Information regarding the vulnerability of ECWA assets and infrastructure is not for public release.						

Identified Issues

After review of the Erie County Water Authority's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Erie County Water Authority has identified the following vulnerabilities within their community:

- Several ECWA facilities lack surveillance and security measures
- Wave action, compounded by lack of winter ice cover, has severely eroded the Lake Erie shoreline at the ECWA Sturgeon Point Water Treatment Plant.
- Cyber security shortfalls will be assessed to determine necessary upgrades in software and processes to prevent cyber attack on the ECWA water distribution system.
- The Water Authority lacks Reverse 9-1-1 capability
- ECWA has numerous facilities with backup generators in remote locations. Some of the access roads are substandard. Others become impassable due to debris and downed power lines during storms.

9.2.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Table 9.2-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)	1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 1. If discontinue, explain why.
No Projects were listed in the 2015 HMP for the ECWA							

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Erie County Water Authority did not identify any projects/activities that have been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Proposed Hazard Mitigation Initiatives for the HMP Update

The Erie County Water Authority participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.2-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	-	-	-	X	X	-	-	-	-
Cyber Security	X	X	-	-	X	X	-	-	-	X
Earthquake	-	-	-	-	X	X	-	-	-	-
Expansive Soils	-	-	-	-	X	X	-	-	-	-
Extreme Temperature				-	X	X	-	-	-	-
Flood	X	X	X	-	X	X	-	X	X	X
Hazardous Materials	-	-	-	-	X	X	-	-	-	-
Landslide	-	-	-	-	X	X	-	-	-	-
Pandemic	-	-	-	-	X	X	-	-	-	-
Severe Storm	-	X	-	-	X	X	-	-	X	-
Severe Winter Storm	-	X	-	-	X	X	-	-	X	-
Utility Failure	-	-	-	-	X	X	-	-	-	-
Wildfire	-	-	-	-	X	X	-	-	-	-

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.2-19 summarizes the comprehensive range of specific mitigation initiatives the Erie County Water Authority would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.2-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of

Table 9.2-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-ECWA-001	Erie County Water Authority surveillance and security enhancement	1	1	1	1	1	1	0	1	1	1	0	0	1	0	10	High
2022-ECWA-002	Erie County Water Authority – Sturgeon Point Water Treatment Plant Shoreline Stabilization	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022-ECWA-003	Critical roadway access to ECWA facilities with fuel powered generators	1	1	1	1	1	1	1	1	1	0	0	1	1	0	11	High
2022-ECWA-004	Cyber security assessment	1	1	1	1	1	1	0	1	1	1	0	1	1	0	11	High
2022-ECWA-005	Reverse 9-1-1 service	1	1	1	1	1	1	0	1	1	1	1	0	1	0	11	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.2.9 Action Worksheets

The following action worksheets have been developed by the Erie County Water Authority to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Action Worksheet			
Project Name:	Erie County Water Authority surveillance and security enhancement		
Project Number:	2022-ECWA-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Cyber Security		
Description of the Problem:	Several ECWA facilities lack adequate security measures, exposing them to cyber or other terrorist attack.		
Action or Project Intended for Implementation			
Description of the Solution:	ECWA staff will add to and update alarm monitoring and surveillance systems already in place at specified locations. Staff will install automated gates controlled by card readers to grant access at designated locations.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Ensure that facilities are protected by effective surveillance	**Estimated Benefits (losses avoided):**	Ensure that water flows uninterrupted to the public
Useful Life:	10 years	**Goals Met:**	1
Estimated Cost:	$475,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	3 years
Estimated Time Required for Project Implementation:	Within 3 years	**Potential Funding Sources:**	HMGP, BRIC, ECWA
Responsible Organization:	Erie County Water Authority	**Local Planning Mechanisms to be Used in Implementation if any:**	Finance, Planning
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Station Police at every ECWA facility	Very High	Not feasible for cost and operational reasons
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Evaluation and Prioritization		
Project Name:	Erie County Water Authority surveillance and security enhancement	
Project Number:	2022-ECWA-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Will secure facilities from cyber attack and ensure that water service continues as required to maintain life safety
Property Protection	1	Will protect ECWA assets from attack.
Cost-Effectiveness	1	For the benefits provided the project is cost effective
Technical	1	
Political	1	
Legal	1	
Fiscal	0	
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	0	Cyber Security
Timeline	0	Within 3 years
Agency Champion	1	Erie County Water Authority
Other Community Objectives	0	
Total	10	
Priority (High/Med/Low)	High	

Attachment: 41-Section-9.2-Erie-County-Water-Authority-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard

Action Worksheet			
Project Name:	Erie County Water Authority – Sturgeon Point Water Treatment Plant Shoreline Stabilization		
Project Number:	2022-ECWA-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Storm, Flood, Severe Winter Storm		
Description of the Problem:	Wave action, compounded by lack of winter ice cover, has severely eroded the Lake Erie shoreline at the ECWA Sturgeon Point Water Treatment Plant. The erosion threatens the integrity of the plant's critical outfall structure and the foundation supporting a United States Customs and Border Protection communication tower.		
Action or Project Intended for Implementation			
Description of the Solution:	A stabilization program will be implemented to protect the shoreline from further erosion and to maintain the integrity of the outfall and communication tower structures. It is anticipated the improvements required will include injection grouting below/behind the existing outfall structure and armor stone revetment of the currently unprotected shoreline including the area immediate to the communication tower.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	To fully stabilize shoreline and prevent further erosion	**Estimated Benefits (losses avoided):**	Continuity of water services
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	$500,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year
Estimated Time Required for Project Implementation:	Within 1 year	**Potential Funding Sources:**	BRIC, HMGP, WIFIA
Responsible Organization:	Erie County Water Authority (owner); NYSDEC and USACE (regulatory)	**Local Planning Mechanisms to be Used in Implementation if any:**	Planning, Finance
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Move the WTP to another location	Very expensive	Not feasible
Progress Report (for plan maintenance)

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.3 Village of Akron

This section presents the jurisdictional annex for the Village of Akron. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Akron's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.3.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Akron's hazard mitigation plan primary and alternate points of contact. The Village of Akron followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from village departments, including the Mayor's and the Code Enforcement Office. The Code Enforcement Officer represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.3-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Carl Patterson, Mayor Address: 21 Main Street Akron, NY 14001 Phone Number: 716-542-9636 Email: AkronMayor@akronvillage.us	Name/Title: Daniel Kowalik, Emergency Manager Address: 21 Main Street Akron, NY 14001 Phone Number: 716-913-9978 Email: dkowalik@townofnewstead.com
NFIP Floodplain Administrator	
Name/Title: Michael Borth, Code Enforcement Officer Address: 21 Main Street Akron, NY 14001 Phone Number: 716-225-3929 Email: CodeEnforcement@adkronvillage.us	
Additional Contributors	
Name/Title: Jon Cummings, Public Works Manager Method of Participation: Provided information on completed past mitigation measures	

9.3.2 Municipal Profile

The Village of Akron is located approximately 25 miles east of downtown Buffalo. Native Americans had a long residence in the Akron area; the Great Iroquois Indian Trail passed through the area. White settlers arrived around 1829 to Akron Falls, which were harnessed for waterpower. Akron became an incorporated village in 1849 and is entirely contained within the Town of Newstead (Town of Akron 2020). The village gradually absorbed the community of Fallkirk as it grew. In 1880, the population of Akron was approximately 1,050 persons.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Early industries in the village included lumbering, barrel making, blacksmithing, flour and cement milling, gypsum processing, and cigar making. The West Shore Railroad was extended to the village in 1884 and later Akron was chosen as the site for the Buffalo Arms plant. Akron Airport is a reliever airport to the Buffalo Airport. Perry's Ice Cream is a major ice cream manufacturer and distributor that is based in the village. Main Street is the commercial and civic center of the community. Blizzards in 1966 and 1977 were notoriously fierce (Wikipedia 2020).

According to the U.S. Census, the 2010 population for the Village of Akron was 2,868. The estimated 2019 population, 2,871 was a nearly zero percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.3 percent of the population is 5 years of age or younger and 19 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.3.3 Jurisdictional Capability Assessment and Integration

The Village of Akron performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.3.3). The Village of Akron's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Akron. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.3-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 71, Building Construction and Fire Prevention	Local	Building Department
Comment: Building Department enforcement of the Building Code increases hazard preparedness.					
Zoning Code	Yes	No	LL1-1971, Village of Akron – Chapter 165, 1971	Local	Building/Zoning, Mayor

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: § 165-35. L-C Land Conservation District. [Added 3-31-1975 by L.L. No. 3-1975] The Land Conservation District is hereby established primarily to allow Murder Creek to carry or store its maximum amount of water without restrictions, to prevent encroachments on its floodplains which would increase floodwater levels and to prevent the threat to health, safety, and property in the immediate area, as well as downstream.					
Subdivision Ordinance	Yes	No	LL1-2007, Chapter 142, Village of Akron subdivision, 2007	Local	Building/Zoning, Mayor
Comment: The purpose of street construction specifications is to detail the requirements as set forth briefly in § 142-5, Improvements, § 142-6C(4), Construction detail sheet, and other sections of Article I of this chapter prior to dedicating to the village streets, rights-of-way, etc., as directed in Article I of this chapter. Site plans must include Existing topography of the site and immediately adjacent property as revealed by contours or key elevations as may be required by the Planning Board and any proposed re-grading of the site, including water courses, wetlands, and flood plains with data sources; and Location of fire and other emergency zones.					
Stormwater Management Ordinance	Yes	Yes	Village Code Chapter 142-5, Stormwater	State and Local	Building Department
Comment: Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet. Uncontaminated industrial cooling water or unpolluted industrial process waters may be discharged on approval of the Superintendent and DEC to a storm sewer or natural outlet.Proactive management of stormwater will decrease flooding risk.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	Village of Akron Chapter 142, Street Construction	Local	Planning Board/Building Department
Comment: Growth Management can help steer new development away from hazards.					
Site Plan Review	Yes	No	Village of Akron Chapter 142-2,3,4,6	Local	Planning and Building Departments
Comment: Site plan review can help steer new development away from hazard exposure. The historical development of the Village has placed commercial and industrial zones in proximity and development requires detailed review. The following site plan provisions are intended to secure compliance with the requirements of the Village Code regarding site development and with accepted professional design practice for such site improvements as grading, drainage, means of access, signs, architectural features, screens, sidewalks, curbs, parking, landscaping, fences, driveways, location, and dimension of buildings in proposed single parcel development.					
Environmental Protection Ordinance	Yes	Yes	Village of Akron Chapter 142-3	Local	Building Department
Comment: Environmental review encompasses site plan review and includes assessment of hazard exposure					
Flood Damage Prevention Ordinance	Yes	Yes	LL1-2019, Chapter 82 Flood Damage Prevention2019 2019	Local	FPA
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters; D. Control filling, grading, dredging and other development which may increase erosion or flood damages; E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and F. Qualify and maintain for participation in the National Flood Insurance Program. BFE+2 feet for all construction in the SFHA (residential and non-residential).					

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Municipal Separate Storm Sewer System (MS4)	No	Yes	-	-	-.
Comment: None					
Emergency Management Ordinance	Yes	Yes	Village of Akron Chapter 21-7 Hazardous Materials Response Plan, Emergency response agency responsibilities and Chapter 11 Disaster Preparedness Plan	Local	Emergency Manager
Comment: Proactive emergency management will help provide safety for residents and property during hazard events. This disaster preparedness Ordinance is intended to set forth all necessary information pertaining to operating procedures, material and human resource availability and political organization and responsibility for the Village of Akron for use by the village officials during a declared emergency.					
Climate Change Ordinance	No	Yes	-	-	-
Comment: None					
Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Disaster Reconstruction Ordinance	No	No	-	-	-
Comment: None					
Other	No	-	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	No	Town of Newstead and Village of Akron Combined Comprehensive Plan	Local	Mayor, Village Board
Comment: The Plan seeks to establish a program to identify, prioritize and protect or preserve the locally and regionally important scenic and natural resources of the community. The Communities resources are to be promoted as part of a regional framework, such as the different watersheds that transect the communities. The Plan endorsed continued enforcement of erosion and sediment control measures.					
Capital Improvement Plan	Yes	No	Village of Akron Chapter 1-4, Chapter 165	Local	Planning/Zoning/Building
Comment: Mitigation projects can be regularly scheduled into the village CIP.					
Disaster Debris Management Plan	No	No		-	-
Comment: None					
Floodplain or Watershed Plan	Yes	No	Village of Akron Chapter 165-35	Federal, State, County, Local	Floodplain Management Building Department
Comment: Management of water flows over a watershed scale helps to mitigate damage from flooding.					
Stormwater Plan	Yes	Yes	Village of Akron, Chapter 165-10, 11, 12, 13, 27	Local	Planning/Zoning/Building
Comment: The Stormwater Plan will facilitate proactive management of stormwater and help to mitigate flood risk.					
Open Space Plan	No	No	-	-	-
Comment: None					
Urban Water Management Plan	No	No	-	-	-

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: None

Comment: None					
Public Health Plan	No	Yes	-	-	-
Comment: None					
Other	Yes	No	Village of Akron Chapter 21-7, Hazardous Materials Response Plan	Local	Village Emergency Manager
Comment: The Hazardous Materials Response Plan directs effective response to hazardous materials spills					

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Akron to oversee and track development.

Table 9.3-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning Board/Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Code Enforcement Officer
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	There are approximately 250 lots available for new home construction.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Akron and their current responsibilities which contribute to hazard mitigation.

Table 9.3-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	No	-
Mitigation Planning Committee	Yes	Planning and Zoning Board members are knowledgeable about natural hazards

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Public Works Department staff ensure safe passage over village roads and regularly maintain a variety of facilities.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement office provides effective administration of building code.
Emergency Management/Public Safety Department	Yes	Village Police Department staff coordinate emergency response
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Fire Siren, Social Media, Akron Central School Notification System
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Public Works Department staff trim tree branches and keep floodways clear.
Mutual aid agreements	Yes	Local, County, State
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Planning Board members closely review development proposals and consider the potential impact of hazard impacts
Engineers or professionals trained in building or infrastructure construction practices	Yes	Public Works Department staff understand the impact of hazard impacts upon highways and other infrastructure.
Planners or engineers with an understanding of natural hazards	Yes	Public Works Department staff understand the impact of hazard impacts upon highways and other infrastructure.
Staff with expertise or training in benefit/cost analysis	Yes	Consultant engineer
Professionals trained in conducting damage assessments	Yes	Code Enforcement Officer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Consultant engineer
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	Village Emergency Manager coordinates response during hazard events
Grant writer(s)	Yes	Consultant
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Village approved Engineers William. Schutt & Association /Clark Patterson Lee

Fiscal Capability

The table below summarizes financial resources available to the Village of Akron.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.3-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes, Green Space fees
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Akron.

Table 9.3-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Clerk
Personnel skilled or trained in website development	Yes	Village Clerk
Hazard mitigation information available on your website	Yes	Village Clerk
Social media for hazard mitigation education and outreach	Yes	Planning Board, Hazardous Mitigation Committee
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Planning Board, Hazardous Mitigation Committee
Other programs already in place that could be used to communicate hazard-related information	Yes	E-Plan, County Local Emergency Planning Committee
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Akron.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.3-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Pending	TBD	TBD
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	05-5Y	Sept 2016
NYSDEC Climate Smart Community	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.3-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.3.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael Borth, Code Enforcement Officer

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Akron.

Table 9.3-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Akron	1	4	$8,104	0	1

Source: FEMA 2020a and FEMA 2020b
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The village did not identify any areas that are prone to flooding. There are not any Risk MAP projects currently underway in the village. The village did not identify how many (if any) properties have been mitigated. The village flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

The Village of Akron does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Contact (CAC) was in October 2010. The Building Department and the Code Enforcement Officer are responsible for floodplain administration. There are no Certified Floodplain Managers on staff. The village does not have access to resources to determine possible future flooding conditions from climate change. The village stated that floodplain management staff need assistance or training now. The village applies the regulations of the Building Code when making Substantial Damage determinations. The village floodplain management program meets minimum requirements and offers NFIP administration services such as permit review and inspections, and public education about floodplain management practices and ordinances.

9.3.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Akron has identified the following routes and procedures to evacuate residents prior to and during an event.

- Route 93 - Starts at Route 5 going north thru the town and village up to the Niagara County line. This is a north-south route and is owned and plowed by NYSDOT.
- Hunts Corner Road starting at Route 93 west to the Town of Clarence line close to Salt Road. This is an east to west county route owned by Erie County & plowed by the Town of Newstead DPW.
- Route 5 From Genesee County line going east to the Town of Clarence line at Davison Road. This is an east to west route.
- North Millgrove Rd from Route 5 going south to Route 33 in the Town of Alden. This is a north to south route and is owned by the County Highway Department.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Notification will be given to residents through local media, radio, & TV stations or a message through the public-school Emergency Broadcast system on which routes will be open to use. The village will coordinate with the County Emergency Managers as appropriate.

Sheltering

The Village of Akron has identified the following designated emergency shelters within the village.

Table 9.3-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Akron Fire Hall	1 Main Street Akron N.Y. 14001	275	Yes	No	Yes	Basic First Aid	Food, Heat, Air Conditioning, . Sleeping Area

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Akron has identified the following sites suitable for placing temporary housing units.

Table 9.3-11. Temporary Housing Locations

Site Name	Site Address	Infrastructure / Utilities Available (water, electric, septic, etc.)	Capacity (number of sites)	Type	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Village Property	Eckerson Avenue & Clinton Street	Water, Electric.	15 Trailers on a site 20' x 50'	Open Mowed Field Off Edge of Street	Permits & Inspections
Village Property	43 East Avenue, Old DPW Site	Water, Electric.	25 Trailers on a site 20' x 50'	Open Stone Parking Lot	Permits & Inspections

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Akron has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.3-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The village will work with the county to identify potential permanent housing locations per Action # 2022-VAkron-008					

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.3.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.3-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.3-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

** Only location-specific hazard zones or vulnerabilities identified.*

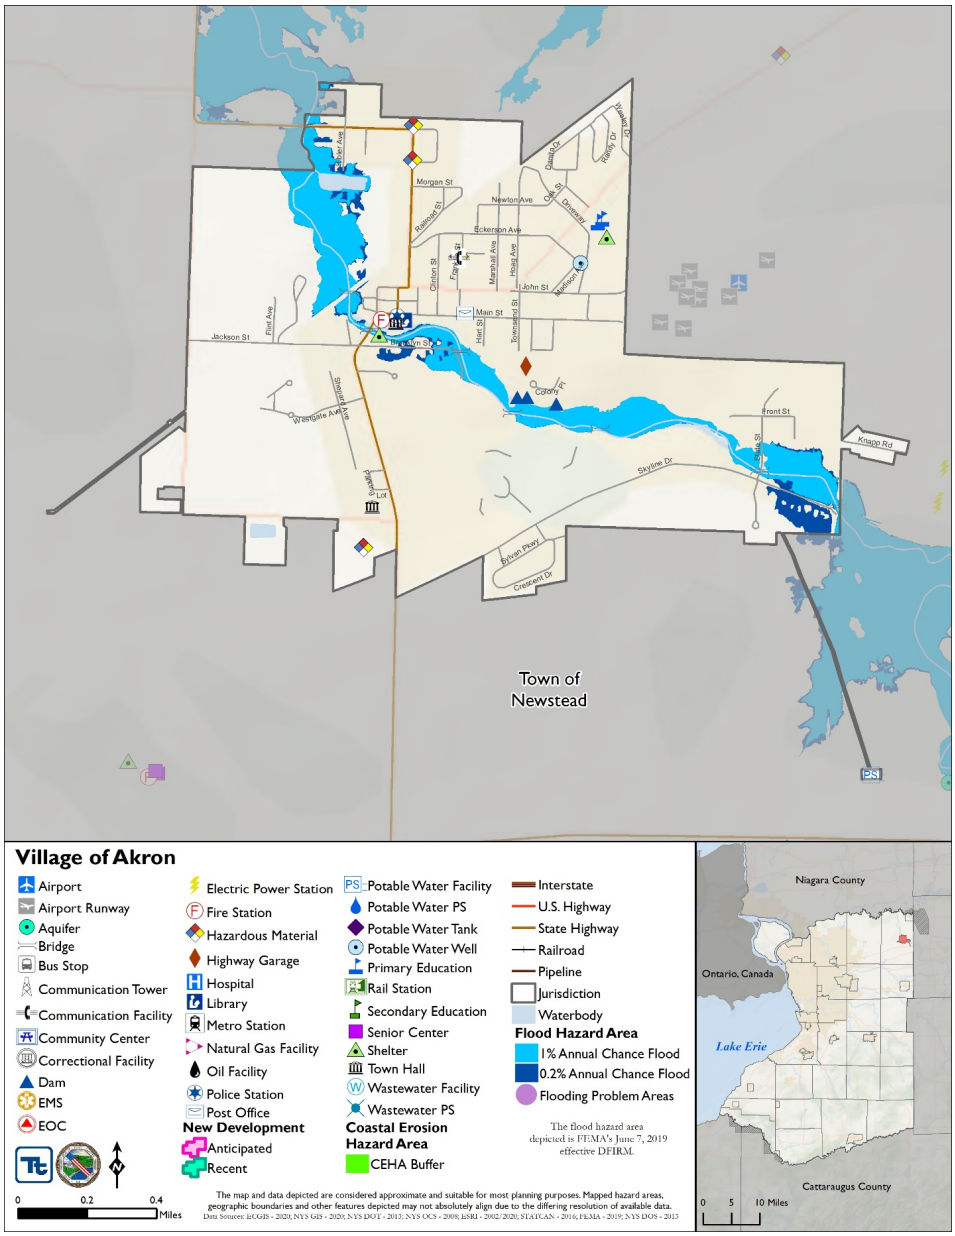
9.3.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Akron's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Akron has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.3-1. Village of Akron Hazard Area Extent and Location Map 1



Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Akron's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.3-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.3-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated ?	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	Although the county experienced damage from this hazard event, the village did not report any damage
August 11-15, 2015	Flash Flood	No	Although the county experienced damage from this hazard event, the village did not report any damage
October 28-29, 2015	High Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
November 6, 2015	Thunderstorm Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
November 12, 2015	High Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
November 18, 2015	High Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
January 11, 2017	High Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
March 8, 2017	High Wind	No	Yes, minor power outages, Trees, and power lines down, No major cost to the Village DPW
March 13, 2017	Winter Storm	No	Although the county experienced damage from this hazard event, the village did not report any damage
July 20, 2017	Tornado	No	Although the county experienced damage from this hazard event, the village did not report any damage
August 4, 2017	Thunderstorm Wind	No	Although the county experienced damage from this hazard event, the village did not report any damage
December 10-15, 2017	Lake-effect Snow	No	Although the county experienced damage from this hazard event, the village did not report any damage
December 24-29, 2017	Lake-effect Snow	No	Although the county experienced damage from this hazard event, the village did not report any damage
January 2, 2018	Blizzard	No	Although the county experienced damage from this hazard event, the village did not report any damage
October 6, 2018	Lightning	No	Although the county experienced damage from this hazard event, the village did not report any damage
February 24, 2019	High Wind	No	Yes, minor power outages, trees, and power lines down, no major cost to the Village DPW Gas Station roof blew off the canopy.
February 24, 2019	Lakeshore Flooding	No	Although the county experienced damage from this hazard event, the village did not report any damage
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county experienced damage from this hazard event, the village did not report any damage
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county experienced damage from this hazard event, the village did not report any damage
November 27, 2019	Lakeshore Flooding	No	Although the county experienced damage from this hazard event, the village did not report any damage

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated ?	Municipal Summary of Damages and Losses
January 12, 2020	Lakeshore Flooding	No	Although the county experienced damage from this hazard event, the village did not report any damage
January 18, 2020	Lakeshore Flooding	No	Although the county experienced damage from this hazard event, the village did not report any damage
March 2020-present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Erie County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Akron's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Akron. The Village of Akron has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk5of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated agreement with the derived hazard ranking as shown in the table below.

Table 9.3-15. Hazard Event History

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.3-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Akron Fire Hall	Shelter	Yes	No	2022-V Akron-003

Source: FEMA 2021

Identified Issues

After review of the Village of Akron's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Akron has identified the following vulnerabilities within their community:

- The village municipal facility lacks backup power. This facility houses emergency management functions and the Police Department conducts arrests and bookings in the building.
- Flooding can impact certain properties multiple times.
- The village should have stockpiles of sandbags and other flood response materials.
- Drainage infrastructure has become clogged.
- Floodplain managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.
- The village water facilities and water treatment plant are vulnerable to earthquake damage and flooding.
- Numerous storm water channels are blocked and create local flooding.
- The Village waterline is vulnerable to disruption that could affect the entire village.
- The Akron Fire Hall is in the SFHA, exposed to the flood hazard.
- A potable water facility on Crittendon Road is located within the earthquake hazard zone
- The village was not able to identify locations for permanent housing.
- Several homes on Brooklyn Street are threatened by erosion from Murder Creek.
- Village electrical facilities are vulnerable to cyber-attack or other malicious attack.
- The Wastewater Treatment Plant is vulnerable to flooding.

9.3.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.3-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Installation of backup generators at 2 key lift stations in Akron Village Wastewater System	Storm	Power Outage	Akron DPW	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Backup generator has been installed at the Leisure wood Lift Station. The Jackson Street lift station has an overflow system set up that alleviates the need for a backup generator.
	Installation of backup generator at Village of Akron/Town of Newstead Joint DPW Facility	Storm	Power Outage	Akron Village Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Back-up generator was hard wire installed when the building was built.
	Installation of protective dyke/berm system to protect Akron Village Wastewater Treatment Plant	Flooding	Not Identified	Akron DPW	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. 3.
	Capacity improvements/ rerouting of key storm drainage corridor in central part of village (Newton Ave/West Shore Drainage Corridor)	Flooding	Not Identified	Akron Village Board	Complete	Cost $10010.40 Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Village replaced drainage pipe in the central part of the village as a part of an addition project for Akron Rule in 2017 which help with the drainage flow coming from Bloomingdale Ave.
	Open storm water channels and culverts and remove debris from key drainage waterways within village to better accommodate storm water/flooding capacities	Flooding	Not Identified	Akron DPW	In Progress	Cost $9236.00 Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. Addressed by Proposed Mitigation Action #2022-V Akron-011 3.
	State St Bridge Improvements – Abutment	Flooding	Not Identified	Akron Village Board	In Progress	Cost Level of Protection		1. Include in 2020 HMP 2.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Strengthening, Improve Drainage Capacity					Damages Avoided; Evidence of Success		3. Still waiting on a grant for funding of the reconstruction of the bridge. It is only used at this point for pedestrian crossing.
	Hardening of primary Akron Village electric substation access (bollards, access, etc.)	Malicious Acts, Terrorism	Not Identified	Akron DPW	In Progress	Cost		1. Include in 2020 HMP 2. Addressed by Proposed Mitigation Action #2022-V Akron-012 3. Pending and Electric Substation upgrade within the next three years.
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Update/revise floodplain management ordinances to comply with latest FEMA Regulations	Flooding	Not Identified	Akron Village Board	Complete	Cost		1. Discontinue 2. 3. Code Enforcement Mike Borth attended the 2019 NYS Floodplain and Stormwater Manager Association Annual Conference in April 2019. Board Resolution approved on April 1, 2019 the Intermunicipal Floodplain Management Agreement with Erie County.
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Building Dept. and Code Enforcement	Complete	Cost		1. Discontinue 2. 3. Code Enforcement Mike Borth attended the 2019 NYS Floodplain and Stormwater Manager Association Annual Conference in April 2019. Board Resolution approved on April 1, 2019 the Intermunicipal Floodplain Management Agreement with Erie County.
						Level of Protection		
						Damages Avoided; Evidence of Success		

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Akron has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The Department of Public Works continues to maintain tree growth, removal and trimming limbs surrounding all electrical lines and utility poles in the Village of Akron.
- In 2019, Public Works completed a large project to update an aging part of the Electrical Distribution System.

1. Applied for CDBG Grant funds in 2020 to complete a waterline upgrade. This project would give redundancy in the water system in the Skyline Drive and Main Street areas. The DPW led a major Wastewater Treatment Plant upgrade combine the infrastructure work with the road reconstruction with Erie County DPW.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Akron participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (FEMA 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.3-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	X	-	X	X	X	-	-	-	X
Cyber Attack	-	X	-	X	X	X	-	-	-	X
Earthquake	-	X	-	X	X	X	-	-	-	X
Expansive Soils	-	X	-	X	X	X	-	-	-	X
Extreme Temperature	-	X	-	X	X	X	-	-	-	X
Flood	X	X	-	X	X	X	-	-	-	X
Hazardous Materials	-	X	-	X	X	X	-	-	-	X
Landslide	-	X	-	X	X	X	-	-	-	X
Pandemic	-	X	-	X	X	X	-	-	-	X
Severe Storm	-	X	-	X	X	X	-	-	-	X
Severe Winter Storm	-	X	-	X	X	X	-	-	-	X
Utility Failure	-	X	-	X	X	X	-	-	-	X
Wildfire	-	X	-	X	X	X	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.3-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Akron would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.3-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

OEM *Office of Emergency Management*

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Fire wise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.3.9 Action Worksheets

The following action worksheets have been developed by the Village of Akron to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Akron Action Worksheet			
Project Name:	Protect the village municipal building by installing a backup generator.		
Project Number:	2022-V Akron-001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards, Utility Failure		
Description of the Problem:	Backup power sources are necessary to maintain critical services for critical facilities. Village Hall lacks backup generator power. The Police Department is housed in the Hall and does bookings and arrests in the Hall. The facility houses emergency management functions.		
Action or Project Intended for Implementation			
Description of the Solution:	The Village Engineer will research what size generator is necessary to supply backup power to the Village Hall. The village will then install a backup power generator and necessary electrical components.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protection from power failures	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of critical facilities from the village facilities
Useful Life:	20 years	**Goals Met:**	1, 2
Estimated Cost:	TBD per engineer's feasibility assessment/$50,000 estimate	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Immediately after funding received
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	FEMA HMGP and PDM, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program
Responsible Organization:	Village DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install solar panels	$100,000	Weather dependent; need large amount of space for installation; expensive if repairs needed
	Install wind turbine	$100,000	Weather dependent; poses a threat to wildlife; expensive repairs if needed
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 42-Section-9.3-Akron-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect the village municipal building by installing a backup generator.	
Project Number:	2022-V Akron-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**

Town of Akron Action Worksheet			
Project Name:	Protect the Village Fire Hall to the 0.2% annual chance flood event		
Project Number:	2022-V Akron-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Akron Fire Hall is in the SFHA, exposed to the flood hazard.		
Action or Project Intended for Implementation			
Description of the Solution:	The Village Engineer will conduct a feasibility study to determine and implement best action to protect the Akron Village Fire Hall. The Fire Department will then implement these mitigation measures. The Fire Department will coordinate with the USACE regarding creekbank erosion.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the Fire Hall

9.4 Town of Alden

This section presents the jurisdictional annex for the Town of Alden. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Alden's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.4.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Alden's hazard mitigation plan primary and alternate points of contact. The Town of Alden followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: the supervisor and code enforcement official. The supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.4-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Dean Adamski, Town Supervisor Address: 3311 Wende Rd, Alden, NY 14004 Phone Number: (716) 937-6969 x3 Email: aldensuper@yahoo.com	Name/Title: Colleen Rogers, Deputy Supervisor Address: 3311 Wende Rd, Alden, NY 14004 Phone Number: (716) 937-6969 x3 Email: aldensuper@yahoo.com
NFIP Floodplain Administrator	
Name/Title: Christopher Snyder, Code Enforcement Officer Address: 3311 Wende Rd, Alden, NY 14004 Phone Number: (716) 937-6969 x4 Email: building@erie.gov	

9.4.2 Municipal Profile

The Town of Alden is located on the eastern border of Erie County and was formed from the larger Town of Clarence. The town incorporated in 1823. The Town of Newstead forms the town's northern boundary. The Town of Darien (Genesee County) lies to the east and the Town of Marilla and a portion of the Town of Bennington in Wyoming County form the town's southern border. Within the Town of Alden is the Village of Alden which incorporated in 1869. The town contains several unincorporated hamlets and remains a mostly rural community. The town's surface topography is nearly flat in northern portions while the south portion is gently undulating. Ellicott Creek and Cayuga Creek flow through the town.

The town and village were once famous for the "black water" baths. Mineral rich "black water" was discovered while drilling for natural gas in 1891. Many of the earliest patrons of these "black water baths" were immigrants

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

from Europe. According to the U.S. Census, the 2010 population for the Town of Alden was 8,260. The estimated 2019 population was 7,418, a 9 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 2.8 percent of the population is 5 years of age or younger and 16.8 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.4.3 Jurisdictional Capability Assessment and Integration

The Town of Alden performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.4.3). The Town of Alden's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Alden. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.4-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 109 (Building Code Administration)	Local	Building Department
Comment: This chapter is adopted in order to promote the health, safety and the general welfare of the inhabitants of the Town of Alden by regulating the occupancy and maintenance of homes.					
Zoning Code	Yes	No	Chapter 365 (Zoning)	Local	Building Department
Comment*: Goals: 1) Promote and protect to the fullest extent permissible the environment of Alden and its public health, safety, convenience, comfort, prosperity and the general welfare. 2) The purpose of the Wellhead Protection Area (WPA) is, in the interest of public health, safety and general welfare, to preserve the quality and quantity of groundwater resources in order to ensure a safe and healthy drinking water supply.* *Actions: 1) All individual lots shall be graded in a manner which will avoid surface water runoff on adjacent lots, divert water away from buildings, and prevent standing water and soil saturation detrimental to structures and lot use. E. Conform to the general storm drainage pattern for the area. 2) Site plan shall include a detailed description of the proposed development's impact on groundwater quality.*					
Subdivision Ordinance	Yes	No	Chapter 365 (Zoning), Article VI (Subdivision Clusters); Chapter	Local	Planning Board

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
			A374 (Land Subdivision Regulations)		
Comment: *This article of the zoning code is intended to promote imaginative, well-designed subdivisions which preserve open space, respect the physical qualities of the land and reduce overall development costs. It is municipal policy to consider the subdivision of land and the subsequent development of the subdivided plat as subject to the control of the municipality pursuant to the official Master Plan of the municipality for the orderly, planned, efficient, and economical development of the municipality.*					
Stormwater Management Ordinance	Yes	Yes	Chapter 300 (Stormwater Management and Erosion and Sediment Control)	Local	Town of Alden DPW
Comment: The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within the town. The objectives of this chapter include: • *Meet the requirements of minimum measures 4 and 5 of the SPDES General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-0-15-003, or as amended or revised;* • *Require land development activities to conform to the substantive requirements of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities GP-0-15-002, or as amended or revised* • *Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* • *Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* • *Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* • *Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety.*					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".					
Growth Management	No	-	-	-	-
Comment:					
Site Plan Review	Yes	No	Updated in 2018 365-68	Local	Town Engineer
Comment*: The purpose of these supplemental regulations is to promote the health, safety and general welfare of the residents of the Town, to provide standards for the safe provision of telecommunications consistent with applicable federal and state regulations and to protect the natural features and aesthetic character of the Town of Alden.*					
Environmental Protection Ordinance	Yes	Yes	2018 A374-8 Chapter 198.	Local	Town Engineer
Comment: *The preservation and improvement of the quality of the natural and man-made environment within the Town and Village of Alden, in the face of population growth, urbanization and technological change with their accompanying demands on natural resources, are found to be of increasing and vital importance to the health, welfare and economic well-being of present and future inhabitants and require forthright action by the governing body of the Town of Alden. It is recognized that the biologic integrity of the natural environment of which man is dependent for survival and the natural and functional beauty of our surroundings which condition the quality of our life experience cannot be protected without the full cooperation and participation of all of the people of the Town of Alden, working in partnership with local and state officials and with various public and private institutions, agencies and organizations. Establishment of the Commission for Conservation of the Environment is a necessary step in fostering unified action on environmental problems.*					

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 198 (Flood Damage Prevention)	Local	Town Building officer
Comment: The purpose of this chapter is to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: • *Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* • *Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* • *Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* • *Control filling, grading, dredging and other development which may increase erosion or flood damages;* • *Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* • *Qualify for and maintain participation in the National Flood Insurance Program.* *The Code Enforcement Officer is identified as the local administrator to administer and implement this chapter. Responsibilities include: permit application review; use of flood data; notifications; construction inspections; issuing certificate of compliance; and retaining information.* *Any development within the floodplain must apply for a floodplain development permit. The chapter requires all new development or substantial improvements of structures in the floodplain be elevated to BFE+2 feet.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Ch. 293-2 Updated 2018	Local	Town of Alden DPW
Comment: The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the Town of Alden through the regulation of nonstormwater discharges to the municipal separate storm sewer system (MS4) to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 in order to comply with requirements of the SPDES General Permit for Municipal Separate Storm Sewer Systems.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Alden to oversee and track development.

Table 9.4-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Tracked by floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Alden and their current responsibilities which contribute to hazard mitigation.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.4-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board. The Planning Board made up of local citizens appointed by the Alden Town Board. The Board serves in an advisory capacity to the Alden Town Board on matters concerning subdivisions of land, site use plans, home occupancy permits, special use permits and the rezoning of property.
Zoning Board	Yes	Zoning Board of Appeals conducts oversight of development. The Zoning Board of Appeals is a quasi-judicial body comprised of local citizens appointed by the Alden Town Board. The function of the Board is to hear appeals and grant relief from the strict application of the Town of Alden zoning regulations.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Economic Development Committee of Planning - The Planning Board made up of local citizens appointed by the Alden Town Board. The Board serves in an advisory capacity to the Alden Town Board on matters concerning subdivisions of land, site use plans, home occupancy permits, special use permits and the rezoning of property.
Public Works/Highway Department	Yes	Highway Department - The Highway Department is the most visible service agency in town government. From snowplowing in the winter, to street paving, brush removal, leaf collection, park maintenance and drainage projects during the remainder of the year, this department is deeply involved and committed to the lives of Alden residents.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement/ Building Officer
Emergency Management/Public Safety Department	Yes	Emergency Manager - The Alden Office of Emergency Management (OEM) provides emergency mitigation, preparedness, response and recovery services to the Town & Village of Alden. OEM leads the development and maintenance of the Comprehensive Emergency Management Plan, which encompasses all natural and man-made disasters and provides a basis for the development of programs and procedures to save lives and minimize disaster damage. Alden OEM manages the town & village Emergency Operations Center (EOC) during large scale disasters and events. During a disaster the EOC coordinates all response activities within the Town and Village, including Governmental Operations, Public Works/Highway, Fire/EMS. All of this is done through a Unified Command Network. Following a disaster or large-scale event OEM coordinates all recovery activities. Alden OEM actively participates in many preparedness programs such as, hazards analysis studies, maintaining a special needs registry, emergency planning for the Town & Village including all special events, training drills/exercises. OEM staff is also available to give presentations on emergency preparedness to your association, civic group, business or faith community.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Ready Erie
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	The Highway Department is responsible for snow clearing, street paving, removing brush, collecting leaves, and completing drainage projects.
Mutual aid agreements	Yes	Fire Department

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Planning Board - The Planning Board made up of local citizens appointed by the Alden Town Board. The Board serves in an advisory capacity to the Alden Town Board on matters concerning subdivisions of land, site use plans, home occupancy permits, special use permits and the rezoning of property.
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	Emergency Management Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Alden.

Table 9.4-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Alden.

Table 9.4-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	Yes	Clerk – as needed
Hazard mitigation information available on your website	Yes	Office of Emergency Management Page
Social media for hazard mitigation education and outreach	Yes	Facebook
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Alden

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.4-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	Moderate
Extreme Temperature	Strong
Flood	Strong
Hazardous Materials	Strong – plan in place
Landslide	Strong
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.4.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Christopher Snyder, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Alden.

Table 9.4-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Alden	9	19	$187,358	4	0

Source: *July and September, 2021 NFIP Data.*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

Southern portions of the town have in recent years previously experienced flooding due to ice melt. In general, the town is not prone to flooding. The town does not maintain a list of properties interested in flood mitigation but works with individual property owners as needed. There are no RiskMAP projects underway at this time. Building/ code inspector is designated to determine substantial damage determinations. No properties have been mitigated or elevated over the years and the town is thus not significantly prone to flooding. The flood maps are an accurate representation of existing floodplains.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The building/code inspector and town engineer are responsible for floodplain management. No certified floodplain managers are on staff within the town. The town has limited resources to address conditions to climate change. The town does not need any assistance for training or support at this time due to limited concerns around flooding in the community. The NFIP administrator reviews permits and conducts inspections as needed to reduce risk to building in hazard areas. The assessor and building inspector determine improvement value to determine substantial improvements. The town does not have any outstanding NFIP violations. The Town of Alden had a Community Assistance Call (CAC) on May 11, 2010 and a Community Assistance Visit (CAV) on September 11, 2020. The Flood Damage Prevention Ordinance is Chapter 198 local law #2 last updated in 2019.

9.4.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Alden has identified the following routes and procedures to evacuate residents prior to and during an event.

- Broadway St., Genesee Street, Walden Avenue

Sheltering

The Town of Alden has identified the following designated emergency shelters within the town.

Table 9.4-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Town Line Church	1159 Town Line Rd, Alden, NY	100	Unknown	Yes	Yes	First AID kit, AED	Food/ Beverage Service

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Alden has identified the following sites suitable for placing temporary housing units.

Table 9.4-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Town Hall Parking Lot	3311 Wende	50 acres	Parking Lot/ Open Space	All	None
Fire Company Parking Lot	Various Locations	100 acres	Parking Lot/ Open Space	All	None

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Alden has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.4-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Alden Town Park	Along Rt. 20	30	Park	All	Acquisition

9.4.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.4-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.4-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	6	0	6	0	5	0	8	0	7	0	12	0
Multi-Family	0	0	0	0	0	0	1	0	1	0	3	0
Other (commercial, mixed-use, etc.)	0	0	0	0	1	0	0	0	0	0	0	0
Total Permits Issued	**6**	**0**	**6**	**0**	**6**	**0**	**9**	**0**	**8**	**0**	**15**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None identified					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.4.7 Jurisdictional Risk Assessment

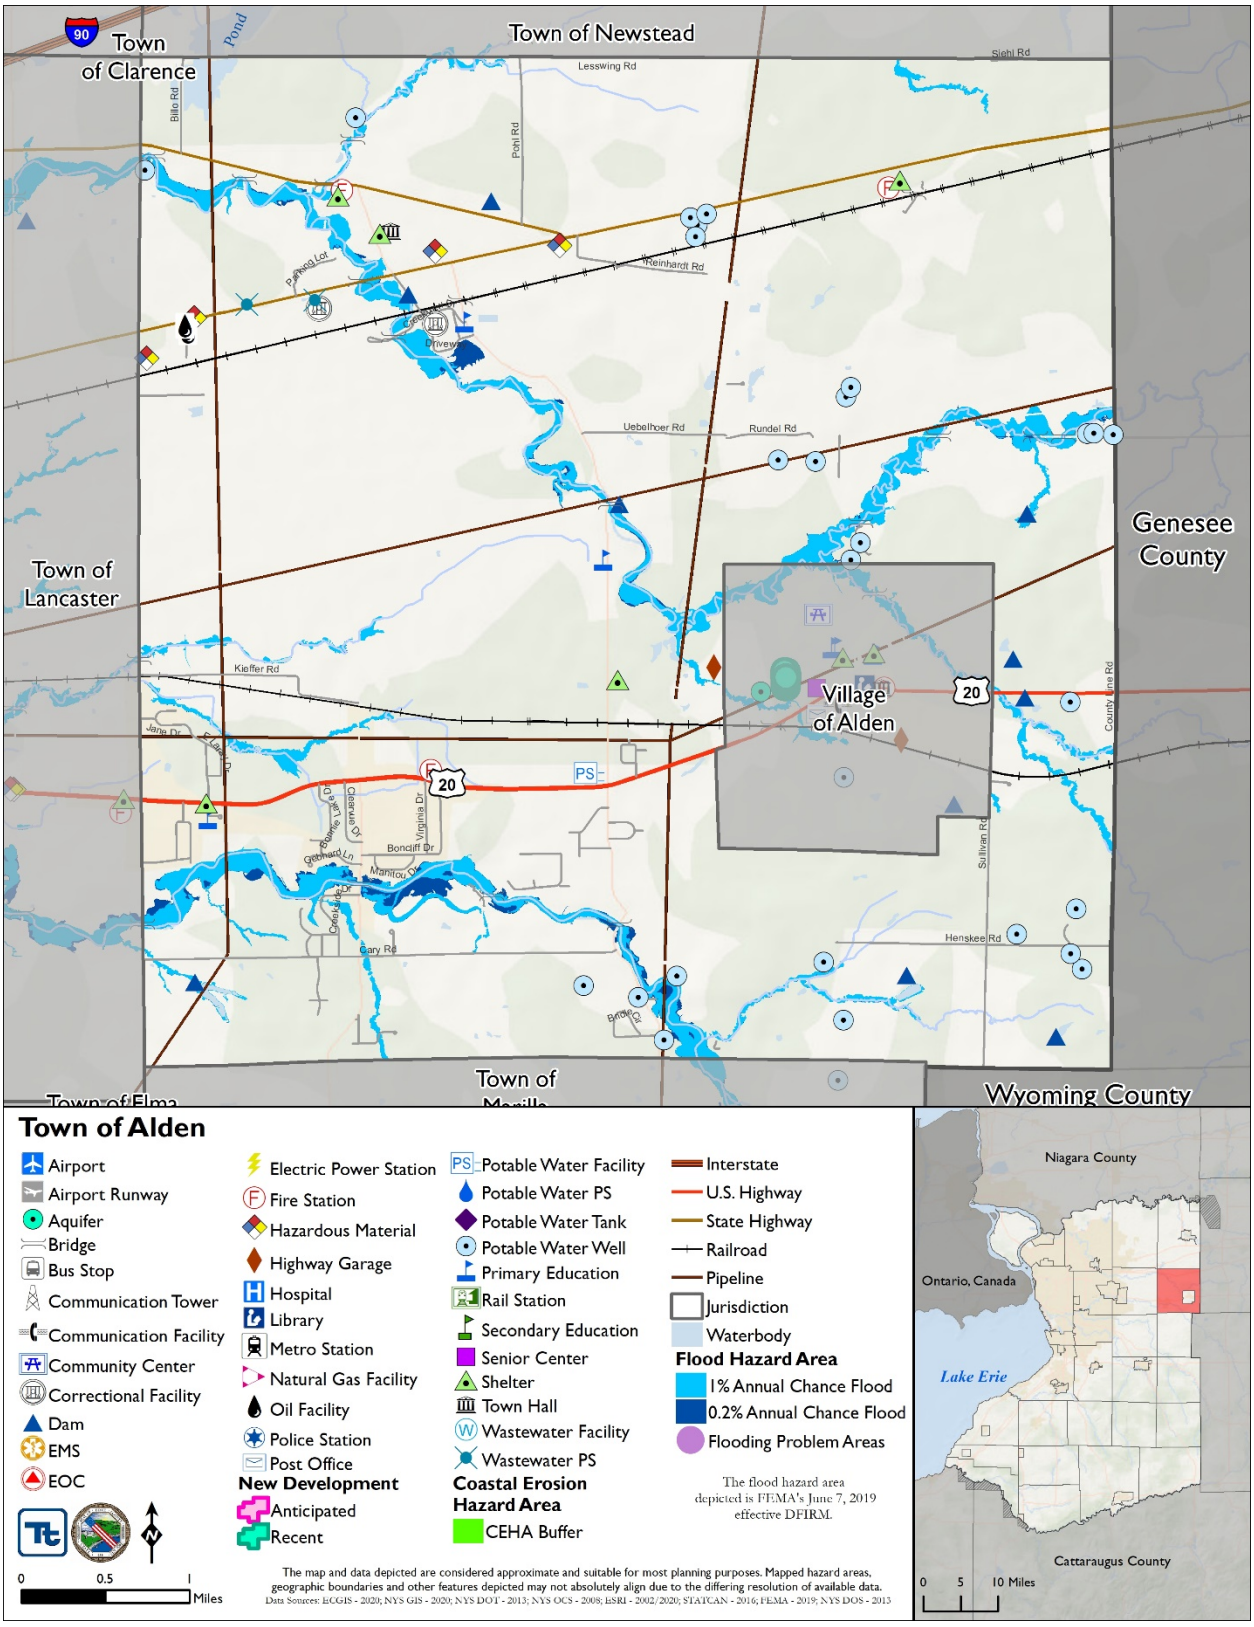
The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Alden's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Alden has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.4-1. Town of Alden Hazard Area Extent and Location Map 1



Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Alden's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.4-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.4-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	Although the County was impacted, the town did not report damages
November 12, 2015	High Wind	No	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Although the County was impacted, the town did not report damages
March 13, 2017	Winter Storm	No	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Flooding from ice accumulation
December 24-29, 2017	Lake-effect Snow	No	Flooding from ice accumulation
January 2, 2018	Blizzard	No	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the County was impacted, the town did not report damages
November 27, 2019	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
January 18, 2020	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
2020-21	COVID 19	Yes	Various Losses

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Alden's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Alden. The Town of Alden has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town agreed with the following hazard rankings.

- The town indicated that earthquakes are a rare occurrence and thus should be re-ranked from high to low.
- Flooding, given its common issues across the region has been reranked from low to medium.
- Severe storm and Utility Failure are all interconnected and thus have been ranked based on frequency of events from high to medium.
- Severe winter storms are especially common and have been re-ranked as high.
- Wildfires do not occur in the town and thus have been re-ranked from high to low.

Table 9.4-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Medium	Low

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	High	Medium	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.4-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Vranic Dam	Dam	X	X	2022-Town of Alden-001

Source: 2021 GIS

Identified Issues

After review of the Town of Alden's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Alden has identified the following vulnerabilities within their community:

- The Vranic Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.
- The Hugenschmidt Marsh Dam, NY Central Railroad Company Dam, Warren Bippert Pond Dam, 7-Eleven Store #35254, Alden HazMat Facility, United Precious Metal Refining, Inc., Griffith Energy Inc., and Saint John the Baptist School are in the earthquake hazard area.
- The Alden Rod & Gun Club Dam, Fr Strate Pond Dam, Hugenschmidt Marsh Dam, Nathan Sweet Marsh Dam, Vranic Dam, Walden Roberts Dam, and the Alden Mennonite Church are located in the wildfire hazard area.
- The Alden Fire Station, Crittendon Fire Station, Millgrove Volunteer Fire Station, and Alden Town Hall may be at risk of being exposed to hazardous materials incidents.
- Public and private facilities may be at risk from off-site hazardous materials incidents.
- The Hugenschmidt Marsh Dam, Bippert Pond Dam are located on steep slopes and may be at risk of landslides.
- The Fr Strate Pond Dam and Nathan Sweet Marsh Dam (public) may be at risk of experiencing damages caused by expansive soils.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Floodplain Managers require training. Those responsible for floodplain management are lacking in their knowledge of required duties.
- The Town Highway Department has a generator that is under capacity for the facility. The Town Highway Garage is a critical facility needed during all hazard events and with an unreliable energy source, the town is unable to meet town demand to provide service during emergency event.
- The town will designate the town hall as an additional emergency shelter as the existing church facility might not meet the demand of the town during a hazard event. However, the town hall, in its current state, is not equipped and prepared to be an emergency shelter.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- Lack of resources to address impacts from climate change.

9.4.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.4-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Meeting with NYSEG about possibility of adding second transmission line to local substation	All Hazards	Not Identified	Emergency Management	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	Low High Energy Security	1. Discontinue 2. 3. Complete.
2	Support and fund CERT programs that include a mitigation component	All Hazards	Not Identified	Emergency Management	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Ongoing.
3	Procure and implement web-based emergency management software to facilitate efficient disaster response and mitigation	All Hazards	Not Identified	Emergency Management	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Ongoing.
4	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Code Enforcement	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	Low High Compliance	1. Discontinue 2. 3. Complete
5	Require staff involved in floodplain management and ordinance enforcement to become Certified Floodplain Managers (CFMs)	Flood	Not Identified	Code Enforcement	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Not relevant.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Alden has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Various culvert rightsizing projects across the town.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Alden participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.4-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	X	-	-	-	-	-	-	X	X
Cyber Attack	-	X	-	-	-	-	-	-	X	X
Earthquake	-	X	-	X	X	-	X	-	X	X

Extreme Temperature	-	X	-	-	-	-	-	-	X	X
Flood	X	X	-	X	X	X	X	-	X	X
Hazardous Materials	-	X	-	X	-	-	X	-	X	X
Landslide	-	X	-	X	-	-	X	-	X	X
Pandemic	-	X	-	-	-	-	-	-	X	X
Severe Storm	-	X	-	-	-	-	-	-	X	X
Severe Winter Storm	-	X	-	-	-	-	-	-	X	X
Utility Failure	-	X	-	-	-	-	-	-	X	X
Wildfire	-	X	-	X	-	-	X	-	X	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.4-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Alden would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.4-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.4-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Town of Alden-001	Dam Flood Control	All	Flood	**Problem**: The Vranic Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution**: The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	The dam owner will be aware of options to protect the dam to the 0.2% annual chance flood event.	Town Budget	High	EAP	PI
2022-Town of Alden-002	Earthquake Structure Evaluation	All	Earthquake	**Problem**: The Hugenschmidt Marsh Dam, NY Central Railroad Company Dam, Warren Bippert Pond Dam, 7-Eleven Store #35254, Alden HazMat Facility, United Precious Metal Refining, Inc., Griffith Energy Inc., and Saint John the Baptist School are in the earthquake hazard area. **Solution**: Conduct outreach and assess the structures and determine if they are at risk of earthquakes and determine necessary mitigation measures to protect them from earthquakes.	Yes	None	Within 6 months for outreach	Town of Alden	<$100 for outreach, TBD by engineering study	The facility owners are aware of options to protect the facilities from potential earthquake damage	Town Budget	High	EAP	PI

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.4.9 Action Worksheets

The following action worksheets have been developed by the Town of Alden to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Generator installation for Highway Building		
Project Number:	2022-Town of Alden-009		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm, Utility Failure		
Description of the Problem:	Town Highway Department has a generator that is under capacity for the facility. The town Highway Garage is a critical facility needed during all hazard events and with an unreliable energy source, the town is unable to meet town demand to provide service during emergency event.		
Action or Project Intended for Implementation			
Description of the Solution:	The town would like to install a new generator that meets energy requirements of town. The town engineer would need to determine the needs of the facility and provide guidance as to what type of generator the town would purchase and where the equipment would be installed.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Continued Operation
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$100,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	HMGP, Community Facilities Direct Loan & Grant Program, Climate Smart Communities Grant Program, Add in Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Town Engineer	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install Solar	High	Unreliable energy source
	Generator	High	Best option

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Generator installation for Highway Building	
Project Number:	2022-Town of Alden-009	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This projects property
Cost-Effectiveness	1	This is the most cost effective
Technical	1	There are no identified technical issues
Political	1	There are no political issues with this project
Legal	1	There are no legal issues identified at this time
Fiscal	-1	The town needs additional resources
Environmental	0	This project has minimal environmental impact
Social	1	This project has positive social impact
Administrative	1	There are no administrative issues identified
Multi-Hazard	1	Flood, Severe Storm, Severe Winter Storm, Utility Failure
Timeline	1	There are no timeline related issues
Agency Champion	1	This town has assigned the town DPW
Other Community Objectives	1	Various objectives
Total	11	
Priority (High/Med/Low)	High	

Attachment: 43-Section-9.4-Alden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Emergency Shelter Designation.		
Project Number:	2022-Town of Alden-010		
Risk / Vulnerability			
Hazard(s) of Concern:	All		
Description of the Problem:	The town would like to designate the town hall as an additional emergency shelter as the existing church facility might not meet the demand of the town during a hazard event. However, the town hall, in its current state, is not equipped and prepared to be an emergency shelter.		
Action or Project Intended for Implementation			
Description of the Solution:	The town shall conduct a feasibility study to determine the needs of the existing facility to initiate the process of redeveloping the new town hall. This study shall address, backup power needs, heating/ cooling/ existing infrastructure, utility vulnerability, supply needs and storage, and medical supply needs. The facility will also need to be structurally examined and redesigned to safely accommodate residents during hazard events. Ultimately, these finding will be implemented over the following years.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Development of new emergency facility
Useful Life:	35 years	**Goals Met:**	1, 2
Estimated Cost:	1 million dollars	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	HMGP
Responsible Organization:	Town Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard mitigation and preparedness

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Designate City of Buffalo shelters as town shelters	Low	Too far away
	Develop emergency shelter	High	Best option in the long run

9.5 Village of Alden

This section presents the jurisdictional annex for the Village of Alden. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Alden's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.5.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Alden's hazard mitigation plan primary and alternate points of contact. The Village of Alden followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Office of Emergency Management, Mayor, and Code Enforcement. The Office of Emergency Management Coordinator represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.5-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Mark Pruitt, Office of Emergency Management Coordinator Address: 13336 Broadway, Alden, NY 14004 Phone Number: (716) 380-1593 Email: map1sultan@aol.com	Name/Title: Michael Manicki, Mayor Address: 13336 Broadway, Alden, NY 14004 Phone Number: (716) 937-9216 x112 Email:aldenmayor@rochester.rr.com
NFIP Floodplain Administrator	
Name/Title: Joseph Czechowski, Code Enforcement Officer Address: 13336 Broadway, Alden, NY 14004 Phone Number: (716) 937-9216 x121 Email: ceojoe@rochester.rr.com	

9.5.2 Municipal Profile

The Village of Alden is located approximately 15 miles east of downtown Buffalo and is 2.5 square miles in area. The village incorporated in 1869 and is located entirely within the Town of Alden. Residential and commercial development in the village is concentrated around the central business district, with open space remaining in the north and south portions of the village (Village of Alden 2021). Ellicott Creek runs through the village.

The Village of Alden was once famous for its black water baths. Mineral rich "black water" was discovered while drilling for natural gas in 1891. Many of the earliest patrons of these "black water baths" were immigrants from Europe who knew about "the waters" of Europe.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

According to the U.S. Census, the 2010 population for the Village of Alden was 2,605. The estimated 2019 population was 2,577, a one percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.7 percent of the population is 5 years of age or younger and 17.5 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.5.3 Jurisdictional Capability Assessment and Integration

The Village of Alden performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.5.3). The Village of Alden's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Alden. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.5-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 78 (Building Construction and Fire Prevention); adopted 2003	Local	Village Code Enforcement
Comment: *The goal and purpose for the building code are as stated: the protection of property, the preservation of property values and the elimination of fire, safety and health hazards. It is the purpose of this chapter to provide for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Village of Alden. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.*					
Zoning Code	Yes	No	Chapter 210 and 211 (Zoning); adopted 2003	Local	Village Planning
Comment: *The goal and purpose for the building code are as stated: 1) Promote and protect to the fullest extent permissible the environment of the village and its public health, safety, convenience, comfort, prosperity and the general welfare. 2) Limit development on flood-prone lands abutting Ellicott Creek and its tributaries in order to enable Ellicott Creek to carry and store its maximum amount of water without restrictions; prevent encroachments on its floodplain; prevent any increased threat to health, safety and property to the immediate area as well as to those downstream; and protect the water quality and general ecology. 3) Allow for Planned Unit Developments (PUD) in the*					

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
zoning code in order to conserve land, permit more usable open space for recreation, community activities and the preserve natural features including such features as trees or outstanding or unique natural topography, including marshlands and other geological features. 1) No structure, fill, deposit, obstruction, excavation, storage of materials or other use shall be permitted in the conservation district which would adversely affect the efficiency or storage capacity of the floodplain or which would tend to increase flood heights. 2) No structure for human habitation shall be permitted in the conservation district. 3) A PUD plan must include the existing site conditions, including property lines, contours at five-foot intervals, watercourses, drainage ditches in the village storm drainage system, 100-year floodplains, unique natural features, wetlands, tree cover, soil information and evaluation for the uses proposed, and the existing and proposed major storm drainage system including direction and quantity of flow. 4) A PUD must include a tracing overlay showing all soil areas and their stratification and those areas, if any, with moderate to high susceptibility to ponding or flooding and moderate to high susceptibility to erosion. For areas with potential erosion problems, the overlay shall also include an outline and description of existing vegetation and the program to be undertaken to correct potential erosion problems.					
Subdivision Ordinance	Yes	No	Chapter 181 (Subdivision of Land); adopted 2003	Local	Village Board
Comment: *The goal and purpose for the building code are as stated: 1) Preliminary plat approval for a major subdivision: Particular attention shall be given to the arrangement, location and width of streets and their relation to the topography of the land, water supply, sewage disposal, drainage, lot sizes and arrangement, and the future development of adjoining lands as yet unsubdivided. Each element must adhere to the requirements of the Master Plan, the Official Map11 and zoning regulations, if such exist. 2) Subdivider must install sanitary sewer lines, storm sewer lines, water mains and fire hydrants, aboveground drainage facilities, i.e., ditch, swale, sluiceway, etc.*					
Stormwater Management Ordinance	Yes	Yes	Chapters 175 and 176 (Stormwater Management); adopted 2007	Local	Village Board
Comment: *The goal and purpose for the building code are as stated: 1) Establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction. 2) Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels. 3) Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality. 4) Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable. 5) Reduce stormwater runoff rates and volumes, soil erosion, and nonpoint source pollution through stormwater management practices and to ensure that these management practices are properly maintained and eliminate threats to public safety. A Site map/construction drawing(s) for the project will include a general location map; show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent offsite surface water(s); wetlands and drainage patterns that could be affected by the construction activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and location(s) of the stormwater discharges(s).*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *The goal and purpose for the building code are as stated: Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	Yes	-	-	-
Comment:					
Site Plan Review	Yes	No	Local Law No. 1-2012	Local	Village Board
Comment: *The purpose of these supplemental regulations is to promote the health, safety and general welfare of the residents of the Village, to provide standards for the safe provision of telecommunications consistent with applicable federal and state regulations and to protect the natural features and aesthetic character of the Village of Alden.*					
Environmental Protection Ordinance	Yes	Yes	Local Law No. 1-2012	Local	Environmental Conservation Commission
Comment: *The goal and purpose for the building code are as stated: 1) Establish a commission for conservation of the environment that will advise the Board of Trustees and the Mayor on matters affecting the preservation, development, and use of the natural and man-made features and conditions of the Village of Alden. 2) Maintain an up-to-date inventory or index of all open spaces in public and private ownership within the municipality, including but not limited to natural landmarks,*					

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
glacial and other geomorphic or physiographic features, streams and their floodplains, swamps, marshland and other wetlands, unique biotic communities, scenic and other open areas of natural or ecological value, and of the ownership, present use and proposed use of such open areas, so as to provide a base of information for recommendations by the Commission for their preservation and/or use.					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 105 (Flood Damage Prevention)	Local	Building Code Enforcement
Comment: *The Board of Trustees of the Village of Alden finds that the potential and/or actual damages from flooding and erosion may be a problem to the residents of the Village of Alden and that such damages may include destruction or loss of private and public housing, damage to public facilities, both publicly and privately owned, and injury to and loss of human life. In order to minimize the threat of such damages, this chapter is adopte*d. *BFE+2 feet for all construction in the SFHA (residential and non-residential)*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 176 (Stormwater Management – Illicit Discharge)	County	County SWCD
Comment: *1) To prohibit Illicit Connections, Activities and Discharges to the MS4. 2) To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4. The owner or operator of a commercial or industrial establishment shall provide, at their own expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the MS4 through the use of structural and non-structural BMPs.*

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Alden to oversee and track development.

Table 9.5-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	The Building Department and Code Enforcement Officer are responsible for reviewing building permit applications and approving.
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Alden and their current responsibilities which contribute to hazard mitigation.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.5-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Village of Alden Planning Board is responsible for the review and approval of all applicable subdivisions of land within the Village of Alden. The Planning Board reviews applications for site plan approval, special permits, and rezoning requests. The Planning Board provides recommendations to the Village of Alden Board of Trustees for these types of projects. The Planning Board reviews and maintains the Village of Alden Master Plan.
Zoning Board of Adjustments	Yes	The Village of Alden Zoning Board of Appeals is responsible for hearing area and use variance requests. Typically, a variance is sought from an applicant who cannot meet the requirements of the Zoning Code of the Village of Alden.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Recognizing the need to address the subject of economic development and its role in helping the Alden community deal with growth pressures, the Alden Economic Development Committee was formed in 2004. The Committee is represented by members of both Town and Village Boards, the Alden Chamber of Commerce, Alden School District and local business and civic leaders. Funding for the operation of the Committee is shared by the Town of Alden, Village of Alden and the Chamber of Commerce, based upon a mutually agreed upon budget. Pursuant to the obvious need to be proactive in embracing economic growth issues, the Alden Economic Development Committee has been formed to aid the committee and its leaders in addressing pertinent alternatives, as they arise. Also in progress, are several new programs designed to enable Town and Village officials to play the significant leadership roles and guidance needed to balance the need for economic growth with the equal emphasis on the character and tradition of the Alden community. Interested parties and potential project sponsors for the economic development future of Alden are encouraged to contact the village/town or chamber to begin the process.
Public Works/Highway Department	Yes	The Village of Alden Department of Public Works started in 1897 with the organization of a Board of Water Commissioners. From that beginning, the department has expanded to provide a wide variety of services to the Village. Currently the Department of Public Works is responsible for refuse & recycling pick-up, water & sewer services, street & sidewalk repair & maintenance, municipal building maintenance, snow removal, street lighting, parks, storm sewers and shade trees.
Construction/Building/Code Enforcement Department	No	The Village of Alden Building Department, under the direction of the Code Enforcement Officer, is responsible for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code, as well as Zoning, Subdivision, and other laws and ordinances provided for in the Code of the Village of Alden.
Emergency Management/Public Safety Department	Yes	Presently 50 plus members serve in the Alden H&L FC and the company operates three pumpers, a 75' aerial - pumper, one rescue

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		truck, two ambulances and a water rescue truck complete with a 15' rescue boat and trailer. The members are led by a Fire Chief and three Assistant Chiefs.
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW staff – the department is responsible for refuse & recycling pick-up, water & sewer services, street & sidewalk repair & maintenance, municipal building maintenance, snow removal, street lighting, parks, storm sewers and shade trees
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	DPW staff - The Village of Alden Department of Public Works started in 1897 with the organization of a Board of Water Commissioners. From that beginning, the department has expanded to provide a wide variety of services to the Village. Currently the Department of Public Works is responsible for refuse & recycling pick-up, water & sewer services, street & sidewalk repair & maintenance, municipal building maintenance, snow removal, street lighting, parks, storm sewers and shade trees.
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	OEM Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Alden.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.5-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Alden.

Table 9.5-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	Yes	The village maintains a website
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	The village operates a Facebook page where they post upcoming events, meetings, news, and notifications.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Alden.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.5-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.5-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Weak - NA
Cyber Attack	Medium
Earthquake	Medium
Expansive Soils	Medium
Extreme Temperature	High
Flood	Medium
Hazardous Materials	Medium
Landslide	High
Pandemic	High
Severe Storm	High
Severe Winter Storm	High
Utility Failure	Medium
Wildfire	High

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.5.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Joseph Czechowski, Code Enforcement Officer.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Alden.

Table 9.5-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Alden	0	5	$4,711	0	0

Source: FEMA July 2020 and FEMA September 2020
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The village identified the intersection of Route 20 and Kellogg Street that is prone to flooding. The village does not maintain a list of property owners interested in flood mitigation. There are not any RiskMAP projects currently underway in the village. The village makes Substantial Damage determinations by using their Village Code Chapter 105 which states "substantial damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred." No properties have been mitigated in the jurisdiction. The village flood maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

The Village of Alden Building Department/ Code Enforcement is responsible for floodplain management. There are not any certified floodplain managers on staff, or access to resources to determine possible future flooding conditions from climate change. The village does not need additional assistance at this time. The NFIP administration services the village provides include permit review, review subdivision and other proposed development, inspections, and stop-work orders. The NFIP floodplain administrator determines if proposed development would qualify as substantial improvement by verifying the construction materials and utility equipment is resistant to flood damage and constructed using methods and practices that minimize flood damage. The substantial improvements should have the lowest floor elevated at least three feet above the highest adjacent grade.

The village does not have any barriers to running an effective NFIP program and the village does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Contact (CAC) June 6, 1989. The local law number of the flood prevention ordinance is Village Code Chapter 198, revisions adopted April, 2019. The floodplain management program meets the minimum requirements. There are no other local ordinances, plans, or programs that support the floodplain management and the village does not participate in the CRS.

9.5.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Alden has identified the following routes and procedures to evacuate residents prior to and during an event.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Route 20 – Broadway (East/ West)
- Exchange St. (South) Crittenden (North)

Sheltering

The Village of Alden has identified the following designated emergency shelters within the village.

Table 9.5-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Municipal Building	13336 Broadway	145	Yes	Yes	Yes	House fire and EMS Department	Full kitchen
Alden Station 2	11856 Broadway	75	Yes	Yes	Yes	House fire and EMS Dept	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Alden has identified the following sites suitable for placing temporary housing units.

Table 9.5-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Alden Town Park	W Main St.	Unknown	Park	Water, Electric, and Septic	None
Darien Lakes State Park	Rt 20	Unknown	Park	Water and Electric	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Alden has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.5-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
3311 Wende Rd, Alden, NY 14004	3311 Wende Rd, Alden, NY 14004	TBD	Lot	None	Unknown

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.5.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.5-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.5-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.5.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Alden's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Alden has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Alden's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.5-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.5-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	No damages were reported for the Village of Alden
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	No damages were reported for the Village of Alden
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	No damages were reported for the Village of Alden
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a	No damages were reported for the Village of Alden

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	No damages were reported for the Village of Alden
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	No damages were reported for the Village of Alden
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	No damages were reported for the Village of Alden
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to	No damages were reported for the Village of Alden

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	No damages were reported for the Village of Alden
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	No damages were reported for the Village of Alden
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	No damages were reported for the Village of Alden
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	No damages were reported for the Village of Alden
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	No damages were reported for the Village of Alden

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	No damages were reported for the Village of Alden
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	No damages were reported for the Village of Alden
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	No damages were reported for the Village of Alden
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	No damages were reported for the Village of Alden
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	No damages were reported for the Village of Alden
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	No damages were reported for the Village of Alden

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5-hour period in the cold advection behind the cold front.	No damages were reported for the Village of Alden
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	No damages were reported for the Village of Alden
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	No damages were reported for the Village of Alden
2020-21	Covid 19	Yes	Pandemic	Various losses including facility closures and social distancing requirements/ enforcements.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Alden's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Alden. The Village of Alden has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village made the following changes.

- No expansive soil issues have been identified. Thus will be re-ranked low from high.
- The village has rail and Route 20 that carry hazardous material, thus should be ranked medium from low.
- The village is rural and is not vulnerable to pandemic and will be re-ranked from medium to low.
- Severe storms are not a significant threat and will be re-ranked from high to medium.
- The village does not identify wildfires as a major concern and will reranked from high to low.

Table 9.5-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Medium

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Low	Medium	High	High	Low

Note: *The scale is based on the hazard rankings established in Section 5.3*

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.5-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Highway Garage 1-1	Highway Garage	Yes	No	006

Source: 2021 GIS

Identified Issues

After review of the Village of Alden's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Alden has identified the following vulnerabilities within their community:

- The village does not receive adequate snow removal services, especially during snow emergencies. The village would need the county to expand its existing capabilities/ facilities to adequately respond to future snow storms. Proposed DPW Actions will address this.
- The village has been experiencing freight trains disrupting traffic. The village is concerned with the potential derailment of the trains and the resulting damage that could occur. The village has experienced a previous derailment in the 1960s which caused major disruption to the village services and connection to external emergency services. The village would like to have the county/ external municipalities to coordinate emergency service planning in case of a future derailment. Proposed in action number 3.
- The Raymond May Pond Dam and Alden Senior Center are located in the wildfire hazard area.
- The Highway Garage ID: 119.08-2-14, Alden Post Office, Potable Water Well ID: E3846, and Village of Alden Hall may be exposed to hazardous materials incidents.
- Public and private facilities may be at risk from off-site hazardous materials incidents.
- The Highway Garage may be at risk of experiencing damages caused by expansive soils.
- The Village Highway Garage does not have adequate backup power installed. The highway facility is a critical component to the village's services and needs to be in operation at all time. Without backup power, the facility is unable to respond, and thus additional backup power is needed.
- The highway garage does not have adequate space for offices and equipment. The facility is also located in a 100-year flood zone and thus is subject to potential flooding. While the facility has not previously experienced any flooding, given the facility is located in a floodplain, flood hazard does pose potential threat. The village would therefore need to adequately prepare the facility to be equipped in case of a future flood.
- The Village Highway Garage does not have adequate backup power installed. The highway facility is a critical component to the village's services and needs to be in operation at all time. Without backup power, the facility is unable to respond, and thus additional backup power is needed.
- The highway garage does not have adequate space for offices and equipment. The facility is also located in a 100-year flood zone and thus is subject to potential flooding. While the facility has not previously experienced any flooding, given the facility is located in a floodplain, flood hazard does pose potential threat. The village would therefore need to adequately prepare the facility to be equipped in case of a future flood.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Sanitary Lift Stations do not have generator backup power. These are located across the municipality and provide critical village services to deal with wastewater and sewage. Without these facilities having the ability to operate at all times, the village sewage system would be overwhelmed and would lead to clogging and potential contamination and spillage.
- The village does not have emergency backup water supply during water facility failure. With potential risk to drought and past historical events when the village water facility did not have adequate water supply for the entire village, the municipality identified this as a critical issue that needed to be addressed to reduce vulnerability to drought and utility failure.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.5.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Alden has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None identified.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Alden participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Severe Winter Storm		X							X	X
Utility Failure		X							X	X
Wildfire				X			X			

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.5-19 summarizes the comprehensive-range of specific mitigation initiatives the Village of Alden would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.5-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.5-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Alden-001	Alden Senior Center Mitigation	All	Wildfire	**Problem**: The Raymond May Pond Dam and Alden Senior Center are located in the wildfire hazard area. **Solution**: Conduct outreach to property owners to determine the risk from wildfires and identify property maintenance actions, if needed, to help protect the facilities.	Yes	None	Within 6 months for outreach	Village Board	<$100 for outreach	The facility owners are aware of options to protect the facilities from potential wildfire damage	Village Budget	High	EAP	PI
2022-Village of Alden-002	Critical Facilities and Hazardous Material Incidents	All	Hazardous Materials Incidents	**Problem:** The Highway Garage ID: 119.08-2-14, Alden Post Office, Potable Water Well ID: E3846, and Village of Alden Hall may be exposed to hazardous materials incidents. **Solution:** Develop an education/ outreach plan to ensure that the facilities can safely continue operations or be shut down if personnel are evacuated from the buildings due to a hazmat release.	Yes	None	Within 6 months for outreach	Village of Alden	<$100 for outreach	Continuity of operations in place	Village Budget	High	LPR	ES
2022-Village of Alden-003	Hazardous Material Facility Mitigation	All	Hazardous Materials Incidents	**Problem:** Public and private facilities may be at risk from off-site hazardous materials incidents. **Solution:** Work with County and public and private organizations in the village to develop emergency plans for responding to an off-site hazardous materials incident.	Yes	None	Within 6 months for outreach	Village of Alden Board of Trustees	<$100 for outreach	Continuity of operations in place	Village Budget	High	EAP	PI

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Alden-004	Protect the Highway Garage ID: 119.08-2-14 from expansive soils	All	Expansive Soils	**Problem:** The Highway Garage may be at risk of experiencing damages caused by expansive soils. **Solution:** The village will work with the facility owner to determine if risk exists and assess the structure and determine necessary mitigation measures to protect them from expansive soils.	Yes	None	Within 6 months for outreach	Highway Department	<$100 for outreach, TBD if mitigation is needed	The facility owner is aware of options to protect the Highway Garage from expansive soils	Village Budget	High	EAP	PI
2022-Village of Alden-005	Highway Garage Generator	1,2	Severe Storms, Severe Winter Storms, Utility Failure	**Problem**: The Village Highway Garage does not have adequate backup power installed. The highway facility is a critical component to the village's services and needs to be in operation at all time. Without backup power, the facility is unable to respond, and thus additional backup power is needed. **Solution**: The village will conduct an assessment of the existing facility to determine the energy needs of the building. Once this is determined, the village will purchase an appropriate generator that will be placed in an area that is safe from flooding (as the facility is located in a 100-year flood zone).	Yes	Yes	1 year	Village DPW	$100,000	Continuity of Operations	HMGP, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget	High	SIP	ES

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Village of Alden-006	Highway Garage Retrofitting and Expansion	1,2	Flood	**Problem:** The highway garage does not have adequate space for offices and equipment. The facility is also located in a 100-year flood zone and thus is subject to potential flooding. While the facility has not previously experienced any flooding, given the facility is located in a floodplain, flood hazard does pose potential threat. The village would therefore need to adequately prepare the facility to be equipped in case of a future flood. **Solution:** This will be a multi-phased project. The first phase will be floodproofing the existing garage. This will include sealing the walls of the building and elevating utilities above the BFE. The second phase will include expanding the existing facility. The addition will be done in accordance with municipal, state and any federal guidelines. Additionally, the addition will also be floodproofed including sealing walls and elevating equipment.	Yes	Yes	3 years	Village DPW	High	Continuity of Operations	HMGP, FMA, BRIC, USDA Community Facilities Grant Program	High	SIP	PP

2022-Village of Alden-007	Generator Installation at Lift Stations	1, 2	Severe Storms, Severe Winter Storms, Flood, Utility Failure	**Problem:** Sanitary Lift Stations do not have generator backup power. These are located across the municipality and provide critical village services to deal with wastewater and sewage. Without these facilities having the ability to operate at all times, the village sewage system would be overwhelmed and would lead to clogging and potential contamination and spillage. **Solution:** Install generator at three (four total within the village) locations. The village does not have necessary information to determine the energy need of these facilities and would need to conduct a full assessment of the existing facilities and their needs. Once each facility has been identified and energy demand has been determined, the village would need to purchase three separate generators that would be installed at each facility. Each generator would need to be installed in a way that protects it from flooding as well as other natural elements that could cause harm to the generator.	No	Yes	2 years	Village DPW	Up to $500,000	Continued Operations	HMGP, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget	High	SIP	ES

2022-Village of Alden-008	Expansion of Erie County Water System to Village system.	1,2	Utility Failure	**Problem:** The village does not have emergency backup water supply during water facility failure. With potential risk to drought and past historical events when the village water facility did not have adequate water supply for the entire village, the municipality identified this as a critical issue that needed to be addressed to reduce vulnerability to drought and utility failure. **Solution:** The village has identified a solution to work with the county water department and connect with the existing county water supply system. The project would entail connection of the municipal water system with the county water system and thus entail the collaboration between the village and the county. Additional agreements might also be needed with neighboring municipalities like the Town of Alden. Once the two water systems are connected, the village would continue to use its existing water system but would rely on the county water system in case of localized emergency water shortages.	No	Yes	2 years	Erie County Water Department/ Village DPW	$40k	Reliable water supply	Municipal Budget, County Water Department Funding	High	SIP	SP

2022 Village of Alden-009	Residential Property Flood Mitigation.	1	Flood	**Problem:** Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. **Solution:** The village will work with the county to conduct outreach to flood-prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).	No	No	Within 3 years	Village Board, FPA	TBD per cost and number of properties to be purchased.	Remove residents and homes from the flood threatened homes	BRIC, HMGP, FMA	High	SIP	PP

NFIP *National Flood Insurance Program*
OEM *Office of Emergency Management*

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.5.9 Action Worksheets

The following action worksheets have been developed by the Village of Alden to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 44-Section-9.5-Alden-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Generator Installation at Lift Stations		
Project Number:	2022-Village of Alden-007		
Risk / Vulnerability			
Hazard(s) of Concern:	Severe Storms, Severe Winter Storms, Flood, Utility Failure		
Description of the Problem:	Sanitary Lift Stations do not have generator backup power. These are located across the municipality and provide critical village services to deal with wastewater and sewage. Without these facilities having the ability to operate at all times, the village sewage system would be overwhelmed and would lead to clogging and potential contamination and spillage.		
Action or Project Intended for Implementation			
Description of the Solution:	Install generator at three (four locations total within the village). The village does not have necessary information to determine the energy need of these facilities and would need to conduct a full assessment of the existing facilities and their needs. Once each facility has been identified and energy demand has been determined, the village would need to purchase three separate generators that would be installed at each facility. Each generator would need to be installed in a way that protects it from flooding as well as other natural elements that could cause harm to the generator.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Continued Operations
Useful Life:	20 years	**Goals Met:**	1,2
Estimated Cost:	Up to $500,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Village DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install Solar	High	Unsteady power source
	Generators	High	Most feasible option

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.6 Town of Amherst

This section presents the jurisdictional annex for the Town of Amherst. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Amherst's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.6.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Amherst's hazard mitigation plan primary and alternate points of contact. The Town of Amherst followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including Code Enforcement and Emergency Services. The Department of Emergency Services represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.6-1. Hazard Mitigation Planning Team

9.6.2 Municipal Profile

Amherst is the most populous town in western New York and is an inner ring suburb of Buffalo. Amherst is 54 square miles, making it the second largest town by area in Erie County. Amherst was formed in 1818 from part

of the Town (later City) of Buffalo. The Village of Williamsville is located entirely within the Town of Amherst. The town is bordered on the north by Tonawanda Creek and the Erie Canal which comprise the border here between Niagara and Erie counties. The Town of Tonawanda borders on the east, the Town of Clarence on the west and the City of Buffalo and Town of Cheektowaga on the south. Ellicott Creek flows through the town.

The opening of the Erie Canal in 1825 spurred growth in Amherst, bringing new settlers and increased commerce. German farming immigrants settled in the northern part of the town, attracted by its fertile land. The town's water resources encouraged development of grist mills, saw mills, and other manufacturers along Ellicott Creek. Several hamlets that are still in existence started to develop around this time: Williamsville (1810s), Eggertsville and Snyder (1830s) East Amherst and Swormville (1850s and Getzville (1860s). Education is central to Amherst's character. The town is home to the University at Buffalo's north campus, the graduate campus of Medaille College, a satellite campus of Bryant & Stratton College, and also Daemen College (Wikipedia 2020).

According to the U.S. Census, the 2010 population for the Town of Amherst was 117,066. The estimated 2019 population was 120,276, a 2.7 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.0 percent of the population is 5 years of age or younger and 13.1 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.6.3 Jurisdictional Capability Assessment and Integration

The Town of Amherst performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.6.3). The Town of Amherst's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Amherst. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.6-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	LL1-2009, Chapter 83 Building Construction Administration	Local	Building and Zoning/Town Supervisor
Comment: The Code requires that all parking lots shall be so graded that stormwater will flow away from any building and will not drain upon abutting properties, sidewalks, and pavements. Yards and areas must always be properly drained and connected to a storm sewer or other approved outfall. 4) Front, side, and rear yards of lots upon which a structure is to be constructed shall be drained by a stormwater drainage system designed to drain a minimum ten-year, six-hour event storm.					
Zoning Code	Yes	No	Part. II Chapter 203 Zoning	Local	Planning Department
Comment: The Zoning Code requires that review of proposed developments in the town must consider exposure to natural hazards and their impact.					
Subdivision Ordinance	Yes	No	LL2-2009, Town of Amherst Subdivision Code, 2009	Local	Building Department
Comment: The Town's Subdivision code establishes a process by which the Building Department and the Planning Board review and approve subdivision proposals.					
Stormwater Management Ordinance	Yes	Yes	Part II Chapter. 172 Stormwater and Erosion Control; Illicit Discharges, LL2-2007	Local	Engineering Department
Comment: The Stormwater and Erosion Control ordinance mandates that the municipality must provide protection from accidental discharge of prohibited materials or other wastes.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	Comprehensive Plan Section 7.2 7.3 & 7.4 Goals & Policies	Local	Planning Department
Comment: No ordinance, but the Comprehensive Plan has goals and policies that speak to limiting sanitary sewer expansion over repairs to existing infrastructure, etc. Amherst Bicentennial Comprehensive Plan Inventory and Analysis Report (2001). Amended 2014 & 2019.					
Site Plan Review	Yes	No	Part II Chapter 203 Sec. 8-7 Site Plan Review	Local	Planning Department
Comment: Site Plan review incorporates consideration of hazard exposure					
Environmental Protection Ordinance	Yes	Yes	LL3-1982, Environmental Protection	Local	Planning Board and Planning Department
Comment: Permit applications require submission of an Environmental Assessment Form describing the proposed action and the effect it may have on the environment.					
Flood Damage Prevention Ordinance	Yes	Yes	Part II Chapter 203 Part 7 Section 7-7 Provisions for Flood Hazard Reduction	Local	Floodplain Administrator
Comment: Amended 6/3/2019. BFE+2 feet for all construction in the SFHA (residential and non-residential). It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities. B. require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; D. control filling, grading, dredging and other development which may increase erosion or flood damages; E. regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Amherst to oversee and track development.

Table 9.6-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Building Department
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	No, the town does not maintain a buildable land inventory. Amherst is primarily built out in its southern two-thirds of town, with a few select areas expecting redevelopment and in-fill development over the next decade: Boulevard Mall Area/Census Tract 92 area. The northern 1/3 of town, is primarily underdeveloped and zoned rural Suburban Agriculture and while rezoning may be applied for to allow development beyond single-family residential and agricultural uses there may be other constraints that limit growth on specific lots, such as wetlands, floodplain, and infrastructure access/connectivity. Because of this, this area of town has developed at a slower pace than the rest of Amherst.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Amherst and their current responsibilities which contribute to hazard mitigation.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.6-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Seven Person Planning Board, two Planning Department Staff assigned to administer the Zoning Code. The powers of the Amherst Planning Board are: • Review and approval of site plans • Review and approval of subdivision applications • Review and approval of coordinated sign plans • Review of rezoning applications and recommendation to the Town Board • Participation in the development of Comprehensive Plans • Review of any matter referred by the Town Board and report to the Town Board
Zoning Board of Adjustments	Yes	Five Person Zoning Board of Appeals, with two Planning Department staff assigned to administer the Zoning Code. The Zoning Board of Appeals is authorized to grant relief from any provision of the Town of Amherst Zoning Ordinance, or any decision of an administrative official charged with the enforcement of that ordinance. In addition, the Board is empowered to grant special use permits in certain instances as spelled out in the Zoning Ordinance. Town Law specifies the grounds and criteria that the Zoning Board of Appeals must use to grant a variance.
Planning Department	Yes	The Amherst Planning Department has four primary responsibilities: • development plan review; • long-range planning; • community development and housing program administration; andprogram implementation. Nine Planners, one Landscape Architect, five support staff among the Planning Board and Building Department staff.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Amherst Conservation Advisory Council advises the Planning Board and Town Board about land conservation.
Open Space Board/Committee	Yes	The Town's Open Space Committee advises the Planning Board and Town Board about open space conservation opportunities which can help mitigate flooding risk.
Economic Development Commission/Committee	No	The town's Economic Development Office staff assist with economic development initiatives. https://www.amherst.ny.us/content/departments.php?dept_id=dept_29
Public Works/Highway Department	Yes	The Town Highway Department manages culverts, highways, ditches, mosquito control, tree removal and trimming, and maintenance of other assets impacted by natural hazards.
Construction/Building/Code Enforcement Department	Yes	The primary purpose of the Building Department is to ensure building safety through the enforcement of municipal, state, and federal regulations and codes. All plans for development are first reviewed by the department for adherence to regulatory statutes. Upon approval of proposed plans, permits are issued that allow for the construction and alteration of structures. Throughout the building process, field inspectors visit active work sites reviewing work and approving various stages of construction. Final inspections signal the end of the review process with new or renovated buildings receiving a formal certificate of occupancy, which allows the structure to become occupied. The primary Divisions of the Building Department are:

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		• Building Code Enforcement • Plumbing Code Enforcement • Electrical Code Enforcement • Fire Safety Code Enforcement • Property Maintenance Code Enforcement • Building Maintenance of Town Owned Facilities
Emergency Management/Public Safety Department	Yes	The Department of Emergency Services and Safety coordinates the town's response to emergency needs.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Town warning systems are operational and in use.
Maintenance programs to reduce hazard (stormwater maintenance, tree trimming, etc.)	Yes	The Town Highway Department manages culverts, highways, ditches, and other assets impacted by natural hazards. This includes tree trimming.
Mutual aid agreements	Yes	The Town maintains mutual aid agreements with neighboring jurisdictions for Fire and Department of Public Works/Highway Department operations
Other		Committee on Disabilities, Clean Energy Community Committee, Invasive Plant Species Committee, Recreation and Waste Committee, Tree Board.
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	9 Planners by training with various levels of experience, volunteer members of the Planning Board.
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Engineer
Planners or engineers with an understanding of natural hazards	Yes	Two town staff understand natural hazards.
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Office of Emergency Management, Building and Engineering Departments
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Planning has eight planning staff/board members who may be skilled in GIS, none have used HAZUS
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	The floodplain administration activities are housed in the Town Building Department
Surveyor(s)	No	-
Emergency Manager	Yes	The OEM coordinates the town's response to emergency needs
Grant writer(s)	Yes	Three staff members
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Fiscal Capability

The table below summarizes financial resources available to the Town of Amherst.

Table 9.6-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Applicable CFA's, EPF, DOS, DEC grants
Open Space Acquisition funding programs	Department of State or Agriculture & Markets Conservation Easements or the Buffalo Erie Niagara Land Improvement Corp (BENLIC) – Land Bank
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Applicable grants, if awarded

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Amherst.

Table 9.6-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	Yes	Department of Information Technology
Hazard mitigation information available on your website	No	Note: website is being overhauled and will soon include hazard mitigation information.
Social media for hazard mitigation education and outreach	Yes	The town employs Facebook and Twitter as social media outreach including messaging about hazard mitigation. The town's website is also being updated and will include information.
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Amherst Traffic Safety Board, Amherst Conservation Advisory Commission, Tree Board, Invasive Plant Species Committee
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Community Classifications

The table below summarizes classifications for community programs available to the Town of Amherst.

Table 9.6-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	Yes	Class 8	10/2015
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	Yes	None	Registered for program 5/2012
Storm Ready Certification	Yes	N/A	6/2014
Fire wise Communities classification	No	-	
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.6-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.6.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Mark Berke, CFM, Commissioner of Building Department

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Amherst.

Table 9.6-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Amherst	846	448	$1,417,565	23	353

Source: FEMA 2020a and FEMA 2020b
Notes:
RL Repetitive Loss; SRL

Flood Vulnerability Summary

Areas prone to flooding in the town are in the northeast portion of the town in a lying area where Gott Creek, Ransom Creek and Black Creek run into the Tonawanda Creek. The town maintains a list of properties that have been damaged by flooding but does not maintain such a list for owners interested in mitigating their properties. Per the town's data, there have been 1,224 properties that have been mitigated by elevation measures. Annually, the town sends a letter to all property owners within the floodplain. All property owners interested in flood mitigation are provided pertinent information. There are no Risk MAP projects currently underway in the town. The town indicated that no properties have been mitigated and that a list of property owners interested in mitigation is not maintained. The town's flood hazard maps adequately address the flood risk within the jurisdiction. The town does not have access to resources to determine possible future flooding conditions from climate change.

NFIP Compliance

The Town of Amherst does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Visit (CAV) was in June 2020. The Building Inspector is responsible for floodplain administration and this individual is a certified Floodplain Manager. The town does not have access to resources to determine possible future flooding conditions from climate change. The town Building Department includes two staff who are Certified Floodplain Managers. The town stated its staff would benefit from training about the revised Community Rating System requirements. The town makes Substantial Determination's following FEMA guidelines. Any property where damage is 50 percent or greater than the value of the property is classified as substantial damage. The town's floodplain management meets minimum requirements. The town requires floodplain development permits for any work to occur in a floodplain/floodway and provides review and approvals to process LOMA's and LOMR-Fs. Additionally, we provide education and outreach as well as inspection for work being completed within the floodplain. The town does not participate in the Community Rating System.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.6.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Amherst did not identify evacuation routes and procedures as part of this plan update. The Town will coordinate with county and state agencies as needed.

Sheltering

The town shelter is located at the Amherst Senior Center at 370 John James Audubon Parkway, Amherst, NY 14228. The town also maintains a list of regional shelters approved by the American Red Cross (ARC) in its CEMP; the town would work with the Erie County Department of Homeland Security and Emergency Services and ARC to open and operate a shelter at one of these locations.

Table 9.6-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Town of Amherst Senior Center	370 John James Audubon Parkway	100	Yes	Yes	Yes	Emergency medical	-

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Amherst has identified the following sites suitable for placing temporary housing units.

Table 9.6-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
University at Buffalo North Campus	12 Capen Hall, Buffalo NY 14260	TBD	University campus facility	Water, sewer, electric, ample external parking lots for placement of trailers	Locate temporary housing on existing asphalt and appropriately spaced
ECC North Campus	6205 Main St, Williamsville NY	TBD	College facility	Water, sewer, electric, external sports fields for placement	Locate temporary housing on existing sports fields

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

requirements and floodplain laws. The Town of Amherst has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.6-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Boulevard Mall Site/Census Tract 92	Niagara Boulevard	DGEIS planned for 5,000 residential units over 20 years	Multistory/Mixed-use, Town Houses/Condos New construction, infill development	Water, electric (adequate sewer upgrades in planning stages)	Zoning amendments implemented, DGEIS completed, awaiting development applications

9.6.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.6-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.6-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	11	8	76	5	66	15	83	25	76	22	145	14
Multi-Family	36	2	26	3	1	1	12	4	21	0	3	2

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None Identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
The town estimates that as many as 5,000 units could be constructed in the town within the next 20 years					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.6.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Amherst's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Amherst has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Amherst's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.6-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.6-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	*Although the county was impacted, the town did not report any damages.*
August 11-15, 2015	Flash Flood	No	*Although the county was impacted, the town did not report any damages.*
October 28-29, 2015	High Wind	No	*Although the county was impacted, the town did not report any damages.*
November 6, 2015	Thunderstorm Wind	No	*Although the county was impacted, the town did not report any damages.*
November 12, 2015	High Wind	No	*Although the county was impacted, the town did not report any damages.*
November 18, 2015	High Wind	No	*Although the county was impacted, the town did not report any damages.*
January 11, 2017	High Wind	No	*Although the county was impacted, the town did not report any damages.*
March 8, 2017	High Wind	No	*Although the county was impacted, the town did not report any damages.*
March 13, 2017	Winter Storm	No	*Although the county was impacted, the town did not report any damages.*
July 20, 2017	Tornado	No	*Although the county was impacted, the town did not report any damages.*
August 4, 2017	Thunderstorm Wind	No	*Although the county was impacted, the town did not report any damages.*
December 10-15, 2017	Lake-effect Snow	No	*Although the county was impacted, the town did not report any damages.*
December 24-29, 2017	Lake-effect Snow	No	*Although the county was impacted, the town did not report any damages.*
January 2, 2018	Blizzard	No	*Although the county was impacted, the town did not report any damages.*
October 6, 2018	Lightning	No	*Although the county was impacted, the town did not report any damages.*
February 24, 2019	High Wind, Lakeshore Flooding	No	*Although the county was impacted, the town did not report any damages.*
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	*Although the county was impacted, the town did not report any damages.*
November 27, 2019	Lakeshore Flooding	No	*Although the county was impacted, the town did not report any damages.*

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Amherst's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Amherst. The Town of Amherst has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated that the Pandemic, Earthquake, Severe Storm, Utility Failure and Severe Winter Storm rankings be changed from High to Medium because of a relative low rate of occurrence or exposure to these hazards.

Table 9.6-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Medium	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	Medium	Medium	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.6-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Lang's Brewing Company Dam	Dam	X	X	#2022-T Amherst-002
Amherst Fire Training Facility, County owned	Fire Station	X	X	#2022-T Amherst-014
North Amherst Fire Station	Fire Station	X	X	#2022-T Amherst-019
BLK Buffalo	Hazardous Material	X	X	#2022-T Amherst-007
Potable Water Well E2424 on Tonawanda Creek Road	Potable Water Well	-	X	#2022-T Amherst-009
Wastewater Pump Station on Transit Road	Wastewater Pump Station	X	X	#2022-T Amherst-003
Potable Water Well E3466 on Transit Road	Potable Water Well	X	X	2022-T Amherst-013

Identified Issues

After review of the Town of Amherst's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the town has identified the following vulnerabilities:

- Floodplain administration staff could benefit from additional training.
- Additional flood gauges are needed on certain streams.
- There are Repetitive Loss flood properties located in the town.
- The Lang Brewery Dam is in the Special Flood Hazard Area.
- A town wastewater pump station is in the Special Flood Hazard Area.
- Debris, including trees and limbs, block the flow of storm waters through the floodway. The blockages can contribute to localized flooding.
- There are locations along Gott Creek, Ellicott and Ransom Creeks that experience localized flooding.
- The BLK Buffalo facility stores hazardous materials and is in the SFHA.
- Municipal and non-municipal potable water wells are located within the Special Flood Hazard Area.
- Two Fire Stations are located within the 0.2 percent annual chance flood area.
- The Skinnersville Dam needs protection from flooding
- The town lacks and urban water management plan
- Nine facilities are located within the 0.2 percent annual chance flood area that store hazardous materials. which could be dangerous if flooding impacts the facility.
- There are several privately owned critical facilities located upon earthquake vulnerable soils.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- The county-owned Amherst Fire Training Facility is in the special flood hazard area and is vulnerable to flooding.
- The town should define the capacity of temporary housing locations
- The town is developing several important plans that related to hazard mitigation.

9.6.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.6-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Flood Mitigation Efforts to include the continued aggressive stream and creek debris removal program that has been implemented. This will also continue our program of working with Erie county Public works personnel.	Flooding	The town highway department has crews out year round checking local creeks and stream performing mitigation activities by removing debris as necessary in accordance with State and federal regulations.	Highway Department	Choose an item.	Cost Level of Protection Damages Avoided; Evidence of Success	 	1. Discontinue 2. 3. completed
	CRS continuation, outreach education efforts, and add additional information to our website, through mailers along with making this information available through our Emergency Services Facebook, LinkedIn, and Twitter accounts.	Flooding	Not Identified	Building and Emergency Services	Choose an item.	Cost Level of Protection Damages Avoided; Evidence of Success	 	1. Discontinue 2. 3. ongoing
	Active participants in the NOAA programs. We are active on the NWS Chat site, just renewed our Storm Ready designation in 2011 and promote the storm watcher program and NOAA website	Winter driving, extreme weather events, winter storms, flooding, numerous natural events	Not Identified	Emergency Services	Choose an item.	Cost Level of Protection Damages Avoided; Evidence of Success	 	1. Discontinue 2. 3. ongoing

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Amherst did not identify any mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Amherst participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.6-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	-	-	-	X	-	-	-	-	X
Cyber Attack	X	-	-	-	X	-	-	-	-	X
Earthquake	X	X	-	-	X	X	-	-	-	X
Expansive Soils	X	-	-	-	X	-	-	-	-	X
Extreme Temperature	X	-	-	-	X	-	-	-	-	X
Flood	X	X	X	X	X	X	X	X	-	X
Hazardous Materials	X	X	-	-	X	-	-	-	-	X
Landslide	X	-	-	-	X	-	-	-	-	X
Pandemic	X	-	-	-	X	-	-	-	-	X
Severe Storm	X	X	-	-	X	-	-	X	-	X
Severe Winter Storm	X	-	-	-	X	-	-	-	-	X
Utility Failure	X	-	-	-	X	-	-	-	-	X
Wildfire	X	-	-	-	X	-	-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.6-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Amherst would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.6-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.6-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T Amherst -001	Floodplain Administrator to attend training on floodplain management	3	Flood	**Problem:** Floodplain Managers require training to fully implement the NFIP program within the town. **Solution:** Obtain/host training and certification for floodplain managers	No	No	Within 2 years	ECDHSES, FPA	$3,000	Certified floodplain managers are trained to implement an effective floodplain management program	County and town budgets	High	LPR	PR
2022-T Amherst -002	Protect Lang Brewery Dam to the 0.2% annual chance flood even	1,2	Flood	**Problem:** The Lang Brewery Dam is in the Special Flood Hazard Area. **Solution:** The town will contact the facility managers of privately owned dams and discuss options for protecting the dams to the 0.2% annual chance flood event.	Yes	No	Within 5 years	Town Highway Department	<$500 for outreach, Project cost TBD by engineering for county owned dams	Ensure facility remains in service, protected from flood risk.	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	EAP	PI
2022-T Amherst -003	Protect the town's wastewater pump station to the 0.2% annual chance flood.	1	Flood	**Problem:** A town wastewater pump station is in the Special Flood Hazard Area. The pump station is on Transit Road, near Lapp Road. **Solution:** The town will conduct an engineering study to determine most appropriate measures to protect the town's wastewater pump to the 0.2% annual chance flood event.	Yes	Yes	Within 5 years	Town Highway Department	TBD by feasibility assessment	Ensure continued operation of this critical infrastructure facility	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	SIP	PP
2022-T Amherst -004	Clear debris from Ellicott Creek	2	Flood	**Problem:** Debris, including trees and limbs, block the flow of storm waters through the floodway. This blockage can	No	No	Within 2 years	Town Highway Department	$50,000	Maintain the flow of the Ellicott Creek to	HMGP, BRIC	High	NSP	NR

BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Fire wise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.6.9 Action Worksheets

The following action worksheets have been developed by the Town of Amherst to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 45-Section-9.6-Amherst-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Amherst Action Worksheet			
Project Name:	Protect the town's wastewater pump station to the 0.2% annual chance flood.		
Project Number:	2022-T Amherst-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	A town wastewater pump station is in the Special Flood Hazard Area. The pump station is vulnerable to the flood hazard. The pump station is in East Amherst on Transit Road, near Lapp Road.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct an engineering study to determine most appropriate measures to protect the town's wastewater pump to the 0.2% annual chance flood event.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect to the 0.2% annual chance flood	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the wastewater pump station
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	TBD by feasibility assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	5 years	**Potential Funding Sources:**	FEMA HMGP and PDM, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program
Responsible Organization:	Engineer, Town Highway Department	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Construct new wastewater pump station	Very High	Prohibitively expensive
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

Town of Amherst Action Worksheet			
Project Name:	Protect the Amherst Fire Training Facility to the 0.2% annual chance flood event		
Project Number:	2022-T Amherst-014		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The county-owned Amherst Fire Training Facility is in the special flood hazard area and is vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Fire Training Facility to protect it to the 0.2% annual chance flood event. Options include: •Elevation of facility •Floodproofing of facility •Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensures continuity of operations and protection of assets at the Amherst Fire Training Facility
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	TBD by feasibility assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	5 year
Estimated Time Required for Project Implementation:	Within 5 years	**Potential Funding Sources:**	FEMA HMGP and PDM, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program
Responsible Organization:	Engineer, Town Fire Department	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Shutdown the Fire Training Facility	Medium	Loss of facility for training of critical emergency personnel
	Construct new Fire Training Facility outside the flood hazard area	High	Expensive, likely less expensive to mitigate

9.7 VILLAGE OF ANGOLA

This section presents the jurisdictional annex for the Village of Angola. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Angola's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.7.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Angola's hazard mitigation plan primary and alternate points of contact. The Village of Angola followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Village departments, including: The Clerk-Treasurer, the Mayor's Office, Code Enforcement, and the Department of Public Works. The Clerk-Treasurer represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.7-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Mayor Howard Frawley Address: 41 Commercial St Angola, NY 14006 Email: angolamayor@verizon.net	Name/Title: Nicole Milks, Clerk-Treasurer Address: 41 Commercial St Angola, NY 14006 Phone Number: 716-549-1126 Email: angolaclerk@verizon.net
NFIP Floodplain Administrator	
Name/Title: Phil Tremblay, Code Enforcement Officer Address: 41 Commercial St Angola, NY 14006 Phone Number: 716-548-2372	

9.7.2 Municipal Profile

The Village of Angola has a long rich history as a waterfront and railroad community. The village is one square mile in size is entirely located within the Town of Evans and is approximately 22 miles south of downtown Buffalo.

In 1804, Joel Harvey was the first white person to settle in Angola on the west side of Eighteen Mile Creek. Immigration increased significantly after the War of 1812. Eighteen Mile Creek and other waterbodies spurred development of grist and sawmills which stimulated development. The arrival of a railroad in 1852 was another economic boost. The village incorporated in 1873. During the 1900's shifts from railroads to personal automobiles resulted in a decline in village commercial activity, though seasonal residences continued to thrive.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The latter half of the 20th Century saw several major employers in the village shut down. In June 2004, an attempt to dissolve the village was unsuccessful (Village of Angola website 2020).

According to the U.S. Census, the 2010 population for the Village of Angola was 2,127. The estimated 2019 population was 2,373, a 12 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.4 percent of the population is 5 years of age or younger and 16.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.7.3 Jurisdictional Capability Assessment and Integration

The Village of Angola performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6 (Mitigation Strategy) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.7.3). The Village of Angola's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Angola. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.7-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	1974 Village Code	Local	Mayor
Comments: NYS Uniform and Energy Code 2020; Regulated at local and state levels. The Uniform Code (19 NYCRR Parts 1219 to 1229) now includes the 2015 editions of the code books published by the International Code Council (the "2015 I-Codes"), as amended by the publication entitled the 2017 Uniform Code Supplement (publication date: July 2017).. Article 18 of the Executive Law (§§ 370 through 383) establishes the State Fire Prevention and Building Code Council, directs the Code Council to promulgate and maintain the Uniform Code, and charges each city, town, and village in the State (with the exception of the City of New York) with the duty of administering and enforcing the Uniform Code within its municipal boundaries.					
Zoning Code	Yes	Yes	1974 Village Code	Local	Mayor
Comment: Article IX, Section 2, of the State Constitution and by the various state enabling statutes. In New York, the zoning enabling acts continue to require that zoning be undertaken "in accord with a well-considered plan"11 or "in accordance with a comprehensive plan."12 Unless the town, city or village has adopted a comprehensive plan document using the more recently-enacted statutes (described later herein), local officials must refer to the extensive body of case law to determine how zoning can meet the more general "comprehensive plan"					

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
requirement.**May be impacted by State wetland regulations which protect wetlands greater than 12.4 acres and established buffer zones. Regulated at local level					
Subdivision Ordinance	Yes	Yes	1974 Village Code	Local	Mayor
Comment: Subdivision is defined in the State enabling Statutes as: the division of any parcel of land into a number of lots, blocks, or sites as specified in a local ordinance, law or regulation, with or without streets or highways, for the purpose of sale, transfer of ownership, or development. There is not a requirement by NYS for subdivisions. Each municipality is permitted to further define subdivision for its own purposes in connection with its subdivision review procedure. The enabling statutes provide that a plat showing a division of land which is subject to a municipality's subdivision regulations, may not also be subject to review under its site plan review authority. (general city law s. 32 & 33, Town Law s. 276 & 277, Village Law s. 7-728 & 7-730).					
Stormwater Management Ordinance	Yes	Yes	2007 Village Code	Local	Mayor
Comment: Codes Rules and Regulations of the State of New York, Title 6. Department of Environmental Conservation, Chapter X. Division of Water Resources, Subchapter A. General Article 3. State Pollutant Discharge Elimination System, Part 750. State Pollutant Discharge Elimination System (SPDES) Permits. New York Environmental Conservation Law, Article 17, Titles 7, 8 and Article 70. New development and redevelopment projects that result in a land disturbance of one acre or greater, including projects less than one acre if they are part of a larger common plan of development or sale or if controlling such activities in a particular watershed is require a permit by the Department.					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.

Flood Damage Prevention Ordinance	Yes	Yes	Chapter 108 - 2021	Local	Code Enforcement
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. • It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.7-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.7.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Phil Tremblay, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Angola.

Table 9.7-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Angola	1	18	$83,162	5	0

Source: FEMA, 2019

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*

RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

The Village of Angola has minimal areas prone to flooding and does not keep a list of properties that have been damaged by flooding. The flood hazard maps adequately address risk within the village. There are currently no RiskMAP projects underway.

NFIP Compliance

The Village Code Enforcement Officer is responsible for floodplain management. There are no CFMs on staff within the jurisdiction and the village does not need additional assistance or training to support floodplain management. The floodplain management program meets minimum requirements, and was last updated on May 10, 2021. The last CAC visit was on June 20, 2007, and the CAV was conducted on April 1, 1983. There are no outstanding compliance issues.

9.7.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Angola has identified the following routes and procedures to evacuate residents prior to and during an event.

- South Main Street Residents shall take South Main Street to Route 20
- Residents on the north side of the railroad tracks shall take Commercial Street to Route 5; Lake Street to Route 5; or North Main Street to Beach Road

Sheltering

The Village of Angola has identified the following designated emergency shelters within the Village.

Table 9.7-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
MPB	22 Prospect	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
Fire Station 2	151 S. Main	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown
JT Waugh School	100 High St.	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Angola has identified the following sites suitable for placing temporary housing units.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.7-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Lake Shore Schools Athletic Fields	100 High St.	Unknown	Unknown	Unknown	Unknown

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Angola has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.7-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify Permanent Housing Locations. See Mitigation Action 2022-V. Angola-#001.					

9.7.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.7-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.7-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years						
None Anticipated						

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.7.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Angola's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Angola has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

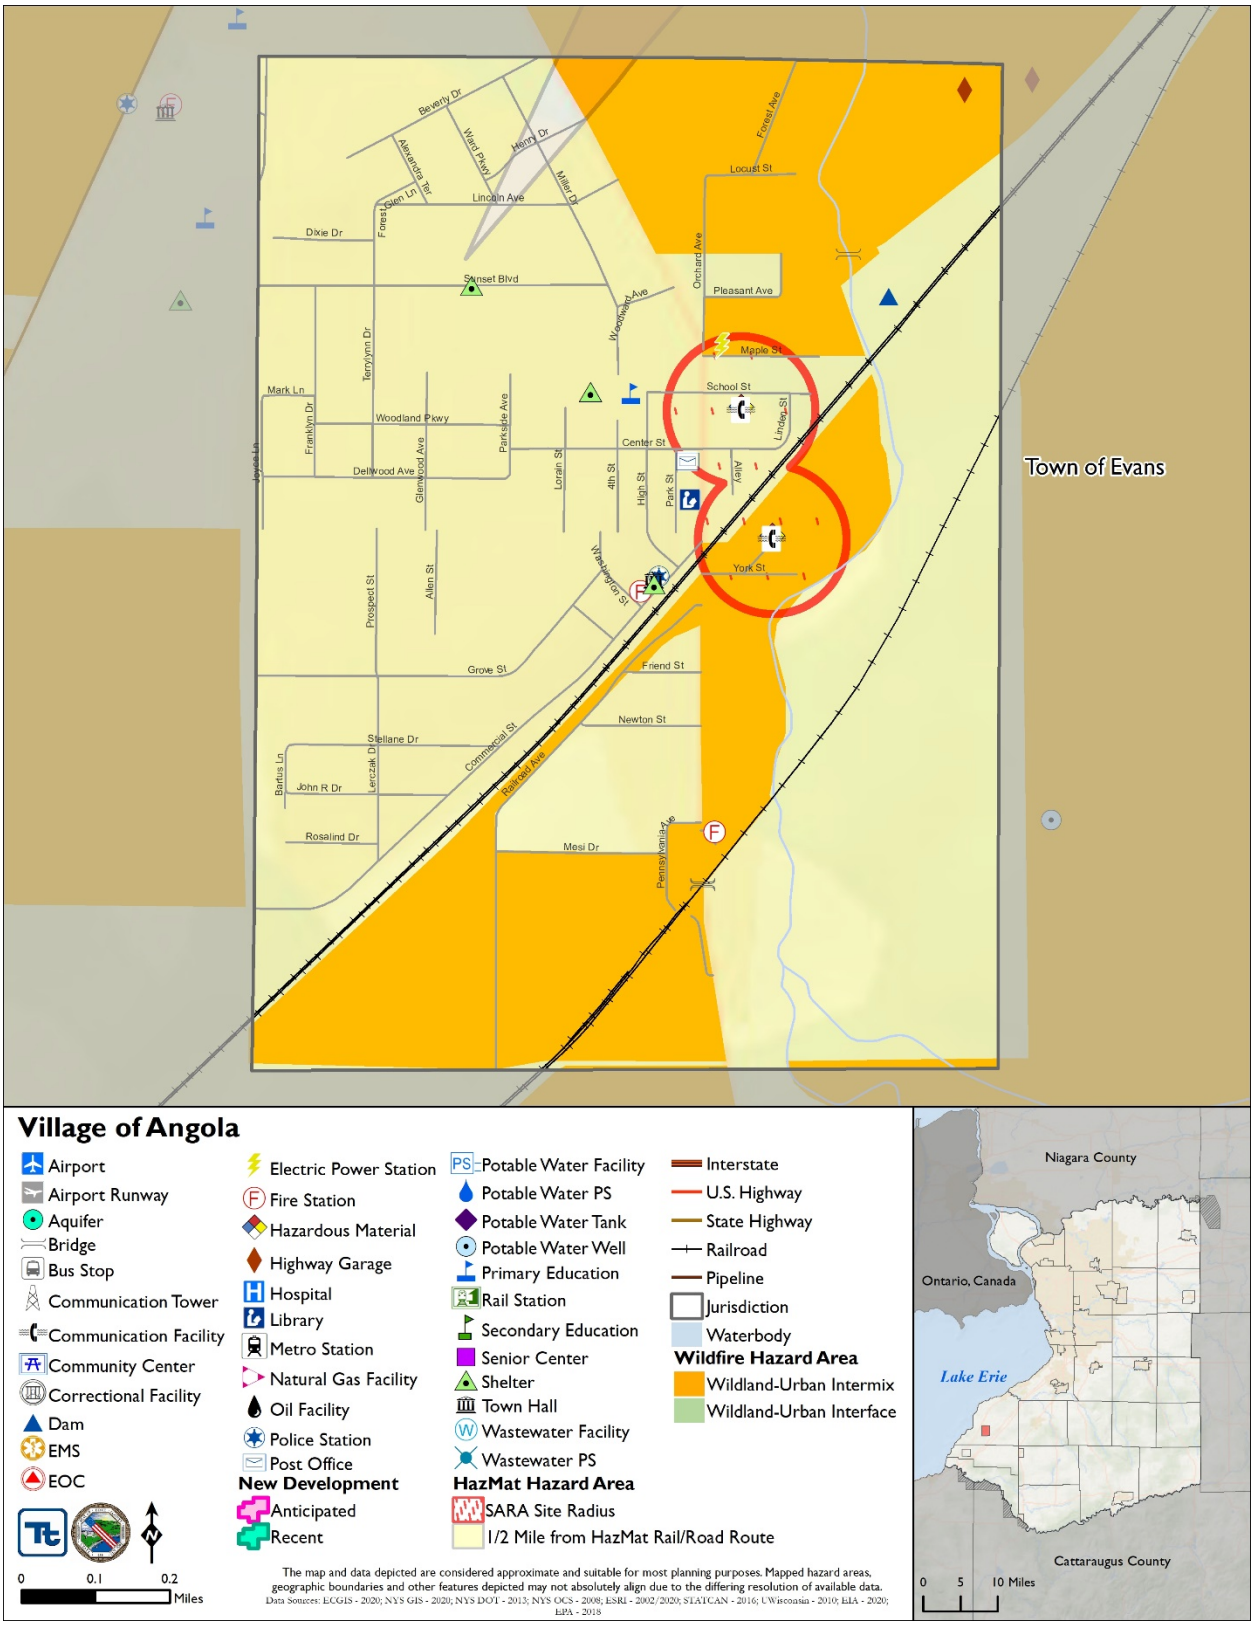
Figure 9.7-3. Village of Angola Hazard Area Extent and Location Map 3



Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Angola's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.7-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.7-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 12, 2015	Seiche	No	A strong low-pressure system with persistent winds produced a seiche on Lake Erie. Water levels rose nearly six feet in a few hours with the water level crest in Buffalo reaching 9.15 feet.	Flooding was reported in Angola along Route 5. Route 5 was temporarily closed in areas multiple times due to high water and debris on the roadway.
January 10, 2016	Lake-Effect Snow	No	A strong cold front resulted in significant lake effect snow across Lake Erie, accumulating up to 3 inches per hour.	An estimated 25 inches of snow was reported in Angola. The greatest snow accumulations of the event occurred in Angola.
January 4-7, 2017	Lake-Effect Snow	No	A long duration, high impact lake effect snow event produced three to four feet of snow east of Lake Erie and Lake Ontario. Snowfall rates reached up to 5 inches per hour, which combined with people leaving work and school in the afternoon, brought traffic to a standstill. Snow accumulated so quickly that the plows were unable to keep up and people abandoned their cars on the Thruway and local roads, evening commutes reached 6 hours or mere and school busses were unable to bring students home. Snow continued into Saturday morning, creating hazardous road conditions along I-90 near Angola.	Four to five inches of snow per hour fell in Angola, bringing traffic to a standstill. Plows were unable to keep up with clearing the snow and people abandoned their cars on the New York Thruway and local roads. Total snowfall report in Angola amounted to 19 inches.
October 27-November 1, 2019	Lakeshore Flooding and High Winds	DR-4472-NY	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	More than 500 NYSEG customers lost power in Evans and Angola.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Angola's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Angola. The Village of Angola has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village indicated that an earthquake is unlikely in the area, and reduced the calculated risk to being Medium.

Table 9.7-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.7-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None Identified						

Source: FEMA DFIRM

Identified Issues

After review of the Village of Angola's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Angola has identified the following vulnerabilities within their community:

- The village has expressed interest in developing a plan for evacuation in the event of a train derailment.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- The availability of cleaning supplies, personal protective equipment, medical professionals, and having a Contingency/back-up plan for staffing has been an emerging issue for schools amid the Covid-19 Pandemic.

9.7.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.7-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	N/A	Flooding	Highway Department	Maintenance of creek bed to prevent flooding	Ongoing Capability	Cost	-	1. Complete 2. 3. Discontinue.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
2		All Hazards	Fire Department/ Disaster Coordinator	Program to educate residents on what to do during and after a disaster	In Progress	Cost	-	1. Yes 2. To include in 2022 HMP to include preparedness information on website and notify media outlets. See Mitigation Action #003 3.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
3		Winter Storms	Code Enforcement	Review and Revise the building codes for snow loads	No Progress	Cost	-	To include in 2022 HMP. See Mitigation Action #004
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
4		Winter, Severe, Wind, and Ice Storms	Code Enforcement	Work with the electric company on trimming trees to reduce power line failures throughout the Village	Complete	Cost	Low	1. Complete 2. 3. Discontinue.
						Level of Protection	High	
						Damages Avoided; Evidence of Success	Yes	
5		Flooding	Code Enforcement	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances.	Complete	Cost	Low	1. Complete 2. 3. Discontinue.
						Level of Protection	Medium	
						Damages Avoided; Evidence of Success	Yes	
6		Flooding	Code Enforcement	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs.	Complete	Cost	Low	1.Complete 2. 3. Discontinue.
						Level of Protection	High	
						Damages Avoided;	Yes

						Damages Avoided; Evidence of Success	-	

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Angola has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The Disaster Coordinator/Emergency Manager organized evacuation efforts and emergency response plans for residents on how to evacuate the village in event of a train disaster/derailment.
- The DPW & Water Department provides notification of need to boil water and distributes water in the event of contamination.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Angola participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.7-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X			X	X	X	X			
Cyber Attack	X			X	X	X	X			
Earthquake	X			X	X	X	X			
Expansive Soils	X			X	X	X	X			
Extreme Temperature	X			X	X	X	X			
Flood	X		X	X	X	X	X	X		
Hazardous Materials	X			X	X	X	X			
Landslide	X			X	X	X	X			
Pandemic	X			X	X	X	X			
Severe Storm	X		X	X	X	X	X	X		
Severe Winter Storm	X		X	X	X	X	X	X		
Utility Failure	X			X	X	X	X			
Wildfire	X			X	X	X	X			

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.7-19 summarizes the comprehensive-range of specific mitigation initiatives the Village of Angola would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.7-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

				the municipal code. The Ordinance will include a detailed plan for the deployment of emergency services before, during, and after a hazard event, and will include specifics about mitigation, preparedness, response, and recovery.										

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*

Attachment: 46-Section-9.7-Angola-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.8 Town of Aurora

This section presents the jurisdictional annex for the Town of Aurora. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Aurora's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.8.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Aurora's hazard mitigation plan primary and alternate points of contact. The Town of Aurora followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: clerk, engineer, building inspector, and disaster preparedness coordinator. The Clerk represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.8-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact

9.8.2 Municipal Profile

The Town of Aurora was founded in 1818, The town is 36 square miles in size and includes the Village of East Aurora, plus the hamlets of Jewettville, Griffins Mills, West Falls and a portion of South Wales. The town is part of Buffalo's "Southtowns" and is bordered on the north by the Town of Elma, on the east by the Town of Wales, on the south by the Town of Colden and on the west by the Town of Orchard Park. US Route 20A and New York State Route 240 are important transportation route through the southwest part of the town (Town of Aurora 2021).

One of the town's earliest and most prominent settlers was a young Millard Fillmore; the President's home is a National Historic Landmark. The town was a well-known center of horse racing in the late 1800s (Town of Aurora 2021). The town remains predominately rural in nature. Farming, once the predominant land use in the

region, has given way to open land and rural residential growth. Some scattered small-scale commercial and convenience retail uses have developed in the more rural areas of the town (Regional Comprehensive Plan, 2012).

According to the U.S. Census, the 2010 population for the Town of Aurora was 7,546. The estimated 2019 population was 7,599, a 0.7 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 3.2 percent of the population is 5 years of age or younger and 18.2 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.8.3 Jurisdictional Capability Assessment and Integration

The Town of Aurora performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.8.3). The Town of Aurora's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Aurora. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.8-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	2020 NYS Building	Local	Code Enforcement
Comment: *The Town of Aurora Code Enforcement Officer is delegated the authority to issue building permits under the circumstances described in § 280-a of the Town Law, provided that the following conditions are met by each applicant:* *A. For ingress and egress, each applicant shall furnish proof of a fifty-foot permanent easement or right-of-way or title to an area at least 50 feet in width for ingress and egress, extending from the public street or highway to the building.* *[Amended 1-11-2010 by L.L. No. 1-2010]* *B. The front yard of the applicant's lot shall be that portion facing the public highway; and if more than one highway exists, the Code Enforcement Officer shall determine the front of the lot using the Zoning Map[1] and the Town records as a guide.* *C. The applicant shall install a culvert of a type approved by the Town Highway Superintendent.*					

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
D. Installation of culverts and excavation and backfill of pipe trenches shall be in accordance with the Standard Specifications and Details for Materials and Construction of the Town of Aurora. *E. The applicant shall conform to all other zoning requirements as set forth in Chapter 116, Zoning, and the Table of District Regulations.*					
Zoning Code	Yes	No	Chapter 116 of Aurora Town Code	Local	Code Enforcement
Comment: The zoning ordinance has the following guidance for municipal development. 1) Buildings may be erected or substantially altered in any area depicted as a floodway or special flood hazard area. 2) Future off-street parking areas must have adequate room for sanitation, snow removal, emergency and other public service vehicles. 3) Wind energy conservation systems shall provide a contour/topography map of the property and adjacent parcels of sufficient scale as to clearly indicate appropriate drainage and erosion impact on and off site as well as jurisdictional wetlands. 4) The wind energy conservation system applicant shall provide a certificate from a qualified licensed professional engineer certifying that the tower and its foundation meet applicable structural safety standards, including but not limited to wind loading and seismic effects due to soil conditions.					
Subdivision Ordinance	Yes	No	Chapter 99 of Aurora Town Code	Local	Town Board
Comment: *1) Sketch plan to include data showing how development may impact an adjoining property, the availability of utilities, the effect on drainage systems, natural watercourses, and other environmental concerns. 2) Where a subdivision or open development area is traversed by a watercourse, drainageway, channel or stream, there shall be provided a stormwater easement or drainage right-of-way conforming substantially to the lines of such watercourse and such further width or construction, or both, as will be adequate for the purpose. 3) Land subject to flooding shall not be platted for residential occupancy nor for such other uses as may increase danger to life or property or aggravate the flood hazard. 4) Surface water retention facilities shall be developed where required in order that the rate of stormwater runoff after construction is no greater than the rate of runoff prior to construction.*					
Stormwater Management Ordinance	Yes	Yes	Chapter 96 of Aurora Town Code	Local	Stormwater Management Officer
Comment: Stormwater Management Ordinance states the following: *1) At a minimum, a development's site map should show the total site area; all improvements; areas of disturbance; areas that will not be disturbed; existing vegetation; on-site and adjacent off-site surface water(s); wetlands and drainage patterns that could be affected by the land development activity; existing and final slopes; locations of off-site material, waste, borrow or equipment storage areas; and the location(s) of the stormwater discharge(s). 2) A description of the pollution prevention measures that will be used to control litter, construction chemicals and construction debris from becoming a pollutant source in stormwater runoff.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	Yes	-	-	-
Comment:					
Site Plan Review	Yes	No	Chapter 95 Aurora Town Code	Local	Planning Board
Comment: 1) An applicant's site plan will include the following: legal data, impact on the environs, natural features, existing man-made features, proposed development, impact on stormwater pollution, and other information or materials. If a stormwater pollution prevention plan (SWPPP) is submitted pursuant to § 95-4B(6) of this chapter, such SWPPP shall be considered by the Town Board, Planning Board and others as part of an analysis of an applicant's site plan, and the site plan and SWPPP shall not be approved unless they comply with the performance and design criteria and standards in Chapter 96, Stormwater Management, of the Code. 2) Topographical features, including a map showing existing contour intervals of no more than five feet. Two-foot contour intervals will be required if the topography is relatively flat. Areas of steep slopes should be delineated as necessary. 3) Hydrologic features, which should include drainage and natural runoff patterns, flood zones, noted wetlands, vegetative cover and average depth to groundwater.					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment:					

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 68 of the Aurora Town Code	Local	Planning Board/ Code Enforcement
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* *F. Qualify and maintain for participation in the National Flood Insurance Program.* **BFE+2 feet for all construction in the SFHA (residential and non-residential)*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 96 of Aurora Town Code	Local	Town Highway Department
Comment: *The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 97-1A of this chapter. This chapter seeks to meet those purposes by achieving the following objectives:* *(1) Meet the requirements of Minimum Measures 4 and 5 of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Municipal Separate Stormwater Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised.* *(2) Require land development activities to conform to the substantive requirements of the New York State Department of Environmental Conservation State Pollutant Discharge Elimination System (SPDES) General Permit for Construction Activities, Permit No. GP-02-01, or as amended or revised.* *(3) Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels.* *(4) Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality.* *(5) Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable.* *(6) Reduce stormwater runoff rates and volumes, soil erosion and non-point-source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Aurora to oversee and track development.

Table 9.8-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Town Board approval
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain development permits are required.
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Substantial fallow agricultural land throughout the Town is available for development.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Aurora and their current responsibilities which contribute to hazard mitigation.

Table 9.8-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Appointed volunteer Board – The Planning Board reviews all development projects and subdivision developments, and makes recommendations on all commercial, industrial, and business development. This board also makes recommendations regarding proposed changes to the ordinance. Zoning and development issues are handled through the Building and Code Enforcement Department.
Zoning Board of Appeals	Yes	Appointed volunteer board – The Zoning Board of Appeals hears and deliberates applications for variances to the town ordinances. Applications to the Zoning Board of Appeals are handled through the Building and Code Enforcement Office.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Duty of Planning Bd. – The Planning Board reviews all development projects and subdivision developments, and makes recommendations on all commercial, industrial, and business development. This board also makes recommendations regarding proposed changes to the ordinance. Zoning and development issues are handled through the Building and Code Enforcement Department.
Open Space Board/Committee	Yes	Appointed volunteer board - The Town Board created the Town of Aurora Open Space Committee in January 2007. The mission of the committee is to inventory, evaluate and prioritize the Town of Aurora's open space resources and work with the community to develop and promote a plan for the protection of these resources.
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department
Construction/Building/Code Enforcement Department	Yes	Building & Code Enforcement - provide all building and code enforcement services to the town and village. They ensure safety and code compliance through the implementation and enforcement of all local, state and federal codes, regulations and zoning ordinances.
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Part of Highway Dept. - The Highway Department maintains 62 miles of town roads. Generally roads are repaired and paved in the spring and summer seasons. In the winter the Highway Department plows and salts all town roads and approximately 70 miles of Erie County roads per contract with the county.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		In the spring, summer and fall, our highway crews are out mowing roadsides, trimming and cutting down dead trees, cleaning out our ditches, installing new culvert pipe when needed, chipping branches and picking up chunk wood around town. The department does not pick up brush from land clearing and tree work done by private contractors. Four times per year crews pick up junk tires and car batteries and we have one electronics recycling pick up for residents (outside of the village) in the fall. Leaf pick up begins after Columbus Day. For more information on garbage and recycling see below. In May 2020 the Town of Aurora entered into a contract with the Town of Orchard Park to provide mulch and compost to Town of Aurora residents at the same rate as Orchard Park residents. Sewer districts in the Town of Aurora are handled by the Erie County Sewer Authority.
Mutual aid agreements	Yes	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering firm on retainer
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering firm on retainer
Planners or engineers with an understanding of natural hazards	Yes	Engineering firm on retainer
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Building Dept. Personnel - All Town and Village building and code enforcement services are handled by this office. The purpose of the department is to ensure safety and code compliance through the implementation and enforcement of all local, state and federal codes, regulations and zoning ordinances.
Surveyor(s)	No	-
Emergency Manager	Yes	Appointed Emergency Management Director and Assistant
Grant writer(s)	Yes	Town Clerk and outside contractor – has various capabilities.
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)		-

Fiscal Capability

The table below summarizes financial resources available to the Town of Aurora.

Table 9.8-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes*

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Capital improvements project funding	Yes*
Authority to levy taxes for specific purposes	Yes*
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes*
Incur debt through special tax bonds	Yes*
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes*
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

* All would be administered by the Town Board and/or the Town Supervisor

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Aurora.

Table 9.8-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	None	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Aurora.

Table 9.8-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-

N/A Not applicable
NP Not participating
- Unavailable

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.8-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Low
Cyber Attack	Medium
Earthquake	Low
Expansive Soils	Medium
Extreme Temperature	High
Flood	Medium
Hazardous Materials	High
Landslide	High
Pandemic	High
Severe Storm	High
Severe Winter Storm	High
Utility Failure	High
Wildfire	Medium

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.8.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Elizabeth Cassidy, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Aurora.

Table 9.8-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Aurora	12	12	$96,661	7	1

Source: July and September, 2021 NFIP Data.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Flood prone areas in the Town of Aurora include properties along Cazenovia Creek, East Branch South of the Village of East Aurora, Municipal boundary and Cazenovia Creek, and West branch south of West Falls. There is no list of properties that have been damaged, based on municipal records.

The town does not maintain a list of property owners interested in flood mitigation at this time and does not have any RiskMAP project underway. The town has not had any substantial damage determinations and has not mitigated any properties within the jurisdiction. Based on municipal knowledge, the existing flood maps adequately address the flood risk in the jurisdiction.

NFIP Compliance

The town of Aurora Code Enforcement office is responsible for NFIP compliance and does not have any certified floodplain managers on staff. The department also does not have adequate resources to determine future damage due to climate change and would need occasional training in basic floodplain management.

The municipal officer provides permit review as NFIP administration services and determines substantial improvement determination based on plan and code review of project.

The town does not have any barriers to running an effective NFIP program and does not have any NFIP compliance violations. The town's most recent Community Assistance Visit was March 18, 2008 and had a CAC visit on 05/04/2005 and is due for another visit soon. The local law number for the local flood damage prevention ordinance is Chapter 68 of the town Code and was last amended on April 8, 2019. Finally, the town does not exceed the floodplain requirements set by FEMA and does not have any other plans or ordinances that support the NFIP program. The town is not interested in participating in the FEMA CRS program due to their lack of knowledge of the program.

9.8.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability. Information for this section was provided by the town clerk with input from the engineer, building inspector, and disaster preparedness coordinator.

The Emergency Operations Center is available at the East Aurora Fire Department, 33 Center Street, East Aurora, New York 14052. The (alternate) Emergency Operations Center is located at the Town of Aurora Parks and Recreation Maintenance Facility Offices, 251 Quaker Rd. East Aurora New York 14052. Other EOC facilities will be utilized as necessary as determined by size, severity, and relocation due to disaster damage.

The following core functions shall be addressed prior to an emergency with warning or during an emergency without warning, to an incident or event: I. Direction and control II. Communications III. Warning IV. Emergency public information V. Evacuation VI. Mass care VII. Health and medical services VIII. Emergency response by local fire, rescue, EMS, and police IX. Resource management X. Protective measures.

The Emergency operations center (EOC) will prioritize resource acquisition based on the following criteria:

- Provide warning and support evacuations
- Support dissemination of emergency public information
- Reestablish communications to assist response actions

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- Reestablish access to impacted areas and facilities
- Establishment of search and rescue operations, transport of victims, and medical care
- Support mass care operations including food, water, shelter
- Restoration of critical infrastructure
- Protection of public property and environment
- Initiation of short and long-term recovery programs

All response and recovery activities are detailed in department/division procedures and SOPs, and appropriate state and federal recovery guidelines. The process for collecting and analyzing data, developing objectives and action plans, and documenting critical incident information in the EOC, is guided by the Information and planning SOP.

Evacuation Routes and Procedures

The town would rely on the local Police, County Sheriffs, and the three volunteer fire companies, along with local, County, State and Federal emergency personnel to coordinate evacuation routes depending on the event/situation. There are several main transportation routes in the town, including but not limited to state roads: Route 20A, Route 400, Route 16; county roads: Mill Road, Center Street, Bowen Road, Porterville Road and Girdle Road.

Sheltering

The Town of Aurora has identified the following designated emergency shelters within the town.

Table 9.8-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Aurora Senior Center	101 King St., E. Aurora	100	No	Yes	Yes	None – local FD or EMT would be called	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Aurora has identified the following sites suitable for placing temporary housing units.

Table 9.8-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code	Ownership
Parking lot/fields	1003 Center Street	Unknown	Parking lot/fields	Electric, Gas, Water	No	EAUF School District
Park	Emery Road east of Underhill	Unknown	Park	Electric, Gas, Water	No	Erie County

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code	Ownership
Baseball fields	300 Gleed Avenue	Unknown	Baseball fields	Electric, Gas, Water	No	Town of Aurora
Park	736 Warren Drive	Unknown	Park	Electric, Gas, Water	No	Town of Aurora
Park	401 West Falls Road	Unknown	Park	Electric, Gas, Water	No	Town of Aurora
Park	Buffalo Road west of village line;	Unknown	Park	Electric, Gas, Water	No	NYS Office of Parks
Park	Knox Road west of village line; south side of road	Unknown	Park	Electric and Gas	No	NYS Office of Parks - managed by Town of Aurora
Field	Girard Avenue at Buffalo Road	Unknown	Field	Electric, Gas, Water	No	Fisher Price Inc./Mattel
Parking lot/field	141 Girard Avenue	Unknown	Parking lot/field	Electric, Gas, Water	No	EAUF School District

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The town would rely on County, State and Federal guidance, along with Red Cross and FEMA guidance, as to where to place temporary and/or permanent housing units in the event of an occurrence that would require these units. The town believes it should not designate a site that is not owned by the town i.e., school grounds, private property, county property or state property. Most of the large tracts of land that would/could accommodate the units are town, county or state parks. Water, gas and electric are available at the road throughout most of the Town of Aurora. Public sewer is available in limited areas that are already developed with residential housing. The location of private septic systems is a function of the Erie County Health Department.

Table 9.8-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
1003 Center St.	1003 Center St.	200 sites	Field	All	None

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.8.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.8-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.8-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	19	0	20	0	19	0	19	0	51	0	31	0
Multi-Family	0	0	1	0	0	0	1	0	0	0	0	0
Other (commercial, mixed-use, etc.)	0	0	0	0		0	1	0	0	0	0	0
Total Permits Issued	19	0	21	0	19	0	21	0	51	0	31	0

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
Aurora Mills	Residential	85	Mill Rd/Aurora Mills Dr/Creekstone Dr/ Millstone Dr	Wildfire-Urban Intermix Hazard Area, NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roads	50% complete
Reed Hill	Res	33	Reed Hill Dr/Creekview Dr	Wildfire-Urban Intermix Hazard Area, NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roads	50% complete
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

*** The number of permits noted in the preceding chart do not include permits issued for additions, alterations, fences, accessory structures (ex: porches, pools, etc.); accessory buildings (ex: sheds, garages, etc.)*

**** This property could not be geocoded to perform a spatial analysis.*

9.8.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Aurora's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Aurora has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.8-1. Town of Aurora Hazard Area Extent and Location Map 1

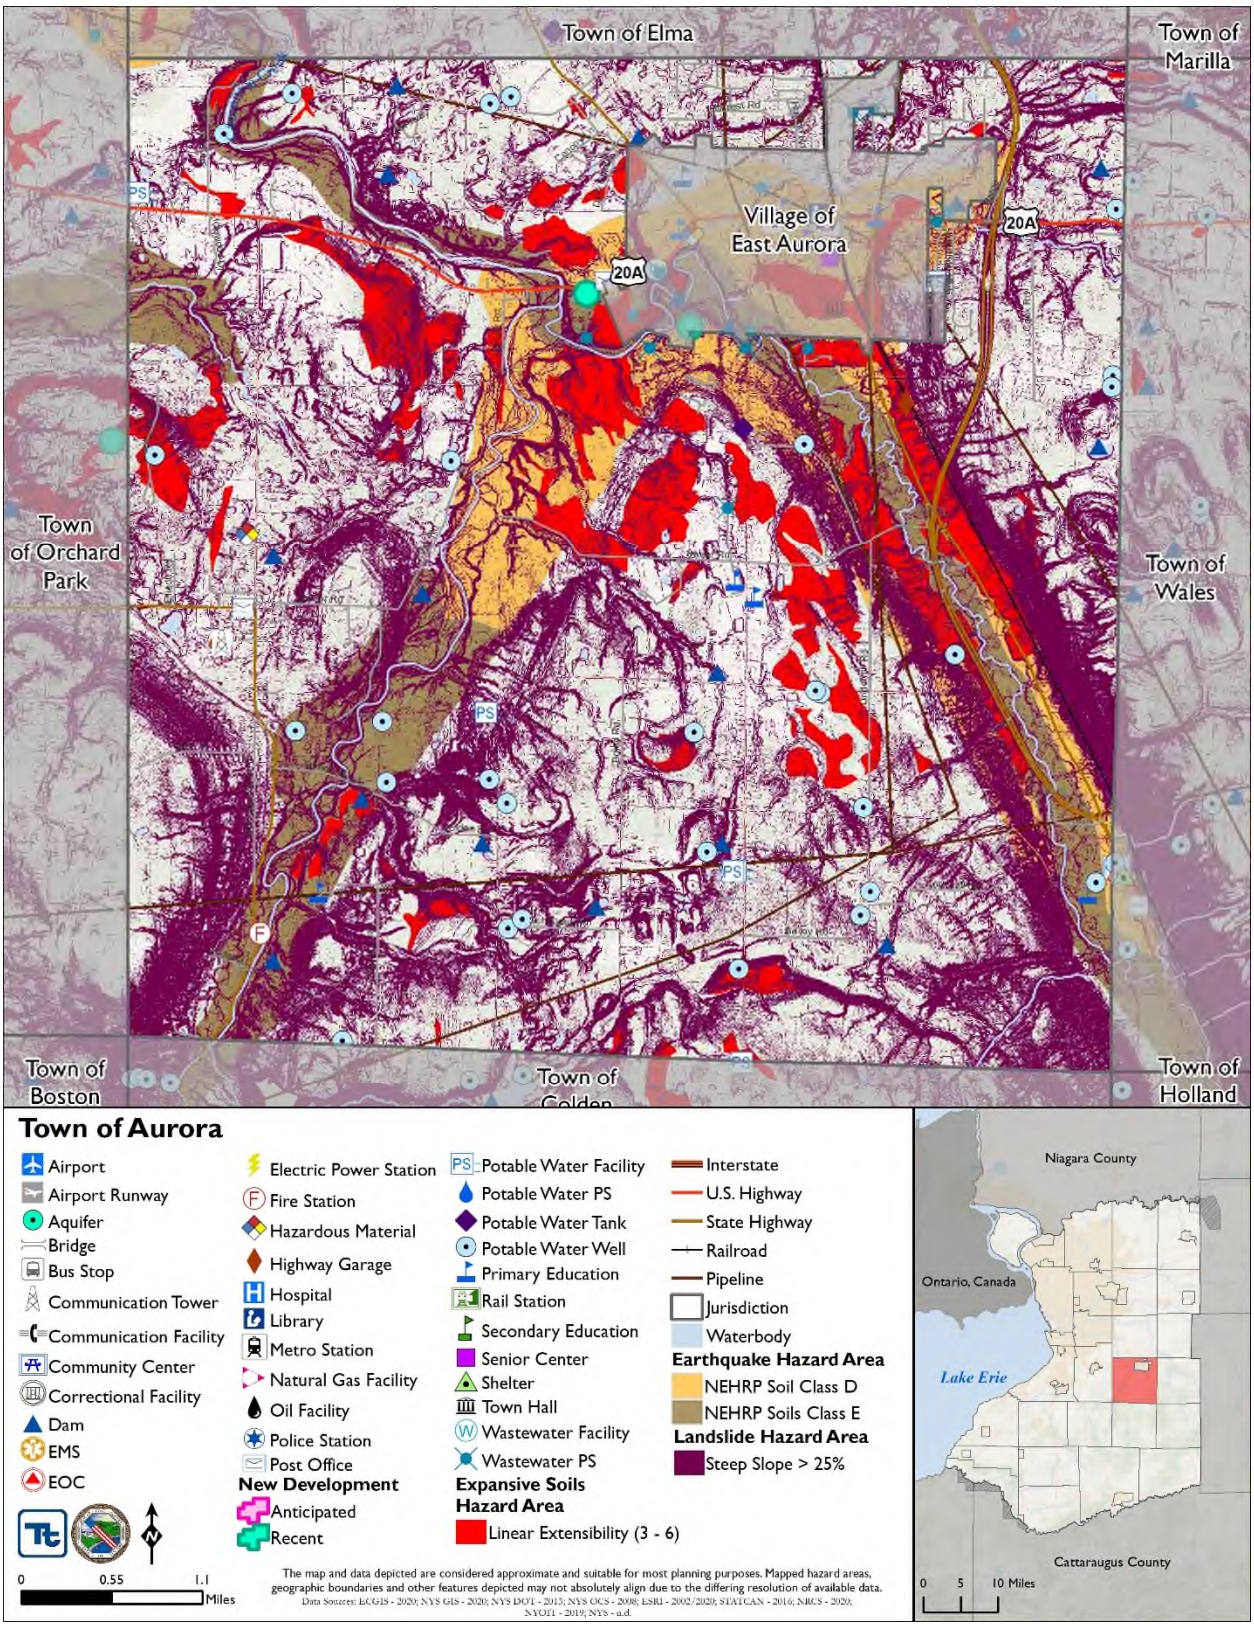
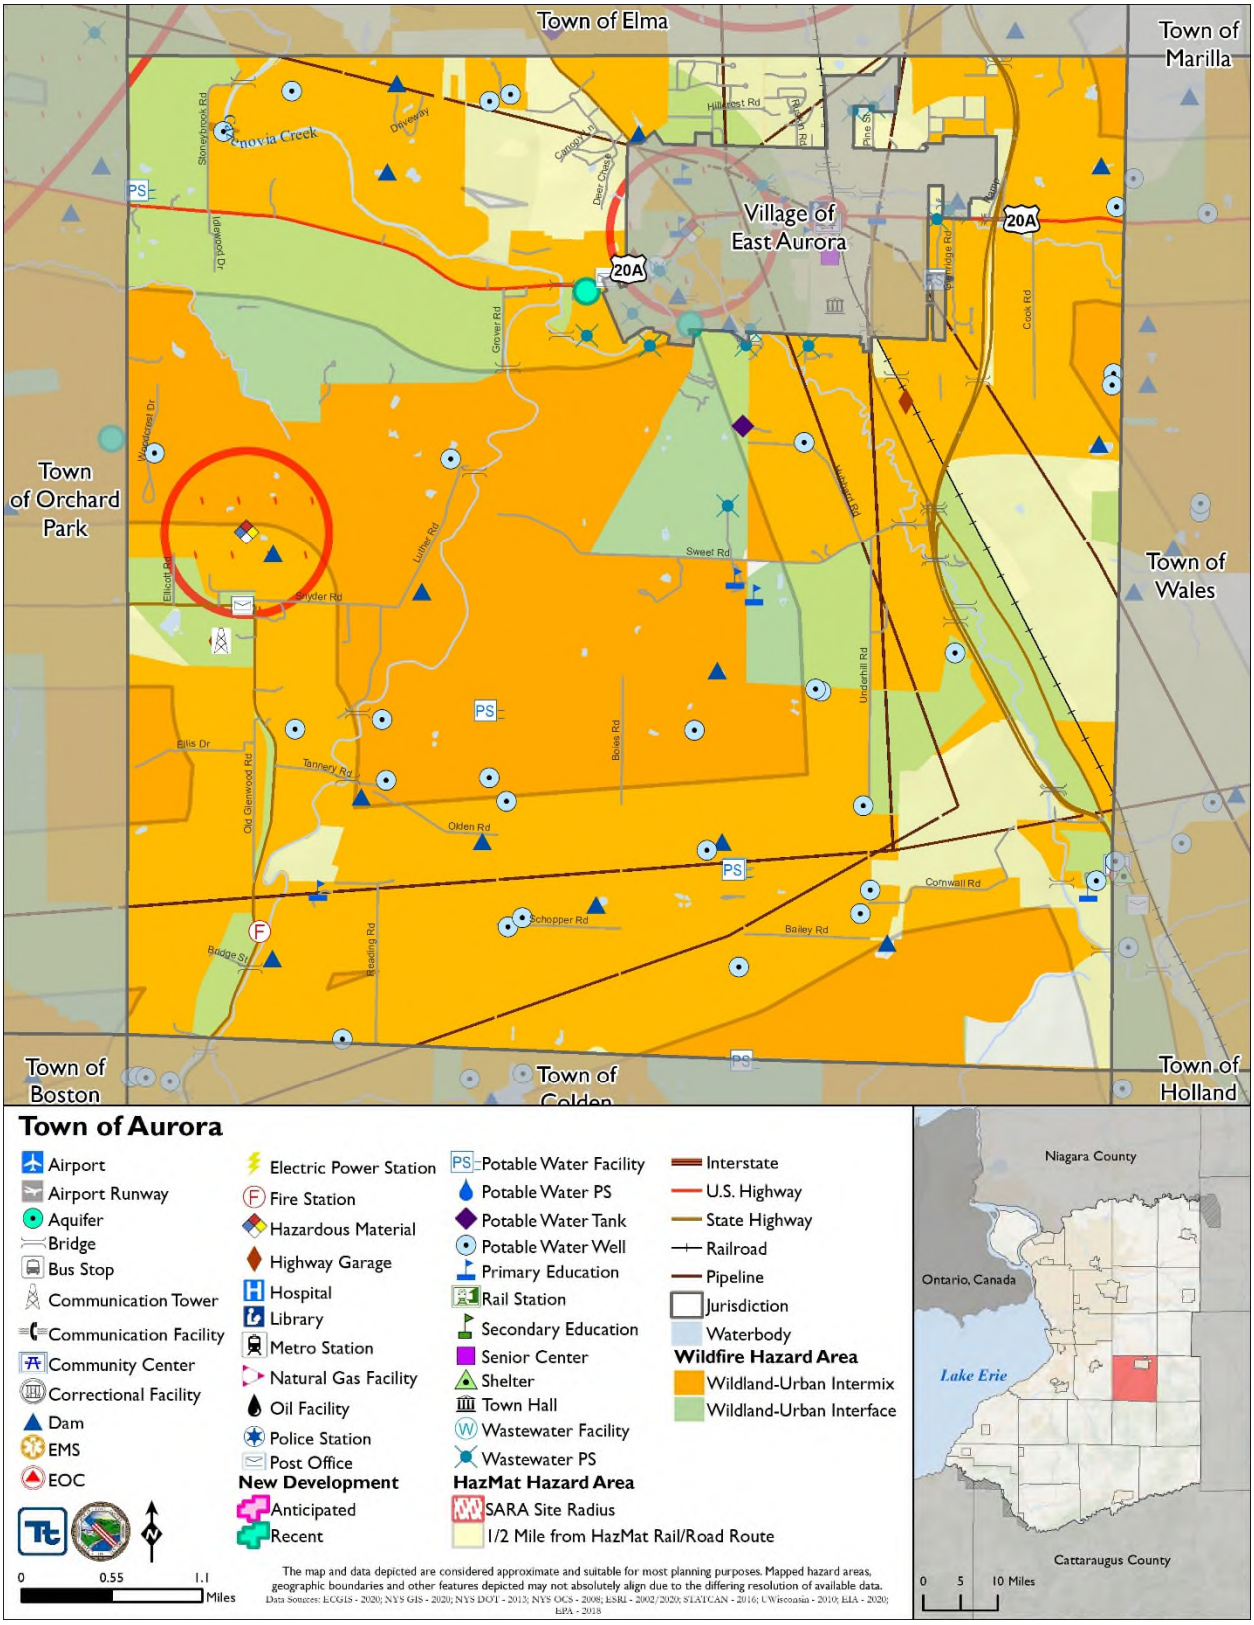
Figure 9.8-2. Town of Aurora Hazard Area Extent and Location Map 2



Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.8-3. Town of Aurora Hazard Area Extent and Location Map 3



Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Aurora's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.8-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.8-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the town did not report damages
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a	Although the County was impacted, the town did not report damages

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to	Although the County was impacted, the town did not report damages

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario	Although the County was impacted, the town did not report damages

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			seiche, and river flooding in the North Country	
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5-hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the town did not report damages
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the town did not report damages
2020-21	COVID 19 - EM-3434	Yes	Pandemic	Businesses closing, social distancing, and multiple deaths across the region.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Aurora's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Aurora. The Town of Aurora has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- High wind events are occurring on more frequent basis (wind speeds in excess of 50-60 mph) which result in downed trees and power outage.
- Recent replacement of culverts on Tannery Brook and work on stream banks will result in less flooding and ice jam along the stream.
- No changes in Coastal Erosion, Earthquake, Expansive Soils, Extreme Temperatures, Landslides, Tornados, Wave Action, Wildfire, and Winter Storm since the 2015 plan hazard rankings.
- Coastal erosion is not an issue since the town does not have coast. Flood is the highest concern of all hazards. Pandemic is an issue, but town has limited capabilities to prevent this. Severe Storm, Severe Winter storm, are not the highest hazard and thus are ranked lower. Wildfire is not a major issue, while utility failure is a big issue with storms and flood.

Based on the above, the town will re-rank flooding from Low to High, Severe Storm from High to Medium, Severe Winter Storm from High to Medium, and Wildfire from High to Low.

Table 9.8-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	High	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Medium	Medium	Medium	Medium	High	Low

Note: *The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction*

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.8-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	**0.2% Event**	
None identified				

Source: FEMA 2021

Identified Issues

After review of the Town of Aurora's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Aurora has identified the following vulnerabilities within their community:

- Weather conditions are a concern. While Lake Erie and Ontario temper the summer weather, it is not unusual for severe summer weather to occur. Severe thunderstorms, heavy rains, downbursts, and occasional tornado watches and warnings. A history of tornados and micro bursts is noted with minor damage. Heavy rains have caused localized flooding in areas around Tannery Brook as previously stated.
- In winter, the path of storms and the proximity of Lake Erie combine to create extreme winter weather conditions.
- Tannery Brook has continuously seen major flooding and properties along the waterbody have and continue to be vulnerable to frequent flooding along the creek, especially the nursing home.
- The Federal Readiness and Emergency Management in Schools (REMS) has guidance on schools to conduct necessary mitigation measures to determine readiness around hazards which is not something the town is participating in at this time.
- The town has historically had issues around water shortage during a hazard event and as a result has had to rely on other municipalities for emergency water supply. With increasing climate change related extreme weather and drought related events, the town would need to first determine the areas that need potable water supply.
- The town does not have adequate backup power for the Buffalo and Emery Road temporary housing locations. While some areas of both facilities do have access to electricity, some areas do not and thus are not fully equipped to handle necessary emergency shelter needs during disasters.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.8.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.8-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Nursing Home Vulnerability: Revise Emergency Response Plan	Flooding, Fire, HAZMAT	Not Identified	Emergency Management	Complete	Cost	Low	1. Discontinue 2. 3. Project is within the Village of East Aurora.
						Level of Protection	Unsure	
						Damages Avoided; Evidence of Success	Unsure

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Aurora has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- No additional actions identified.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Aurora participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.8-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X								X
Cyber Attack		X								X
Earthquake		X								X
Expansive Soils		X								X
Extreme Temperature		X								X
Flood	X	X			X	X			X	X
Hazardous Materials		X								X
Landslide		X								X
Pandemic		X								X
Severe Storm		X								X
Severe Winter Storm		X								X
Utility Failure		X				X				X
Wildfire		X								X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.8-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Aurora would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Error! Reference source not found. provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.8-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Aurora T-001	School Vulnerability	3,4	Flood	**Problem**: The Federal Readiness and Emergency Management in Schools (REMS) has guidance on schools to conduct necessary mitigation measures to determine readiness around hazards which is not something the town is participating in at this time. **Solution**: The eight primary schools will conduct a vulnerability assessment to determine the needs and improvement needed to mitigate future hazards and prepare for any natural and man-caused disaster. The study shall propose executable mitigation actions for the school to conduct over the coming years to increase readiness, resiliency, and safety for all school students and staff. The town will then implement the proposed actions.	Yes	No	5 years	School District/ DPW	$50,000	All	FEMA, HMGP and School Budget	High	LPR	PR
2022-Aurora T-002	Potable Water Infrastructure Protection Plan	1,2	Drought, Utility Failure	**Problem**: The town has historically had issues around water shortage during a hazard event and as a result has had to rely on other municipalities for emergency water supply. With increasing climate change related extreme weather and drought related events, the town would need to first determine the areas that need potable water supply. **Solution**: The town will conduct a study on specific areas that could have a potable water facility and based on the recommendations of the study, install the potable water facility/ tank in the designated public spaces.	No	No	3 years	Town Board, DPW	High	Stable water supply	HMGP, Municipal Budget	High	SIP	PP

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.8-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-Aurora T-001	Federal Readiness and Emergency Management in Schools (REMS)	1	1	1	1	1	1	0	0	1	1	0	1	1	1	11	High
2022-Aurora T-002	Potable Water Infrastructure Study	1	1	1	1	1	1	0	1	1	1	1	1	1	1	13	High
2022-Aurora T-003	Backup power	1	1	1	1	1	1	-1	1	1	1	1	1	1	1	12	High
2022-Aurora T-004	Residential Property Flood Mitigation.	1	1	1	1	1	1	1	1	1	1	0	1	1	1	13	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.8.9 Action Worksheets

The following action worksheets have been developed by the Town of Aurora to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Potable Water Infrastructure Protection Plan		
Project Number:	2022-Aurora T-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Drought, Utility Failure		
Description of the Problem:	The town has historically had issues around water shortage during a hazard event and as a result has had to rely on other municipalities for emergency water supply. With increasing climate change related extreme weather and drought related events, the town would need to first determine the areas that need potable water supply.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a study on specific areas that could have a potable water facility and based on the recommendations of the study, install the potable water facility/ tank in the designated public spaces.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Stable water supply
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	3 years
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	HMGP, Municipal Budget
Responsible Organization:	Town Board, DPW	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Capital planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Build Emergency Water Supply Tank	Low	Problem continues but emergency supply available – less ideal
	Feasibility study and implementation	High	Will provide best option

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Potable Water Infrastructure Study	
Project Number:	2022-Aurora T-002	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	
Property Protection	1	
Cost-Effectiveness	1	The project is cost effective in the long run
Technical	1	The project is technically feasible
Political	1	
Legal	1	
Fiscal	0	Need funding for implementation
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	1	Addresses multiple hazards
Timeline	1	The timeline is feasible
Agency Champion	1	Town Board
Other Community Objectives	1	
Total	13	
Priority (High/Med/Low)	High	

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Install backup power supply at emergency facility		
Project Number:	2022-Aurora T-003		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	The town does not have adequate backup power for the Buffalo and Emery Road temporary housing locations. While some areas of both facilities do have access to electricity, some areas do not and thus are not fully equipped to handle necessary emergency shelter needs during disasters.		
Action or Project Intended for Implementation			
Description of the Solution:	Solution: The facility shall conduct an assessment of the existing sites to determine the generator type needed and install 2 generators, one at each site. These generators should have enough capacity to match the demand needed for power of the maximum number of trailers that can fit on the site.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Continuous backup power
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$500,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	FEMA HMGP, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Town Highway Department/ Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install solar	High	power supply unreliable
	generator	High	Most reliable source
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Install backup power supply at emergency facility	
Project Number:	2022-Aurora T-003	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	The project protects life
Property Protection	1	The project protects property
Cost-Effectiveness	1	The project is cost effective in the long run
Technical	1	The project is technically feasible
Political	1	There is no political opposition
Legal	1	No legal issues
Fiscal	-1	Need funding
Environmental	1	No environmental issues
Social	1	No social issues
Administrative	1	No administrative issues
Multi-Hazard	1	Addresses multiple hazards
Timeline	1	The timeline is feasible
Agency Champion	1	Town Board
Other Community Objectives	1	Safety and economic continuity.
Total	12	
Priority (High/Med/Low)	High	

Attachment: 47-Section-9.8-Aurora-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.9 Village of Blasdell

This section presents the jurisdictional annex for the Village of Blasdell. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Blasdell's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.9.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Blasdell's hazard mitigation plan primary and alternate points of contact. The Village of Blasdell followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: The Village Administrator's office, and Emergency Management department. The Village Administrator represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.9-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Janet L. Plarr, Village Administrator Address: 121 Miriam Avenue, Blasdell, NY 14219 Phone Number: 716-822-1921 Email: voboffice@aol.com	Name/Title: Joseph Fox Sr., Emergency Manager Address: 121 Miriam Avenue, Blasdell, NY 14219 Phone Number: 716-238-4593 Email: jwfox44sr@yahoo.com
NFIP Floodplain Administrator	
Name/Title: Janet L. Plarr, Village Administrator Address: 121 Miriam Avenue, Blasdell, NY 14219 Phone Number: 716-822-1921 Email: voboffice@aol.com	
Additional Contributors	
Name/Title: Roger Gibson, Town of Hamburg Code Enforcement Method of Participation: Provided Data and Information	

9.9.2 Municipal Profile

The Village of Blasdell is in the northern part of the Town of Hamburg and is surrounded on three sides by that town. The City of Lackawanna forms the village's northern boundary. The village calls itself the "Gateway to the Southtowns" of Erie County. The Village of Blasdell is one square mile in size. US Route 62 and NYS Route 179 run through the village.

The Erie Railroad was extended through the village in the 1870's. Herman Blasdell was the first Station Master for the depot. As there was no name for the area yet and very few residents, the name Blasdell became permanent.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

In the early 1890's, village land was divided into streets and lots. The village incorporated in 1898. In 1900, the village established a water system with fire hydrants and, after a disastrous fire in 1903, a Volunteer Fire Department was created. Additional companies were later formed (Village of Blasdell, accessed 2020).

According to the U.S. Census, the 2010 population for the Village of Blasdell was 2,553. The estimated 2019 population was 2,645, a 3.6 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.3 percent of the population is 5 years of age or younger and 17.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.9.3 Jurisdictional Capability Assessment and Integration

The Village of Blasdell performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6 (Mitigation Strategy) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.9.3). The Village of Blasdell's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Blasdell. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.9-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Blasdell Village Code	Local	Village Board
Comments: NYS Uniform and Energy Code 2020; Regulated at local and state levels. The Uniform Code (19 NYCRR Parts 1219 to 1229) now includes the 2015 editions of the code books published by the International Code Council (the "2015 I-Codes"), as amended by the publication entitled the 2017 Uniform Code Supplement (publication date: July 2017).. Article 18 of the Executive Law (§§ 370 through 383) establishes the State Fire Prevention and Building Code Council, directs the Code Council to promulgate and maintain the Uniform Code, and charges each city, town, and village in the State (with the exception of the City of New York) with the duty of administering and enforcing the Uniform Code within its municipal boundaries.					
Zoning Code	Yes	Yes	Village of Blasdell	Local	Village Board
Comment: Article IX, Section 2, of the State Constitution and by the various state enabling statutes. In New York, the zoning enabling acts continue to require that zoning be undertaken "in accord with a well-considered plan"11 or "in accordance with a comprehensive plan."12					

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Unless the town, city or village has adopted a comprehensive plan document using the more recently-enacted statutes (described later herein), local officials must refer to the extensive body of case law to determine how zoning can meet the more general "comprehensive plan" requirement.**May be impacted by State wetland regulations which protect wetlands greater than 12.4 acres and established buffer zones. Regulated at local level					
Subdivision Ordinance	No	-	-	-	-
Comment: None					
Stormwater Management Ordinance	Yes	No	Stormwater Plan	Local	Village of Blasdell
Comment: Codes Rules and Regulations of the State of New York, Title 6. Department of Environmental Conservation, Chapter X. Division of Water Resources, Subchapter A. General Article 3. State Pollutant Discharge Elimination System, Part 750. State Pollutant Discharge Elimination System(SPDES) Permits. New York Environmental Conservation Law, Article 17, Titles 7, 8 and Article 70. New development and redevelopment projects that result in a land disturbance of one acre or greater, including projects less than one acre if they are part of a larger common plan of development or sale or if controlling such activities in a particular watershed is require a permit by the Department					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	-	-	-	-
Comment: None					
Site Plan Review	Yes	Yes	Planning Board	Local	Town of Hamburg
Comment: The authority to require site plan review is derived from the State enabling Statutes (General City Law s. 27-a, Town Law s. 247a, Village Law s. 7-725a). The local legislative body has the power to delegate site plan review to the planning board, zoning board, etc. • The general standards and considerations when reviewing a site plan include; the adequacy of stormwater and drainage facilities; the adequacy, type and arrangement of trees, shrubs, and other landscaping constituting a visual and/or noise buffer between the applicant's and adjoining lands, including the maximum retention of existing vegetation; and Special attention to the adequacy and impact of structures, roadways, and landscaping in areas with susceptibility to ponding, flooding and/or erosion. • Where applicable, the Applicant must indicate measures and features to comply with flood hazard and flood insurance regulations.					
Environmental Protection Ordinance	No	-	-	-	-
Comment: None					
Flood Damage Prevention Ordinance	Yes	Yes	Flood plan	Local	Yes - BFE+2 feet for all construction in the SFHA (residential and non-residential)
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. • It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.					
Municipal Separate Storm Sewer System (MS4)	No	Yes	-	-	-
Comment: None					

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Emergency Management Ordinance	No	-	-	-	-
Comment: None					
Climate Change Ordinance	No	-	-	-	-
Comment: None

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Blasdell to oversee and track development.

Table 9.9-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	No space for future developments
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Blasdell and their current responsibilities which contribute to hazard mitigation.

Table 9.9-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Town of Hamburg
Zoning Board of Adjustments	Yes	Village of Blasdell
Planning Department	Yes	Town of Hamburg
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	Town of Hamburg
Public Works/Highway Department	Yes	Village of Blasdell
Construction/Building/Code Enforcement Department	Yes	Town of Hamburg
Emergency Management/Public Safety Department	Yes	Blasdell fire dept
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Red alert
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	VOB public works

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Mutual aid agreements	Yes	Erie County mutual aid plan
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Village Engineer
Engineers or professionals trained in building or infrastructure construction practices	Yes	Village Engineer
Planners or engineers with an understanding of natural hazards	Yes	Village Engineer
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	Yes	Village Engineer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Village Engineer
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Village Administrator
Surveyor(s)	No	-
Emergency Manager	Yes	Joseph Fox, Emergency Manager
Grant writer(s)	Yes	Village Administrator
Resilience Officer	No	-
Other	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Blasdell.

Table 9.9-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	No
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Blasdell.

Table 9.9-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Administrator
Personnel skilled or trained in website development	No	Contracted out
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Website and news articles
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Red alert
Warning systems for hazard events	Yes	Red alert
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Blasdell.

Table 9.9-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.9-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	Moderate
Extreme Temperature	Moderate
Flood	Moderate
Hazardous Materials	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Strong
Utility Failure	Moderate
Wildfire	Moderate

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.9.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Janet L. Plarr, Village Administrator & Roger Gibson, Town of Hamburg Code Enforcement

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Blasdell.

Table 9.9-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Blasdell	1	25	$150,556	9	0

Source: *FEMA, 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

Identified areas prone to flooding within the village include an area near the NY-179 Exit ramp and Jeffery Boulevard, as well as properties adjacent to Blasdell Creek. While the village does not maintain a list of property

owners interested in flood mitigation. The flood hazard maps adequately address the flood risk within the village. There have been zero properties mitigated for flood risk within the village. The Village Engineer and Village Administrator make Substantial Damage determinations for properties.

NFIP Compliance

The Village Administrator currently is responsible for floodplain management within the village and is a certified floodplain manager (CFM). The Town of Hamburg Building Department aids the Village with NFIP administration services due to a lack of staff within the village to conduct an effective NFIP program. The village consults with local engineers to determine if proposed developments on existing structures would qualify as a substantial improvement to the structure. There are no compliance issues within the village, and the floodplain management program meets minimum requirements. The Village Flood Damage Prevention Ordinance can be found in Chapter 122 of the Code of the Village of Blasdell, most recently updated in 2019.

9.9.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Blasdell has identified the following routes and procedures to evacuate residents prior to and during an event:

- County Road Lake Ave which traverses the village from East to West.
- US Route 62 which traverses the village from North to South.

Sheltering

The Village of Blasdell has identified the following designated emergency shelters within the village.

Table 9.9-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None identified. The village will work with the county to identify Emergency Sheltering Locations. See Mitigation Action #003							

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Blasdell has identified the following sites suitable for placing temporary housing units.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.9-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Blasdell Firemen's Park	165 Lake Ave Blasdell, NY	20	Baseball Field	Yes	Yes

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Blasdell has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.9-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The village will work with the county to identify Permanent Housing Locations. See Mitigation Action #004					

9.9.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.9-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.9-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

** Only location-specific hazard zones or vulnerabilities identified.*

9.9.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Blasdell's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of Blasdell has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.9-1. Village of Blasdell Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Blasdell's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.9-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.9-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 6, 2015	Lake-Effect Snow	No	Lake Effect Snow developed across Erie County, resulting in the temporary closing of the New York State Thruway.	Eleven (11) inches of snow were reported in Blasdell and an estimated $20,000 in property damages were reported throughout the County.
January 4-7, 2017	Lake-Effect Snow	No	A long duration lake-effect snow event produced three to four feet of snow, causing road closures and hazardous conditions along the I-90 Thruway. Snowfall rates reached up to 5 inches per hour, which combined with people leaving work and school in the afternoon, brought traffic to a standstill. Snow accumulated so quickly that the plows were unable to keep up and people abandoned their cars on the Thruway and local roads, evening commutes reached 6 hours or mere and school busses were unable to bring students home.	Four to five inches of snow per hour fell in Blasdell, bringing traffic to a standstill. Plows were unable to keep up with clearing the snow and people abandoned their cars on the New York Thruway and local roads. Total snowfall report in Blasdell amounted to 28 inches
March 1, 2017	High Wind	No	Strong winds as high as 64 mph were reported throughout the area.	Falling trees damages homes or automobiles in Blasdell.
May 1, 2017	Thunderstorm Wind	No	A strong cold front brought a line of thunderstorms which produced damaging winds that downed trees and wires across western New York.	Thunderstorm winds downed a large tree on Gilbert Street in Blasdell, resulting in an estimated $15,000 in property damages.
December 10, 2017	Lake-Effect Snow	No	Heavy snow fell throughout Erie County, accompanied by reports of thunder and lightening throughout the duration of the event.	Fifteen (15) inches of snow were reported in Blasdell.
March 1, 2018	Winter Storm	No	A winter storm brought heavy snow across the entire region. There were several reports of downed trees and wires due to the weight of the snow and high winds.	Thirteen (13) inches of snow were reported in Blasdell.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
October 27-November 1, 2019	Lakeshore Flooding and High Winds DR-4472-NY	Yes	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	Rainfall totals reached 1.88 inches in Blasdell.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Blasdell's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Blasdell. The Village of Blasdell has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- Earthquakes are very unlikely to happen in the village, posing a low risk to the community, therefore the risk was reduced to low.
- Due to the development and availability of new vaccines for the COVID-19 Pandemic, the risk for this hazard is medium.
- Severe Storms and Severe Winter Storms only happen once in a while, resulting in a Medium risk for the village.
- Utilities are well-maintained in the village; therefore utility interruption is a low risk for the village.

Table 9.9-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	Medium	Low	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.9-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Potential Loss from 1% Flood Event		Addressed by Proposed Action
		1% Event	0.2% Event	Percent Structure Damage	Percent Content Damage	
None Identified						

Source: FEMA DFIRM

Identified Issues

After review of the Village of Blasdell's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Blasdell has identified the following vulnerabilities within their community:

- There has been an increase in heavy wind (extreme wind) events in the village.
- Lake-Effect Snowstorms continue to be a major concern for the village.
- Flood-prone areas within the village include an area near the NY-179 Exit ramp and Jeffery Boulevard intersection, as well as properties adjacent to Blasdell Creek.

9.9.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.9-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Widening of Rush Creek to help alleviate overflow of banks that flood a storage building	Flood	Public Works	Flooding in area around Rush Creek	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2022 HMP 2. 2022-V. Blasdell-001 3.
	Update/revise floodplain management ordinances to comply with latest FEMA regulations.	Flood	Village BOT	Not Identified	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. The Village meets minimum requirements for floodplain management.
	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances.	Flood	Village BOT	Not Identified	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3.The Village Administrator is a Certified Flood Plain Manager (CFM) and serves as the Village NFIP FPA.
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs.	Flood	Village BOT	Not Identified	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	Include in 2022 HMP
	Join the Community Rating System (CRS).	Flood	Village BOT	Not Identified	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3.The Village is not participating in the CRS program
	All code enforcement and building permits are done by the TOH	Flood	TOH	Not Identified	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Complete

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Blasdell has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Blasdell participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.9-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X				X					X
Cyber Attack	X				X					X
Earthquake	X				X					X
Expansive Soils	X				X					X
Extreme Temperature	X				X					X
Flood	X		X		X		X	X		X
Hazardous Materials	X				X					X
Landslide	X				X					X
Pandemic	X				X					X
Severe Storm	X		X		X			X		X
Severe Winter Storm	X		X		X			X		X
Utility Failure	X				X					X
Wildfire	X				X					X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.9-19 summarizes the comprehensive-range of specific mitigation initiatives the Village of Blasdell would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.9-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.9-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. Blasdell-001	Rush Creek Widening	1, 2	Flood, Severe Storm, Severe Winter Storm	**Problem**: The village experiences flooding in area around Rush Creek **Solution**: The Public Works Department will develop a plan for widening Rush Creek to help alleviate overflow of banks that flood a storage building and cause property damages during storm events and floods. As a second phase. The village will implement the plan and ensure that all state and environmental permitting requirements are met.	No	Yes	Within 5 years	Public Works	High	High	FEMA BRIC	High	NSP	NR
2022-V. Blasdell-002	Updates to Floodplain Management Plan	1, 2, 3	Flood	**Problem**: FEMA is updating their DFIRM flood maps to more accurately reflect conditions within the village. **Solution**: The Village Board of Trustees and planning/zoning department will review the 2021 updated DFIRM maps and make adjustments to the floodplain management ordinances/NFIP regulations as necessary. Updates to building/code enforcement related to the new DFIRM will also be completed as necessary.	No	No	Within 5 years	Board of Trustees, Planning/ Zoning Department	Low	High	Municipal Budget	Medium	LPR	PR
2022-V. Blasdell-003	Emergency Sheltering	1, 2, 3	All Hazards	**Problem**: The village does not have any designated Emergency Sheltering locations. **Solution**: The village will work with Erie County Emergency Services to identify and designate locations within the village, or nearby that are accessible to residents and can serve as sheltering locations and heating/cooling/charging centers	No	No	Short	Village Board of Trustees; Erie County Emergency Services; Red Cross	Medium	High	Municipal Budget, Red Cross, NYSDHSES	High	LPR	PR, ES

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes 💧 *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.9.9 Action Worksheets

The following action worksheets have been developed by the Village of Blasdell to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Rush Creek Widening		
Project Number:	2022-V. Blasdell-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	The Village experiences flooding in area around Rush Creek.		
Action or Project Intended for Implementation			
Description of the Solution:	The Public Works Department will develop a plan for widening Rush Creek to help alleviate overflow of banks that flood a storage building and cause property damages during storm events and floods. As a second phase. The village will implement the plan and ensure that all state and environmental permitting requirements are met.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High, reduces flooding
Useful Life:	25 years	**Goals Met:**	1, 2
Estimated Cost:	High	**Mitigation Action Type:**	NSP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	Municipal Budget, FEMA HMGP
Responsible Organization:	Public Works	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Install storm drains	N/A	Would displace water onto roadway
	Install sump pump	N/A	Not feasible due to location of Creek

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Rush Creek Widening	
Project Number:	2022-V. Blasdell-001

Priority (High/Med/Low)	High	

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Updates to Floodplain Management Plan		
Project Number:	2022-V. Blasdell-002		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	FEMA is updating their DFIRM flood maps to more accurately reflect conditions within the Village.		
Action or Project Intended for Implementation			
Description of the Solution:	The Village Board of Trustees and planning/zoning department will review the 2021 updated DFIRM maps and make adjustments to the floodplain management ordinances/NFIP regulations as necessary. Updates to building/code enforcement related to the new DFIRM will also be completed as necessary.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High, ensures accurately reported flood risk
Useful Life:	5 years	**Goals Met:**	1, 2, 3
Estimated Cost:	Low	**Mitigation Action Type:**	LPR
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	6 months	**Potential Funding Sources:**	Municipal Budget
Responsible Organization:	Board of Trustees	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Rewrite entire FDPO	N/A	Updates can be made to existing plan
	Update FDPO before DFIRM	N/A	Not cost effective to have to update twice based on changes to DFIRM

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 48-Section-9.9-Blasdell-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.10 Town of Boston

This section presents the jurisdictional annex for the Town of Boston. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Boston's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.10.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Boston's hazard mitigation plan primary and alternate points of contact. The Town of Boston followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Code Enforcement and Supervisor's Office. The Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, Steering Committee, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.10-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Gene Wieckowski, Emergency Manager Address: 8500 Boston State Road, Boston, NY 14025 Phone Number: 716-440-1875	Name/Title: Jason Keding, Supervisor Address: 8500 Boston State Road, Boston, NY 14025 Phone Number: 716-941-6518 Email: supervisorsoffice@townofboston.com
NFIP Floodplain Administrator	
Name/Title: William Ferguson, Code Enforcement Officer Address: 8500 Boston State Road, Boston, NY 14025 Phone Number: 716-440-1875	

9.10.2 Municipal Profile

Incorporated in 1817, Boston is one of the oldest towns in Erie County. The town's area was created from the original large town of Eden. (Town of Boston 2021) The town contains three hamlets that originated in the early 1800s; North Boston, Patchin and Boston. The town is bordered by the Town of Orchard Park and the Town of Hamburg to the north, the Town of Eden to the west, the Towns of North Collins and Concord to the south and the town of Colden to the east. Eighteen Mile Creek runs through the town from north to south on its way to draining into Lake Erie.

The first Native Americans to occupy the Town of Boston area were the Erie Indians. By the time pioneer settlers came to the Boston area, the succeeding Seneca Indians had been confined to the Buffalo, Cattaraugus and other

reservations. The Holland Land Company organized sale of lands in Boston which triggered white settlement. The economy of Boston has changed significantly over the years. The town was agricultural for several generations. As the land was cleared and put under cultivation, hill farms were adapted to milk production, potatoes and cabbage, while the richer land of the valley was suitable for more diverse crops.

Boston's first industry was a distillery established in 1818. The town's bell factory was for some time the largest in the United States. In 1903, construction began on the Susquehanna Railroad through Boston Valley. The route through Boston was a scenic route and was often fully occupied with passengers in addition to freight. The railroad proved beneficial to both industry and agriculture but failed in just ten years. The Southern Expressway was completed in the 1970's and was later incorporated into US Route 219, a limited access freeway. These extensions spurred additional suburban development in the town. Eighteen Mile Creek runs through the town (Town of Boston Comprehensive Plan 2002).

According to the U.S. Census, the 2010 population for the Town of Boston was 8,023. The estimated 2019 population was 8,042, a 0.2 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.3 percent of the population is 5 years of age or younger and 21.3 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.10.3 Jurisdictional Capability Assessment and Integration

The Town of Boston performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.10.3). The Town of Boston's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Boston. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.10-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Local Law No. 3-1987	Local	Town CEO
Comment: *The town building code was developed with the following goals and objectives: A. It is the intent of this Article regulating planned unit developments (PUD's) to provide performance criteria in the context of flexible use and design regulations so that small-to-large-scale residential neighborhoods may be developed, within designated districts, incorporating a variety of residential types and nonresidential uses and containing both individual building sites and common property which are planned and developed as a unit. Such a planned unit is to be designed and organized so as to be capable of satisfactory use and operation as a separate entity without necessarily needing the participation of other building sites or other common property in order to function as a neighborhood. B. This Article specifically encourages innovation in residential development so that the growing demands for housing at all economic levels may be met by greater variety in type, design and siting of dwellings and by the conservation and more efficient use of land in such developments. This Article recognizes that while the standard zoning function (use and bulk) and the subdivision function (platting and design) are appropriate for the regulation of land use in areas or neighborhoods that are already substantially developed, these controls represent a type of pre-regulation, regulatory rigidity and uniformity which may be inimical to the techniques of land development concept. Further, this Article recognizes that a rigid set of space requirements, along with bulk and use specifications, would frustrate the application of the planned unit development concept. Thus, where PUD techniques are deemed appropriate through the rezoning of land to a planned unit development by the Town Board, the set of use and dimensional specifications otherwise set forth in this chapter are herein replaced by an approved process in which an approved plan with proper rezoning becomes the basis for continuing land use controls during the development period.*				
Zoning Code	Yes	No	Chapter 123 (Zoning); Local Law #6 from 1990	Local	Town CEO
Comment: The municipal zoning ordinance has been developed with the following guidelines to encourage sustainable and resilient development. 1) A PUD must have a development pattern which preserves trees, outstanding natural topography and geologic features and prevents soil erosion. 2) A site plan must include a map or maps of present site conditions that includes topography at contour intervals of five feet or less, streams or watercourses, together with their classification if any, under the State Stream Protection Law, and soil information as mapped by the United States Soil Conservation Service or the equivalent, with soil legends and interpretations showing susceptibility to erosion, flooding or ponding and soil suitability for the proposed uses. 4) Site plan review to include adequacy of structures, roadways and landscaping in areas with moderate-to-high susceptibility to flooding and ponding and/or erosion. 5) Site plan submission to include: Preliminary engineering plans, including street improvements, storm drainage system, public utility extensions, water supply, sanitary sewer facilities, outdoor lighting and location of existing and proposed fire hydrants, as approved by the Fire Chief or Town Engineer.				
Subdivision Ordinance	Yes	No	Chapter 104 (Subdivision of Land); Local Law No. 7-1990	Local	Planning Board
Comment: The subdivision ordinance has been developed with consideration to the following attributes. 1) Preliminary plat, showing contours, proposed road layout, proposed public improvements (pavement, drainage, storm sewers, sanitary sewers, water service, etc.) 2) Where drainage is to be a natural watercourse, lake, swamp, sink or roadside or drainage ditch, the elevation of water in such watercourse or ditch at the recognized flood stage shall be shown on preliminary plat. 3) Where storm sewers or ditches may be required to discharge across an adjacent property in order to drain into a natural watercourse or watershed in which the subdivision lies, the subdivider shall secure an easement from the adjacent property owners to assure uninterrupted discharge of drainage water from the subdivision. Such easement shall be of a dimension required by the Planning Board. 4) Lands subject to flooding shall not be platted or residential occupancy nor for such other uses as may increase danger to life or property or aggravate the flood hazard.				
Stormwater Management Ordinance	Yes	Yes	Local Law 12	Local	Engineering
Comment: The stormwater management ordinance has been developed with the following guidelines. 1) It shall be unlawful to discharge into any storm drain any sewage, industrial wastes or other polluted waters, except water from swimming pools. 2) No building sewer lateral shall be laid parallel to or within three feet of any bearing wall, which might thereby be weakened. The depth shall be sufficient to afford protection from frost. 3) No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, cooling water or unpolluted industrial process waters to any sanitary sewer.				
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is*					

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".					
Growth Management	No	Yes	-	-	-
Comment:					
Site Plan Review	Yes	No	Local Law No. 8-1990	Local	Planning Board
Comment: Final site plan includes: The intended drainage plan to include low areas that are to be filled and drained, inverts of proposed pipes, ditches and/or swales, retention and/or detention facilities as necessary, including all design and profile data; drainage flow calculations, expected roof and sump drainage and easements for proposed or existing drainage, where necessary. 2) Final site plan includes: Snow storage area 3) Where adequate surface drainage is not possible by grading alone, a supplementary drainage system approved by the Town of Boston shall be required. On-site management of surface drainage shall be planned so that there shall be no greater runoff during and following construction than prior to commencement of construction. Lawn and yard areas shall be adequately drained to permit normal use and maintenance.					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment:					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 60 (Flood Damage Prevention); Local Law No. 60 2019-3	Local	Town CEO
Comment: *It is the purpose of this chapter to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities.* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.* *C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters.* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages.* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands.* *F. Qualify for and maintain participation in the National Flood Insurance Program.* *The Code Enforcement Officer is appointed local administrator to administer and implement this chapter. Duties of the administrator include: permit application review; using flood data; obtaining and maintaining information; notifications; interpretating FIRM boundaries; stop-work orders; inspections; and certificate of compliance. Any construction or substantial improvements in the flood hazard areas must be elevated to two feet or higher above the base flood elevation.*					
Municipal Separate Storm Sewer System (MS4)	No	Yes – for municipalities within metropolitan areas.	-	-	-

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Boston to oversee and track development.

Table 9.10-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement/ Building Department

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain development
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	None

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Boston and their current responsibilities which contribute to hazard mitigation.

Table 9.10-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Town Planning Board – volunteer board that is responsible for all site plan reviews and SEQRA. The board also advises on various property safety issues.
Zoning Board of Adjustments	Yes	Zoning Board - There are five regular members and two alternate members, who step in to meet the quorum in the absence of a regular member. All members are allowed to question the applicant, however only the regular members vote on the motion to grant or deny the variance request.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Conservation Board - The CAC advises the Town Board on conservation issues which will increase the quality of life in the Town of Boston.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department – the department is responsible for maintaining all municipally owned roads and other public works related issues.
Construction/Building/Code Enforcement Department	Yes	Building Inspector – the responsibility of the office is to issues building permits and conduct construction and building inspections.
Emergency Management/Public Safety Department	Yes	Emergency Squad – The Boston Emergency Squad is a Volunteer Ambulance Corporation serving the town of Boston and providing mutual aid services to the surrounding communities since January 4th 1967. The dedicated volunteers of the Boston Emergency Squad are committed to providing excellent ambulance and first aid service primarily within the Town of Boston
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Fire, Highway
Other	No	-
Technical/Staffing Capability-		
Planners or engineers with knowledge of land development and land management practices	No	-

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Engineers or professionals trained in building or infrastructure construction practices	Yes	Various departments
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	CEO
Surveyor(s)	No	-
Emergency Manager	Yes	Town Emergency Manager
Grant writer(s)	Yes	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Boston.

Table 9.10-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	No (utility)
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Boston.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.10-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Town Clerk
Personnel skilled or trained in website development	Yes	Town Clerk
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Facebook: https://www.facebook.com/BostonTownHallNY
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Reverse 911
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Boston.

Table 9.10-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No		
Public Protection (ISO Fire Protection Classes 1 to 10)	No		
NYSDEC Climate Smart Community	Yes	Designated	2020
Storm Ready Certification	No	-	-
Firewise Communities classification	No		
Other	No		

Note:

N/A *Not applicable*

NP *Not participating*

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.10-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	NA
Cyber Attack	Moderate
Earthquake	Weak
Expansive Soils	Weak
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.10.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

William Ferguson, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Boston.

Table 9.10-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Boston	11	19	$180,739	9	0

Source: July and September, 2021 NFIP Data.
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The Town of Boston does not maintain lists of properties that have been damaged by flooding or of property owners interested in flood mitigation. There are not any RiskMAP projects currently underway in the town. The town did not identify how many (if any) properties have been mitigated. The town's flood hazard maps adequately address the flood risk within the jurisdiction.

NFIP Compliance

As of 2021, the Code Enforcement Office is in charge of municipal floodplain management. Due to limited resources, the town does not have a certified floodplain manager on staff nor any other technical capabilities, as they are contracted out by the town as needed. The town has not had to determine any substantial improvements as the town is in full compliance of the NFIP program. The most recent CAV date is April 17, 2014. The local municipal flood damage prevention number is Local Law No. 2019-3 and meets the requirements of the NFIP

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

program. The town does not have any other plans or ordinances that support the program and the town is not interested in the CRS program.

9.10.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Boston has identified the following routes and procedures to evacuate residents prior to and during an event.

- County Route 227
- Buffalo – Pittsburg Highway – Route 219
- Route 439
- Boston State Road

The routes would be determined by the County, as each hazard could change the potential destination for evacuation.

Sheltering

The Town of Boston has identified the following designated emergency shelters within the town.

Table 9.10-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Town Hall	8500 Boston State Rd, Boston, NY	100	Yes	Yes	No	None	Need power generator, and showers. Not adequate space – addressed in project 001

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Boston has identified the following sites suitable for placing temporary housing units.

Table 9.10-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
County Fairgrounds	5600 McKinley Pkwy, Hamburg, NY	266 acres	Open Space	All utilities available	None

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Boston has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.10-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Open field	8555 Boston State Road	Unknown	Open field	None	None

9.10.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.10-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.10-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

** Only location-specific hazard zones or vulnerabilities identified.*

9.10.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

5.4 (Hazard Ranking) for a detailed summary for the Town of Boston's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Boston has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.10-1. Town of Boston Hazard Area Extent and Location Map 1

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Boston's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.10-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.10-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	No major loss – downed trees
August 11-15, 2015	Flash Flood	No	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	Although the County was impacted, the town did not report damages
November 12, 2015	High Wind	No	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Although the County was impacted, the town did not report damages
March 13, 2017	Winter Storm	No	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Although the County was impacted, the town did not report damages
January 2, 2018	Blizzard	No	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Although the County was impacted, the town did not report damages
February 24, 2019	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the County was impacted, the town did not report damages
November 27, 2019	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 18, 2020	Lakeshore Flooding	No	Although the County was impacted, the town did not report damages
2020-21	COVID -19	No	Various losses not quantifiable

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Boston's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Boston. The Town of Boston has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- There has been no change in coastal, wave action, wildfire, and earthquake related hazards.
- Earthquakes do not occur in the town and therefore has been re-ranked from high to low.
- Pandemics affect areas beyond the town, and given the rural nature of the municipality, the hazard will remain medium.
- There however has been an increase in extreme temperatures, winter storms, extreme wind, flood, ice jams, landslides, and tornados.

Table 9.10-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.10-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	**0.2% Event**	
No facilities identified				

Source: 2021 GIS

Identified Issues

After review of the Town of Boston's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Boston has identified the following vulnerabilities within their community:

- 18 Mile Creek that flows through town causes significant flooding.
- Significant runoff from east and west hills
- No all municipal buildings have backup power.
- The town hall which is currently designated as the main evacuation shelter does not have adequate backup power nor enough space to safely house all residents during a hazard event, especially during a pandemic when social distancing is critical for public health.
- Town hall does not have adequate backup power on site to power the entire facility. The town hall is currently the main municipal building where all municipal operations take place. Therefore, it is crucial to have adequate backup power for the facility.
- The town is developing a stormwater management plan for the town. This plan is in coordination with the County SWCD and is intended to identify specific areas that are vulnerable to flooding and require infrastructural investment.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- Flooding along 18-Mile Creek

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.10.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.10-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Bank stabilization of 18-mile creek	Flooding	Constant erosion and changing of creek course lends to localized flooding causing damage to property and road infrastructure	Town Highway	Complete	Cost	High	1. Discontinue 2. 3. Complete
						Level of Protection	High	
						Damages Avoided; Evidence of Success	Flood	
	Improved drainage in specific subdivisions and target tributaries to 18-mile creek	Flooding	Personal property damage	Town Highway	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing capability
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	Not Identified	Emergency Management	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing capability
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
	Designate/install a specific person to be your municipality's Floodplain Administrator	Flooding	Not Identified	Town Clerk/ Building Inspection	Complete	Cost	Low	1. Discontinue 2. 3. Complete
						Level of Protection	Moderate	
						Damages Avoided; Evidence of Success	Low	
	Add/train sufficient members of staff to adequately enforce NFIP regulations/floodplain management ordinances	Flooding	Not Identified	Emergency Management	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Ongoing
						Level of Protection	-	
						Damages Avoided;	-

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Boston has not identified any previous mitigation actions.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Boston participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.10-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X							X	X
Cyber Attack		X							X	X
Earthquake		X							X	X
Expansive Soils		X							X	X
Extreme Temperature		X							X	X
Flood		X	X			X		X	X	X
Hazardous Materials		X							X	X
Landslide		X							X	X
Pandemic		X							X	X
Severe Storm		X							X	X
Severe Winter Storm		X							X	X
Utility Failure		X							X	X
Wildfire		X							X	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Error! Reference source not found. summarizes the comprehensive range of specific mitigation initiatives the Town of Boston would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Error! Reference source not found. provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.10-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-Boston Town-001	Emergency Shelter/ Community Center Development	1	1	1	1	1	0	-1	1	1	1	1	1	1	1	11	High
2022-Boston Town-002	Backup Power at Town Hall	1	1	1	1	1	1	-1	0	1	1	1	1	1	1	11	High
2022-Boston Town-003	Stormwater Actionable Items	1	1	1	1	1	1	-1	1	1	1	1	1	1	1	12	High
2022-Town of Boston-004	Residential Property Flood Mitigation.	1	1	1	1	1	1	1	0	0	1	0	1	0	0	9	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.10.9 Action Worksheets

The following action worksheets have been developed by the Town of Boston to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Emergency Shelter/ Community Center Development		
Project Number:	2022-Town of Boston--001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	The town hall which is currently designated as the main evacuation shelter does not have adequate backup power nor enough space to safely house all residents during a hazard event, especially during a pandemic when social distancing is critical for public health.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will build a community center with shelter capabilities that will also be used as an emergency operations center. A generator will also be installed to provided power in the event of an outage. The facility would be built on 8555 Boston State Road which is owned by the town.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Development of new emergency facility
Useful Life:	35 years	**Goals Met:**	1, 2, 3
Estimated Cost:	$1 million	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	HMGP, BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Town Budget
Responsible Organization:	Town Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard mitigation and preparedness
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Designate City of Buffalo shelters as town shelters	Low	Too far away
	Develop emergency shelter	High	Best option in the long run
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Emergency Shelter/ Community Center Development	
Project Number:	2022-Town of Boston--001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project saves lives
Property Protection	1	This project can protect property
Cost-Effectiveness	1	This is cost effective in the long run
Technical	1	There are no technical issues identified
Political	1	There are no political issues identified
Legal	0	There can be some unclear legal issues
Fiscal	-1	There are inadequate financial resources
Environmental	1	There are no environmental issues with this project
Social	1	This has positive social impact
Administrative	1	There are no administrative issues
Multi-Hazard	1	This addresses all hazards of concern
Timeline	1	This timeline is feasible
Agency Champion	1	The town board
Other Community Objectives	1	This contributes to the community's goal to become a safer place
Total	11	
Priority (High/Med/Low)	High	

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Backup Power at Town Hall		
Project Number:	2022-Town of Boston-002		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	Town hall does not have adequate backup power on site to power the entire facility. The town hall is currently the main municipal building where all municipal operations take place. In addition, the electrical panel boxes need to be upgraded. The panel box currently poses a fire hazard and therefore qualifies as hazard mitigation. Therefore, it is crucial to have adequate backup power for the facility.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will install a permanent generator at the current town hall. The town will first upgrade panel boxes for electricity and then install generator. Once upgraded, the town will install the generator and appropriate fuel sources.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Continued Operation
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$500,000	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	HMGP, BRIC, Community Facilities Direct Loan & Grant Program, Climate Smart Communities Grant Program
Responsible Organization:	Town Highway	**Local Planning Mechanisms to be Used in Implementation if any:**	
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install Solar	High	Unreliable energy source
	Generator	High	Best option
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Backup Power at Town Hall	
Project Number:	2022-Town of Boston--002	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	This project protects life
Property Protection	1	This projects property
Cost-Effectiveness	1	This is the most cost effective
Technical	1	There are no identified technical issues
Political	1	There are no political issues with this project
Legal	1	There are no legal issues identified at this time
Fiscal	-1	The town needs additional resources
Environmental	0	This project has minimal environmental impact
Social	1	This project has positive social impact
Administrative	1	There are no administrative issues identified
Multi-Hazard	1	This addresses multiple hazards
Timeline	1	There are no timeline related issues
Agency Champion	1	This town has assigned the Town Highway
Other Community Objectives	1	Various objectives
Total	11	
Priority (High/Med/Low)	High	

Attachment: 49-Section-9.10-Boston-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.11 Town of Brant

This section presents the jurisdictional annex for the Town of Brant. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Brant's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.11.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Brant's hazard mitigation plan primary and alternate points of contact. The Town of Brant followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: Grants, Planning, and Code Enforcement. The Town Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.11-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Mark J. DeCarlo, Supervisor Address: 1272 Brant North Collins Rd, Brant, NY 14027 Phone Number: 716-549-0301 x 3 Email: supervisor@brantny.com	Name/Title: Connie Miner, Grants Consultant Address: 1272 Brant North Collins Rd, Brant, NY 14027 Phone Number: 716-549-0301 Email: minerconni@verizon.net
NFIP Floodplain Administrator	
Name/Title: Gary A. Breaker, Code Enforcement Officer Address: 1272 Brant North Collins Rd, Brant, NY 14027 Phone Number: 716-392-7241

Name/Title: Joseph Ostrowski, Chairman, Planning Board Method of Participation: Completed Capability Assessment	
Name/Title: Gary A. Breaker, Code Enforcement Officer Method of Participation: Provided data and information	

9.11.2 Municipal Profile

Brant is located in the southwestern part of Erie County and is known as one of the county's "Southtowns". The Town of Brant is a mostly rural municipality located approximately 25 miles southwest of downtown Buffalo. The Village of Farnham is located wholly within the town and is on the town's west side. The town is bounded on the north by the Town of Evans, to the east by the Town of North Collins, and to the south is the Cattaraugus

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indian Reservation. The town contains a small stretch of Lake Erie shoreline and Evangola State Park is in the town's northwest corner.

The first white settler arrived in the area around 1816. The town incorporated in 1839, being formed from portions of Towns of Evans and Concord. Col. Joseph Brant, the Mohawk chief, inspired the town's naming. (Wikipedia) The town has an area of 24.7 square miles. A significant part of the land base is in an Agricultural District and produces field crops such as sweet corn, cabbage and snap beans; fruits such as grapes and strawberries; and two plant nurseries (Town of Brant Comprehensive Plan, 2003).

According to the U.S. Census, the 2010 population for the Town of Brant was 1,683. The estimated 2019 population was 1,541, an 8.4 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 2.5 percent of the population is 5 years of age or younger and 22.8 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.11.3 Jurisdictional Capability Assessment and Integration

The Town of Brant performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.11.3). The Town of Brant's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Brant. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.11-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Town Code Ch. 69, 2010	Local	Code Enforcement Officer
Comments: Except as otherwise specifically provided by law, ordinance, rule or regulation or except as herein otherwise provided, the Code Enforcement Officer shall administer and enforce all of the provisions of the New York State Uniform Fire Prevention and Building Code and					

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
other laws, ordinances, rules and regulations applicable to plans, specifications or permits for the construction, alteration and repair of buildings and structures and the installation and use of materials and equipment therein and to the location, use and occupancy thereof.					
Zoning Code	Yes	Yes	Town Code Ch.161, 2019	Local	Code Enforcement Officer
Comment: These regulations are made in accordance with a Comprehensive Plan and are designed to lessen congestion in the streets; to secure safety from fire, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements.					
Subdivision Ordinance	Yes	Yes	Town Code Ch.137, 1976	Local	Code Enforcement Officer
Comment: It is declared to be the policy of the Planning Board to consider land subdivision plats as part of a plan for the orderly, efficient and economical development of the town. This means, among other things, that land to be subdivided shall be of such character that it can be used safely for building purposes without danger to health or peril from fire, flood or other menace; that proper provision shall be made for drainage, water supply, sewerage and other needed improvements; that all proposed lots shall be so laid out and of such size as to be in harmony with the development pattern of the neighboring properties; that the proposed streets shall compose a convenient system conforming to the Official Map, if such exists, and shall be properly related to the proposals shown on the Comprehensive Plan, if such exists, and shall be of such width, grade and location as to accommodate the prospective traffic, to facilitate fire protection and to provide access of fire-fighting equipment to buildings; and that proper provision shall be made for open spaces for parks and playgrounds.					
Stormwater Management Ordinance	Yes	Yes	Town Code Ch. 87	Local	Code Enforcement Officer
Comment: The Code Enforcement Officer shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is in a location that has a flood hazard, any proposed new construction or substantial improvement, including prefabricated and mobile homes, must be designed, or modified, and anchored to prevent flotation, collapse or lateral movement of the structure; use construction materials and utility equipment that are resistant to flood damage; and use construction methods and practices that will minimize flood damage.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: None					
Site Plan Review	No	No	-	-	-
Comment: None					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment:					
Flood Damage Prevention Ordinance	Yes	Yes	1992, Sec 35	Local	Code Enforcement Officer
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. • It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Construction/Building/Code Enforcement Department	Yes	No Comment
Emergency Management/Public Safety Department	Yes	No Comment
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	No	-
Grant writer(s)	Yes	Supervisor
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Brant.

Table 9.11-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Brant.

Table 9.11-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	No Comment
Personnel skilled or trained in website development	Yes	No Comment
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	No Comment
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Brant.

Table 9.11-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.11-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.11.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Gary A. Breaker, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Brant.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.11-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Brant	1	99	$287,387	40	0

Source:
Notes:
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

Floodprone areas within the town include the Lake Erie Short Line and Two Creeks, but no residential properties are located in these areas. The town does not maintain a list of property owners interested in flood mitigation, and there are no Risk MAP projects underway. The town makes substantial damage determinations by conducting onsite inspections. The flood hazard maps adequately address flood risk within the town.

NFIP Compliance

The Buildings Department and Code Enforcement Officer are responsible for floodplain management. There are no Certified Floodplain Managers within the town, but all floodplain courses are attended, and no additional assistance is needed. There are no outstanding compliance issues with the NFIP.

9.11.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Brant has identified the following routes and procedures to evacuate residents prior to and during an event:

- Cain Road
- Milestrip Road
- Route 323
- Route 249
- Route 5
- Route 20

Sheltering

The Town of Brant has identified the following designated emergency shelters within the town.

Table 9.11-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None identified. The town will work with the county to identify and designate an emergency shelter. See Mitigation Action 2022-T. Brant-#001.							

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Brant has identified the following sites suitable for placing temporary housing units.

Table 9.11-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-T. Brant-#002.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Brant has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.11-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate permanent housing locations. See Mitigation Action 2022-T. Brant-#002.					

9.11.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.11-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.11-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

** Only location-specific hazard zones or vulnerabilities identified.*

9.11.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Brant's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Brant has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Brant's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.11-14 provides details regarding municipal-specific loss and damages the Town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.11-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, no municipal damages were reported.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, no municipal damages were reported.
October 28-29, 2015	High Wind	No	Although the county was impacted, no municipal damages were reported.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, no municipal damages were reported.
November 12, 2015	High Wind	No	Although the county was impacted, no municipal damages were reported.
November 18, 2015	High Wind	No	Although the county was impacted, no municipal damages were reported.
January 11, 2017	High Wind	No	Although the county was impacted, no municipal damages were reported.
March 8, 2017	High Wind	No	Although the county was impacted, no municipal damages were reported.
March 13, 2017	Winter Storm	No	Although the county was impacted, no municipal damages were reported.
July 20, 2017	Tornado	No	Although the county was impacted, no municipal damages were reported.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, no municipal damages were reported.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, no municipal damages were reported.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, no municipal damages were reported.
January 2, 2018	Blizzard	No	Although the county was impacted, no municipal damages were reported.
October 6, 2018	Lightning	No	Although the county was impacted, no municipal damages were reported.
February 24, 2019	High Wind	No	Although the county was impacted, no municipal damages were reported.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, no municipal damages were reported.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, no municipal damages were reported.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, no municipal damages were reported.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, no municipal damages were reported.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, no municipal damages were reported.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, no municipal damages were reported.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Brant's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Brant. The Town of Brant has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town agreed that the calculated rankings accurately reflected the risk posed to the community

Table 9.11-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.11-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
None Identified				

Source: Effective DFIRM

Identified Issues

After review of the Town of Brant's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Brant has identified the following vulnerabilities within their community:

- The town does not have any designated Emergency Shelter locations.
- The town does not have any designated Temporary or Permanent Housing locations to be used to house displaced residents, or to use to relocate homes that experience repetitive flood damages and losses, respectively.
- Drainage ditches throughout the town are impacted by debris and reduce water flow and exacerbate flooding during storms.
- The town does not have a disaster plan.
- The Lake Erie Shore Line along Brant is specifically vulnerable to erosion.
- Lotus Bay and Wide Beach have just one point of entry which is also the exit.

9.11.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.11-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Clean existing abandoned ditches on certain properties for flood damage reduction purposes. * Easements required.	Flooding	Not Identified	Highway Dept/ Attorney	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2020 HMP 2. 3.
-	Set up town-wide disaster plan to educate public on what to do (step by step).	All Hazards	Not Identified	Disaster Coordinator	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Ongoing capability
-	Town-wide food shelter storage.	All Hazards	Not Identified	Disaster Coordinator	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Complete
-	Working with and in collaboration with the Seneca Nation.	All Hazards	Not Identified	Town Board	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Ongoing Capability

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Brant has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Brant participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.11-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X		X	X			X	X		X
Cyber Attack	X			X			X			X
Earthquake	X			X			X			X
Expansive Soils	X			X			X			X
Extreme Temperature	X			X			X			X
Flood	X	X		X		X	X		X	X
Hazardous Materials	X			X			X			X
Landslide	X			X			X			X
Pandemic	X			X			X			X
Severe Storm	X	X		X		X	X		X	X
Severe Winter Storm	X	X		X		X	X		X	X
Utility Failure	X			X			X			X
Wildfire	X			X			X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.11-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Brant would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.11-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.11-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T. Brant-001	Emergency Shelter	1, 2, 3	All Hazards	**Problem**: The town does not have any designated Emergency Shelter Locations. **Solution**: The town will work with the county to identify and designate an Emergency Shelter with ADA compliance and sufficient capacity and backup power. A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.11.9 Action Worksheets

The following action worksheets have been developed by the Town of Brant to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 50-Section-9.11-Brant-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Drainage System Maintenance		
Project Number:	2022-T. Brant-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	Drainage ditches throughout the town are impacted by debris and reduce water flow and exacerbate flooding during storms.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will develop a maintenance program to clean existing abandoned ditches on certain properties for flood damage reduction purposes.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High, reduces flooding outside of the SFHA
Useful Life:	N/A	**Goals Met:**	1, 2
Estimated Cost:	Medium	**Mitigation Action Type:**	Local Plans and Regulations, Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Ongoing once established
Estimated Time Required for Project Implementation:	6 months	**Potential Funding Sources:**	Municipal Budget, HMGP
Responsible Organization:	Town of Brant Highway	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate roadways	$500,000	Costly and may not solve problem
	Relocate drainage systems	N/A	Not possible

9.12 City of Buffalo

This section presents the jurisdictional annex for the City of Buffalo. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the city participated in the planning process; an assessment of the City of Buffalo's risk and vulnerability; the different capabilities utilized in the city; and an action plan that will be implemented to achieve a more resilient community.

9.12.1 Hazard Mitigation Planning Team

The following individuals have been identified as the City of Buffalo's hazard mitigation plan primary and alternate points of contact. The City of Buffalo followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many city departments, including: Buffalo Fire Department Division Chief and Commissioner Department of Public Works. The Fire Department Division Chief represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and Steering Committee, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.12-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Michael Tuberdyke, Buffalo Fire Department Division Chief Phone Number: (716) 444-5210 Email: mjtuberdyke@bfdny.org	Name/Title: Michael Finn, Commissioner Department of Public Works Phone Number: (716) 536-9795 Email: mfinn@city-buffalo.com
NFIP Floodplain Administrator	
Name/Title: Michael Finn, Commissioner Department of Public Works Phone Number: (716) 536-9795 Email: mfinn@city-buffalo.com	
Additional Contributors	
Name/Title: Don Poleto, Senior Operations Engineer Method of Participation: Attended Steering Committee Meetings, attended Municipal Support Meeting, provided data and information, supported update of mitigation strategy	

9.12.2 Municipal Profile

Buffalo is the second largest city in New York state and is the county seat. Buffalo is an important gateway for commerce and travel across the Canadian border. The city is bordered by the Towns of Tonawanda and Amherst to the north, the towns of Cheektowaga and West Seneca and the Village of Sloan to the east, Lake Erie to the west and the City of Lackawanna to the south. The city took its name from the River that runs through its southside and into Lake Erie. The city has an area of 53 square miles and has a relatively flat topography.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Buffalo's original inhabitants were Iroquois peoples. After the Revolutionary War, native peoples throughout the county were dispossessed of their lands. The first white landowner in Buffalo was Captain William Johnston. Buffalo's rise to economic power came through its waterways in the form of transshipment, and manufacturing. The city grew quickly after the opening of the Erie Canal in 1825; the Port of Buffalo was the original western terminus of the Erie Canal. Buffalo is known as the Queen City, a term coined by Erie County's native sone, Millard Fillmore. In 1804, Joseph Ellicott laid out a radial grid street plan that continues to define the city. Frederick Law Olmsted designed several parks within the city, including celebrated Delaware Park.

The city experienced a population boom during the mid-1800s and doubled in size between 1845 and 1855. Grain and commercial goods shipment led to repeated expansion of the harbor. Access to abundant hydropower spurred Buffalo to electrify early and became known as the "City of Lights" The city eventually also became a major rail center serving the entire nation. The City contains many significant architectural works developed during its heyday. In the latter part of the 20th century. Multiple factors impacted Buffalo's economy in the latter half of the 20th Century. The opening of the Saint Lawrence Seaway, plus deindustrialization and suburbanization led to decline of the city's main industries. Eight New York State highways, one three-digit Interstate Highway and one US Highway traverse the city. The Peace Bridge is one of North America's important commercial ports with four thousand trucks crossing it daily (Comprehensive Plan 2006).

According to the U.S. Census, the 2010 population for the City of Buffalo was 261,310. The estimated 2019 population was 256,480, a 1.8 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.6 percent of the population is 5 years of age or younger and 12.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.12.3 Jurisdictional Capability Assessment and Integration

The City of Buffalo performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.12.3). The City of Buffalo's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the City of Buffalo. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.12-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 103, Building Construction and Demolition; Fire Prevention, 1974	Local	Division of Zoning and Land Use Planning, City Clerk
Comment: The City of Buffalo administers the New York State family of codes, a collection of publications coauthored by the International Code Council and the New York State Department of State, legislated by the state, and implemented on July 3, 2002.					
Zoning Code	Yes	No	Chapter 496, Unified Development Ordinance 12/27/2016	Local	Division of Zoning and Land Use Planning, City Clerk
Comment: This Ordinance is adopted in accordance with a comprehensive plan to promote the interest and welfare of the people through standards that address the orderly and compatible use of land, the relationship between building facades and the public realm, the form and mass of buildings in relation to one another, and the scale and type of blocks, thoroughfares, and open spaces.					
Subdivision Ordinance	Yes	No	Chapter 496, Unified Development Ordinance, Article 11.5, Subdivision Approvals 12/27/2016	Local	Division of Zoning and Land Use Planning, City Clerk
Comment: Subdivision allows for the orderly division or consolidation of lots, the alteration of lot boundaries, and the dedication of land for public rights-of-way, parks, and other public purposes. The Commissioner of Permit and Inspection Services must take action on an exempt alteration of lots. The City Planning Board must take action on requests for approval of a minor subdivision or major subdivision.					
Stormwater Management Ordinance	Yes	No	Chapter 326, Plumbing, Article IV, Stormwater Retention System	Local	Chief Plumbing Inspector and the Sewer Authority
Comment: All new parking lots or other new paved and drained areas where the collected stormwater load would surpass that of the sewer system into which it would discharge shall have a complete stormwater retention system designed by an architect or engineer and approved by the Chief Plumbing Inspector and the Sewer Authority, as part of their construction.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment:					
Growth Management	Yes	No	Chapter 496, Unified Development Ordinance, Article 11.5, Subdivision Approvals 12/27/2016	Local	Division of Zoning and Land Use Planning, City Clerk
Comment: The subdivision ordinance will ensure the accurate and easy description of land, orderly growth and development, efficient land use, and proper use of natural resources.					
Site Plan Review	Yes	No	Chapter 496, Unified Development Ordinance, Article 11.3, Zoning Approvals	Local	Division of Zoning and Land Use Planning, City Clerk
Comment: Major site plan review is required prior to a building permit being issued for any development project which meets or exceeds the below thresholds: 1. New construction of a principal building of at least 5,000 square feet in gross floor area, except in a case that involves the construction of only a single unit dwelling or a double unit dwelling. 2. A 5,000 square foot or more increase in gross floor area to an existing principal building. 3. New construction of, or additions to, principal buildings to be conducted in phases so that the total gross floor area of all phases combined is at least 5,000 square feet. 4. New construction of a principal building of the civic building type in a neighborhood zone. 5. New construction of a principal building on a parcel that is within, directly across a public right-of-way from, or within 150 feet of, a Historic Olmsted Park or Parkway. 6. Any new construction of a multiple-unit dwelling in an N-2R or N-3R zone. 7. Substantial renovation of any principal building that is at least 50,000 square feet in gross floor area and that involves a change of use, other than in the D-S, D-C, D-IL, D-IH, or C-R zones. 8. New construction or reconstruction of a parking lot of at least 50 spaces. 9. New construction of a loading area containing at least three loading berths. 10. The demolition of a principal building in an N-1D, N-1C, N-1S, N-2C, N-2E, N-3C, N-3E per Section 3.2.1.K.					

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Environmental Protection Ordinance	Yes	No	Chapter 168, Environmental Review, 3/6/1998	Local	Buffalo Environmental Management Commission
Comment: This chapter is enacted pursuant to Article 8 of the New York Environmental Conservation Law and 6 NYCRR 617, State Environmental Quality Review (SEQR) regulations. The basic purpose of this chapter is to incorporate the consideration of environmental factors into the existing planning, review and decision making processes of the city at the earliest possible time. To accomplish this goal, this chapter requires that all agencies determine whether the actions they directly undertake, fund or approve may have a significant impact on the environment and, if it is determined that the action may have a significant adverse impact, prepare or request an environmental impact statement.					
Flood Damage Prevention Ordinance	Yes	Yes	The Charter, Article 31, Flood Damage Prevention, 9/3/2008	Local	Commissioner of Public Works, Parks and Streets
Comment: It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: (1) regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; (2) require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; (3) control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters; (4) control filling, grading, dredging and other development which may increase erosion or flood damages; (5) regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and; (6) qualify and maintain for participation in the National Flood Insurance Program. BFE+2 feet is required for all construction in the SFHA (residential and non-residential)					
Municipal Separate Storm Sewer System (MS4)	No	No	-	-	-
Comment: None					
Emergency Management Ordinance	No	No	-	-	-
Comment: None					
Climate Change Ordinance	No	No	-	-	-
Comment: None					
Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Disaster Reconstruction Ordinance	No	No	-	-	-

Other	No	-	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	No	The Queen City in the 21st Century: Buffalo's Comprehensive Plan, 2/7/2006	Local	Buffalo Office of Strategic Planning
Comment: The Buffalo Comprehensive Plan was created to guide Buffalo to achieve a shared community vision of the future for the city. It is the intent of the plan to build a city that is a prosperous, green regional center providing livable communities for all its citizens.					
Capital Improvement Plan	Yes	No	Within the Comprehensive Plan	Local	Buffalo Office of Strategic Planning

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The Comprehensive Plan proposes a special Buffalo Development Program which combines the Capital Improvement Program constructed out of already available funds with an additional $35 million per year from other sources. Over the ten-year course of the program an additional $350 million would be invested.					
Disaster Debris Management Plan	No	No	-	-	-
Comment: None					
Floodplain or Watershed Plan	Yes	No	Niagara River Watershed Management Plan, 2013 Regional Niagara River Lake Erie Watershed Management Plan, 2017	Local, County	Buffalo Niagara Riverkeeper, Erie County
Comment: Riverkeeper approached the watershed planning process through a two-phased approach, with the first focusing on completing an initial assessment of the watershed, by performing an ecological inventory, desktop GIS analysis, municipal code review, and ranking sub-watersheds within the Niagara River Watershed based on water quality, habitat and land use metrics. The second phase consisted of developing implementation plans for five priority sub-watersheds based on field data collected over two years.					
Stormwater Plan	Yes	No	Stormwater Management Plan, October 2015	City	Buffalo Sewer Authority
Comment: The SWMP Plan is based on the most current NYSDEC SPDES General Permit (GP-0-15-003) issued under the Federal Stormwater Phase II rule (issued in 1999) which requires MS4 owners and operators, in U.S. Census defined urbanized or other designated areas, to develop a SWMP Plan. There are six program elements designed to reduce the discharge of pollutants to the maximum extent practicable. The program elements, titled Minimum Control Measures, include: 1. Public Education and Outreach 2. Public Involvement / Participation 3. Illicit Discharge Detection and Elimination 4. Construction Site Runoff Control 5. Post-Construction Stormwater Management 6. Pollution Prevention / Good Housekeeping for Municipal Operations					
Open Space Plan	Yes	No	Land Use Plan September 2016	City	Office of Strategic Planning
Comment: The Buffalo Green Code is a place-based economic development strategy designed to implement the city's Comprehensive Plan. It includes the first citywide land use plan since 1977, and the first zoning rewrite since 1953. It incorporates the city's Homestead Urban Renewal Plan, Local Waterfront Revitalization Plan, and Brownfield Opportunity Area Plans into a common vision that will guide Buffalo's physical development over the next 20 years.					
Urban Water Management Plan	No	No	-	-	-

Comment: None					
Transportation Plan	Yes	No	2040 Metropolitan Transpiration Plan Update, May 2014	Regional	Greater Buffalo-Niagara Regional Transportation Council
Comment: The Greater Buffalo-Niagara Regional Transportation Council (GBNRTC) is a partnership of local and state governments working together to make decisions about transportation planning in the Buffalo-Niagara region. GBNRTC members include: City of Buffalo; City of Niagara Falls; Erie County; Niagara County; Niagara Frontier Transportation Authority (NFTA); New York State Department of Transportation (NYSDOT); and New York State Thruway Authority (NYSTA). The Empire State Development Corporation, the Transportation Council of the Buffalo-Niagara Partnership, and the Seneca Nation of Indians serve formally as Regional Strategic Stakeholders. Working together, GBNRTC members carry out a continuing, cooperative, and comprehensive planning process to develop transportation plans and programs for the Buffalo-Niagara region. As the Metropolitan Planning Organization (MPO), the GBNRTC is responsible for developing a long-range metropolitan transportation plan (MTP) for the region that reflects both regional needs and local concerns. The MTP serves a number of purposes. It provides a vision of the region's future growth and development; identifies regional transportation needs for future transportation improvements and services; and provides guidance and direction for infrastructure investments in the region. The plan sets the foundation and priorities for the distribution of federal transportation funds and serves as the framework for the development of the Transportation Improvement Program (TIP), the capital program of all federally funded transportation projects in the region.

Development and Permitting Capability

The table below summarizes the capabilities of the City of Buffalo to oversee and track development.

Table 9.12-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Department of Permit & Inspection Services
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	All permits must meet City and State Ordinances
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Not Indicated	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the City of Buffalo and their current responsibilities which contribute to hazard mitigation.

Table 9.12-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Planning Board makes determinations on Major Site Plans and Subdivisions. The Planning Board also advises the Common Council on Rezoning Requests, Special Use Permits, Planned Unit Developments, and Adaptive Reuse Permits.
Zoning Board of Adjustments	Yes	The Zoning Board of Appeals reviews all applications seeking relief from what is required by the Unified Development Ordinance.
Planning Department	Yes	The Mayor's Office of Strategic Planning, a division within the city's Executive Department, coordinates economic development activities throughout the City of Buffalo. The Mayor's Office of Strategic Planning is subdivided into four divisions: Development, Real Estate, Planning & Zoning, and Environmental Affairs. The Division of Development works directly with the business community and real estate developers. The Division of Real Estate handles real estate transactions related to city-owned property, including the sale of real property owned by the City of Buffalo, including vacant lots, residential structures, and capital assets such as decommissioned schools and fire houses. The Division of Planning & Zoning oversees the administration of the city's development regulatory boards (Planning Board, Zoning Board of Appeals, and Historic Preservation Board) and engages the community in planning initiatives. The Division of Environmental Affairs handles matters related to state and federal environmental review, implementation of state and federal environmental land use laws, and oversees the Environmental Management Commission.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	The Environmental division is responsible for the review and coordination of actions subject to the State and Federal regulations, the assessment and remediation of the city's brownfields, providing support staff to the Buffalo Environmental Management Commission, and advising city departments on environmental issues and affairs.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Open Space Board/Committee	No	-
Economic Development Commission/Committee	Yes	The Division of Development in the Mayor's Office of Strategic Planning strives to make doing business in Buffalo as seamless as possible.
Public Works/Highway Department	Yes	The City of Buffalo Department of Public Works (DPW) plays a major role in connecting the Buffalo Community. Whether it is clearing snow from your street, inspecting bridges, collecting trash, or mowing the sports fields our children play on, we are in our neighborhoods every day working to improve quality of life for residents, businesses and visitors in the city. It is the mission of the department to maintain, enhance and beautify city streets, public facilities, infrastructure, waterways, and parks. The DPW is constantly working to keep all the elements of the city functioning properly. The Buildings Division of the DPW is responsible for: • Building Planning and Design - Responsible for the design, planning, and construction oversight for all major capital improvements and repairs at over 200 city-owned facilities. These facilities include cultural and sports assets, major municipal buildings, police facilities, fire houses, all city service garages, all libraries within the city limits, all city-owned community centers, and all park buildings, shelters, ice rinks and pools. • Building Maintenance - Oversees all building maintenance on over 200 city owned facilities.
Construction/Building/Code Enforcement Department		The Department of Permit and Inspection Services oversees all development and uses on private property in the City of Buffalo, ranging from a new patio in a residential backyard to the construction of a new multi-story office building. Our mission is to guide residents and property owners through the license and/or permit process. We review and inspect these projects to ensure safety and compliance with the New York State Building and Fire Code, the Buffalo Green Code, and all other appropriate codes or ordinances.
Emergency Management/Public Safety Department	Yes	The Buffalo Fire Department is responsible for Emergency Management Services.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	BuffAlert
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	• The Engineering Department is responsible for construction and paving of all City streets; traffic signals and signage; maintains over 32,000 street lights citywide; maintains 44 bridges, oversees harbor functions; monitors ice formations on bodies of water in winter • The Buildings Department oversees all construction of City-owned facilities and handles major repairs; oversees all maintenance on hundreds of City-owned buildings • The Streets Department: Plows and cleans 1,600 lane miles of City roadways, and handles bulk trash pickup • The Sanitation Department is responsible for collecting and disposing of 70,000 trash pick-ups weekly • The Recycling Department works with a contractor to collect recyclables on a weekly basis to reduce our reliance on landfills, prevent pollution, increase air quality and save tax dollars • The Water Department handles all water engineering, daily operations, water-related customer service and maintenance on 800 miles of sub-surface piping

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		• The Department of Parks and Recreation is responsible for all park operations including maintaining around 190 City properties including athletic fields, bike trails, traffic circles, green spaces and managing over 64,000 street trees. This division also manages programming at 7 City recreation centers, pools, splash pads and skating rinks.
Mutual aid agreements	No	Not Indicated
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Division of Engineering
Engineers or professionals trained in building or infrastructure construction practices	Yes	Division of Engineering
Planners or engineers with an understanding of natural hazards	Yes	Division of Engineering
Staff with expertise or training in benefit/cost analysis	Yes	Administration, Finance, Policy & Urban Affairs
Professionals trained in conducting damage assessments	No	Division of Engineering, Department of Permit and Inspection Services
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Office of Strategic Planning
Scientist familiar with natural hazards	No	Not Indicated
NFIP Floodplain Administrator (FPA)	Yes	Commissioner, Department of Public Works
Surveyor(s)	No	Not Indicated
Emergency Manager	Yes	Fire Commissioner
Grant writer(s)	No	Not Indicated
Resilience Officer	No	Not Indicated
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the City of Buffalo.

Table 9.12-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Stormwater utility fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	Yes
Withhold public expenditures in hazard-prone areas	Yes
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	Yes
Other	-

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the City of Buffalo.

Table 9.12-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Mayor's Office of Communications
Personnel skilled or trained in website development	Yes	Mayor's Office of Communications
Hazard mitigation information available on your website	Yes	Buffalony.gov
Social media for hazard mitigation education and outreach	Yes	Facebook, Twitter, and Instagram available
Citizen boards or commissions that address issues related to hazard mitigation	Yes	The Citizens Planning Council is a group of appointed citizens that makes capital budget recommendations to the Mayor's Office based upon capital budget requests from City departments, not-for-profit institutions, and the community. The Preservation Board reviews all exterior changes to landmark properties and properties located within City of Buffalo Preservation Districts as per Chapter 337 of City of Buffalo Code. The Preservation Board uses the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings as its guidelines.
Other programs already in place that could be used to communicate hazard-related information	Yes	BuffAlert Newsletter
Warning systems for hazard events	Yes	CodeRED
Natural disaster/safety programs in place for schools	Yes	Fire Safety, Tornado Safety
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the City of Buffalo.

Table 9.12-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	Yes	Bronze	9/26/2019
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.12-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.12.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Michael Finn, Commissioner Department of Public Works

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the City of Buffalo.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.12-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
City of Buffalo	94	403	$927,901	33	45

Source: *FEMA 2020a, FEMA 2020b*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL Severe Repetitive Loss*

Flood Vulnerability Summary

Areas in the City of Buffalo along Lake Erie are particularly susceptible to coastal flooding as a result of storm-induced rises and seiches. The Buffalo River is a notable floodplain in Erie County that flows through the southern portion of the city. Over 4.5% of the land area in the City of Buffalo (1,187 acres) is located within the SFHA (100-year floodplain).

NFIP Compliance

The City of Buffalo's more recent Community Assistance Contact (CAC) was on April 8, 2005 and the most recent Community Assistance Visit (CAV) was on April 26, 2017. There are currently no outstanding compliance issues.

9.12.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The City of Buffalo has identified the following routes and procedures to evacuate residents prior to and during an event.

- I-190
- I-90
- Pittsburgh-Buffalo Hwy (US-219)
- South Park Ave (US-62)
- NY-400
- NY-33
- NY-5

Sheltering

The City of Buffalo has identified the following designated emergency shelters within the city.

Table 9.12-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
None Identified. The city will work with the county to identify and designate sheltering locations. See Mitigation Action 2022-C. Buffalo-#014							

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The City of Buffalo has identified the following sites suitable for placing temporary housing units.

Table 9.12-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The city will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-C. Buffalo-#014					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The City of Buffalo has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.12-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None Identified. The city will work with the county to identify and designate permanent housing locations. See Mitigation Action 2022-C. Buffalo-#014					

9.12.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.12-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.12-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	18	3	9	1	16	3	40	0	18	3	26	0
Multi-Family	3	0	5	0	6	1	9	0	11	0	2	0

Total Permits Issued	**40**	**4**	**24**	**3**	**37**	**4**	**64**	**0**	**46**	**4**	**37**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location	Known Hazard Zone(s)*	Description / Status of Development

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

			(address and/or block and lot)		
Recent Major Development and Infrastructure from 2015 to Present					
None Identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.12.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the City of Buffalo's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the City of Buffalo has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The City of Buffalo's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.12-14 provides details regarding municipal-specific loss and damages the city experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.12-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	A portion of the New York State Thruway was closed.
August 11-15, 2015	Flash Flood	No	Some of the main roads closed included: Maple Road, Niagara Falls Blvd, and Sheridan Drive. Secondary roads, too numerous to mention, were also flooded. In East Amherst, streets were flooded and people had to be rescued from vehicles trapped in flood waters.
October 28-29, 2015	High Wind	No	Reports of trees down scattered about the City of Buffalo.
November 6, 2015	Thunderstorm Wind	No	The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car. Damage was estimated at $200,000.
November 12, 2015	High Wind	No	Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets.
November 18, 2015	High Wind	No	Although the county was impacted, the city did not report damages
January 11, 2017	High Wind	No	Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.
March 8, 2017	High Wind	No	Numerous flights into the Buffalo and Rochester Airports had to be diverted due to the winds.
March 13, 2017	Winter Storm	No	Most schools and some businesses closed on Tuesday. Snowfall records were set at 19.5 inches in Buffalo.
July 20, 2017	Tornado	No	Although the county was impacted, the city did not report damages
August 4, 2017	Thunderstorm Wind	No	In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the city did not report damages
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the city did not report damages
January 2, 2018	Blizzard	No	Although the county was impacted, the city did not report damages
October 6, 2018	Lightning	No	Although the county was impacted, the city did not report damages
February 24, 2019	High Wind	No	Thousands were reported without power.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the city did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach.
November 27, 2019	Lakeshore Flooding	No	This caused a lesser long-lived seiche on Lake Erie than the previous event. It peaked at 9.56 ft above low water datum with the level above Lake Erie's flood stage for about four hours. This again flooded Canalside in downtown Buffalo, flooded Route 5, and did additional damage to breakwaters in Dunkirk in Buffalo.
January 12, 2020	Lakeshore Flooding	No	High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.
January 18, 2020	Lakeshore Flooding	No	As the cold front passed that brought colder air in, a seiche on Lake Erie again brought lakeshore flooding to Chautauqua and Erie counties, doing further damage to the Dunkirk Pier, Buffalo break wall, and closing Route 5 in Hamburg. There were two distinct pulses of higher water on the east end of the lake, as well. The first corresponded with lake levels of 8.18 feet above low water datum, and the second of 7.3 feet above low water datum.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the City of Buffalo's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the City of Buffalo. The City of Buffalo has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

During the review of the hazard/vulnerability risk ranking, the city did not suggest modifications for the following hazard rankings.

Table 9.12-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.12-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event

Source: Effective DFIRM

Identified Issues

After review of the City of Buffalo's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the City of Buffalo has identified the following vulnerabilities within their community:

- Various critical facilities are located within the floodplain
- Several communications facilities, community centers, dams, electric power stations, hazardous material facilities, oil facilities, post offices, private schools, and colleges, in the city are in the earthquake hazard area.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- All of the critical facilities in the City of Buffalo may be at risk of being exposed to hazardous materials incidents.
- Several private facilities are located on steep slopes and at risk of landslides.
- The South Side Buffalo Post Office may be at risk of experiencing damages caused by expansive soils.
- There are 33 Repetitive Loss Properties within the city.
- Ice jams during high water events cause flooding and destabilization of the Cazenovia Creek and Buffalo River banks.
- The city does not have identified emergency shelters, temporary or permanent housing locations, or heating/cooling centers.
- FEMA FIRMs are updated on an ongoing basis and may change the flood risk to the city.
- The city would like to increase public awareness, preparedness, and information sharing about disasters.

9.12.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.12-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Enhance local Snow Removal Plan by controlling employee leave time; extending shifts to 12-16 hours; establishing a Command Center/War Room; providing additional notification/information of impending and current events via Public Notification System; establishing off-street parking agreements with local businesses to facilitate plowing of streets; purchasing eight new wing plows; renewing GPS contract to assist in tracking and deploying assets	Exposure; transportation; continuity of operations for health facilities; businesses and gov't	Not Identified	Dept. of Public Works	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Discontinue 2. 3. Project is complete and improvements are in place. Buffalo has been successful in the past several storms. The mutual aid provided by NYSDOT has been the best of all improvements made. That allows city forces to focus on secondary and residential routes and achieve overall completion faster.
	Currently seeking funding for expansion of slope walls/bank protection along the Caznovia Creek and Buffalo River; dredging of key areas outside of Federal navigational limits; increased ice breaking/cutting; enforcement of all local/State and Federal rules and regulations involving floodplain development	Flooding, Ice Jams	Effects of flooding caused by ice jams during high water events	Dept. of Public Works	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2020 HMP 2. Continue to seek funding for slope wall construction and dredging upstream of the Federal navigation channel. Actions taken since 2015 include consistently breaking ice in the navigation channel with the Cotter fire boat, breaking ice at bridges with long arm excavator and cutting triangles in upstream sheet ice to weaken the field ahead of forecasted ice flow. 3.
	Promote Citizen Awareness/ Preparedness by holding CERT classes; disseminating disaster preparedness and EMS information to the Board of Block Clubs; Buffalo Public Schools; Community Centers; faith based organizations; kiosks at festivals/PRs; etc.	All Hazards	Not Identified	Dept. of Fire	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success	- - -	1. Include in 2020 HMP 2. Current programs are in place for dissemination of information to the citizens of Buffalo. May revise the project description to reflect current options for information sharing. 3.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The City of Buffalo has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Caznovia Creek and Buffalo River – The city consistently breaks up ice in the navigation channel with the Cotter fire boat, breaks ice at bridges with along arm excavator and cuts triangles in upstream sheet ice to weaken the field ahead of forecasted ice flow.

Proposed Hazard Mitigation Initiatives for the HMP Update

The City of Buffalo participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.12-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X			X			X			X
Cyber Attack	X			X			X			X
Earthquake	X			X			X			X
Expansive Soils	X			X			X			X
Extreme Temperature	X			X			X			X
Flood	X	X		X			X		X	X
Hazardous Materials	X			X			X			X
Landslide	X			X			X			X
Pandemic	X			X			X			X
Severe Storm	X	X		X			X		X	X
Severe Winter Storm	X	X		X			X		X	X
Utility Failure	X			X			X			X
Wildfire	X			X			X			X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.12-19 summarizes the comprehensive-range of specific mitigation initiatives the City of Buffalo would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.12-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Table 9.12-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-C. Buffalo-001	Work with the Delaware Park Lake Dam owner on how they can protect their dam to the 0.2% annual chance flood event	1, 2	Flood	**Problem**: The Delaware Park Lake Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution**: The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	The dam owner will be aware of options to protect the dam to the 0.2% annual chance flood event.	City Budget	High	EAP	PI
2022-C. Buffalo-002	Work with the Scajaquada Creek Dam owner on how they can protect their dam to the 0.2% annual chance flood event	1, 2	Flood	**Problem**: The Scajaquada Creek Dam is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution:** The FPA will contact the facility owner and discuss options for protecting the facility to the 0.2% annual chance flood event.	Yes	None	Within 6 months for outreach	FPA	<$100 for outreach, TBD by engineering study	The dam owner will be aware of options to protect the dam to the 0.2% annual chance flood event.	City Budget	High	EAP	PI
2022-C. Buffalo-003	Protect the Buffalo Fire Investigation to the 0.2% annual chance flood event	1, 2	Flood	**Problem**: The Buffalo Fire Investigation is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event. **Solution**: The city will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Buffalo Fire Investigation to protect it to the 0.2% annual chance flood event. Options include: •Elevation of facility	Yes	None	Within 5 years	Engineer, facility manager	TBD by feasibility assessment	Ensures continuity of operations of the facility	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG	High	SIP	PP

HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

OEM *Office of Emergency Management*

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.12.9 Action Worksheets

The following action worksheets have been developed by the City of Buffalo to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 51-Section-9.12-Buffalo-C-121721 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Protect the Buffalo Fire Investigation to the 0.2% annual chance flood event		
Project Number:	2022-C. Buffalo-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Buffalo Fire Investigation is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.		
Action or Project Intended for Implementation			
Description of the Solution:	The city will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Buffalo Fire Investigation to protect it to the 0.2% annual chance flood event. Options include: •Elevation of facility •Floodproofing of facility •Mobile flood barriers Once the most cost-effective option is identified, the city will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the facility
Useful Life:	40 years	**Goals Met:**	1, 2
Estimated Cost:	TBD by feasibility assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG
Responsible Organization:	Engineer, facility manager	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Relocate building	$500,000	Not feasible
	Elevate roads	$500,000	Elevated roadways would not protect the facility from flood damages

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:

9.13 Town of Cheektowaga

This section presents the jurisdictional annex for the Town of Cheektowaga. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Cheektowaga's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.13.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Cheektowaga's hazard mitigation plan primary and alternate points of contact. The Town of Cheektowaga followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Emergency Services, Planning, and Engineering. The Emergency Services Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

9.13.2 Municipal Profile

The Town of Cheektowaga is in the north-central part of Erie county, and is an inner ring suburb of Buffalo. It is the second most populated suburb in Erie County, after the Town of Amherst. Cheektowaga contains the incorporated Villages of Sloan and Depew. The town is bordered by the Town of Lancaster on the east, the Town of West Seneca on the south, the City of Buffalo on the west, and the Town of Amherst to the north. The Scajaquada Creek, Cayuga Creek and Ellicott Creek run through the town (Wikipedia 2020).

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

The town was hunting and fishing grounds for different groups of Native Americans. After white settlement, Cheektowaga become a thriving rural town with several taverns, sawmills, and cloth mills. In 1839, Cheektowaga was formed from the original Town of Amherst. Agricultural was very productive. By the time the Civil War started, several railroad lines bisected the town and spurred industrial development. The Buffalo Airport's development was very important to the town. The construction of the New York State Thruway, with three of its main interchanges within Cheektowaga also triggered rapid residential, industrial and commercial development (Town of Cheektowaga 2020).

Originally a rural farming area, the town was extensively developed for suburban housing during the post-World War II subdivision boom of the 1950s (Town of Cheektowaga 2020). In 1989 the Walden Galleria Mall opened a 1.2 million square foot regional shopping center. The Kensington Expressway was rebuilt in 1990 to service the Buffalo Airport and the eastern suburbs. Over time the town has become steadily more urban in composition (Town of Cheektowaga Comprehensive Plan 1992).

According to the U.S. Census, the 2010 population for the Town of Cheektowaga was 74,649. The estimated 2019 population was 73,129, a two percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.1 percent of the population is 5 years of age or younger and 19.7 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.13.3 Jurisdictional Capability Assessment and Integration

The Town of Cheektowaga performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.13.3). The Town of Cheektowaga's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Cheektowaga. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.13-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Cheektowaga to oversee and track development.

Table 9.13-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Department
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain Development Permit is required for any development or renovations within the 100 Year Floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Cheektowaga and their current responsibilities which contribute to hazard mitigation.

Table 9.13-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The Town Planning Board is a five member citizen advisory body to the Town Board. Their mission is promulgated within Chapter 26 of the Town Code. Items considered by the Planning Board are initiated by filing a Development Review Application with the Code Enforcement Officer.
Zoning Board of Adjustments	Yes	The Town regulates all uses of land, heights of buildings, building locations and the density or bulk of buildings through its Zoning Law. The Town of Cheektowaga adopted its first zoning ordinance in 1942, which was subsequently replaced by a second zoning ordinance in 1969 with the adoption of its first comprehensive plan. In 1992 the Town adopted its current zoning law and its second comprehensive plan. The current Zoning Law, which has been periodically amended to date, can be found under Chapter 260 of the Town of Cheektowaga Town Code.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	Environmental Advisory Committee serves an advisory role only
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Public Works/Highway Department	Yes	The Highway department provides many services, including: repair of pot holes, tree planting, branch pickup, drainage/repair of storm sewers, street sweeping, street paving, tree trimming/removal, leaf pick-up, and snow/ice removal.
Construction/Building/Code Enforcement Department	Yes	The Town of Cheektowaga Building Inspection Department is the first stop for all proposed developments or construction within the Town. In addition to reviewing plans, issuing building permits and conducting inspections, the office provides the following services or functions: Planning/Zoning Administration State Environmental Quality Review (SEQR) Coordination Plumbing Inspections
Emergency Management/Public Safety Department	Yes	The Town of Cheektowaga Office of Emergency Services was created in 1981. The main responsibility of our office is to conduct a hazard analysis of the Town and then develop a plan and resources to handle a hazard or emergency. We are also responsible for keeping the training records of all town employees regarding the National Incident Management System (NIMS). In 2006, with the help of our Police Department, we formed the Town of Cheektowaga Community Emergency Response Team (CERT) We now have 72 members on our team.
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department (see Above)
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering Department
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering Department
Planners or engineers with an understanding of natural hazards	Yes	Engineering Department
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Engineering Department
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Town Engineer
Surveyor(s)	No	
Emergency Manager	Yes	Town has an Emergency Manager and Emergency Coordinator
Grant writer(s)	Yes	Town contract with grant writer

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Cheektowaga.

Table 9.13-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes, following legislative process
User fees for water, sewer, gas or electric service	Yes (Sanitary & Storm Sewers)
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	Yes – Drainage District Fee
Incur debt through general obligation bonds	No
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Cheektowaga.

Table 9.13-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	PIO from Town Supervisor's Office and Police Department
Personnel skilled or trained in website development	Yes	Town website maintained by Town Supervisor's Office
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Warning systems for hazard events	Yes	NY-Alert
Natural disaster/safety programs in place for schools	Yes	Fire safety programs conducted by local Fire Departments.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Cheektowaga.

Table 9.13-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	See Local Fire Departments.	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	Yes	Certificate of Achievement	June 11,2019
Firewise Communities classification	No	-	-
Other	No	-	-

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.13-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

*Strong Capacity exists and is in use
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.13.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Patrick Bowen, Floodplain Administrator, Engineering Department

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Cheektowaga.

Table 9.13-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Cheektowaga	76	211	$1,197,869	47	29

Source: FEMA 2019
Notes: Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.
RL Repetitive Loss; *SRL* Severe Repetitive Loss

Flood Vulnerability Summary

The Town has identified the West end of West Toulon-Cherbourg-N. Seine area and Dubonnet Dr. as being flood prone areas, including street flooding, and basement flooding. Street flooding in both areas were recently mitigated with recent drainage improvements. The town does not maintain a list of property owners interested in flood mitigation, and there are currently no RiskMAP projects underway. There have been no recent flood events that have needed substantial damage determinations. Current FEMA flood hazard maps accurately address flood risk to the town.

NFIP Compliance

The Engineering Department is responsible for floodplain administration, however there are no certified floodplain managers on staff. The town has indicated that additional courses on how to manage development in the floodplain would beneficial. The Engineering department provides the following services for residents: Permit review, flood insurance inquiries, inspections, review of Letter of Map Revisions, review of all development projects for potential impact on the floodplain. The Town Flood Damage Prevention Ordinance was originally adopted 10-15-2001 by L.L. No. 6-2001, and amended 5-28-2019 by L.L. No. 2-2019. The FDPO meets minimum requirements.

The Town of Cheektowaga's most recent Community Assistance Visit (CAV) was on April 17, 2014. There are currently no outstanding compliance issues.

9.13.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Cheektowaga has identified the following routes and procedures to evacuate residents prior to and during an event.

- Evacuation shelters and the routes to them will be identified and promulgated to residents using the local media and NY-Alert.

Sheltering

The Town of Cheektowaga has identified the following designated emergency shelters within the town.

Table 9.13-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Cheektowaga Senior Center	3349 Broadway	200	See Animal Control Plan	Partial	Yes	Emergency	Feeding
Alexander Bldg.	275 Alexander Avenue	1075	See Animal Control Plan	No	No	Emergency	None
Southline Fire Station	1049 French Road	150	See Animal Control Plan	Yes	Yes	Emergency	Feeding
Dartwood Community Center	222 Autumwood Drive	72	See Animal Control Plan	Partial	No	Emergency	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Cheektowaga has identified the following sites suitable for placing temporary housing units.

Table 9.13-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate locations for Temporary Housing. See Mitigation Action 2022-T. Cheektowaga-#011.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Cheektowaga has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.13-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate locations for Temporary Housing. See Mitigation Action 2022-T. Cheektowaga-#011.					

9.13.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.13-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.13-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020

9.13.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Cheektowaga's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Cheektowaga has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Cheektowaga's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.13-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.13-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
August 11-15, 2015	Flash Flood	No	Flash Flood	Minor Basement Flooding
October 27-November 1, 2019	Lakeshore Flooding, DR-4472 NY	Yes	Lakeshore Flooding	Although the county was impacted, the town did not report damages.
October 31-November 1, 2019	High Wind, DR-4472 NY	Yes	High Wind	Although the county was impacted, the town did not report damages.

Notes:

EM *Emergency Declaration (FEMA)*

FEMA *Federal Emergency Management Agency*

DR *Major Disaster Declaration (FEMA)*

N/A *Not applicable*

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Cheektowaga's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Cheektowaga. The Town of Cheektowaga has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

During the review of the hazard/vulnerability risk ranking, the town agreed that the calculated rankings accurately reflected the risk posed to the community.

Table 9.13-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.13-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Forks Fire District #3	Fire Station	X	X	2022-T. Cheektowaga-001

Identified Issues

After review of the Town of Cheektowaga's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Cheektowaga has identified the following vulnerabilities within their community:

- NYS Route 277 (Union Road) between Broadway and Vern Lane has consistent flooding during slightly above average rainfall. This is a major North-South route in the County and causes significant traffic flow problems.
- William Street between Ceil Drive and Tamarak Court. Has consistent flooding during slightly above average rainfall. This is a major intersection with the NYS Thruway (Route 90) and causes significant traffic problems for motorists attempting to enter and exit the NYS Thruway.
- Walden Avenue and Union Road intersection is in need of backup power supply for the traffic signals. This is a significant North-South and East-West route as well as the second largest intersection in New York State. Because of the large traffic volume, significant complications occur whenever there is a power failure or disruption.
- The Town of Cheektowaga is in need of several electric generators as replacements/upgrades, and original installation to improve operational ability of town facilities during power outages and for Continuity of Operations Planning (COOP).
- Genesee & Toelsen Road Is a flood prone area.

9.13.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.13-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		Next Steps Project to be included in 2022 HMP or Discontinue If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). If discontinue, explain why.
	Operation, maintenance and improvement to Scajaquada Creek and Cayuga creek flood control projects	Flooding	Issues with maintaining capacity and prevent erosion	Engineering and Highway	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. 3.
	Multi-year storm sewer installation program	Flooding	Need improvement for poorly drained residential subdivisions	Engineering and Highway	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. 3.
	Infiltration and inflow a basement program for sanitary sewer district	Basement Flooding	Need to eliminate sources of inflow into sewer	Engineering and Sewer Maint. Dept.	No Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. 3.
	Administration of local flood damage prevention regulations	Flooding	Regulate development through enforcing local laws	Engineering and Building Inspection Dept	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in 2020 HMP 2. 3.
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Engineering	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing Capability

Packet Pg. 1693

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Cheektowaga has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Cheektowaga participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.13-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X								X
Cyber Attack		X								X
Earthquake		X		X			X			X
Expansive Soils		X		X			X			X
Extreme Temperature		X								X
Flood		X		X		X	X		X	X
Hazardous Materials		X		X			X			X
Landslide		X		X			X			X
Pandemic		X								X
Severe Storm		X							X	X
Severe Winter Storm		X							X	X
Utility Failure		X								X
Wildfire		X								X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.13-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Cheektowaga would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.13-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Table 9.13-20. Summary of Prioritization of Actions

Project Number	Project Name	Life Safety	Property Protection	Cost-Effectiveness	Technical	Political	Legal	Fiscal	Environmental	Social	Administrative	Multi-Hazard	Timeline	Agency Champion	Other Community Objectives	Total	High / Medium / Low
2022-T. Cheektowaga-001	Protect the Forks Fire Station to the 0.2% annual chance flood event	1	1	1	1	1	1	-1	1	1	1	1	1	1	1	12	High
2022-T. Cheektowaga-002	Flood Outreach to critical facilities	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -003	Work with the private building owners in the town to determine if earthquake risk exists and to assess the structures and determine necessary mitigation measures to protect them from earthquakes	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -004	Protect the critical facilities in the Town of Cheektowaga from HazMat incidents	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -005	Protect the following facilities from landslides: Flattail Lake Dam and National Car Rental - Buffalo Airport	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -006	Work with private facility owners to protect their facilities from the risk of expansive soils:	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -007	NYS Route 277 Flood mitigation	1	1	1	1	0	0	-1	1	1	1	1	1	1	1	10	High
2022- T. Cheektowaga -008	William Street Flood Mitigation	1	1	1	1	0	0	-1	1	1	1	1	1	1	1	10	High
2022- T. Cheektowaga -009	Walden Rd Generator for traffic signals	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -010	Generator for IT Department/ Town Hall	1	1	1	1	1	1	0	1	1	1	1	1	1	0	12	High
2022- T. Cheektowaga -011	Temporary and Permanent Housing	1	1	1	1	1	0	1	1	1	1	0	1	1	0	11	High
2022- T. Cheektowaga -012	Repetitive Loss Homeowner Outreach	1	1	1	1	1	0	1	1	1	1	0	1	1	0	11	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022

9.13.9 Action Worksheets

The following action worksheets have been developed by the Town of Cheektowaga to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Protect the Forks Fire Station to the 0.2% annual chance flood event		
Project Number:	2022-T. Cheektowaga-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Forks Fire Station is in the SFHA and vulnerable to flooding. Critical facilities need to be protected to the 0.2% annual chance flood event.		
Action or Project Intended for Implementation			
Description of the Solution:	The town will conduct a feasibility assessment to determine what additional floodproofing measures are needed at the Forks Fire Station to protect it to the 0.2% annual chance flood event. Options include: • Elevation of facility • Floodproofing of facility • Mobile flood barriers Once the most cost-effective option is identified, the town will carry out the option.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is the critical facility located in the 1% annual chance flood area?	Yes ☒	No ☐	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year flood	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the facility
Useful Life:	30 years	**Goals Met:**	1, 2, 3
Estimated Cost:	High, TDB by vulnerability assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	Dependent on funding
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	FEMA HMGP, BRIC, USDA Community Facilities Grant Program, EMPG
Responsible Organization:	Engineer, facility manager	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Relocate the facility	$1million	No available land, not cost effective
	Elevate roads	$500,000	Elevated roadways would not protect the facility from flood damages

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:	
Update Evaluation of the Problem and/or Solution:	

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect the Forks Fire Station to the 0.2% annual chance flood event	
Project Number:	2022-T. Cheektowaga-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Ensures function of emergency services
Property Protection	1	Reduces/eliminates flooding at a critical facility
Cost-Effectiveness	1	
Technical	1	Town engineering can conduct study
Political	1	
Legal	1	
Fiscal	-1	Town will seek funding to implement recommendations of vulnerability analysis
Environmental	1	
Social	1	
Administrative	1	
Multi-Hazard	1	
Timeline	1	
Agency Champion	1	Fire Department
Other Community Objectives	1	Emergency Services
Total	12	
Priority (High/Med/Low)	High	

Attachment: 52-Section-9.13-Cheektowaga-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Walden Rd Generator for traffic signals		
Project Number:	2022- T. Cheektowaga -009		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	Walden Ave. and Union Road intersection is in need of backup power supply for the traffic signals. This is a significant North-South and East-West route as well as the second largest intersection in New York State. Because of the large traffic volume, significant complications occur whenever there is a power failure or disruption.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town will seek funding for an automatic, permanent backup generator to use at the intersection to ensure that power disruptions to not impede the flow of traffic and cause additional cascading impacts. The town will ensure that the generator is properly house and secured at the intersection and is protected from additional hazards (raised from flooding, etc.).		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Ensures continuity of operations of the intersection
Useful Life:	25 years	**Goals Met:**	1, 2
Estimated Cost:	Estimated $50,000	**Mitigation Action Type:**	Structure and Infrastructure Projects
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	ASAP
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program, Municipal Budget
Responsible Organization:	Town of Cheektowaga	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning, Emergency Management

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Install solar panels	$100,000	Weather dependent; need large amount of space for installation; expensive if repairs needed
	Install wind turbine	$100,000	Weather dependent; poses a threat to wildlife; expensive repairs if needed

Progress Report (for plan maintenance)	
Date of Status Report:	
Report of Progress:

9.14 Town of Clarence

This section presents the jurisdictional annex for the Town of Clarence. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Clarence's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.14.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Clarence's hazard mitigation plan primary and alternate points of contact. The Town of Clarence followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from town department. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.14-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: David Bissonette, Emergency Manager Address: One Town Place, Clarence, NY 14031 Phone Number: 716-741-8930 Email: david@davidbissonette.com	Name/Title: David Baumler, Deputy Emergency Manager Address: One Town Place, Clarence, NY 14031 Phone Number: 716-583-6840 Email: dbaumler@clarenceny.us
NFIP Floodplain Administrator	
Name/Title: Timothy Lavocat, Town Engineer Address: One Town Place, Clarence, NY 14031 Phone Number: 716-741-8952 Email: Tlavocat@clarence.ny.us	

9.14.2 Municipal Profile

The Town of Clarence is in the north portion of Erie County. The town is 53 square miles in size; and contains the hamlets of Clarence, Harris Hill, Clarence Center. Clarence was one of the county's original large towns and was founded in 1808. The town was reduced in size when other towns were formed from it. The town is bordered by the Town of Amherst to the west, the Towns of Lockport and Royalton (Niagara County) to the north, the Town of Newstead to the east and the Town of Lancaster to the south. Interstate 90 traverses the southeastern portion of the town. New York State Route 5 (Main Street) passes across the south part of the town. NY Route 78, Transit Road, marks the town's western boundary. The eastern terminus of NY Route 324 is in Clarence (Town of Clarence 2020).

The town was originally inhabited by Native Americans and was called "place full of hickory bark". The first white settler was Asa Ransom, a former colonial officer from the American Revolution, who purchased land

from the Holland Land Company in 1807 and established a tavern near Harris Hill in the southwest part of Clarence (Town of Clarence 2020). During the war of 1812, Clarence residents joined in fighting against the British army. Agriculture was for many years the chief economy of the town. The town's first industries were in potash and clay manufacture thereafter followed by sand and gravel mining operations. Following discovery of a large gypsum deposit, National Gypsum Company began operations in 1926. After the Great Depression, the town experienced a land boom. The town experienced its most rapid period of development after the end of World War II (Town of Clarence 2007).

According to the U.S. Census, the 2010 population for the Town of Clarence was 30,673. The estimated 2019 population was 32,440, a 5.8 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.1 percent of the population is 5 years of age or younger and 18.9 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.14.3 Jurisdictional Capability Assessment and Integration

The Town of Clarence performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.14.3). The Town of Clarence's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Clarence. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.14-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated ? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Flood Damage Ordinance LL-2007, Town Building Code, Chapter 67	Local	Code Enforcement/Building Department

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated ? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The Purpose of the Building Code is to provide for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the state Energy Conservation Construction Code (the Energy Code) in the Town of Clarence. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this chapter. Enforcement of building code regulations reduces risk from natural hazards.					
Zoning Code	Yes	No	LL3-2005, Town Zoning Code Chapter 107, 229	Local	Building/Zoning Departments
Comment: Construction within Floodways must meet requirements. Natural features such as streams, rock outcrops, marshlands, trees, and shrubs shall be preserved and incorporated into the landscaping of the development. Site plans shall include a topographical survey that shows floodplains, wetlands, soils, existing streams and ditches with base flood elevations, existing elevations and proposed elevations clearly illustrated. 6) Parking areas shall be graded and surfaced with material that will provide adequate protection against potholes, erosion, and dust and in a manner that will not conflict with the proposed means of snow storage and/or removal.					
Subdivision Ordinance	Yes	No	LL5-2005, Chapter 193 Town Subdivision Code, Town Code	Local	Code Enforcement/Building
Comment: Purposes of the Subdivision Code include to secure safety from fire, flood, and other danger; to protect and conserve the value of land, buildings, and improvements and to minimize conflicts among the uses of land and buildings.					
Stormwater Management Ordinance	Yes	Yes	LL6-2007, Stormwater Management and Erosion and Sediment Control, Chapter 188A	Local	Engineering staff
Comment: Minimizes increases in stormwater runoff from land development activities to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels.					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	Town of Clarence Comprehensive Plan, 2015	Local	Planning and Zoning
Comment: The Town’s Comprehensive Plan discourages development within flood prone area.					
Site Plan Review	Yes	No	Town Code Chapter 229-151, Site Plan Review, Zoning	Local	Planning and Zoning
Comment: Site Plan review allows for control of where and how development occurs.					
Environmental Protection Ordinance	Yes	Yes	Town Code Chapter 91, Environmental Quality Review	Local	Planning and Zoning
Comment: Environmental Protection Ordinance steers development away from some hazard exposure.					
Flood Damage Prevention Ordinance	Yes	Yes	Town Code Chapter 107, Flood Damage Prevention Ordinance	Local	Engineering
Comment: BFE+2 feet for all construction in the SFHA (residential and non-residential). It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities; B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction; C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;					

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated ? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
D. Control filling, grading, dredging and other development which may increase erosion or flood damages; E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands, and; F. Qualify and maintain for participation in the National Flood Insurance Program.					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Town Code Chapter 188 and 188A	Local	Engineering
Comment: the purpose of this article is to provide for the health, safety, and general welfare of the citizens of the Town of Clarence through the regulation of stormwater discharges to the municipal separate storm sewer system (MS4) to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4 to comply with requirements of the SPDES General Permit for Municipal Separate Storm Sewer Systems. The objectives of this article are: (1) To meet the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit No. GP-02-02, as amended or revised; (2) To regulate the contribution of pollutants to the MS4 since such systems are not designed to accept, process or discharge nonstormwater wastes; (3) To prohibit illicit connections, activities and discharges to the MS4; (4) To establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this article; and (5) To promote public awareness of the hazards involved in the improper discharge of trash, yard waste, lawn chemicals, pet waste, wastewater, grease, oil, petroleum products, cleaning products, paint products, hazardous waste, sediment and other pollutants into the MS4.					
Emergency Management Ordinance	No	Yes	-	-	-
Comment: None					
Climate Change Ordinance	No	Yes	-	-	-
Comment: None					
Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Disaster Reconstruction Ordinance	No	No	-	-	-
Comment: None					
Other	No	No	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	No	Clarence 2030, Town of Clarence Comprehensive Plan, Adopted 2016	Local	Town Board
Comment: The purpose of this Comprehensive Plan is to provide an overall framework for future public and private investment in our community. This investment can take many forms, including but not limited to, our community's financial, civic, and creative resources. In the Town of Clarence, it is this collective investment by our residents, businesses, civic institutions, and our local government • that will shape the physical, social, and economic character of our community.					
Capital Improvement Plan	Yes	No	Town Board	Local	Planning and Zoning
Comment: Hazard mitigation projects can be included in the municipality's CIP.					

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated ? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Disaster Debris Management Plan	No	No	-	-	-
Comment: None					
Floodplain or Watershed Plan	No	No	-	-	-
Comment: None					
Stormwater Plan	Yes	No	North Clarence Flood Reduction Plan	Local	Highway/Engineering
Comment: The Stormwater Plan has the purposed to establish proactive management of stormwater flows to reduce flooding risk.					
Open Space Plan	Yes	Yes	Open space plans included in the Town's Master Plan, 2015	Local	Planning and Zoning Boards and Greenprint Committee, Recreation Advisory Committee
Comment: The Open Space Plan provides a road map for officials and the community to preserve open space.					
Urban Water Management Plan	No	No	-	-	-
Comment: None					
Habitat Conservation Plan	No	No	-	-	-
Comment: None					
Economic Development Plan	Yes	No	Action Plan and Market Analysis, Adopted April 2018	Local	Planning and Zoning
Comment: The Market Analysis provides direction on economic growth including recovery from natural hazard impact.					
Shoreline Management Plan	No	Yes	-	-	-
Comment: None					
Community Wildfire Protection Plan	No	No	-	-	-
Comment: None					
Forest Management Plan	Yes	No	Tree Management Plan, Adopted 11-19	Local	Planning and Zoning
Comment: Management of the county's private and public forests will help reduce exposure to the wildfire risk.					
Transportation Plan	Yes	No	Transit Road Corridor Management Study, 6-04 and Clarence Traffic Analysis, 2015	Local	Planning and Zoning
Comment: Transportation Study addresses transportation needs during a natural hazard event.					
Climate Change /Resilience/ Sustainability Plan	No	Yes	-	-	-
Comment: None					
Agriculture Plan	Yes	No	Agricultural and Farmland Protection Plan, Adopted 5-12	Local/county	Planning and Zoning

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated ? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The county plan addresses the management of agricultural wastes and other hazmat storage.					
Other (this could include a tourism plan, business development plan, etc.)	No	-	-	-	-
Comment: None					
Response/Recovery Planning					
Comprehensive Emergency Management Plan	Yes	Yes	Town of Clarence Comprehensive Plan, 2018	Local	Town OEM
Comment: The Comprehensive plan for the entire community considers the need to address natural hazard exposure and guides future development decisions in the municipality.					
Strategic Recovery Planning Report	No	No	-	-	-
Comment: None					
Threat & Hazard Identification & Risk Assessment (THIRA)	No	Yes	-	-	-
Comment: None					
Post-Disaster Recovery Plan	No	No	-	-	-
Comment: None

Comment: None					
Public Health Plan	Yes	Yes	Erie County	County	Erie County Health
Comment: The Public Health Plan will assist in addressing needs during a hazard event.					
Other	No	-	-	-	-
Comment: None					

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Clarence to oversee and track development.

Table 9.14-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Planning and Zoning / Engineering
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain Development Permits
Do you have a buildable land inventory? If yes, please describe	Yes	Environmental Constraints Map

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
If no, please quantitatively describe the level of buildout in the jurisdiction.		

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Clarence and their current responsibilities which contribute to hazard mitigation.

Table 9.14-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board. Volunteer Appointed body, seven members. Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals. Volunteer Appointed body, five members. Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk. Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	Yes	Staffed Planning and Zoning Department. The Planning and Zoning Department serves the community by providing current and long-range planning activities as well as administration of all local land use laws. Current planning activities include project reviews to enforce zoning and subdivision regulations on project proposals including environmental reviews under SEQRA. Long-range planning activities include comprehensive plan updates including policy and local law implementation. Engineering Department: The purpose of the profession of engineering is defined as performing professional service such as consultation, investigation, evaluation, planning, design, and supervision of construction or operation in connection with any utilities, structures, buildings, machines, equipment, processes, works, or projects wherein the safeguarding of life, health and property is concerned, when such service or work requires the application of engineering principles and data. The Engineering Department is responsible for technical planning, design, and construction of capital improvements for the Town of Clarence including street improvements, right of way acquisition, storm water improvements, sanitary sewer improvements, Town building maintenance and improvements and management of development permit contracts and easement releases.
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Town Environmental Quality Review Board, Planning Board Members
Open Space Board/Committee	Yes	Greenprint Committee, Volunteer Appointed body, 7 members
Economic Development Commission/Committee	Yes	Town of Clarence, Erie County, Industrial Development Agency
Public Works/Highway Department	Yes	Fully staffed Highway and Parks Departments. The Department plows and de-ices 55 center lane miles of roadway. Department picks up brush on 460 lane miles of roads in Clarendon. In 2015 the town restored 5.44 miles of field ditches.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Construction/Building/Code Enforcement Department	Yes	Fully staffed Building Department. The Building Department administers and enforces regulations, pertaining to use of property and the construction of buildings. It reviews plans and conducts filed inspections for compliance with various local, state, and federal codes and standards, particularly the Town Zoning Code and the New York State Uniform Fire Prevention and Building Code (NYSUFPBC). These codes apply to planning, zoning, building, plumbing, mechanical, electrical, fire, health, and the environment. Responsibilities of the Department and Code Enforcement Officers are as follows: • Plan review for compliance with NYSFPBC, Town of Clarence Code and applicable reference standards. • Issue permits for residential and commercial projects for new construction, additions, remodeling, accessory structures, change in use of buildings, installations, or replacement of certain mechanical, fire safety and plumbing systems, back-up generators, demolition of structures, swimming pools, etc. • Conduct inspections for numerous phases of construction activity. • Issue Certificate of Occupancy or Certificate of Compliance for all permitted projects. • Administrators of the Knox-Box Program in the Town of Clarence. • Conduct inspections based on complaints from citizens. • Respond to requests from the Town Fire Departments pertaining to unsafe equipment or conditions, damage due to structure fires and illegal open burning. • Respond to structure fires for assistance to Fire Department command staff related to building design, contents, potential failure, damage estimates, origin, and cause, determining if building can be occupied, and to aid the residents and occupants displaced by the incident. • Conduct fire safety inspections of existing buildings for compliance with the NYS Fire Code and Property Maintenance Code • Explain code requirements to permit applicants. • Attend NYS Required annual training. • Enforce the Avoidable Alarm Law (Chapter 59) of the Town of Clarence Code. • Conduct inspection of special events involving large gatherings/the public.
Emergency Management/Public Safety Department	Yes	Emergency Services Department David Bissonette, Emergency Manager. Department staff coordinate emergency response
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	NY Alert
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Snag and drag operations in town waterways to remove obstructions. Highway Department cleans out field ditches.
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Planners or engineers with knowledge of land development and land management practices	Yes	Planning Department and Engineering Department. Planning Board members closely review development proposals and consider the potential impact of hazard impacts
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Engineer staff understand the impact of hazard impacts upon highways and other infrastructure.
Planners or engineers with an understanding of natural hazards	Yes	Town Engineer staff understand the impact of hazard impacts upon highways and other infrastructure.
Staff with expertise or training in benefit/cost analysis	Yes	Town Engineer staff understand the impact of hazard impacts upon highways and other infrastructure.
Professionals trained in conducting damage assessments	Yes	Building Code Enforcement Officers
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Planning Department, GIS skilled
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Certified Floodplain Administrator – Town Engineer
Surveyor(s)	No	-
Emergency Manager	Yes	David Bissonette, Emergency Manager
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Clarence.

Table 9.14-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes – Planning and Zoning
Capital improvements project funding	Yes – Administration and Finance
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Sewer Permit Fees
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	Yes
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Clarence.

Table 9.14-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	Information on preparedness, Covid-19, and Emerald Ash Borer is located on the town's website.
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Clarence.

Table 9.14-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Fire wise Communities classification	No	-	-
Other	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.14-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.14.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Timothy Lavocat, Town Engineer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Clarence.

Table 9.14-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Clarence	108	41	$77,190	2	33

Source:
Notes: *FEMA 2020a and FEMA 2020b*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

Areas in the Town of Clarence that are prone to flooding include certain sections of North Clarence within the floodway and by riverine flooding associated with Ransom and Gott Creeks. The town maintains an active list of all Letters of Map Change (LOMA/LOMR-F) as a mitigation measure. There are not any Risk MAP projects currently underway in the town. The town did not identify how many (if any) properties have been mitigated. The town's flood hazard maps adequately address the flood risk within the jurisdiction.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

NFIP Compliance

The Town of Clarence does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Visit (CAV) was in September 2015. The Building Department and the Engineering Department are responsible for floodplain administration. The Town Engineer is a certified Floodplain Manager. The town does not have access to resources to determine possible future flooding conditions from climate change. The town did not identify if the floodplain management staff needs any assistance or training to support its floodplain management program. The town does not make Substantial Damage determinations. The town's floodplain management program meets minimum requirements and offers NFIP administration services such as Floodplain Development Permit review and Letters of Map Change guidance, and by educating the public on floodplain management practices and ordinances. The town seeks to avoid encroachments or impacts upon the floodplain and is considering joining the Community Rating System (CRS) as noted in proposed mitigation action 2022-T Clarence-003.

9.14.5 Evacuation, Sheltering, Temporary and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Clarence did not identify any evacuation routes and procedures and will coordinate with county and town agencies during hazard events.

Sheltering

The Town of Clarence has identified the following designated emergency shelters located within the town.

Table 9.14-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	Thompson Road	150	No	Yes	Yes	Contact EMT	Food prep capable
Senior High School	Main Street	300-500	No	Yes	Yes	Contact EMT	Food prep capable

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Clarence has identified the following sites suitable for placing temporary housing units.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.14-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Kelly Schultz, owner	Main Street	175 units	Trailer	Portable generator	On-site direction required
Eastern Hills Mall	Main/Transit Area	250 units	Trailer	Portable generator	On-site direction required

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Clarence did not identify any areas suitable for relocating homes outside of the floodplain.

Table 9.14-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Town has not identified any such locations at this time. Per Proposed Action 2022-Clarence T-012					

9.14.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.14-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.14-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	96	4	112	3	110	2	104	7	112	3	98	6
Multi-Family	2	0	0	0	1	0	6	0	1	0	1	0
Other (commercial, mixed-use, etc.)	4	0	15	0	7	0	4	0	3	0	3	0
Total Permits Issued	**102**	**4**	**127**	**3**	**118**	**2**	**114**	**7**	**116**	**3**	**104**	**6**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Type of Development	2015	2016	2017	2018	2019	2020
Legacy Woods	Residential	50	Newhouse Road	Landslide		Approved, Under Construction
Northwoods	Residential	151	Roll Road	Wind Damage		Approved, Under Construction
Harris Hill Commons	Residential	66	Greiner Road	Expansive Soils		Approved, Under Construction
Spaulding Green	Residential	380	Goodrich Road	Wind Damage		Approved, Under Construction
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years						
Harris Hill Commons Mixed Use	Mixed Use	80 residential units, 24,800 square feet commercial	Sheridan Drive	Expansive Soils		Under Review
Eastern Hills Mall	Lifestyle Center	3,000,000 square feet	Transit Road	Hazardous Materials		Under Review
Woodland Hills	Residential	77	Greiner Road	Expansive Soils		Under Review

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.14.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Clarence's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are found below and based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Clarence has significant exposure. The maps also show the location of potential new development, where available.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Clarence's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.14-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.14-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Highway Department overtime
August 11-15, 2015	Flash Flood	No	The town did not report any damage associated with this hazard event.
October 28-29, 2015	High Wind	No	The town did not report any damage associated with this hazard event.
November 6, 2015	Thunderstorm Wind	No	The town did not report any damage associated with this hazard event.
November 12, 2015	High Wind	No	The town did not report any damage associated with this hazard event.
November 18, 2015	High Wind	No	The town did not report any damage associated with this hazard event.
January 11, 2017	High Wind	No	The town did not report any damage associated with this hazard event.
March 8, 2017	High Wind	No	The town did not report any damage associated with this hazard event.
March 13, 2017	Winter Storm	No	The town did not report any damage associated with this hazard event.
July 20, 2017	Tornado	No	The town did not report any damage associated with this hazard event.
August 4, 2017	Thunderstorm Wind	No	The town did not report any damage associated with this hazard event.
December 10-15, 2017	Lake-effect Snow	No	Highway Department overtime
December 24-29, 2017	Lake-effect Snow	No	Highway Department overtime
January 2, 2018	Blizzard	No	The town did not report any damage associated with this hazard event.
October 6, 2018	Lightning	No	The town did not report any damage associated with this hazard event.
February 24, 2019	High Wind	No	The town did not report any damage associated with this hazard event.
February 24, 2019	Lakeshore Flooding	No	The town did not report any damage associated with this hazard event.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	The town did not report any damage associated with this hazard event.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Emergency services/Highway Department overtime
November 27, 2019	Lakeshore Flooding	No	The town did not report any damage associated with this hazard event.
January 12, 2020	Lakeshore Flooding	No	The town did not report any damage associated with this hazard event.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 18, 2020	Lakeshore Flooding	No	The town did not report any damage associated with this hazard event.
March 2020-Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Clarence's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Clarence. The Town of Clarence has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated that the earthquake hazard risk should be decreased from High to Medium and that the wildfire hazard should be decreased from High to Low. The Town believed that both hazards occur infrequently.

Table 9.14-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
N/A	Medium	Medium	Medium	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	High	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.14-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Clarence Center	Fire Station	X	X	2022-T Clarence-004
Clarence Northwest USID79866	Fire Station	X	X	2022-T Clarence-004
Stahley Road Pump station	Wastewater Pump Station	X	X	2022-T Clarence-011
Unnamed	Wastewater Pump Station	X	X	2022-T Clarence-011

Source: FEMA 2021

Identified Issues

After review of the Town of Clarence's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Clarence has identified the following vulnerabilities within their community:

- There are locations along Gott Creek that experience localized flooding
- Creek beds within the town are jammed with debris, trees and branches that impede the flow of stormwater and contribute to flooding.
- The town does not participate in the Community Rating System, denying affected community members the benefit of reduced flood insurance rates.
- The Clarence Center Fire Department is located within the SFHA
- Several critical facilities, including the Clarence Center Fire Department, are located within the SFHA and are at risk of flooding.
- The Post Office is located within the SFHA and at risk of flooding.
- Two runways at the Buffalo Airport are located within the SFHA, exposing them to potential flooding.
- Four Fire stations in the town store hazardous materials – these materials should be protected from leakage.
- Two public stations and St. Mary's School are in the 0.2 percent chance flood zone
- Floodplain managers need training.
- The town may contain Repetitive Loss Properties.
- The town is unable to identify emergency shelters or to define the capacity of identified temporary housing locations.

9.14.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.14-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Sand Bagging Operation to protect old homes from Tonawanda, Beeman, Gott, Ransom, and Black Creeks as well as surrounding streams and subdivision retention ponds	Flood and Storm Events	Flooding of old houses in town in the areas east, west, and north of Wolcott Rd	Highway Dept	No Progress	Cost		1. Discontinue in 2022 HMP 2. 3. Completed task
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Prevention of dangerous travel in flood events through intergovernmental efforts for key presence at main intersections, town vehicles, large signage, barricades, and for larger events – driving ban regulations	Flood and Storm Events	Flooded roads become impassible and have a wake effect on nearby homes	Highway Dept, Emergency Services, Town Security	In Progress	Cost		1. Discontinued 2. 3. Ongoing
						Level of Protection		
						Damages Avoided; Evidence of Success		
	Debris removal and maintenance	Flood and Storm Events	Jams that create possible flood conditions	Highway Supt. Jurisdiction	In Progress	Cost		1. Include in 2022 HMP 2. Addressed by Proposed Action # 2022-Town of Clarence-002 3.
						Level of Protection		
						Damages Avoided; Evidence of Success

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Clarence did not identify any mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Clarence participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.14-18. Analysis of Mitigation Actions by Hazard and Category

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.14-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Clarence would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.14-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes 💧 *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Fire wise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.14.9 Action Worksheets

The following action worksheets have been developed by the Town of Clarence to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 53-Section-9.14-Clarence-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Clarence Action Worksheet			
Project Name:	Implement flood mitigation measures along Gott Creek		
Project Number:	2022-T Clarence-001		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm		
Description of the Problem:	There are locations along Gott Creek that experience localized flooding.		
Action or Project Intended for Implementation			
Description of the Solution:	In November 2020, an analysis/report was completed that recommended specific mitigation measures along the Gott Creek. Resilient New York Flood Mitigation Initiative: Gott Creek. The town should pursue completion of specified mitigation measures such as floodwalls, levees, or other appropriate measures.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect properties from flooding.	**Estimated Benefits (losses avoided):**	Reduce risk of flooding along Gott Creek
Useful Life:	20 years	**Goals Met:**	1, 2
Estimated Cost:	TBD by feasibility engineering assessment	**Mitigation Action Type:**	Structure and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	3 years
Estimated Time Required for Project Implementation:	Within 5 years	**Potential Funding Sources:**	FEMA HMGP and BRIC, USDA Community Facilities Grant Program, Emergency Management Performance Grants (EMPG) Program
Responsible Organization:	Town Highway Department, Town Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Remove roadways along creek	High	Not feasible
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.15 Town of Colden

This section presents the jurisdictional annex for the Town of Colden. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the municipality's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.15.1 Hazard Mitigation Planning Team

The following individuals have been identified as the municipality's hazard mitigation plan primary and alternate points of contact. The Town of Colden followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Supervisor, Code Enforcement, and Emergency Management. The Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.15-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: James P. DePasquale, Supervisor Address: 8812 NY-240, Colden, NY 14033 Phone Number: 716-474-0579 Email: james.depasquale@townofcolden.com	Name/Title: Patricia A. Zubrick, Deputy Town Supervisor Address: 8812 NY-240, Colden, NY 14033 Phone Number: 716-864-3897 Email: patricia.zubrick@townofcolden.com
NFIP Floodplain Administrator	
Name/Title: John Kotlarsz, Code Enforcement Officer Address: 8812 NY-240, Colden, NY 14033 Phone Number: 716-923-3454 Email:bsudyn@gmail.com	

9.15.2 Municipal Profile

Colden is in the southeastern part of Erie County. The town is 35 square miles in area and is bounded on the north by the Town of Aurora, on the west by the Town of Boston, on the south by the towns of Concord and Sardinia and to the west by the Town of Holland.

The first settler in Colden was Richard Buffum. Buffum purchased 2,000 acres of land from the Holland Purchase Company. The town was incorporated in 1828 and the first post office established in 1830 (Town of Colden 2021).

According to the U.S. Census, the 2010 population for the Town of Colden was 3,265. The estimated 2019 population was 3,328, a 1.9 percent increase from the 2010 Census. Data from the 2019 U.S. Census American

Community Survey indicate that 3.2 percent of the population is 5 years of age or younger and 19.0 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.15.3 Jurisdictional Capability Assessment and Integration

The Town of Colden performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.15.3). The municipality's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Colden. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.15-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 26 (Building Construction)	Local	Town CEO
Comment: *Building code used to determine whether building construction is suitable for jurisdiction and to create a standard to mitigate any avoidable damage or accidents.*					
Zoning Code	Yes	No	Chapter 108 (Zoning)	Local	Building/ Code Enforcement
Comment: *The purpose of the zoning code is to increase community resilience through the following measures. 1) Signs shall withstand a wind pressure load of at least 30 pounds per square foot. 2) Existing natural features, such as trees, brooks, drainage channels and views, shall be retained. Whenever such features interfere with the proposed use of such property, a retention of the maximum amount of such features consistent with the use of the property shall be required.*					
Subdivision Ordinance	Yes	No	Chapter 92 (Subdivision of Land)	Local	Building/ Code Enforcement
Comment: *The subdivision ordinance incorporates resilience related measures through the following means: 1) A preliminary plat shall include: all pertinent features, such as existing structures, streets, railroads, water bodies, streams, swamps and large trees, that may influence the design of the subdivision, and topography at contour interval of not more than five feet; proposed provision of water supply, fire protection, disposal of sanitary waste, stormwater drainage, street trees, streetlighting fixtures, street signs and sidewalks. 2) The Planning Board may require, where steep slopes exist, that present elevations of all proposed streets shall be shown every 100 feet at five points on a line at right angles to the center line of the street, and said elevation points shall be at the center line of the street, each property line and*

Site Plan Review	Yes	Yes	Chapter 108 (Zoning)	Local	Town Planning
Comment: *Unless otherwise provided and as regulated by Chapter 92, Subdivision of Land, of the Town of Colden, a site plan review and a site plan approval shall be required for all uses, buildings and structures that require a building permit or certificate of compliance under this chapter and for which an application therefor has been made to the Town of Colden, except for a one-family dwelling or a two-family dwelling and its permitted accessory uses, buildings or structures, prior to the issuance of a building permit or certificate of compliance.*					
Environmental Protection Ordinance	Yes	Yes	Chapter 43 Environmental Quality Review, Local Law 1, Adopted 1980.	Local	Town Board
Comment: *No decision to carry out or approve an action other than an action listed in § 43-4 hereof or Section 617.12 of Title 6 of NYCRR as Type II action, or an exempt or administrative action (6 NYCRR 617.13) shall be made by the Town Board or by any department, board, commission, officer or employee of the town until there has been full compliance with all requirements of this chapter and Part 617 of Title 6 of NYCRR; provided, however, that nothing herein shall be construed as prohibiting:* *A. The conducting of contemporaneous environmental, engineering, economic feasibility or other studies and preliminary planning and budgetary processes necessary to the formulation of a proposal for action which do not commit the town to approve, commence or engage in such action; or* *B. The granting of any part of an application which relates only to technical specifications and requirements, provided that no such partial approval shall entitle or permit the applicant to commence the action until all requirements of this chapter and Part 617 of Title 6 of NYCRR have been fulfilled.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 52 (Flood Damage Control)	Local	Town CEO
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* *F. Qualify for and maintain participation in the National Flood Insurance Program.* *The Code Enforcement Officer is appointed local administrator to administer and implement the chapter by granting or denying floodplain development permits.* *Any new construction or substantial improvements of residential or non-residential properties located in the special flood hazard area must be elevated to at least two feet above the base flood elevation.*

Comprehensive Plan	Yes	No	2002 Town of Colden Comprehensive Plan– will be updating 2021 Planning Board	Local	Town Planning
Comment: *The plan provides background on the conditions in the town, by means of a Land Use Study conducted in 1990, which resulted in the creation of a land use map. Additional "special studies" were conducted and presented to the public through a series of public meetings. The primary focus of the master plan is guiding growth and development, particularly the residential population of Colden which like much of Erie County has experienced a trend of decline. The plan envisioned that the town would "remain in a basic rural status" (p. 6) and that no substantial growth was predicted. The plan describes Colden as rural and lacking any significant public infrastructure. This lack of public infrastructure makes large scale development impossible and reinforces the need for large lot residential in much of the town. Commercial and industrial development is recommended to take place in the Town's denser hamlet area and along Route 240, a road that serves as the town's major arterial.* *The plan also addresses preservation and protection of natural resources as per the goal to preserve the community characteristics and provide safe and environmental healthy areas to create a better community for all residents.*

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Colden to oversee and track development.

Table 9.15-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Building Department/Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The town has limited growth capabilities.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Colden and their current responsibilities which contribute to hazard mitigation.

Table 9.15-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board – The Planning Board may approve, conditionally approve or disapprove subdivision plans for the purpose of providing for the orderly and wise development of the town and affording adequate facilities for housing, transportation, distribution, comfort, convenience, safety and the health and welfare of its population.
Zoning Board of Adjustments	Yes	Zoning Board - The primary role of the zoning board is to review and decide cases where a relaxation of the ordinance

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		is sought or where there is an alleged error in a zoning decision.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Environmental Advisory Board that is meant to provide oversight on environmental and open space related topics within the town.
Open Space Board/Committee	Yes	Environmental Advisory Board that is meant to provide oversight on environmental and open space related topics within the town.
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department - The department mission is to provide a safe, well maintained and efficient operation of the town highway and bridge system.
Construction/Building/Code Enforcement Department	Yes	Building and Code Enforcement - The Colden Building Department administers and enforces regulations, pertaining to use of property and the construction of buildings. The Department reviews plans and conducts filed inspections for compliance with various local and state, standards, particularly the Town Zoning Code and the New York State Uniform Fire Prevention and Building Code (NYSUFPBC). These codes apply to planning, zoning, building, plumbing, mechanical, electrical, fire, health and the environment. The Building Department receives and processes all applications for construction, alterations, additions, and accessory structures for residential and commercial projects, for compliance with the Town's Code and Building Department requirements, in addition to the requirements of the New York State Fire Prevention and Building Code. Projects under review by the department are not permitted to begin prior to the issuance of the permit. Responsibilities of the Department and Code Enforcement Officers are as follows: • Plan review for compliance with NYSFPBC, Town of Colden Code and applicable reference standards. • Issue permits for residential and commercial projects for new construction, additions, remodeling, accessory structures, change in use of buildings, installations or replacement of certain mechanical, fire safety and plumbing systems, back-up generators, demolition of structures, swimming pools, etc. • Conduct inspections for numerous phases of construction activity. • Issue Certificate of Occupancy or Certificate of Compliance for all permitted projects. • Conduct inspections based on complaints from citizens. • Respond to requests from the Town Fire Department pertaining to unsafe equipment or conditions, damage due to structure fires and illegal open burning.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		• Respond to structure fires for assistance to Fire Department command staff related to building design, contents, potential failure, damage estimates, origin and cause, determining if building can be occupied after the incident. • Conduct fire safety inspections of existing buildings for compliance with the NYS Fire Code. • Explain code requirements to permit applicants. • Attend NYS Required annual training.
Emergency Management/Public Safety Department	Yes	Emergency Management – comprised of police, fire, and disaster relief department that deal with municipal and intermunicipal emergency response.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRED – The purpose is to send critical communications to residents and businesses in Colden. The system provides the ability to quickly deliver messages to targeted areas or the entire town. The system will be activated for emergency public safety messages and important public notifications. Alerts may include, but are not limited to: • Extreme weather • Missing and endangered persons • Evacuations and lockdowns • Water emergencies • Chemical spills or release • Security alerts
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Stream management and highway department road maintenance
Mutual aid agreements	Yes	Highway Department and Fire District
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	GHD Engineering – contracted.
Engineers or professionals trained in building or infrastructure construction practices	Yes	GHD Engineering – contracted.
Planners or engineers with an understanding of natural hazards	Yes	GHD Engineering – contracted.
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Emergency Manager trained in GIS and provides various services to town agencies and residents.
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	Yes	Independent Contractors
Emergency Manager	Yes	Disaster Coordinator
Grant writer(s)	No	-
Resilience Officer	No	-
Other	Yes	GHD Engineering for stormwater engineering

Fiscal Capability

The table below summarizes financial resources available to the Town of Colden.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.15-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	No
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	No
Incur debt through general obligation bonds	No
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Colden.

Table 9.15-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Communications Officer
Personnel skilled or trained in website development	Yes	Contracted
Hazard mitigation information available on your website	Yes	The town's website contains hazard-related information. During an event, they will post information under the 'news' section of the site. With the current COVID-19 pandemic, the town provides resources and information on the disease.
Social media for hazard mitigation education and outreach	Yes	The town operates a Facebook page where they provide information on upcoming meetings, events, emergency alerts, and other information.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	CodeRED, municipal website, and social media accounts
Warning systems for hazard events	Yes	CodeRED
Natural disaster/safety programs in place for schools	Yes	Evacuation site for school at Colden Senior Center
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Colden.

Table 9.15-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.15-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	NA
Cyber Attack	Moderate
Earthquake	Weak - NA
Expansive Soils	Weak
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.15.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

John Kotlarsz, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Colden.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.15-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Colden	5	8	$6,758	7	0

Source: FEMA 2020a, FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The town describes flood-prone areas to be along creeks and farmland within the town. The town does not maintain a list of property owners interested in flood mitigation. There are currently no RiskMAP projects within the jurisdiction. As the code enforcement officer makes substantial damage determinations, there are no specific guidelines established and are determined on a case-by-case basis. There are no properties that have been mitigated within the town and the current flood maps adequately address the existing sites that have flooding.

NFIP Compliance

As per the town code, the Code Enforcement Officer is appointed as floodplain administrator for the Town of Colden. The code enforcement officer provides permit and site plan review, and inspection of whether proposed sites are located in a floodplain. At this time, there are no certified floodplain managers on staff. Due to the town's size, part-time staff, and volunteers, training is not required nor relevant to increase the town's capabilities.

Given the town's size, the town does not have adequate resources to determine future flooding conditions from climate change

The town does not have specific guidelines to determine substantial damage determinations. At this time the town does not have any outstanding violation issues. The municipality is also not aware of any barriers to increasing the effectiveness of the NFIP program. The town's most recent CAV date on record is January 21, 2020.

The town has documented that the local chapter for the flood damage prevention ordinance is titled "Flood Damage Control" Local Law 1 of 2019. The town along with its plans, programs, and other documents, meets the minimum requirements of the NFIP. The town is not interested in joining the FEMA Community Rating System (CRS) program.

9.15.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Colden has identified the following routes and procedures to evacuate residents prior to and during an event.

- State Route 240 (N/S)
- Center Street (County Route) (N/S)
- Boston/ Colden Road (County Route – E/W)
- Holland Glenwood Road (County Route E/W)

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Sheltering

The Town of Colden has identified the following designated emergency shelters within the town.

Table 9.15-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Colden Elementary School	8263 Boston-Colden Road, Colden, NY	500	Yes	Yes	Yes	Provided by fire company	No
Colden Senior Center	8811 NY-240, Colden, NY	100	Yes	Yes	No – mitigation action - 009	Various	No

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Colden has identified the following sites suitable for placing temporary housing units.

Table 9.15-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Kummer Park	Park Street- off Route 240	40 acres of usable land	Park	Power/ Water/ Septic	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Colden has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.15-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Kummer Park	Park Street- off Route 240	40 acres of usable land	Park	Power/ Water/ Septic	None

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.15.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.15-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.15-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	6	0	7	0	4	0	6	0	6	0	3	0
Multi-Family	1	0	0	0	0	0	0	0	0	0	1	0

None Identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)
** Only location-specific hazard zones or vulnerabilities identified.*

9.15.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the municipality's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Colden has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The municipality's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.15-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Ice Jam in Cazenovia Creek caused stream bank erosion and subsequent flooding
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	Although the County was impacted, the town did not report damages
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous	Although the County was impacted, the town did not report damages

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	Although the County was impacted, the town did not report damages
March 13, 2017	Winter Storm	No	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Although the County was impacted, the town did not report damages
July 20, 2017	Tornado	No	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the town did not report damages
August 4, 2017	Thunderstorm Wind	No	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the town did not report damages
December 10-15, 2017	Lake-effect Snow	No	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	Although the County was impacted, the town did not report damages
December 24-29, 2017	Lake-effect Snow	No	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	Although the County was impacted, the town did not report damages
January 2, 2018	Blizzard	No	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	Although the County was impacted, the town did not report damages
October 6, 2018	Lightning	No	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the town did not report damages
February 24, 2019	High Wind	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The	Although the County was impacted, the town did not

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			track of the strong surface low was a classic high wind track for our region.	report damages
February 24, 2019	Lakeshore Flooding	No	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the town did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher than normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	Although the County was impacted, the town did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	Although the County was impacted, the town did not report damages
November 27, 2019	Lakeshore Flooding	No	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3-5 hour period in the cold advection behind the cold front.	Although the County was impacted, the town did not report damages
January 12, 2020	Lakeshore Flooding	No	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the town did not report damages
January 18, 2020	Lakeshore Flooding	No	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the town did not report damages
2020-21	COVID 19	No	Pandemic – EM 3504	Various business closures, social distancing, and recorded deaths across Erie County.

provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.15-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	No	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Ice Jam in Cazenovia Creek caused stream bank erosion and subsequent flooding
August 11-15, 2015	Flash Flood	No	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the town did not report damages
October 28-29, 2015	High Wind	No	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the town did not report damages
November 6, 2015	Thunderstorm Wind	No	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	Although the County was impacted, the town did not report damages
November 12, 2015	High Wind	No	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the town did not report damages
November 18, 2015	High Wind	No	Behind a departing area of high pressure, a deep low pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the town did not report damages
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	Although the County was impacted, the town did not report damages
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region	Although the County was

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the municipality's risk assessment results and data used to determine the hazard ranking.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Colden. The Town of Colden has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town has historically not been prone to earthquakes and thus rank the hazard from a medium to low.
- Wildfires have historically not been an issue for the town, thus decreasing the rank from high to medium, due to limited response capabilities but low overall threat.

Table 9.15-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Medium	Medium	High	High	High	Medium

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Identified Issues

After review of the municipality's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Colden has identified the following vulnerabilities within their community:

- The town does not have a continuity of operations plan. In previous events, the town has struggled during hazard events because of no existing plan.
- The town currently has limited information on hazard identification and mitigation on its social media/ website. This is a recommendation by FEMA and other state and federal agencies and the town would like to comply with this recommendation.
- The Highway Garage, Town Hall, Senior Center, and Park Building lack sufficient backup power for continuity of operations. All these facilities are identified critical facilities as well as evacuation shelters that are crucial during hazard events.
- West Branch of Cazenovia Creek has issues around streambank erosion, especially with ice jams during the winter months due to debris collecting and restricting the flow of water.
- Boston-Colden Road Buffalo Pittsburg Railroad Bridge entering the hamlet of Colden has major infrastructural issues regarding sightline and school evacuation route access. The bridge sidewalk is degraded and does not have the appropriate safety level for school children crossing the bridge.
- Currently, the town does not have any staff members that are Certified Floodplain Managers.
- The Millers Saw Mill Dam is located in a floodplain.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.
- The Colden Senior Center located at 8811 NY-240 is within the 100-year floodplain.

9.15.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.15-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Colden has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Fall of 2020, conducted flood retrofitting for private residential housing within the town.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Colden participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.15-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.15-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Colden would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.15-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-Colden Town-001	Continuity of Operations Plan	1, 2	All	**Problem**: The town does not have a continuity of operations plan. In previous events, the town has struggled during hazard events because of no existing plan. **Solution**: The town will develop a continuity of operations plan for four municipal buildings (senior center, town hall, and highway garage, and park buildings). The plan will be implemented by the town and be developed and approved by the town board.	No	No	1 year	Town Board	$20,000	Increase preparedness	HMGP, Municipal Budget, Assistance to Firefighters Grant Program	High	LPR	ES
2022-Colden Town-002	Increase Hazard Awareness	1, 2, 4	All	**Problem**: The town currently has limited information on hazard identification and mitigation on its social media/ website. This is a recommendation by FEMA and other state and federal agencies and the town would like to comply with this recommendation. **Solution**: The town will include more information on the municipal Facebook page as well as the website on hazard mitigation and preparedness. Information will include flood mitigation measures, emergency preparedness guides, service helplines, warnings, and other services.	No	No	2 years	Town Board and clerk	$10,000	Increase awareness and preparedness	Municipal Budget, HMGP	High	EAP	PI

				mitigation alternatives. After preferred mitigation measures are identified, the county will collect required property-owner information and develop a FEMA grant application and BCA to obtain funding to implement acquisition/ purchase/ moving/ elevating residential homes in the flood -prone areas that experience frequent flooding (high risk areas).										
2022-Colden Town-009	Senior Citizen Center Flood Mitigation	1	Flood	**Problem:** The Colden Senior Center located at 8811 NY-240 is within the 100-year floodplain. **Solution:** The township must work with the facility operator to determine mitigation measures to reduce vulnerability to flooding. This might include retrofitting, elevation, and maybe even relocation if need be. The municipal officials, shall work with the facility operator to apply for FMA funding to increase the facility's resilience to future flooding.	Yes	No	3 years	Town Board along with the Senior Citizen Center Facility Manager	Moderate	High	FMA	High	SIP	SP

Notes:
Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV *Community Assistance Visit*
CRS *Community Rating System*
DPW *Department of Public Works*

Potential FEMA HMA Funding Sources:

FMA *Flood Mitigation Assistance Grant Program*
HMGP *Hazard Mitigation Grant Program*

Timeline:

The time required for completion of the project upon implementation

EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*
BRIC	*Building Resilient Infrastructure and Communities Program*

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:
Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.15.9 Action Worksheets

The following action worksheets have been developed by the Town of Colden to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Generators for Critical Facilities and Shelters		
Project Number:	2021-Colden Town-003		
Risk / Vulnerability			
Hazard(s) of Concern:	All		
Description of the Problem:	The Highway Garage, Town Hall, Senior Center, and Park Building lack sufficient backup power for continuity of operations. All these facilities are identified critical facilities as well as evacuation shelters that are crucial during hazard events.		
Action or Project Intended for Implementation			
Description of the Solution:	Install permanent backup power generators on site for each facility. Each generator would have the capacity to continue operations at all times, as they are all identified critical facilities. The town will contact each facility operator and provide guidance on how to determine the generator capacity needed. Once this information is compiled, the town will apply for FEMA grants for all facilities. The generators shall be installed by each facility manager and maintained by the various entities as needed and as time progresses.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Continuity of operations
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$0.5-2 million	**Mitigation Action Type:**	Structural and Infrastructure Project
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	1 year once funding secured
Estimated Time Required for Project Implementation:	2 years	**Potential Funding Sources:**	HMGP and municipal budget for preliminary assessment as needed
Responsible Organization:	Town Supervisor, Highway Department, and Relevant Stakeholders	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Install solar	High	Unreliable power
	Generator	High	Best alternative in the long run

Progress Report (for plan maintenance)

Attachment: 54-Section-9.15-Colden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.16 Town of Collins

This section presents the jurisdictional annex for the Town of Collins. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Collins's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.16.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Collins's hazard mitigation plan primary and alternate points of contact. The Town of Collins followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: Emergency Management, Code Enforcement and Highway Department. . The Town Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.16-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Kenneth E. Martin, Supervisor Address: 14093 Mill St. PO Box 420, Collins, NY 14034 Phone Number: 716-532-4874 x 103 Email: ken.martin@townofcollins.com	Name/Title: Ron Paluch, Emergency Manager Address: 14093 Mill St. PO Box 420, Collins, NY 14034 Phone Number: 716-425-5127 Email: rrpaluch@gmail.com
NFIP Floodplain Administrator	
Name/Title: Gene Degman, Code Enforcement Officer Address: 14093 Mill St. PO Box 420, Collins, NY 14034 Phone Number: 716-532-4887 x 111 Email: accugene4@att.net	

9.16.2 Municipal Profile

The Town of Collins is the southernmost town in Erie County. The town is 48 square miles in area. The town is bordered by the Town of North Collins to the north, to the east by the Town of Sardinia, to the west by the Cattaraugus Indian Reservation, and to the south by the Towns of Persia, Otto, and East Otto which lie across the dramatic Zoar Valley of the Cattaraugus Creek. The town is approximately 30 miles from downtown Buffalo. Clear Creek is a significant waterway running through the town.

The town was first settled by whites in 1811. Many of the first settlers were Quakers. The town of Collins was created from a portion of the Town of Concord, and was named after the Collins' dairying family. The town surrendered land to the formation of the new towns of Brant in 1839 and North Collins in 1852. Because of the

concentration of dairy farms, there were once ten cheese and milk factories in the town (Town of Collins website, accessed 2020).

According to the U.S. Census, the 2010 population for the Town of Collins was 5,626. The estimated 2019 population was 5,418, a 3.7 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 3.3 percent of the population is 5 years of age or younger and 11.2 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.16.3 Jurisdictional Capability Assessment and Integration

The Town of Collins performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.16.3). The Town of Collins's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Collins. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.16-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Collins to oversee and track development.

Table 9.16-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Collins and their current responsibilities which contribute to hazard mitigation.

Table 9.16-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board – Site Plan Reviews
Zoning Board of Adjustments	Yes	Zoning Board of Appeals – Approval of Variances
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Department – Remove debris from streams and culverts
Construction/Building/Code Enforcement Department	Yes	Code Enforcement – Through approval of building permits in flood prone areas
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	No	-
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	No	-
Mutual aid agreements	Yes	Highway Deptartment – Agreements w/Erie County & neighboring municipalities
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer – 1 Approve permits in flood plain areas
Surveyor(s)	No	-
Emergency Manager	Yes	Emergency Manager – 1 Coordinate Response to disasters
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Collins.

Table 9.16-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes – Town Board
Capital improvements project funding	Yes – Town Board
Authority to levy taxes for specific purposes	Yes – Town Board
User fees for water, sewer, gas or electric service	Yes – Town Board
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes – Town Board
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	Yes – Town Board
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	Yes – Town Board

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Collins.

Table 9.16-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	Yes	Facebook

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	No	-
Natural disaster/safety programs in place for schools	No	-
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Collins.

Table 9.16-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.16-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Strong
Earthquake	Moderate
Expansive Soils	Moderate
Extreme Temperature	Moderate
Flood	Strong
Hazardous Materials	Moderate
Landslide	Moderate

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Moderate
Utility Failure	Moderate
Wildfire	Moderate

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.16.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Gene Degman,Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Collins.

Table 9.16-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Collins	3	6	$74,714	0	2

Source: *FEMA 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

The town has identified areas along Cattaraugus and Clear Creeks and Floodprone. The town does not maintain a list of properties that have been damaged by flooding, nor a list of property owners interested in mitigation. There are no RiskMAP projects currently underway. Flood maps accurately address flood risk within the town.

NFIP Compliance

The Code Enforcement Department is responsible for flood mitigation within the town, however there are no certified floodplain managers currently on staff. Code Enforcement is responsible for permit review and inspections as well as NFIP administration. The Flood Damage Prevention Ordinance is located in Chapter 166 of the Town Code, and was last update don April 15, 2019. The last Community Assistance Visit (CAV) was on January 16, 2018. There are no outstanding compliance issues.

9.16.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Collins has identified the following routes and procedures to evacuate residents prior to and during an event.

- The Town of Collins does not have an Evacuation & Sheltering Plan outside of the Village of Gowanda. There is an old elementary school building with nine classrooms & a gym which could act as a shelter, but it is currently not equipped for sheltering.

Sheltering

The Town of Collins has identified the following designated emergency shelters within the Town.

Table 9.16-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Gowanda High School	10674 Prospect St, Gowanda, NY	As needed	Optional	Yes	Yes	As Needed	Food
Gowanda Elementary School	450 Aldrich St, Gowanda, NY	As needed	Optional	Yes	Yes	As needed	Food
Gowanda Fire Hall	230 Aldrich Street, Gowanda, NY	As needed	Optional	Yes	Yes	As needed	Food

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Collins has identified the following sites suitable for placing temporary housing units.

Table 9.16-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate temporary housing locations. See Mitigation Action 2022-T. Collins-#001.					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Collins has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.16-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. The town will work with the county to identify and designate permanent housing locations. See Mitigation Action 2022-T. Collins-#001.					

9.16.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.16-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.16-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**
Single Family	2	0	0	0	2	0	4	0	3	0	3	0
Multi-Family	0	0	0	0	0	0	0	0	0	0	0	0
Other (commercial, mixed-use, etc.)	59	0	63	0	47	0	68	0	46	0	76	0
Total Permits Issued	**61**	**0**	**63**	**0**	**49**	**0**	**72**	**0**	**49**	**0**	**79**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None Indicated					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
None Anticipated					

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

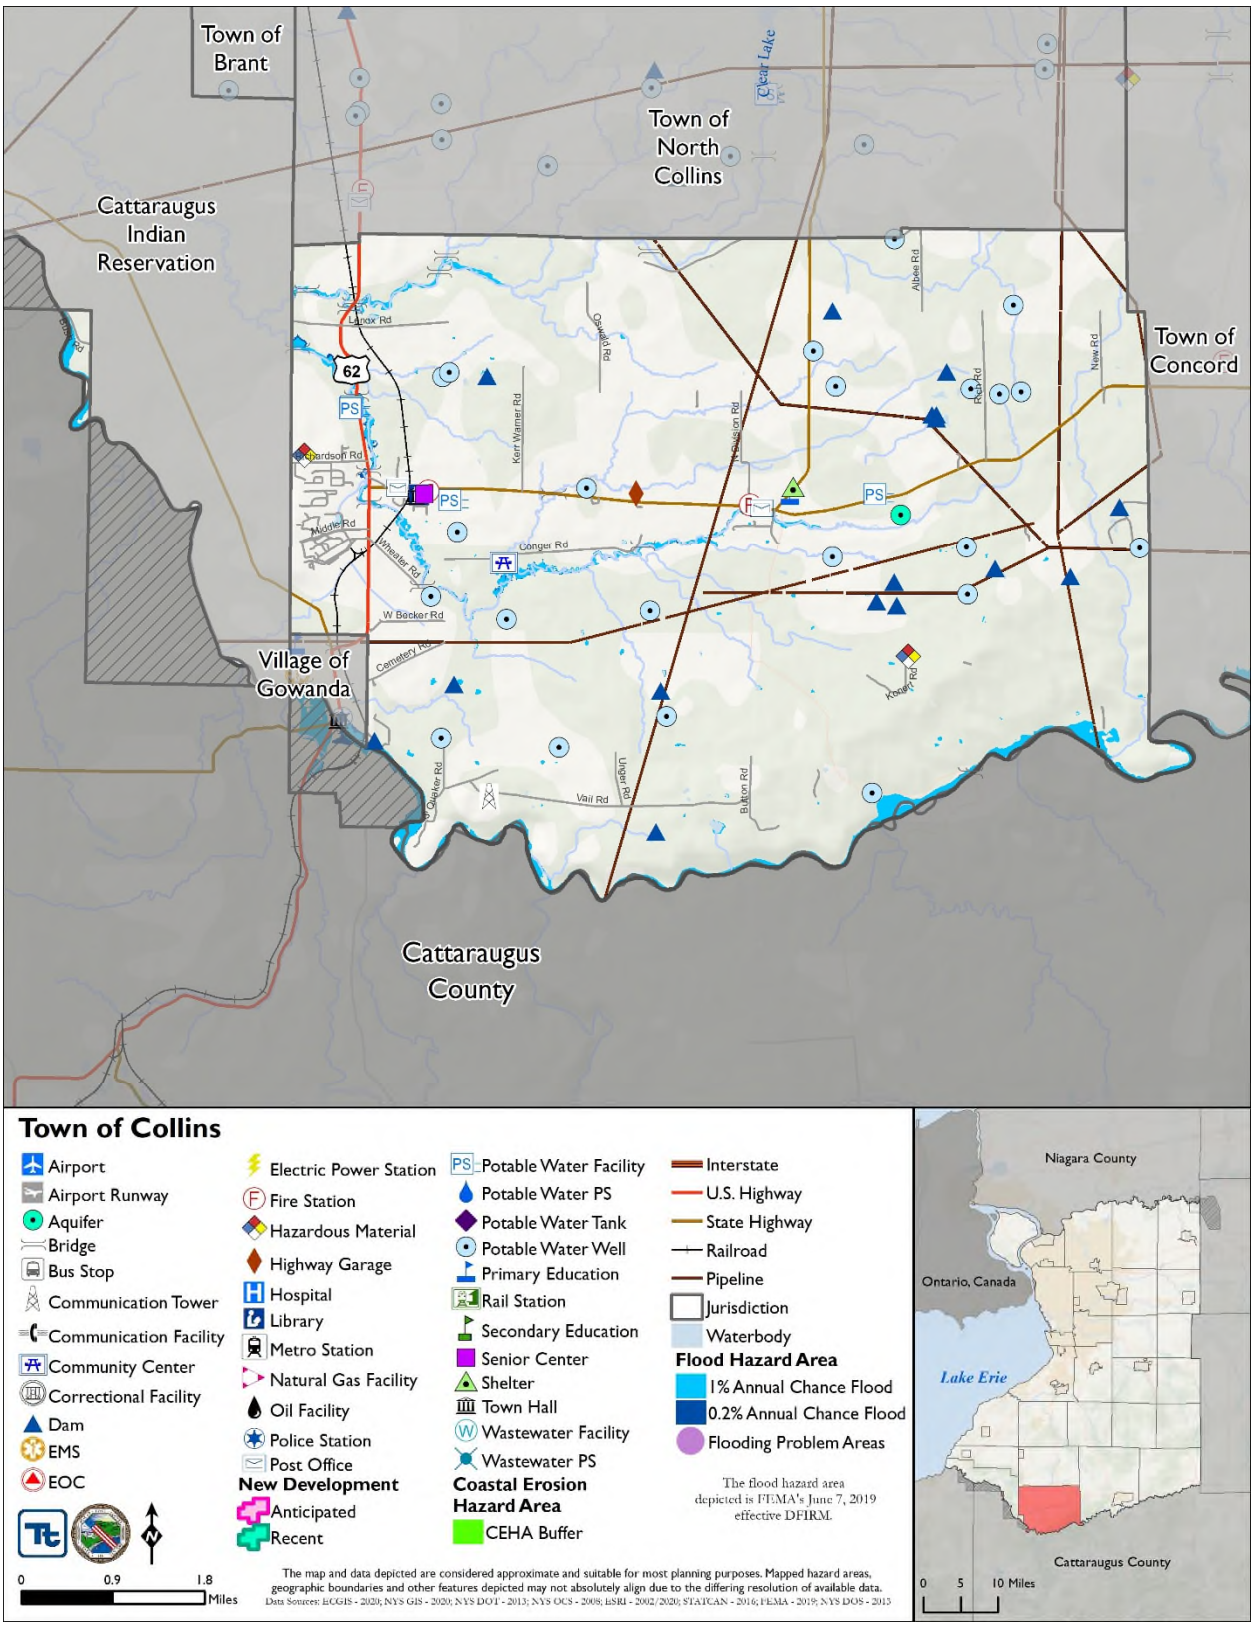
9.16.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Collins's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Collins has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.16-1. Town of Collins Hazard Area Extent and Location Map 1



Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Collins's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.16-14 provides details regarding municipal-specific loss and damages the Town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.16-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, the town did not report damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, the town did not report damages.
November 12, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
November 18, 2015	High Wind	No	Although the county was impacted, the town did not report damages.
January 11, 2017	High Wind	No	Although the county was impacted, the town did not report damages.
March 8, 2017	High Wind	No	Although the county was impacted, the town did not report damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, the town did not report damages.
July 20, 2017	Tornado	No	Although the county was impacted, the town did not report damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, the town did not report damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, the town did not report damages.
January 2, 2018	Blizzard	No	Although the county was impacted, the town did not report damages.
October 6, 2018	Lightning	No	Although the county was impacted, the town did not report damages.
February 24, 2019	High Wind	No	Although the county was impacted, the town did not report damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, the town did not report damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, the town did not report damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, the town did not report damages.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Collins's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Collins. The Town of Collins has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated the following:

- The town agreed that the calculated rankings accurately reflected the risk posed to the community

Table 9.16-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Medium	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.16-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Gowanda Country Club Dam	Dam	A	X	2022-T. Collins-002

Source: Effective DFIRM

Identified Issues

After review of the Town of Collins's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Collins has identified the following vulnerabilities within their community:

- The town does not have any designated Temporary or Permanent Housing locations to be used to house displaced residents, or to use to relocate homes that experience repetitive flood damages and losses, respectively.
- The Gowanda Country Club Dam is located within the 1% SFHA (100-year floodplain).
- Creeks and streams within the town become inundated with debris during and after hazard events and exacerbates damages and flooding along the banks.
- Bridges and culverts and become damaged and clogged from debris during flood and storm events. Many bridges in the town are located within the 1% SFHA.
- Town of Collins Water Districts #1 and #3 pump houses need back-up generators.

9.16.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.16-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Creek/Stream Debris Removal Program	Flood	Not Identified	Highway	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in the 2022 HMP 2. 2022-T. Collins-003 3.
-	Bridge/Culvert Inspection Program	Flood, Transportation	Not Identified	Highway	In Progress	Cost Level of Protection Damages Avoided; Evidence of Success		1. Include in the 2022 HMP 2. 2022-T. Collins-004 3.
-	WO #1 Pump House Flood Control Project	Flood, Water Supply	Not Identified	Town Water Board	Complete	Cost Level of Protection Damages Avoided; Evidence of Success	$163,962 Excellent Flooding of pumphouse	1. Discontinue 2. 3. Complete
-	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Code Enforcement	Complete	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Complete
-	Require staff involved in floodplain management and ordinance enforcement to become Certified Floodplain Managers (CFMs)	Flood	Not Identified	Code Enforcement	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing Capability of the Town
-	Join the Community Rating System (CRS)	Flood	Not Identified	Code Enforcement	Ongoing Capability	Cost Level of Protection Damages Avoided; Evidence of Success		1. Discontinue 2. 3. Ongoing Capability of the Town

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Collins has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- None Identified

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Collins participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.16-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X	X								X
Cyber Attack	X	X								X
Earthquake	X	X								X
Expansive Soils	X	X								X
Extreme Temperature	X	X								X
Flood	X	X	X	X	X		X	X	X	X
Hazardous Materials	X	X								X
Landslide	X	X								X
Pandemic	X	X								X
Severe Storm	X	X	X		X			X	X	X
Severe Winter Storm	X	X	X		X			X		X
Utility Failure	X	X								X
Wildfire	X	X								X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.16-19 summarizes the comprehensive-range of specific mitigation initiatives the Town of Collins would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide-range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.16-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Table 9.16-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T. Collins-001	Temporary and Permanent Housing	1, 2, 3	All Hazards	**Problem**: The town does not have any designated Temporary or Permanent Housing locations to be used to house displaced residents, or to use to relocate homes that experience repetitive flood damages and losses, respectively. **Solution**: The town will work with Erie County Emergency Services to identify, purchase and designate sites to be owned by the jurisdiction that meet applicable local zoning requirements and floodplain laws for the purpose of relocation of repetitive loss flood-damaged homes to preserve the tax base and population size. If there is no land available, the town will work with the county to identify land in neighboring jurisdictions for the same purpose. The town will also seek to identify and designate land meeting the same requirements for the purpose of placing temporary housing units for displaced residents.	No	No	Short term	Town of Collins, Erie County	Low-Medium	High, ensures alternative housing locations for displaced residents	Municipal Budget, CDBG	High	LPR	ES
2022-T. Collins-002	Gowanda Country Club Dam	1, 2, 3	Flood	**Problem**: The Gowanda Country Club Dam is located within the 1% SFHA (100-year floodplain). **Solution**: The Dam is privately owned and classified as a class A "low hazard" dam. The town will conduct outreach to the owners about the location within the floodplain and potential risks of increased flooding or failure, and support inspections or updates as deemed necessary by NYSDEC Dam Safety.	Yes	No	Short term	Town of Collins, Gowanda Country Club	Low to conduct outreach	High, reduces flooding at critical facilities	Municipal Budget	High	EAP	PI
2022-T. Collins-003	Creek/Stream Debris	1, 2	Flood, Severe Storm,	**Problem**: Creeks and streams within the town become inundated with debris during and after hazard events	No	No	Ongoing once established	Town of Collins Highway	Medium	High, reduces flooding	Municipal Budget, HMA	High	LPR, NSP	PR, NR

Table 9.16-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
	Removal Program		Severe Winter Storm	and exacerbates damages and flooding along the banks. **Solution**: The Town Highway Department will begin to implement a debris removal program after hazard events. The town will ensure that trees are monitored before storms and maintained to reduce impacts during events. After heavy storms, the town will assess damages and remove debris to ensure water flow and reduce backup.										
2022-T. Collins-004	Bridge/Culvert Inspection Program	1, 2	Flood, Severe Storm, Severe Winter Storm	**Problem**: Bridges and culverts and become damaged and clogged from debris during flood and storm events. Many bridges in the town are located within the 1% SFHA. **Solution**: The Town Highway Department will begin to implement a bridge and culvert inspection and maintenance program to reduce road closures and roadway flooding. As damages are identified and reported, the town will seek funding to upsize and repair and replace culverts and bridges according to the needs.	No	No	Ongoing once established	Town of Collins Highway	Medium	High, reduces flooding	Municipal Budget, HMA	High	LPR, SIP	PR, SP
2022-T. Collins-005	Emergency Generators	1, 2	All Hazards	**Problem:** Town of Collins Water Districts #1 and #3 pump houses need back-up generators. **Solution:** The town will seek funding to install automatic, permanent generators at the above locations. The town will ensure that generators are placed in locations way from additional hazards (i.e. flooding, storm damages, etc.).	Yes	No	Short	Town of Collins	Medium, estimated $50,000/ generator	High, ensures continuity of operations at critical facilities	Municipal Budget, CDBG	High	SIP	ES

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.16.9 Action Worksheets

The following action worksheets have been developed by the Town of Collins to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 55-Section-9.16-Collins-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Creek/Stream Debris Removal Program		
Project Number:	2022-T. Collins-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Storm		
Description of the Problem:	Creeks and streams within the town become inundated with debris during and after hazard events and exacerbates damages and flooding along the banks.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town Highway Department will begin to implement a debris removal program after hazard events. The town will ensure that trees are monitored before storms and maintained to reduce impacts during events. After heavy storms, the town will assess damages and remove debris to ensure water flow and reduce backup.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	High, reduces flooding
Useful Life:	N/A	**Goals Met:**	1, 2
Estimated Cost:	Medium	**Mitigation Action Type:**	Local Plans and Regulations., Natural Systems Protection.
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months
Estimated Time Required for Project Implementation:	Ongoing once established	**Potential Funding Sources:**	Municipal Budget, HMA
Responsible Organization:	Town of Collins Highway	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Ask residents to alert town to dangerous trees	$1,000	Reactive. Likely to miss most trees.
	Remove all trees along areas near creek/streams	N/A	Not feasible/environmentally damaging

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.17 Town of Concord

This section presents the jurisdictional annex for the Town of Concord. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Concord's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.17.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Concord's hazard mitigation plan primary and alternate points of contact. The Town of Concord followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: The Emergency Management and Supervisor's office. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.17-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Michael Willibey, Emergency Manager Address: 86 Franklin Street, Springville, NY Phone Number: 716-998-0925 Email: Cd153oem@gmail.com	Name/Title: Clyde Drake, Supervisor Address: 86 Franklin Street, Springville, NY Phone Number: 716-592-4946 Email: concordtownsupervisor@gmail.com
NFIP Floodplain Administrator	
Name/Title: Jeffrey Singleton, Code Enforcement Officer Address: 86 Franklin Street, Springville, NY Phone Number: 716-592-4946 Email: concordcode@gmail.com	

9.17.2 Municipal Profile

The Town of Concord is situated in southern Erie County and contains the Village of Springville plus the ham. let's of Morton's Corners, East Concord, Fowlerville, Glenwood and Wyandale. The town is approximately 70 square miles in area and is approximately 30 miles from downtown Buffalo. The town's southern boundary is the pristine Zoar Valley of the Cattaraugus Creek which is a well-known recreational attraction. The Towns of Collins and North Collins are Concord's western border. The Towns of Boston and Colden form the northern boundary and the Town of Sardinia are the eastern border. The upper reaches of the Eighteen Mile Creek are within the town.

The town was first settled by Europeans in 1807 and incorporated in 1812. The town was originally much larger, stretching across the entire south part of the county. The town, however, was reduced by formation of the towns

of Collins, North Collins, and Sardinia. The town is believed to be named after Concord, Massachusetts, by early settlers from New England (Town of Concord 2016). Historically, Springville was the center of a prosperous agricultural district, providing services and goods to farmers in the countryside and serving as a market for agricultural products. Today, agricultural value to the local economy is diminishing. Commercial and industrial enterprises within the town exist in and around the Village of Springville. Kissing Bridge, a popular ski resort, is located within the town. In the early 1980's of US Route 219 was constructed as a limited access highway from Buffalo south to Springville which spurred development of a modern "big box" retail area (Town of Concord 2016). NYS Routes 39 also traverses the town.

According to the U.S. Census, the 2010 population for the Town of Concord was 4,198. The estimated 2019 population was 4,186, a nearly zero percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 8.1 percent of the population is 5 years of age or younger and 17.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.17.3 Jurisdictional Capability Assessment and Integration

The Town of Concord performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.17.3). The Town of Concord's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Concord. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.17-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	LL3-1986, Town of Concord. 1986. Fire Prevention and	Local	Code Enforcement Officer

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
			Building Construction., Chapter 72		
Comment: Provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code) and the State Energy Conservation Construction Code (the Energy Code) in the Town of Concord. Except as otherwise provided in the Uniform Code, other state law, or other section of this article, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions of this article. The Building Code requires that new structures be built to minimize exposure to natural hazards.					
Zoning Code	Yes	No	Town of Concord. 2005. Zoning, Chapter 150.	Local	Code Enforcement Officer and Planning Board
Comment: Comprehensive Zoning Plan is hereby established for the area of the Town of Concord outside the Village of Springville by dividing the territory thereof into certain districts and prescribing regulations for buildings or other structures and the use of land therein. The Comprehensive Zoning Plan, set forth in the text and map which constitute this chapter, is adopted to promote, and protect public health, safety, comfort, convenience, prosperity, and other aspects of the general welfare. These general goals include, among others, the following specific purposes: to provide adequate light, air and convenience of access; to prevent undue concentration of population and overcrowding of land; to lessen congestion in the streets or roads; to secure safety from fire, flood, panic and other dangers; to enhance the environment by the conservation of certain open land or wetland areas with certain desirable or unique characteristics worthy of preservation; to facilitate the adequate provision of transportation, parks, schools and other public requirements, including the transmission of power; and to preserve and promote the attractiveness of the Town of Concord.					
Subdivision Ordinance	Yes	No	Local Law 1-1997; Subdivision Ordinance, Chapter 129	Local	Code Enforcement Office and Planning Board
Comment: It is declared to be the policy of the Town of Concord to consider land subdivision plats as part of a plan for the orderly, efficient, and economical development of the Town. This means, among other things, that land to be subdivided shall be of such character that it can be used safely for building purposes without danger to health or peril from fire, flood or other menace; that proper provision shall be made for drainage, water supply, sewerage and other needed improvements; that all proposed lots shall be so laid out and of such size as to be in harmony with the development pattern of the neighboring properties; that the proposed streets shall compose a convenient system conforming to the Official Map, if such exists, and shall be of such width, grade and location as to accommodate the prospective traffic, to facilitate fire protection and to provide access of fire-fighting equipment to buildings; and that proper provision shall be made for open spaces for parks and playgrounds.					
Stormwater Management Ordinance	No	Yes	-	-	-
Comment: None					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment: None					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to “caveat emptor,” a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	No	No	-	-	-
Comment: While the town does not have a standalone ordinance for growth management, it is referenced in the Comprehensive Plan.					
Site Plan Review	Yes	No	Town of Concord. 2005; Chapter 150 Zoning, Article XXXIII site Plan Review	Local	Planning Board
Comment: Unless otherwise provided and as regulated by the Subdivision Regulations of the Town of Concord, a site plan review and a site plan approval shall be required for all uses, buildings and structures that require a building permit or certificate of zoning compliance under this chapter and for which an application therefor has been made to the Town of Concord, except for a single-family dwelling or a two-family dwelling and its permitted accessory uses, buildings or structures, prior to the issuance of a building permit or certificate of zoning compliance. Site plans shall include: Site grading and landscape design; preliminary engineering plans of storm drainage system, public utility extensions, water supply, and sanitary sewer facilities					
Environmental Protection Ordinance	No	Yes	-	-	-
Comment:					

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this. (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Flood Damage Prevention Ordinance	Yes	Yes	Local Law 1-1987; Flood Damage Prevention	Local	FPA
Comment: It is the purpose of this chapter to promote the public health, safety, and general welfare and to minimize public and private losses due to flood conditions in specific areas by provisions designed to: A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards or which result in damaging increases in erosion or in flood heights or velocities. B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction. C. Control the alteration of natural floodplains, stream channels and natural protective barriers which are involved in the accommodation of floodwaters. D. Control filling, grading, dredging and other development which may increase erosion or flood damages. E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands. F. Qualify for and maintain participation in the National Flood Insurance Program. The ordinance requires BFE+2 feet for all construction in the SFHA (residential and non-residential).					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Local Law 2-1993; Stormwater Management	Local	Town Highway Department
Comment: The general purpose of this chapter is to provide for efficient, economic, environmentally safe, and legal operation of the Town's publicly owned treatment works (POTW). More specifically, there is a purpose to prevent the introduction of substances into the town's publicly owned treatment works (POTW) that will: • Interfere with the POTW in any way. • Pass through the POTW to the state's waters and cause contravention of standards for those waters or cause violation of the POTW's State Pollutant Discharge Elimination System (SPDES) permit. • Increase the cost or otherwise hamper the disposal of POTW sludge and/or residuals. • Endanger municipal employees. • Cause air pollution or groundwater pollution, directly or indirectly. • Cause, directly or indirectly, any public nuisance condition.

Other	Yes	No	LL3-1995, Chapter 59 Unsafe Buildings	Local	Code Enforcement
Comment: Unsafe buildings pose a threat to life and property in the Town of Concord. Buildings and structures may become unsafe by reason of damage by fire, the elements, age, or general deterioration. Vacant buildings not properly secured at doorways and windows also serve as an attractive nuisance for young children who may be injured therein, as well as a point of congregation by vagrants and transients. A dilapidated building may also serve as a place of rodent infestation, thereby creating a health menace to the community. Debris, rubble, or parts of buildings left on the ground and not removed constitute a dangerous, unhealthy, and unsightly condition. It is the purpose of this chapter to provide for the safety, health, protection and general welfare of persons and property in the Town of Concord by requiring such unsafe buildings to be repaired or demolished or removed.

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Concord to oversee and track development.

Table 9.17-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Code Enforcement
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The level of buildout in the town is unknown.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Concord and their current responsibilities which contribute to hazard mitigation.

Table 9.17-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board members review development proposals considering hazard exposure, supporting development that avoids unnecessary risk.
Zoning Board of Adjustments	Yes	Zoning Board of Appeals members balance strict application of the zoning code against other considerations. Hazard exposure is part of ZBA deliberations when necessary.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Town Highway Department staff ensure safe passage over town roads and regularly maintain a variety of facilities.
Construction/Building/Code Enforcement Department	Yes	Code Enforcement office provides effective administration of building code.
Emergency Management/Public Safety Department	Yes	Town Highway Department staff coordinate emergency response
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	CodeRed
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Town Highway Department
Mutual aid agreements	No	-
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Planning Board members closely review development proposals and consider the potential impact of hazard impacts
Engineers or professionals trained in building or infrastructure construction practices	Yes	Town Highway staff understand the impact of hazard impacts upon highways and other infrastructure.
Planners or engineers with an understanding of natural hazards	Yes	Town Highway Department staff understand the impact of hazard impacts upon highways and other infrastructure.
Staff with expertise or training in benefit/cost analysis	Yes	Consulting Engineer

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Professionals trained in conducting damage assessments	Yes	CEO and Consulting Engineer
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	CEO
Surveyor(s)	Yes	Consulting Engineer
Emergency Manager	Yes	Disaster Coordinator
Grant writer(s)	Yes	Consultants
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	Yes	Consulting Engineer

Fiscal Capability

The table below summarizes financial resources available to the Town of Concord.

Table 9.17-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	No
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Concord.

Table 9.17-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	No	-

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	Yes	Links to established agency websites
Warning systems for hazard events	Yes	CodeRed
Natural disaster/safety programs in place for schools	Yes	School System/Board of Cooperative Education Services
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Concord.

Table 9.17-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	8, 9	Unknown
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.17-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.17.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Jeffrey Singleton, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Concord.

Table 9.17-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Concord	4	8	$58,398	4	4

Source: *FEMA 2020a and 2020b*
Notes:
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

Areas prone to flooding in the town are mainly agricultural fields. There are not any Risk MAP projects currently underway in the town. The town did not identify how many (if any) properties have been mitigated. The town's flood hazard maps adequately address the flood risk within the jurisdiction. The town relies upon consulting engineers for guidance to address future flooding due to climate change.

NFIP Compliance

The Town of Concord does not have any outstanding NFIP compliance violations that need to be addressed. The most recent Community Assistance Contact (CAC) was in January 2011. The Code Enforcement Office is responsible for floodplain administration and the CEO is a certified Floodplain Manager. The town does not have access to resources to determine possible future flooding conditions from climate change. The town stated that its floodplain management staff would benefit from assistance or training to support its floodplain

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

management program. The town makes Substantial Damage determinations at time of plan review. The town's floodplain management meets minimum requirements. The Planning Board considers flood risk when reviewing development proposals.

9.17.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Town of Concord has identified the following routes and procedures to evacuate residents prior to and during an event.

- The town utilizes Route 219 and Route 240 as north-south evacuation routes, and Route 39 and Genesee Road as east-west routes. As evacuation proceeds, the town will continually coordinate with county officials.

Sheltering

The Town of Concord has identified the following designated emergency shelters within the town.

Table 9.17-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	Commerce Drive	100	Unknown	Yes	Yes	No	Shelter
East Concord Fire Department	Genesee Road	100	Unknown	Unknown	No	No	Warming
Morton County Fire Department	Morton's Corners Road	80	Unknown	Unknown	No	No	Warming

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Concord has identified the following sites suitable for placing temporary housing units.

Table 9.17-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. Town will work to identify suitable temporary housing locations per Proposed Mitigation Action #007					

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

requirements and floodplain laws. The Town of Concord has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.17-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
None identified. Town will work to identify suitable permanent housing locations, per Proposed Mitigation Action #007					

9.17.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.17-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.17-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.17.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Concord's risk assessment results and data used to determine the hazard ranking discussed later in this section.

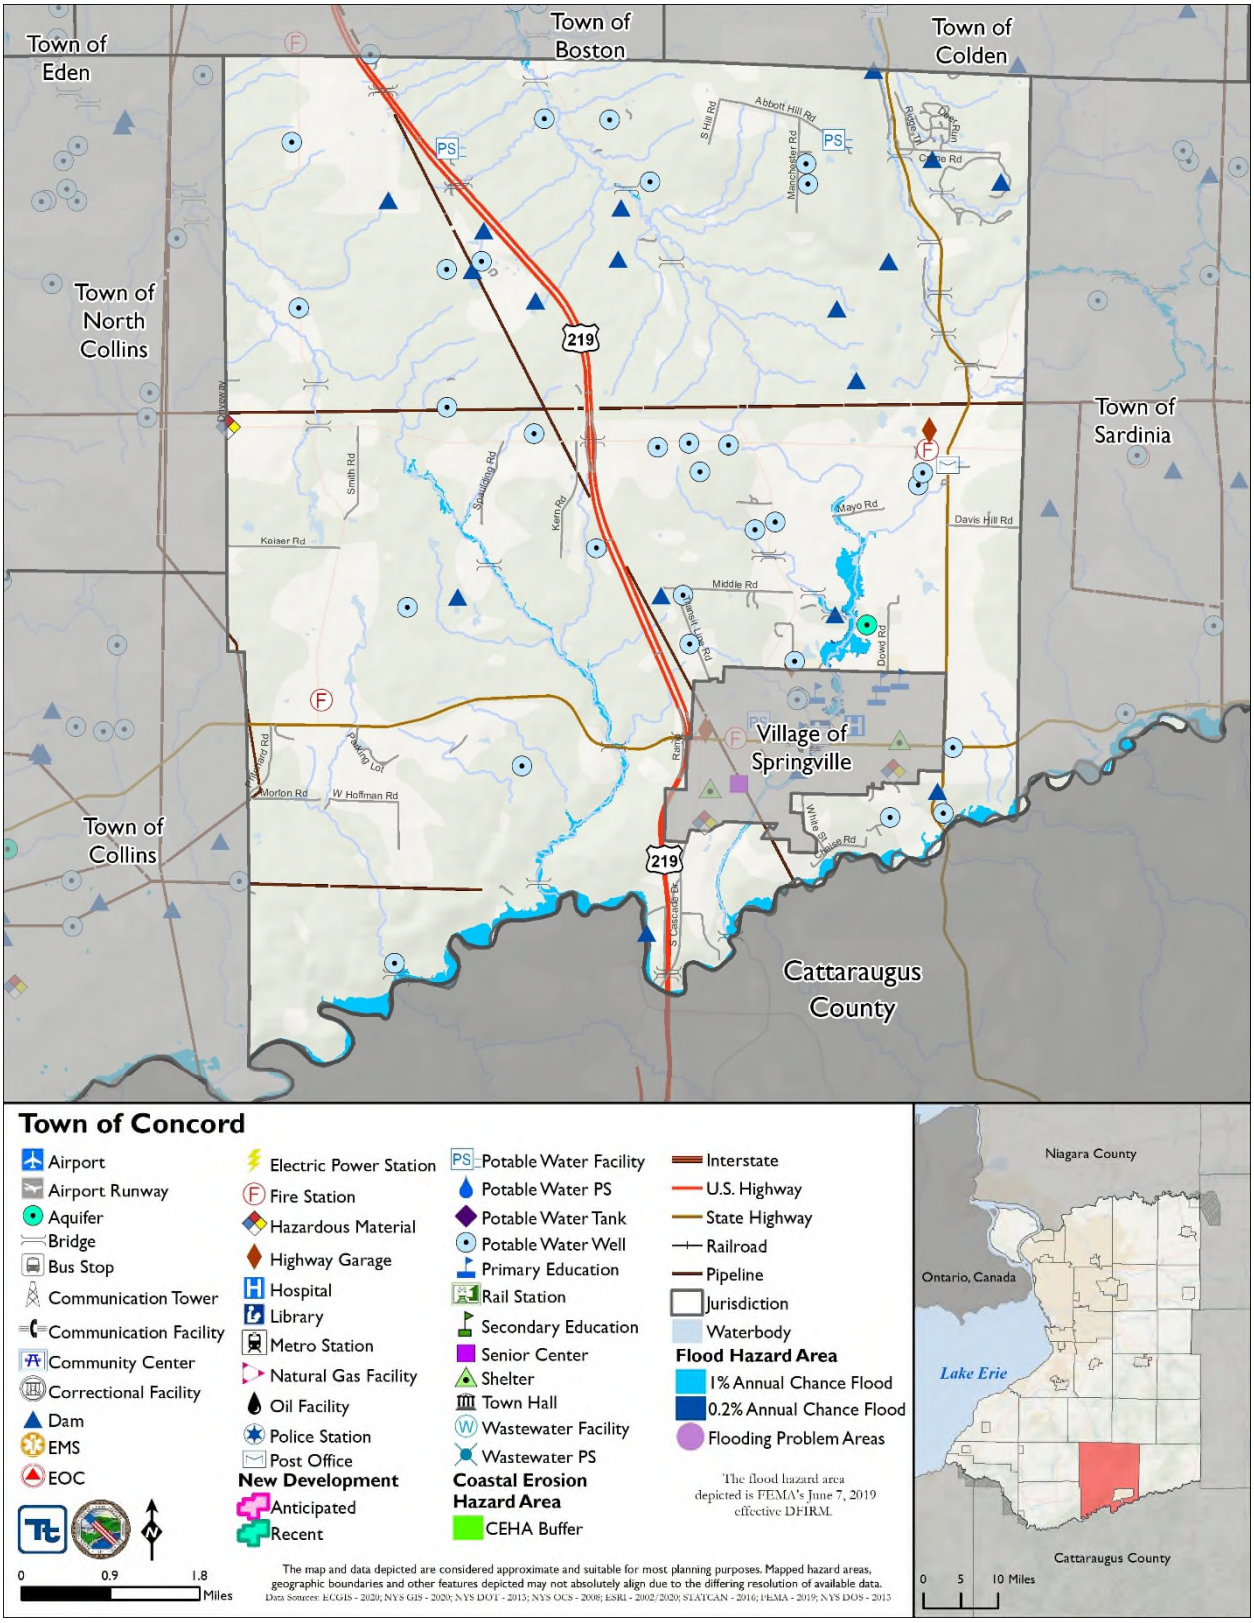
Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

using mapping techniques and technologies and for which the Town of Concord has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Figure 9.17-1. Town of Concord Hazard Area Extent and Location Map 1



Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Concord's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.17-14 provides details regarding municipal-specific loss and damages the town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.17-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
August 11-15, 2015	Flash Flood	No	Although the county was impacted, town did not report any damages.
October 28-29, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
November 6, 2015	Thunderstorm Wind	No	Although the county was impacted, town did not report any damages.
November 12, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
November 18, 2015	High Wind	No	Although the county was impacted, town did not report any damages.
January 11, 2017	High Wind	No	Although the county was impacted, town did not report any damages.
March 8, 2017	High Wind	No	Although the county was impacted, town did not report any damages.
March 13, 2017	Winter Storm	No	Although the county was impacted, town did not report any damages.
July 20, 2017	Tornado	No	Although the county was impacted, town did not report any damages.
August 4, 2017	Thunderstorm Wind	No	Although the county was impacted, town did not report any damages.
December 10-15, 2017	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
December 24-29, 2017	Lake-effect Snow	No	Although the county was impacted, town did not report any damages.
January 2, 2018	Blizzard	No	Although the county was impacted, town did not report any damages.
October 6, 2018	Lightning	No	Although the county was impacted, town did not report any damages.
February 24, 2019	High Wind	No	Although the county was impacted, town did not report any damages.
February 24, 2019	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the county was impacted, town did not report any damages.
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the county was impacted, town did not report any damages.
November 27, 2019	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 12, 2020	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
January 18, 2020	Lakeshore Flooding	No	Although the county was impacted, town did not report any damages.
March 2020 to Present	COVID Pandemic, DR 4480	Yes	The COVID-19 pandemic killed and/or sickened thousands of Eric County residents

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Concord's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Concord. The Town of Concord has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the town indicated agreement with the following Hazard Rankings:

Table 9.17-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	High	Low	Medium	Low	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Medium	High	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities because of a 1-percent annual chance flood event.

Table 9.17-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Springville Dam	Dam	X	X	2022-Town of Concord-003

Source: FEMA 2021

Identified Issues

After review of the Town of Concord's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Concord has identified the following vulnerabilities within their community:

- There is erosion occurring on county highways.
- The town hall facility lacks backup power and is a critical facility.
- The Springville dam is a recognized high hazard dam and is identified as being in the Special Flood Hazard.
- Culverts are undersized on several roadways.
- Tree trimming is needed in specified locations to prevent power failure.
- Locations for temporary and permanent housing have not been identified.
- There are four Repetitive Loss Properties in the town

9.17.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.17-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Continue maintenance of drainage ditches, culverts and related structures	Flood	Not Identified	Highway	Ongoing	Cost		1. Discontinued
						Level of Protection		2.
						Damages Avoided; Evidence of Success		3. Ongoing Capability
	The Town will continue evaluate land that may be purchased that falls within the flood plain areas of the Town for recreation and stormwater management purposes	Flood	Not Identified	Town Board	Ongoing	Cost		1. Include in 2022 HMP
						Level of Protection		2.
						Damages Avoided; Evidence of Success		3. Ongoing Capability
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flood	Not Identified	Legal, Town Board, Code Enforcement	Ongoing	Cost		1. Include in 2022 HMP

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Concord has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The town coordinates with the County Highway Department to reduce damage from landslides and erosion throughout the town.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Concord participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Flood prone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (FEMA 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.17-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	-	X	-	-	-		-	-	-	X
Cyber Attack	-	X	-	-	-		-	-	-	X
Earthquake	-	X	-	-	-		-	-	-	X

Severe Storm	-	X	-	-	-	X	-	-	-	X
Severe Winter Storm	-	X	-	-	-		-	X	-	X
Utility Failure	-	X	X	-	-		-	X	-	X
Wildfire	-	X	-	-	-		-	-	-	X

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.17-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Concord would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number. Table 9.17-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

				when needed after a disaster. **Solution:** The CEO and FPA will work with the county to identify and potentially secure access to sites to locate temporary and permanent housing						are displaced by a disaster				

Notes:

Not all acronyms and abbreviations defined below are included in the table.

Acronyms and Abbreviations:

CAV	*Community Assistance Visit*
CRS	*Community Rating System*
DPW	*Department of Public Works*
EHP	*Environmental Planning and Historic Preservation*
FEMA	*Federal Emergency Management Agency*
FPA	*Floodplain Administrator*
HMA	*Hazard Mitigation Assistance*
N/A	*Not applicable*
NFIP	*National Flood Insurance Program*
OEM	*Office of Emergency Management*

Potential FEMA HMA Funding Sources:

FMA	*Flood Mitigation Assistance Grant Program*
HMGP	*Hazard Mitigation Grant Program*
BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes 💧 *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*

- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses and preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as Storm Ready and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

2022-Town of Concord-003	Protect the Springville Dam from exposure to the 0.2% annual chance flood event	1	1	1	1	1	1	0	1	1	1	0	1	1	1	12	High
2022-Town of Concord-004	Replace undersized/blocked culverts along several roadways, town-owned and county-owned	1	1	1	1	0	1	0	1	1	1	0	0	1	1	10	High
2022-Town of Concord-005	Tree Trimming along roadways to prevent utility outages	1	1	1	1	1	1	0	1	1	1	0	1	1	1	12	High
2022-Town of Concord-006	Residential Property Flood Mitigation.	1	1	1	1	0	1	0	1	1	1	0	1	1	1	11	High
2022-Town of Concord-007	Identify locations for temporary and permanent housing	1	1	1	1	0	1	0	1	1	1	0	1	1	1	11	High

Note: Refer to Section 6, which conveys guidance on prioritizing mitigation actions. Low (0-4), Medium (5-8), High (9-14).

9.17.9 Action Worksheets

The following action worksheets have been developed by the Town of Concord to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Town of Concord Action Worksheet			
Project Name:	Protect town hall facility and town highway garage from risk of power failure		
Project Number:	2022-Town of Concord-001		
Risk / Vulnerability			
Hazard(s) of Concern:	All Hazards		
Description of the Problem:	The Town Hall facility lacks backup power, and these are critical facilities.		
Action or Project Intended for Implementation			
Description of the Solution:	Town staff will determine the correct generator to install at the Town hall to provide protection from power failure. The Department will then install it at the Town Hall and or Highway garage.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the 100-year floodplain?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	Protect the town hall from power failure	**Estimated Benefits (losses avoided):**	Ensure continuity of services from these critical facilities
Useful Life:	20 years	**Goals Met:**	1
Estimated Cost:	~$75,000	**Mitigation Action Type:**	Structure and Infrastructure Project
Prioritization:	High	**Desired Timeframe for Implementation:**	Within 5 years
Estimated Time Required for Project Implementation:	Within 5 years	**Potential Funding Sources:**	HMGP, BRIC, Municipal budget
Responsible Organization:	Town Highway Department, Town Engineer, Town Board	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation, Emergency Management
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues
	Construct solar field	High	Prohibitively expensive
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 56-Section-9.17-Concord-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet		
Project Name:	Protect town hall facility from risk of power failure	
Project Number:	2022-Town of Concord-001	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	Project will preserve critical services provided at the town facilities
Property Protection	1	Project will protect town facilities from damage during power outages
Cost-Effectiveness	1	
Technical	1	
Political	1	
Legal	1	The town has legal authority to complete the project
Fiscal	1	Project requires funding support

9.18 Village of Depew

This section presents the jurisdictional annex for the Village of Depew. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of Depew's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.18.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of Depew's hazard mitigation plan primary and alternate points of contact. The Village of Depew followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many village departments, including: Code Enforcement, Administrator, Mayor, and Emergency Manager. The Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.18-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: RJ Neiman, Emergency Manager Address: 85 Manitou St. Depew, NY 14043 Phone Number: 716-683-1400 Email:rniewman@villageofdepew.org	Name/Title: Kevin Peterson, Mayor Address: 85 Manitou St. Depew, NY 14043 Phone Number: (716) 683-7451 Email: kpeterson@villageofdepew.org
NFIP Floodplain Administrator	
Name/Title: Anthony Fischione, Code Enforcement Officer Address: 85 Manitou St. Depew, NY 14043 Phone Number: (716) 683-7451 Email: afischione@villageofdepew.org	

9.18.2 Municipal Profile

The Village of Depew straddles two towns: it is divided by Transit Road, the boundary between the Town of Lancaster and the Town of Cheektowaga. The village also shares a border with the Village of Lancaster. The village is 11 miles east of downtown Buffalo.

The village area was first settled by members of the Erie Indian tribe and later by the Seneca. One of the earliest white settlers in the area was Appolos Hitchcock, who arrived in 1808. The 1825 opening of the Erie Canal spurred rapid settlement as farmers were now able to ship their crops to large cities like New York. In the late 1830s, large numbers of German immigrants moved into the area. In the late 1840s, immigrants from Ireland and Britain arrived seeking work on the railroads. Dutch immigrants settled in the village in the mid-1800s and Hungarians and Ukrainian emigrants arrived after 1913. Construction of the New York Central Railroad repair

shops spurred large-scale development in Depew. By 1893, the National Car Wheel Works, the Gould Coupler Works, the Union Car company, and the Brassworks were built and in operation. By 1900, the New York Central shops employed 1,000 men.

The village incorporated in 1894 at which time the population was 2,000 residents. In 1912, after moving back and forth between the north and south halves of Depew, village hall was finally settled permanently within the village's south side Growth of the village slowed during the Great Depression but the Second World War revived the economy as factories produced mass amounts of war material (Village of Depew 2018).

According to the U.S. Census, the 2010 population for the Village of Depew was 15,303. The estimated 2019 population was 15,102, a 1.3 percent decrease from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 6.0 percent of the population is 5 years of age or younger and 19.6 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.18.3 Jurisdictional Capability Assessment and Integration

The Village of Depew performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.18.3). The Village of Depew's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of Depew. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.18-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 76 Local Law No. 9-2011	Local	Building Inspection/Code Enforcement

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: *This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code} and the State Energy Conservation Construction Code (the Energy Code) in the Village of Depew. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.*					
Zoning Code	Yes	No	Chapter 260 Local Law No. 5-2012	Local	Building Inspection/Code Enforcement
Comment: *The purpose of this chapter is to provide for the orderly growth of the Village of Depew by setting minimum requirements in accordance with a comprehensive plan, designed to lessen congestion in the streets; to secure safety from fire, flood, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements. Specifically, the Zoning Law is adopted to:* *1) Filling of vacant or improved land of any size shall not occur without a grading and drainage plan approved by the Code Enforcement Officer.* *2) The construction of earthen berms and similar significant landscaping features, including retaining walls, requires grading drainage plan to be approved by the Code Enforcement Officer.* *3) The landscape plan shall show the location of all existing trees to be preserved and/or removed, the location of all trees and low level plantings, a planting schedule indicating the number of plant species, their size and common name. The plan shall also include typical planting details for trees and shrubs and specifications for ground cover with germination rates.* *4) Signs must be anchored to prevent overturning or becoming windblown.* *5) Site plan shall have a rough sketch (to scale), showing the locations and dimensions of principal and accessory structures, parking areas, vehicular ingress and egress points, proposed signage, existing and proposed vegetation, any other proposed exterior site features, anticipated changes in topography and natural site features, including floodplains, floodways and/or regulated wetlands or water bodies.*					
Subdivision Ordinance	No	No	-	-	-
Comment:					
Stormwater Management Ordinance	Yes	Yes	Chapter 188 Local Law No. 1-2008	Local	DPW and Stormwater Management Officer
Comment*: The purpose of this chapter is to establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 188-2A. This chapter seeks to meet those purposes by achieving the following objectives: 1) To establish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of fact in § 188-2A. 2) Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels. 3) Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *A property condition disclosure statement must be presented to the buyer of a property. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract.*					
Growth Management	Yes	No	Chapter 260 Local Law No. 5-2012	Local	Building Department
Comment: *The purpose of this chapter is to provide for the orderly growth of the Village of Depew by setting minimum requirements in accordance with a comprehensive plan, designed to lessen congestion in the streets; to secure safety from fire, flood, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; to facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirements.*					
Site Plan Review	Yes	No	260-48 through 53 Local Law No. 5-2012	Local	Planning Board
Comment: *The goals and objective of site plan review include the following: 1) Filling of vacant or improved land of any size shall not occur without a grading and drainage plan approved by the Code Enforcement Officer. 2) The construction of earthen berms and similar significant landscaping features, including retaining walls, requires grading drainage plan to be approved by the Code Enforcement Officer. 3) The landscape plan shall show the location of all existing trees to be preserved and/or removed, the location of all trees and low level plantings, a planting schedule indicating the number of plant species, their size and common name. The plan shall also include typical planting details for trees and shrubs and specifications for ground cover with germination rates. 4) Signs must be anchored to prevent overturning or becoming windblown. 5) Site plan shall have a rough sketch (to scale), showing the locations and dimensions of principal and accessory structures, parking areas, vehicular ingress and egress points, proposed signage, existing and proposed vegetation, any other proposed exterior site*					

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
features, anticipated changes in topography and natural site features, including floodplains, floodways and/or regulated wetlands or water bodies.					
Environmental Protection Ordinance	Yes	Yes	Chapter 98 Local Law No. 2-1979	Local	Village Planning Board
Comment: *The purpose of this chapter is to implement for the Village of Depew SEQR and Part 617.*					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 109 Local Law No. 1-2019	Local	Building Inspections/Code Enforcement
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands, and;* *F. Qualify and maintain for participation in the National Flood Insurance Program.* *§109-16 and 17 provide standards for new and substantially approved residential and non-residential structures. If new or substantially improved structures are located in the SFHA, the structure must have their lowest floor elevated to or above two feet above the BFE.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 187 (Sewer Use), Section 42; amended by Local Law No. 4-1988	Local	DPW and Stormwater Management Officer
Comment: *The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the Village of Depew through the regulation of non-stormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of pollutants into the MS4, in order to comply with the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit No. GP-02-02.*					
Emergency Management Ordinance	Yes	Yes	Chapter 106 Fire Safety Local Law Number 2 of 1971.	Local	Fire Department
Comment: *The law deals with the local fire and emergency response as well as clean up of hazardous waste during disaster event. The law also states the need for municipal intervention during a natural disaster event to reduce community exposure to hazard.*					
Climate Change Ordinance	No	No	-	-	-
Comment:					
Disaster Recovery Ordinance	Yes	No	Chapter 76 (Building Construction and Fire Prevention); adopted on November 28, 2011	Local	Code Enforcement Officer
Comment: *This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code} and the State Energy Conservation Construction Code (the Energy Code) in the Village of Depew. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.*					
Disaster Reconstruction Ordinance	Yes	No	Chapter 76 (Building Construction and Fire Prevention); adopted on November 28, 2011	Local	Code Enforcement Officer
Comment: *This chapter provides for the administration and enforcement of the New York State Uniform Fire Prevention and Building Code (the Uniform Code} and the State Energy Conservation Construction Code (the Energy Code) in the Village of Depew. This chapter is adopted pursuant to § 10 of the Municipal Home Rule Law. Except as otherwise provided in the Uniform Code, other state law, or other section of this chapter, all buildings, structures, and premises, regardless of use or occupancy, are subject to the provisions this chapter.*

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Planning Documents					
Comprehensive Plan	Yes	No	Town of Lancaster, Village of Lancaster, and the Village of Depew Joint Comprehensive Plan, 2018	Local	Village Planning
Comment: *The Comprehensive Plan serves as the legal foundation for all zoning and land use regulation decisions made in each municipality. New York State Law dictates that Town and Village planning, zoning, capital budgeting and other decisions should be based on a comprehensive plan that represents the community's vision for its future. This Plan's articulation of the shared vision for the three communities helps ensure that land use regulations are built on a solid foundation. The goals of the 2018 Comprehensive Plan include:* *1) Prioritize a list of critical open spaces to preserve the community's important environmental features, such as stream corridors, wetlands and forested lands, through a variety of tools from acquisition to conservation easements.* *2) Allow conservation development in the Town code.* *3) The communities should invite the participation of land trusts to help obtain the preservation of valuable land; this could include the Penora Woods area. Land trusts may also play an important role in the acquisition of public access along stream corridors or conservation easements to protect other sensitive environmental or aesthetic features.* *4) The Town of Lancaster and Villages of Lancaster and Depew should consider developing a coordinated storm water management plan for the three communities.* *5) Storm water drainage plans for proposed new developments should be reviewed by representatives of potentially affected communities.* *6) Existing storm water problem areas should be jointly addressed. Such areas include erosion problems along Zurbrick Road in Depew, siltation problems along Scajaquada Creek and seasonal overflows of tributaries to Cayuga Creek. The Zurbrick Road area has recently received funding to improve the erosion problems and additional funding should be sought.* *7) Continue to include an assessment of creek cresting patterns when reviewing new development. The cresting patterns determine the expected timing of floods and will enable the communities to plan for flooding situations. This information will also enable the communities to provide appropriate storm water detention for creek waters.* *8) Consider soil conditions, topography, floodplains and other environmental conditions when it reviews new development projects.* *9) The Town of Lancaster and Villages of Lancaster and Depew should require a drainage plan and detention/retention ponds as appropriate before approving individual site developments. The communities should ensure that site drainage will not adversely affect the property or adjacent properties before granting approval.*

Development and Permitting Capability

The table below summarizes the capabilities of the Village of Depew to oversee and track development.

Table 9.18-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	No	-
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	The village is relatively urbanized and built out – no land available for relocation within jurisdiction.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of Depew and their current responsibilities which contribute to hazard mitigation.

Table 9.18-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The planning board may approve, conditionally approve or disapprove subdivision plans for the purpose of providing for the orderly and wise development of the village and affording adequate facilities for housing, transportation, distribution, comfort, convenience, safety and the health and welfare of its population.
Zoning Board of Adjustments	Yes	The primary role of the zoning board is to review and decide cases where a relaxation of the ordinance is sought or where there is an alleged error in a zoning decision.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	No	-
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Public Works/Highway Department	Yes	The DPW handles the following services for the village: • Garbage Collection & Recycling • Large Appliance Disposal • Used Tire Recycling • Leaf Pick Up • Loose Branch Pickup (call 683-5700 for pickup) • Carcass Removal (on residential streets only) • Street Maintenance & Pothole Repair • Road Signs/Markings and Maintenance • ROW Tree Removal and Trimming • Storm & Sanitary Sewer Maintenance • Illicit Discharge Complaints • Snow Plowing/Snow Removal
Construction/Building/Code Enforcement Department	Yes	The Building Inspection/Code Enforcement Department provides the following services: • Residential and Commercial Building Inspection and Plumbing Inspection • Sewer Certificate of Compliance - needed to sell your home • Information on building permits for building, remodeling, fences, swimming pools, storage sheds, signs (all types), decks and porches • Village code enforcement • Liaison to Zoning Board and Planning Board • Floodplain development
Emergency Management/Public Safety Department	Yes	Staffed by volunteers from the community, the primary functions of the Depew Office Emergency Management are to: • Identify, assess and prioritize local vulnerabilities to emergencies or disasters and the resources available to prevent or mitigate, respond to, and recover from them. • Outline short, medium and long range measures to improve the Village's capability to manage hazards. • Provide that Village government will take appropriate actions to prevent or mitigate effects of hazards and be prepared to respond to and recover from them when an emergency or disaster occurs and provide for the efficient utilization of all available resources during an emergency. • To provide for the utilization and coordination of Village, County, State and federal programs to assist disaster victims, and to prioritize the response to the needs of the elderly, disabled, low income, and other groups which may be inordinately affected. • Provide for the utilization and coordination of Village state and federal programs for recovery from a disaster with attention to the development of mitigative programs.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code RED
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Garbage Collection & Recycling Large Appliance Disposal Used Tire Recycling Leaf Pick Up Loose Branch Pickup (call 683-5700 for pickup) Carcass Removal (on residential streets only) Street Maintenance & Pothole Repair Road Signs/Markings and Maintenance

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		ROW Tree Removal and Trimming Storm & Sanitary Sewer Maintenance Illicit Discharge Complaints Snow Plowing/Snow Removal
Mutual aid agreements	Yes	Fire
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	Yes	The Department of Building Inspection/ Code Enforcement offers the following services: • Residential and Commercial Building Inspection and Plumbing Inspection • Sewer Certificate of Compliance - needed to sell your home • Information on building permits for building, remodeling, fences, swimming pools, storage sheds, signs (all types), decks and porches • Village code enforcement • Liaison to Zoning Board and Planning Board • Flood Plain Development
Planners or engineers with an understanding of natural hazards	No	-
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	Yes	Contracted
Emergency Manager	Yes	Emergency Manager
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of Depew.

Table 9.18-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of Depew.

Table 9.18-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Clerk is in charge of website updating
Personnel skilled or trained in website development	No	-
Hazard mitigation information available on your website	Yes	Village website is the main source for this information
Social media for hazard mitigation education and outreach	Yes	The village maintains a Facebook page where they provide events and municipal updates.
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Ready Erie Preparedness App, NY Alert, Social media/media outlets – have Facebook and mostly reliant on Erie OEM social media.
Natural disaster/safety programs in place for schools	Yes	Schools have their own safety programs.
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of Depew.

Table 9.18-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	Unknown	Unknown

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.18-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Strong
Cyber Attack	Moderate
Earthquake	Strong
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Moderate
Landslide	Strong
Pandemic	Strong
Severe Storm	Moderate
Severe Winter Storm	Strong
Utility Failure	Moderate
Wildfire	Strong

**Strong* *Capacity exists and is in use*
Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.18.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Anthony Fischione, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of Depew.

Table 9.18-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of Depew	14	33	$23,675	0	4

Source: *FEMA 2020a, FEMA 2020b*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Flood Vulnerability Summary

Areas that are prone to flooding within the village are within the designated floodplains. The village maintains a list of properties that have been damaged by flooding by using the floodplain maps. The village does not maintain a list of property owners interested in flood mitigation. The village does not have any RiskMAP projects underway. The Village of Depew makes Substantial Damage determinations by using the NFIP guidance. So far, no properties were declared substantially damaged for recent flood events. There have not been any mitigation projects within the village. The village's flood hazard maps adequately address the flood risk within the village.

NFIP Compliance

The Building Inspection/Code Enforcement Department is responsible for floodplain management. At this time, there are no staff members that are certified floodplain managers. The Village of Depew does not have access to resources to determine possible future flooding conditions from climate change. The floodplain management staff needs assistance to support its floodplain management program including NFIP updates for 2020. The village provides engineering capabilities for their NFIP administration services. The village would determine if proposed development on an existing structure would qualify as a substantial improvement by using NFIP resources.

The Village of Depew expressed resources as being a barrier to running an effective NFIP program. The village does not have any outstanding NFIP compliance violations. The most recent Community Assistance Contact (CAC) was on July 22, 1997. The most recent Community Assistance Visit (CAV) was on February 22, 2008. Ch #109 Local Law 2019 is the flood damage prevention ordinance and there are various other plans and programs that support the floodplain management. The floodplain management program meets the minimum requirements. The jurisdiction does not participate in the CRS program.

9.18.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

The Village of Depew has identified the following routes and procedures to evacuate residents prior to and during an event. Escape Routes.

- Transit Road – State Route 78
- Broadway – State Route 20
- Walden Ave – State Route 33

Sheltering

The Village of Depew has identified the following designated emergency shelters within the village.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.18-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	85 Manitou Street, Depew	25-50	Yes	Yes	Yes	Urgent Care	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of Depew has identified the following sites suitable for placing temporary housing units.

Table 9.18-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Depew High School	5201 Transit Road	20-30	Parking lot	Water/ Electric	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Village of Depew has identified the following areas suitable for relocating homes outside of the floodplain.

Table 9.18-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Depew High School	5201 Transit Road	20-30	Parking lot/ Vacant Lot	Water/ Electric	None

9.18.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.18-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.18-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Other (commercial, mixed-use, etc.)	1	0	0	0	3	0	2	0	1	0	0	0
Total Permits Issued	**2**	**0**	**2**	**0**	**3**	**0**	**3**	**0**	**2**	**0**	**2**	**0**

Property or Development Name	Type of Development	# of Units / Structures	Location (address and/or block and lot)	Known Hazard Zone(s)*	Description / Status of Development
Recent Major Development and Infrastructure from 2015 to Present					
None identified					
Known or Anticipated Major Development and Infrastructure in the Next Five (5) Years					
Broadway Apartment	Multi Residential	36 units/5 structures	4510 Broadway (103.76-1-1.1)	0.2-percent Annual Chance Flood Event Hazard Area, Wildland-Urban Intermix Hazard Area, NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roadways, Hazardous Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines	Planning
Landfill Solar	Utility	5 MW 24.97 acres	4293 Broadway (103.19-1-10, 103.19-1-13)	NEHRP Soil Class D and E Hazard Area, ½ Mile Buffer from HazMat Roadways, ½ Mile Buffer from HazMat Railways, Hazardous Facilities Hazard Area, ½ Mile Buffer from HazMat Pipelines	Planning

SFHA Special Flood Hazard Area (1% flood event)

** Only location-specific hazard zones or vulnerabilities identified.*

9.18.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of Depew's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

using mapping techniques and technologies and for which the Village of Depew has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of Depew's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.18-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.18-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 1-9, 2015	Lake-effect Snow	No	No major loss – downed trees
August 11-15, 2015	Flash Flood	No	Although the County was impacted, the village did not report damages
October 28-29, 2015	High Wind	No	Although the County was impacted, the village did not report damages
November 6, 2015	Thunderstorm Wind	No	Although the County was impacted, the village did not report damages
November 12, 2015	High Wind	No	Although the County was impacted, the village did not report damages
November 18, 2015	High Wind	No	Although the County was impacted, the village did not report damages
January 11, 2017	High Wind	No	Although the County was impacted, the village did not report damages
March 8, 2017	High Wind	No	Although the County was impacted, the village did not report damages
March 13, 2017	Winter Storm	No	Although the County was impacted, the village did not report damages
July 20, 2017	Tornado	No	Although the County was impacted, the village did not report damages
August 4, 2017	Thunderstorm Wind	No	Although the County was impacted, the village did not report damages
December 10-15, 2017	Lake-effect Snow	No	Although the County was impacted, the village did not report damages
December 24-29, 2017	Lake-effect Snow	No	Although the County was impacted, the village did not report damages
January 2, 2018	Blizzard	No	Although the County was impacted, the village did not report damages
October 6, 2018	Lightning	No	Although the County was impacted, the village did not report damages
February 24, 2019	High Wind	No	Although the County was impacted, the village did not report damages
February 24, 2019	Lakeshore Flooding	No	Although the County was impacted, the village did not report damages
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	Although the County was impacted, the village did not report damages
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	Although the County was impacted, the village did not report damages
November 27, 2019	Lakeshore Flooding	No	Although the County was impacted, the village did not report damages
January 12, 2020	Lakeshore Flooding	No	Although the County was impacted, the village did not report damages

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Did your community suffer losses/costs from this event? If yes, please provide details
January 18, 2020	Lakeshore Flooding	No	Although the County was impacted, the village did not report damages
2020-21	COVID -19	No	The village was subject to closures and masking/social distancing requirements. Various losses not quantifiable

Notes:
EM *Emergency Declaration (FEMA)*
FEMA *Federal Emergency Management Agency*
DR *Major Disaster Declaration (FEMA)*
N/A *Not applicable*

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of Depew's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of Depew. The Village of Depew has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- The village changed flood from low to high due to frequent flooding in various parts of the community.
- The village changed hazardous material incidents from low to medium. The village has many trains and tractor trailers that come through the village carrying various hazardous materials. A transfer station (located in Cheektowaga) is also located next to Cayuga Creek and threatens cascading water contamination.
    - Municipal Landfill is also adjacent to Cayuga Creek and threatens water quality.
- While storms are a major issue, the municipality has the capacity to respond and will revised the rankings for Severe Storms, Severe Winter Storms, and Utility Failure from high to medium.
- The village has historically not been threatened by earthquakes and will adjust the ranking from high to low.

Table 9.18-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Low	Medium	High	Medium

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	Medium	Medium	Medium	Low

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.18-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Wastewater Pump Station (unnamed)	Wastewater Pump Station		X	Yes
Warner Road #4 PS	Wastewater Pump Station		X	Yes

Source: 2021 GIS

Identified Issues

After review of the Village of Depew's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of Depew has identified the following vulnerabilities within their community:

- The Wastewater Pump Station is in the 0.2% annual chance flood event.
- The Warner Road #4 PS Wastewater Pump Station is in the 0.2% annual chance flood event.
- Several, hazardous material facilities and private schools are in the earthquake hazard area
- There are several hazardous material facilities in the Village of Depew that may be at risk of experiencing damages caused by expansive soils.
- The Fire department building at 112 Brewster St. is old and needs to be renovated and expanded onto in order to increase capacity. Meridian St. facility is confined by land and has limited expansion capabilities, but will need to be elevated to accommodate newer sized vehicles. Brewster St. facility also has issues pertaining to flooding but mostly on the existing land.
- The Fire department building at 45 Meridian St. is old and needs to be renovated and expanded onto in order to increase capacity. Meridian St. facility is confined by land and has limited expansion capabilities, but will need to be elevated to accommodate newer sized vehicles. Brewster St. facility also has issues pertaining to flooding but mostly on the existing land.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- The Fire department building at 2325 George Urban Blvd. is old and needs to be renovated and expanded onto in order to increase capacity and comply with state regulations.
- The Code Enforcement Officer would like to get funding for digital record keeping as the village does not have any access to such systems and the department would need expanded capacity. While this system is not necessarily directly impacting the resilience of the community, the limited technology impedes the municipal government, code enforcement, and department of public works from optimizing its operation. The existing system prevents the code enforcement officer from ensuring that all structure, houses, and commercial buildings are fully in compliance with the local code and flood ordinance.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- None

Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.18-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Implementation of a radio system for the Fire Department and Office of Emergency Management that is interoperable with neighboring agencies and Erie County. Project will involve the application for a UHF system as well as the replacement of equipment that is not narrowband capable (as per FCC requirements). This will be located in each fire station, vehicle, and the Village EOC.	All Hazards	Not Identified	Fire Department	In Progress	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Close to completion
	Debris cleanings in Cayuga and Scajaquada Creeks. Would be done periodically by the Dept. of Public Works to reduce the possibility of obstructions which could result in flooding.	Flooding	Not Identified	Public Works	Ongoing Capability	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Ongoing
	Remediation and restoration of Cayuga Creek stream bank and public infrastructure at Zurbrick Rd. Stream bank is currently eroding and poses a hazard to existing homes and property located close to the bank, in addition to a village road that has partially collapsed as a result.	Flooding	Not Identified	Public Works	In Progress	Cost	-	1. Discontinue
						Level of Protection	-	2.
						Damages Avoided; Evidence of Success	-	3. Depew landfill under construction for land stabilization.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Not Identified	Planning Board, Village Board	Ongoing Capability	Cost	-	1. Discontinue 2. 3. Recently adopted update 2019, but discontinue, for future plans
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
	Require staff involved in floodplain management and ordinance enforcement to become Certified Floodplain Managers (CFMs)	Flooding	Not Identified	Village Board	No Progress	Cost	-	1. Discontinue 2. 3. Staff member indicated that it is not within the village's capacity to have someone get certified at this time.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of Depew has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

The village has worked on streambank restoration.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of Depew participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.18-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion		X							X	
Cyber Attack		X							X	
Earthquake		X		X			X		X	
Expansive Soils		X		X			X		X	
Extreme Temperature		X							X	
Flood		X		X		X	X		X	
Hazardous Materials		X							X	
Landslide		X							X	
Pandemic		X							X	
Severe Storm		X							X	
Severe Winter Storm		X							X	
Utility Failure		X							X	
Wildfire		X							X	

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.18-19 summarizes the comprehensive range of specific mitigation initiatives the Village of Depew would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.18-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.18-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category

Critical Facility:

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) – These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) – Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) – These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) – Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) – Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) – Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) – Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.18.8 Action Worksheets

The following action worksheets have been developed by the Village of Depew to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Fire Department Expansion #1		
Project Number:	2022-Village of Depew-003		
Risk / Vulnerability			
Hazard(s) of Concern:	All		
Description of the Problem:	The fire department building at 112 Brewster St. is old and needs to be renovated and expanded onto in order to increase capacity. Meridian St. facility is confined by land and has limited expansion capabilities, but will need to be elevated to accommodate newer sized vehicles. Brewster St. facility also has issues pertaining to flooding but mostly on the existing land.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will renovate all three facilities to increase emergency management capacities and to increase resilience of municipal assets. The Brewster St. facility shall undergo an assessment to understand the existing surrounding land that are not viable for development. Once suitable sites have been determined, the facility shall undergo renovation at the existing facility and an expansion to accommodate for new equipment, generator, office space, shelter space, and vehicle garage space. The new building shall be retrofitted to reduce any potential to flood damage.		
Is this project related to a Critical Facility?	Yes ☒	No ☐	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	500-year storm	**Estimated Benefits (losses avoided):**	Reduced flood danger and increased capacity
Useful Life:	30 years	**Goals Met:**	1,2
Estimated Cost:	$1 Million	**Mitigation Action Type:**	Structural and Infrastructure Projects
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	2 years once funding secured
Estimated Time Required for Project Implementation:	3 years	**Potential Funding Sources:**	HMGP, Municipal funding, BRIC, FEMA Fire Fighters Funding
Responsible Organization:	OEM	**Local Planning Mechanisms to be Used in Implementation if any:**	Mitigation
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Rebuild an entire new facility	High	Expensive and no space
	Retrofit and rebuild	High	Most feasible
Progress Report (for plan maintenance)			
Date of Status Report:			
Report of Progress:			
Update Evaluation of the Problem and/or Solution:			

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evaluation and Prioritization		
Project Name:	Fire Department Expansion #1	
Project Number:	2022-Village of Depew-003	
Criteria	**Numeric Rank (-1, 0, 1)**	**Provide brief rationale for numeric rank when appropriate**
Life Safety	1	The project protects life
Property Protection	1	The project protects property
Cost-Effectiveness	1	The project is cost effective
Technical	1	The project is technically feasible
Political	1	No political opposition
Legal	1	No legal complications
Fiscal	-1	Need financial resources
Environmental	1	No environmental issues
Social	1	Positive social impact
Administrative	1	Have administrative support
Multi-Hazard	1	Addresses multiple hazards
Timeline	1	Timeline is feasible
Agency Champion	1	The village OEM
Other Community Objectives	1	Various
Total	12	
Priority (High/Med/Low)	High	

Attachment: 57-Section-9.18-Depew-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	BAS System Upgrade		
Project Number:	2022-Village of Depew-004		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood		
Description of the Problem:	The Code Enforcement Officer would like to get funding for digital record keeping as the village does not have any access to such systems and the department would need expanded capacity. While this system is not necessarily directly impacting the resilience of the community, the limited technology impedes the municipal government, code enforcement, and department of public works from optimizing its operation. The existing system prevents the code enforcement officer from ensuring that all structure, houses, and commercial buildings are fully in compliance with the local code and flood ordinance.		
Action or Project Intended for Implementation			
Description of the Solution:	The village will acquire a new BAS system to be installed and used by Code Enforcement and the Department of Public Works. The system will be utilized between departments to facilitate work and determine specific areas of concern that might be in need of consultation or hazard mitigation measures.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is this project related to a Critical Facility located within the Special Flood Hazard Area?	Yes ☐	No ☒	
(If yes, this project must intend to protect to the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	N/A	**Estimated Benefits (losses avoided):**	Facilitated work for flood mitigation and code compliance
Useful Life:	10 years	**Goals Met:**	1, 2, 4
Estimated Cost:	$60,000	**Mitigation Action Type:**	Local Plans and Regulations
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months once funding secured
Estimated Time Required for Project Implementation:	1 year	**Potential Funding Sources:**	HMGP, municipal budget, BRIC
Responsible Organization:	CEO	**Local Planning Mechanisms to be Used in Implementation if any:**	Mitigation
Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Problem continues.
	Work with neighboring municipal systems	Low	Not as effective
	Purchase new BAS	Moderate	Best option in the long run

9.19 Village of East Aurora

This section presents the jurisdictional annex for the Village of East Aurora. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the village participated in the planning process; an assessment of the Village of East Aurora's risk and vulnerability; the different capabilities utilized in the village; and an action plan that will be implemented to achieve a more resilient community.

9.19.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Village of East Aurora's hazard mitigation plan primary and alternate points of contact. The Village of East Aurora followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Village departments, including: Clerk and Highway Department. The Village Administrator represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.19-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Cathryn Thomas, Village Administrator Address: 585 Oakwood Avenue, East Aurora NY Phone Number: 716-652-6000 Email: cathie.thomas@east-aurora.ny.us	Name/Title: Matthew Hoeh, Supt. NFIP Floodplain Administrator	
Name/Title: Elizabeth Cassidy, Floodplain Administrator Address: 585 Oakwood Avenue, East Aurora NY Phone Number: 716-652-6000 Email: building@townofaurora.com	

9.19.2 Municipal Profile

The Village of East Aurora is located 25 miles from downtown Buffalo and is entirely contained within the Town of Aurora. The Buffalo Creek runs through the village. The village is 2.5 square miles in size. East Aurora was first settled by whites in 1804 and incorporated as a village in 1874. The village became home to U.S. President Millard Fillmore, the nation's 13th president, who built the Millard Fillmore House while a country lawyer. The village is the birthplace of the Roycroft Arts & Crafts movement and home to Fisher-Price Toys. During the late 1800s and early 1900s, East Aurora was a very popular place for horse races in New York State. The most famous track in East Aurora, the Jewett Farm track was an innovative, one-of-a-kind track at that time. (Town of Aurora/ Village of East Aurora 2012)

According to the U.S. Census, the 2010 population for the Village of East Aurora was 6,236. The estimated 2019 population was 6,184, a nearly zero percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.0 percent of the population is 5 years of age or younger and 23.4 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.19.3 Jurisdictional Capability Assessment and Integration

The Village of East Aurora performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.19.3). The Village of East Aurora's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Village of East Aurora. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.19-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 108 Building Construction and Fire Prevention, Adopted 2020	Local	Code Enforcement
Comment: *This article shall provide for administration and enforcement of the New York State Uniform Fire Prevention and Building Code (Uniform Code) in the Village of East Aurora. This article is adopted pursuant to § 10 of Article 2 of the Municipal Home Rule Law. Except as otherwise provided within this article, state law, or within the Uniform Code, all premises regardless of use are subject to the provisions which follow.*					
Zoning Code	Yes	No	Chapter 285 of the East Aurora Village Code	Local	Code Enforcement
Comment: The goals and intent of the zoning ordinance are as follows: 1) The design of off-street parking and loading spaces shall be graded so as to provide for the proper mitigation of stormwater and runoff. 2) The landscape plan shall delineate the location and description of all existing and proposed trees, shrubs, and plantings. To ensure proper protection of plantings and planted areas, landscape materials to be used on the site shall be identified in a planting schedule to be included on the landscape plan with the following information: Type; Common and botanical names; size; quantity; and pit or bed treatment. 3) The location of all existing and proposed topography features, including, but not limited to, site grading, open spaces, woodlands, watercourses, steep slopes, wetlands, floodplains, and watersheds.					

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Subdivision Ordinance	Yes	No	Chapter 227 Subdivision of Land Amended 2020	Local	Village Board
Comment: The guidance and intent of the subdivision ordinance are as follows: 1) Where a subdivision is traversed by a watercourse, drainageway, channel or stream, there shall be provided a stormwater easement or drainage right-of-way conforming substantially with the lines of such watercourse and of such further width or construction, or both, as will be adequate for the purpose. Adequacy will be determined by the village board.					
Stormwater Management Ordinance	Yes	Yes	Chapter 220 Stormwater Management, Updated 2019	Local	Stormwater Management Officer
Comment: 1) Use of separate storm sewers and sanitary sewers is mandatory for all future construction in the village. Construction of combined sewers will not be allowed. 2) No person shall make connection of roof downspouts, exterior foundation drains, areaway drains or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.					
Post-Disaster Recovery Ordinance	No	-	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment:					
Growth Management	No	-	-	-	-
Comment:					
Site Plan Review	Yes	No	Chapter 285 of the East Aurora Village Code	-	Village Board
Comment: *The intent of the site plan review process is to preserve and enhance the character of a neighborhood, achieve compatibility with adjacent development, mitigate potentially negative impacts on traffic, parking, drainage, and similar environmental concerns, improve the overall visual and aesthetic quality of the Village, and increase the capability of the Zoning Code to adapt to a variety of unique circumstances.*					
Environmental Protection Ordinance	Yes	No	LL7-2019 – Environmental Review Process.	Local	-
Comment: The goals of the Environmental Protection Law are as follows: 1) Discourage the use of non-compostable plastic beverage straws and stirrers by banning their use by food service establishments using non-compostable plastic straws and stir sticks, which furthers the village's goal of reducing nonbiodegradable litter and protecting the village's important natural resources.					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 142 of the East Aurora Village Code	Local	Floodplain Administrator
Comment: *It is the purpose of this chapter to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* *F. Qualify and maintain for participation in the National Flood Insurance Program.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Chapter 220 of the East Aurora Village Stormwater Code	Local	Village Engineer
Comment: Stormwater carries sediment, oil, grease, nitrogen, phosphorus, and other pollutants into storm drains and then, untreated, into nearby waterbodies. MS4 regulated municipalities such as East Aurora must prepare and implement a stormwater management program to comply with state and federal stormwater regulations.					
Emergency Management Ordinance	No	-	-	-	-

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: 1) The five municipalities will establish a regional comprehensive plan implementation committee to monitor future planning actions and provide continuing input and updates into the regional plan. 2) Implement site clearance standards, wetland protection regulations and erosion and sediment control measures. 3) Create zoning overlay districts to protect natural features. 4) Adoption of local wetland regulations to protect State and Federal wetlands. 5) Require and enforce the use of erosion and sediment control for all new development and redevelopment. Adopt setback standards to establish vegetated buffer areas along creek corridors to prevent erosion. 6) Communities in the region should pursue joint efforts (grant applications, pooling resources, joint studies, joint environmental conservation committees, etc.) as a unique and useful strategy for preserving and protecting resources and addressing other cross-jurisdictional environmental problems. 7) Prepare open space plans to identify and prioritize important environmental features such as wetlands, floodplains, steep slopes, and watersheds.

Development and Permitting Capability

The table below summarizes the capabilities of the Village of East Aurora to oversee and track development.

Table 9.19-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	Village Board approval
Are permits tracked by hazard area? (For example, floodplain development permits.)	No	-
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	There are several large parcels zoned commercial and residential available for development.

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Village of East Aurora and their current responsibilities which contribute to hazard mitigation.

Table 9.19-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Commission - The Village Planning Commission was originally established by village board resolution on February 22, 1926 pursuant to Article 12A of General Municipal Law. Members of the planning commission are appointed by the Mayor and Village Board; each of the members serve a staggered three term. Duties include the review of development plans, special permits and other special projects referred to the commission by the Village Board. A statute adopted by the New York State Legislature, effective January 1, 2007, requires that that members of planning boards and commissions and zoning board of appeals receive a minimum of four hours of training per year.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Zoning Board of Adjustments	Yes	Zoning Board of Appeals - Generally, the primary purpose of the ZBA is to hold public hearings and render decisions on applications seeking relief from the Village Zoning Ordinance. Specific duties and permitted actions by the ZBA are defined under §285-68 of the East Aurora Village Code, as well as Village Law §7-712-B. Each of the five Zoning Board of Appeals members serves a five-year term (staggered). Appointments are made by the Mayor with the approval of the Village Board of Trustees. New York State Law requires that ZBA members receive a minimum of four hours of training per year. Training must be completed in order for members to be eligible for reappointment.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Planning Commission and new Environmental Stewardship Committee - The East Aurora Environmental Stewardship Advisory Committee is a citizen advisory group comprised of students, residents, businesses, and government representatives. Our mission is to act in good faith and integrity for the stewardship of our planet and all its inhabitants for today and for future generations. Through a thoughtful and respectful exchange of ideas, we will help educate residents and propose ideas and practices to Village leaders regarding sustainability and environmental matters to achieve zero waste and climate action.
Open Space Board/Committee	No	-
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The department conducts various work on local infrastructure related projects
Construction/Building/Code Enforcement Department	Yes	The Building Department serves the Town of Aurora along with the Village of East Aurora. The department handles complaints for both zoning and property maintenance issues, conducts fire inspections, and enforces building and energy code regulations as well as zoning regulations of the municipalities. The department completes plan reviews and inspections on all permits to ensure compliance with the 2020 New York State codes, and the Town of Aurora and Village of East Aurora zoning ordinances. The daily goal of the department is to ensure that all ordinances handled by this office are enforced as fairly and efficiently as possible.
Emergency Management/Public Safety Department	No	-
Warning Systems / Services (mass notification system, outdoor warning signals)	Some	Use of County mass notification system
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW
Mutual aid agreements	Yes	DPW
Other	Yes	Tree Board and Historical Commission.- The board reviews all development projects and subdivision developments, and makes recommendations on all commercial, industrial, and business development. This board also makes recommendations regarding proposed changes to the ordinance and has assisted in the development of a master development plan for the town.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
		Zoning and development issues are handled through the Building and Code Enforcement Department.
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Consulting Firm
Engineers or professionals trained in building or infrastructure construction practices	Yes	Consulting Firm
Planners or engineers with an understanding of natural hazards	Yes	Consulting Firm
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	No	-
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	Yes	Code Enforcement Officer
Surveyor(s)	No	-
Emergency Manager	Yes	Emergency Manager
Grant writer(s)	No	-
Resilience Officer	No	-
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Village of East Aurora.

Table 9.19-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes – Very limited – seniors/handicapped
Capital improvements project funding	Limited
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas, or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	No
Stormwater utility fee	No
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	No
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Village of East Aurora.

Table 9.19-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Village Administrator
Personnel skilled or trained in website development	Yes	Village Administrator and Web Master and Consulting Firm
Hazard mitigation information available on your website	No	-
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	No	-
Other programs already in place that could be used to communicate hazard-related information	No	-
Warning systems for hazard events	Yes	Fire Hall outdoor signal; use of County mass notification system
Natural disaster/safety programs in place for schools	Yes	Each school has its own safety program
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Village of East Aurora.

Table 9.19-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	Yes	5	2011
Public Protection (ISO Fire Protection Classes 1 to 10)	Yes	4	2011
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event,

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.19-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Weak - NA
Cyber Attack	Moderate
Earthquake	Weak - NA
Expansive Soils	Strong
Extreme Temperature	Strong
Flood	Moderate
Hazardous Materials	Strong
Landslide	Strong
Pandemic	Strong
Severe Storm	Strong
Severe Winter Storm	Strong
Utility Failure	Strong
Wildfire	Moderate

**Strong Capacity exists and is in use*
Moderate Capacity may exist; but is not used or could use some improvement
Weak Capacity does not exist or could use substantial improvement

9.19.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

Bill Kramer, Floodplain Administrator

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Village of East Aurora.

Table 9.19-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Village of East Aurora	27	37	184,988	6	13

Source: FEMA 2020a, FEMA 2020b
RL Repetitive Loss; SRL Severe Repetitive Loss

Flood Vulnerability Summary

The village has flood prone areas along Tannery Brook from the east village line to Oakwood Avenue. There is no list of properties that have been damaged nor interested in flood mitigation. There are no RISK Map projects currently underway and the village has not made any substantial determinations. No properties have been mitigated, and the flood maps adequately address the flood prone areas in the village.

NFIP Compliance

The village relies on the Town of Aurora Code Enforcement office for floodplain management. The village does not have any certified floodplain managers (current NFIP Administrator not certified) nor does the municipality

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

have adequate resources to address climate change. The village would like to have occasional training in basics of floodplain management to keep staff informed and refreshed. The NFIP administrator conducts permit review and determines substantial mitigation improvement by reviewing plans and code information. The village does not have any barriers to running the NFIP program and does not have any outstanding violations. The village had a CAV on April 22, 2020. The flood damage prevention ordinance is Chapter 142 of the village code. Last amended September of 2019. The village program meets the program requirements of the NFIP and does not have any additional ordinances or programs that support the program. The village is not interested in participating in the CRS program at this time.

9.19.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Evacuation Routes and Procedures

Procedurally, East Aurora Police will ensure orderly traffic flow for any evacuation and may be supplemented by personnel from the village DPW and the East Aurora Fire Department. Main evacuation routes include Route 20A, Route 400, Route 16, Route 78, Route 241, and Route 33.

Sheltering

The Village of East Aurora has identified the following designated emergency shelters within the village.

Table 9.19-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Senior Center	101 King Street	100	No	Yes	Yes	None	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Village of East Aurora has identified the following sites suitable for placing temporary housing units.

Table 9.19-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code	Ownership
Parking lot/fields	1003 Center Street	50-100 spots	Parking lot/fields	All	None	EAUF School District
Park	Emery Road east of Underhill	20-30 spots	Park	All	None	Erie County
Baseball fields	300 Gleed Avenue	50-100 spots	Baseball fields	All	None	Town of Aurora

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code	Ownership
Park	736 Warren Drive	50-100 spots	Park	All	None	Town of Aurora
Park	401 West Falls Road	50-100 spots	Park	All	None	Town of Aurora
Park	Buffalo Road west of village line;	50-100 spots	Park	All	None	NYS Office of Parks
Park	Knox Road west of village line; south side of road	50-100 spots	Park	Electric and Gas	None	NYS Office of Parks - managed by Town of Aurora
Field	Girard Avenue at Buffalo Road	50-100 spots	Field	All	None	Fisher Price Inc./Mattel
Parking lot/field	141 Girard Avenue	50-100 spots	Parking lot/field	All	None	EAUF School District

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The village would rely on County, State and Federal guidance, along with Red Cross and FEMA guidance, as to where to place temporary and/or permanent housing units in the event of an occurrence that would require these units. The village believes it should not designate a site that is not owned by the village i.e., school grounds, private property, county property or state property. Most of the large tracts of land that would/could accommodate the units are village, County or State parks. Water, gas, and electric are available at the road throughout most of the Village of East Aurora. Public sewer is available in limited areas that are already developed with residential housing. The location of private septic systems is a function of the Erie County Health Department.

Table 9.19-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Field	Girard Avenue at Buffalo Road	50-100 spots	Field	All	None

9.19.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.19-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.19-13. Recent and Expected Future Development

9.19.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Village of East Aurora's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Village of East Aurora has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Village of East Aurora's history of federally declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.19-14 provides details regarding municipal-specific loss and damages the village experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.19-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 1-9, 2015	Lake-effect Snow	Yes	A strong clipper crossed the Great Lakes and brought snow and blowing snow to the region and some of the coldest air of the season. The snowfall amounts were enhanced downwind of Lake Ontario and upslope east of Lake Erie where snowfall amounts around a foot were recorded. Gusty winds accompanied the system and produced reduced visibilities in blowing snow.	Although the County was impacted, the village did not report impacts.
August 11-15, 2015	Flash Flood	Yes	Showers and thunderstorms developed along the leading edge of a well-defined shortwave moving from Southern Ontario into Western New York. The storms moved across southern Erie county and rapidly intensified. Instantaneous rainfall rates of four to six inches and hour were observed on radar. Actual measure amounts were around two inches, however than rain fell in less than a half hour. The intense rainfall rates combined with steepening terrain along the edge of the Boston Hills produced significant flash flooding in the vicinity of Boston, Colden, and Glenwood. Numerous homes were flooded along Boston State Road along Eighteen Mile Creek.	Although the County was impacted, the village did not report impacts.
October 28-29, 2015	High Wind	Yes	Strong southwest winds developed in the wake of the system on Wednesday the 28th. Winds gusts were measured to 69 mph at Fort Drum and 62 mph at Dunkirk. The strong winds downed trees and power lines. Damage was reported in Dunkirk and Lacona. Roads were blocked by downed trees and wires in Forestville, Sardinia, Cheektowaga, and South Wales.	Although the County was impacted, the village did not report impacts.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
November 6, 2015	Thunderstorm Wind	Yes	A line of thunderstorms accompanied a sharp cold front during the late morning hours. The thunderstorms produced a wind gust that downed a 120-foot light standard at the downtown ballpark. The light standard destroyed a nearby parked car.	Although the County was impacted, the village did not report impacts.
November 12, 2015	High Wind	Yes	A strong cold front crossed the region around noon. This was followed by a period of strong winds to the lee of Lakes Erie and Ontario. Wind gusts were measured to 60 mph. The winds downed trees and power lines with scattered power outages reported. Several roads were blocked by fallen trees. Specific damage locations in the City of Buffalo included Fulton, Hayward, Tacoma, and Shoshone Streets. In Evans Center, a tree knocked down by the wind sheared off a gas line to a home then struck a car. In Niagara County, trees were downed on wires on Forest and Chew Roads in Lewiston. In Adams, a tree took down power lines then landed on a truck.	Although the County was impacted, the village did not report impacts.
November 18, 2015	High Wind	Yes	Behind a departing area of high pressure, a deep low-pressure system moved from the Plains towards James Bay. A strong southeast downslope flow developed along the Lake Erie shoreline. Wind gusts were measured to 63 mph at Dunkirk. In Brant, Route 249 was closed by downed trees and power lines. In Sheridan and Silver Creek, a portion of Route 5 was also closed by downed power lines.	Although the County was impacted, the village did not report impacts.
January 11, 2017	High Wind	Yes	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured to 64 mph at Dunkirk, Batavia, and Niagara Falls Airport. Other wind gusts included: 60 mph at Buffalo Airport and 58 mph at Fort Drum and Rochester Airport. The strong winds downed trees and power lines. Several thousand customers were without power. Numerous roads were closed because they were blocked by fallen trees. Structural damage was reported in Buffalo and Cheektowaga as roofs were blown off the Buffalo Motor and Generator Corporation and the gymnasium of a school. There was also damage reported to several home and cars caused by falling trees. The	Yes – approx.. $400 DPW labor costs

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			Skyway in Buffalo was closed for several hours due to the wind conditions making travel on the elevated span unsafe.	
March 8, 2017	High Wind	Yes	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph. A significant amount of damage resulted with hundreds of thousands left without power	Yes – approx. $1,400 DPW labor costs
March 13, 2017	Winter Storm	Yes	Low pressure over the Great Lakes combined with low pressure lifting north along the Atlantic coast to bring significant snowfall to the entire region. Snow began across the region during the late evening into the early overnight hours of the 13th-14th. The snow continued through the day Tuesday (14th) before tapering off during the afternoon of the 15th. Most schools and some businesses closed on Tuesday. Snowfall records were set at Buffalo and Rochester.	Yes – approx. $2,800 DPW labor costs
July 20, 2017	Tornado	Yes	A nearly stationary frontal zone was located just to the north of the area over far southern Ontario, Canada. A weak wave of low pressure tied to a cluster of thunderstorms moved east along this stalled frontal zone during the late morning and early afternoon. The storms moved onshore from Lake Erie with damage beginning in Hamburg before moving across Orchard Park. Windows of hundreds of car windows were blown out at the Hamburg Fairgrounds where trees were downed and several buildings including the Grandstand sustained damage.	Although the County was impacted, the village did not report impacts.
August 4, 2017	Thunderstorm Wind	Yes	Showers and thunderstorms developed along and ahead of an advancing cold front. The thunderstorms produced damaging winds that downed trees and power lines. In Buffalo, the winds partially tore the roof off a building at Utica Street and Massachusetts Avenue. In Weedsport, a trampoline was lifted and landed on a house. The thunderstorms also produced hail up to one inch in diameter near Adams.	Although the County was impacted, the village did not report impacts.
December 10-15, 2017	Lake-effect Snow	Yes	Cold air deepened over the eastern Great Lakes with heavy lake snows developing east of Lakes Erie and Ontario. The wind direction was	Yes – approx. $17,000 DPW labor costs

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			from the west-southwest for most of the event, directing the heaviest snow into the nearby Buffalo Southtowns off Lake Erie, and areas just south and east of Watertown off Lake Ontario.	
December 24-29, 2017	Lake-effect Snow	Yes	Lake effect snow developed early Christmas morning and continued continuously for about 72 hours, before diminishing late in the day on Wednesday the 27th	The village included approximately $6,500 in DPW labor costs.
January 2, 2018	Blizzard	Yes	This storm was a rare lake effect blizzard, producing a period of blizzard conditions northeast of Lakes Erie and Ontario. A strong pressure gradient developed between a strong high over the Ohio Valley and low pressure just north of the Great Lakes on the 2nd with wind gusts of 40 to 50 mph northeast of Lakes Erie and Ontario.	The village included approximately $1,200 in DPW labor costs.
October 6, 2018	Lightning	Yes	A weakening surface low tracked northeast across Lake Huron during the afternoon hours with its corresponding warm front extending to the east across Lake Ontario then snaking south ahead of the higher terrain east of Syracuse. This placed all of western New York within the warm sector of the aforementioned storm system.	Although the County was impacted, the village did not report impacts.
February 24, 2019	High Wind	Yes	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds. The track of the strong surface low was a classic high wind track for our region.	Although the County was impacted, the village did not report impacts.
February 24, 2019	Lakeshore Flooding	Yes	Low pressure over the central Plains rapidly deepened as it moved into the central Great Lakes, ending up as a 970 mb low over western Quebec. A strong cold front trailing the low sliced through western New York trailing it and ushering in very gusty winds.	Although the County was impacted, the village did not report impacts.
October 27-November 1, 2019	Lakeshore Flooding DR-4472 NY	Yes	A strong cold frontal passage near midday flipped what was southeast flow around to the southwest abruptly and drove a lake seiche onto the eastern shores of Lake Erie. The combination of higher-than-normal water level on Lake Erie and the increase in water led to flooding along the New York shoreline of the	The event resulted in a need for brush chipping.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
			lake for a short period. Lake Erie peaked at Buffalo Harbor at 9.64 feet above low water datum. Water from the lake inundated Canalside in Downtown Buffalo and Route 5 at Hoover Beach. It also damaged the new pier at Dunkirk.	
October 31-November 1, 2019	High Wind DR-4472 NY	Yes	A deepening area of consolidated low pressure tracked from the north shoreline of Lake Erie to Toronto, and then along the northern shoreline of Lake Ontario Thursday evening, October 31st. This system brought recorded breaking Halloween rains to our region, damaging wind gusts, a large Lake Erie seiche, a smaller Lake Ontario seiche, and river flooding in the North Country	The event resulted in a need for brush chipping.
November 27, 2019	Lakeshore Flooding	Yes	Strong low pressure moved from the central Great Lakes to north of Lake Ontario. The trailing cold front entered western New York early in the afternoon of 11/27 and swept through later that evening. While the track of the surface low was very favorable, the event was atypical in that the surface low reached its maximum intensity across the western Great Lakes and filled quite rapidly by the time it passed to our north. Despite the weakening low, soundings were favorable for a warning criteria wind event across western New York, with 50-60 knots for a 3–5-hour period in the cold advection behind the cold front.	Although the County was impacted, the village did not report impacts.
January 12, 2020	Lakeshore Flooding	Yes	Post-frontal winds mixed well behind an early morning cold front. This brought wind gusts across much of western New York, especially along the Lake Erie shore, Buffalo, and Batavia area that exceeded 65 mph. Widespread non-thunderstorm wind damage was reported in all lakeshore counties from Monroe westward along Lake Ontario and all counties bordering Lake Erie, as well. High winds drove a seiche on Lake Erie, resulting in water flooding Route 5 in Hamburg, additional damage to the Dunkirk Pier and break wall, damage to the Buffalo break wall, and flooding in Canalside in downtown Buffalo. The seiche peaked the water level in Buffalo at 9.85 feet above low water datum.	Although the County was impacted, the village did not report impacts.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
January 18, 2020	Lakeshore Flooding	Yes	A relatively deep, progressive mid-level trough crossed southern Ontario and the Lower Great Lakes Saturday night and early Sunday, January 18-19. The associated weak surface low tracked across southern Ontario in the process with widespread mixed synoptic precipitation eventually giving way to disorganized lake snows by daybreak Sunday. As the cold air deepened and the cap rose to nearly 10,000 feet, multiple bands of moderate to occasionally heavy lake snow became established east of the lakes.	Although the County was impacted, the village did not report impacts.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Village of East Aurora's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Village of East Aurora. The Village of East Aurora has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the village indicated the following:

- Earthquakes have historically not been an issue for the community and will be re ranked from high to low.

Table 9.19-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Low	Low	Medium	Low	Low

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	Medium	High	High	High	High

Note: The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.19-16. Potential Flood Losses to Critical Facilities

Identified Issues

After review of the Village of East Aurora's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Village of East Aurora has identified the following vulnerabilities within their community:

- Tannery Brook has had continuous flooding issues.
- Stormwater rightsizing is needed across village.
- The village critical facilities lack backup power.
- The village recently moved into the town office - currently 2 generators on site – town owned senior center and shelter (one part of the building) is powered by generators, but not for the full municipal building. – would need additional generator but no room.
- The Village of East Aurora has a tree inventory that was developed in the early 2000s to manage the existing tree maintenance within the village. While the inventory is still used by the village DPW, it is outdated as trees have been cut and new ones have been planted since the last inventory and plan update was conducted. Additionally, because of the age of the plan, the information in the document is largely irrelevant and not as useful for the village when conducting annual tree maintenance.
- The village has continued issues around debris clogging stormwater infrastructure, causing subsequent flooding and drainage issues.
- The entire village stormwater infrastructure system is under-sized and can easily get overwhelmed with severe storms. With increasing extreme precipitation events like climate change, the village needs to increase resilience within its stormwater infrastructure.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

- The village comprehensive plan is outdated and therefore no longer useful to the village planning activities. With increasing population overall, however, the village would need to develop an economic development and climate change-related strategy to guarantee the further expansion and improvement of municipal services and life in general.
- The village has recently passed the resolution to become a climate smart community and would like to become a bronze or silver climate smart community.
- The Depew/ Lancaster Dam is located in the 100-year floodplain.
- Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims.

9.19.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.19-17. Status of Previous Mitigation Actions

Project #	Project	Hazard(s) Addressed	Brief Summary of the Original Problem	Responsible Party	Status (In Progress, Ongoing, No Progress, Complete)	Evaluation of Success (if project status is complete)		1. Next Steps Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
1	Nursing Home Vulnerability: Revise Emergency Response Plan	Flooding, Fire, HAZMAT	Not Identified	Emergency Management	Complete	Cost	Low	1. Discontinue 2. 3. Complete
						Level of Protection	Low	
						Damages Avoided; Evidence of Success	Flood and other hazard mitigation	
2	Nursing Home Vulnerability: Mitigate flooding potential along Tannery Brook	Flooding	Not Identified	Emergency Management	In Progress	Cost	-	1. Discontinue 2. 3. Currently in progress and will be complete before plan is over.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Village of East Aurora has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- The village has completed the Oakwood project to fix drainage issues along Oakwood Road to mitigate flooding.
- The village has spent approximately $45,000 to mitigate the spread of Ash Borer as well as Japanese knotweed within the village and the surrounding town.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Village of East Aurora participated in a mitigation action workshop in and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.19-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion	X			X	X		X			
Cyber Attack	X			X	X		X			
Earthquake	X			X	X		X			
Expansive Soils	X			X	X		X			
Extreme Temperature	X			X	X		X			
Flood	X	X	X	X	X	X	X	X		
Hazardous Materials	X			X	X		X			
Landslide	X			X	X		X			
Pandemic	X			X	X		X			
Severe Storm	X	X		X	X	X	X	X		
Severe Winter Storm	X	X		X	X	X	X	X		
Utility Failure	X	X		X	X	X	X			
Wildfire	X			X	X		X			

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.19-19 summarizes the comprehensive range of specific mitigation initiatives the Village of East Aurora would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.19-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Table 9.19-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. East Aurora -001	Village Generator Installation	1, 2	Flood Severe Storm Severe Winter Storm Utility Failure	**Problem**: -The village recently moved into the town office - currently 2 generators on site – town owned senior center and shelter (one part of the building) is powered by generators, but not for the full municipal building. – would need additional generator but no room. **Solution**: Conduct a structural assessment of municipal building to determine whether the generator can be located elsewhere besides outside. Potential locations proposed by the village are in the basement or on the roof. Once location is determined, the village or town engineer would need to determine the remaining backup power needed for the municipal office. Given the municipality purchased 2 new generators that power different parts of the building, the third generator would need to power the remaining office space during a severe storm event. All generators shall be installed after the assessment of the buildings are complete by the municipal engineer, which will be over multiple years once funding secured.	Yes	No	2 years	Town of Aurora DPW/ Village of East Aurora Engineer	$100,000	Continued operation	HMGP, Community Facilities Grant Program, Municipal budget	High	SIP	ES

Table 9.19-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. East Aurora -002	Tree Inventory/ Plan Update	1, 3, 4	Severe Storms, Severe Winter Storms	**Problem**: The Village of East Aurora has a tree inventory that was developed in the early 2000s to manage the existing tree maintenance within the village. While the inventory is still used by the village DPW, it is outdated as trees have been cut and new ones have been planted since the last inventory and plan update was conducted. Additionally, because of the age of the plan, the information in the document is largely irrelevant and not as useful for the village when conducting annual tree maintenance. **Solution**: Update the existing plan and inventory to include the most recent trees within the village. The village DPW shall take charge of implementing this project with oversight from the village planning committee. Additional assistance can be provided by the Soil and Water conservation District which could provide guidance as to what are the most up to date strategies in regard to tree maintenance. Additionally, the village would like to purchase a 75-foot-long tree maintenance truck to increase capacity around clean up after severe storms.	No	No	1 year	Village DPW and SWCD	$50k + $100k for truck	Reduced property damage from fallen trees	Tree Cities USA, Environmental Protection & Improvement Grants, Municipal Budget	High	LPR, NSP	NR

2022-V. East Aurora -003	Purchase Vacuum Truck	1, 2	Flood, Severe Storms	**Problem**: The village has continued issues around debris clogging stormwater infrastructure, causing subsequent flooding and drainage issues. **Solution**: The village would like to purchase a vacuum truck to facilitate the response to residents who are having stormwater drainage issues. By having this truck, the village would not have to conduct dredging (which takes a lot of time) and could respond quickly to residents complaining about their clogged stormwater infrastructure.	No	No	1 year	Village DPW	$150k	High	municipal budget	High	SIP	PR

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. East Aurora -004	Stormwater drainage infrastructure rightsizing.	2,3,4	Flood	**Problem**: The entire village stormwater infrastructure system is under-sized and can easily get overwhelmed with severe storms. With increasing extreme precipitation events like climate change, the village needs to increase resilience within its stormwater infrastructure. **Solution**: The village shall conduct a multi-phase project. The first phase would be to conduct a professional engineering study that evaluates the existing undersized stormwater infrastructure in the village and provide guidance and strategy as to how the municipality could increase overall capacity across the board. The study would need to be specific and provide specific, detailed location-based evacuations as to which pieces of infrastructure need to be upgraded. The second phase of the project would then for the village to apply for funding to implement the proposals given in the assessment study. This would likely be a multi-year/ multi-million-dollar project but would prepare the village to increase overall resilience in the long run.	No	No	5 years	Village DPW, Engineer, Village Board	High	High	BRIC, HMGP, FMA, New York State DEC/EFC Wastewater Infrastructure Engineering Planning Grant (EPG), Climate Smart Communities Grant	High	SIP	SP

Attachment: 58-Section-9.19-East-Aurora-V-093021 (RES-2022-375 : Authorizing Adoption of the 2022

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. East Aurora-005	Update village comprehensive plan	3, 4	All	**Problem**: The village comprehensive plan is outdated and therefore no longer useful to the village planning activities. With increasing population overall, however, the village would need to develop an economic development and climate change-related strategy to guarantee the further expansion and improvement of municipal services and life in general. **Solution**: The village would like to hire a consulting firm to conduct a comprehensive plan for the community. This would require applying for grant funding and developing strategy for future economic development and climate adaptation strategies.	No	No	Long	Village Board and Planning	$150k	New and improved comprehensive plan	NYS Climate Smart Communities	High	LPR	PR
2022-V. East Aurora-006	Becoming a bronze climate Smart community	All	All	**Problem:** The village has recently passed the resolution to become a climate smart community and would like to become a bronze or silver climate smart community. **Solution:** The village would like to execute actions suggested by the CSC program that range from greenhouse gas reduction to increasing climate resilience and preparedness. The village would need supplemental funding to execute some of these projects. To begin, the village would need to contact the NYSERDA regional coordinator who could provide guidance as to how to municipality can work towards becoming a Bronze certified climate smart community.	No	No	3 years	Village Board, NYSERDA	High	High	Climate Smart Communities Program, Clean Energy Communities Program, HMA	Medium	EAP	PI

Table 9.19-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-V. East Aurora -007	Dam Retrofitting	1, 2	Flood	**Problem:** The Depew/ Lancaster Dam is located in the 100-year floodplain. **Solution:** While it is not unusual for the dam to be located in a floodplain, it is necessary to conduct additional assessment and mitigation measures to make sure the dam is not vulnerable to operation failure. The Village DPW shall conduct an assessment of the dam and determine if the facility is retrofitted based on FEMA guidelines to withstand severe storms. If not, the village will apply for mitigation funding, accordingly.	Yes	No	2 years	Village DPW	Moderate	High	HMGP	High	SIP	SP
2022-V. East Aurora -008	Residential Property Flood Mitigation.	1	Flood	**Problem:** Frequent flooding events have resulted in damages to residential properties. These properties have been repetitively flooded as documented by paid NFIP claims. **Solution:** The town will work with the county to conduct outreach to flood-prone property owners, including RL/SRL property owners and provide information regarding mitigation alternatives. After preferred mitigation	No	No	Within 3 years	Town Board, FPA	TBD per cost and number of properties to be purchased.	Remove residents and homes from the flood threatened homes	BRIC, HMGP, FMA, cost share by homeowners	High	SIP	PP

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.20 Town of Eden

This section presents the jurisdictional annex for the Town of Eden. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Eden's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.20.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Eden's hazard mitigation plan primary and alternate points of contact. The Town of Eden followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many Town departments, including: Emergency Management, Highway Department, and Code Enforcement. The Town Emergency Manager represented the community on the Erie County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.20-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Brian Burgstahler, Emergency Manager Address: 2795 East Church Street, Eden, NY 14057 Phone Number: 716-525-2654 Email: emergencyservices@edenny.gov	Name/Title:Melissa Hartman, Town Supervisor Address: 2795 East Church Street, Eden, NY 14057 Phone Number: 716-992-3408 ext. 1 Email: mhartman@edenny.gov
NFIP Floodplain Administrator	
Name/Title: David Rice, Code Enforcement Official Address: 2795 East Church Street, Eden, NY 14057 Phone Number: 716-992-3408 ext. 2	
Additional Contributors	
Name/Title: Ron Maggs, Highway Supervisor Method of Participation: Provided data and information	

9.20.2 Municipal Profile

The Town of Eden is one of the county's "Southtowns", lying in the south-central part of the county. The Town of Eden is four square miles in area and was formed from a larger original town called Willink. Later, Eden surrendered territory to form the towns of Evans and Hamburg and is 40 square miles in size. The Town is bordered on the north by the Town of Hamburg, on the west by the Town of Evans, on the south by the Town of North Collins and on the east by the Town of Boston (Town of Eden website, accessed 2020). US Route 62 and NYS Route 75 traverse the town.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Deacon Samuel Tubbs was the first white settler to the town in 1808 (Town of Eden website, accessed 2020). Eden surrendered land was named "Hill's Corners" until 1822 at which point the first post office was established and the name changed to Eden. The productive farmland and the Eighteen Mile Creek made the area attractive for settlement. Through the 1800s Eden's three milling communities at Eden Valley, Toad Hollow and Clarksburg grew steadily. The expansion of rail lines served the town's farming and industrial business community (Town of Eden Comprehensive Plan, 2015).

According to the U.S. Census, the 2010 population for the Town of Eden was 7,688. The estimated 2019 population was 7,631, a nearly zero percent change from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 5.6 percent of the population is 5 years of age or younger and 18.2 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.20.3 Jurisdictional Capability Assessment and Integration

The Town of Eden performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6 (Mitigation Strategy) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.20.3). The Town of Eden's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Eden. The comment field provides information as to where hazard mitigation has been integrated.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	110 Building Construction	Local	Building Dept
Comment: NYS Uniform and Energy Code 2020; Regulated at local and state levels. The Uniform Code (19 NYCRR Parts 1219 to 1229) now includes the 2015 editions of the code books published by the International Code Council (the "2015 I-Codes"), as amended by the publication entitled the 2017 Uniform Code Supplement (publication date: July 2017).. Article 18 of the Executive Law (§§ 370 through 383) establishes the State Fire Prevention and Building Code Council, directs the Code Council to promulgate and maintain the Uniform Code, and charges each city, town, and village in the State (with the exception of the City of New York) with the duty of administering and enforcing the Uniform Code within its municipal boundaries.					
Zoning Code	Yes	Yes	225 Zoning	Local	Building Dept
Comment: Article IX, Section 2, of the State Constitution and by the various state enabling statutes. In New York, the zoning enabling acts continue to require that zoning be undertaken "in accord with a well-considered plan"11 or "in accordance with a comprehensive plan."12 Unless the town, city or village has adopted a comprehensive plan document using the more recently-enacted statutes (described later herein), local officials must refer to the extensive body of case law to determine how zoning can meet the more general "comprehensive plan" requirement.**May be impacted by State wetland regulations which protect wetlands greater than 12.4 acres and established buffer zones. Regulated at local level					
Subdivision Ordinance	Yes	No	184 Subdivision of Land	Local	Building Dept/Planning Board
Comment: Subdivision is defined in the State enabling Statutes as: the division of any parcel of land into a number of lots, blocks, or sites as specified in a local ordinance, law or regulation, with or without streets or highways, for the purpose of sale, transfer of ownership, or development. There is not a requirement by NYS for subdivisions. Each municipality is permitted to further define subdivision for its own purposes in connection with its subdivision review procedure. The enabling statutes provide that a plat showing a division of land which is subject to a municipality's subdivision regulations, may not also be subject to review under its site plan review authority. (general city law s. 32 & 33, Town Law s. 276 & 277, Village Law s. 7-728 & 7-730).					
Stormwater Management Ordinance	Yes	Yes	Western NY Storm water Coalition	Local	Highway Department
Comment: Codes Rules and Regulations of the State of New York, Title 6. Department of Environmental Conservation, Chapter X. Division of Water Resources, Subchapter A. General Article 3. State Pollutant Discharge Elimination System, Part 750. State Pollutant Discharge Elimination System(SPDES) Permits. New York Environmental Conservation Law, Article 17, Titles 7, 8 and Article 70. New development and redevelopment projects that result in a land disturbance of one acre or greater, including projects less than one acre if they are part of a larger common plan of development or sale or if controlling such activities in a particular watershed is require a permit by the Department					
Post-Disaster Recovery Ordinance	Yes	Yes	Disaster Emergency Plan 4/24/2012	Local	Supervisor
Comment: It is the objective of this guideline to give the residents in the Town of Eden a central location of information to assist them in preparing for different types of Disasters that may occur.					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: In addition to facing potential liability for failing to disclose under the exceptions to "caveat emptor," a home seller must make certain disclosures under the law or pay a credit of $500 to the buyer at closing. While the PCDA requires a seller to complete a standardized disclosure statement and deliver it to the buyer before the buyer signs the final purchase contract, in practice, most home sellers in New York opt not to complete the statement and instead pay the credit.					
Growth Management	Yes	Yes	Not Indicated	Local	Not Indicated
Comment: In New York State, virtually all land use regulation, which is the primarily tool for Smart Growth, takes place at the municipal level (i.e., in a city, village or town government). Land use planning is also primarily a municipal function. While State law provides for certain planning functions at the county or regional level, these mechanisms are largely advisory, whereas municipal planning is directly related to land use regulation.					
Site Plan Review	Yes	No		Local	Planning Board
Comment: The authority to require site plan review is derived from the State enabling Statutes (General City Law s. 27-a, Town Law s. 247a, Village Law s. 7-725a)The local legislative body has the power to delegate site plan review to the planning board, zoning board, etc. • The general standards and considerations when reviewing a site plan include; the adequacy of stormwater and drainage facilities; the adequacy, type and arrangement of trees, shrubs, and other landscaping constituting a visual and/or noise buffer between the applicant's and adjoining lands, including the maximum retention of existing vegetation; and Special attention to the adequacy and impact of structures, roadways, and landscaping in areas with susceptibility to ponding, flooding and/or erosion. • Where applicable, the Applicant must indicate measures and features to comply with flood hazard and flood insurance regulations.					
Environmental Protection Ordinance	No	-	-	-	-

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: New State Environmental Quality Review Act (SEQR) Title 6 NYCRR Part 617 Regulations are in effect as of January 1st, 2019					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 114, Flood Damage Prevention, adopted 4/10/2019	Local	Code Enforcement
Comment: A community must adopt a Flood Damage Prevention Ordinance to participate in the National Flood Insurance Program. • It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions. This is accomplished by elevating structures above the BFE. For residential structures within Zone A, when no base flood elevation data are available new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade. When BFE data are available, then an elevation of the base flood of two feet is required. For non-residential structures, new construction and substantial improvements of any non-residential structure, together with attendant utility and sanitary facilities, shall either: (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation.					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes	Western NY Stormwater Coalition	Local	Code Enforcement
Comment: This requires urbanized areas (local governments) to develop a stormwater management program that will reduce the amount of pollutants carried by stormwater during storm events to waterbodies to the "maximum extent practicable". The goal of the program is to improve water quality and recreational use of waterways. A Municipal Separate Storm Sewer Systems Permit, GP-0-15-003 is required.					
Emergency Management Ordinance	Yes	Yes	See disaster recovery above	Local	Highway Department
Comment: The development of the New York State Comprehensive Emergency Management Plan (CEMP) is required under NYS Executive Law, Article 2B.					
Climate Change Ordinance	No	-	-	-	-
Comment: The environmental conservation law was amended by adding ARTICLE 75 - CLIMATE CHANGE under Assembly Bill A. 8429 and Senate Bill S. 6599, dated June 18, 2019.					
Disaster Recovery Ordinance	No	-	-	-	-
Comment: None					
Disaster Reconstruction Ordinance	No	-	-	-	-
Comment: None					
Other	No	-	-	-	-
Comment: None					
Planning Documents					
Comprehensive Plan	Yes	Yes	Cultivate Eden 2018	Local	Supervisors Office
Comment: Optional under NYS Law, municipality may adopt a comprehensive plan or proceed through a planning process which has evolved based on case law. (Per State Legislature General City Law section 28a, Town Law s. 272a, Village Law s. 7-722) **May be impacted by State wetland regulations which protect wetlands greater than 12.4 acres and established buffer zones. Regulated at the local level					
Capital Improvement Plan	No	-	-	-	-
Comment: A local government can decide to adopt its capital plan pursuant to General Municipal Law Section 99-g.					
Disaster Debris Management Plan	No	-	-	-	-
Comment: Based on past experience with disaster management, it is apparent that local municipalities that have an Emergency Debris Management Plan in place are able to manage their emergency response in a more comprehensive and coordinated manner and are able to address recovery and clean up faster and more efficiently than those without plans. With that in mind, the Department developed an Emergency Management Plan Tool Kit. The NYSDEC (Department) strongly urges all municipal officials to conduct pre-disaster planning and prepare emergency debris management plans. The Department recommends that these plans should be reviewed and updated annually.					
Floodplain or Watershed Plan	No	-	-	-	-

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: The State Pollutant Discharge Elimination System (SPDES) permit program is a primary way the DOW implements its watershed protection and restoration activities.					
Stormwater Plan	Yes	Yes	November 2010	Local	Western New York Stormwater Coalition/ Town of Eden Highway
Comment: Local Authority - Could be an element of the Comprehensive Plan. There is a required planning process that must be followed when addressing stormwater management in regulated new development and redevelopment projects.					
Open Space Plan	No	-	-	-	-
Comment: Planning boards prepare or oversee the preparation of local comprehensive plans, which should include an open space element. The primary purpose of a local open space plan is to cause the important open lands in the community to be conserved for open space uses.					
Urban Water Management Plan	No	-	-	-	-
Comment: None					
Habitat Conservation Plan	No	-	-	-	-
Comment: Laws related to habit protection and biodiversity control the use and application of certain pesticides, demolition projects and clearing of vegetated areas. Identifying certain critical habitat areas could be included in the Comprehensive Plan. Critical Habitat is a part of certain State and Federal Permitting. The State had a Wildlife Action Plan requires to maintain eligibility for the State Wildlife Grant Program.					
Economic Development Plan	No	-	-	-	-
Comment: An Economic Development Plan may be prepared by a local government and be included or separate from the Comprehensive plan.**May be impacted by State wetland regulations which protect wetlands greater than 12.4 acres and established buffer zones.					
Shoreline Management Plan	N/A	-	-	-	-
Comment: Article 34, Environmental Conservation Law, Coastal Erosion Hazard Areas 6 NYCRR Part 505, Coastal Erosion Management Regulations					
Community Wildfire Protection Plan	No	-	-	-	-
Comment: Under the federal Farm Bill, every 10 years each state must submit a State Forest Action Plan to the U.S. Forest Service. The Plan must be approved by the State Forester, who in New York is the director of DEC's Division of Lands and Forests. The next update of the Plan must be submitted to the Forest Service by June 2020.					
Forest Management Plan	No	-	-	-	-
Comment: None					
Transportation Plan	No	-	-	-	-
Comment: None					
Climate Change /Resilience/ Sustainability Plan	No	-	-	-	-
Comment: None					
Agriculture Plan	Yes	No	Agricultural and Farmland Protection Plan 2008	Local	Supervisors Office
Comment: Municipalities may develop agricultural and farmland protection plans, in cooperation with cooperative extension and other organizations, including local farmers.					
Other (this could include a tourism plan, business development plan, etc.)	No	-	-	-	-
Comment: None					
Response/Recovery Planning					

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comprehensive Emergency Management Plan	Yes	No	Erie County CEMP	County	Erie County OEM
Comment: The development of the New York State Comprehensive Emergency Management Plan (CEMP) is required under NYS Executive Law, Article 2B. The plan is developed and maintained by the New York State Office of Emergency Management and agencies that comprise the NYS Disaster Preparedness Commission (DPC).					
Strategic Recovery Planning Report	No	-	-	-	-
Comment:					
Threat & Hazard Identification & Risk Assessment (THIRA)	No	-	-	-	-
Comment: HIRA is an annual requirement that all states must complete to remain eligible to receive federal homeland security grant funding. It also involves a hazard and capability assessment but DHSES has several methodological concerns with the THIRA process and has developed CEPA to serve as the State's system to capture and analyze hazard/capability information. However, CEPA has been engineered to support the completion of the THIRA.					
Post-Disaster Recovery Plan	No	-	-	-	-
Comment:					
Continuity of Operations Plan	No	-	-	-	-
Comment: According to the FEMA, "State and local governments should consider developing or updating contingency plans for the continuity of operations (COOP) of vital government functions. Jurisdictions must be prepared to continue their minimum essential functions throughout the spectrum of possible threats from natural disasters through acts of terrorism. COOP planning facilitates the performance of State and local government and services during an emergency that may disrupt normal operations.					
Public Health Plan	No	-	-	-	-
Comment:					
Other	No	-	-	-	-
Comment:					

Development and Permitting Capability

The table below summarizes the capabilities of the Town of Eden to oversee and track development.

Table 9.20-3. Development and Permitting Capability

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	This is tracked with town building permits
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	This is tracked with town building permits
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	No	-

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Eden and their current responsibilities which contribute to hazard mitigation.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	Planning Board. Follow Master Plan with improvements in the town
Zoning Board of Adjustments	Yes	Zoning Board of Adjustments. Adjust the Zoning Code if needed
Planning Department	Yes	Building Department and Planning consultant
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Conservation Board
Open Space Board/Committee	Yes	Conservation Board
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	Highway Superintendent
Construction/Building/Code Enforcement Department	Yes	Building Construction and Code Enforcement
Emergency Management/Public Safety Department	Yes	Emergency Coordinator
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	Code Red and Outdoor warning signals
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	Highway Department and Off-road Drainage Committee
Mutual aid agreements	Yes	State, County, multiple surrounding towns
Other	No	-
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	Yes	Engineering and planning consultants
Engineers or professionals trained in building or infrastructure construction practices	Yes	Engineering and planning consultants
Planners or engineers with an understanding of natural hazards	Yes	Engineering and planning consultants
Staff with expertise or training in benefit/cost analysis	Yes	County
Professionals trained in conducting damage assessments	Yes	Highway and Consultants
Personnel skilled or trained in GIS and/or Hazards United States (HAZUS) – Multi-Hazards (MH) applications	Yes	Highway and GIS Consultant
Scientist familiar with natural hazards	No	-
NFIP Floodplain Administrator (FPA)	No	-
Surveyor(s)	No	-
Emergency Manager	Yes	EM Office
Grant writer(s)	Yes	Consultants
Resilience Officer	No	-

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Other (this could include stormwater engineer, environmental specialist, etc.)	No	-

Fiscal Capability

The table below summarizes financial resources available to the Town of Eden.

Table 9.20-5. Fiscal Capabilities

Financial Resources	Accessible or Eligible to Use? (Yes/No)
Community development Block Grants (CDBG, CDBG-DR)	Yes
Capital improvements project funding	Yes
Authority to levy taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater utility fee	Unknown
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state Funding Programs	Yes
Open Space Acquisition funding programs	No
Other (for example, Clean Water Act 319 Grants [Nonpoint Source Pollution])	No

Education and Outreach Capability

The table below summarizes the education and outreach resources available to the Town of Eden.

Table 9.20-6. Education and Outreach Capabilities

Outreach Resources	Available? (Yes/No)	Comment:
Public information officer or communications office	Yes	Supervisor
Personnel skilled or trained in website development	Yes	Consultant
Hazard mitigation information available on your website	Yes	Highway Superintendent
Social media for hazard mitigation education and outreach	No	-
Citizen boards or commissions that address issues related to hazard mitigation	Yes	Emergency Management team
Other programs already in place that could be used to communicate hazard-related information	Yes	Emergency Management

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Outreach Resources	Available? (Yes/No)	Comment:
Warning systems for hazard events	Yes	Code Red
Natural disaster/safety programs in place for schools	Yes	Eden Central Schools
Other	No	-

Community Classifications

The table below summarizes classifications for community programs available to the Town of Eden.

Table 9.20-7. Community Classifications

Program	Participating? (Yes/No)	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	-	-
Building Code Effectiveness Grading Schedule (BCEGS)	No	-	-
Public Protection (ISO Fire Protection Classes 1 to 10)	No	-	-
NYSDEC Climate Smart Community	No	-	-
Storm Ready Certification	No	-	-
Firewise Communities classification	No	-	-
Other	No	-	-

Note:
N/A *Not applicable*
NP *Not participating*
- *Unavailable*

Adaptive Capacity

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current capabilities to adjust to, protect from, or withstand a future hazard event, future conditions, and changing risk. The table below summarizes the adaptive capacity for each hazard of concern and the jurisdiction's rating.

Table 9.20-8. Adaptive Capacity

Hazard	Adaptive Capacity - Strong/Moderate/Weak*
Coastal Erosion	Moderate
Cyber Attack	Moderate
Earthquake	Moderate
Expansive Soils	Moderate
Extreme Temperature	Moderate
Flood	Moderate
Hazardous Materials	Moderate
Landslide	Moderate
Pandemic	Moderate
Severe Storm	Moderate
Severe Winter Storm	Strong
Utility Failure	Moderate
Wildfire	Moderate

**Strong* *Capacity exists and is in use*

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Moderate *Capacity may exist; but is not used or could use some improvement*
Weak *Capacity does not exist or could use substantial improvement*

9.20.4 National Flood Insurance Program (NFIP) Compliance

This section provides specific information on the management and regulation of the regulatory floodplain, including current and future compliance with the NFIP.

NFIP Floodplain Administrator (FPA)

David Rice, Code Enforcement Officer

National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Eden.

Table 9.20-9. NFIP Summary

Municipality	# Policies	# Claims (Losses)	Total Loss Payments	# RL Properties	# Policies in the 1% Flood Boundary
Town of Eden	4	6	$35,311	2	0

Source: *FEMA, 2019*
Notes: *Policies, claims, repetitive loss, and severe repetitive loss statistics provided by FEMA Region 2, and current as of July 31, 2019. The total number of repetitive loss properties does not include severe repetitive loss properties. SRL property information was not included in the available data set.*
RL *Repetitive Loss; SRL* *Severe Repetitive Loss*

Flood Vulnerability Summary

There are no areas prone to flooding or floodplains within the Town. Therefore, the town does not maintain a list of property owners that are interested in flood mitigation projects, nor are there any RiskMAP projects currently underway. The flood hazard maps for the Town adequately address the flood risk. There have been zero homes that have previously been mitigated against flood damages. The Code Enforcement Officer makes Substantial Damage determinations based on if the repair cost of a home is 50 percent or more of the market value, excluding land.

NFIP Compliance

The Town of Eden Code Enforcement Officer is responsible for floodplain management within the Town. There are no certified floodplain managers within the Town, but floodplain management staff are open to any training or assistance available.

Chapter 114 (Local Law 2-2019) of the Town of Eden Code refers to the Flood Damage Prevention Ordinance, which meets minimum requirements. The FDPO was most recently updated on April 10, 2019. The Town Planning Board and ZBA review floodplain areas in order to supports floodplain management and discourage development within flood-prone areas.

There are no outstanding NFIP compliance issues within the Town.

9.20.5 Evacuation, Sheltering, Temporary Housing, and Permanent Housing

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Evacuation Routes and Procedures

The Town of Eden has identified the following routes and procedures to evacuate residents prior to and during an event.

- US 20, 62 & 75, Northbound and Southbound
- East Eden Road, Northbound and Southbound
- East and West Church Streets, Eastbound and Westbound
- Shadagee Road, Eastbound and Westbound

Sheltering

The Town of Eden has identified the following designated emergency shelters within the Town.

Table 9.20-10. Designated Emergency Shelters

Site Name	Address	Capacity	Accommodates Pets?	ADA Compliant?	Backup Power?	Types of Medical Services Provided	Other Services Provided
Eden JR/SR HS	3000 Schoolview Rd Eden NY 14057	250	Yes	Yes	Yes	None	None
Eden Town Hall	2795 East Church Street Eden NY 14057	40	Yes	Yes	Yes	None	None

Temporary Housing

Each jurisdiction must identify sites for the placement of temporary housing units to house residents displaced by a disaster. The Town of Eden has identified the following sites suitable for placing temporary housing units.

Table 9.20-11. Temporary Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Eden American Legion	2912 Legion Drive Eden NY 14057	40	FEMA Trailers	Fully outfitted for all utilities	None

Permanent Housing

Structures located in the regulatory floodplain may need to be relocated due to high flood risk or new properties must be built once severely damaged properties are demolished. Jurisdictions must identify suitable sites currently owned by the jurisdiction and potential sites under private ownership that meet applicable local zoning requirements and floodplain laws. The Town of Eden has identified the following areas suitable for relocating homes outside of the floodplain.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-12. Permanent Housing Locations

Site Name	Site Address	Capacity (number of sites)	Type	Infrastructure / Utilities Available (water, electric, septic, etc.)	Actions Required to Ensure Conformance with the NYS Uniform Fire Prevention and Building Code
Evergreen Acres	Beverly Drive, Eden NY 14057	40	Empty lots staked out for housing	None. Utilities would have to be installed	Yes
Pleasant Ave and Weller Dr subdivision	Pleasant Ave and Weller Dr, Eden NY 14057	20	Empty lots staked out for housing	None. Utilities would have to be installed	Yes

9.20.6 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern. Table 9.20-13 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development.

Table 9.20-13. Recent and Expected Future Development

Type of Development	2015		2016		2017		2018		2019		2020	
Number of Building Permits for New Construction Issued Since the Previous HMP* (within regulatory floodplain/ Outside regulatory floodplain)												
	Total	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**	**Total**	**Within SFHA**

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

9.20.7 Jurisdictional Risk Assessment

The hazard profiles in Section 5 (Risk Assessment) provide detailed information regarding each plan participant's vulnerability to the identified hazards. Refer to Section 5.2 (Methodology and Tools) and Section 5.4 (Hazard Ranking) for a detailed summary for the Town of Eden's risk assessment results and data used to determine the hazard ranking discussed later in this section.

Hazard area extent and location maps were generated to illustrate the probable areas impacted within the jurisdiction. These maps are based on the best available data at the time of the preparation of this plan and are adequate for planning purposes. Maps have been generated only for those hazards that can be clearly identified using mapping techniques and technologies and for which the Town of Eden has significant exposure. The maps also show the location of potential new development, where available. These maps are illustrated below.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Hazard Event History

Erie County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities.

The Town of Eden's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Erie County. Table 9.20-14 provides details regarding municipal-specific loss and damages the Town experienced during hazard events since the last hazard mitigation plan update. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.20-14. Hazard Event History

Dates of Event	Event Type (Disaster Declaration if applicable)	County Designated?	Summary of Event	Municipal Summary of Damages and Losses
June 20, 2016	Thunderstorm Wind	No	A Thunderstorm developed ahead of an approaching cold front, producing winds exceeding 50 kts. Isolated storms caused damages southeast of the City of Buffalo, including reports of three quarter inch hail.	Law enforcement reported trees down by thunderstorm winds on Sisson Highway (NY-75), causing an estimated $10,000 in damages.
January 11, 2017	High Wind	No	Gusty winds accompanied the passage of a deepening storm system crossing the upper Great Lakes. Wind gusts were measured at 64 mph.	The Town of Eden Fire Department received 3 wind calls during the event, for minor damages.
March 8, 2017	High Wind	No	Unusually deep low pressure moved from northwest Ontario across Hudson Bay. The low brought strong winds to the entire region with sustained winds up to 49 mph and wind gusts as high as 81 mph.	The Town of Eden Fire Department received 9 wind calls, including a woman injured and trapped in car under tree.
December 6, 2017	Lake-Effect Snow	No	A cold front brought lake-effect snow across Lake Erie and Lake Ontario, resulting in heavy snow accumulation across Erie County.	An estimated 19 inches of snow were reported in the Town of Eden.
December 29, 2017	Lake Effect Snow	No	Bands of lake-effect snow developed throughout the afternoon, with snowfall rates reaching three inches per hour.	An estimated 22 inches of snow were reported in the Town of Eden.
January 12, 2018	Winter Storm	No	A winter storm brought a wintery mix of precipitation. Ice accumulations up to a tenth of an inch were reported along the lake shore counties. Heavy snow fell overnight, accumulating up to two inches per hour.	An estimated 10 inches of snow were reported in the Town of Eden.
March 1, 2018	Winter Storm	No	A low pressure storm brought heavy, wet snow, and increased wind speeds across the entire region, resulting in downed trees and wires.	An estimated 20 inches of snow were reported in the Town of Eden.
October 31-November 1, 2019	High Wind/Lakeshore Flooding DR-4472 NY	Yes	An intense storm system brining record breaking rains, damaging wind gusts, a large Lake Erie seiche and river flooding to the area. Over $5.5 million in damages to homes and property in Erie County alone was reported.	The Town of Eden Fire Department received 3 wind related calls during the event, for minor damages. There were an observed 1.88 inches of rainfall in the Town.

Hazard Ranking and Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Eden's risk assessment results and data used to determine the hazard ranking.

Hazard Ranking

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Erie County as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Eden. The Town of Eden has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the Town indicated the following:

- The Town of Eden Fire Departments have recently upgraded equipment and tanker trucks to hold more water in the event that they need to reach areas where water is not available. Due to this, risk for wildfire has been decreased to medium for the community.
- The Town indicated that they have an extensive list of residence that require oxygen, medicine, etc. If power is out for a long period of time, we can tend to their needs, through the Police, Fire departments as well as EMS. Due to this, risk for utility failure has been decreased to medium for the community.

Table 9.20-15. Hazard Ranking Input

Coastal Erosion	Cyber Attack	Earthquake	Expansive Soils	Extreme Temperature	Flood	Hazardous Materials
Low	Medium	Medium	Medium	Medium	Medium	Low

Landslide	Pandemic	Severe Storm	Severe Winter Storm	Utility Failure	Wildfire
Low	High	High	High	Medium	Medium

Note: *The scale is based on the hazard rankings established in Section 5.3 and modified as appropriate during review by the jurisdiction*

Critical Facilities

New York State Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at http://tinyurl.com/6-CRR-NY-502-4. While all vulnerabilities should

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 0.2-percent annual chance flood event, or worst damage scenario. For those that do not meet these criteria, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent and 0.2-percent floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.20-16. Potential Flood Losses to Critical Facilities

Name	Type	Exposure		Addressed by Proposed Action
		1% Event	0.2% Event	
Amos J Zittel Pond Dam	Dam	A	A	2022-T.Eden-002

Source: Effective DFIRM

Identified Issues

After review of the Town of Eden's hazard event history, hazard rankings, jurisdiction specific vulnerabilities, hazard area extent and location, and current capabilities, the Town of Eden has identified the following vulnerabilities within their community:

- Clarksburg Road
- East Pleasant Road
- Larkin Road

Specific areas of concern based on resident response to the Erie County Hazard Mitigation Citizen survey include:

- No Response Received

9.20.8 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

Past Mitigation Initiative Status

The following table indicates progress on the community's mitigation strategy identified in the 2015 HMP. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-17. Status of Previous Mitigation Actions

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Flood prevention of homes, businesses, and businesses	Flooding	Stormwater Management Office, Code Enforcement, Planning, Town Board and Conservation Board	Economic Loss	In Progress	Cost	No Cost	Include in 2022 HMP as 2022-T. Eden-001 to continue outreach and engagement with repetitive loss homeowners.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	Town code up to date	
-	Fire Structure Collapse	Fire, Structural Stability	Town Board	Death, Injury, Economic Loss	Complete	Cost	-	Completed, discontinue.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
-	Utility Failure	Not Identified	Town Board	Injury/Life Support, Death, Economic Loss	Complete	Cost	-	Completed, discontinue.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	
-	Update/revise floodplain management ordinances to comply with latest FEMA regulations	Flooding	Code Enforcement Officer	Not Identified	Complete	Cost	No Cost	Completed, discontinue.
						Level of Protection	Medium	
						Damages Avoided; Evidence of Success	Ordinance is up to date	
-	Designate/install a specific person to be your municipality's Floodplain Administrator	Flooding	Code Enforcement Officer, Stormwater Management Officer	Not Identified	Complete	Cost	-	Completed as of June 2021. The Town Building Inspector has been identified as the NFIP Floodplain Administrator.
						Level of Protection	-	
						Damages Avoided; Evidence of Success	-	

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Project #	Project Name	Hazard(s) Addressed	Responsible Party	Brief Summary of the Original Problem and the Solution (Project)	Status (In Progress, Ongoing Capability, No Progress, Complete)	Evaluation of Success (if complete)		Next Steps 1. Project to be included in 2022 HMP or Discontinue 2. If including action in the 2022 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why.
-	Update/revise floodplain management ordinances to be consistent with potential future new FIRMs	Flooding	Town Board	Not Identified	Ongoing Capability	Cost	-	Ongoing Capability, discontinue
						Level of Protection	-

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie

Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy

The Town of Eden has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2015 HMP:

- Erie County Soil and Water works to relieve flooding in the area by securing Resilient Farming Grants, and by reestablishing wetlands to reduce flood events.
- The Town of Eden EMS provides yearly CPR courses, as well as National Incident Management System (NIMS) Trainings, with all new members being required to take courses 100, 200, and 800. Eden EMS also provides monthly EMS training courses, with EMT/AMET/Paramedic courses offered though Erie County, and Utilizing Target Solutions for on-line training courses.

Proposed Hazard Mitigation Initiatives for the HMP Update

The Town of Eden participated in a mitigation action workshop in June 2021 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

The table below indicates the range of proposed mitigation action categories.

Table 9.20-18. Analysis of Mitigation Actions by Hazard and Category

	FEMA				CRS					
Hazard	LPR	SIP	NSP	EAP	PR	PP	PI	NR	SP	ES
Coastal Erosion										
Cyber Attack										
Earthquake										
Expansive Soils										
Extreme Temperature										
Flood		X				X			X	
Hazardous Materials										
Landslide										
Pandemic										
Severe Storm		X				X			X	
Severe Winter Storm		X				X			X	
Utility Failure										
Wildfire										

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

Table 9.20-19 summarizes the comprehensive range of specific mitigation initiatives the Town of Eden would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-20 provides a summary of the prioritization of all proposed mitigation initiatives for the HMP update.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Table 9.20-19. Proposed Hazard Mitigation Initiatives

Project Number	Project Name	Goals Met	Hazard(s) to be Mitigated	Description of Problem and Solution	Critical Facility (Yes/No)	EHP Issues	Estimated Timeline	Lead Agency	Estimated Costs	Estimated Benefits	Potential Funding Sources	Priority	Mitigation Category	CRS Category
2022-T. Eden-001	Repetitive Loss Property Outreach	1, 2, 3	Flood	**Problem**: There are 2 Repetitive Loss properties within the Town. **Solution**: The Town of Eden, supported by Erie County OEM, will work to notify all property owners with residences within the floodplain and support flood mitigation projects at these addresses. If interested, the Town will support grant applications, project development, and administrative tasks related to flood mitigation projects including retrofitting, hardening, and elevation as necessary.	No	No	6 months	Town of Eden Code Enforcement	Low	High	Municipal Budget	High	LPR, EAP	PI, PP
2022-T. Eden-002	Amos J Zittel Pond Dam Outreach	1, 2, 3	Flood	**Problem**: The Amos J Zittel Pond Dam is exposed to the 100-year SFHA (1% floodplain). **Solution**: The dam is privately owned and classified as a "low-hazard" class A dam. The Town will coordinate and conduct outreach with the owners of the dam's location within the floodplain and additional risk associated with the structure and support inspections of the dam as needed.	Yes	No	6 months	Town of Eden Code Enforcement	Low	High	Municipal Budget	High	EAP	PI
2022-T. Eden-003	Clarksburg Rd Culvert Replacement	1, 2	Flood, Severe Storm, Severe Winter Weather	**Problem**: Branches off of the South Branch Eighteen Mile Creek exacerbate flooding and road closures along Clarksburg Road. **Solution**: The Town of Eden Highway Department will upsize and replace a total of 7 culverts along Clarksburg Road where Eighteen Mile Creek crosses the road. 60' of 30" pipe will be used at each crossing, for a total of $10,500. Including fill, blacktop replacements and labor and equipment, total project cost will be $30,800. See	No	No	1 year	Town of Eden Highway Department	Medium, $30,800	High	NYSDOT, FEMA HMGP, CHIPS	High	SIP	SP, PP

BRIC	*Building Resilient Infrastructure and Communities Program*

Timeline:

The time required for completion of the project upon implementation

Cost:

The estimated cost for implementation.

Benefits:

A description of the estimated benefits, either quantitative and/or qualitative.

Critical Facility:

Yes *Critical Facility located in 1% floodplain*

Mitigation Category:

- *Local Plans and Regulations (LPR) – These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.*
- *Structure and Infrastructure Project (SIP) - These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area. This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.*
- *Natural Systems Protection (NSP) – These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.*
- *Education and Awareness Programs (EAP) – These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. These actions may also include participation in national programs, such as StormReady and Firewise Communities*

CRS Category:

- *Preventative Measures (PR) - Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.*
- *Property Protection (PP) - These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.*
- *Public Information (PI) - Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.*
- *Natural Resource Protection (NR) - Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.*
- *Structural Flood Control Projects (SP) - Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.*
- *Emergency Services (ES) - Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities*

9.20.9 Action Worksheets

The following action worksheets have been developed by the Town of Eden to aid in the submittal of grant applications to support the funding of high priority proposed actions.

Attachment: 59-Section-9.20-Eden-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Action Worksheet			
Project Name:	Clarksburg Rd Culvert Replacement		
Project Number:	2022-T. Eden-003		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Weather		
Description of the Problem:	Branches off of the South Branch Eighteen Mile Creek exacerbate flooding and road closures along Clarksburg road.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town of Eden Highway Department will upsize and replace a total of 7 culverts along Clarksburg Road where Eighteen Mile Creek crosses the road. 60' of 30" pipe will be used at each crossing, for a total of $10,500. Including fill, blacktop replacements and labor and equipment, total project cost will be $30,800. See Action Worksheet Below for images of locations and cost breakdown.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces flood risk
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$30,800	**Mitigation Action Type:**	SIP
Plan for Implementation			
Prioritization:	High	**Desired Timeframe for Implementation:**	6 months-1 year
Estimated Time Required for Project Implementation:	7 days	**Potential Funding Sources:**	NYSDOT, FEMA HMGP
Responsible Organization:	Town of Eden Highway Department	**Local Planning Mechanisms to be Used in Implementation if any:**	Hazard Mitigation Planning

Three Alternatives Considered (including No Action)			
Alternatives:	**Action**	**Estimated Cost**	**Evaluation**
	No Action	$0	Current problem continues
	Elevate entire roadway	$1 million	Not cost effective, too many crossings, would disrupt properties along the road
	Relocate roadway	N/A	Not feasible

Action Worksheet			
Project Name:	East Pleasant Rd Culvert Replacement		
Project Number:	2022-T. Eden-004		
Risk / Vulnerability			
Hazard(s) of Concern:	Flood, Severe Storm, Severe Winter Weather		
Description of the Problem:	**A** branch off of the South Branch Eighteen Mile Creek runs directly through a neighborhood development and an undersized culvert exacerbates flooding concerns and stormwater runoff and backflow onto properties in the area.		
Action or Project Intended for Implementation			
Description of the Solution:	The Town of Eden Highway Department will upsize and replace the culvert at East Pleasant Road where Eighteen Mile Creek crosses the roadway. A 42" and 12" culvert pipe, along with two catch basins will be installed, as per the Highway Department's recommendations and needs of the area. Including parts, fill, blacktop replacements and labor and equipment, total project cost will be $12,400. See Action Worksheet Below for images of location and cost breakdown.		
Is this project related to a Critical Facility?	Yes ☐	No ☒	
Is the critical facility located in the 1% annual chance flood area?	Yes ☐	No ☒	
(If yes, this project must intend to protect the 500-year flood event or the actual worse case damage scenario, whichever is greater)			
Level of Protection:	25 year storm	**Estimated Benefits (losses avoided):**	High, reduces flood risk
Useful Life:	30 years	**Goals Met:**	1, 2
Estimated Cost:	$12,400	**Mitigation Action Type:**	SIP

9.21 Town of Elma

This section presents the jurisdictional annex for the Town of Elma. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Elma's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

9.21.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Elma's hazard mitigation plan primary and alternate points of contact. The Town of Elma followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Supervisor, Deputy Supervisor/Councilman, and Town Engineer. The Supervisor represented the community on the Erie County Hazard Mitigation Plan Planning Partnership, and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

The following table summarizes municipal officials that participated in the development of the annex and in what capacity. Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meeting Documentation).

Table 9.21-1. Hazard Mitigation Planning Team

Primary Point of Contact	Alternate Point of Contact
Name/Title: Wayne A. Clark, Supervisor Address: 1600 Bowen Road Elma, NY 14059 Phone Number: (716) 652-3260 x7 Email: supervisor@elmanewyork.com	Name/Title: Michael Nolan, Deputy Supervisor/Councilman Address: 1600 Bowen Road Elma, NY 14059 Phone Number: (716) 998-4736 Email: mnolan@elmanewyork.com

Name/Title: Joseph Colern Jr., CEO Address: 1600 Bowen Road Elma, NY 14059 Phone Number: (716) 652-6779 Email: jim@stonymfg.com	

9.21.2 Municipal Profile

The Town of Elma is located in the south and center of Erie County. Elma is the county's youngest town, having incorporated in 1857. Elma is 36 square miles in size and was formed from portions of the towns of Aurora and Lancaster. The town contains the following hamlets; Blossom, East Elma, Elma Center, Elma Village, Jamison Road, and Springbrook. The area called "Big Flats" by the local Native Americans became Elma Village. The town is 35 square miles in size. The town is bounded on the west by the Towns of West Seneca and Orchard Park, on the south by the Town of Aurora, on the East by the Town of Marilla and on the north by the Town of Lancaster. US Route 20 and five separate NYS Routes pass through the Town of Elma. The Buffalo Creek traverses the town's northern tier (Town of Elma 2018).

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

White settlement of this area began in earnest after the Seneca Indians were removed from their reservation lands. White settled near creeks which were a source of power for the plentiful sawmills, grist mills and cider mills. As the woods were cleared, the rich soil yielded productive farm yields. Lumber, dairy products, and farm produce were shipped into Buffalo by rail. Today the town is characterized as a suburban mix (Town of Elma 2020).

According to the U.S. Census, the 2010 population for the Town of Elma was 11,317. The estimated 2019 population was 11,732, a 3.7 percent increase from the 2010 Census. Data from the 2019 U.S. Census American Community Survey indicate that 4.4 percent of the population is 5 years of age or younger and 23.2 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

9.21.3 Jurisdictional Capability Assessment and Integration

The Town of Elma performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of administrative and technical capabilities
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Classification under various community mitigation programs.
- The community's adaptive capacity to withstand hazard events.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in this Jurisdictional Capability Assessment (Section 9.21.3). The Town of Elma's identified opportunities for integration of mitigation concepts to be incorporated into municipal procedures are included in the updated mitigation strategy.

Planning, Legal, and Regulatory Capability and Integration

The table below summarizes the regulatory tools that are available to the Town of Elma. The comment field provides information as to where hazard mitigation has been integrated.

Table 9.21-2. Planning, Legal, and Regulatory Capability and Integration

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Codes, Ordinances, & Requirements					
Building Code	Yes	Yes	Chapter 52 (Building Construction); fully amended September 22, 1954	Local/State	Building Department
Comment: *It is the intent and purpose of this chapter to set certain minimum requirements for the construction of:* *A. New buildings for residential, commercial or industrial purposes.* *B. Additions to or conversions of existing buildings to be used for residential, commercial or industrial purposes in the Town of Elma.*					

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
The town has also adopted the State of New York Building Code and accepts the applicability of the State Building Construction Code for the Town of Elma of the County of Erie of the State of New York in accordance with the provisions of § 374-a of the Executive Law.					
Zoning Code	Yes	No	Chapter 144 (Zoning); 7-18-1950	Local	Building Department and Zoning Board
Comment: *Pursuant to the authority conferred by Article 16 of the Town Law of the State of New York and for each of the purposes specified therein, the Town Board of the Town of Elma, County of Erie and State of New York, has ordained and does hereby enact the following chapter regulating and restricting, by zones, the number of stories and size of buildings and other structures, the percentage of lot that may be occupied, the size of yards, courts and other open spaces, the density of population and the location and use of buildings, structures and land for trade, industry and residence and providing for setbacks and line clearances or other purposes. Such regulations shall apply to the Town of Elma.* *These regulations are made in accordance with a Comprehensive Plan and are designed to lessen congestion in the streets; to secure safety from fire, panic and other dangers; to promote health and general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; to facilitate the adequate provision of transportation, water, sewage, schools, parks and other public requirements.*					
Subdivision Ordinance	Yes	No	Chapter 123 (Subdivision of Land); amended July 19, 9189	Local	Planning Board and Town Board
Comment: *It is declared to be the policy of the Town of Elma Planning Board to consider land subdivision plats as part of a plan for the orderly, economic and efficient future growth and development of the Town. Whenever any subdivision of land is proposed, and before any contract for the sale of or any offer to sell any lots in such subdivision or any part thereof is made, and before any permit for the erection of any structure in such proposed subdivision shall be granted, the subdivider or his duly authorized agent shall apply, in writing, for approval of such proposed subdivision in accordance with the following procedures.*					
Stormwater Management Ordinance	Yes	Yes – for county	Chapter 120 (Stormwater Management); adopted by Local Law No. 2-2015	Local/State	Engineering
Comment: *The purpose of the stormwater management chapter is to stablish minimum stormwater management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing within this jurisdiction and to address the findings of §120-2A. The chapter's following objectives are as follows:* 1. *Meet the requirements of minimum measures four and five of the SPDES General Permit for Stormwater Discharges from Municipal Separate Storm Sewer Systems (MS4s), Permit No. GP-02-02, or as amended or revised;* 2. *Require land development activities to conform to the substantive requirements of the SPDES General Permit for Stormwater Discharges from Construction Activity, Permit No. GP-02-01, or as amended or revised;* 3. *Minimize increases in stormwater runoff from land development activities in order to reduce flooding, siltation, increases in stream temperature, and streambank erosion and maintain the integrity of stream channels;* 4. *Minimize increases in pollution caused by stormwater runoff from land development activities which would otherwise degrade local water quality;* 5. *Minimize the total annual volume of stormwater runoff which flows from any specific site during and following development to the maximum extent practicable; and* 6. *Reduce stormwater runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through stormwater management practices and ensure that these management practices are properly maintained and eliminate threats to public safety.*					
Post-Disaster Recovery Ordinance	No	No	-	-	-
Comment:					
Real Estate Disclosure	Yes	Yes	Property Condition Disclosure Act, NY Code - Article 14 §460-467	State	NYS Department of State, Real Estate Agent
Comment: *Property condition disclosure statement. 1. Except as is provided in section four hundred sixty-three of this article, every seller of residential real property pursuant to a real estate purchase contract shall complete and sign a property condition disclosure statement as prescribed by subdivision two of this section and cause it or a copy thereof, to be delivered to a buyer or buyer's agent prior to the signing by the buyer of a binding contract of sale. A copy of the property condition disclosure statement containing the signatures of both seller and buyer shall be attached to the real estate purchase contract. Nothing contained in this article or this disclosure statement is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".*					
Growth Management	No	No	-	-	-
Comment:					
Site Plan Review	Yes	Yes	Chapter 117 (Site Plan Review); adopted by Town Board on 4/16/1986	Local	Planning Board

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

	Jurisdiction has this? (Yes/No)	State Mandated? (Yes/No)	Code Citation and Date (code chapter, name of plan, date of plan)	Authority (local, county, state, federal)	Department / Agency Responsible
Comment: *Prior to the issuance of either a building permit or use permit in any zoning district, except for a one- or two-family dwelling, related accessory uses or agricultural uses permitted by right under this chapter and the Town of Elma Zoning Ordinance, the Building Inspector shall refer the permit applicant to the Planning Board for site plan consideration in accordance with § 274-a of the Town Law and the procedure and standards set forth in this chapter. The requirements for site plan review include the following: 1) A sketch plan shall include a map of site topography at no more than five-foot contour intervals. If general site grades exceed 5% or portions of the site have susceptibility to erosion, flooding or ponding, a soil overlay and a topographic map showing contour intervals of not more than two feet of elevation should additionally be provided. 2) In the preliminary site plan approval process, the planning board will pay special attention to the adequacy of structures, roadways and landscaping in areas with susceptibility to ponding, flooding and/or erosion.*					
Environmental Protection Ordinance	No	-	-	-	-
Comment:					
Flood Damage Prevention Ordinance	Yes	Yes	Chapter 82 (Flood Damage Prevention); adopted by Local Law No. 1-2019	Local	Code Enforcement Officer
Comment: *The Elma Town Board of the Town of Elma finds that the potential and/or actual damages from flooding and erosion may be a problem to the residents of the Town of Elma and that such damages may include: destruction or loss of private and public housing, damage to public facilities, both publicly and privately owned, and injury to and loss of human life. In order to minimize the threat of such damages and to achieve the purposes and objectives hereinafter set forth, this chapter was adopted. The purpose of this chapter is to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:* *A. Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;* *B. Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;* *C. Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters;* *D. Control filling, grading, dredging and other development which may increase erosion or flood damages;* *E. Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands; and* *F. Qualify for and maintain participation in the National Flood Insurance Program.* *The town enforces standards for structures in the floodplain. For residential structures, any new construction or substantial improvements in the SFHA must elevate the lowest floor at or above two feet above the BFE. For non-residential structures, any new construction or substantial improvements in the SFHA must have the lowest floor elevated to or above two feet above the BFE.*					
Municipal Separate Storm Sewer System (MS4)	Yes	Yes – for municipalities within metropolitan areas.	Chapter 115 (Sewers); adopted on 8/17/2005	Local	WWTP/Engineering/Building
Comment: *The general purpose of this chapter is to provide for efficient, economic, environmentally safe, and legal operation of the Town of Elma's publicly owned treatment works. Article 165 of this chapter discusses storm sewers. The purpose of this article is to provide for the health, safety, and general welfare of the citizens of the Town of Elma through the regulation of non-stormwater discharges to the MS4 to the maximum extent practicable as required by federal and state law. This article establishes methods for controlling the introduction of contaminants into the MS4 in order to comply with the requirements of the SPDES General Permit for Stormwater Discharges from MS4s, Permit No. GP-02-02.*

Planning Documents					
Comprehensive Plan	Yes	No	Regional Comprehensive Plan May 2003-4	Local	Planning Board – Intermunicipal Planning Commission
Comment: *The intent of the Regional Comprehensive Plan is to provide a regional planning document for the five communities. The town's goals of the plan are as follows:* • *Preserve the rural community character* • *Encourage orderly growth and development* • *Preserve and promote recreational opportunities* • *Provide for economic development* • *Protect significant environmental resources* • *Minimize the loss of remaining prime farmland soils to development.* • *Provide a safe and efficient transportation system* *The major goals of the plan are as follows: 1) The five municipalities will establish a regional comprehensive plan implementation committee to monitor future planning actions and provide continuing input and updates into the regional plan. 2) Implement site clearance standards, wetland protection regulations and erosion and sediment control measures. 3) Create zoning overlay districts to protect natural features. 4) Adoption of local wetland regulations to protect State and Federal wetlands. 5) Require and enforce the use of erosion and sediment control or all new development and redevelopment. Adopt setback standards to establish vegetated buffer areas along creek corridors to prevent erosion. 6) Communities in the region should pursue joint efforts (grant applications, pooling resources, joint studies, joint environmental conservation committees, etc.) as a unique and useful strategy for preserving and protecting resources and addressing other cross-jurisdictional environmental problems. 7) Prepare open space plans to identify and prioritize important environmental features such as wetlands, floodplains, steep slopes, and watersheds.*

Indicate if your jurisdiction implements the following	Yes/No	Comment:
Do you issue development permits? If yes, what department is responsible?	Yes	CEO
Are permits tracked by hazard area? (For example, floodplain development permits.)	Yes	Floodplain
Do you have a buildable land inventory? If yes, please describe If no, please quantitatively describe the level of buildout in the jurisdiction.	Yes	Pre-approved and compliance with chapter 100 town code

Administrative and Technical Capability

The table below summarizes potential staff and personnel resources available to the Town of Elma and their current responsibilities which contribute to hazard mitigation.

Table 9.21-4. Administrative and Technical Capabilities

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Administrative Capability		
Planning Board	Yes	The ultimate goal of this planning board is to ensure that the long-range planning and land use objectives of the community can be achieved. In New York State, through the state enabling legislation, municipal planning and land use controls are delegated to the local legislative body.
Zoning Board of Adjustments	Yes	The primary role of a zoning board is to review and decide cases where a relaxation of the ordinance is sought or where there is an alleged error in a zoning decision. The board seeks to correct all errors and reduce the potential hazards that might be caused by a misinterpretation of the local zoning ordinance.
Planning Department	No	-
Mitigation Planning Committee	No	-
Environmental Board/Commission	Yes	Town of Elma Conservation Board - seeks to preserve the open space to reduce unnecessary development in the town that might pose risk to the community and wildlife.
Open Space Board/Committee	Yes	Town of Elma Conservation Board - seeks to preserve the open space to reduce unnecessary development in the town that might pose risk to the community and wildlife.

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)

Resources	Available? (Yes/No)	Comments (available staff, responsibilities, integration of hazard mitigation):
Economic Development Commission/Committee	No	-
Public Works/Highway Department	Yes	The Highway Department maintains 40 miles of roads and repaves about 2.5 miles per year and patch the rest of the roads as needed. They also mow roadway shoulders, clear ditches, install culvert pipes, and repair guardrails.
Construction/Building/Code Enforcement Department	Yes	Responsibilities of the Town of Elma Building Department entail the Enforcement of Local and State Building codes in conjunction with Local Zoning enforcement encompassing approximately 36 square miles. All building permits are issued by this Department. Contractors Registration: Under Town Code 105 all contractors, peddlers and solicitors who work within the Town of Elma must be registered with the Town. An application is required with all proper insurances and coverages. The initial fee to register is $75.00 and $50.00 to renew every year thereafter. Fire Inspections: State law mandates that every Industrial, Commercial and Multiple Dwelling be inspected once per year. Property Maintenance: The Town Building Department is responsible for the enforcement of property maintenance under the State property maintenance code.
Emergency Management/Public Safety Department	Yes	OEM – updates of municipal emergency management plan and the abidance of the Federal Emergency Management regulations.
Warning Systems / Services (mass notification system, outdoor warning signals)	Yes	The town uses CodeRED to notify residents about local emergencies or issue critical alerts.
Maintenance programs to reduce risk (stormwater maintenance, tree trimming, etc.)	Yes	DPW – road maintenance, culvert upgrades, ditch clearing.
Mutual aid agreements	Yes	Fire
Other	Yes	Emergency Planning Committee was started to develop, maintain, and update the Town of Elma Disaster Plan, to better prepare the Town of Elma, emergency responders, and to protect residents and their property during a disaster or a large scale emergency. The overall goal is to minimize the impact caused by an emergency in the Town of Elma. The town also established the Elma Community Emergency Response Team (Elma CERT) which is a group of citizens whose main goal is to educate the residents on how to prepare and take care of themselves and immediate neighbors for up to 72 hours during a large scale emergency or disaster. First Responders may not be able to help everyone within that time period.
Technical/Staffing Capability		
Planners or engineers with knowledge of land development and land management practices	No	-
Engineers or professionals trained in building or infrastructure construction practices	No	-
Planners or engineers with an understanding of natural hazards	No	
Staff with expertise or training in benefit/cost analysis	No	-
Professionals trained in conducting damage assessments	No	-

Attachment: 60-Section-9.21-Elma-T-093021 (RES-2022-375 : Authorizing Adoption of the 2022 Erie County, NY Hazard Mitigation Plan)
